

# St. Nick and 116th

## Safety and Mobility Improvements

### Background

- High speeding

### Location

- Two-way north-south roadway with a landscaped median separating travel directions
- Land use is primarily residential with ground-floor retail

### Improvements

- Install painted median tip extensions
- Install painted triangle extension on St Nicholas Ave north of 116<sup>th</sup> St
- Extend concrete triangle on St Nicholas Ave south of 116<sup>th</sup> St

### Benefits

- Reduces the need for lane changing, creating a more predictable experience
- Enhances safety for all roadway users
- Reduces pedestrian crossing distances
- Redesigns 1.2 miles of a high crash corridor
