

## **New York City Department of Transportation Street Design Checklist "NYC Admin Code §19 - 182.2"**

Pursuant to §19-182.2, this checklist was created by New York City Department of Transportation ("DOT") as a standard checklist of safety-enhancing street design elements that the department must consider for all Major Transportation Projects. A Major Transportation Project (MTP) is a project that, after construction will alter four or more consecutive blocks or 1,000 consecutive feet of street, whichever is less, involving a major realignment of roadway, including either the removal of vehicular lane(s) or full time removal of parking lane(s), or the addition of vehicle lane(s).

DOT is required to post such standard checklists on its website prior to the implementation of each MTP. DOT may amend the standard checklist by rule only to promote vehicular, pedestrian and bicycle safety.

### **Project Name: 6th Ave, 35th St to Central Park South**

- 1. ADA Accessibility:** Preexisting Feature
- 2. Bus Bulbs:** Not Included In Project
  - Location does not meet technical criteria for a Bus Bulb
- 3. Bus Lanes:** Preexisting Feature
- 4. Daylighting:** Included In Project
- 5. Dedicated Vehicle Loading and Unloading Zones:** Included In Project
- 6. Narrow Vehicle Lanes (10ft or Less):** Included In Project
- 7. Pedestrian Safety Islands:** Included In Project
- 8. Protected Bicycle Lane:** Included In Project
- 9. Signal-Protected Pedestrian Crossings:** Included In Project
- 10. Signal Retiming:** Included In Project
- 11. Wide Sidewalks (8ft or Greater):** Preexisting Feature
