	QM-003 Performance Monitoring	Forensic Anthropology
		Document ID: ANTH - 89667
Effective Date: 04/03/2024	Approved by: Director of Forensic Anthropology	Page: 1 of 3

**RELEASED UNDER THE AUTHORITY OF THE
FIRST DEPUTY CHIEF MEDICAL EXAMINER**

1. Policy

The Forensic Anthropology Unit (FAU) shall annually monitor staff's performance to verify that all personnel involved in anthropological analyses have maintained sufficient knowledge and skills to perform the tasks they are assigned.

2. Scope

This Quality manual document applies to all FAU personnel that will be performing anthropological casework analysis.

3. Definitions

Interlaboratory comparison: Interlaboratory comparison is an inspection of the same or similar items by two or more forensic service providers in accordance with predetermined conditions (AR3120:2023).

Intralaboratory comparison: Intralaboratory comparison is an inspection of the same or similar items within the same forensic service provider in accordance with predetermined conditions (AR3120:2023).

Performance monitoring activity: Performance monitoring activity is any activity used to evaluate staff's performance such as proficiency tests, interlaboratory comparisons, intralaboratory comparisons, and observation-based monitoring.

Proficiency testing: Proficiency testing is an evaluation of participant performance against pre-established criteria by means of interlaboratory comparisons (AR3120:2023).

4. Performance Monitoring

Each FAU analyst shall complete one proficiency test, intralaboratory comparison, or interlaboratory comparison annually covering at least one component/parameter of the FAU's laboratory scope of accreditation. Observation-based performance monitoring is also acceptable for monitoring staff performance if a proficiency test, intralaboratory comparison, or interlaboratory comparison is not available or deemed appropriate. Prior to participating in a performance monitoring activity, the FAU shall ensure:

- results are not known to the FAU analyst(s).
- only approved methods are used.
- the criteria for successful completion have been established.
- a mechanism is in place to check the quality of intralaboratory comparisons, interlaboratory comparisons, and observation-based monitoring.

Effective Date: 04/03/2024	Approved by: Director of Forensic Anthropology	Page: 2 of 3

Note: Performance monitoring activities are used to assess the individual’s anthropological analytical skills and/or assess their adherence to the FAU laboratory procedures. When the performance monitoring involves both areas of assessment, analytical skills and adherence to FAU laboratory procedures will be assessed separately.

Note: Proficiency tests are not required for non-routine procedures that are not outlined in the FAU’s Standard Operating Procedures.

- 4.1 **Performance Monitoring Plan:** The Quality Assurance (QA) Specialist is responsible for creating and maintaining a 4-year performance monitoring plan that covers the current cycle of accreditation. The 4-year plan shall include the annual proficiency test(s), and any additional performance monitoring activities considered necessary to ensure inclusion of a representative sample of the components/parameters and equipment/technologies listed on the scope of accreditation.

Note: The performance monitoring plan is a rolling plan which means every year requires modification and the addition of another year of performance monitoring activities.

- 4.2 **Scheduling:** The QA Specialist is responsible for scheduling all performance monitoring activities for FAU personnel. The QA Specialist shall give the FAU staff prior notice as to when the performance monitoring activities will be administered.

5. Proficiency Testing

The FAU shall ensure that at least one proficiency test is successfully completed per calendar year. Additionally, the FAU shall authorize release of the proficiency test results to ANAB from the test provider.

- 5.1 **Proficiency Test Provider:** When available and appropriate, the FAU shall use a proficiency test provider that is accredited to ISO/IEC 17043 and has applicable proficiency test(s) on its scope of accreditation (see AR3021:2020 clause 6.1.5.5). If an accredited proficiency test provider is not available, then the FAU shall seek approval from ANAB to use an alternate proficiency test provider.

5.1.1 **Alternate Proficiency Test Provider Approval:** The FAU shall fill out the appropriate section(s) of the ANAB Form “FM 3041: Forensic Alternative Proficiency Testing Request Form” and submit the form with any supplemental documents (if needed) to QualityMatters@anab.org for review.

6. **Remedial Training:** If an FAU analyst does not successfully complete a performance monitoring activity, he/she may be subject to a period of remedial training. The FAU Director will assess whether remedial training is necessary.

Effective Date: 04/03/2024	Approved by: Director of Forensic Anthropology	Page: 3 of 3

Remedial training may include review of specific SOPS, analytical methods, and proper use of testing equipment/software. After the analyst has completed the required remedial training, he/she may be required to repeat the performance monitoring activity, if appropriate. Instructions for remedial training and date of completion will be documented and kept with the performance monitoring activity results.

If remedial training is **not** deemed necessary, then the Director will document the reason(s) and include it with the performance monitoring activity results.

If the FAU Director does not successfully complete a performance monitoring activity, then the Deputy Chief Medical Examiner will determine if remedial training is needed. The Deputy Chief's decision will be recorded and kept with the performance monitoring activity results.

7. **Documentation:** Performance monitoring activity records shall be retained for a minimum of one complete accreditation cycle. The QA Specialist is responsible for maintaining the records. The following information should be retained, when appropriate:

- Component/parameter monitored.
- Type and design of monitoring activity.
- Expected results.
- Successful completion criteria.
- Completion date of monitoring activity.
- Name of monitoring activity provider.
- Original or copies of data and notes that support the conclusions.
- Indication of successful completion.
- Feedback on participant performance.
- Documentation for repeating a monitoring activity.
- Remedial training documentation (whether remedial training is needed), or corrective actions taken.

Additionally, the QA Specialist shall maintain an up-to-date electronic database for all performance monitoring activity records.
