INTRODUCTION AND OVERVIEW

The Zoning Tax Lot Data Dictionary defines the fields in the Zoning Tax Lot Database in order of the field's position in the data file.

The Data Dictionary contains the following:

- **Field Name:**

Two types of Field Names are included - external and internal field names.

The external Field Name is the common name of the field.

The internal Field Name, which appears in parenthesis, is the name of the field as defined in the Zoning Tax Lot Database.

- **Format:**

The Format is divided into two parts:

- Type of field; and
- Size of the field.

There are two different types of fields - alphanumeric and numeric.

Alphanumeric fields can contain any combination of alphabetic letters (i.e., A-Z), numbers (i.e., 0-9), national characters (e.g., @ \$ #) or special characters (e.g., blank , / ' () * & + - =).

Numeric fields only contain numbers (0-9).

The size of the field is the maximum number of digits (for numeric fields) or characters (for alphanumeric fields) in the field.

- **Data Source:**

The Data Source identifies the city agency and computer file or system the field was obtained or derived from.

- **Description:**

The Description includes a brief explanation of the field; and where pertinent, all codes and decodes or pertinent value ranges and examples.

One appendix is also included in the Data Dictionary. **Appendix A: Special Purpose and Limited Height Districts** lists all of the Special Purpose and Limited Height Districts and their District Symbols.

Field Name: **BOROUGH (Borough Code)**

Format: Alphanumeric - 1 character

Data Source: Department of City Planning - based on data from:
Department of Finance - RPAD Master File

Description: The borough that the tax lot is located in.

This field contains a two character borough code.

CODES	DECODES
1	Manhattan
2	Bronx
3	Brooklyn
4	Queens
5	Staten Island

NOTE: Two portions of the city, Marble Hill and Rikers Island, are each legally located in one borough but are serviced by different boroughs. The BOROUGH codes associated with these areas are the boroughs they are legally located in.

Specifically, Marble Hill is serviced by the Bronx but is legally located in Manhattan and has a Manhattan BOROUGH Code.
Rikers Island has a Bronx BOROUGH Code because it is legally located in the Bronx although it is serviced by Queens.

Field Name: **TAX BLOCK (Tax Block)**

Format: Alphanumeric - 5 characters

Data Source: Department of Finance - RPAD Master File

Description: The tax block that the tax lot is located in.

This field contains a one to five digit tax block number which is preceded with leading blanks when the tax block is less than five digits.

Each tax block is unique within a borough (see BOROUGH).

Field Name: **TAX LOT (Tax Lot)**

Format: Alphanumeric - 4 characters

Data Source: Department of City Planning based on data from:
Department of Finance - RPAD Master File

Description: The number of the tax lot.

This field contains a one to four digit tax lot number which is preceded with leading blanks when the tax lot is less than four digits.

Each tax lot is unique within a tax block (see TAX BLOCK).

NOTES: Each unit in a building that is a condominium is defined by the Department of Finance as a separate tax lot. To make condominium information more compatible with parcel information, the Department of City Planning aggregated condominium unit tax lot information so that each condominium complex within a tax block is represented by only one tax lot record. A condominium complex is defined as one or more structures or properties under the auspices of the same condominium association. The Department of City Planning then assigned the condominium billing tax lot number to the condominium complex tax lot record. If the Department of Finance had not yet assigned a billing tax lot number to the condominium complex then the lowest tax lot number within the condominium complex was used.

Often the Tax Lot number can tell you the type of tax lot. The following table identifies some of these tax lot numbering conventions. Of course there are exceptions to each convention.

TAX LOT NUMBER	TYPE OF LOT
1-999	Traditional Tax Lots
1001-6999	Condominium Unit Lots
7501-7599	Condominium Billing Lots
8000-8899	Subterranean Tax lots
8900-8999	DTM Dummy Tax Lots
9000-9899	Air Rights Tax Lots

Format: Alphanumeric - 9 characters

Data Source: Department of City Planning Zoning Tax Lot Database

If the tax lot is divided by a zoning boundary line, ZONING DISTRICT 1 represents the zoning district classification occupying the greatest percentage of the tax lot's

area.

For example: If Tax Lot 98 is divided by a zoning boundary line into Part A and Part B. Part A has the larger portion of the lot and is located in commercial zoning district while Part B is in residential zoning district. ZONING DISTRICT 1 will have a commercial zoning district value.
