

# MasterFormat® Numbers & Titles

March 29, 2011

MasterFormat is the specifications-writing standard for most commercial building design and construction projects in North America. It lists titles and section numbers for organizing data about construction requirements, products, and activities. By standardizing such information, MasterFormat facilitates communication among architects, specifiers, contractors and suppliers, which helps them meet building owners' requirements, timelines and budgets.

The numbers and titles presented here are identical to the numbers and titles contained in the MasterFormat® 2011 Update publication available for purchase from the Construction Specifications Institute (CSI) and Construction Specifications Canada (CSC).

Contents reflect MasterFormat titles and numbers as of February 2011. Consult <http://www.masterformat.com/revisions/index> for the most current additions and changes to MasterFormat.

MasterFormat numbers and titles are intentionally structured for anticipated growth and expansion in the future. CSI and CSC encourage all interested parties to provide input using the "Propose a Revision" link on <http://www.masterformat.com/revisions/index> so that as the built environment evolves so can MasterFormat. Updates to MasterFormat are made annually.
