MS. SCOTT: Good morning. Today's public hearing is about to begin. This hearing is being conducted remotely via ZOOM and is being simulcasted to the TLC's website, livestream and Facebook accounts.

All persons wishing to testify were asked to sign up in advance of the hearing. All Registered speaker are joining the meeting via ZOOM. If you are speaking today, your audio and video were automatically muted. When your name is called, the moderator will activate your account, and you will have control of your camera and microphone.

When ready, please state your name and affiliation and then proceed with your testimony. Public testimony will be limited to three minutes per speaker. Any additional comments may be submitted in writing to the Commission. When your testimony is complete, your audio and video will be muted by the moderator.

A special note for our registered speakers: Please ensure that your display name in the ZOOM meeting matches the name

2.0

that you used when you signed up to speak.

This will enable the moderate to confirm that you are present in the meeting. Closed captioning is available for today's meeting.

Thank you for you attention. I will now yield the floor to our Commissioner and Chair, David Do.

CHAIR DO: Well, good morning,
everyone, and thank you so much for joining
our public hearing today. My name is David
Do, Commissioner and Chair of the Taxi and
Limousine Commission, and I'm joined by
Commissioners Kenneth Mitchell and Elisa
Velazquez.

I would also like to extend a warm welcome to our new commissioners joining us today, including Paul Bader, representing Queens on the Commission; Kenneth Chan and Sarah Kaufman, who were nominated by Mayor Adams; and, of course, our re-appointee, Thomas Sorrentino; we are so excited that he will be continuing to represent Brooklyn on the Commission.

I also want to thank our former Commissioner, Jacques Jiha, for his

2.0

nine years of service to the Commission. And he'll now be able to shift his full attention to the Office of Management and Budget.

Again, thank you all for joining. I want to first introduce our new commissioners and returning commissioners. First, Paul Bader joins TLC as the new Queens representative with an extensive history of community involvement. He's the owner of a printing and design business in Long Island City. Paul has served on two community boards, including Manhattan Community Board 2 and Brooklyn Community Board 6. Also, he has a career as a yellow cab driver.

So, Commissioner Bader, would you like to say a few words?

COMMISSIONER BADER: Certainly. Thank you, Commissioner. It's a pleasure to join you and the returning commissioners, and to work with the new incoming commissioners, as I am, on this Commission. There has certainly been a lot of changes in the Taxi and Limousine for-hire vehicle industry since the time that I drove a yellow taxi. And that was basically all there was, in addition

2.0

to some black cars in some underserved neighborhoods.

It's a great challenge to us. The industry has morphed from a relatively small industry, with a slight focus on picking people up on the streets, to becoming a larger and larger part of the whole mass transit system in New York City, moving people around in various locations, particularly in areas that are outside of the traditional mass transit routes.

So, I look forward to working with everyone, to protect the -- and to improve the service for our citizens, to make sure we do the right thing by our drivers, and to make sure that the whole industry works as efficiently as effectively and as safe as possible, to serve the residents of the City of New York.

Thank you.

CHAIR DO: Thank you, Commissioner Bader.

I'd like to introduce Kenneth Chan, who is a managing director of Navistone, LLC, a Brooklyn small business that manages

residential and commercial properties, along with unique perspectives and insight into small business operations. Chan brings knowledge and experience on the connections between land use and transportation to the Commission.

Commissioner Chan, would you like to say a few words?

COMMISSIONER CHAN: Absolutely. Thank you, Chair Do.

Good morning, everyone. I'm honored to serve as a Taxi and Limousine Commissioner for New York City. I commend the hardworking men and women who really keep our city moving, and I am committed to supporting them by working with fellow commissioners and TLC staff, to make our services more efficient, accessible, and sustainable for everyone in our city.

I think we have some exciting changes coming up, I think, that will make the City greener, but more efficient in terms of transportation. And I look forward to working on those issues with everyone here.

Thank you.

2.0

2.0

CHAIR DO: Thank you, Commissioner Chan.

Next up, we have Commissioner Kaufman, who joins the TLC with extensive experience in transportation, policymaking, research, and education. She served five years at the Metropolitan Transit Authority as a projects coordinator for emerging and intelligent transportation systems, and is currently interim executive director at the Rudin Center for Transportation Policy and Management at New York University's Robert F. Wagner School of Public Service.

Commissioner Kaufman.

COMMISSIONER KAUFMAN: Thank you,

Commissioner Do. And I'm so happy and

honored to be here today. I am eager to be

helpful to the people of New York City, to

help the Taxi and Limousine Commission move

initiatives forward. And in general, to help

New York City's transportation systems become

smarter, more equitable, more innovative and

sustainable. And so, I am grateful to be

here.

I am a heavy user of TLC services, as a

1 rider myself, so I appreciate the work that 2 everyone here is doing, and I'm eager to get 3 started. 4 Thank you. 5 CHAIR DO: Thank you so much, Commissioner. 6 7 And we are so excited that Commissioner Sorrentino has been re-appointed to the TLC 8 9 after serving as Brooklyn's board member since 2017. Commissioner Sorrentino is a 10 partner at the accounting firm PKF O'Connor 11 12 Davies, LLP, and has previously served on 13 Brooklyn's Community Board 18, where he 14 chaired as Transportation Committee. Commissioner Sorrentino, I thank you 15 16 for your continued service. Would you like 17 to say a couple of words. 18 COMMISSIONER SORRENTINO: Yes, 19 certainly. Thank you, Commissioner Do. 2.0 I'd like to first start off by 21 congratulating our new commissioners. 22 Commissioner Bader, Chan, and Kaufman, 23 welcome to the TLC. We look forward to 24 working with you. 25 COMMISSIONER BADER: Thank you.

2.0

COMMISSIONER SORRENTINO: I'm excited by the new mix of people, which is great. I look forward to continuing to work with Commissioner Velazquez and Mitchell and with you and your entire team, Commissioner Do. I really look forward to the next chapter.

There's a lot for us to deal with and to help address in dealing with the industry, and I think that we have the right team in place to do that.

I'd also like to just take a quick thank you to Commissioner. Jiha, for all of his years of service on the Commission, and all his work and time and efforts for our city in his role as the commissioner of Office of Management and Budget. So, I look forward to working with everyone, and thank you again. I appreciate it.

CHAIR DO: Thank you, Commissioner.

And before we get started, one brief reminder to our vehicle licensees is that the TLC's COVID-19 FHV License Storage Program is ending August 31st. We created this program in 2020 as a way for vehicle licensees to save on expenses while we went through the

2.0

pandemic and lockdown. This was a successful program and now it's ending. If your plate is still in storage and you want to keep using it, please get it out by August 31st. We will be discussing a new short-term FHV Storage Program at our August 23rd hearing, but this is not to be confused with the pandemic program. We will not be able to move plates from one into the other, so get them out now.

Now, on to today's business. Today, we're holding a public hearing on proposed amendments to our rules. The first rule package would update TLC's in-vehicle camera system requirements. Under the proposed rules, taxies and street hail liveries will continue to either have a partition or approved in-vehicle camera system, with the camera specifications updated, to allow for more moderate and less expensive technology to be used.

Livery vehicles would no longer be required to have a partition or in-vehicle camera. And vehicle owners would instead have the same operational flexibility as

2.0

other prearranged for-hire vehicles sectors, such as Black Cars. Most livery vehicles do not have partitions currently, and this rule change allows them more flexibility.

The second rule package would allow for drivers to collect payments of return tolls on the Verrazzano-Narrows Bridge. The rulemaking is proposed in response to a rulemaking partition submitted by the New York Taxi Workers Alliance. We know that when a taxi driver drops off a passenger in Staten Island, that driver's next trip begins on Staten Island less than 15 percent of the time. Meaning that the driver is highly likely to return across the bridge without a passenger and pay the return toll out of pocket.

For high-volume for-hire vehicle drivers, after dropping a passenger off on Staten Island, 63 percent of the time their next trip begins on Staten Island.

The notices to comment on the proposed rules were published in the City Record on July 10, 2023, and the comment period ended yesterday. We are not voting on any of these

rules today.

2.0

Now, I will turn it over to our general counsel, Sherryl Eluto, for the public hearing.

Thank you, Sherryl.

MS. ELUTO: Good morning. When I call your name, you can unmute your microphone and begin your testimony. Each speaker will be allotted three minutes to speak. The time limit will be strictly enforced. A 30-second warning will be provided, and then you will need to conclude your testimony when your time limit is up. The video of this hearing and copies of all written comments will be provided to the commissioners prior to the vote on these rules at the next Commission meeting.

With that, we will begin our public hearing. And our first speaker today will be Avik Kabessa, and he will be followed by Bhairavi Desai and then Victoria Olivieri.

Mr. Kabessa, please unmute your mic and begin.

MR. KABESSA: Good morning,

Commissioners. My name is Avik Kabessa. I'm

2.0

the CEO of Carmel, member of the Livery Round Table, and the chairman of the Livery Workers Compensation Fund.

I first want to say thank you very much to you, Commissioner Do, that after so many years of us, Livery Round Table and the Livery Base Owner Association, pleading for that camera rule antiquated to be removed, finally, you're taking this brave step of removing that mandatory requirement, but keeping it optional.

I heard some different views about -- I submitted my testimony, so you can read it.

But, in general, I heard some criticism to the step, and I want to say the following:

When the rule was passed, the livery sector had 28,000 members, the largest sector. And the differentiation between black car and livery was very clear; they were serving corporations. We were serving the community. Today, much has changed. We are only 3,600 livery, and there is no crime because we have no cash.

As the livery round -- as the Chairman of the Fund, the Livery Fund, I can tell you

2.0

that in the last 13 years -- was formed in 2010 -- we had less than ten cases that involved a crime, and none of them used the camera to obtain this -- the criminal, because those cameras are not really working. They are antiquated, and only two precincts can get the images.

So, I'm looking at 3,260, so if somebody says, "Oh, my God. It's the safety of the drivers," well, there are 96,000 black cars, and they are doing fine by the driver selecting the option of whether to have a camera or not to have a camera.

So, if anybody, first of all, from -that are not from our sector cannot speak on
our behalf, but here we are telling you. If
anybody needs a camera, they can have a
camera. This camera is useless. And,
therefore, I really urge the Commission --

TIMEKEEPER: Thirty seconds remaining.

MR. KABESSA: Yeah. I urge the
Commissioners to please vote in favor of
this. Because, otherwise, what's happen, a
guy that owns a vehicle says, "Should I
become a livery or should I become black car?

2.0

Oh, my God, the livery I have to pay \$1,100 for camera. It's useless." And then, they become a black car. So, if you really want to protect the livery driver, give them the option, and don't force them to migrate to become a black car.

Thank you, Commissioner Do, for allowing this to happen, leveling the playing field. And I urge you to vote in favor.

MS. ELUTO: Thank you, Mr. Kabessa.

Our next speaker is Bhairavi Desai.

Ms. Desai, go right ahead.

MS. DESAI: Okay. Thank you so much.

Good morning, Commissioner Do, and congratulations to all of the new commissioners. We also look forward to working with all of you.

My name is Bhairavi Desai. I'm the executive director of the New York Taxi
Workers Alliance. You know, I understand the frustration that Mr. Kabessa is addressing.
I don't take them lightly. I understand the ways in which the subsector has been really decimated over the past ten years. But what I would say to Mr. Kabessa and to everybody

else is: The way forward cannot be, you know, to cut ends on things that are vital to the protection of drivers.

I mean, we're having this hearing and this conversation today while just very recently, two drivers; brother Yadav Dhungel, who was carjacked, repeatedly stabbed, is fighting for his life, was in critical condition; an Uber and Lyft driver, when he was carjacked on the FDR.

Saeed Afzal Butt, a yellow cab driver, who only got out of his yellow cab after he was attacked by two people on a scooter, that threw bags of garbage, food, and liquid into his car and on his person. Once he got out, he was randomly attacked by a group of five strangers, people that were strangers to each other, that piled on.

The idea that crime is somehow limited and no longer touches drivers, I wish to God that that was true, but it is not reality.

And these are two of our brothers. And by the way, I ask everybody to go to GoFundMe and please make a donation, so our brothers can fully recover.

2.0

2.0

These are two brothers who are not driving livery; one is a yellow cab driver and the other is an Uber and Lyft driver, but they are still victims of assault, and drivers remain at risk of assault and crime at a high rate.

Commissioner Do, we ask you and the members of this Board, this rule must be amended. Vehicles that are leased must be required, liveries that are leased must be required to provide that camera. You know, we applaud you for updating the rules in terms of giving more options, more modern options to the cameras, but that should not be an excuse or a pathway to take away something as vital as a camera, which is the only thing --

TIMEKEEPER: Thirty seconds remaining.

MS. DESAI: -- especially in the absence of the partition, to have drivers feel protected. Livery drivers in particular tend to be the newer drivers in our industry. And you should note that the difference between liveries and high-volume FHVs, livery drivers are more likely to do street hails

1 which, in fact, leaves them even more 2 vulnerable. And that's the very reason why 3 for yellow cabs and SHLs, you're not even removing this requirement. We need to work 4 5 with the livery industry to not sell the drivers out, to not leave us vulnerable. 6 7 TIMEKEEPER: Time has expired. MS. DESAI: There is a way to do this 8 9 without cutting out the safety needs of the drivers themselves. 10 11 Thank you very much. 12 MS. ELUTO: Thank you. Our next speaker is Victoria Olivieri 13 and she will be -- afterwards will be Steven 14 Shanker, and then Jose Altamirano. 15 16 So, Ms. Olivieri, you can begin. 17 Ms. Olivieri, unmute your mic. MS. OLIVIERI: Okay. And do I share my 18 19 screen? 2.0 MS. ELUTO: No, we can see you. 21 MS. OLIVIERI: Okay. Thank you for 22 allowing me to speak. My name is Victoria. 23 I own Novak Global Skyway Car Service. 24 many livery base owes, I have desperately 25 tried to keep my small business open. With

2.0

policy and industry changes over the past decade, it has become a herculean effort to continue to provide quality service within my community. Unlike the 90s where there were about 11,787 yellow cabs, 12,000 black cars, and about 20,000 livery cars, each sector was different from the other.

Livery cars were community-based cars, and also serviced transportation deserts.

They would also carry cash, while black cars, at that time, were exclusively corporate and often were paid by vouchers and credit cards.

Everyone stayed in their proverbial lane.

Being in this industry for 30 years, I remember that in May of 2000, in the response to the murder of ten livery cab drivers within five months, the Taxi and Limousine Commission rightfully made a mandatory rule for all livery cab driver to install digital cameras and/or safety partitions.

Mayor Giuliani created a \$5 million program to reimburse livery drivers \$325 each for partitions or cameras. 23 years later, there are no reimbursements and those outdated, unreliable, and overpriced cameras

2.0

are a financial burden to livery drivers.

New drivers choose black cars over livery industry because they do not want the added cost of installing a camera.

Unlike in the 2000s, the lines between the black and livery sectors have become so blurry, that as of December of 2022, according to TLC's annual report, the total number of black cars is overwhelmingly 89,559, while the livery vehicles are a mere 3,978.

Since black cars no longer cater exclusively to corporate clientele, the livery and black cars compete and serve the same clientele. The overwhelming advantage the black cars have over the livery car industry has been slanted for quite some time. Now, at long last, livery drivers are relieved by the recent rule that remove the requirement for an in-vehicle camera system.

My company and I wholeheartedly support this step in the right direction. There is no reason --

TIMEKEEPER: Thirty seconds remaining. Please wrap up.

LH REPORTING SERVICES, INC. 718-526-7100

1	MS. OLIVIERI: to be mandated,
2	again, to have the IVCS when black cars have
3	never been held to that standard. The
4	proposed rule repealing the IVCS requirement
5	will level the playing field for the livery
6	sector.
7	I thank you for repealing this archaean
8	rule, so that the liveries have a fighting
9	chance to survive. Thank you for your time,
10	and have a wonderful day.
11	MS. ELUTO: Thank you.
12	Our next speaker is Steven Shanker.
13	COMMISSIONER BADER: Excuse me. Can we
14	ask any questions?
15	MS. ELUTO: Sure. I'm sorry. Go right
16	ahead.
17	COMMISSIONER BADER: Ms. Olivieri, can
18	you hear me?
19	MS. SCOTT: One moment. We'll bring
20	her back into the meeting.
21	COMMISSIONER BADER: Thank you.
22	MS. OLIVIERI: Hi. Can you hear me?
23	COMMISSIONER BADER: We can hear we
24	haven't been able to see you, but we can hear
25	you. Thank you.

1 MS. OLIVIERI: Oh, I'm sorry. I don't even know how to make it -- share my screen, 2 3 maybe? 4 MS. ELUTO: Turn on the camera, but 5 it's okay. COMMISSIONER BADER: My question is: 6 7 So, you're in favor of this rule, what do you think the choice of most of the drivers would 8 9 be, to have the camera or to have the 10 partition? MS. OLIVIERI: I think they should be 11 able to choose that, but not at such a 12 tremendous cost. The cost to maintain these 13 14 cameras if it breaks, or if they have to initially put a camera in their car is too 15 16 much. And the fact that they have been 17 burdened by that one financial portion, 18 they'd rather go where they don't have to do 19 that. So, I think that they should be able 2.0 to choose. And there are so many choices 21 right now, because technology has changed 22 from the 2000s. 23 COMMISSIONER BADER: Okay. 24 MS. OLIVIERI: So, I think that buying 25 a camera is very simple. Now, it's up to

2.0

them whether they want a partition. A partition is also a good choice, and it all depends upon what the driver feel safe with. I think both could be an option, or one, but I don't think that it should be mandated that camera should be put in the cars by one company, that is completely antiquated, that is not effective. And as Mr. Kabessa said, it has not proven to be good in situations where something does occur.

commissioner bader: Right. No, we understand that. And we certainly, you know, we certainly -- the whole idea of this is to expand the opportunities and to give more choice to the drivers; there's no doubt about that. My question has to do with as far as the options. Where do you -- and the cost, relative to the knowledge that you have and what you think would work best for the drivers, where do you think most of them would likely go? What direction do you think they would likely go, and what do you think -- separate question: What do think they feel more comfortable with?

MS. OLIVIERI: Well, I can speak for

1 what I know. I can't speak for other 2 drivers, but I can tell you that they would 3 want the cameras. Some would want facing out 4 and inward, some would want a partition or maybe both. You know, for insurance reasons, 5 I think both would be very good, especially 6 7 in this day and age. Because many drivers are being attacked, black car, as well as 8 9 livery, because now black cars are also 10 utilizing the cash payment, so --11 COMMISSIONER BADER: Right. MS. OLIVIERI: -- I don't see a reason 12 why the livery industry should be burdened 13 with this --14 COMMISSIONER BADER: No, we understand. 15 16 That's what we're trying to do here, is level 17 the playing field. MS. OLIVIERI: Exactly. 18 19 COMMISSIONER BADER: To your knowledge, 2.0 what is the cost -- what is the cost of the 21 partition today, versus what -- you know, the 22 camera system one can buy on Amazon or 23 anyplace; what is your understanding of those 24 costs? 25 MS. OLIVIERI: I really don't have that

information or that data. I could get back 1 2 to you, if you'd like, and I could give you a 3 little bit more information. But I know the cameras can be easily bought for less than 4 5 \$100 anywhere. Many people use them in their private cars, so where -- and since I was 6 7 talking simply about the cameras, that's what I would like to lean into. 8 9 COMMISSIONER BADER: Thank you. 10 MS. OLIVIERI: Thank you. And thank you all, Commissioners. 11 12 MS. ELUTO: Our next speaker is Steven Shanker. 13 Mr. Shanker, unmute --14 15 MR. SHANKER: Yep. 16 MS. ELUTO: -- and go ahead. 17 MR. SHANKER: Good morning, 18 Chairman Do. May it please the Commission? 19 My name is Steven Shanker. I'm the 2.0 executive director of the Livery Round Table. 21 There's no doubt that the FHV industry has 22 evolved over the past ten years or so. 23 Unfortunately, before your arrival, 24 Chairman Do, the rules have not always kept 25 up with the evolution of the industry.

2.0

Now, finally, the Commission is amending the in-vehicle camera system requirement, and the Livery Round Table is in complete support.

I'm often asked by others, "Why is the TLC keeping the camera rules mandatory for the liveries only?" I understand the rationale for the rule, the time in history when the City wasn't so safe back in the 90s, there were 2,000 plus murders a year. We've come a long way since then, fortunately. And back then, the liveries made up the bulk of the for-hire vehicle industry.

Also, at that time, the outer boroughs were more desolate, and it was more dangerous to drive to the outer boroughs. Today, the City is much safer, the outer boroughs are not so desolate, and there are 25 times more black cars than liveries, as was stated by Avik Kabessa and Ms. Olivieri. The line between livery and black car have become blurred, to say the least.

When the black cars catered to corporate clientele and liveries catered to the retail clientele, the rule made sense.

2.0

This was because business persons were less likely to be perpetrators of a crime upon an FHV driver.

Finally, we know that livery drivers really don't carry cash anymore. Most trips are paid for by credit card. There is no incentive for a criminal to rob a livery driver. And hence, there's no longer an overriding need to have the camera system.

Over the past 10 years, the number of liveries has dramatically declined. While there are several reasons for this, one, to me, is very prominent. Why would a person choose to become a livery owner instead of a black car owner, when the costs to outfit the vehicle are more expensive?

I can't tell you how many livery base owners I speak to that say, "If we could only get rid of the camera requirement, we could affiliate more drivers." What most people consider to be a cost that is maybe de minimis to an FHV driver is rather significant, and we can't, you know, understate that or overstate that.

Given that there's really no rationale

1 to continue to mandate the camera system, 2 placing that requirement on the liveries 3 creates an unfair competitive disadvantage to the livery sector, which, as was stated, and 4 5 as everyone knows, has dramatically declined. 6 TIMEKEEPER: Thirty seconds remaining. 7 MR. SHANKER: Most importantly, for the drivers and vehicle owners who feel safer 8 9 having a camera, the proposed rule does not 10 prohibit them from doing so. I understand Ms. Desai's concerns, as 11 12 far as the safety of drivers, but the reality is that all FHV drivers are sophisticated 13 14 business persons. And as sophisticated business persons, they should have the option 15 16 to choose what it is that they want to do, as 17 far as having a camera or not. 18 I thank you in advance for your 19 assistance and your cooperation in amending 2.0 these rules. 21 MS. ELUTO: Thank you. 22 MR. SHANKER: Thank you. 23 MS. ELUTO: Any questions? 24 (No response). 25 MS. ELUTO: Okay. Then, our next

2.0

speaker is Jose Altamirano, he'll be followed by Osman Chowdhury.

MR. ALTAMIRANO: Good morning to the Commissioners. My name is Jose Altamirano, and I'm the president of the Livery Base Owner Association. We represent over 250 livery bases, along with their drivers, in New York City. We serve approximately 250,000 New Yorkers each day. Our bases are small mom-and-pop businesses which are owned and operated by immigrants, and serve a large immigrant and first-generation American population of this city.

Known as a community car service, our livery bases and drivers has stepped up to fill the gaps in public transportation deserts across the five boroughs. We applaud the TLC for helping our livery sector with our issue of in-vehicle camera system. The current system is antiquated, severely overpriced, and a burden to our drivers. Further, it does not accomplish the goal of driver safety. Under the current system, a still picture is taken when the vehicle doors are open; that's it.

2.0

Then, for police or driver to download a picture, they have to use special software, which not every precinct has access to; I believe only two. We applaud the TLC in taking an approach that sets specifications for an IVCS, which will allow drivers to find any camera that meets those specifications. This will ensure that drivers have the flexibility in the future of best pricing, along with the best technology.

I have seen the unfortunate comments in the news and press lately, trying to attack the TLC for this proposed rule. These comments come from groups that aren't from our livery sector, giving opinions on a situation they have no real understanding of.

Rest assured, the livery base owners, which is the voice of the community car service, fully supports this measure. We have asked the TLC to make this change in order to support our drivers. We need to ensure a more even playing field for the livery sector. And removing this requirement that only applies to our sector is the right start.

1 Thank you for your consideration, and 2 we urge you to vote "yes" to this proposed 3 rule. We're happy to work together as 4 New Yorkers, to ensure that the City can 5 continue to provide opportunities for hardworking immigrants and their families. 6 7 MS. ELUTO: Thank you. Our next speaker is Osman Chowdhury. 8 9 He'll be followed by CN. 10 Mr. Chowdhury. MR. CHOWDHURY: Hello, you hear me? 11 12 MS. ELUTO: Yes. MR. CHOWDHURY: Good morning, everyone. 13 14 My name is Osman Chowdhury, on behalf of United Taxi Drivers Association NYC. I have 15 16 been driving since 1997. 17 Because -- today, I oppose this bill 18 because the camera not a safety of driver. 19 Only the partition is safety of driver 2.0 because -- insurance company don't like the 21 partition because the car is -- for a small 22 (inaudible) accident, the passenger hurts on 23 the partition; that's why insurance company 24 don't like the partition. 25 The camera not protect any driver. Ιf

anything happens, who is going to be 1 responsible to my life and my colleagues. 2 3 I'm driving yellow, but I know all those taxis. Before sometimes on the news, the 4 5 Uber driver/Lyft driver hurt by passenger. This camera never saved the life, passenger 6 7 life and (inaudible) anything. And I oppose the camera thing. Only partition save the 8 9 life. The driver and passenger both are 10 safe. And as the Commission is reviewing the 11 12 things -- because if you need a car shorter, you can be longer car, not going to help the 13 14 passenger. Because -- I mean, again, I oppose -- don't pass the bill for camera. 15 16 Only partition save the driver, both sides. 17 Thank you very much for my testimony. MS. ELUTO: Thank you. 18 19 Our next speaker is named CN. 2.0 MS. CN: Hello. 21 MS. ELUTO: Hi. 22 MS. CN: I'm a private citizen. 23 Regarding the in-vehicle camera system, 24 there's an indicator that's meant to let the 25 passenger know when the camera is running.

2.0

But for a blind and visually impaired passenger, they won't know this because it's a visual indicator.

It's really important that there should be some sort of amendment to make sure that the camera has an audio tone or a beep or a synthesized voice, that it emit -- you know, that will announce to the passenger that the camera is on, and a tone that's louder than the driver's radio.

And on the retention of the footage, I think 30 days is way too short. I think it would benefit law enforcement and victims if the retention period is extended to six months; I think that's reasonable. And I'm worried about access of the footage. No where is there a punishment for drivers who might share camera footage online anonymously of un-anonymously on websites.

We're in an age of social media, and you never know, there might be the odd person who, unfortunately, might want to share an incident. And the punishment for drivers who delete or alter or modify footage is way too lenient. I think it should be a lot harsher.

2.0

This is a very serious matter when you're deleting footage that you shouldn't be deleting or even modifying or altering it. think there should be a ban, I think, straight up, if you delete, you know, the footage, you should be banned from being a driver for maybe a year, in a City, or six months, or -- who knows?

And these camera systems are not just important for the driver, but just think about the safety of the passenger. And, you know, it's really important -- like I said, I really hope that things can be changed. And please think about the blind and visually impair community, especially when it comes to audio announcements that the camera is running. I think they should have equal knowledge that the camera is running.

And one final thing: I believe there's a disability advocacy group with the TLC. If someone could later on add me to that group, I think it's a monthly group, I would greatly appreciate it. Thank you very much.

Thank you.

LH REPORTING SERVICES, INC. 718-526-7100

CHAIR DO: CN, we'll add you to the

group.

2.0

MS. CN: Thank you.

MS. ELUTO: All right. We're going to switch topics to the Verrazano Bridge toll, and our first speaker is Bhairavi Desai, and she'll be followed by Mohammed Mohammed and Zubin Soleimany.

Okay. Ms. Desai.

MS. DESAI: Thank you so much.

Good morning, again, Commissioners.

Thank you, Commissioner Do, for proposing, you know, our petition for rulemaking for proposed rules this morning.

This, to us, seems like a real no-brainer. At the moment, there is a two-way toll; a toll to enter Staten Island, a toll to exit Staten Island. When a driver gets a trip into Staten Island, they're only being paid the toll one way, which essentially means there's no other way around this.

They are -- the drivers themselves are subsidizing those trips, not only yellow cab drivers, green cab drivers, Uber, Lyft, every single sector of drivers, they are having to

2.0

pay for the second toll out of their own pocket.

The TLC data that was cited at the beginning of this hearing basically says that, you know, drivers could get a second trip that starts in Staten Island. That does not mean that that trip goes over the bridge again. It could be another trip that stays within Staten Island itself, which means, again, that to exit Staten Island, the driver is having to pay for that toll out of their own pocket; that's just unacceptable.

We've had a principle in this industry, that the cost of tolls are paid for by the rider. They're not supposed to be eaten by the drivers themselves. I mean, it's just absurd, the idea that the drivers -- we're not talking about even the companies. We're talking about the drivers themselves having to pay for this cost out of their own pocket.

You know, we -- and just so you know, the origin of this proposal for us, actually, it was -- this proposal came out of meetings with our Uber and Lyft members. Uber and Lyft drivers are more likely to have a trip

going into Staten Island, and so they are actually the group of drivers that end up paying for this toll out of pocket more often.

And for anybody who says the passengers will not be able to afford it, let me remind you that Uber itself acknowledged in court, in court papers, in order -- you know, when they sued the TLC against a modest, you know --

TIMEKEEPER: Thirty seconds remaining.

MS. DESAI: -- consumer price index adjustment that we fought for earlier in the year, they acknowledged that between 2019 and 2022, the rate of UberX trips had gone up by 49 percent. They're already raising the cost on the public. They're doing it only for their own profit, but the cost of the actual trip, like the toll, which for years, decades has always been paid for by the public. That's where they want the drivers to be the ones to eat that cost. You must pass this rule to --

TIMEKEEPER: Time has expired.

MS. DESAI: -- protect every single

2.0

sector of drivers, not just yellow and green cab drivers, but also Uber and Lyft drivers. No driver should have to pay for the second toll out of their own pocket.

Thank you.

2.0

MS. ELUTO: Thank you.

Our next speaker is Mohammed Mohammed, followed by Zubin Soleimany.

MR. MOHAMMED: You can hear me?

MS. ELUTO: Yes.

MR. MOHAMMED: Okay. Hi, my name is
Mohammed Mohammed. I am a member of NYTWA
union. I have been driving for Uber and Lyft
for more than seven years. I'm asking the
Taxi and Limousine Commission to support our
demand regarding collecting the toll on way
back from Staten Island over Verrazano
Bridge. Keep in your mind, the driver has no
chance or very rare if we have a chance to
pick up back to the other boroughs.

Keeping in your mind, it's also the chance to even to work in Staten Island itself is very rare. There's no trips over there. Even for a half trip, it's a long distance. We're wasting our time to pick up

2.0

the passenger. It's like five miles away, and maybe we have a fare for \$4 -- \$5.47, the minimum. And it's wasting most of our time. Most of the drivers, they just drop off the passenger and go back empty.

And about the study that Mr. David mentioned earlier about the 15 percent, 63 percent, I'm not sure this is accurate, you know, study. I'd like to see what time that study about a driver, how long it takes for him to pick up passenger back to the -- out of the, you know, Staten Island.

I think if you go and drive, Mr. David, by yourself, you have hack license, you stay every day for just one week, from 7:00 p.m. until in the morning, let me know how many passenger you're going to pick up; that's number one. And let me know how many passenger you're going to take back to, you know, out of Staten Island. I would say zero.

There is no trips in Staten Island.

It's dead business over there, so staying there and pick up any business, that's wasting time. So, I would rather pay out of

2.0

my pocket \$7 or \$6.55 to make business in Brooklyn or Queens or Manhattan, than stay wasting my time in Staten Island.

So, please support our demand. We need to collect that toll to go back to the other boroughs. Staten Island, there's no business at all. So, thank you and I wish you support our demand. Thank you.

MS. ELUTO: Thank you.

Our next speaker is Zubin Soleimany, to be followed by Henry Naider and Erhan Tuncel. Thank you.

MR. SOLEIMANY: Good morning, Chair Do and Commissioners. And congratulations, again, to the new commissioners for joining.

The Taxi Workers -- my name is Zubin Soleimany. I'm a staff attorney with the Taxi Workers Alliance. We urge the TLC to pass this rule regarding round trip tolls in a manner that applies equally to both taxi and for-hire vehicle sectors, including the high-volume for-hire vehicle sector.

The point of this rule is pretty straightforward. The point is, no drivers should have to pay about seven bucks out of

2.0

pocket just to keep working, when there is simply no other way for them to access other areas of the City to get back to work. TLC has required this payment for round trip tolls in areas of the City where drivers cannot return to the rest of the City for decades in the taxi sector.

Now, just this past January, TLC amended its rules for high-volume -- for-hire vehicles, including high-volume for-hire vehicles, to apply the existing round trip toll rule to that sector as well. What also happened in the meantime was that the MTA changed the direction of tolling on the Verrazano in December 2020, what had been a one-way toll, which wouldn't implicate this problem, became a two-way toll. TLC rules didn't keep up with that change.

Now, for a long time, this only implicated trips to the Rockaways, where you're gonna pay a one-way toll to the Rockaways, and you have to pay to get back, the understanding being you're extremely unlikely to get a trip back.

Now, similar to the Rockaways, among

2.0

the least trafficked areas for TLC vehicles is Staten Island. We do -- and so right now, what we're seeing is drivers are in the same position that they had always been in Rockaways, where they're simply not able to get those trips back without incurring that toll.

Respectfully, I think the data point that Commissioner Do cited earlier is irrelevant to the inquiry here. The question is not -- do you get another trip in Staten Island that you go to the Staten Island Mall and you take somebody back to Tottenville? The question is do you get somebody else to pay the toll for you coming back, or are you paying it out of pocket?

Whatever form this rule takes, there absolutely has to be a gold standard that drivers cannot have to pay that out of pocket to subsidize those trips for drivers. This is just good policy. Doing otherwise incentivizes drivers to refuse these trips, and sensitizes destination discrimination, because any driver who receives trips to Staten Island knows that more likely than

1 not --2 TIMEKEEPER: Thirty seconds remaining. 3 MR. SOLEIMANY: -- they'll add a cost 4 of \$7 to themselves. 5 One last point that I would like to make that was not in our petition, that we 6 7 become aware of recently is high-volume bases practice of charging driver -- of not 8 9 reimbursing drivers who incur tolls when the

companies tell them to cross a one-way toll

bridge.

10

11

12

13

14

15

16

17

18

19

2.0

21

22

23

24

25

So, example, you would see a driver going from Mill Basin to Rockaway to do a pickup, incurring the toll on the Cross Bay to get there and not being reimbursed for that, even though they were only doing so at the company's direction, and would not otherwise have incurred that toll --

TIMEKEEPER: Time has expired.

MR. SOLEIMANY: We'd urge the Commission to also amend this rule to more broadly state that any toll that is incurred at the direction of a dispatching base also be reimbursed.

Thank you for you time.

LH REPORTING SERVICES, INC. 718-526-7100

COMMISSIONER BADER: I have a question for you, sir.

2.0

MR. SOLEIMANY: Yes, please.

COMMISSIONER BADER: Do you have any idea -- I presume that there are times in which the drivers take somebody to Staten Island and, knowing this, they ask the passenger to pay the return toll.

Do you have any idea of how frequently that happens?

MR. SOLEIMANY: I have no idea how often that would happen. I think right now that would be a violation of TLC rules to do that, and I don't -- if a driver were to do that, they would end up with an overcharge summons and put their license at risk. So, I doubt and I would hope that drivers are not doing that with the current rules. I think we need a rule change, so that drivers don't lose money on these trips and wouldn't resort to those sorts of things.

COMMISSIONER BADER: And do you have any idea whether or not at anytime the businesses -- I mean, this has been going on now for a couple of years, ever since the MTA

1 changed the Verrazano toll, needless to say, 2 so this has been going on for a while. 3 Have you ever heard of any time in which the home base Uber of Lyft has made a 4 5 deal with the driver to split that cost, or has it always been absorbed totally by the 6 7 driver? MR. SOLEIMANY: I have not heard 8 9 anything like that. 10 COMMISSIONER BADER: Okay. Thank you. COMMISSIONER MITCHELL: Hi. 11 This is Commissioner Mitchell. I have a question. 12 Suppose the driver does get a return 13 14 trip back into Brooklyn or back into Manhattan from Staten Island, how do we 15 16 negate the double billing that could occur; 17 how do we negate that? Suppose he goes to 18 Staten Island, and he goes to -- why work the 19 Staten Island Zoo and he gets a trip back to 2.0 Brooklyn, how do we negate the toll thing, 21 the issue of getting two tolls? 22 MR. SOLEIMANY: So, that's a good 23 question. I mean, I think the 24 understanding -- and this might be where 25 separate treatment for the taxi sector or the

2.0

high-volume for-hire vehicle sector could be worth looking at. I think we need to look at the data first and see what the incidents of that actually is.

I think in the taxi sector it would be difficult to control for that, but I think what you're mentioning, Commissioner

Mitchell, I sense, because I think there is

-- TLC has sufficient data collection for high-volume bases to know when that's happening, to know the incidents of when that's happening, and I think there could be a potential solution that would allow for a billing of that in the aggregate, that wouldn't necessarily result in a charge to customer.

Again, our position isn't necessarily that it would be the customer that has to pay for it, but that it can't be the driver to subsidize it. And I would be very much open to conversations about how that can happen.

COMMISSIONER MITCHELL: Okay. Thank you.

COMMISSIONER CHAN: I have a question, and I don't have -- I don't have too many

chances to take a taxi or Uber to Staten 1 Island or back, so I tried to research this 2 3 question a little bit, and that is: Do Uber and Lyft already charge the 4 5 passenger, the rider, a return toll when a vehicle is dispatched to Staten Island? 6 7 I tried to look through their materials, and based on what I understand, 8 9 what I'm able to find, rather, both Uber and 10 Lyft already allow the driver -- already 11 charge the passenger, rather, a return toll 12 for going to Staten Island; is my 13 understanding correct or is that not correct? 14 MR. SOLEIMANY: My understanding from conversations with drivers, and I believe 15 16 what Mr. Mohammed just testified before, is 17 that that is not practice. 18 COMMISSIONER CHAN: So, getting 19 reimbursed or not is a related, but 2.0 corollary, issue to whether or not Uber or 21 Lyft charges passengers a return toll when 22 they've dispatched to Staten Island, right? 23 MR. SOLEIMANY: Well, I think they

24

25

could be -- they're related separate issues,

right? There could be two-policy approaches

2.0

to that, right? One in which, focusing on the current framework of the rule, the two-way toll is viewed as passenger charge, or one that looks to make sure that it is simply not assessed out of the drivers' pocket, where it's otherwise affordable.

COMMISSIONER CHAN: Okay. Thank you.

COMMISSIONER BADER: To follow up on Commissioner Chan's question, the way this whole system is structured, it's all paid through accounts. It's all paid through an account that someone has with one of these companies. So, therefore, Uber and Lyft must be the ones, then, that apply these charges, because they're the ones that are collecting the funding from the passenger.

So, the driver is not getting paid separately for the returned toll; that's never going to happen. It's going to have to be part of the charge. And to follow Commissioner Mitchell's question, which I also am sensitive to, I mean, in the technology today, it really amazes me sometimes how these big corporations have incredible technology when it will benefit

2.0

them, but they don't seem to apply that same incredible technology when it's going to benefit the worker or their client.

So, clearly, I mean, Commissioner

Mitchell's request is totally fair. If one
driver is getting paid -- if a driver is
getting paid going into Staten Island and
he's getting the toll two ways, which I
understand, but then he gets a fair outside,
well, then, there's got to be a way
technologically for that to be balanced out.

How that could be balanced out?

MR. SOLEIMANY: Yeah. I don't doubt that the high-volume companies would have the technology to know when that's happening, be able to track their drivers' progress over the bridge and back, and that there could be a policy solution that TLC could come up with, to address the situation, if that's a concern.

What we're here to address today is that the status quo is making that money come out of the drivers' pocket, and that's not an acceptable outcome for drivers. I do realize, you know, it would be good to have

2.0

that data on the incidents at which those return trips are happening. We don't have that yet, but, you know, we're very interested in having a policy conversation with TLC, that could fix that equity and not create a new problem for those passengers in Staten Island.

MS. ELUTO: Thank you.

And I think we'll go on to our next speaker.

Henry Naider will be followed by Erhan Tuncel and then Wain Chin.

MR. NAIDER: Hello. You hear me?

MS. ELUTO: Yes.

MR. NAIDER: Yes. I'm calling -first, I'm a taxi driver, a yellow cab
driver, and my name is Naider, Henry. I'm a
member of NYTWA union.

And the safety of the driver is very important. Because if not the partition I have in my taxi, I almost get killed two years ago. That means the camera is a good thing, too. Because any life you save is better because one life is worth something. That means the camera is good,

2.0

too, because the camera, even sometimes we have problem with the customer, little bit problem, it's not a big deal, he tell you you hit them, the camera can prove the driver is not wrong sometimes. If the driver is wrong, too, the camera will show it.

That's -- I don't understand why problem with the camera, and they have problem with the partition. I don't think they have problem with the partition, but the camera is important. It's including the safety of the driver and the passenger, you know?

And one thing I want to talk about is the toll in the bridge. I will support the union to help the driver because every penny I can save is good for me. Because I have -- the yellow cab have so much bill. I mean, you got to find a way. If something is wrong the way they take the money from the driver, you have -- anything you can do to help the driver is good; and that's it.

And I'm talking about for all the drivers, not only yellow cab. I'm talking about Uber, Lyft, everybody. It can save

1 them a little bit of money. Because we got a 2 lot of bills to take care of, especially 3 yellow cab. I think TLC know about it. TLC -- and I'm very happy for the 4 5 Commissioner to think about this, to protect the taxi driver, to help us with any penny, 6 7 any penny he can help us with. 8 Thank you very much. 9 MS. ELUTO: Thank you. 10 Our next speaker is Erhan Tuncel. Is he on the screen? I don't see him. 11 12 Okay. Let's go to Wain Chin. Oh, I'm sorry. I do see Mr. Tuncel. Oops. 13 14 Okay. Yes, so Mr. Tuncel, if you can unmute your mic and begin. 15 16 MR. TUNCEL: Hello. My name is Erhan 17 Tuncel. I've been a yellow taxi driver for 25 years. And first, I'd like to welcome all 18 19 the new commissioners to serve in this very 2.0 important committee, and thank you for 21 allowing me to speak. 22 When I called, I originally said that I 23 would testify on the toll issue, but I have a 24 quick comment on the -- on camera issue, 25 also.

2.0

I don't know what's stopping the TLC to keep the mandate, but only on having a camera, but not mandate the kind of camera that the drivers have. And I think that would solve the issue that every driver is complaining about with the expense of having the camera installed, \$1,100 or \$1,200 for a camera that does not work and it's antiquated, and there are many cameras out there that does the job a 100 times better with the cost, just a fraction of the cost, maybe \$60, \$70.

So, I think if you just remove the mandate on the camera itself, rather than the whole concept of having a camera; that would work as well.

On the toll issue, now, when we go
to -- when we take a toll customer to a toll
bridge and go to what we call dead zones,
it's not dead, and the activity for us, for
yellow drivers, especially, is very scarce.
We have to come out of that zone, and we have
to pay toll to come back out, so that we can
make money.

So, I admire TLC's decision to charge

1	customers toll round trip; that's an
2	excellent solution to a very dire problem,
3	but it should not be only on the Verrazano
4	Bridge. It can also be
5	TIMEKEEPER: Thirty seconds remaining.
6	MR. TUNCEL: There are other bridges
7	that need the consideration as well, so I
8	can't think of the names. I'm so sorry. But
9	I think one of them is Cross Bay Boulevard
10	Bridge, which is a toll bridge, and we have
11	to come back out from the zone that we really
12	don't have any business in. And the other
13	one is Memorial Parkway Bridge, again, in
14	Brooklyn, in Queens as well, so
15	TIMEKEEPER: Time has expired.
16	MR. TUNCEL: those bridges also
17	should be considered for this bill, for this
18	law.
19	Thank you very much for your time.
20	MS. ELUTO: Thank you.
21	Our next speaker is Wain Chin, and
22	he'll be followed by Ishtiaq Ahmed.
23	Mr. Chin.
24	MR. CHIN: Hi. Good morning, everyone.
25	Thank you for letting me speak. I'm a yellow

2.0

cab driver, also a New York Taxi Worker Alliance member.

Yeah, I support the TLC proposal, you know, to raise -- to charge a toll for -- two-way toll for the Verrazano Bridge. You know, every time we get a fare to Staten Island, you know, we usually have to come back empty, so that means we have to pay toll out of our pocket, you know. Staten Island, you know, they usually charge one-way toll two years ago, you know, going into Staten Island. Now, they split the toll, they charge each way.

So, when we're done with a passenger, we usually have to come back empty from the Staten Island side, so we have to pay a toll out of pocket. So, that reason, you know, I support the TLC proposal to charge two-way toll for the Staten Island.

Also, the other one, like Mr. Erhan

Tuncel say, Cross Bay Boulevard Bridge and

also I think the one next to the Fried Banner

Feed Bridge (phonetic), I don't know what

they call it. Goethals Bridge. Yeah, they

-- because usually we drop off over there, we

2.0

have to come back empty. We have no other way of going around without a toll, you know. So, that's the reason we ask the TLC to approve the toll, for two-way toll for those bridges.

And also, on the safety camera issue, you know, the driver's safety is very important, too, you know. We don't want anyone to get hurt. Myself, I have a camera system in my car, but they are expensive to install, you know, they are wired to the car. The installation and the cost are expensive. If the TLC allow, you know, like off-the-shelf camera to install, you know, it may be cheaper for a driver, or like, you know, cost maybe a lot less, cheaper, rather than installing a car and have wire more expensive.

So, that way, you know, the driver is protected. Even without the partition, they have a camera, you know. I have a camera for like, you know, long time in my car.

TIMEKEEPER: Thirty seconds remaining.

MR. CHIN: I feel safe, you know. It's also a -- it's a deterrent, you know, for the

1 criminal. When they see the camera, they 2 will hesitate to commit crime against the 3 driver. So, I'm all for the safety of 4 drivers. 5 Thank you for letting me speak. Take 6 care. 7 MS. ELUTO: Thank you. Our next speaker is Ishtiaq Ahmed. 8 9 MR. AHMED: Yes. Good morning, 10 everybody, most respected judges and my Taxi 11 Worker Alliance coworkers, proud member of the NYTWA. 12 First of all, I want to talk about 13 14 cameras, why the camera is important. I was personally robbed two times at gun point with 15 16 the Lyft drivers. I have -- thank God I have 17 camera, but Lyft deactivate my account. 18 After that I talk to lawyers, I have cameras, 19 I show them proof, everything, and then they

But if you have to force anybody to use, specifically, one company, then the one company rob their drivers. We used to have like a car service, company charging us like

activate my account back. Camera is very

important this time.

2.0

21

22

23

24

25

2.0

eight to \$900 for the camera. Right now on the market, we got new (inaudible) and NYPD law, if somebody has accident, no injury, they're not coming.

The camera is very important for you, also, if you have accident, you have dash cam recording, you get the proof and you have to show them your proof that's not your mistake. And the tolls, I am with Uber since 2012, you can believe me, last like 11 years, I once or twice I get from the job, I went (inaudible) in Staten Island, not back into Brooklyn or not in the City.

I work in the black car, if X driver is picking up downtown to Staten Island, \$30 to \$32 job. If you pay back like \$6.50 toll, how much he's getting when he pay gas? Gas is going to almost \$4 now.

We are requesting to -- we have a very good proposal. We are not charging anybody extra. We get used to -- Verrazano Bridge has one-way toll. Now, it's two sides is toll. As Staten Island is a small borough, as there's not too many jobs over there.

Mostly people, they come to Staten Island,

1 they use Staten Island free ferry. And they 2 come to the ferry and they use ferry to come 3 to the Manhattan. They're not using through the bridge come all the way around. 4 5 And thank you so much. That's what is my short talk, and hope so 6 7 you're gonna listen to us; that's very 8 important. And the camera is very 9 important for NYPD also, case, and also 10 for your safety. 11 Thank you so much. Have a good 12 day, everybody. God bless you. God 13 bless Taxi Workers Alliance. 14 MS. ELUTO: Thank you. 15 Our next speaker is Dorothy Leconte 16 followed by Saif Haza. 17 Ms. Leconte, if you can unmute your 18 mic. 19 MS. LECONTE: Hello. 2.0 MS. ELUTO: Hello. 21 MS. LECONTE: Yes. My name is Dorothy 22 Thank you for letting me be and Leconte. 23 participate in that meeting. My concern, 24 number 1, is for the toll. We don't have 25 Staten Island that easy all the time. But

2.0

when we do, as a cab driver right now, the toll just went up \$6.94, and I could say one percent of the time, since I've been driving a cab, I just recall that was like ten years ago, I had a job coming back from Staten Island; that was a very short trip, Staten Island to Brooklyn. So, there was no toll or anything. I didn't have to pay the toll because the first customer paid the toll.

But whatever way you go, if you want to go to New Jersey, it's the same thing, a lot of money coming back to New York -- I mean, to Manhattan or Brooklyn, it's a lot of money.

So, I would appreciate that if the Commissioner, Taxi and Limousine Commission, put the rules for the return tolls; that will be good for us.

Another thing that I'm talking about, the partition. Since I've been driving a cab going to 37 years, I was young, I have multiple, multiple abuse with the partition in my car where customer come to sit in my front seat. They stole my pocketbook.

2.0

They're touching me as a woman. They spit in my face. Getting somebody out the airport, they didn't like the way I drive because I'm driving too slow. When the guy get out, he pay me cash. He spit on my face. So much abuse.

And Taxi and Limousine Commission require drivers to have four passengers, so you guys have to give cars to put four passengers. I have a small car, so I'm so afraid right now with my age, 67 years old. I get frustrated when somebody have to force me to put someone on my front seat when I have a partition.

I think Taxi and Limousine Commission should put this as law. The men who want to --

TIMEKEEPER: Thirty seconds remaining.

MS. LECONTE: -- in the front seat, they can have it. For me, as a woman, it should be law for me if I don't want people in my front seat. I don't think I should be forced to have somebody in my front seat while I have a partition. I have ticket already. I come to Taxi and Limousine

2.0

Commission, they dismissed it. So, please, I have a lot of problem at the airport. I want to have my front seat. That's where I have all my belongings, my purse, my food and everything. I even have a bowl to pee because I can't find --

TIMEKEEPER: Time expired.

MS. ELUTO: All right. Thank you for your testimony.

Our next speaker is Saif Haza. I hope I said that correctly, but Mr. Haza, you can begin.

MR. HAZA: Yeah, hello. Good morning.

I hope you can all hear me. Good morning to

Commissioner Do and all the commissioners,

and all the people that are participating in

today's hearing.

Basically, my issue is the toll on the Verrazano Bridge and the other bridges that the previous speakers have spoken. I hope you can all mandate it and enforce this rule. I'll just give an example of a trip I took about two weeks ago. I took a trip to Staten Island Mall and I have to wait two hours. So, with all the financial stress that we

2.0

have today and going to -- like one of the brothers said, to a dead zone in some of the neighborhoods in Staten Island, when I had to wait two hours, then I have to worry about paying the toll back.

And then, not even that, you just wasted so much time of working that day, and we know that today, you need to put in between at least 10 to 12 hours, just to make some kind of money to survive with your rent and expenses and everything that you have to pay, and car payments and so on. But even if you get a trip in Staten Island, like Brother Ishtiaq mentioned, that most of the people that wants to come out of Staten Island, they either jump on the ferry, and we only take local trips to the ferry, or they jump on the bus and come back through the Verrazano Bridge.

So, I ask you please to pass this rule.

And also, I want to jump on the camera issue.

Cameras are very important. There's so many

times where I was at risk of being fraud, and

then I have to scare them with a camera. Not

just for your safety, today's time, we work

1 with people -- you don't know who's going to 2 come in your car. As the sister before me said, so much 3 abuse. So, to mandate a special company to 4 5 install a camera so expensive, I mean, will you monitor that camera? Like, will it be 6 7 connected to NYPD or certain company? And I just want to finish my time right 8 9 now, and I ask you to please mandate this 10 rule for the tolls, because we are going 11 through so much stress financially, and we 12 have to pay out of pocket everything. Everything is on the driver. 13 14 Thank you. 15 MS. ELUTO: Thank you. 16 Mr. Haza was our final speaker for 17 today. That concludes our public hearing. Commissioner Do, I turn it over to you 18 19 to close out the hearing. 2.0 CHAIR DO: Thank you so much, Sherryl. 21 Are there any other commissioners who 22 wish to make any comments or speak before I 23 close out? 24 (No response). 25 CHAIR DO: All right. Well, thank you,

1 everyone, for testifying today on our two 2 proposed rules. We've learned a lot, and it 3 is an important part of this process, that we hold public hearings to hear from the 4 community that we all serve. And so, I do 5 appreciate the comments today. It helps us 6 7 make the rules that we propose a little bit 8 better, and I thank you all for taking the 9 time today. And without any additional comments, I 10 will close out this public hearing today at 11 11:19 a.m. 12 13 Thank you, everybody. 14 (TIME NOTED: 11:19 a.m.) 15 16 17 18 19 2.0 21 22 23 24 25
