

Too close for comfort?

Use your phone to find out if you've been exposed to COVID-19, and help NYC stay open!

The COVID-19 Exposure Notifications tool gives you a simple added layer of protection to help stop any new spread of COVID in its tracks — and it's completely anonymous. Your name, number and location are not tracked.

Just scan the **QR code** above, download **COVID Alert NY** from your app store or, for iPhones, go to **Settings > Exposure Notifications > Turn on Exposure Notifications**. You'll be alerted if you've spent time near someone who has COVID-19.

Protect yourself and those around you. Get back out there and get Exposure Notifications today!
