Office of Emergency Management
Indicator name: Emails responded to in 14 days (%)
Description: The percentage of emails answered in 14 calendar days or less. Responses are substantive and adequately address the question/issue raised by the customer. However, for complex inquiries that require research and additional action on the part of the agency, an acknowledgement which includes a description of the next step, as well as an estimated time frame for completion, is considered acceptable and is also reported as part of the 14 day response. Agencies track the additional time until a customer has a complete and full response.

**Indicator Definitions**

**Department of Parks & Recreation**

**Indicator name:** Parks rated acceptable for overall condition (%)
**Description:** The percent of park sites that pass an inspection based on 16 individual features. If three or more features are rated unacceptable based on the Parks Inspection Program’s criteria, or if one condition is judged a serious safety hazard, the entire site is rated unacceptable. Additionally, a failed cleanliness rating will automatically result in a site’s being rated unacceptable for overall condition. Park sites included in this rating are playgrounds, small parks, large parks, and greenstreets (street triangles and medians landscaped with horticultural installations).
**Source:** Operations & Management Planning Division.

**Indicator name:** – Overall condition of small parks and playgrounds (%)
**Description:** The percent of small parks (less than six acres) and playgrounds that pass an inspection based on 16 individual features. If three or more features are rated unacceptable based on the Parks Inspection Program’s criteria, or if one condition is judged a serious safety hazard, the entire site is rated unacceptable.
**Source:** Operations & Management Planning Division.

**Indicator name:** – Overall condition of large parks (%)
**Description:** The percent of large parks (more than six acres) that pass an inspection based on 16 individual features. If three or more features are rated unacceptable based on the Parks Inspection Program’s criteria, or if one condition is judged a serious safety hazard, the entire site is rated unacceptable.
**Source:** Operations & Management Planning Division.

**Indicator name:** – Overall condition of greenstreets (%)
**Description:** The percent of greenstreets that pass an inspection based on 16 individual features, as applicable. If three or more features are rated unacceptable based on the Parks Inspection Program’s criteria, or if one condition is judged a serious safety hazard, the entire site is rated unacceptable.
**Source:** Operations & Management Planning Division.

**Indicator name:** Parks rated “acceptable” for cleanliness (%)
**Description:** Cleanliness is a subset of overall condition. The percent of park sites with acceptable cleanliness is the percent rated acceptable for litter, broken glass, graffiti and weeds or ice, depending on the season. A park will fail for cleanliness if two of the four cleanliness features are unacceptable or if conditions for one feature are egregious. Park sites included in this rating are playgrounds, small parks, large parks, and greenstreets (street triangles and medians landscaped with horticultural installations).
**Source:** Operations & Management Planning Division.

**Indicator name:** – Cleanliness of small parks and playgrounds (%)
**Description:** Cleanliness is a subset of overall condition. The percent of small parks (six acres or less) and playgrounds with acceptable cleanliness is the percent rated acceptable for litter, broken glass, graffiti and weeds or ice, depending on the season.

Indicator name: Medicaid-only enrollees administered by HRA (000)
Description: At the end of the reporting period, the number of persons who are not recipients of cash assistance or SSI who receive Medicaid services administered by HRA. In January 2014, the majority of Medicaid-only (non- Cash Assistance Medicaid) eligible clients began to be enrolled in the New York State administered Medicaid program through the State Health Care Exchange. HRA Medicaid-only enrollees include only those participants who were enrolled in the program prior to January 2014. This number is expected to decline further over time as more new enrollees and current participants who re-enroll are transferred to the State program. Fiscal 2014 Medicaid enrollment data cannot be compared to previous years for these reasons.

Indicator name: Clients whom HRA helped obtain employment (000)
Description: HRA revised its methodology for calculating the number of clients who were assisted by the Agency in finding a job. Under the prior administration, HRA included applicants who were rejected for assistance and recipients of one-time emergency grants who were already employed. These groups are excluded from the new calculations. Currently, HRA counts only those placements for Cash Assistance clients and non-custodial parents obtained through HRA's contracted vendors, including Back to Work and WeCARE. HRA also counts placements achieved through non-contracted services, such as placements following a client’s engagement in an educational program. Job placements that are self-attained by clients while engaged in HRA programs and services are also counted. This revised calculation method has been applied to Fiscal Years 2013 and 2014 and therefore data for these two years are not comparable to previous fiscal years.

Indicator name: Medicaid recoveries and cost avoidance for fraud waste & abuse ($000,000)
Description: This indicator shows the amount recovered from concealment of income and resources by clients, provider audits for waste and abuse, collections from windfalls, personal injury lawsuit settlements and liens on properties and estates, and cost savings from various efforts such as Medicaid prescription drug fraud investigations and clients receiving Medicaid in more than one state. In Fiscal 2014, HRA has changed its method for calculating the Cash Assistance cost avoidance and recoveries indicator by no longer placing a value on reduced budget recommendations from HRA's Bureau of Eligibility Verification (BEV). Fiscal 2013 indicator values have also been updated to follow this logic, and therefore, Fiscal 2013 and 2014 results are comparable. HRA is updating its calculation of cost avoidance to more accurately reflect the type of recommendations likely to result in savings. In addition, the Medicaid Integrity Investigation Program concluded in January 2014 since most new Medicaid applications now take place through New York State of Health, the Official Health Plan Marketplace for New York State. As the number of HRA-administered Medicaid recipients has declined, HRA has seen diminished volume through the quarterly Medicaid PARIS match. Therefore, HRA anticipates that going forward the Medicaid cost avoidance values will gradually decline.

Indicator name: Cash Assistance recoveries and cost avoidance for fraud, waste and abuse ($000,000)
Description: This indicator shows, pursuant to Cash Assistance eligibility rules, the amount recovered from concealment of income and resources by clients, collections from windfalls, lawsuit settlements and liens on properties, repayment of emergency assistance, and federal reimbursement for assistance given while Social Security Disability benefit applications were pending. It also includes, cost savings from various efforts such as fraud investigations, case re-budgeting for income changes, and clients receiving Cash Assistance in more than one state. In Fiscal 2014, HRA has changed its method for calculating the Cash Assistance cost avoidance and recoveries indicator by no longer placing a value on reduced budget recommendations from HRA's Bureau of Eligibility Verification (BEV). Fiscal 2013 indicator values have also been updated to follow this logic, and therefore, Fiscal 2013 and 2014 results are comparable. HRA is updating its calculation of cost avoidance to more accurately reflect the type of recommendations likely to result in savings.

Indicator name: Supplemental Nutritional Assistance Program (SNAP) cost avoidance for fraud and abuse ($000,000)

Description: This indicator shows the cost avoidance from client fraud through concealment of income and resources and from clients receiving SNAP benefits in more than one state. In Fiscal 2014, HRA has changed its method for calculating the Cash Assistance cost avoidance and recoveries indicator by no longer placing a value on reduced budget recommendations from HRA’s Bureau of Eligibility Verification (BEV). Fiscal 2013 indicator values have also been updated to follow this logic, and therefore, Fiscal 2013 and 2014 results are comparable. Indicator name: Fair hearings upheld (%)

Description: In Fiscal 2014, HRA has changed its method for calculating Fair Hearings outcomes. The agency win rate includes issues that are affirmed and that are found to be correct at the time they were made and excludes client defaults. Defaults were included as Agency wins in prior periods but are excluded here because they do not reflect contested issues that are actually heard at hearings. The numerator of this indicator includes all fair hearing issues heard with an outcome of affirmation of the Agency’s decision or correct decision when originally made by the Agency, while the denominator includes all fair hearing issues heard with all outcomes including affirmation, correct when made, agency withdrawal, settled, reversal and other. This rate is different than the previously reported rate in that it is calculated based on all outcomes on hearings heard, as opposed to select outcomes and it does not include defaults in which the client fails to appear and the hearing is not actually heard.

Description: The percent of treated wastewater leaving in-City treatment plants that meets federal standards for suspended solids and biochemical oxygen demand.
Source: Bureau of Wastewater Treatment, Division of Facility Operations.

Indicator name: Harbor survey stations meeting the fishable standard of 5mg/L for dissolved oxygen
Description: The City collects and tests water samples from 35 harbor survey stations in the water bodies surrounding New York City. This indicator represents the percent of these stations that were in compliance with the 5mg/L fishable standard for the amount of dissolved oxygen. The New York State Department of Environmental Conservation classifies water bodies and establishes water quality standards depending on the classification of the water body. The 5mg/L for dissolved oxygen threshold is the State’s “fishable” standard for dissolved oxygen. DEP applies this standard to all of its NYC harbor water sampling stations even though the State standard varies by water body and is, in fact, lower for some.
Source: Bureau of Wastewater Treatment, Marine Sciences Section.

Indicator name: WWTPs – Critical equipment out-of-service (% below minimum)
Description: There are certain types of equipment at wastewater treatment plants, such as main sewage pumps, that are critical to the treatment of sewage. For each of these equipment types, each of the City’s 14 wastewater treatment plants establishes the minimum number which must be in service in order to treat the industry standard of two times dry weather flow. This indicator reports the total number of unit types that were below the required number at any time during the month as a percent of total critical equipment units (the aggregate of number and type).

Indicator name: Accounts receivable – Total balance ($000,000)
– Delinquent for more than 180 days ($000,000)
– Delinquent for more than one year ($000,000)
Description: The net value, in millions of dollars, of all charges due for water and sewer use, and the amount delinquent for more than 180 days and for more than one year. For a small percentage of customers who are billed on an annual basis, versus quarterly, bills are issued near the end of the fiscal year, resulting in a temporary spike in the accounts receivable. Most of these customers pay their annual bills during the first quarter of the new fiscal year, bringing the accounts receivable balance back down by the end of the July to October reporting period (Preliminary Mayor’s Management Report).

Indicator name: Bridges rated
- Good or very good (%) (calendar year)
- Fair (%)
- Poor (%)

Description: Federal and State laws mandate that bridge structures be inspected at least once every two years. Engineering consultants from the New York State Department of Transportation perform biennial inspections for all New York City bridge structures except pedestrian bridges and structures under 20 feet in length. Bridge structures not inspected by the State are inspected by DOT's Division of Bridges. Ratings are based on a scale from 1 to 7, and results are grouped in the following categories for each calendar year:
- Very good – ratings of 6.1 to 7.
- Good – ratings of 5 to 6.
- Fair – ratings of 3.1 to 4.9.
- Poor – ratings of 1 to 3.

Source: Division of Roadway Maintenance – Resource Management Unit.

Indicator name: Pedestrian volume index
Description: An index of pedestrian volumes – the number of pedestrians traveling on the sidewalk at 50 sample locations around the City. Sampling is conducted during one week of May and one week of September at consistent times of day and days of the week. The figure shown is a ratio using the May 2007 count as a baseline; the May 2007 count is assigned a starting value of 100, and the ratio of each new pedestrian count to the baseline count is multiplied by 100 to give the new value. A value of 102 for Spring 2008 means that pedestrian volumes at sample locations increased by approximately two percent over the prior year. Indicator name: Active construction projects: Difference between projected and scheduled duration (%)
Description: The differences between the expected and planned project durations (adjusted baseline schedules) as a percentage of the planned durations for all active construction projects, exclusive of programmatic scope changes and any holds placed on the project by the sponsor agency. Active projects are those where work has begun but is not yet completed, as well as those projects that were completed in the reporting month.
Source: Infrastructure and Public Buildings Divisions.

Indicator name: Projects audited (%)
Description: The percentage of active projects in construction during the reporting period for which at least one quality assurance/site safety audit was performed. Projects that are under $100,000 and those completed within the first six weeks of the reporting period or started within the last six weeks of the period are excluded.
Source: Quality assurance database.

Indicator name: Project inspections with at least one critical deviation (%)
Description: The number of quality assurance/site safety inspections where at least one critical deviation was identified as a percent of all completed inspections. Critical deviations are situations or conditions that require immediate attention and must be corrected before the inspector leaves the site. The assignment of “critical” to a deviation is independent of the risk, though most of them are also high risk. They fall into two general categories: Field conditions, including electrical hazards (overhead wire clearance, ungrounded circuits) and missing guard rails; and administrative deficiencies, including lack of documentation that workers have completed required OSHA construction safety training and missing health and safety plans.
Source: Quality assurance database.

Indicator name: Eligible projects with completed post-construction surveys (%)
Description: The number of eligible capital construction projects for which at least one completed customer survey was returned as a percent of the number of construction projects substantially completed during the last quarter of the prior fiscal year through the third quarter of the current fiscal year. Note: Infrastructure projects involving minimal work at multiple sites throughout the City are typically excluded from surveys.
Source: DDC’s Client Survey database.

Indicator name: Post-construction satisfaction surveys – Number of projects surveyed
Description: The number of construction projects substantially completed during the last quarter of the prior fiscal year through the third quarter of the current fiscal year for which post-construction satisfaction surveys were sent. For the Preliminary Mayor’s Management Report, the reporting period is the last quarter of the prior fiscal year through the first quarter of the current fiscal year. Infrastructure projects involving minimal work at multiple sites throughout the City are typically excluded from surveys.
Source: DDC’s Client Survey database.

Indicator name: Post-construction satisfaction – Surveys sent
Description: The total number of surveys sent for construction projects substantially completed during the reporting period. For each public building completed, a survey is sent to the Commissioner of the client/sponsor agency. For each infrastructure project completed, surveys are sent to 10 randomly selected residents/businesses located in the vicinity of the work that was done.

Indicator name: Respondents rating a completed project as adequate or better (%)
Description: The percentage of completed surveys returned with an overall satisfactory rating.
Source: DDC’s Client Survey database.

Indicator name: Design Quality Indicator (DQI) – Number of projects surveyed
Description: The total number of projects for which DQI mid-design or final design assessments were completed. DQI is a survey tool designed to establish the relative importance to project stakeholders of numerous design and construction elements; it measures the degree to which agreed upon priorities are satisfied during design, construction and completion. Participants, including contractors and professionals, DDC and client agency staff, as well as facility users, complete survey forms that identify and weigh specific project elements. These same participants subsequently rate how well the developing and completed work addressed those priorities.
Source: Public Buildings Division.

Indicator name: Design Quality Indicator – Average project rating
Description: The actual Design Quality Indicator (DQI) ratings for projects divided by the maximum possible project ratings as determined by participant priorities, expressed as a percentage. The maximum possible rating for each respondent is complete satisfaction for every item rated by the individual respondent, or 100 percent. Ratings are based on mid-design and final design assessments. DQI is a survey tool designed to establish the relative importance to project stakeholders of numerous design and construction elements; it measures the degree to which agreed upon priorities are satisfied during design, construction and completion.

Description: The number of emails sent to an agency through NYC.gov or to a publicly disclosed email address (e.g., customerservice@agency.nyc.gov).
Source: DDC’s correspondence tracking database.

Indicator name: Emails responded to in 14 days (%)
Description: The percentage of emails answered in 14 calendar days or less. Responses should be substantive and adequately address the question/issue raised by the customer. A simple acknowledgement is not considered an adequate response. However, for more complex inquiries that require research and action on the part of the agency, an acknowledgement which includes a description of the next step (either on the agency’s behalf, or the customer’s), as well as an estimated time frame for completion, is considered acceptable and can be reported as part of the 14 day response. Agencies must internally track the additional time until a customer has a complete and full response.

Indicator name: Economic development and housing proposals completed and presented to the public
Description: The number of proposals to promote sustainable mixed-use, mixed-income communities anchored by affordable housing in existing and emerging neighborhoods, and foster growth and development of the City's central and regional business districts, in the form of written reports, certified applications for zoning map or text amendments, website postings, and/or public presentations of recommended actions.
Source: Records maintained by DCP's Planning Coordination Division.

Indicator name: Neighborhood enhancement proposals completed and presented to the public
Description: The number of proposals to preserve the character of existing neighborhoods, promote sustainability, resiliency and long-term affordability, or improve physical and social infrastructure, in the form of written reports, certified applications for zoning map or text amendments, website postings, and/or public presentations of recommended actions.
Source: Records maintained by DCP's Planning Coordination Division.

Indicator name: Land use applications referred
Description: The number of land use applications certified as complete or referred for public review during the fiscal year. Land use applications are reviewed to ensure that they are complete and technically accurate.
Source: Land Use Management Information System (LUMIS), a CityNet mainframe computer application maintained by DCP's Land Use Review Division.

Indicator name: Environmental review applications completed
Description: The number of environmental review applications completed. An environmental review identifies and analyzes potential impacts that the development proposal may trigger (CEQR process).
Source: Environmental Assessment and Review.

Indicator name: Median time to refer land use applications (days)
Description: Median number of days from receipt of a land use application to the time it is referred for public review.

Indicator name: Completed customer requests for interpretation
Description: The sum of all requests for interpretation using a language other than English fulfilled by the agency via telephone (including Language Line, call centers, offices/reception desks and 311 transfer calls) and via face-to-face interaction with bilingual employees or contracted interpreters.
Source: Records maintained by DCP’s Planning Coordination Division.

Indicator name: CORE customer experience rating (0-100)
Description: An average score based on the rating of 24 conditions, including physical conditions (e.g., cleanliness, litter, seating) and customer service conditions (e.g. wait time, professionalism), for all agency walk-in facilities inspected, divided by the number of walk-in facilities inspected. Facilities are rated by trained City inspectors.
