INTRODUCTION AND OVERVIEW

The PLUTO Data Dictionary defines the fields in the PLUTO system in order of the field's position in the data file.

The Data Dictionary contains the following:

- **Field Name:**

Two types of Field Names are included - external and internal field names.

The external Field Name is the common name of the field.

External Field Names followed by an asterisk (*) identifies fields that have been formatted for use with DCP's BYTES of the BIG APPLE™ geographic base map files.

The internal Field Name, which appears in parenthesis, is the name of the field as defined in PLUTO.

- **Format:**

The Format is divided into two parts:

- type of field; and
- size of the field.

There are two different types of fields - alphanumeric and numeric.

Alphanumeric fields can contain any combination of alphabetic letters (i.e., A-Z), numbers (i.e., 0-9), national characters (e.g., @ \$ #) or special characters (e.g., blank , . / ' () * & + - =).

Numeric fields only contain numbers (0-9).

The size of the field is the maximum number of digits (for numeric fields) or characters (for alphanumeric fields) in the field.

- **Data Source:**

The Data Source identifies the city agency and computer file or system the field was obtained or derived from.

- **Description:**

The Description includes a brief explanation of the field; and where pertinent, all codes and decodes or pertinent value ranges and examples.

Four appendices are also included in the Data Dictionary. **Appendix A: Missing Geographic Data** quantifies the number of tax lots missing geographic descriptors. **Appendix B: Special Purpose and Limited Height Districts** lists all of the Special Purpose and Limited Height Districts and their District Symbols. All of the building classes are listed in **Appendix C:**

Building Class Codes.

Finally, alphabetical lists of the field names (both external and internal) and their location in the Data Dictionary are included after the field definitions.

Field Name: **BOROUGH (Borough)**

Format: Alphanumeric - 2 characters

Data Source: Department of City Planning - based on data from:
 Department of Finance - RPAD Master File

Description: The borough that the tax lot is located in.

 This field contains a two character borough code.

CODES

DECODES

BX	Bronx
BK	Brooklyn
MN	Manhattan
QN	Queens
SI	Staten Island

NOTE: Two portions of the city, Marble Hill and Rikers Island, are each legally located in one borough but are serviced by different boroughs. The BOROUGH codes associated with these areas are the boroughs they are legally located in.

 Specifically, Marble Hill is serviced by the Bronx but is legally located in Manhattan and has a Manhattan BOROUGH Code. Rikers Island has a Bronx BOROUGH Code because it is legally located in the Bronx although it is serviced by Queens.

Field Name: **TAX BLOCK (Block)**

Format: Numeric - 5 digits (99999)

Data Source: Department of Finance - RPAD Master File

Description: The tax block that the tax lot is located in.

 This field contains a one to five digit tax block number which is preceded with leading blanks when the tax block is less than five digits.

 Each tax block is unique within a borough (see BOROUGH).

 Examples:

 Tax Block 609 would be stored as 609, where  is a blank
 Tax Block 15828 would be stored as 15828

Field Name: TAX LOT (Lot)

Format: Numeric - 4 digits (9999)

Data Source: Department of Finance - RPAD Master File

Description: The number of the tax lot.

This field contains a one to four digit tax lot number which is preceded with leading blanks when the tax lot is less than four digits.

Each tax lot is unique within a tax block (see TAX BLOCK).

Examples:

Tax Lot 96 would be stored as 96, where  is a blank

Tax Lot 1101 would be stored as 1101

NOTE: Each unit in a building that is a condominium is defined by the Department of Finance as a separate tax lot. To make condominium information more compatible with parcel information, the Department of City Planning aggregated condominium unit tax lot information so that each condominium complex within a tax block is represented by only one tax lot record. A condominium complex is defined as one or more structures or properties under the auspices of the same condominium association. The Department of City Planning then assigned the condominium billing tax lot number to the condominium complex tax lot record. If the Department of Finance had not yet assigned a billing tax lot number to the condominium complex then the lowest tax lot number within the condominium complex was used.

Field Name: COMMUNITY DISTRICT (CD)

Format: Numeric - 3 digits (999)

Data Source: Department of City Planning - based on data from:
Department of City Planning - Tax Block and Lot Not Clipped to the Shoreline File
Department of City Planning Geosupport System
Department of Finance - RPAD Master File

Description: The community district (CD) or joint interest area (JIA) that the tax lot is located in, or partially located in.

The Tax Block and Lot Not Clipped to the Shoreline File is used as the source when it identifies a community district for a tax lot. Otherwise the community district is obtained from the Department of City Planning Geosupport System. If the community district is not available from the Geosupport System the

DOF-RPAD Master file is used.

Only one data source is used per tax lot.

This field consists of three digits, the first of which is the borough code (see BORO CODE). The second and third digits are either the community district or joint interest area number, whichever is applicable.

Appendix A: Missing Geographic Data contains the number and percent of tax lots missing geographic data in each borough by type of geography.

There are 59 community districts and 12 joint interest areas in the City. The JIA are areas, such as parks and airports, not contained within any single CD.

Valid CD and JIA numbers and JIA names are:

BOROUGH	CD NUMBERS	JIA NUMBERS	JIA NAMES

Staten Island	501-503	595	SI Gateway National Recreational Area

NOTE: Two portions of the city, Marble Hill and Rikers Island, are legally located in one borough and are each serviced by different boroughs. The COMMUNITY DISTRICT codes associated with these areas are the community districts they are serviced by.

Specifically, Marble Hill is legally located in Manhattan but is serviced by the Bronx and has Bronx COMMUNITY DISTRICT codes of 207 or 208.

Rikers Island has a Queens COMMUNITY DISTRICT code of 401 since it is serviced by Queens even though it is legally located in the Bronx.

 Department of Parks and Recreation - Property Maps
 New York State Office of Parks, Recreation and Historic Preservation - List of Properties

Description: A code for the tax lot's land use category, modified for display of parks, New York City Department of Parks and Recreation properties and New York State Office of Parks, Recreation and Historic Preservation properties in the appropriate category on land use maps.

A tax lot's land use category is derived from the lot's building class (see BUILDING CLASS). The Department of City Planning assigned building classes to the most appropriate land use category. Park properties were identified using data sources other than the DOF Building Classes and, where appropriate, were classified with a Land Use Category of *09-Open Space and Outdoor Recreation*, regardless of the tax lot's building class.

Appendix D - Land Use Categories details the relationship of building classes to land use categories.

Field Name: EASEMENTS, NUMBER OF (Easements)

Format: Numeric - 2 digits (99)

Data Source: Department of City Planning - based on data from:
Department of Finance - RPAD Master File

Description: The number of easements on the tax lot.

If the number of easements is zero, the tax lot has no easement.

Field Name: **OWNERSHIP, TYPE OF OWNERSHIP CODE (OwnerType)**

Format: Alphanumeric - 1 character

Data Source: Department of City Planning - based on data from:
Department of Citywide Administrative Services - IPIS
Department of Finance - RPAD Master File

Description: A code indicating type of ownership for the tax lot.

Only one data source is used per tax lot.

The IPIS file, which contains more accurate and specific type of city ownership data than RPAD, is used when data is available for that lot. Codes C, M, O, P are obtained from IPIS.

If the tax lot is not on the IPIS file then the RPAD file was checked to see if the lot's Total Exempt Value equaled its Total Assessed Value. If the two values are the same, the lot is given a code of X. Otherwise the tax lot is not given any TYPE OF OWNERSHIP CODE.

It is recommended that OWNERSHIP, OWNER NAME be referenced to verify type of ownership, specifically when state and federal government and public authority ownership is important.

CODES	DECODES
C	City Ownership
M	Mixed City and Private Ownership
O	Other - Public Authority, State or Federal Ownership
P	Private Ownership - Either the tax lot has started an "in rem" action or it was once city owned
X	Mixed (Excludes property with a C, M, O, or P ownership code). Fully tax exempt property that could be owned by the city, state, or federal government; a public authority; or a private institution
blank	Unknown (Usually Private Ownership)

Field Name: **OWNERSHIP, OWNER NAME (OwnerName)**

Format: Alphanumeric - 21 characters

Data Source: Department of Finance - RPAD Master File

Field Name: **LOT, AREA (LotArea)**

Format: Numeric - 9 digits (999999999)

Data Source: Department of Finance - RPAD Master File

Description: Total area of the tax lot, expressed in square feet rounded to the nearest integer.

Lot Area contains street beds when the tax lot contains 'paper streets' i.e., street mapped but not built.

If the tax lot is not an irregularly shaped lot (LOT, IRREGULAR CODE) the Department of Finance derives the Lot Area by multiplying the Lot Frontage by the Lot Depth. If the tax lot is irregularly shaped Finance manually calculates the Lot Area from the Tax Maps.

If the LOT AREA is zero, data is not available for the tax lot.

Field Name: **FLOOR AREA, TOTAL BUILDING (BldgArea)**

Format: Numeric - 9 digits (999999999)

Data Source: Department of City Planning - based on data from:
Department of Finance - Major Property File
Department of Finance - RPAD Master File

Description: The total gross area in square feet.

Only one data source is used per tax lot (See FLOOR AREA, TOTAL BUILDING SOURCE CODE).

If FLOOR AREA, TOTAL BUILDING SOURCE CODE field has a code of 1 or 2, the total floor area is for all of the buildings on the tax lot. Measurements are based on exterior dimensions. The building floor area is calculated by multiplying the building footprint by the number of stories, where the number of stories includes all full and partial stories above the ground floor.

If the FLOOR AREA, TOTAL BUILDING SOURCE CODE field has a value of 5, the floor area was calculated from the DOF RPAD Master File using the building dimensions and number of stories for ONLY the largest building on the tax lot.

NOTES: The sum of COMMERCIAL and RESIDENTIAL FLOOR AREA does not always equal TOTAL BUILDING FLOOR AREA.

A TOTAL BUILDING FLOOR AREA of zero can mean it is either not available or not applicable. If NUMBER OF BUILDINGS is greater than zero, then a TOTAL BUILDING FLOOR AREA of zero means it is not available. If NUMBER OF BUILDINGS is zero, then a TOTAL BUILDING FLOOR AREA of zero means it is not applicable.

Field Name: FLOOR AREA, COMMERCIAL (ComArea)

Format: Numeric - 9 digits (999999999)

Data Source: Department of Finance - Major Property File

A COMMERCIAL FLOOR AREA of zero can mean it is either not available or not applicable.

The sum of COMMERCIAL and RESIDENTIAL FLOOR AREA does not always equal TOTAL BUILDING FLOOR AREA.

Field Name: FLOOR AREA, RESIDENTIAL (ResArea)

Format: Numeric - 9 digits (999999999)

Data Source: Department of Finance - Major Property File

Description: An estimate of the exterior dimensions of the portion of the building(s) allocated for residential use.

NOTES: This information is only collected for Tax Class 2 and Tax Class 4 properties.

A RESIDENTIAL FLOOR AREA of zero can mean it is either not available or not applicable.

The sum of COMMERCIAL and RESIDENTIAL FLOOR AREA does not always equal TOTAL BUILDING FLOOR AREA.
