Notes: (1) The values for format, size, and number of decimal places in the above file layout pertain to the ASCII format of the facility file. A parkland property's CAPACITY field contains the same value as its ACREAGE field. The CAPACITY field of a non-parkland facility or a parkland property whose acreage is an integer (whole number) contains three trailing 0s to the right of a decimal point. The file structure in Access can be viewed while running the software.

(2) Information in this current release is different from the 2011.1 release as follows: City and national park properties and homeless services data have been updated. The codes used for FACILITY_TYPE field have been modified for park properties and homeless services. Additional codes for AGENCY_OVERSIGHT (and AGENCY_OPERATING) field have been added. CT2000 (2000 Census Tract) field has been replaced with CT2010 (2010 Census Tract) field.

Description:

BBL

Numeric - 10 digits (9999999999)

A concatenation of the borough code, tax block and tax lot of the facility, program, or parkland property. This field is used for mapping selection.

This field consists of the borough code followed by the tax block followed by the tax lot. The borough code is one numeric digit. The tax block is one to five numeric digits, preceded with leading zeros when the block is less than five digits. The tax lot is one to four digits and is preceded with leading zeros when the lot is less than four digits. If a parkland property is comprised of more than one BBL, multiple occurrences will be stored for the property.

Examples:

Manhattan Borough Code 1, Tax Block 16, Tax Lot 100 would be stored as 1000160100.

Brooklyn Borough Code 3, Tax Block 15828, Tax Lot 7501 would be stored as 3158287501.

See notes under fields "BLOCK" and "LOT" on parkland properties defined as "Joint NYCDOT/DPR Landscaped Area" and certain transportation-related parkland properties.

XCOORD

Numeric - 7 digits (9999999)

The X coordinate of the XY coordinate pair which depicts the approximate location of the facility, program, or parkland property. (Also see YCOORD). Facilities' X and Y coordinates must be used together for mapping selection. The XY coordinates are expressed in the New York-Long Island State Plane coordinate system.

NOTE: If the facility is on more than one tax block/tax lot, multiple occurrences of the XY coordinate pairs are stored for the facility. For example, Big Bush Park in Queens is located on Block 2323/Lot 23, Block 2324/Lot 1, and Block 2317/Lot 51. Three records for this property with the same ID are listed in the database with three different pairs of XY coordinate. Certain parkland properties are located on multiple parcels which are not assigned tax block and tax lot. For example, Park Avenue Malls in Manhattan is listed in the database as multiple records without tax block and tax lot but with individual XY coordinate pair. Certain

parkland properties are located on non-contiguous parts within the same tax lot. For example, P.S. 139 Playground in Brooklyn which includes a northern portion and a southern portion of Block 5144/Lot 64 is listed in the database twice, each with its own XY coordinate pair.
