**Statement of Basis and Purpose of Proposed Rule**

The Commissioner of the New York City Department of Transportation (DOT) is authorized to issue rules regarding parking and traffic operations in the City pursuant to Section 2903(a) of the New York City Charter. The rules that DOT is seeking to amend are contained within Chapter 4 of Title 34 of the Rules of the City of New York, relating to its “Traffic Rules.”

Reducing greenhouse gas (GHG) emissions from the transportation sector is a core component of the City of New York’s climate policy. In 2014, the City of New York committed to reducing GHG emissions 80 percent by 2050, compared to 2005 levels (80 x 50). The City's 2016 plan, *New York City's Roadmap to 80 x 50*, identified a broad range of strategies to reach this goal, including accelerating the adoption of electric vehicles by the City, private fleets, and individual vehicle owners.

As part of the City’s ongoing commitment to promoting the adoption of electric vehicles, Local Law 160 of 2016 was enacted on December 6, 2016 and required the city to establish a pilot program to install electric vehicle charging stations at DOT parking facilities throughout the five boroughs. As of 2018, 39 level 2 electric vehicle chargers have been installed.

On June 2, 2017, Mayor Bill de Blasio signed Executive Order 26 promising that New York City would commit to the principles enshrined in the Paris Climate Agreement and would develop a pathway to advance the Paris Agreement goal of limiting global temperature rise to 1.5 degrees Celsius. The City’s then released its plan, *1.5°C: Aligning New York City with the Paris Climate Agreement*, that commits the City to expanding access to electric vehicle charging.

In September 2017, the Mayor set a target for 20 percent of the motor vehicle registrations in New York City to be electric by 2025. To support this goal, the Mayor announced a partnership with Consolidated Edison to install 120 level 2 electric vehicle charging ports at curbside locations across the five boroughs. The program is scheduled to launch in 2019. The mayor also announced a companion effort to create a network of 50 level 3 electric vehicle fast charging stations. In order to facilitate access to electric vehicle chargers at curbside locations and in City-owned parking facilities, DOT is seeking to limit the use of such spaces to electric vehicles that are charging.
The purpose of this proposed rule is to establish an electric vehicle charging station pilot program at designated on-street and off-street locations pursuant to Local Law 160 of 2016.

Specifically, the amendments to the Traffic Rules being proposed are as follows:

- Section 4-01 adds new definitions for “electric vehicle” and “electric vehicle charging station”.
- Section 4-08 is amended to include various amendments that outline the parking restrictions associated with authorized vehicles, including electric vehicle charging stations.
