NYC DOT will implement Vision Zero safety improvements along Kings Highway between Avenue J and East 98th Street:

- Install left turn signals at all left turns off of Kings Highway to improve turning safety
- Construct ADA-compliant median bus stops at Church Avenue and at Avenue H
- Add painted median tips along Kings Highway to shorten crossing distances and provide mid-crossing refuges for pedestrians
- Upgrade corridor markings to better organize roadway, provide safer merges, and reduce speeding

Implementation begins August 2021
