

QUALITY ASSURANCE GROUP

Quality Assurance Group

The Quality Assurance Group (QA) monitors CPD's compliance with processes, procedures and regulations; and coordinates training services for the Capital Project Division's staff.

- QA performs independent audits of all active construction sites to ensure compliance with quality and safety codes, regulations and contract specifications as well as audits of various processes that support the construction work (payments, usage of scheduling software, data reporting, etc.)
- QA recently implemented the inclusion of Contractor Site-Specific Safety Programs (SSPs) prior to commencement of construction to reinforce that Safety is the #1 priority on our construction sites.
- QA is committed to offer professional development opportunities for CPD Staff. It evaluates, coordinates, monitors and recommends training courses to keep our professional staff abreast of the latest industry standards and practices and equips them with the tools to perform their duties more efficiently and effectively.
