**Technical Memorandum
Errata for Traffic Safety – Crash Data Assessment**

**Douglaston Parkway &
Northern Boulevard Rezoning**

**241-15 Northern Boulevard & 43-80 Douglaston Parkway, Queens, New York
Block 8092, Tax Lots 5 & 39 and portions of Lots 205, 25, 28 & 33**

**Application for a Zoning Map Amendment
from R1-2 to R6A and R6A/C1-2
to Zoning Sectional Map 11a**

**CEQR Reference Number: 06DCP092Q
ULURP Reference Number: 060432ZMQ**

Lead Agency:

Department of City Planning
120 Broadway, 31st Floor
New York, NY 10271

Background

This memorandum was prepared to address an error contained in the EAS for 241-15 Northern Blvd & 43-80 Douglaston Parkway, Queens New York. The EAS was issued a Negative Declaration on September 20th, 2018. The traffic safety - crash data assessment of the Transportation Analysis section of the EAS erroneously indicated that no accidents had occurred at the intersection of Douglaston Parkway and Northern Blvd over a 3-year period from 2015-2018. This error resulted from a flawed sorting of online data retrieved from NYC DOITT Open Data Portal. It was during this hearing that the erroneous finding for this intersection was discussed and subsequently reviewed at the suggestion of the Subcommittee Board. Prior to Community Board 11 Hearing on October 22, 2018, it was determined that the traffic safety summary of the EAS were in error. After review of the data it was determined that the Douglaston Parkway and Northern Blvd intersection was below thresholds set in the CEQR technical manual that would identify the intersection as a high crash location requiring further assessment. Therefore, the project would not result in a significant environmental impact. This correction was documented in a memorandum submitted to Environmental Assessment Review Division Transportation Staff on January 8, 2019. The corrected analysis is contained below.

Revised Traffic Safety Assessment

Data on crashes involving vehicles, pedestrians and/or cyclists at study area intersections was obtained from NYPD Motor Vehicle Collision Data¹ for the most recent three-year period available. This data was analyzed to determine if any of the studied locations may be classified as high crash locations and whether vehicle or pedestrian trips and any street network changes resulting from the Proposed Actions may adversely affect vehicular and pedestrian safety in the area. Pursuant to Chapter 16 Section 341 of the 2014 CEQR Technical Manual, a high crash area is one where there are 48 or more total crashes (reportable and non-reportable) or five or more pedestrian/bicycle injury crashes in any consecutive 12 months of the most recent 3-year period for which data is available. The results are summarized in Table 1 below which indicated no more than 23 accidents during any calendar year and no more than 25 during any 12-month period from 2015-2018. All NYPD crash data for the identified Study Intersection is provided in Table 2 below. As indicated below, the intersection of Douglaston Parkway and Northern Boulevard does not qualify as a “high-crash location” pursuant to CEQR Methodology and therefore the findings of the EAS Traffic Safety Assessment and Transportation Section that received a Negative Declaration Determination of Significance on September 20th, 2018 remain unchanged; t the project would not result in a significant safety impact.

Year	Number of Crashes	Number of Motorists Injured	Number of Motorists Killed	Number of Pedestrians/Cyclists Injured	Number of Pedestrians/Cyclists Killed
2018	23	7	0	2	0
2017	20	1	0	1	0
2016	21	3	0	0	0
2015	6	0	0	0	0
