

# CDBG Eligibility by Census Tract

## File Geodatabase Feature Class

### Tags

Community Development Block Grant Eligibility, CDBG, low income, moderate income, residential, census tracts

### Summary

Community Development Block Grant (CDBG) eligible and ineligible census tracts. The dataset contains the income and residential data used to determine eligibility. Estimates of the number of low- and moderate-income individuals (LMISD) are based on the 2011-2015 American Community Survey (ACS). Residential floor areas are derived from PLUTO 18v2.1.

### Description

The U.S. Department of Housing and Urban Development requires local municipalities that receive CDBG formula entitlement funds to use the 2011-2015 ACS LMISD data file to determine where CDBG funds may be used for activities that are available to all the residents in a particular area. A CD-eligible census tract refers to 2010 census tracts where the area is primarily residential and at least 51.0% of the residents are low- and moderate-income as per the LMISD data file. For New York City, a primarily residential area is defined as one where at least 50.0% of the total built floor area is residential as determined by PLUTO 18v2.1. Low- and moderate-income persons are defined as persons living in households with incomes below 80 percent of the area median household income (AMI). The New York Primary Metropolitan Statistical Area's AMI was \$70,300 for a 4-person family at the release of the 2011-2015 American Community Survey.

#### FIELD DESCRIPTION

A CD-eligible census tract is one that is primarily residential and at least 51.0% of the residents are low- and moderate-income as per the LMISD data file. For New York City, a primarily residential area is defined as one where at least 50.0% of the total built floor area is residential as determined by PLUTO 18v2.1. Low- and moderate-income individuals are those living in households with incomes below 80 percent of the area median household income (AMI). The New York Primary Metropolitan Statistical Area's AMI was \$70,300 for a 4-person family at the release of the 2011-2015 American Community Survey.
