MapPLUTO 20v3 - Shoreline Clipped

File Geodatabase Feature Class

Tags
Parcels, MapPLUTO, Boundaries, PLUTO, DTM, Tax Lot, boundaries

Summary

MapPLUTO contains extensive land use and geographic data at the tax lot level. MapPLUTO has over seventy data fields containing three basic types of data: tax lot characteristics, building characteristics, and geographic/political/administrative districts. This version is clipped to the shoreline and does not contain lots completely or partially underwater.

Description

This dataset represents a compilation of data from various government agencies throughout the City of New York. The underlying geography is derived from the Tax Lot Polygon feature class that is part of the Department of Finance’s Digital Tax Map (DTM). The tax lots have been clipped to the shoreline, as defined by NYCMap planimetric features. The attribute information is from the Department of City Planning's PLUTO data. The attribute data pertains to tax lot and building characteristics and geographic, political and administrative information for each tax lot in New York City.

The Tax Lot Polygon feature class and PLUTO are derived from different sources. As a result, some PLUTO records do not have a corresponding tax lot in the Tax Lot polygon feature class at the time of release. These records are included in a separate non-geographic PLUTO Only table. There are a number of reasons why there can be a tax lot in PLUTO that does not match the DTM; the most common reason is that the various source files are maintained by different departments and divisions with varying update cycles and criteria for adding and removing records. The attribute definitions for the PLUTO Only table are the same as those for MapPLUTO. DCP Mapping Lots includes some features that are not on the tax maps. They have been added by DCP for cartographic purposes. They include street center 'malls', traffic islands and some built streets through parks. These features have very few associated attributes. To report problems, please open a GitHub issue or email DCPOpendata@planning.nyc.gov.

**FIELD DESCRIPTION**  
The borough in which the tax lot is located. Two portions of the city, Marble Hill and Rikers Island, are each legally located in one borough but are serviced by different boroughs. The BOROUGH codes associated with these areas are the boroughs they are legally located in. Specifically, Marble Hill is serviced by the Bronx but is legally located in Manhattan and has a Manhattan BOROUGH code. Rikers Island has a Bronx BOROUGH code because it is legally located in the Bronx although it is serviced by Queens.

FIELD Lot ►
* ALIAS Lot
* DATA TYPE SmallInteger
* WIDTH 2
* PRECISION 0
* SCALE 0

FIELD DESCRIPTION
The number of the tax lot. This field contains a one to four-digit tax lot number. Each tax lot is unique within a tax block (see BLOCK).

Special Handling for condominiums:

In a condominium complex, each condominium unit is a separate tax lot and has its own lot number. In a residential condominium, the condominium units are generally the individual apartments; in a commercial condominium, the units might be floors in an office building, individual retail shops, or blocks of office space. These unit lot numbers have values between 1001 - 6999.

Each unit tax lot has an associated billing lot number, with values between 7501 - 7599. Lots in a condominium complex on the same block will have the same billing lot number. To max condominium information more compatible with parcel information, the Department of City Planning aggregates condominium unit tax lot information to the billing lot. For example, if a residential condominium building contains 20 units, the Department of Finance will assign 20 unit lot numbers and each of these lot numbers will have the same billing lot number. PLUTO will contain one record with the billing lot number and RESIDENTIAL UNITS will be set to 20.

If the Department of Finance has not yet assigned a billing lot number to the condominium complex, PLUTO uses the lowest unit lot number within the complex.

Note on MapPLUTO: The Department of Finance Digital Tax Map (DTM) contains the geography of the base lot for condominiums. The base lot is also called the "Formerly Known As" or FKA lot. For most condominium complexes, there is one base lot per billing lot. In using the DTM to create MapPLUTO, DCP replaces the base lot number with the billing lot number. If there is more than one base lot with the same billing lot number, DCP merges the base lots to create a geography for the billing lot.

FIELD DESCRIPTION
The community district (CD) or joint interest area (JIA) for the tax lot. The city is divided into 59 community districts and 12 joint interest areas, which are large parks or airports that are not considered part of any community district.

This field consists of three digits, the first of which is the borough code (see BORO CODE). The second and third digits are the community district or joint interest area number, whichever is applicable.
Two portions of the city, Marble Hill and Rikers Island, are legally located in one borough, but serviced by a different borough. The COMMUNITY DISTRICT associated with these areas is the community district by which they are serviced.

Marble Hill is legally located in Manhattan, but is serviced by the Bronx and is divided between community districts 207 and 208. Rikers Island is legally located in the Bronx, but is serviced by Queens and is part of community district 401.

COMMUNITY DISTRICT contains the value returned by Geosupport for one of the addresses assigned to the lot. If Geosupport does not return a value, COMMUNITY DISTRICT is calculated spatially using the tax lot’s XY COORDINATES and DCP’s Administrative District Base Map files.

* **DATA TYPE**  String
* **WIDTH**  7
* **PRECISION**  0
* **SCALE**  0

**FIELD DESCRIPTION**
The 2010 US census tract in which the tax lot is located. This field contains a one to four-digit census tract number, sometimes with a decimal point and a two-digit suffix.

2010 census tracts are geographic areas defined by the U.S. Census Bureau for the 2010 Census. Census tracts are comprised of census blocks. If a tax lot is split by a census tract boundary, only one census tract is retained.

Each census tract is unique within a borough (see Borough).

Examples:
Census Tract 203.01
Census Tract 23

CENSUS TRACT contains the value returned by Geosupport for one of the addresses assigned to the lot. If Geosupport does not return a value, CENSUS TRACT is calculated spatially using the tax lot’s XY COORDINATES and DCP’s Administrative District Base Map files.

**DESCRIPTION SOURCE**

* **ALIAS**  CB2010
* **DATA TYPE**  String
* **WIDTH**  5
* **PRECISION**  0
* **SCALE**  0

**FIELD DESCRIPTION**
The 2010 census block in which the tax lot is located.

This field contains a four-digit census block number and, when applicable, a one-character alphabetic suffix.

2010 census blocks are the smallest geographic areas defined by the U.S. Census.
Bureau. If a tax lot is split by a census block boundary, only one census block is retained.

Each census block number is unique within a census tract (see CENSUS TRACT).

Examples:
Census Block 101A
Census Block 102

CENSUS BLOCK contains the value returned by Geosupport for one of the addresses assigned to the lot. If Geosupport does not return a value, CENSUS BLOCK is calculated spatially using the tax lot’s XY COORDINATES and DCP’s Administrative District Base Map files.

FIELD SchoolDist ★
* ALIAS SchoolDist
* DATA TYPE String
* WIDTH 3
* PRECISION 0
* SCALE 0
FIELD DESCRIPTION
The school district in which the tax lot is located.

This field contains a two-digit school district number, which is preceded with a zero when the district number is one digit.

The city is divided up into 34 school districts. Those districts are then divided into smaller zones which determine the area served by local schools. Each district has its own superintendent and receives guidance from a Community District Education Council made up of parents and local representatives.

SCHOOL DISTRICT contains the value returned by Geosupport for one of the addresses assigned to the lot. If Geosupport does not return a value, SCHOOL DISTRICT is calculated spatially using the tax lot’s XY COORDINATES and DCP’s Administrative District Base Map files.

If a tax lot is split by a school district boundary, only one school district is retained.

* SCALE 0
FIELD DESCRIPTION
The city council district in which the tax lot is located.

This field contains a two-digit city council district number, which is preceded with a zero when the district number is one digit.

There are currently 51 city council districts in the City, which serve as political districts for the legislative branch of city government. If a tax lot is split by a city council district boundary, only one city council district is retained.

CITY COUNCIL DISTRICT contains the value returned by Geosupport for one of the addresses assigned to the lot. If Geosupport does not return a value, CITY COUNCIL DISTRICT is calculated spatially using the tax lot’s XY COORDINATES and DCP’s Administrative District Base Map files.

DESCRIPTION SOURCE
Department of City Planning - Geosupport System; Department of City Planning - Administrative District Base Map files

FIELD ZipCode
* ALIAS ZipCode
* DATA TYPE Integer
* WIDTH 4
* PRECISION 0
* SCALE 0
FIELD DESCRIPTION
A ZIP code that is valid for one of the addresses assigned to the tax lot.

Note that a tax lot may have multiple addresses and these addresses may not have the same ZIP code. A building with entrances on two streets may have a different ZIP code for each street address. ZIP CODE may not be valid for the street address in ADDRESS.

If a tax lot does not have an ADDRESS or the ADDRESS contains a street name without a house number, ZIP CODE will be blank.

DESCRIPTION SOURCE
Department of City Planning – Geosupport System
FIELD FireComp
* ALIAS FireComp

FIELD DESCRIPTION
The health area in which the tax lot is located.

Health areas were originally created in the 1920s for the purpose of reporting and statistical analysis of public health data. They were based on census tracts and created to be areas of equal population. Health areas are contained within health center districts.

This field contains a four-digit health area number, which is preceded with leading zeros when the health area is less than four digits. There is an implied decimal point after the first two digits. If a tax lot is split by a health area boundary, only one health area is retained.

HEALTH AREA contains the value returned by Geosupport for one of the addresses assigned to the lot. If Geosupport does not return a value, HEALTH AREA is calculated spatially using the tax lot’s XY COORDINATES and DCP’s Administrative District Base Map files.

**FIELD Address** ▶

* ALIAS Address
* DATA TYPE String
* WIDTH 39
* PRECISION 0
* SCALE 0

**FIELD DESCRIPTION**

An address for the tax lot.

Tax lots may be assigned a single house number on a street, a range of house numbers on a street, or addresses on multiple streets. ADDRESS contains the address in PTS, using the low number when there is a range of house numbers. Some tax lots, such as vacant lots or parks, have only a street name and no house number.

The general format is house number or low house number, if there is a house number range, and a space followed by a street name

A complete list of the addresses assigned to a tax lot is available through Geosupport or by downloading the Property Address Directory (PAD) from Bytes of the Big AppleTM.

Most house numbers in Queens contain a hyphen.

* SCALE 0

**FIELD DESCRIPTION**

The zoning district classification of the tax lot. Under the Zoning Resolution, the map of New York City is generally apportioned into three basic zoning district categories: Residence (R), Commercial (C) and Manufacturing (M), which are further divided into a range of individual zoning districts, denoted by different number and letter combinations. In general, the higher the number immediately following the first letter (R, C or M), the higher the density or intensity of land use permitted.

If the tax lot is divided by a zoning boundary line, ZONING DISTRICT 1 represents the
zoning district classification occupying the greatest percentage of the tax lot’s area. Only zoning districts that cover at least 10% of a tax lot’s area are included.

For example: Tax lot 98 is divided by a zoning boundary line into part A and part B. Part A, the largest portion of the lot, is in a commercial zoning district, while part B is in a residential zoning district. ZONING DISTRICT 1 will contain the commercial zoning district associated with part A.

Tax lots that intersect with areas designated in NYC Zoning Districts as PARK, BALL FIELD, PLAYGROUND, and PUBLIC SPACE are assigned a single value of PARK in PLUTO. The NYC Zoning Districts do not constitute a definitive list of parks in the city. Lots designated as PARK should not be used to calculate the amount of open space in an area.

See SPLIT BOUNDARY INDICATOR to determine if the tax lot is divided.

**FIELD Overlay1**

- **Alias**: Overlay1
- **Data Type**: String
- **Width**: 4
- **Precision**: 0
- **Scale**: 0

**FIELD DESCRIPTION**

The commercial overlay assigned to the tax lot. A commercial overlay is a C1 or C2 zoning district mapped within residential zoning districts to serve local retail needs (grocery stores, dry cleaners, restaurants, for example).

If more than one commercial overlay exists on the tax lot, COMMERCIAL OVERLAY 1 represents the commercial overlay occupying the greatest percentage of the lot area. The commercial overlay district must either cover at least 10% of a tax lot's area or at least 50% of the commercial overlay district must be contained within the tax lot.

If the tax lot is does not contain a commercial overlay, the field is blank.

See SPLIT BOUNDARY INDICATOR to determine if the tax lot is divided.

ALIAS BldgClass
DATA TYPE String
WIDTH 2
PRECISION 0
SCALE 0

DESCRIPTION
A code describing the major use of structures on the tax lot.

Except as described below, BUILDING CLASS is taken from PTS without modification.

For condominiums, PTS contains the building class for each unit lot. When merging this data into a single record for the billing lot, DCP creates several mixed-use building classes (RC, RD, RI, RM, RX, and RZ). These are assigned as follows:

- If all unit lots have the same building class, that building class is used for the billing lot.
- PTS building class types are grouped as follows:
  - Commercial - R5, R7, R8, RA, RB, RH, and RK
  - Residential - R1, R2, R3, R4, R6, and RR
  - Mixed commercial and residential – R9
  - Industrial/warehouse - RW
- If the unit lots are a mixture of commercial building types, BUILDING CLASS = RC.
- If the unit lots are a mixture of residential building types, BUILDING CLASS = RD.
- If the unit lots are a mixture of commercial and residential building types, BUILDING CLASS = RM.
- If the unit lots are a mixture of commercial and industrial/warehouse building types, BUILDING CLASS = RI.
- If the unit lots are a mixture of commercial, residential, and industrial/warehouse building types, BUILDING CLASS = RX.
- If the unit lots are a mixture of residential and industrial/warehouse building types, BUILDING CLASS = RZ.
- When unit lots with a building class of RG (Indoor Parking), RP (Outdoor Parking), RS (Non-Business Storage Space), or RT (Terraces/Gardens/Cabanas) have the same billing lot as another building class, their building class is ignored. For example, if the billing lot has unit lots with a building class of R4 (Residential Unit in Elevator Bldg) and
RG (Indoor Parking), BUILDING CLASS = R4.

Q0 is assigned by DCP to tax lots with an PTS building class starting with “V” that are identified in the NYC GIS Zoning Database as PARK, BALL FIELD, PLAYGROUND, or PUBLIC SPACE.

PTS contains two building classes for some tax lots, with one of the building classes being Z7 (Easement). BUILDING CLASS is only set to Z7 when it is the only PTS building class for the tax lot.

See Appendix C - Building Class Codes for valid values

FIELD Easements ▶
* ALIAS Easements
* DATA TYPE SmallInteger
* WIDTH 2
* PRECISION 0
* SCALE 0
FIELD DESCRIPTION
The number of unique easements on the tax lot.

PTS contains a record for each easement. NUMBER OF EASEMENTS is calculated by counting the number of unique PTS easement records for the tax lot.

If the number of easements is zero, the tax lot has no easements.

DESCRIPTION SOURCE
Department of City Planning - based on data from: Department of Finance – Property Tax System (PTS)

Hide Field Easements ▲

FIELD OwnerType ▶
* ALIAS OwnerType
* DATA TYPE String
* WIDTH 1
* PRECISION 0
* SCALE 0
FIELD DESCRIPTION
A code indicating type of ownership for the tax lot.

Only one data source is used per tax lot.

The COLP file, which contains more accurate and specific type of city ownership data than PTS, is used when data is available for that lot. Codes C, M, O, P are derived from COLP.

If the tax lot is not in COLP, PTS is checked to see if the lot’s EXEMPT TOTAL VALUE equals its ASSESSED TOTAL VALUE. If the two values are the same, the lot is given a code of X. Otherwise the tax lot is not given any TYPE OF OWNERSHIP CODE.
OWNER NAME should be referenced to verify type of ownership, particularly when it’s important to distinguish between state, federal, and public authority ownership.

**DESCRIPTION SOURCE**
Department of City Planning - City Owned and Leased Properties (COLP); Department of Finance - Property Tax System (PTS)

</tr>
</tbody>
</table>

**FIELD OwnerName**

- **ALIAS** OwnerName
- **DATA TYPE** String
- **WIDTH** 85
- **PRECISION** 0
- **SCALE** 0

**FIELD DESCRIPTION**
The name of the owner of the tax lot.

For publicly owned tax lots, owner names have been normalized. For example, “NYC PARKS”, “PARKS DEPARTMENT”, and “PARKS AND RECREATION (GENERAL)” have been changed to “NYC DEPARTMENT OF PARKS AND RECREATION”.

If OWNER NAME is normalized, DCPEdited is set to “1”.

**DESCRIPTION SOURCE**
Department of Finance - Property Tax System (PTS)

**FIELD LotArea**

- **ALIAS** LotArea
- **DATA TYPE** Integer
- **WIDTH** 4
- **PRECISION** 0
- **SCALE** 0

**FIELD DESCRIPTION**
Total area of the tax lot, expressed in square feet rounded to the nearest integer.
LOT AREA contains street beds when the tax lot contains “paper streets” i.e., street mapped but not built.

If the tax lot is not an irregularly shaped lot (see IRREGULAR LOT CODE) the Department of Finance calculates the LOT AREA by multiplying the LOT FRONTAGE by the LOT DEPTH. If the tax lot is irregularly shaped, DOF calculates the LOT AREA from the Digital Tax Map.

If PTS contains a zero value for LOT AREA, this field is changed to show the area of the tax lot’s geometric shape in the Digital Tax Map and DCPEdited is set to “1”.

DESCRIPTION SOURCE
Department of Finance - Property Tax System (PTS)

FIELD BldgArea

* ALIAS BldgArea
* DATA TYPE Integer
* WIDTH 4
* PRECISION 0
* SCALE 0

FIELD DESCRIPTION
The total gross area in square feet, except for condominium measurements which come from the Condo Declaration and are net square footage not gross.

TOTAL BUILDING FLOOR AREA is populated in the following order of preference:
1. Gross floor area from PTS
2. Gross floor area from CAMA
3. Calculated from the PTS building dimensions and number of stories for the primary building on the lot. TOTAL BUILDING FLOOR AREA calculated by this method will not include floor area for any other buildings on the lot.
4. TOTAL BUILDING FLOOR AREA is set to zero if the building class starts with “V” and the number of buildings is zero.

See TOTAL BUILDING FLOOR AREA SOURCE CODE to determine which method was used.

If TOTAL BUILDING FLOOR AREA SOURCE CODE has a value of 2 (PTS) or 7 (CAMA), the TOTAL BUILDING FLOOR AREA is based on gross building area, also known as total gross square feet. For these data sources, the TOTAL BUILDING FLOOR AREA is for all of the structures on the tax lot, including stairwells, halls, elevator shafts, attics and extensions such as attached garages. Measurements are based on exterior dimensions and take into account setbacks.

If the TOTAL BUILDING FLOOR AREA SOURCE CODE field has a value of 5, the floor area was calculated from the DOF Property Tax System (PTS) using the building dimensions and number of stories for ONLY the largest structure on the tax lot.

In all cases, this is a rough estimate of the gross building floor area and does not necessarily take into account all the criteria for calculating floor area as defined in section 12-10 of the Zoning Resolution.

Roof areas used for parking/garden/playground are not included in the floor area.

If TOTAL BUILDING FLOOR AREA SOURCE CODE is 2, TOTAL BUILDING FLOOR AREA contains the common area for condominiums.
If FLOOR AREA, TOTAL BUILDING SOURCE CODE is 7, TOTAL BUILDING FLOOR AREA does not include below grade finished basements.

If the basement in a one, two or three family structure is above grade and finished, its square footage is included in TOTAL BUILDING FLOOR AREA.

A TOTAL BUILDING FLOOR AREA of zero can mean it is either not available or not applicable. If NUMBER OF BUILDINGS is greater than zero, then a TOTAL BUILDING FLOOR AREA of zero means it is not available. If NUMBER OF BUILDINGS is zero, then a TOTAL BUILDING FLOOR AREA of zero means it is not applicable.

**FIELD ComArea**

* **ALIAS** ComArea
* **DATA TYPE** Integer
* **WIDTH** 4
* **PRECISION** 0
* **SCALE** 0

**FIELD DESCRIPTION**

An estimate of the exterior dimensions of the portion of the structure(s) allocated for commercial use.

Value is taken from PTS, if available. When calculated from PTS data, COMMERCIAL FLOOR AREA is the sum of floor areas for office, retail, garage, storage, factory, and other uses. If these fields are not populated in PTS, the value is taken from CAMA.

Originally square footage came from sketches, but, for both new construction and alterations, it now comes from site visits.

Basement square footage may be included in COMMERCIAL FLOOR AREA if the commercial buildings meets two of the three following criteria:

- Finished
- Active
- Publicly accessible

For condominiums, COMMERCIAL FLOOR AREA is the sum of the commercial floor area for condominium lots with the same billing lot. COMMERCIAL FLOOR AREA does not contain the condominium’s common area.

A COMMERCIAL FLOOR AREA of zero can mean it is either not available or not applicable.

An update to the floor area is triggered by the issuance of a Department of Buildings permit, feedback from the public, or site visits by Department of Finance assessors.

The sum of the various floor area fields does not always equal TOTAL BUILDING FLOOR AREA.

**DESCRIPTION SOURCE**

Department of Finance - Property Tax System (PTS), Mass Appraisal System (CAMA)
**FIELD ResArea**

* ALIAS ResArea
* DATA TYPE Integer
* WIDTH 4
* PRECISION 0
* SCALE 0

**FIELD DESCRIPTION**

An estimate of the exterior dimensions of the portion of the structure(s) allocated for residential use.

Value is taken from PTS, if available. Otherwise it comes from CAMA.

For condominiums, RESIDENTIAL FLOOR AREA is the sum of the residential floor area for condominium lots with the same billing lot. RESIDENTIAL FLOOR AREA does not contain the condominium’s common area.

A RESIDENTIAL FLOOR AREA of zero can mean it is either not available or not applicable.

An update to the floor area is triggered by the issuance of a Department of Buildings permit, feedback from the public, or site visits by Department of Finance assessors.

The sum of the various floor area fields does not always equal TOTAL BUILDING FLOOR AREA.

**DESCRIPTION SOURCE**

Department of Finance - Property Tax System (PTS), Mass Appraisal System (CAMA)

---

**FIELD UnitsRes**

* **ALIAS** UnitsRes
* **DATA TYPE** Integer
* **WIDTH** 4
* **PRECISION** 0
* **SCALE** 0

**FIELD DESCRIPTION**
The sum of residential units in all buildings on the tax lot.
If there are no residential units in the tax lot, this field will be zero.

Hotels/motels, nursing homes and SROs do not have residential units, but boarding houses do. Basement units for building superintendents are counted as a residential unit.

An update to residential units is triggered by the issuance of a Department of Buildings permit.

**DESCRIPTION SOURCE**  
Department of Finance - Property Tax System (PTS)

**FIELD UnitsTotal**

* **ALIAS** UnitsTotal
* **DATA TYPE** Integer
* **WIDTH** 4
* **PRECISION** 0
* **SCALE** 0

**FIELD DESCRIPTION**

The sum of residential and non-residential (offices, retail stores, etc.) units for all buildings on the tax lot.

The count of non-residential units is sometimes not available if the building contains residential units.

Non-residential units are units with a separate use. If a building has 25 different offices it would be counted as 1 unit because they have the same use.

Updates to residential and non-residential units are triggered by the issuance of a Department of Buildings permit.

Field LotType ▶
* Alias LotType
* Data Type String
* Width 1
* Precision 0
* Scale 0

FIELD DESCRIPTION
A code indicating the location of the tax lot in relationship to another tax lot and/or the water.

CAMA may contain multiple lot types for a tax lot. For instance, a lot may be both a corner lot and waterfront lot. DCP assigns LOT TYPE by taking the lowest CAMA lot type for the tax lot, with the exception of LOT TYPE 5, which is only assigned if the lot has no other lot types in CAMA.

DESCRIPTION SOURCE
Department of Finance - Mass Appraisal System (CAMA)

LIST OF VALUES
Value 0
Description Unknown

Value 1
Description Block Assemblage - A tax lot which encompasses an entire block.

Value 2
Description Waterfront - A tax lot bordering on a body of water. Waterfront lots may contain a small amount of submerged land.

Value 3
Description Corner - A tax lot bordering on two intersecting streets

Value 4
Description Through - A tax lot which connects two streets, with frontage on both streets. Note that a lot with two frontages is not necessarily a through lot. For example, an L-shaped lot with two frontages would be coded as an Inside Lot (5).

Value 5
Description Inside - A tax lot with frontage on only one street. This value comes from CAMA, but is only assigned in PLUTO if CAMA has no other lot types for the tax lot.

Value 6
Description Interior Lot - A tax lot that has no street frontage.

Value 7
Description Island Lot - A tax lot that is entirely surrounded by water.
**DESCRIPTION**  Alley Lot - A tax lot that is too narrow to accommodate a building. The lot is usually 12 feet or less in width.

**VALUE 9**

**DESCRIPTION**  Submerged Land Lot - A tax lot that is totally or almost completely submerged.

---

**FIELD**  *BsmtCode*  
*ALIAS*  BsmtCode  
*DATA TYPE*  String  
*WIDTH*  1  
*PRECISION*  0  
*SATLE*  0  

**FIELD DESCRIPTION**  
A code describing the building's basement.

This information is available for one, two or three family structures.

This information may also be available for commercial buildings if two of the following three criteria are met:
- Finished
- Active
- Publicly accessible

A value may exist for other types of property, but the data is not verified by DOF.

Basements in brownstones, high ranches, split-levels and attached row houses are considered above grade.

A fully exposed basement garage door does not, in itself, satisfy the criteria for above grade.

A cellar is below a basement and not habitable.

**DESCRIPTION SOURCE**  
Department of City Planning - based on data from: Department of Finance - Mass Appraisal System (CAMA)

**LIST OF VALUES**

**VALUE 0**

**DESCRIPTION**  None/No Basement

**VALUE 1**

**DESCRIPTION**  Above grade full basement - the basement is 75% or more of the area of the first floor and the basement walls are at least 4 feet high on at least two sides.

**VALUE 2**

**DESCRIPTION**  Below grade full basement - The basement is 75% or more of the area of the first floor and the basement walls are fully submerged or are less than 4 feet on at least three sides.

**VALUE 3**

**DESCRIPTION**  Above grade partial basement - The basement is between 25% and 75% of the area of the first floor and the basement walls are at least 4 feet high on at least two sides.

**VALUE 4**

**DESCRIPTION**  Below grade partial basement - The basement is between 25% and 75% of the
area of the first floor and the basement walls are fully submerged or are less than 4 feet on at least three sides.

**VALUE** 5
**DESCRIPTION** Unknown

*FIELD* AssessLand
*ALIAS* AssessLand
*DATA TYPE* Double
*WIDTH* 8
*PRECISION* 0
*SCALE* 0

**FIELD DESCRIPTION**
The assessed land value for the tax lot.

The Department of Finance calculates the assessed value by multiplying the tax lot’s estimated full market land value, determined as if vacant and unimproved, by a uniform percentage for the property’s tax class.

Assessed and exempt values are updated twice a year. Tentative values are released in mid-January and final values are released around May 25. If the date on source file (PTS), as reported in the Readme file, is between January 15 and May 25, ASSESSED LAND VALUE is from the tentative roll for the tax year starting in July. Otherwise, ASSESSED LAND VALUE is from the final roll.

**DESCRIPTION SOURCE**
Department of Finance - Property Tax System (PTS)

*FIELD* AssessTot
*ALIAS* AssessTot
*DATA TYPE* Double
*WIDTH* 8
*PRECISION* 0
*SCALE* 0

**FIELD DESCRIPTION**
The assessed total value for the tax lot.

The Department of Finance calculates the assessed value by multiplying the tax lot’s estimated full market value by a uniform percentage for the property’s tax class.

Property value is assessed as of January 5th. If a new building is not completed by April 14th, the assessed building value is 0 and the Building Class reverts to Vacant.

Assessed and exempt values are updated twice a year. Tentative values are released in mid-January and final values are released around May 25. If the date on source file (PTS), as reported in the Readme file, is between January 15 and May 25, ASSESSED LAND VALUE is from the tentative roll for the tax year starting in July. Otherwise, ASSESSED LAND VALUE is from the final roll.

**DESCRIPTION SOURCE**
Department of Finance - Property Tax System (PTS)
**FIELD ExemptTot**

* ALIAS ExemptTot
* DATA TYPE Double
* WIDTH 8
* PRECISION 0
* SCALE 0

**FIELD DESCRIPTION**
The exempt total value, which is determined differently for each exemption program, is the dollar amount related to that portion of the tax lot that has received an exemption.

Assessed and exempt values are updated twice a year. Tentative values are released in mid-January and final values are released around May 25. If the date on source file (PTS), as reported in the Readme file, is between January 15 and May 25, EXEMPT TOTAL VALUE is from the tentative roll for the tax year starting in July. Otherwise, EXEMPT TOTAL VALUE is from the final roll.

**DESCRIPTION SOURCE**
Department of Finance - Property Tax System (PTS)

Hide Field ExemptTot ▲

**FIELD YearBuilt**

* ALIAS YearBuilt
* DATA TYPE SmallInteger
* WIDTH 2
* PRECISION 0
* SCALE 0

**FIELD DESCRIPTION**
The year construction of the building was completed.

YEAR BUILT comes from Department of Buildings permits.

In general, YEAR BUILT is accurate for the decade, but not necessarily for the specific year. Between 1910 and 1985, the majority of YEAR BUILT values are in years ending in 5 or 0. A large number of structures built between 1800s and early 1900s have a YEAR BUILT between 1899 and 1901.

**DESCRIPTION SOURCE**
Department of Finance - Property Tax System (PTS)

Hide Field YearBuilt ▲

**FIELD YearAlter1**

* ALIAS YearAlter1
* DATA TYPE SmallInteger
* WIDTH 2
* PRECISION 0
* SCALE 0

**FIELD DESCRIPTION**
If a building has only been altered once, YEAR ALTERED 1 is the date that alteration began.

If a building has been altered more than once, YEAR ALTERED 1 is the year of the second most recent alteration.
The Department of Finance defines alterations as modifications to the structure that, according to the assessor, change the value of the real property.

The date comes from Department of Buildings permits and may either be the actual date or an estimate.

- SCALE 0
FIELD DESCRIPTION
If a building has only been altered once, this field is blank.

If a building has been altered more than once, YEAR ALTERED 2 is the year that the most recent alteration began.

The Department of Finance defines alterations as modifications to the structure that, according to the assessor, change the value of the real property.

The date comes from Department of Buildings permits and may either be the actual date or an estimate.

DESCRIPTION SOURCE
Department of Finance - Property Tax System (PTS)

FIELD HistDist
- ALIAS HistDist
- DATA TYPE String
- WIDTH 66
- PRECISION 0
- SCALE 0
FIELD DESCRIPTION
The name of the Historic District that the tax lot is within. Historic Districts are designated by the New York City Landmarks Preservation Commission.

DESCRIPTION SOURCE
Landmarks Preservation Commission Historic Districts dataset

FIELD Landmark
- ALIAS Landmark
- DATA TYPE String
- WIDTH 150
- PRECISION 0
- SCALE 0
FIELD DESCRIPTION
This value indicates whether the lot contains an individual landmark building, an
interior landmark building, or both.

DESCRIPTION SOURCE
Landmarks Preservation Commission Individual Landmarks dataset

Hide Field Landmark ▲

FIELD BuiltFAR ►
* ALIAS BuiltFAR
* DATA TYPE Double
* WIDTH 8
* PRECISION 0
* SCALE 0

FIELD DESCRIPTION
The BUILT FLOOR AREA RATIO is the total building floor area divided by the area of the
tax lot.

This is an estimate by City Planning based on rough building area and lot area
measurements provided by the Department of Finance. BUILT FLOOR AREA RATIO is
calculated using the TOTAL BUILDING FLOOR AREA and the LOT AREA.

DESCRIPTION SOURCE
Department of City Planning – based on data from: Department of Finance - Property
Tax System (PTS)

Hide Field BuiltFAR ▲

FIELD ResidFAR ►
* ALIAS ResidFAR
* DATA TYPE Double
* WIDTH 8
* PRECISION 0
* SCALE 0

FIELD DESCRIPTION
The maximum allowable residential floor area ratio, based on the zoning district
classification occupying the greatest percentage of the tax lot’s area as reported in
ZoneDist1. If the lot is assigned to more than one zoning district and ZoneDist1 does
not allow residential uses, MAXIMUM ALLOWABLE RESIDENTIAL FAR is based on
ZoneDist2, ZoneDist3 or ZoneDist4, in that order.

The maximum allowable residential floor area ratios are exclusive of bonuses for plazas,
plaza-connected open areas, arcades, or other amenities.

For R2X, R3, R4, and C3 zoning districts, ResidFAR does not include the attic allowance,
under which the FAR may be increased by up to 20% for the inclusion of space beneath
a pitched roof.

For properties zoned R6, R7, R7-1, R8 or R9 the maximum allowable floor area reflects
the maximum achievable floor area under ideal conditions.

The maximum allowable floor area does not reflect Voluntary Inclusionary Housing or
Mandatory Inclusionary Housing Program floor area. See Appendix F and Section 23-
154, paragraphs (b) and (d) of the Zoning Resolution.
For properties in special mixed use districts, PLUTO uses the wide street maximum allowable floor area ratio. Since the maximum allowable floor area ratio in mixed use special districts is actually determined by whether the property is located on a wide street or a narrow street.

**DESCRIPTION SOURCE**
Department of City Planning Zoning Division

**FIELD CommFAR**

* **ALIAS** CommFAR
* **DATA TYPE** Double
* **WIDTH** 8
* **PRECISION** 0
* **SCALE** 0

**FIELD DESCRIPTION**
The maximum allowable commercial floor area ratio, based on the zoning district classification occupying the greatest percentage of the tax lot’s area as reported in ZoneDist1. If the lot is assigned to more than one zoning district and ZoneDist1 does not allow commercial uses, MAXIMUM ALLOWABLE COMMERCIAL FAR is based on ZoneDist2, ZoneDist3 or ZoneDist4, in that order.

The maximum allowable commercial floor area ratios are exclusive of bonuses for plazas, plaza-connected open areas, arcades, or other amenities.

Users should consult Section 43-12 of the Zoning Resolution for more information.

**DESCRIPTION SOURCE**
Department of City Planning Zoning Division

**FIELD FacilFAR**

* **ALIAS** FacilFAR
* **DATA TYPE** Double
* **WIDTH** 8
* **PRECISION** 0
* **SCALE** 0

**FIELD DESCRIPTION**
The maximum allowable community facility floor area ratio, based on the zoning district classification occupying the greatest percentage of the tax lot’s area as reported in ZoneDist1. If the lot is assigned to more than one zoning district and ZoneDist1 does not allow community facility uses, MAXIMUM ALLOWABLE COMMUNITY FACILITY FAR is based on ZoneDist2, ZoneDist3 or ZoneDist4, in that order.

The maximum allowable community facility floor area ratios are exclusive of bonuses for plazas, plaza-connected open areas, arcades, or other amenities.

Users should consult Section 24-11 of the Zoning Resolution for more information.

**DESCRIPTION SOURCE**
Department of City Planning Zoning Division
FIELD BoroCode

* ALIAS  BoroCode
* DATA TYPE  Integer
* WIDTH  4
* PRECISION  0
* SCALE  0

FIELD DESCRIPTION
The borough in which the tax lot is located.

Two portions of the city, Marble Hill and Rikers Island, are legally located in one borough but are serviced by a different borough. The BORO CODEs associated with these areas are the boroughs in which they are legally located.

Marble Hill is serviced by the Bronx, but is legally located in Manhattan and has a BORO CODE of 1. Rikers Island is serviced by Queens, but is legally located in the Bronx and has a BORO CODE of 2.

DESCRIPTION SOURCE

FIELD BBL

* ALIAS  BBL
* DATA TYPE  Double
* WIDTH  8
* PRECISION  0
* SCALE  0

FIELD DESCRIPTION
A concatenation of the borough code, tax block and tax lot.

This field consists of the borough code followed by the tax block followed by the tax lot. The borough code is one numeric digit. The tax block is one to five numeric digits, preceded with leading zeros when the block is less than five digits. The tax lot is one to four digits and is preceded with leading zeros when the lot is less than four digits.

For condominiums, the BBL is for the billing lot. See TAX LOT for more information on how condominiums are handled.

Examples:
Manhattan Borough Code 1, Tax Block 16, Tax Lot 100 would be stored as 1000160100. Brooklyn Borough Code 3, Tax Block 15828, Tax Lot 7501 would be stored as 3158287501.

**DESCRIPTION SOURCE**
Department of City Planning - based on data from: Department of Finance - Property Tax System (PTS)

**Hide Field BBL ▲**

**FIELD CondoNo ▶**
* ALIAS CondoNo
* DATA TYPE Integer
* WIDTH 4
* PRECISION 0
* SCALE 0
**FIELD DESCRIPTION**
The condominium number assigned to the complex.

Condominium numbers are unique within a borough (see BOROUGH).

**DESCRIPTION SOURCE**
Department of Finance - Property Tax System (PTS)

**Hide Field CondoNo ▲**

**FIELD Tract2010 ▶**
* ALIAS Tract2010
* DATA TYPE String
* WIDTH 7
* PRECISION 0
* SCALE 0
**FIELD DESCRIPTION**
This field contains a one to four-digit census tract number and a two-digit suffix. There is an implied decimal point between the census tract number and the suffix. The census tract number is preceded with leading zeros when the tract is less than four digits. If the tract has no suffix, CENSUS TRACT 2 contains 4 characters.

2010 census tracts are geographic areas defined by the U.S. Census Bureau for the 2010 Census.

Examples:

Census Tract 203.01 would be stored as 020301
Census Tract 23 would be stored as 0023

**DESCRIPTION SOURCE**
Department of City Planning – Geosupport System

**Hide Field Tract2010 ▲**

**FIELD XCoord ▶**
* ALIAS XCoord
* DATA TYPE Integer
* WIDTH 4
* PRECISION 0
FIELD DESCRIPTION
The X coordinate of the XY coordinate pair which depicts the approximate location of the lot.

The XY coordinates are expressed in the New York-Long Island State Plane coordinate system.

DESCRIPTION SOURCE
Department of City Planning - Geosupport System

FIELD DESCRIPTION
The Y coordinate of the XY coordinate pair which depicts the approximate location of the lot.

The XY coordinates are expressed in the New York-Long Island State Plane coordinate system.

DESCRIPTION SOURCE
Department of City Planning - Geosupport System

FIELD DESCRIPTION
The Department of City Planning Zoning Map Number associated with the tax lot’s X and Y Coordinates. If the tax lot is on the border of two or more zoning maps, ZONING MAP # is the zoning map covering the greatest area.

DESCRIPTION SOURCE
Department of City Planning Georeferenced NYC Zoning Maps

FIELD DESCRIPTION
A code (Y) identifies a tax lot on the border of two or more zoning maps.
**DESCRIPTION SOURCE**
Department of City Planning Georeferenced NYC Zoning Maps

**Hide Field ZMCode ▲**

**FIELD Sanborn ▶**
* **ALIAS** Sanborn
* **DATA TYPE** String
* **WIDTH** 8
* **PRECISION** 0
* **SCALE** 0

**FIELD DESCRIPTION**
The Sanborn Map Company map number associated with the tax block and lot.

SANBORN MAP # format is Borough Code/Volume Number/Page Number, where Borough Code is 1 (Manhattan), 2 (Bronx), 3 (Brooklyn), 4 (Queens), or 5 (Staten Island)

For example: the SANBORN MAP # associated with tax block 154, tax lot 23 in Manhattan is 1/01S/020.

**DESCRIPTION SOURCE**
Department of City Planning - Geosupport System

**Hide Field Sanborn ▲**

**FIELD TaxMap ▶**
* **ALIAS** TaxMap
* **DATA TYPE** String
* **WIDTH** 5
* **PRECISION** 0
* **SCALE** 0

**FIELD DESCRIPTION**
The Department of Finance paper tax map volume number associated with the tax block and lot.

The first character of the Tax Map # is the Borough Code – 1 (Manhattan), 2 (Bronx), 3 (Brooklyn), 4 (Queens), or 5 (Staten Island). The second and third characters are the Section Number and the fourth and fifth characters are the Volume Number.

NOTE: The Department of Finance no longer updates their paper tax maps.

**DESCRIPTION SOURCE**

**FIELD EDesigNum ▶**
* **ALIAS** EDesigNum
* **DATA TYPE** String
* **WIDTH** 5
* **PRECISION** 0
* **SCALE** 0

**FIELD DESCRIPTION**
The (E) designation number assigned to the tax lot. An (E) designation provides notice of the presence of an environmental requirement pertaining to potential hazardous
materials contamination, high ambient noise levels or air emission concerns on a particular tax lot.

Note that a tax lot may have more than one (E) designation. See the source file for all designations on the lot.

**DESCRIPTION SOURCE**
Department of City Planning - E - Designation File

**FIELD APPBBL**
* **ALIAS** APPBBL
* **DATA TYPE** Double
* **WIDTH** 8
* **PRECISION** 0
* **SCALE** 0

**FIELD DESCRIPTION**
The originating BBL (borough, block and lot) from the apportionment prior to the merge, split or property’s conversion to a condominium.

APPORTIONMENT BBL is only available for mergers, splits, and conversions since 1984.

**DESCRIPTION SOURCE**
Department of Finance - Property Tax System (PTS)

**FIELD APPDate**
* **ALIAS** APPDate
* **DATA TYPE** String
* **WIDTH** 10
* **PRECISION** 0
* **SCALE** 0

**FIELD DESCRIPTION**
The date of the apportionment.
The data is in the format MM/DD/YYYY, where MM is a two-digit month, DD is the two-digit day, and YYYY is the four-digit year.

**DESCRIPTION SOURCE**
Department of City Planning - based on data from: Department of Finance - Property Tax System (PTS)

**FIELD PLUTOMapID**
* **ALIAS** PLUTOMapID
* **DATA TYPE** String
* **WIDTH** 1
* **PRECISION** 0
* **SCALE** 0

**FIELD DESCRIPTION**
A code indicating whether the tax lot is in the PLUTO file, the MapPLUTO file with water areas included, and/or the MapPLUTO file that is clipped to the shoreline.
Because the Digital Tax Map (DTM) and the PTS Master File are not updated at the same time, they are slightly out-of-sync. There will be lots in PTS that are not in the DTM and vice versa. In addition, some lots are wholly underwater and are not included in the version of MapPLUTO that is clipped to the shoreline.

The lot geographies in MapPLUTO (with water areas included) are created from the DTM. City Planning modifies the DTM for condominium lots to show the billing tax lot in MapPLUTO, rather than the base tax lot. If there is more than one base tax lot with the same billing lot, the base tax lots are merged into a single feature and assigned to the billing lot. See LOT for more information on condominium lots.

MapPLUTO (clipped to shoreline) is created by clipping the full MapPLUTO using DOF’s Shoreline File.

**DESCRIPTION SOURCE**
Department of City Planning - PLUTO Data File; Department of City Planning – MapPLUTO (water areas included); Department of City Planning – MapPLUTO (clipped to shoreline); Department of Finance - Digital Tax Map; Department of Finance - Shoreline File; Department of Finance - Property Tax System (PTS)
