Floor area preservation

In Preservation Area P-1, the change of use of floor area to Use Group 6B use after March 26, 1987, and, in Preservation Area P-2, for buildings with 70,000 square feet or more of floor area existing on January 19, 2005, the change of use of floor area to any use permitted by the underlying use regulations is permitted only by certification of the Chairperson of the City Planning Commission that floor area has been preserved subject to the provisions of Section 121-115 (Certification and other requirements of preservation and conversion) for uses specified in Section 121-112 (Use Group B).

The amount of floor area to be preserved shall be equal to the amount of floor area changed to a Use Group 6B use or any use permitted by the underlying use regulations, as applicable. Such floor area may be preserved in the same building or in any other comparable building in Preservation Areas P-1 or P-2, subject to the provisions of Section 121-114 (Comparability).
#Floor area# may not be preserved on portions of floors. If the #floor area# to be preserved includes a fraction of a floor, the next highest number of full floors must be preserved for a permitted #use# in Use Group B. At the time of such change of #use#, #floor area# to be preserved must either be vacant or occupied by a #use# in Use Group B.

121-114

Comparability

Where the #floor area# to be preserved is not located within the same #building# where the #use# will be changed, such #floor area# must be comparable to #floor area# in the #building# where the #use# will be changed. Comparability, shown by an affidavit from a professional engineer or a registered architect, licensed under the laws of the State of New York, shall exist where the #floor area# to be preserved meets the following criteria:

(a) Elevators: Load and number
   (1) Load

   Each elevator shall have a minimum load of 2,000 pounds. The total load of all elevators servicing the #floor area# to be preserved shall be in accordance with the following ratio:

   \[
   \text{Total load} \quad \begin{array}{c}
   \text{is greater than or equal to 90\%}\end{array} \quad \text{of} \\
   \text{Gross #floor area# of #building# to be preserved} \\
   \hline
   \text{Gross #floor area# of #building# that will be occupied by the change of #use#}
   \]

   (2) Number

   There shall be a minimum of two elevators. The number of elevators servicing the #floor area# to be preserved shall be in accordance with the following ratio:

   \[
   \text{Number of elevators} \quad \begin{array}{c}
   \text{is greater than or equal to 90\%}\end{array} \quad \text{of} \\
   \text{Gross #floor area# of #building# to be preserved} \\
   \hline
   \text{Gross #floor area# of #building# that will be occupied by the change of #use#}
   \]

   Notwithstanding the above, where there is only one elevator servicing the #floor area# to be occupied by the change of #use#, there may be one elevator servicing the #floor area# to be preserved if the following exist:

   (i) the #floor area# to be serviced by the elevator in the #building# to be preserved does not exceed the #floor area# serviced by the elevator in the #building# to be occupied by the change of #use# by more than 10 percent; and

   (ii) the ratio of the volume of the elevator servicing the #floor area# to be preserved to the #floor area# to be preserved is at least 90 percent of the ratio of the volume
of the elevator servicing the #floor area# to be occupied by the change of #use# to the #floor area# to be occupied by the change of #use#. If the number of elevators required pursuant to the above ratio includes a fraction of an elevator, this fraction shall be rounded to the nearest whole number.

(b) Floor load
The floors shall have a minimum live load capacity of 100 pounds per square foot (100 psf).

(c) Size of floors
The #floor area# shall be located on floors of not less than 3,000 square feet or 50 percent of the size of the floors in the #building# to be occupied by the change of #use#, whichever is greater. #Floor area# may not be preserved on portions of floors.

(d) Loading facilities
The loading facilities shall be at least equal in number to those in the #building# to be occupied by the change of #use#. In addition, if such #building# has an off-street loading dock, the #building# containing the #floor area# to be preserved must have such off-street loading facilities.

(e) Column spacing
There shall be a minimum distance between columns of 16 feet, measured on center. In addition, the average distance between columns shall not be less than 90 percent of the average distance between columns in the #building# to be occupied by the change of #use#.

(f) Height of #stories#
The #stories# shall have an average minimum height of ten feet.

121-115 Certification and other requirements of preservation and conversion

(a) Prior to the issuance of an alteration permit for the change of #use# of #floor area# to Use Group 6B #use# in Preservation Area P-1, or the change of #use# of #floor area# to any #use# permitted by the underlying #use# regulations in Preservation Area P-2, the Chairperson of the City Planning Commission shall certify compliance with the requirements of Section 121-113 (Floor area preservation), upon proof of a legal commitment to preserve and maintain the required #floor area# for a permitted #use# in Use Group B. Such legal commitment shall be executed by all parties having any interest in the #floor area# to be preserved as shown by a certificate issued by a title insurance company licensed to do business in the State of New York showing all such parties in interest.

A "party in interest" in the tract of land shall include only (W) the fee owner thereof, (X) the holder of any enforceable recorded interest superior to that of the fee owner and which could result in such holder obtaining possession of all or substantially all of such tract of land, (Y) the holder of any enforceable recorded interest in all or substantially all of such tract of land which would be adversely affected by the preservation as required herein, and (Z) the holder of any unrecorded interest in all or substantially all of such tract of land which would be superior to and adversely affected by the preservation required herein and which would be disclosed by a physical inspection of the tract of land.

A copy of the legal commitment required herein shall be recorded in the Conveyances Section of the Office of the City Register of New York County upon certification.

(b) The amount of #floor area# required to be preserved in any #building# pursuant to Section 121-113 shall not be reduced by the existence of a previously issued legal commitment for preservation on a portion of the #floor area# in the #building#.

(c) If any #floor area# to be preserved for a #use# in Use Group B pursuant to Section 121-113 is damaged, destroyed or becomes unusable, it shall be repaired or reconstructed only in accordance
with the conditions and restrictions set forth in the certification granted by the City Planning Commission and the legal commitment constituting part of such certification. Failure to comply with any other conditions and restrictions or failure to rebuild such preserved floor area as set forth above shall constitute a violation of the certification and may constitute a basis for denial or revocation of the building permit or certificate of occupancy issued for the building containing preserved floor area.

121-12

(1) any portion of the #building or other structure developed# or #enlarged# pursuant to the tower regulations of Sections 33-45 (Tower Regulations) or 35-64 (Special Tower Regulations for Mixed Buildings), as applicable, may penetrate the #sky exposure plane#, provided no portion of such #building or other structure# exceeds the height limit of 250 feet; and

(2) permitted obstructions, as listed in Section 33-42, may penetrate the #sky exposure plane# and the height limit of 250 feet. In addition, a dormer, as listed in paragraph (c)(1) of Section 23-621, may penetrate the #sky exposure plane#.
On a #zoning lot# with frontage of at least 200 feet along at least one #street#, up to 20 percent of the #aggregate width of the street wall# facing such #street#, for a maximum width of 50 feet, may be recessed to a maximum depth of 15 feet from the #street line#, provided the recessed area is located a minimum of 20 feet from an adjacent #building# and that a minimum of 60 percent of such area is planted with any combination of grass, ground cover, shrubs, trees or other living plant material in the ground or in planters permanently affixed to the ground.

(1) **Along #wide streets#**

On #wide streets#, and on #narrow streets# within 50 feet of their intersection with a #wide street#, the #street wall# of a #building# shall rise without setback to a minimum base height of 125 feet and may rise to a maximum base height of 155 feet.

However, where the height of an existing adjacent #street wall# fronting on the same #street line# rises to a height exceeding 155 feet before setback, the maximum base height may be increased to the height of such existing adjacent #street wall# but shall not exceed a base height of 205 feet. In addition, where existing adjacent #street walls# on both sides of the #building# rise to a height exceeding 155 feet before setback, the maximum base height of such #building# may be increased to the higher of the two existing adjacent #street walls#, except in no instance shall the base height of such #building# exceed 205 feet.

(2) **Along #narrow streets#**

On #narrow streets#, beyond 50 feet of their intersection with a #wide street#, the #street wall# of a #building# shall rise without setback to a minimum base height of 85 feet and may rise to a maximum base height of 135 feet.

As an alternative, the minimum and maximum base heights applicable to a #wide street# may be applied along a #narrow street# beyond 50 feet of a #wide street#, up to a maximum of 100 feet from such #wide street#.

**Required setbacks**

(1) **Along #wide streets#**

For #buildings#, or portions thereof, located on #wide streets# and on #narrow streets# within 100 feet of a #wide street#, the portion of such #building# above the applicable maximum base height set forth in paragraph (b)(1) of this Section, shall be set back from the #street wall# of the #building# at least 10 feet along a #wide street# and at least 15 feet along a #narrow street#, except such dimensions may include the depth of any permitted recesses in the #street wall#. Above such required setback, any portion of a #building# on the #zoning lot# shall be considered a “tower.”

(2) **Along #narrow streets#**

For #buildings#, or portions thereof, located on #narrow streets# beyond 100 feet of a #wide street#, the portion of such #building# above the applicable maximum base height set forth in paragraph (b)(2) of this Section shall be set back from the #street wall# of the
#building# at least 15 feet along a #narrow street#, except such dimensions may include
the depth of any permitted recesses in the #street wall#. Above such required setback, any
portion of a #building# on the #zoning lot# shall be considered a “tower.”

(d) **Tower Regulations**

Each #story# of a tower above the required setback shall not exceed a maximum #lot coverage#
of 40 percent of the #lot area# of a #zoning lot# or, for #zoning lots# of less than 20,000 square
feet, the percent set forth in Section 43-451 (Towers on small lots).

(e) **Maximum #building# height**

No height limit shall apply to towers.

**SPECIAL BULK REGULATIONS WITHIN SUBDISTRICT A-2**

The following special #bulk# regulations shall apply within Subdistrict A-2, as shown on the map in
Appendix A of this Chapter.

**121-31-121-41**

**Maximum Permitted Floor Area Within Subdistrict A-2**

The basic maximum #floor area ratio# of a #zoning lot# containing #non-residential buildings# shall be
10.0 and may be increased to a maximum #floor area ratio# of 12.0 only pursuant to Section 93-31
(District Improvement Fund Bonus). Such #zoning lot# may also contain #residences# within #buildings#
extisting on January 19, 2005, provided that such #buildings# are not #enlarged# after such date. For
#zoning lots# containing #residences# within a #building# that is #developed# or #enlarged# on or after
January 19, 2005, the basic maximum #floor area ratio# shall be 6.5. The #floor area ratio# of any such
#zoning lot# may be increased from 6.5, pursuant to Section 93-31, and pursuant to Section 23-90
(INCLUSIONARY HOUSING), as modified by Section 93-23 (Modifications of Inclusionary Housing
Program), provided that for every five square feet of #floor area# increase pursuant to Section 93-31,
there is a #floor area# increase of six square feet pursuant to Section 23-90, as modified by Section 93-23,
inclusive. The maximum #residential floor area ratio# shall be 12.0.

For the #conversion# to #dwelling units# of #non-residential buildings#, or portions thereof, where the
total #floor area# on the #zoning lot# to be #converted# to #residential use# exceeds a #floor area ratio#
of 12.0, such excess #floor area# shall be permitted only pursuant to Section 93-31.

**121-32-121-42**

**Height of Street Walls and Maximum Building Height Within Subdistrict A-2**

(a) **Height of #street walls#**

The #street wall# of any #building# shall be located on the #street line# and extend along the
entire #street# frontage of the #zoning lot# not occupied by existing #buildings# to remain. Such
#street wall# shall rise without setback to a minimum base height of 80 feet and a maximum base
height of 90 feet before setback. However, if the height of an adjacent #street wall# fronting on
the same #street line# is higher than 90 feet before setback, the #street wall# of the new or
#enlarged building# may rise without setback to the height of such adjacent #street wall#, up to a
maximum height of 120 feet.
For zoning lots, or portions thereof, with street frontage of 25 feet or less and existing on June 29, 2010, a minimum base height lower than 80 feet shall be permitted along such street frontage in accordance with the following provisions:

(1) where the height of an adjacent street wall fronting on the same street line is at least 60 feet and less than 80 feet, the street wall of the new or enlarged building may rise without setback to the height of such adjacent street wall; or

(2) where the height of an adjacent street wall fronting on the same street line is less than 60 feet, the street wall of the new or enlarged building may rise without setback to a minimum street wall height of 60 feet.

The street wall of any building may rise to a height less than the minimum base height required pursuant to this paragraph (a), provided that no building on the zoning lot exceeds such height, except where such building is located on a zoning lot with multiple buildings, one or more of which is developed, enlarged or altered after February 2, 2011, to a height exceeding the minimum base height required pursuant to this paragraph (a).

(b) Maximum building height

Above a height of 90 feet or the height of the adjacent street wall if higher than 90 feet, no portion of a building or other structure shall penetrate a sky exposure plane that begins at a height of 90 feet above the street line, or the height of the adjacent street wall if higher than 90 feet, and rises over the zoning lot at a slope of four feet of vertical distance for each foot of horizontal distance to a maximum height limit of 250 feet, except as provided below:

(1) any portion of the building or other structure developed or enlarged pursuant to the tower regulations of Sections 33-45 (Tower Regulations) or 35-64 (Special Tower Regulations for Mixed Buildings), as applicable, may penetrate the sky exposure plane, provided no portion of such building or other structure exceeds the height limit of 250 feet; and

(2) permitted obstructions, as listed in Section 33-42, may penetrate the sky exposure plane and the height limit of 250 feet. In addition, a dormer, as listed in paragraph (c)(1) of Section 23-621 (Permitted obstructions in certain districts), may penetrate the sky exposure plane.

On a zoning lot with frontage of at least 200 feet along at least one street, up to 20 percent of the aggregate width of the street wall facing such street, for a maximum width of 50 feet, may be recessed to a maximum depth of 15 feet from the street line, provided the recessed area is located a minimum of 20 feet from an adjacent building and that a minimum of 60 percent of such area is planted with any combination of grass, ground cover, shrubs, trees or other living plant material in the ground or in planters permanently affixed to the ground.
