North Central Bronx Hospital (17th Floor Dining Room)
October 5 and December 7 at 3:30 pm

For more information please call (718) 918-LOSS (5677).

Safety is #1 for us.

At Jacobi, our surgeons have a rare depth of experience in minimally invasive – or laparoscopic – bariatric surgery, which is the safest kind.

As a patient loses weight, it’s incredible how multiple high-risk medical conditions clear up or improve, restoring the person to health.

“Safety is #1 for us. At Jacobi, our surgeons have a rare depth of experience in minimally invasive – or laparoscopic – bariatric surgery, which is the safest kind.

As a patient loses weight, it’s incredible how multiple high-risk medical conditions clear up or improve, restoring the person to health.”

“I’ve got my life back!”

Adjustable Gastric Banding.
Before surgery: 353 lbs.
18 months after surgery: 235 lbs.

“At 353 pounds I had sleep apnea, high blood pressure was right around the corner, and I was scheduled for my seventh knee surgery.

I loved to travel and fly, but having to ask for a seatbelt extension made me avoid planes.

I’m a very outgoing guy, but when those things started happening, they pulled me into being introverted.

Now I have a new life and a new career. I reached my goal weight in less than one year and the recovery was incredibly fast.

I say to people, ‘Do you want to feel good about yourself? There is a way.’”
