**Indicator name:** Total WeCARE cases (000)

**Description:** The unduplicated total of Wellness, Comprehensive Assessment, Rehabilitation, and Employment (WeCARE) cases. WeCARE provides a continuum of services to help cash assistance clients with medical and/or mental health conditions that affect their employability to attain their maximum levels of self-sufficiency. Individuals referred to WeCARE receive a comprehensive biopsychosocial assessment to identify possible clinical conditions and social barriers that may affect their ability to participate in work-related activities. Based on the results of this assessment, WeCARE contractors determine an individual's functional capacity, develop a customized service plan, and provide a range of services tailored to meet a client's needs.

Indicator name: Wastewater treatment plant (WWTP) effluent meeting federal standards (%)
Description: The percent of treated wastewater leaving in-City treatment plants that meets federal standards for suspended solids and biochemical oxygen demand.
Source: Bureau of Wastewater Treatment, Division of Facility Operations.

Indicator name: WWTPs - Critical equipment days below minimum
Description: There are certain types of equipment at wastewater treatment plants, such as main sewage pumps, that are critical to the treatment of sewage. For each of these equipment types, each plant establishes the minimum number that must be in service in order to treat the industry standard of two times dry weather flow. This indicator reports the number of days that plants had less than this minimum amount of equipment in service.
Source: Bureau of Wastewater Treatment, Division of Facility Operations.

Indicator name: Percent of out-of-service critical equipment that is attributable to planned work
Description: Critical equipment removed from service for at least 24 hours in order to facilitate construction, modify the equipment or perform preventive maintenance tasks as a percentage of all critical equipment removed from service during an average month. Planned work is construction-related work, modifications and preventive maintenance. Unplanned work is corrective maintenance or maintenance for breakdowns.
Source: Bureau of Wastewater Treatment, Division of Facility Operations.

Indicator name: Percent of harbor survey stations meeting the swimmable standard of 5mg/L for dissolved oxygen
Description: The City collects and tests water samples from 35 harbor survey stations in the water bodies surrounding New York City. This indicator represents the percent of these stations that were in compliance with the 5mg/L swimmable standard for the amount of dissolved oxygen. The New York State Department of Environmental Conservation classifies water bodies and establishes water quality standards depending on the classification of the water body. The 5mg/L for dissolved oxygen threshold is the State's "swimmable" standard for dissolved oxygen. DEP applies this standard to all of its NYC harbor water sampling stations even though the State standard varies by water body and is, in fact, lower for some.

Indicator name: Bicycle lane miles installed
Description: The number of bicycle lane miles (Class I, II, and III) installed.
Source: Division of Traffic Operations – Bicycle Program.

Indicator name: Bicycle network connectivity index
Description: This figure measures the extent and completeness of the City’s network of bicycle routes, based on the number of choices a cyclist has for turning from one bicycle route onto another, without leaving the overall network. Each intersection along a bicycle route is scored from zero – meaning that the cyclist cannot turn onto another bicycle route without leaving the network, but can only continue on the same route – to eight – which means that two two-way bicycle routes intersect and a cyclist has eight choices for movement. The total connectivity figure is derived by adding the number of intersections covered by all the City’s bicycle routes, plus the scores from zero to eight for each of these intersections.

<td>Pedestrian volume index</td>
<td>An index of pedestrian volumes – the number of pedestrians traveling on the sidewalk at 50 sample locations around the City. Sampling is conducted during one week of May and one week of September at consistent times of day and days of the week. The figure shown is a ratio using the May 2007 count as a baseline; the May 2007 count is assigned a starting value of 100, and the ratio of each new pedestrian count to the baseline count is multiplied by 100 to give the new value. A value of 102 for Spring 2008 means that pedestrian volumes at sample locations increased by approximately two percent over the prior year. Identity of the 50 sample locations can be obtained on request to the CPR online Feedback Form (select “Contact CPR”) <a href="http://www.nyc.gov/html/ops/cpr/html/home/home.shtml">http://www.nyc.gov/html/ops/cpr/html/home/home.shtml</a>.</td>

DEPARTMENT OF DESIGN AND CONSTRUCTION

Indicator name: Capital commitment plan committed to within the first six months of the fiscal year (%)
Description: Dollar value of contracts registered within the first six months of the fiscal year as a percent of the adopted budget’s capital plan for the fiscal year.
Source: Contract registrations database.

Indicator name: Design Quality Indicator (DQI)
- Number of projects surveyed
Description: The total number of projects for which DQI mid-design or final design assessments were completed. DQI is a survey tool designed to establish the relative importance to project stakeholders of numerous design and construction elements; it measures the degree to which agreed upon priorities are satisfied during design, construction and completion. Participants, including contractors and professionals, DDC and client agency staff, as well as facility users, complete survey forms that identify and weigh specific project elements. These same participants subsequently rate how well the developing and completed work addressed those priorities.
Source: Public Buildings Division.

Indicator name: - Average project rating
Description: The actual DQI ratings for projects divided by the maximum possible project ratings as determined by participant priorities, expressed as a percentage. The maximum possible rating for each respondent is complete satisfaction for every item rated by the individual respondent, or 100 percent. Ratings are based on mid-design and final design assessments.
Source: Public Buildings Division.

Indicator name: Post-construction satisfaction surveys
- Number of projects surveyed
Description: The number of construction projects substantially completed during the last quarter of the prior fiscal year through the third quarter of the current fiscal year for which post-construction satisfaction surveys were sent. For the Preliminary Mayor’s Management Report, the reporting period is the last quarter of the prior fiscal year through the first quarter of the current fiscal year. Infrastructure projects involving minimal work at multiple sites throughout the City are typically excluded from surveys.
Source: DDC’s Client Survey database.

Indicator name: - Number of surveys sent
Description: The total number of surveys sent for construction projects substantially completed during the reporting period. For each public building completed, a survey is sent to the Commissioner of the client/sponsor agency. For each infrastructure project completed, surveys are sent to 10 randomly selected residents/businesses located in the vicinity of the work that was done.
Source: DDC’s Client Survey database.

Indicator name: - Number of surveys returned
Description: The total number of surveys returned to DDC.
