1114 Avenue of the Americas
New York, NY 10036

Pursuant to Section 25-307 of the Administrative Code of the City of New York, the Landmarks Preservation Commission, at the Public Meeting of July 9, 2013, following the Public Hearing of the same date, the Landmarks Preservation Commission voted to approve a proposal to construct a rooftop addition, install storefront infill and signage, and modify the west elevation, as put forward in your application completed on June 13, 2013.

The proposal as approved, consists of restorative work, including the repair and replacement of the stucco cladding, and terra cotta stabilization as required; the removal of the four (4) scuppers and leaders on the West 21st Street façade, the installation of a modern aluminum interpretation of the historic copper leader box; the installation of infill on the West 21st Street façade within the existing openings, including solid stainless steel doors, twelve-light and nine-light metal fixed windows, and arch-headed multi-light metal windows with an operable eight-over-eight double-hung portion at the center, all with a dark brown finish; the installation of two (2) metal blade signs measuring 2' by 3' in size at the ground floor of the West 21st Street façade; the installation of infill on the Boardwalk façade within the existing openings, including twelve-light metal windows, paired single-light doors with transoms, and arch-headed multi-light infill with fixed single pane display windows and decorative metal bulkheads or paired single light doors, all with a dark brown finish; at the roof, the restoration of the wood pergola including the replication of the terra cotta detailing and construction of four (4) additional stucco clad support columns; the installation of ten (10) light fixtures; the installation of two (2) flagpoles with fabric banner signs or flags; the installation of two (2) large-scale neon tube signs on support structures covering 500 and 400 square feet respectively at the roof of the two existing bulkheads on the West 21st Street façade; at the secondary west

elevation, the insertion of a stage structure setback approximately 60' from the Boardwalk façade, featuring sliding and fixed brushed stainless steel framing and panels, and two (2) large-scale video screens; the stage house roof will feature a truss system barrel vaulted structure with a light beige vinyl covering, which rises to a maximum height of approximately 16' above the parapet wall; and the installation of five (5) sets of paired brushed steel doors with illuminated signage directly above the doors. The proposal as shown on presentation boards labeled LPC-01 through LPC-38, dated July 9, 2013, prepared by Randolph Gerner, R.A., and submitted as components of the application and presented at the Public Hearing and Public Meeting.

In reviewing this proposal, the Commission noted that the designation report describes 2102 Boardwalk, aka 3052 West 21st Street, the (former) Childs Restaurant Building, as a Spanish Colonial Revival style restaurant building designed by Dennison & Hirois, and built in 1923.

With regard to this proposal, the Commission found that the proposed restorative work, including the reconstruction of the pergola, the installation of the two flagpoles, and the terra cotta restoration will return this building closer to its original appearance; that the proposal will return this building to its original function as a restaurant and entertainment destination and will adaptively reuse a portion of the building as a theater; that the proposed storefront infill is reminiscent of the details and configuration of the historic infill; that there is historic precedent for large-scale signage on this building; that given the building's history as a popular restaurant in a bustling amusement area, the presence of a visible rooftop addition does not detract from the building's architectural features; that the stage and proscenium structure are proposed at the undeveloped brick west secondary façade, and the insertion of these elements into this façade will not result in the removal of or damage to significant historic fabric; that the rooftop addition will be set back from the highly designed boardwalk facade and will therefore not detract from these elements; that the portion of the stage roof that is visible in conjunction with the developed facades consists of beige canvas, and appears temporary in nature and expression; that the use of canvas for the visible addition relates well to the historic seasonal use of this building's historic rooftop; and that the proposed work will give this currently vacant building year-round use, is supportive of the ongoing redevelopment of this entertainment district, and will enhance the special architectural and historic character of this Individual Landmark. Based on these findings, the Commission determined the work to be appropriate to this Individual Landmark and voted to approve it.

The Commission notes that the applicant is applying to the City Planning Commission for certain variances. Any changes to the design required by the City Planning Commission approval must be submitted to the Landmarks Preservation Commission for review and approval prior to the issuance of the final approval letter.

PLEASE NOTE: In voting to approve this proposal, the Commission stipulated that the downspout detailing be restudied with the Landmarks Preservation Commission staff. This permit is issued contingent upon the Commission's review and approval of the final Department of Building filing set of drawings. No work can begin until the final drawings have been marked approved by the Landmarks Preservation Commission with a perforated seal. Please submit these drawings to the Landmarks Preservation Commission staff when they become available.

This permit is issued on the basis of the building and site conditions described in the application and disclosed during the review process. By accepting this permit, the applicant agrees to notify the Commission if the actual building or site conditions vary or if original or historic building fabric is discovered. The Commission reserves the right to amend or revoke this permit, upon written notice to the applicant, in the event that the actual building or site conditions are materially different from those described in the application or disclosed during the review process.

All approved drawings are marked approved by the Commission with a perforated seal indicating the date of approval. The work is limited to what is contained in the perforated documents. Other work or amendments to this filing must be reviewed and approved separately. The applicant is hereby put on notice that performing or maintaining any work not explicitly authorized by this permit may make the applicant liable for criminal and/or

civil penalties, including imprisonment and fines. This letter constitutes the permit; a copy must be prominently displayed at the site while work is in progress. Please direct inquiries to Carly Bond.

Robert B. Tierney
Chair
