

Door-to-Door Outreach Policy

The World Trade Center Health Registry will at times make personal home visits to enrollees. These home visits will be conducted by Registry staff to help enrollees complete a health survey, to provide information on health care services, or to inform enrollees about a 9/11-related research study. The Registry will always contact enrollees ahead of time, tell you why we'd like to visit, and give you the opportunity to refuse. If you do not want our staff to **ever** visit you at home, please contact us at (866) 692-9827 or wtchr@health.nyc.gov.
