STATEMENT OF BASIS AND PURPOSE

The City Planning Commission is amending its rules pursuant to its authority under Sections 192 and 1043 of the New York City Charter.

Amendments to Chapter 3 of Title 62 of the Rules of the City of New York would increase fees for the processing and review of City Environmental Quality Review (CEQR) applications and of land use applications by 8% to reflect increased labor costs. Supplemental land use application fees would be established for large projects of over of

500,000 square feet of floor area. A supplemental CEQR fee would also be required for projects for which a restrictive declaration to ensure compliance with project components related to the environment and/or mitigation of significant adverse impacts will be executed. The supplemental fees would capture the costs of the additional work that is required of Department staff in connection with large projects, and projects for which a restrictive declaration to ensure compliance with project components related to the environment and mitigation measures will be executed.

In addition to the changes described above, Section 3-07 of the land use fee rule has been clarified to establish that for certain authorizations, the fee for a project with non-residential uses is the same as the fee for a project with open uses. The lower fee for certain residential uses is not applicable if the project also contains a commercial or community facility use.

Street wall location and height and setback regulations in certain districts

R6A R6B R7A R7B R7D R7X R8A R8B R8X R9A R9D R9X R10A R10X

In the districts indicated, #street wall# location and height and setback regulations are set forth in this Section. The height of all #buildings or other structures# shall be measured from the #base plane#. The provisions of Sections 23-64 (Alternate Front Setbacks) and 23-65 (Tower Regulations) shall not apply, except as otherwise set forth for #buildings# in R9D and R10X Districts.

(a) #Street wall# location

R6A R7A R7D R7X R9D

(1) In the districts indicated, and for #buildings developed# or #enlarged# pursuant to the Quality Housing Program on #wide streets# in R6 or R7 Districts without a letter suffix, the #street wall# of any #development# or #enlargement# shall be located no closer to the #street line# than the closest #street wall# of an existing #building# to such #street line#, located on the same #block#, and within 150 feet of such #development# or #enlargement#. However, a #street wall# need not be located further from the #street line# than 15 feet. On #corner lots#, these #street wall# location provisions shall apply along only one #street line#.

* * *

(b) Setback regulations

R6A R6B R7A R7B R7D R7X R8A R8B R8X R9A R9D R9X R10A R10X

In the districts indicated, and for #buildings developed# or #enlarged# pursuant to the Quality Housing Program in other R6, R7, R8, R9 and R10 Districts, setbacks are required for all portions of #buildings# that exceed the maximum base height specified in the table in this Section. Such setbacks shall be provided in accordance with the following regulations:

(1) At a height not lower than the minimum base height or higher than the maximum base height specified in the table in this Section, a setback with a depth of at least 10 feet shall be provided from any #street wall# fronting on a #wide street#, and a setback with a depth of at least 15

feet shall be provided from any #street wall# fronting on a #narrow street#, except such dimensions may include the depth of any permitted recesses in the #street wall#.

- (2) On #narrow streets#, where a #street wall# is required to be located further than 10 feet from a #street line# in accordance with paragraph (a) of this Section, the depth of the required setback above the minimum base height may be reduced one foot for every foot that the #street wall# is required to be located beyond 10 feet of the #street line#, but in no event shall a setback less than 10 feet in depth be provided above the minimum base height.
- (3) These setback provisions are optional for any building wall that is either located beyond 50 feet of a #street line# or oriented so that lines drawn perpendicular to it, in plan, would intersect a #street line# at an angle of 65 degrees or less. In the case of an irregular #street line#, the line connecting the most extreme points of intersection shall be deemed to be the #street line#. Furthermore, dormers provided in accordance with the provisions of Section 23-621 may penetrate a required setback area.
- (4) In R9D Districts, for #developments# or #enlargements# that front upon an elevated rail line, at a height between grade level and 25 feet, a setback with a depth of at least 20 feet shall be provided from the #street line# fronting on such elevated rail line. The depth of such setback may be reduced by one foot for every foot that the depth of the #zoning lot#, measured perpendicular to the elevated rail line, is less than 110 feet, but in no event shall a setback less than 10 feet in depth be provided.

(c) Maximum building height

No #building or other structure# shall exceed the maximum building height specified in the table in this Section, except as otherwise provided below:

R9D R10X

In the districts indicated, any #building# or #buildings# or portions thereof which in the aggregate occupy not more than 40 percent of the #lot area# of a #zoning lot# (or, for #zoning lots# of less than 20,000 square feet, the percentage set forth in the table in Section 23-651), above a height of 85 feet above the #base plane#, is hereinafter referred to as a tower. Dormers permitted within a required setback area pursuant to Section 23-621 (Permitted obstructions in certain districts) shall not be included in tower coverage. Such tower or towers may exceed a height limit of 85 feet above the #base plane# provided:

- (1) at all levels, such tower is set back from the #street wall# of a base at least 15 feet along a #narrow street# and at least 10 feet along a #wide

street#, except such dimensions may include the depth of any permitted recesses in the #street wall#;

- (2) the base of such tower complies with the #street wall# location provisions of paragraph (a) of this Section and the setback provisions of paragraph (b) of this Section; and
- (3) the minimum coverage of such tower above a height of 85 feet above the #base plane# is at least 33 percent of the #lot area# of the #zoning lot#; however, such minimum coverage requirement shall not apply to the highest 40 feet of such tower.

~~Dormers permitted within a required setback area pursuant to Section 23-621 (Permitted obstructions in certain districts) shall not be included in tower coverage.~~

- (4) In R9D Districts, the highest four #stories#, or as many #stories# as are located entirely above a height of 165 feet, whichever is less, shall have a #lot coverage# of at least 50 percent of the #story# immediately below such #stories#, and a maximum #lot coverage# of 80 percent of the #story# immediately below such #stories#. Such reduced #lot coverage# shall be achieved by one or more setbacks on each face of the tower, where at least one setback on each tower face has a depth of at least four feet, and a width that, individually or in the aggregate, is equal to at least 10 percent of the width of such respective tower face. For the purposes of this paragraph, (c)(4), each tower shall have four tower faces, with each face being the side of a rectangle within which the outermost walls of the highest #story# not subject to the reduced #lot coverage# provisions have been inscribed. The required setbacks shall be measured from the outermost walls of the #building# facing each tower face. Required setback areas may overlap.

- (5) In R9D Districts, for towers fronting on elevated rail lines, the outermost walls of each #story# located entirely above a height of 85 feet shall be inscribed within a rectangle. The maximum length of any side of such rectangle that is parallel or within 45 degrees of being parallel to such elevated rail line shall be 125 feet, or 75 percent of the frontage of the #zoning lot# along such elevated rail line, whichever is less.

R6A R6B R7A R7B R7D R7X R8A R8B R8X R9A R9D R9X R10A R10X

- (d) Additional regulations

In the districts indicated, and for #buildings developed# or #enlarged# pursuant to the Quality Housing Program in other R6, R7, R8, R9 and R10 Districts, the following additional regulations shall apply:

* * *

- (5) In R9D Districts, where a #building# on an adjacent #zoning lot# has #dwelling unit# windows located within 30 feet of a #side lot line# of the #development# or #enlargement#, an open area extending along the entire length of such #side lot line# with a minimum width of 15 feet shall be provided. Such open area may be obstructed only by the permitted obstructions set forth in Section 23-44 (Permitted Obstructions in Required Yards or Rear Yard Equivalents).

~~In all C4-5D Districts~~ the districts indicated and in C2 Districts mapped within R7D or R9D Districts, #uses# on the ground floor or within five feet of #curb level# shall be limited to non-#residential uses# which shall extend along the entire width of the #building#, and lobbies, entrances to subway stations and #accessory# parking spaces, provided such lobbies and entrances do not occupy, in total, more than 25 percent of the #street wall# width of the #building# or more than 20 linear feet of #street wall# frontage on a #wide street# or 30 linear feet on a #narrow street#, whichever is less. Such non-#residential uses# shall have a minimum depth of 30 feet from the #street wall# of the #building#. In C6-3D Districts, a vertical circulation core shall be permitted within such minimum 30 foot depth.

Enclosed parking spaces, or parking spaces within a #building#, including such spaces #accessory# to #residences#, shall be permitted to occupy the ground floor provided they are located beyond 30 feet of the #street wall# of the #building#. However, loading berths serving any permitted #use# in the #building# may occupy up to 40 feet of such #street# frontage and, if such #building# fronts on both a #wide street# and a #narrow street#, such loading berth shall be located only on a #narrow street#.

In C6-3D Districts, each ground floor level #street wall# of a #commercial# or #community facility use# shall be glazed with materials which may include show windows, glazed transoms or glazed portions of doors. Such glazing shall occupy at least 70 percent of the area of each such ground floor level #street wall#, measured to a height of 10 feet above the level of the adjoining sidewalk, public access area or #base plane#, whichever is higher. Not less than 50 percent of the area of each such ground floor level #street wall# shall be glazed with transparent materials and up to 20 percent of such area may be glazed with translucent materials. However, where the #street wall# or portion thereof fronts an elevated rail line or is located within 50 feet of a #street wall# that fronts an elevated rail line, the glazing requirement of the area of the ground floor level #street wall# may be reduced from 70 percent to 50 percent, and not less than 35 percent of the area of each such ground floor level #street wall# shall be glazed with transparent materials and up to 15 percent of such area may be glazed with translucent materials. Furthermore, all security gates installed after (date of enactment), that are swung, drawn or lowered to secure commercial or community facility premises shall, when closed, permit visibility of at least 75 percent of the area covered by such gate when viewed from the #street#, except that this provision shall not apply to entrances or exits to parking garages.

- (c) Setback regulations

In the districts indicated, and in C1 or C2 Districts when mapped within R6A, R6B, R7A, R7B, R7D, R7X, R8A, R8B, R8X, R9A, R9D, R9X, R10A or R10X Districts, and in other #Commercial Districts# where the #residential# portion of a #mixed building# is #developed# or #enlarged# pursuant to the Quality Housing Program, all #developments# or #enlargements# shall comply with the following provisions:

- (1) At a height not lower than the minimum base height or higher than the maximum base height specified in Table A of this Section for #buildings# in contextual districts, and Table B for #buildings# in non-contextual districts, a setback with a depth of at least 10 feet shall be provided from any #street wall# fronting on a #wide street#, and a setback with a depth of at least 15 feet shall be provided from any #street wall# fronting on a #narrow street#, except such dimensions may include the depth of any permitted recesses in the #street wall#.
- (2) These setback provisions are optional for any building wall that is either located beyond 50 feet of a #street line# or oriented so that lines drawn perpendicular to it in plan would intersect a #street line# at an angle of 65 degrees or less. In the case of an irregular #street line#, the line connecting the most extreme points of intersection shall be deemed to be the #street line#. Furthermore, dormers provided in accordance with the provisions of paragraph (a) of this Section may penetrate a required setback area.
- (3) In C6-3D Districts, for #developments# or #enlargements# that front upon an elevated rail line, at a height not lower than 15 feet or higher than 25 feet, a setback with a depth of at least 20 feet shall be provided from any #street wall# fronting on such elevated rail line, except that such dimensions may include the depth of any permitted recesses in the #street wall# and the depth of such setback may be reduced by one foot for every foot that the depth of the #zoning lot#, measured perpendicular to the elevated rail line, is less than 110 feet, but in no event shall a setback less than 10 feet in depth be provided above the minimum base height.
 - (i) The setback provisions of paragraph (c) of this Section are optional for such #developments# or #enlargements# where a building wall is within the area bounded by two intersecting #street lines# and lines parallel to and 70 feet from such #street lines#.
 - (ii) Where such #development# or #enlargement# is adjacent to a #public park#, such setback may be provided at grade for all portions of #buildings# outside of the area bounded by two intersecting #street lines# and lines parallel to and 70 feet from such #street lines#, provided that any area unoccupied by a #building# shall be improved to Department of

Transportation standards for sidewalks, shall be at the same level as the adjoining public sidewalks, and shall be accessible to the public at all times.

(d) Maximum building height

No #building or other structure# shall exceed the maximum building height specified in Table A of this Section for #buildings# in contextual districts, or Table B for #buildings# in non-contextual districts, except as provided in this paragraph, (d), inclusive:

C6-3D C6-4X

In the districts indicated, any #building# or #buildings#, or portions thereof, which in the aggregate occupy not more than 40 percent of the #lot area# of a #zoning lot# (or, for #zoning lots# of less than 20,000 square feet, the percentage set forth in the table in Section 33-454) above a height of 85 feet above the #base plane#, is hereinafter referred to as a tower. Dormers permitted within a required setback area pursuant to paragraph (a) of this Section shall not be included in tower #lot coverage#. Such tower or towers may exceed a height limit of 85 feet above the #base plane#, provided:

- (1) at all levels, such tower is set back from the #street wall# of a base at least 15 feet along a #narrow street#, and at least 10 feet along a #wide street#, except such dimensions may include the depth of any permitted recesses in the #street wall#;
- (2) the base of such tower complies with the #street wall# location provisions of paragraph (b) of this Section, and the setback provisions of paragraph (c) of this Section; and
