Re: NYC Department of Transportation proposed renovation of the West 79th Street Rotunda Complex.
Full Board Vote: 40 In Favor 0 Against 1 Abstention 0 Present
Joint Committee Members: 13-0-0-0. Non-Committee Board Members: 2-0-0-0.

The Rotunda – West 79th Street at the Henry Hudson Parkway in Riverside Park. Proposal by the Department of Transportation (“DoT”) in conjunction with the Department of Parks and Recreation (“DPR”) to renovate and restore the Rotunda structure, including a series of bridges forming a roadway over the Amtrak rail lines right of way, a highway overpass, and several entrance and exit ramps to and from a traffic circle (collectively the “Project”).

Background: This resolution concerns the aspects of the Project relating to the configuration of vehicular, cycling and pedestrian access to and transit through the various ramps and roadways of the Rotunda structure, and the location and management of the staging areas to be used by contractors and subcontractors to store materials and equipment needed for the Project. There will be a separate resolution following the June Joint Committee meeting regarding issues related to the restoration and refurbishment of the Project in connection with an application or the Landmarks Preservation Commission.

The Rotunda structure is a contributing element to Riverside Park, an individually designated scenic New York City landmark.

The following facts were taken into consideration:
The Rotunda structure consists of three inter-connecting levels.

- At the top level of the Rotunda structure, the Project includes the restoration and resurfacing of the traffic circle, the ramps leading to and from the circle from the HH Parkway, and the ramps leading to the parking garage and Park paths. It will also include the restoration of the existing stepped pedestrian ramps to the mezzanine, as well as the creation of a new, multi-switch-back ADA-compliant pedestrian/handicap-accessible ramp leading to the mezzanine. The traffic circle will include a travel lane for cars using either of the ramps to/from the southbound HH Parkway as well as the turn-around for the M79 SBS bus, and will also include a dedicated, non-protected bike lane separated from the vehicular travel lane by a painted buffer. The separate bike lane will be painted green to conform to DoT’s typical palette. The exit ramp leading to the traffic circle will use painted shoulders to angle traffic entering the circle slightly to the left before entering the circle, and the existing stop sign at the end of the ramp will be retained. The purpose of angling traffic on the exit ramp is to maximize visibility by motorists of oncoming vehicle and cyclist traffic in the circle.
- The middle level is a pedestrian mezzanine consisting of a fountain surrounded by the inner walls of the annulus of the traffic circle, with an arched arcade leading to the western curve to steps that lead down to the sea rail and waterfront promenade.
- The ground level consists of a parking garage accessed by the ramps from the top level.
The materials and equipment needed to complete the Project will be stored on one of a pair of Little League ballfields located in the lower section of Riverside Park in an enclosed, fenced area at the “West 77th Street ballfields”. At the end of the Project, both ballfields will be fully renovated to first class fields.

The renovation and restoration of the elements of the Rotunda structure referenced in this resolution are necessary and appropriate.

THEREFORE BE IT RESOLVED THAT Community Board 7/Manhattan disapproves the project, conditioned upon the following changes to the proposed project:

(a) concerning the traffic circle and ramps, that DoT and the contract documents ensure that additional material safety measures and protections for pedestrians and cyclists to and through the traffic circle be implemented, including without limitation that:

- There be a physical protected separation between motorists and cyclists in the traffic circle, or an alternative separate route solely for cyclists that bypasses the traffic circle;
- Additional signage be installed in the traffic circle and on the roadways leading to and from it alerting motorists and cyclists at appropriate points that the roadway is shared between motorists and cyclists, and that the signs be supplemented with flashing warning lights, with the signage to include a “Yield” sign instructing motorists to yield to cyclists entering the traffic circle from the Greenway via the ramps at the west end;
- Tactile warning treatments such as rumble strips be installed on the principal motorist approaches to the traffic circle, especially the exit ramp from the HH Parkway and the continuation of West 79th Street through the HH Parkway overpass;
- A safe route avoiding the staging area be available for cyclists from the traffic circle to the Greenway throughout the project; and

(b) concerning the staging area, that DPR, DoT and the contract documents ensure that:

- The staging area consume no more than the north diamond/field at the West 77th Street ballfields, and that the south field and the access paths to that field from the south remain accessible and unimpeded;
- The south diamond/field at the West 77th Street ballfields be fully restored during an off-season interval during construction, and the north diamond/field be fully restored immediately upon the conclusion of the portion of the Project that requires the use of a staging area;
- Parking of private vehicles by anyone, including without limitation any general or sub-contractor or any other party visiting or working on the Project, be strictly prohibited in the staging area in the strongest possible terms;
- DPR using all reasonable efforts to assist the West Side Little League and the community to secure alternative fields for its annual seasons throughout the period of Project construction, and that the burden of the unavailability of one of the West 77th Street ballfields be shared and not borne solely by the WSLL; and
- Any RFP for the use of the renovated concessionaire/restaurant space in the restored Rotunda structure include a requirement that trash and garbage be stored and collected in a manner that eliminates the need for the current unsightly and odorous dumpsters now lining the pedestrian and cycling paths to the south of the Rotunda.

Re: 955 West End Avenue (West 106th Street)
Full Board Vote: 40 In Favor 0 Against 0 Abstentions 0 Present
Committee: 8-0-0-0. Non-Committee Board Member: 0-0-1-0.

After due deliberation, the following facts were taken into consideration:

- Applicant is not compliant with the current and approved Method of Operations, which excludes live music;
- Applicant has not mitigated excessive noise after years of complaints from the community and repeated promises to do so;
- Applicant has not been responsive to the community, following years of complaints;
- Applicant continued to post signage claiming late hours;
- Applicant continues to advertise illegal live music and karaoke on social media platforms;
- Applicant continues to use surrounding frontage for storage and garbage.

Re: West Side Little League.
Full Board Vote: 41 In Favor 0 Against 2 Abstentions 0 Present
Committee: 6-0-0-0. Non-Committee Board Member: 1-0-0-0.

The following facts were taken into consideration:

The West Side Little League (“WSLL”) was founded in 1986. It is a recognized 501(c)(3) not-for-profit led and staffed entirely by volunteers.

The WSLL currently serves approximately 800 players per year, ages 4-17 years, generally drawing players from neighborhoods residing from West 60th Street to West 120th Street, between Central Park West and the Hudson River.

The WSLL is structured to ensure inclusiveness by, among other things, providing scholarship support for players unable to pay the modest participation fees on a “no questions asked” basis, and by using ballfields throughout its geographic area of service to ensure fields of play are proximate to families in every neighborhood.

The majority of WSLL teams are co-ed.

The WSLL also sponsors 8 teams to play girls’ softball, and 8 teams under the rubric of a “Challengers” division consisting of children and youth ages 4-22 years who have documented special needs.

WSLL has four seasons. The majority of League play occurs in the Fall and Spring recreational teams. There is also a summer traveling/tournament schedule for advanced players, and a skills clinic in the winter. The WSLL requires players to play in the recreational group to qualify for the tournament/traveling teams. The tournament/traveling teams are connected with the national and international Little League operations, and can qualify for the Little League World Series.

Participation in the WSLL offers children opportunities for active recreation that are often severely limited in school due to confined spaces and the need to schedule large numbers of students. Healthy living habits are formed through positive reinforcement at an early age.

Engagement with the WSLL also offers players opportunities for social/emotional learning, including the development of conflict resolution and mediation skills and other life skills relating to healthy competition that cannot be taught with the same relevance and currency in traditional classroom settings.

The WSLL’s success in building community is evidenced by the older, accomplished players mentoring and supporting the younger and special needs players in the Challengers division.

THEREFORE, BE IT RESOLVED THAT Community Board 7/Manhattan applauds the work of the West Side Little League and commends its presence and efforts to build a sustainable, inclusive community on the Upper West Side.

Re: Manhattanhenge 2019, American Museum of Natural History.
Full Board Vote: 42 In Favor 0 Against 0 Abstentions 0 Present
Committee: 5-0-0-0. Non-Committee Board Members: 2-0-0-0.

The following facts were taken into consideration:
- July 11, 2019 will be the evening when the sunset aligns with the East West grid of Manhattan streets,
- The American Museum of Natural History will hold an event at the museum prior to the time of the sunset,
- 79th Street near Columbus Avenue is an ideal location to view the sunset as it drops between the buildings,
- This street closure is very popular and keeps people safe

THEREFORE, BE IT RESOLVED THAT Community Board 7/Manhattan approves the request by the American Museum of Natural History to close West 79th between Amsterdam and Columbus Avenues to traffic on Thursday July 11, 2019 from 7 to 9 pm for the annual Manhattanhenge celebration.

Re: Proposed Fetner Project at 266 West 96th Street (Broadway-West End Avenue.)
Full Board Vote: 0 In Favor 0 Against 0 Abstentions 0 Present

The following facts and concerns were taken into consideration in arriving at our conclusions:

- The former IRT substation at 266 West 96th Street is one of the few remaining soft sites owned by the City in Manhattan Community District 7 (MCD7),
- The City, through the Department of Housing Preservation and Development (HPD), plans to dispose the site at 266 West 96th Street for $1 to Fetner Properties,
- The City owned lot will constitute approximately 50 percent of the total developable site,
- When the City disposes a scarce resource such as public land, that resource should be used for a demonstrable public benefit that is aligned with the community’s needs and values,
- 25 percent of Manhattan CD7 residents were rent-burdened and 20 percent were severely rent-burdened in 2017;¹
- Approximately 43 percent of recently available rental units were available at 120 percent of Area Median Income (AMI), compared to 27 percent available at 80 percent AMI and just 9 percent available at 30 percent AMI.²

THEREFORE, BE IT RESOLVED THAT to justify the disposition for nominal disposition of City owned property at this valuable site, the following are minimum requirements for the affordable housing component:

1. That the overall development contains the greater of 50 percent affordable units or 50 percent of residential floor area designated for affordable units;
2. That the project contain a homeless set-aside at a minimum of 10 percent of the total building units;
3. That the affordable units contain a diverse mix of affordability tiers, but that HPD and Fetner should consider including the following tiers:
   a. 30% of units below 80% AMI;
   b. 60% of units below 100% AMI;
   c. A hard cap on all affordable units at or below 130% AMI;
4. That the different size apartments (studios, 1 bedroom and 2 bedroom units) be equitably distributed among both the market-rate and affordable units;
5. That all affordable units in the building be deemed “permanently affordable;”
6. That all tenants, regardless of rent-regulation status, be allowed and encouraged to access the building’s amenities

Community Board 7/Manhattan reserves the right to address other comments and concerns about the project at a future time.
