

New York City Atomic Polygons

ESRI Shapefile

Tags

Atomic Polygon, boundary, boundaries, districts, LION, CSCL, Department of City Planning, DCP, New York City, NYC, LIONdistricts

Summary

Atomic polygons are a set of basic building blocks to generate Atomic Polygon-based district hierarchies.

Description

Atomic polygons serve as a set of basic building blocks for generating the polygons of many of the district types represented in the CSCL database. Feature classes such as election district, school district, census block, FDNY administrative company, and community district can be dissolved by combining the appropriate fields in atomic polygons.
