

CAPITAL PROJECTS DIVISION

Energy & Sustainability

The Energy and Sustainability team joins CPD with the mandate to develop and implement a comprehensive sustainability agenda to reduce NYCHA's energy and resource consumption and carbon footprint, improve resident health and wellbeing, and create environmentally friendly developments for NYCHA's residents and the surrounding communities. Building on a 20-year track record of successful energy efficiency initiatives, the team will now expand its activities to support and champion a comprehensive and strategic approach to all areas of sustainability, including energy efficiency and management, water efficiency and management, waste reduction and management, and healthy and comfortable indoor environments. The team will not only serve as a resource to the departments within CPD, but also help to connect CPD to Operations and Community Programs for a holistic approach to sustainability that invests in NYCHA's properties, staff and residents.
