

LIFTED: Boil Water Order For the residents and consumers in BREEZY POINT

This is very important information about your drinking water. Translate it, or speak with someone who understands it.

It is now safe to drink the tap water in all areas of Breezy Point, EXCEPT:

The heavily damaged area between Jamaica Walk and Ocean Ave and to the South of Oceanside Ave (see map)

The water in this area has been repeatedly flushed and tested to determine that it meets state drinking water standards. The water is safe to drink.

For faucets and outlets that have not been regularly used, the water may appear discolored or cloudy at first. Run the tap until the water runs cold and clear. This may take several minutes in some areas.

Replace all ice machine filters and beverage dispenser filters, and flush water through the filter for five minutes.
