

PUBLIC MEETING #2

On the CSO Long Term Control Plan for the Gowanus Canal

Thursday, 14 May 2015

Public School 32
317 Hoyt St, Brooklyn, NY 11231
6:00pm to 8:00pm

DEP will provide a brief presentation at 6:30pm.

When there are heavy rains and the sewer system has reached its capacity, a diluted mixture of rain water and sewage, also known as combined sewage, may overflow into local waterways as a combined sewer overflow (CSO). The New York City Department of Environmental Protection (DEP) is developing a CSO Long Term Control Plan (LTCP) that will identify and evaluate alternatives to reduce the impact of CSOs in NYC's waterbodies and waterways. You will also learn about the status of the Superfund process as it relates to the siting and design of CSO controls.

Join us as we seek your input in developing this plan.

How to Get Involved?

To RSVP, please email ltcp@dep.nyc.gov or call (718) 595-4148.

For more information on DEP's CSO program, please visit our LTCP Program website at www.nyc.gov/dep/ltcp or follow us on Facebook: www.Facebook.com/NYCWater.
