With an ambulatory difficulty	(X)	(X)	13,296	1,514	22.5	2.5
With a self-care difficulty	(X)	(X)	5,434	1,316	9.2	2.2
With an independent living difficulty	(X)	(X)	9,935	1,405	16.8	2.3
<b>SEX</b>						
Male	225,833	500	19,675	2,313	8.7	1.0
Female	240,704	669	26,109	2,671	10.8	1.1
<b>RACE AND HISPANIC OR LATINO ORIGIN</b>						
One Race	N	N	N	N	N	N
White alone	358,400	4,062	36,969	3,474	10.3	1.0
Black or African American alone	51,308	2,265	4,406	1,087	8.6	2.1
American Indian and Alaska Native alone	N	N	N	N	N	N
Asian alone	37,064	989	2,126	561	5.7	1.5
Native Hawaiian and Other Pacific Islander alone	N	N	N	N	N	N
Some other race alone	12,619	3,676	1,395	891	11.1	6.4
Two or more races	6,910	2,111	770	444	11.1	6.0
White alone, not Hispanic or Latino	296,667	834	32,373	2,905	10.9	1.0
Hispanic or Latino (of any race)	82,094	273	6,591	1,837	8.0	2.2

**Table S1810 DISABILITY CHARACTERISTICS**  
**2011 American Community Survey 1-Year Estimates**  
**New York City and Boroughs**

**REFERENCE:**

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

**Explanation of Symbols:**

An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An '(X)' means that the estimate is not applicable or not available.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
