

**NEGATIVE DECLARATION**

**Statement of No Significant Effect**

Pursuant to Executive Order 91 of 1977, as amended, and the Rules of Procedure for City Environmental Quality Review, found at Title 62, Chapter 5 of the Rules of the City of New York and 6 NYCRR, Part 617, State Environmental Quality Review, the Department of City Planning acting on behalf of the City Planning Commission assumed the role of lead agency for the environmental review of the proposed actions. Based on a review of information about the project contained in this environmental assessment statement (EAS) and any attachments hereto, which are incorporated by reference herein, the lead agency has determined that the proposed actions would not have a significant adverse impact on the environment.

**Reasons Supporting this Determination**

The above determination is based on information contained in this EAS, which finds the proposed actions sought before the City Planning Commission would not have a significant adverse impact on the environment. Reasons supporting this determination are noted below.

**Land Use, Zoning, and Public Policy**

A detailed analysis of land use, zoning, and public policy is included in the EAS. The proposed actions are a Zoning Map Amendment to rezone Block 9954, part of Lots 56, 1, 70, 66, and 49 from R3X and R6A/C2-4 zoning districts to an R7A/C2-4 zoning district; a zoning text amendment to enlarge the Special Downtown Jamaica District (SDJD) to be coterminous with the rezoning boundary; a zoning text amendment to the SDJD to remove the project area from the Inclusionary Housing Development Area (IHDA); and text amendments to the SDJD to account for Mandatory Inclusionary Housing regulations within the SDJD. The proposed actions would facilitate the development of an 8-story, 80-foot-tall mixed-use residential and community facility building on Lot 56 with 36 dwelling units and 4,500 gsf of community facility space on the ground floor in the Jamaica Estates neighborhood of Queens, Community District 8. The proposed actions are anticipated to result in a change in land use on Lot 56 by the analysis year, however, given the existing character of Hillside Avenue, a wide commercial corridor developed with low- to medium-density mixed residential/commercial uses, the change in land use and zoning would not constitute a significant adverse impact.

**Hazardous Materials, Air Quality, and Noise**

An (E) designation (E-591) related to hazardous materials, air quality, and noise would be established as part of the approval of the proposed actions. Refer to "Determination of Significance Appendix: (E) designation" below for the applicable (E) designation requirements. The hazardous materials, air quality, and noise analyses conclude that with the (E) designation in place, the proposed actions would not result in a significant adverse impact related to hazardous materials, air quality, or noise.

*No other significant effects upon the environment that would require the preparation of a Draft Environmental Impact Statement are foreseeable. This Negative Declaration has been prepared in accordance with Article 8 of the New York State Environmental Conservation Law (SEQRA). Should you have any questions pertaining to this Negative Declaration, you may contact Rachel Antelmi at [rantelmi@planning.nyc.gov](mailto:rantelmi@planning.nyc.gov).*

**SEQRA Classification: Unlisted**

Determination of Significance Appendix

The Proposed Action(s) were determined to have the potential to result in changes to development on the following site(s):

Development Site	Borough	Block and Lot
Projected Development Site 1	QN	9954/56

(E) Designation Requirements

To ensure that the proposed actions would not result in significant adverse impacts related to hazardous materials, air quality, and noise an (E) designation (**E-591**) would be established as part of approval of the proposed actions on **Projected Development Site 1** as described below:

Development Site	Hazardous Materials	Air Quality	Noise
Projected Development Site 1	X	X	X

Hazardous Materials

The (E) designation requirements applicable to **Projected Development Site 1** for hazardous materials would apply as follows:

*Task 1-Sampling Protocol*

*The applicant submits to OER, for review and approval, a Phase I of the site along with a soil, groundwater and soil vapor testing protocol, including a description of methods and a site map with all sampling locations clearly and precisely represented. If site sampling is necessary, no sampling should begin until written approval of a protocol is received from OER. The number and location of samples should be selected to adequately characterize the site, specific sources of suspected contamination (i.e., petroleum based contamination and non-petroleum based contamination), and the remainder of the site's condition. The characterization should be complete enough to determine what remediation strategy (if any) is necessary after review of sampling data. Guidelines and criteria for selecting sampling locations and collecting samples are provided by OER upon request.*

*Task 2-Remediation Determination and Protocol*

*A written report with findings and a summary of the data must be submitted to OER after completion of the testing phase and laboratory analysis for review and approval. After receiving such results, a determination is made by OER if the results indicate that remediation is necessary. If OER determines that no remediation is necessary, written notice shall be given by OER.*

*If remediation is indicated from test results, a proposed remediation plan must be submitted to OER for review and approval. The applicant must complete such remediation as determined necessary by OER. The applicant should then provide proper documentation that the work has been satisfactorily completed.*

*A construction-related health and safety plan should be submitted to OER and would be implemented during excavation and construction activities to protect workers and the community from potentially significant adverse impacts associated with contaminated soil, groundwater and/or soil vapor. This plan would be submitted to OER prior to implementation.*

**Project Name: 185-17 Hillside Ave Rezoning**

**CEQR # 20DCP075Q**

**SEQRA Classification: Unlisted**

Air Quality

The (E) designation requirements for air quality would apply as follows:

***Projected Development Site 1:*** Any new residential and/or community facility development or enlargement on the above referenced property must ensure that the heating, ventilation, and air conditioning (HVAC) stack is located at the highest tier or at least 98 feet above grade to avoid any significant adverse air quality impacts.

Noise

The (E) designation requirements for noise would apply as follows:

***Projected Development Site 1:*** To ensure an acceptable interior noise environment, future residential/community facility uses must provide a closed-window condition with a minimum of 31 dBA window/wall attenuation on all facades to maintain an interior noise level not greater than 45 dBA for residential and community facility uses. To maintain a closed-window condition, an alternate means of ventilation must also be provided. Alternate means of ventilation includes, but is not limited to, air conditioning.
