

# PUBLIC MEETING

## On the CSO Long Term Control Plan for the Gowanus Canal

**Wednesday, 19 November 2014**

**Public School 32  
317 Hoyt St, Brooklyn, NY 11231  
6:00pm to 8:00pm**

***DEP will provide a brief presentation at 6:30pm.***

When there are heavy rains and the sewer system is at full capacity, a diluted mixture of rain water and sewage, also known as combined sewage, may overflow into local waterways as a combined sewer overflow (CSO). The New York City Department of Environmental Protection (DEP) is developing a CSO Long Term Control Plan (LTCP) that will identify and evaluate alternatives to improve the water quality of the Gowanus Canal. In addition to developing alternatives through the LTCP process, DEP is currently working with the US Environmental Protection Agency under the Superfund process to site and design CSO retention tanks.

***Join us as we seek your input in developing this plan.***

### **How to Get Involved?**

To RSVP, please email [ltcp@dep.nyc.gov](mailto:ltcp@dep.nyc.gov) or call (718) 595-3496.

For more information on DEP's CSO program, please visit our LTCP Program website at [www.nyc.gov/dep/ltcp](http://www.nyc.gov/dep/ltcp) or follow us on Facebook: [www.Facebook.com/NYCWater](http://www.Facebook.com/NYCWater).
