Spoken words and Artwork

It'll get better - Jonathan

This virus hurting my heart

I'm thinking we're did it start

Black lives matter ain't nothing gonna tear us apart

So many people dying

Family's crying

Im just stuck in the mix

So much problems I'm just looking for the right one to
fix

It's just hard when you wearing a mask

Looking back and forth gotta watch ya back

Cause they just waiting to attack

Better late than sorry, aint that a fact.

“This artwork reminded me how evil everyone can get especially during hard times, such as this pandemic and riots. There are people who goes out to show their true colors hiding behind a cause to get what they want. The picture also reminds me that them too is only a victim, the hoodie shows the inside is not happy also with what they’re doing”
