Vietnamese	13,937	+/-3,210	3,152	+/-1,690	3,120	+/-1,211	2,945	+/-1,078	4,392	+/-1,813		
Other Asian	25,798	+/-4,682	2,260	+/-1,606	6,591	+/-2,469	4,303	+/-1,497	11,492	+/-3,175		
Other Asian, not specified	8,265	+/-2,814	160	+/-176	2,387	+/-1,375	1,030	+/-647	4,654	+/-2,194		

Total includes people who reported Asian only, regardless of whether they reported one or more detailed Asian groups.

Other Asian. Includes people who provided a response of another Asian group (such as Burmese); and includes people who provided multiple Asian responses.

Other Asian, not specified. Includes people who answered the "Other Asian" response category and did not provide a specific group; and includes people who provided only a generic term such as "Asian."

Explanation of Symbols:

1. An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.

5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.
