*This case narrative is in the form of an exception report. Method specific and/or QA/QC anomalies related to this report only are detailed below.*

**Metals Analysis:**

The Matrix Spike Duplicate for batch 11690 had recoveries outside QC limits. However, since the associated Method Blank and Laboratory Control Sample were within control, no corrective action was necessary. In addition the RPD between the QC sample and the Method Replicate is outside QC limits. The RPD criteria were met between the LCS/LCS Method Replicate.

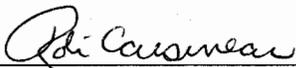

The Matrix Spike and/or Matrix Spike Duplicate for batch 11681 had recoveries outside QC limits. However, since the associated Method Blank and Laboratory Control Sample were within control, no corrective action was necessary. The serial dilution is also outside QC limits, suggesting matrix interference.

The Matrix Spike and Matrix Spike Duplicate for batch 11706 had recoveries outside QC limits. However, since the associated Method Blank and Laboratory Control Sample were within control, no corrective action was necessary. In addition the RPD between the QC sample and the Method Replicate and MS/MSD RPD are outside QC limits. The RPD criteria were met between the LCS/LCS Method Replicate.

**TCLP Metals Analysis:**

The serial dilution for batch 11724 is outside QC limits for one or more analytes, suggesting matrix interference.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy data package and in the computer-readable data has been authorized by the Laboratory Manager or his designee, as verified by the following signature.

## **Reporting Limit Definitions**

## HCV Reporting Limit Definitions/Data Qualifiers

### REPORTING DEFINITIONS

**DF** = Dilution Factor

**MDL** = Method Detection Limit

**RL\*** = Reporting Limit

**ND** = Not Detected

**RT** = Retention Time

**NA** = Not Applicable

*\*Samples with elevated Reporting Limits (RLs) as a result of a dilution may not achieve client reporting limits in some cases. The elevated RLs are unavoidable consequences of sample dilution required to quantitate target analytes that exceed the calibration range of the instrument.*

### DATA QUALIFIERS

- B-** Indicates analyte was present in the Method Blank and sample.
- d-** For Pesticide and PCB analysis, the concentration between primary and secondary columns is greater than 40%. The lower concentration is generally reported.
- E-** Indicates the concentration exceeded the upper calibration range of the instrument.
- J-** Indicates the value is estimated because it is either a Tentatively Identified Compound (TIC) or the reported concentration is greater than the MDL but less than the RL. For samples results between the MDL and RL there is a possibility of false positives or misidentification at the quantitation levels. Additionally, the acceptance criteria for QC samples may not be met.

Bob,

I have activated the samples below for the requested parameters on one week turnaround time with results due on 12/21.

Thanks and please let me know if you need anything else.  
Ben

To: bRao@hampton-clarke.com  
Subject: RE: 1120830\_111213164601 544 Union Ave Preliminary Results

Ben, please run additional totals analyses (Hg, Pb and As) on the following contingency samples (12' to 14')

B-1, AC63111-037  
B-3, AC63081-005  
B-12, AC63111-021  
B-13, AC63111-008  
B-14, AC63081-032  
B-15, AC63111-004  
B-16, AC63081-047  
B-17, AC63111-012  
B-19, AC63081-037

Also, run an additional TCLP for Lead on B-1 (12' to 14'), AC63111-037

Ben, if you have enough soil volume, I'd like to add a few more TCLPs:

For lead:

B-1 (4-6) - AC63111-034  
B-1 (8-10) - AC63111-035  
B-1 (10-12) - AC63111-036

And, for Arsenic:

Bob,

I have activated the samples below for TCLP analysis on 1 week TAT. Results should be available on 1/18/12. We will note the TCLP Hg hold time in the non-conformance.

Thanks and please let me know if you need anything else.  
Ben

Ben, go ahead and analyze anyway...just note that it exceeded the hold time.

Thanks, Bob

To: Wolff, Robert  
Subject: RE: 544 Union Ave

Hi Bob,

We checked the volume and we do have enough to perform TCLP on the samples below. I'll activate.

The sample requested for TCLP mercury below, B-16 (12-14) is past hold for TCLP Mercury. Should we proceed with it past hold or should we only analyze for TCLP Arsenic and Pb. TCLP Mercury needed to be tumbled within 28 days. Other metals is 6 months.

Thanks.  
Ben

**Client:** URS-NYC

**HCV Project #:** 1120830

**Project:** 544 Union Ave

---

Ben, the client would like to run a few more TCLPs (if you have enough sample volume) for the following samples:

B-2 (8' to 10') for lead - AC63111-039

B-14 (4' to 6') for lead - AC63081-028

B-15 (10' to 12') for arsenic and lead - AC63111-003

B-16 (12' to 14') for mercury, arsenic and lead - AC63081-047

Please provide the quickest TAT possible.

Also you will be receiving four groundwater samples on Monday.

Finally, please issue the final report for the December samples.

Thanks, Bob

Above activated on 1 week TAT. BR 1/11/12.

- 1 Yes Is there a corresponding COC included with the samples?
- 2 Yes Are the samples in a container such as a cooler or Ice chest?
- 3 Yes Are the COC seals intact?
- 4 Yes Please specify the Temperature inside the container (in degC)  
2.6
- 5 Yes Are the samples refrigerated (where required)/have they arrived on ice?
- 6 Yes Are the samples within the holding times for the parameters listed on the COC? IF no, list parameters and samples:
- 7 Yes Are all of the sample bottles intact? If no, specify sample numbers broken/leaking
- 8 Yes Are all of the sample labels or numbers legible? If no specify:
- 9 Yes Do the contents match the COC? If no, specify
- 10 Yes Is there enough sample sent for the analyses listed on the COC? If no, specify:
- 11 Yes Are samples preserved correctly?
- 12 Yes Was temperature blank present (Place comment below if not)? If not was temperature of samples verified?
- 13 NA Other comments ...Specify
- 14 NA Corrective actions (Specify item number and corrective action taken).

### FORM 3 (ICB/CCB/MB Summary)

Date Analyzed: 12/09/11  
 Data File: H13377SWc  
 Prep Batch: 11681  
 Reporting Limits Used: SOIL,6010B(ICP)/7470A,7471A(Hg),6020  
 Instrument: HGCV1A  
 Units: All units in ppm except Hg and icp-ms in ppb  
 Project Number: 1120830

Lab Name: Veritech  
 Lab Code:  
 Contract:  
 Nras No:  
 Sdg No:  
 Case No:

Analyte	ICB-10	CCB-22	CCB-25	MB 11681 (1)- 11
Mercury	.7 U	.7 U	.7 U	.7 U

**Notes:** a-indicates absolute value of result found above the reporting limits in CCB/ICB or result found above reporting limit in the MB  
 u-indicates result below reporting limit

**FORM 3**  
**(ICB/CCB/MB Summary)**

Date Analyzed: 12/12/11  
Data File: H13377SWf  
Prep Batch: 11681  
Reporting Limits Used: SOIL,6010B(ICP)/7470A,7471A(Hg),6020  
Instrument: HGCV1A  
Units: All units in ppm except Hg and icp-ms in ppb  
Project Number: 1120830

Lab Name: Veritech  
Lab Code:  
Contract:  
Nras No:  
Sdg No:  
Case No:

Analyte	ICB-10	CCB-20						
Mercury	.7 U	.7 U						

**Notes:** a-indicates absolute value of result found above the reporting limits in CCB/ICB or result found above reporting limit in the MB  
u-indicates result below reporting limit

### FORM 3 (ICB/CCB/MB Summary)

Date Analyzed: 12/12/11  
 Data File: H13384S  
 Prep Batch: 11690  
 Reporting Limits Used: SOIL,6010B(ICP)/7470A,7471A(Hg),6020  
 Instrument: HGCV2A  
 Units: All units in ppm except Hg and icp-ms in ppb  
 Project Number: 1120830

Lab Name: Veritech  
 Lab Code:  
 Contract:

Zinc	1	U		0.92546	93	U		0.96124	96	U		0.95877	96		

**Notes:** a-indicates absolute value of the concentration > 2 \* Reporting Limits In the ICSA  
 b-indicates absolute value of the concentration above Reporting Limits but < 2 \* Reporting Limits in the ICSA  
 c-indicates the recovery failed the Qc Criteria in the ICSAB  
 u-indicates the absolute value of the concentration was below the reporting limit

## FORM 4 (ICSA/ICSAB Summary)

Date Analyzed: 12/19/11  
 Data File: S13410A3  
 Prep Batch: 11720  
 Reporting Limits Used: SOIL,6010B(ICP)/7470A,7471A(Hg),6020  
 Instrument: PEICP3A  
 Units: All units in ppm except Hg and icp-ms in ppb  
 Project Number: 1120830

Lab Name: Veritech  
 Lab Code:  
 Contract:  
 Nras No:  
 Sdg No:  
 Case No:  
 ICSA/ICSAB: SOURCE: VHG LABS
