

Crime Prevention ALERT

PROTECT YOUR MOTORCYCLE/SCOOTER

Compared to cars, motorcycles are lacking in anti-theft technology and thieves have a much easier time cracking their locks. A two-person team can easily lift a motorcycle into a van once the lock is compromised.

NYPD Crime Prevention Division

Motorcycle/Scooter theft prevention tips:

- Lock your ignition. The majority of thefts happen when the ignition is turned off but not locked.
- Park in a well-lit area and check on motorcycle periodically.
- Utilize a parking garage or other safe facility.
- Hide motorcycle with a cover or when in a parking garage, behind a car or other large object.
- Lock the forks and disc brakes.
- Make sure locks are wrapped as tightly as possible.
- Install a motorcycle alarm.
- If group riding, park and lock motorcycles together.
- Install a hidden shut-off switch.
- Install a GPS tracking device.
- When making a delivery, don't leave motorcycle/scooter running.

Stay Vigilant!

If you see a motorcycle being pushed away by an individual wearing a helmet, this could be an indication that a crime is being committed. Call 911 to report suspicious activity.
