INTRODUCTION AND OVERVIEW

The PLUTO Data Dictionary defines the fields in the PLUTO system in order of the field's position in the data file.

The Data Dictionary contains the following:

- **Field Name:**

Two types of Field Names are included - external and internal field names.

The external Field Name is the common name of the field.

The internal Field Name, which appears in parenthesis, is the name of the field as defined in PLUTO.

- **Format:**

The Format is divided into two parts:

- Type of field; and
- Size of the field.

There are two different types of fields - alphanumeric and numeric.

Alphanumeric fields can contain any combination of alphabetic letters (i.e., A-Z), numbers (i.e., 0-9), national characters (e.g., @ \$ #) or special characters (e.g., blank, / ' () * & + - =).

Numeric fields only contain numbers (0-9).

The size of the field is the maximum number of digits (for numeric fields) or characters (for alphanumeric fields) in the field.

- **Data Source:**

The Data Source identifies the city agency and computer file or system the field was obtained or derived from.

- **Description:**

The Description includes a brief explanation of the field; and where pertinent, all codes and decodes or pertinent value ranges and examples.

Four appendices are also included in the Data Dictionary. **Appendix A: Missing Geographic Data** quantifies the number of tax lots missing geographic descriptors. **Appendix B: Special Purpose and Limited Height Districts** lists all of the Special Purpose and Limited Height Districts and their District Symbols. All of the building classes are listed in **Appendix C: Building Class Codes**. The Land Use Categories and the Building Classes that comprise them are listed in **Appendix D: Land Use Categories**.

Field Name: **BOROUGH (Borough)**

Format: Alphanumeric - 2 characters

Data Source: Department of City Planning - based on data from:
Department of Finance - RPAD Master File

Description: The borough that the tax lot is located in.

This field contains a two character borough code.

CODES	DECODES
BX	Bronx
BK	Brooklyn
MN	Manhattan
QN	Queens
SI	Staten Island

NOTE: Two portions of the city, Marble Hill and Rikers Island, are each legally located in one borough but are serviced by different boroughs. The BOROUGH codes associated with these areas are the boroughs they are legally located in.

Specifically, Marble Hill is serviced by the Bronx but is legally located in Manhattan and has a Manhattan BOROUGH Code. Rikers Island has a Bronx BOROUGH Code because it is legally located in the Bronx although it is serviced by Queens.

Field Name: **TAX BLOCK (Block)**

Format: Numeric - 5 digits (99999)

Data Source: Department of Finance - RPAD Master File

Description: The tax block that the tax lot is located in.

This field contains a one to five digit tax block number which is preceded with leading blanks when the tax block is less than five digits.

Each tax block is unique within a borough (see BOROUGH).

Examples:

Tax Block 609 would be stored as `609`, where is a blank
Tax Block 15828 would be stored as `15828`

Field Name: TAX LOT (Lot)

Format: Numeric - 4 digits (9999)

Data Source: Department of City Planning based on data from:
Department of Finance - RPAD Master File

Description: The number of the tax lot.

This field contains a one to four digit tax lot number which is preceded with leading blanks when the tax lot is less than four digits.

Each tax lot is unique within a tax block (see TAX BLOCK).

Examples:

Tax Lot 96 would be stored as `bb96`, where `b` is a blank

Tax Lot 1101 would be stored as `1101`

NOTES: Each unit in a building that is a condominium is defined by the Department of Finance as a separate tax lot. To make condominium information more compatible with parcel information, the Department of City Planning aggregated condominium unit tax lot information so that each condominium complex within a tax block is represented by only one tax lot record. A condominium complex is defined as one or more structures or properties under the auspices of the same condominium association. The Department of City Planning then assigned the condominium billing tax lot number to the condominium complex tax lot record. If the Department of Finance had not yet assigned a billing tax lot number to the condominium complex then the lowest tax lot number within the condominium complex was used.

For MapPLUTO: The Department of Finance Digital Tax Map uses the Formerly Known As (FKA) Tax Lot number for condominiums. The Department of City Planning has modified the DOF Digital Tax Map replacing the FKA with the condominium billing tax lot number.

Often the Tax Lot number can tell you the type of tax lot. The following table identifies some of these tax lot numbering conventions. Of course there are exceptions to each convention.

TAX LOT NUMBER	TYPE OF LOT
1-999	Traditional Tax Lots
1001-6999	Condominium Unit Lots
7501-7599	Condominium Billing Lots
8000-8899	Subterranean Tax lots
8900-8999	DTM Dummy Tax Lots
9000-9899	Air Rights Tax Lots

NOTES: The Air Rights Tax Lot goes with the base Tax Lot

or Donating Tax Lot. For example: If Tax Lot 32 has Air Rights, those Air Rights would be identified as 9032.

When the structure is built the Air Rights Tax Lot is retired.
Property owners do not have to create an Air Rights Tax Lot to transfer development rights.

Field Name: COMMUNITY DISTRICT (CD)

Format: Numeric - 3 digits (999)

Data Source: Department of City Planning - based on data from:
Department of Finance – Digital Tax Map (DTM) modified by DCP
Department of City Planning – CD Layer in ArcGIS for the DTM
Department of City Planning – Geosupport System
Department of Finance - RPAD Master File

Description: The community district (CD) or joint interest area (JIA) that the tax lot is located in, or partially located in.

The Department of City Planning – CD Layer for the DTM is used as the source when it identifies a community district for a tax lot. If a tax lot is split among more than one community district then PLUTO uses the CD which contains the greatest percentage of lot area. If the Department of City Planning – CD Layer for the DTM does not identify a community district, the district is obtained from the Department of City Planning Geosupport System. If the community district is not available from the Geosupport System the DOF-RPAD Master file is used.

Only one data source is used per tax lot.

This field consists of three digits, the first of which is the borough code (see BORO CODE). The second and third digits are either the community district or joint interest area number, whichever is applicable.

If a tax lot is split by a community district boundary, only one community district is retained.

Appendix A: Missing Geographic Data contains the number and percent of tax lots missing geographic data in each borough by type of geography.

There are 59 community districts and 12 joint interest areas in the City. The JIA are areas, such as parks and airports, not contained within any single CD.

Valid CD and JIA numbers and JIA names are:

BOROUGH	CD	JIA NO	JIA NAME
Manhattan	101-112	164	Central Park
Bronx	201-212	226	Van Cortlandt Park
		227	Bronx Park
		228	Pelham Bay Park
Brooklyn	301-318	355	Prospect Park
		356	Gateway National Recreation Area in Brooklyn
Queens	401-414	480	LaGuardia Airport
		481	Flushing Meadow/Corona Park
		482	Forest Park
		483	JFK International Airport
		484	Gateway National Recreation Area in Queens
Staten Island	501-503	595	Gateway National Recreation Area in Staten Island

NOTE: Two portions of the city, Marble Hill and Rikers Island, are legally located in one borough and are each serviced by different boroughs. The COMMUNITY DISTRICT codes associated with these areas are the community districts they are serviced by.

Specifically, Marble Hill is legally located in Manhattan but is serviced by the Bronx and has Bronx COMMUNITY DISTRICT codes of 207 or 208.

Rikers Island has a Queens COMMUNITY DISTRICT code of 401 since it is serviced by Queens even though it is legally located in the Bronx.

Field Name: CENSUS TRACT (CT2010)

Format: Alphanumeric - 7 characters, including a decimal point

Data Source: Department of City Planning - Geosupport System

Description: The 2010 census tract that the tax lot is located in.

This field contains a one to four digit census tract number, a decimal point and a two digit suffix. The census tract number is preceded with leading blanks when the census tract number is less than four digits. If there is no census tract suffix, there is no decimal point and the census tract number is followed by three blanks.

If a tax lot is split by a census tract boundary, only one census tract is

retained.

Appendix A: Missing Geographic Data contains the number and percent of tax lots missing geographic data in each borough by type of geography.

2010 census tracts are geographic areas defined by the U.S. Census Bureau for the 2010 Census.

Each census tract is unique within a borough (see BOROUGH).

Appendix A: Missing Geographic Data contains the number and percent of tax lots missing geographic data in each borough by type of geography.

2010 census blocks are the smallest geographic areas reported on by the U.S. Census Bureau for the 2010 census.

Format: Alphanumeric - 28 characters

Data Source: Department of Finance - RPAD Master File

Description: An address for the tax lot.

For example: Tax Lot 98 is divided by a zoning boundary line into Part A and Part B. Part A, the largest portion of the lot, is in a commercial zoning district,

while Part B is in a residential zoning district. ZONING, ZONING DISTRICT 1 will contain the commercial zoning district associated with Part A.

Field Name: BUILDING CLASS (BldgClass)

Format: Alphanumeric - 2 characters

Data Source: Department of City Planning - based on data from:
Department of Finance - RPAD Master File

Description: A code describing the major use of structures on the tax lot.

Building Classes were developed and are assigned by the Department of Finance with the exception of Q0 and the mixed use condominium building classes that were developed by the Department of City Planning (DCP). Q0 was assigned by DCP to government owned tax lots zoned as either Park, ParkNYS or PARKUS that are predominantly used as open space. The mixed use condominium building classes were assigned by DCP to condominiums that contain a mix of residential and commercial units or more than one type of residential or commercial unit

NOTES: If there are multiple uses or buildings on a tax lot, the building class describes the use with the greatest square footage on the tax lot. Several building classes describe mixed use buildings (combinations of residential and office or retail uses).

A tax lot changes from a vacant to non-vacant building class:

- With the issuance of Selected Department of Buildings Permits including New Building, Demolitions; and Alterations where there are changes to use, square footage, type and the neighborhood where the permit is issued;
- When the Assessors sees change in the field; and
- Feedback from the public.

Demolition is not enough to change a Building Class but the presence of wall studs is.

Property value is assessed as of January 5th. If a site is not completed by April 14th the assessed building value is 0 and the Building Class reverts to Vacant.

See *Appendix C - Building Class Codes* for codes and decodes.

Field Name: LAND USE CATEGORY (LandUse)

Format: Alphanumeric - 2 characters

Data Source: Department of City Planning - based on data from:
 Department of Finance - RPAD Master File

Description: A code for the tax lot's land use category, modified for display of parks, New York City Department of Parks and Recreation properties and New York State Office of Parks, Recreation and Historic Preservation properties in the appropriate category on land use maps.

A tax lot's land use category is derived from the lot's building class (see BUILDING CLASS). The Department of City Planning assigned building classes to the most appropriate land use category. Park properties were identified using data sources other than the DOF Building Classes and, where appropriate, were classified with a Land Use Category of *09-Open Space and Outdoor Recreation*, regardless of the tax lot's building class.

Appendix D - Land Use Categories details the relationship of building classes to land use categories.

Format: Numeric - 2 digits (99)

Data Source: Department of City Planning - based on data from:

Description: The number of easements on the tax lot.

If the number of easements is zero, the tax lot has no easement.

Field Name: OWNERSHIP, TYPE OF OWNERSHIP CODE (OwnerType)

Format: Alphanumeric - 1 character

Data Source: Department of City Planning - based on data from:
 Department of Citywide Administrative Services - IPIS
 Department of Finance - RPAD Master File

Description: A code indicating type of ownership for the tax lot.

Only one data source is used per tax lot.

The IPIS file, which contains more accurate and specific type of city ownership data than RPAD, is used when data is available for that lot. Codes C, M, O, P are obtained from IPIS.

If the tax lot is not on the IPIS file then the RPAD file was checked to see if the lot's Total Exempt Value equaled its Total Assessed Value. If the two values are the same, the lot is given a code of X. Otherwise the tax lot is not given any TYPE OF OWNERSHIP CODE.

It is recommended that OWNERSHIP, OWNER NAME be referenced to verify type of ownership, specifically when state and federal government and public authority ownership is important.

CODES	DECODES
C	City Ownership
M	Mixed City & Private Ownership
O	Other – Public Authority, State or Federal Ownership
P	Private Ownership – Either the tax lot has started an “in rem” action or it was once city owned.
X	Mixed (Excludes property with a C, M, O, or P ownership code). Fully tax exempt property that could be owned by the city, state, or federal government; a public authority; or a private institution
<i>blank</i>	Unknown (Usually Private Ownership)

Field Name: OWNERSHIP, OWNER NAME (OwnerName)

Format: Alphanumeric - 21 characters

Data Source: Department of Finance - RPAD Master File

Description: The name of the owner of the tax lot.

Field Name: LOT AREA (LotArea)

Format: Numeric - 9 digits (999999999)

Data Source: Department of Finance - RPAD Master File

Description: Total area of the tax lot, expressed in square feet rounded to the nearest integer.

Lot Area contains street beds when the tax lot contains “paper streets” i.e., street mapped but not built.

If the tax lot is not an irregularly shaped lot (LOT, IRREGULAR CODE) the Department of Finance derives the Lot Area by multiplying the Lot Frontage by the Lot Depth. If the tax lot is irregularly shaped Finance manually calculates the Lot Area from the Tax Maps.

If the LOT AREA is zero, data is not available for the tax lot.

Field Name: **FLOOR AREA, TOTAL BUILDING (BldgArea)**

Format: Numeric - 11 digits (99999999999)

Data Source: Department of City Planning - based on data from:
 Department of Finance - RPAD Master File
 Department of Finance - Mass Appraisal System

Description: The total gross area in square feet.

Only one data source is used per tax lot (See FLOOR AREA, TOTAL BUILDING SOURCE CODE) except for condo measurements which come from the Condo Declaration and are net square footage not gross.

If FLOOR AREA, TOTAL BUILDING SOURCE CODE field has a code of 2 or 7, the TOTAL BUILDING FLOOR AREA is based on gross building area also known as total gross square feet. The TOTAL FLOOR AREA is for all of the structures on the tax lot, including stairwells, halls, elevator shafts, attics and extensions such as attached garages. Measurements are based on exterior dimensions and does take into account setbacks.

If the FLOOR AREA, TOTAL BUILDING SOURCE CODE field has a value of 5, the floor area was calculated from the DOF RPAD Master File using the building dimensions and number of stories for ONLY the largest structure on the tax lot.

NOTES: This is a rough estimate of the gross building floor area and does not necessarily take into account all the criteria for calculating floor area as defined in [section 12-10](#) of the Zoning Resolution.

If a roof is used for parking/garden/playground the square footage is not included in the Floor Area.

The two main things that trigger an update is the issuance of a Department of Buildings permit and a request from the owner to update the data.

The sum of COMMERCIAL and RESIDENTIAL FLOOR AREA does not always equal TOTAL BUILDING FLOOR AREA.

If the FLOOR AREA, TOTAL BUILDING SOURCE CODE is 2, the TOTAL BUILDING FLOOR AREA contains the Common Area for condominiums

If the FLOOR AREA, TOTAL BUILDING SOURCE CODE is 7, the TOTAL BUILDING FLOOR AREA does not include finished basement below grade.

If the basement in a one, two or three family structure is Above Grade and Finished then the square footage is added to Total Building Floor Area.

A TOTAL BUILDING FLOOR AREA of zero can mean it is either not available or not applicable. If NUMBER OF BUILDINGS is greater than zero, then a TOTAL BUILDING FLOOR AREA of zero means it is not available. If NUMBER OF BUILDINGS is zero, then a TOTAL BUILDING FLOOR AREA of zero means it is not applicable.

An update to the Floor Area is triggered by the issuance of a Department of Buildings Permit, feedback from the public and scheduled visits by the Department of Finance assessors.

Basement square footage may be included in COMMERCIAL FLOOR AREA if the commercial buildings meets two of the three following criteria:
