

B18135: AGE BY DISABILITY STATUS BY HEALTH INSURANCE COVERAGE STATUS

Universe: Civilian noninstitutionalized population

2017 American Community Survey 1-Year Estimates

New York City and Boroughs

Age, Disability, Health Insurance Coverage	New York City		Bronx		Brooklyn		Manhattan		Queens		Staten Island	
	Estimate	Margin of Error	Estimate	Margin of Error								
Total civilian noninstitutionalized population	8,557,254	+/-4,124	1,449,818	+/-2,803	2,634,931	+/-2,107	1,653,585	+/-2,120	2,343,840	+/-1,851	475,080	+/-1,214
Under 19 years:	1,878,084	+/-3,658	385,745	+/-1,930	632,146	+/-1,899	255,556	+/-1,707	496,642	+/-1,650	107,995	+/-864
With a disability:	75,286	+/-6,072	31,190	+/-3,868	19,643	+/-2,308	9,015	+/-2,104	13,452	+/-2,372	1,986	+/-1,064
With health insurance coverage:	74,063	+/-6,059	30,822	+/-3,864	19,118	+/-2,267	8,845	+/-2,042	13,292	+/-2,383	1,986	+/-1,064
With private health insurance coverage	30,806	+/-3,643	11,790	+/-2,417	7,931	+/-1,662	3,256	+/-1,199	6,579	+/-1,320	1,250	+/-990
With public health coverage	56,335	+/-5,612	24,930	+/-3,453	14,793	+/-2,283	6,210	+/-1,729	9,186	+/-2,368	1,216	+/-649
No health insurance coverage	1,223	+/-716	368	+/-462	525	+/-420	170	+/-272	160	+/-253	0	+/-200
No disability:	1,802,798	+/-7,216	354,555	+/-4,070	612,503	+/-3,091	246,541	+/-2,678	483,190	+/-2,938	106,009	+/-1,231
With health insurance coverage:	1,754,550	+/-9,291	345,424	+/-4,786	597,714	+/-4,216	240,435	+/-4,296	466,448	+/-4,307	104,529	+/-1,386
With private health insurance coverage	945,239	+/-19,956	139,320	+/-8,284	301,037	+/-10,894	155,388	+/-7,105	271,418	+/-8,215	78,076	+/-3,523
With public health coverage	931,451	+/-20,091	242,375	+/-8,126	335,754	+/-11,068	94,336	+/-7,614	228,476	+/-7,558	30,510	+/-3,844

REFERENCE NOTES:

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

Beginning in 2017, selected variable categories were updated, including age-categories, income-to-poverty ratio (IPR) categories, and the age universe for certain employment and education variables. See user note entitled "Health Insurance Table Updates" for further details.

While the 2017 American Community Survey (ACS) data generally reflect the July 2015 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
