- Northbound B44 SBS on Rogers Ave, B44 local remains on New York Ave
- Stations at Ave D/Newkirk Ave, Church Ave, and Clarkson Ave (northbound at Clarkson in CB 9)
Curbside bus/right turn lanes for peak periods provide extra capacity on approaches to Flatbush Ave between Avenue I and Farragut Rd

Left turn bans reduce conflicts in the intersection.

Traffic flow and safety are improved.
Traffic Analysis Results

Peak direction generally unchanged because 2 general traffic lanes maintained plus bus/right turn lane

Off-peak traffic is the same or faster because of new left curb travel lane

Traffic at Flatbush Ave improves because no left turns and new curb bus lane

Midday traffic would be slightly slower because through and left traffic uses one lane, so that parking is preserved
