Manhattan College Pkwy & Delafield Ave

Background

Complex, unmarked intersection adjacent to school

- Project area used by students accessing the Fieldston School
- Community request to evaluate this complex intersection for safety improvements
- Few pavement markings
- Few pedestrian facilities
- Intersection recently approved for stop control

Key:

= schools
Manhattan College Pkwy & Delafield Ave

Background

High pedestrian volumes, long crossing distances, and limited pedestrian infrastructure
Manhattan College Pkwy & Delafield Ave

Proposal

Channelization and pedestrian spaces organize intersection, calm traffic and prevent unpredictable movements.

New stop control for WB traffic on Manhattan College Pkwy and new crossings improve pedestrian circulation.

New pedestrian ramps improve accessibility.

New crossing and daylighting at Henry Hudson Pkwy E & Manhattan College Pkwy.
Manhattan College Pkwy & Delafield Ave

Proposal

Large painted pedestrian spaces organize vehicular traffic, improve pedestrian visibility, and expand pedestrian refuge areas

Proposed Configuration: Isham St at W 211th St, MN
Manhattan College Pkwy & Delafield Ave

Parking Impact

Proposal includes channelization to improve pedestrian visibility, removing 3 parking spaces

1 spot for channelization

2 spots for new crosswalk and daylighting
Thank You!
