

# ZONING TAX LOT DATABASE

## OVERVIEW

The Zoning Tax Lot Database contains all tax lots from the specified version of the Department of Finance's Digital Tax Map. For each tax lot, it specifies the applicable zoning district(s), commercial overlay(s), special purpose district(s), and other zoning related information.

DCP assigns a zoning feature (includes zoning districts, special districts, and limited height districts) to a tax lot if 10% or more of the tax lot is covered by the zoning feature. For commercial overlays, a tax lot is assigned a value if 10% or more of the tax lot is covered by the commercial overlay and/or 50% or more of the commercial overlay feature is within the tax lot. The zoning features are taken from the Department of City Planning NYC GIS Zoning Features.

## CHANGE HISTORY

December 31, 2019

- The logic for calculating **Zoning District 1** has been adjusted to account for large lots that are primarily under water. In previous versions, **Zoning District 1** was blank if no zoning district covered at least 10% of the lot area. Starting with this version, the zoning district classification occupying the greatest percentage of a tax lot's area is assigned to **Zoning District 1**, even if the percentage is under 10%.
- New field: **Notes** – A text field containing notes of importance to one or more tax lots. For this version, the field only has a value for tax lots affected by the 12/19/19 court order on the Special Inwood District Rezoning. See the data dictionary below for more information.

June 30, 2019

- DCP's Technical Review Division is undertaking a multi-month project to more closely align NYC GIS Zoning Features with the official zoning map. This results in slight shifts to the boundaries between zoning features and may change the zoning assigned to a lot.

April 30, 2019

- This version contains numerous changes triggered by updates to the NYC GIS zoning features to refine boundaries and correct parklands. The majority of these changes are in Staten Island.

## **ZONING TAX LOT DATA DICTIONARY**

- With this release of the Zoning Tax Lot Database, DCP has changed the methodology used to create the database. This change brings the database into alignment with DCP NYC GIS Zoning Features.
- Previous versions of the Zoning Tax Lot Database used a variety of sources to identify parkland. Starting with this version, tax lots that intersect with areas designated in NYC GIS Zoning Features as PARK, BALL FIELD, PLAYGROUND, and PUBLIC SPACES have been assigned a single value of PARK in the Zoning Tax Lot Database. No other parkland datasets are incorporated. The NYC GIS Zoning Features do not constitute a definitive list of parks in the city. Lots designated as PARK should not be used to calculate the amount of open space in an area.
- The abbreviations used to designate special districts have been changed to agree with those in DCP NYC GIS Zoning Features.

Tax lots that intersect with areas designated in NYC GIS Zoning Features as PARK, BALL FIELD, PLAYGROUND, and PUBLIC SPACES have been assigned a single value of PARK in the Zoning Tax Lot Database. These NYC GIS Zoning Features do not constitute a definitive list of parks in the city. Lots designated as PARK should not be used to calculate the amount of open space in an area.

For example, if Tax Lot 98 is divided by a zoning boundary line into part A and part B. Part A has the larger portion of the lot and is located in commercial zoning district while part B is in residential zoning district; **Zoning District 1** will have the commercial zoning district value associated with part A.

If the tax lot is not split between three zoning districts, the field is blank.

For example, tax lot 98 is divided by zoning boundary lines into three sections - part A, part B and part C. Part A represents the largest portion of the lot, part B is the second largest portion of the lot, and part C covers
