NYC DOT will implement Vision Zero safety improvements along Kings Hwy. between Ave. J and E. 98th St.:

- Install left turn signals at all left turns off of Kings Hwy. to improve turning safety
- Add painted median tips along Kings Hwy. to shorten crossing distances and provide mid-crossing refuges for pedestrians
- Add painted curb extensions to shorten pedestrian crossings and encourage slower, safer turns
- Upgrade corridor markings to better organize roadway, provide safer merges, and reduce speeding

Implementation begins May 2022
