RE: PIN X051.63: Rehabilitation of the 188th Street Bridge
Over the Grand Central Parkway

The main work will be to replace the aging concrete bridge deck, sidewalk and parapets on the 188th Street Bridge. Structural repairs to the steel superstructure and concrete piers and abutments will also be performed. In addition, new lighting above and below will be included as part of this project. The bridge deck will be constructed utilizing Accelerated Bridge Construction (ABC), with the deck replaced in pre-cast panels over four summer weekends in 2016. Traffic Enforcement Agents (TEA's) will be provided during these weekends to minimize traffic impacts. One sidewalk will be kept open at all times. Construction of the project is expected to start in early 2016, and has an estimated total duration of 18 months.
