...our U-shaped red brick configurations each step down from 32- ...towers of flats to ten-, eight-, and six-story wings of duplexes to ...humanely a high density of residents, 450 persons to the acre. And, ...added extra, the complex achieves an effective though not impolite ...union between public entry and shopping space along First Avenue ...the varied outdoor spaces overlooking the East River that the ...rator-tenants and their guests may enjoy in comparative privacy and ... Curiously enough this very handsome project—make sure to see it ...from First Avenue and from FDR Drive—was designed by a Min- ...olis architectural firm on the basis of its winning entry (not used) in a ...architectural competition to develop the site. Twelve years of rede- ...ted tape, and construction resulted in one of the city's most impres- ...and most livable works of multifamily housing. Within the genre of publicly assisted housing projects of the 1940s ...1950s (of which a swath can be seen all the way between First and ...x Avenues) this is one of the best. Well-proportioned buildings of ...ng heights and a large **plaza,** small courts, and sculpture all contrib- ...to the quality.

] Public School 57 Manhattan, The James Weldon Johnson School, ...115th St., SW. cor. Third Ave. 1964. Ballard, Todd & Snibbe.

...n overhanging cornice, generous windows divided into small panes, ...olded bricks make this school a warm, safe, and friendly place. The ...of this building **would enhance and respect** a block of row houses; in ...ing amidst large housing projects, its attention to scale is, unfortu- ...largely unnoticed.

[13.] 1199 Plaza (apartment complex), a visual treat from within and without

[18.] Assemblea de Iglesia Pentecostal de Jesucristo/originally First German Baptist Church of Harlem, 220 E. 118th St., bet. Second and Third Aves. ca. 1895.

An **ebullient** facade with a wide, inviting half-round arch entrance now painted in cream and tan.

[19a.] Iglesia Luterana Sion/originally St. Johannes Kirche U.A.L., 217 E. 119th St., bet. Second and Third Aves. 1873.

An early masonry church for this community, then remote from the center of the city much further downtown. The church began as a home for a German-speaking congregation—today it serves those who speak Spanish.

[19b.] Originally Engine Company 35, N.Y.C. Fire Department, 223 E. 119th St., bet. Second and Third Aves. 1890. Napoleon LeBrun & Sons, ca. 1892.

LeBrun's firm practically **held a monopoly** on city firehouses at the start of the Gay Nineties. This one, as many others, credits the firm's efforts on a brownstone plaque over the apparatus door.

[20.] Public School 7 Manhattan, The M. Samuel Stern School, 160 E. 120th St., SE. cor. Lexington Ave. 1958. Perkins & Will.

Three glass and paneled cubelike pavilions connected by glass-enclosed ramps house the classrooms of this school. Unfortunately, the building is now covered with steel mesh screening **to curtail rock-throwing vandals.** An alternate, if no more satisfying, solution to rock throwing in these parts is to build without windows on the street [see Intermediate School 201, Harlem 35.]

[21a.] Harlem Courthouse, 170 E. 121st St., SE cor. Sylvan Place. 1893. Thom & Wilson. ★

This handsome brick and stone courthouse is **a model governmental palace** of the 1890s, now used for far more humble governmental functions. A rich array of forms (gables, archways, the imposing corner tower) and materials (water-struck red brick, bluestone, granite, terra cotta, and copper) make this fine work both a **Landmark** and a **landmark.**

~~These~~ smooth ~~white~~ limestone faced Romanesque Revival structures are located on one ~~of~~ the busy blocks, on East 117th Street between Park & Lexington where only Puerto Rican is heard. The rectory is ~~a~~ four storied with round arched doorway, & windows on the first floor, square headed on the second & third & arched again on the fourth floor with a gable end topping the entire width.

The church building immediately adjacent, is impressive, having a wide round arch central entrance portal with small columns & archivolts in the reveal flanked by two square towers whose top corners terminate in pinnacles and mark the base of the copper covered spires. Steep flights of steps lead from the side walk to this entrance as well as to the four others in the facade, one each in the bases of the towers, and one each at the end of each side aisle. The elevation of the church, as well as the rectory, has great dignity, in massing and detail. We see of the ~~future~~ ~~it is~~ these buildings are of landmark caliber.
