

NEGATIVE DECLARATION

Statement of No Significant Effect

Pursuant to Executive Order 91 of 1977, as amended, and the Rules of Procedure for City Environmental Quality Review, found at Title 62, Chapter 5 of the Rules of the City of New York and 6 NYCRR, Part 617, State Environmental Quality Review, the Department of City Planning acting on behalf of the City Planning Commission assumed the role of lead agency for the environmental review of the proposed actions. Based on a review of information about the project contained in this environmental assessment statement (EAS) and any attachments hereto, which are incorporated by reference herein, the lead agency has determined that the proposed actions would not have a significant adverse impact on the environment.

Reasons Supporting this Determination

The above determination is based on information contained in this EAS, which finds the proposed actions sought before the City Planning Commission would not have a significant adverse impact on the environment. Reasons supporting this determination are noted below.

Land Use, Zoning, and Public Policy

A detailed analysis of land use, zoning, and public policy is included in the EAS. The Applicant, Yitzchok Stern, seeks a zoning map amendment (Zoning Sectional Map 22c) and a text amendment (Appendix F). The proposed rezoning would rezone an area mapped at a depth of 100 feet from 18th Ave between 48th and 49th St from an R5 to an R6B zoning district. It would include a C2-4 commercial overlay mapped at a depth of 35 feet from 18th Ave. The rezoning area (Block (5449, Lots 34 (p/o), 35, 36, 37, 41 42 and 44) is located in the Borough Park section of Brooklyn's Community District 12. The proposed rezoning action would facilitate the development of a three story mixed-use commercial and residential building. The text amendment would require future residential development to provide permanent affordable housing (Mandatory Inclusionary Housing, MIH). The analysis concludes that the proposed actions would not introduce a new land use, nor affect the existing mixed-use character of the area, nor affect public policy, which represent the thresholds of impact significance in the 2020 CEQR Technical Manual. Therefore, no significant adverse impacts related to Land Use, Zoning, and Public Policy would result from the proposed actions.

Air Quality, and Noise

An (E) designation (E-609) related to air quality, and noise would be established as part of the approval of the proposed actions. Refer to "Determination of Significance Appendix: (E) designation" for the applicable (E) designation requirements. The air quality and noise analyses conclude that with the (E) designation in place, the proposed actions would not result in a significant adverse impact related to air quality or noise.

No other significant effects upon the environment that would require the preparation of a Draft Environmental Impact Statement are foreseeable. This Negative Declaration has been prepared in accordance with Article 8 of the New York State Environmental Conservation Law (SEQRA). Should you have any questions pertaining to this Negative Declaration, you may contact Katherine Glass at kglass@planning.nyc.gov.

SEQRA Classification: Unlisted

Determination of Significance Appendix

The Proposed Action(s) were determined to have the potential to result in changes to development on the following site(s):

Development Site	Borough	Block and Lot
Projected Development Site 1	Brooklyn	Block 5449, Lot 37
Projected Development Site 2	Brooklyn	Block 5449, Lot 35
Projected Development Site 3	Brooklyn	Block 5449, Lot 36
Projected Development Site 4	Brooklyn	Block 5449, Lot 42
Projected Development Site 5	Brooklyn	Block 5449, Lot 44

(E) Designation Requirements

To ensure that the proposed actions would not result in significant adverse impacts related to hazardous materials, air quality, and noise an (E) designation (**E-609**) would be established as part of approval of the proposed actions on **Projected Development Sites 1-5**, as described below:

Development Site	Hazardous Materials	Air Quality	Noise
Projected Development Site 1		X	X
Projected Development Site 2		X	X
Projected Development Site 3		X	X
Projected Development Site 4		X	X
Projected Development Site 5		X	X

Air Quality

The (E) designation requirements for Air Quality would apply as follows:

Block 5449, Lot 37 (Development Site 1): Any new residential or commercial development on the above-referenced property must exclusively use natural gas as the type of fuel for heating, ventilating, air conditioning (HVAC), and hot water system(s), and must be fitted with low NOx (30 ppm) burners, ensure that the stack is located at the building's highest level and at a minimum of 58 feet above grade, and that the stack is located at least 30 feet from the southern lot line facing 49th Street and at least 20 feet from the western lot line facing Old New Utrecht Road to avoid any potential significant adverse air quality impacts.

Block 5449, Lot 35 (Site 2): Any new residential or commercial development on the above referenced property must ensure that the heating, ventilating, air conditioning (HVAC), and hot water system(s) stack is located at the building's highest level and at a minimum of 58 feet above grade and that the stack is located at least 40 feet from the southern lot line facing 49th Street to avoid any potential significant adverse air quality impacts.

Project Name: 1776 48th Street Rezoning

CEQR # 20DCP108K

SEQRA Classification: Unlisted

Block 5449, Lot 36 (Site 3): Any new residential or commercial development on the above referenced property must exclusively use natural gas as the type of fuel for heating, ventilating, air conditioning (HVAC), and hot water system(s) and must be fitted with low NOx (30 ppm) burners, ensure that the stack is located at the building's highest level at a minimum of 58 feet above the grade, and that the stack is located at least 30 feet from the southern lot line facing 49th Street and 15 feet from the western lot line facing Old New Utrecht Road to avoid any potential significant adverse air quality impacts.

Block 5449, Lot 42 (Site 4): Any new residential or commercial development on the above referenced property must exclusively use natural gas as the type of fuel for heating, ventilating, air conditioning (HVAC), and hot water system(s) and must be fitted with low NOx (30 ppm) burners, ensure that the stack is located at the building's highest level at a minimum of 58 feet above the grade, and that the stack is located at least 40 feet from the northern lot line facing 48th Street and 25 feet from the western lot line facing Old New Utrecht Road to avoid any potential significant adverse air quality impacts.

Block 5449, Lot 44 (Site 5): Any new residential or commercial development on the above referenced property must ensure that the heating, ventilating, air conditioning (HVAC), and hot water system(s) stack is located at the building's highest level and at a minimum of 58 feet above grade and that the stack is located at least 40 feet from the northern lot line facing 48th Street and 20 feet from the eastern lot line facing 18th Avenue to avoid any potential significant adverse air quality impacts.

Noise

The (E) designation requirements for noise would apply as follows:

Block 5449, Lot 37 (Projected Development Site 1): To ensure an acceptable interior noise environment, future residential/commercial office uses must provide a closed-window condition with a minimum of 33 dBA window/wall attenuation on all facades facing 48th Street and the facades facing 18th Avenue within 50 feet of 48th Street and the facades facing Old New Utrecht Road within 50 feet of 48th Street and 31 dBA of attenuation on all facades facing 49th Street and the facades facing 18th Avenue beyond 50 feet from 48th Street and 28 dBA of attenuation on the facades facing Old New Utrecht Road beyond 50 feet from 48th Street to maintain an interior noise level not greater than 45 dBA for residential uses or not greater than 50 dBA for commercial office uses as illustrated in the EAS. To maintain a closed-window condition, an alternate means of ventilation must also be provided. Alternate means of ventilation includes, but is not limited to, air conditioning.

Block 5449, Lot 35 (Projected Development Site 2): To ensure an acceptable interior noise environment, future residential/commercial office uses must provide a closed-window condition with a minimum of 33 dBA window/wall attenuation on all facades facing 48th Street and the facades facing 18th Avenue within 50 feet of 48th Street and the facades facing Old New Utrecht Road within 50 feet of 48th Street and 28 dBA of attenuation on all other facades to maintain an interior noise level not greater than 45 dBA for residential/commercial office uses as illustrated in the EAS. To maintain a closed-window condition, an alternate means of ventilation must also be provided. Alternate means of ventilation includes, but is not limited to, air conditioning.

Block 5449, Lot 36 (Projected Development Site 3): To ensure an acceptable interior noise environment, future residential uses must provide a closed-window condition with a minimum of 33 dBA window/wall attenuation on all facades facing 48th Street and the facades facing 18th Avenue within 50 feet of 48th Street and the facades facing Old New Utrecht Road within 50 feet of 48th Street and 28 dBA of attenuation

Project Name: 1776 48th Street Rezoning

CEQR # 20DCP108K

SEQRA Classification: Unlisted

on all other facades to maintain an interior noise level not greater than 45 dBA for residential uses as illustrated in the EAS. To maintain a closed window condition, an alternate means of ventilation must also be provided. Alternate means of ventilation includes, but is not limited to, air conditioning.

Block 5449, Lot 42 (Projected Development Site 4): *To ensure an acceptable interior noise environment, future residential uses must provide a closed-window condition with a minimum of 28 dBA window/wall attenuation on all facades to maintain an interior noise level not greater than 45 dBA for residential uses. To maintain a closed-window condition, an alternate means of ventilation must also be provided. Alternate means of ventilation includes, but is not limited to, air conditioning.*

Block 5449, Lot 44 (Projected Development Site 5): *To ensure an acceptable interior noise environment, future residential uses must provide a closed-window condition with a minimum of 28 dBA window/wall attenuation on all facades to maintain an interior noise level not greater than 45 dBA for residential uses. To maintain a closed-window condition, an alternate means of ventilation must also be provided. Alternate means of ventilation includes, but is not limited to, air conditioning.*
