already been done at the site. Talked to John Urda, he said that we don't modify the STIP but we can alter the CAP. 5/24/06 - Obligado - Sent a revised CAP to Robert Walters via email. Dave Greffinius cell: 914-522-6344 Guy Roberts cell: 646-217-2441 5/25/06 - Obligado - Stip implemented by Oliva. 7/10/06 - Call Dave Greffinius - left message 7/27/06 - Obligado - spoke to DAve greffinius. He said they planned to to EFR pilot next week. 8/3/06 - Obligado - Review Remedial Action Plan, Submitted by Delta Environmental, dated July6,2006. IN 1997, six 550 gallon gasoline USTs were removed. The site has been redeveloped as a Gallery. Prior to redevelopment a subslab ventilation system and vapor barrier were installed. Site underlain by brown silt and clayey silt with very fine sand and small gravel. GW approximately 6 to 8 ft. GW probably flows to SW. Soil analytical results from 12/9/06 show petroleum impacted soil The hotspots are SB2 (155,900 ppb total VOCs) and SB4 (39,590 ppb Total VOCs). GW hot spot at SB1 5197 ppb VOCs and existing sidewalk well with 6698 ppb Total VOCs. Delta installed 2 additional sidewalk wells in January 31, 2006. MW1 had 358 BTEX and 3110 MTBE and MW2 had 836 BTEX and 2170 MTBE. The existing sidewalk well had 3339 BTEX and 7820 MTBE. 4 Remedial alternatives have been proposed. MNA, MPE, periodic VEFR, and SVE. Ongoing and Proposed Remedial Activities - A subslab Soil system has been installed with 1 4" diameter SVE well attached to a Blower. The SVE system will operate continuously for 3 to 5 years to prevent vapor migration into the building. VOC readings measured at the sampling port will be collected on a quarterly basis and compared to Benzene Emission Limits. A Pilot VEFR event will be performed to try to removed LNAPL. If affective periodic VEFR events will be performed. 3 existing wells on north side of sidewalk and one existing well on south side of sidewalk (MW3) will be monitored on a quarterly basis. Call D. Greffenius to discuss plan. Left message to call DEC. 8/31/06 - Obligado - Call D. Greffinius to discuss the RAP and the pilot test. He said they recovered approximately 5 gallons of product during the pilot test. He will submit a pilot test summary letter shortly. 9/12/06 - Obligado - Email from Greffinius. He will send a Pilot Test Summary Leter report 10/13/06 - Obligado - Emailed Greffinius inquiring as to status of Pilot Test Summary Letter. 12/8/06 - Obligado - Sent email to Greffinius requiring VEFR summary report submitted as a RAP Addendum by December 29, 2006. 1/25/07 - Obligado - Reviewed RAP Addendum. VEFR event removed 390 gallons of impacted water and 56.5 pounds of LNAPL and combustibile gas. Approximately 5 gallons of product were removed. Monitoring subsequent to the event found 0.9 ft of product in the sidewalk well suggesting VEFR successful in moving product from under building. Sent letter approving RAP for VEFR and requiring product fingerprint to compare product in sidewalk well to previously found product, additional 3 monitoring wells, and schedule for future VEFR events. 7/9/07 - Obligado - Sent letter to Mr. Roberts requiring overdue well installations and VEFR schedule. Called Dave Greffinius to discuss. 9/27/07 - Obligado - Email from D.Greffinius : "The six MWs at 521 W. 21st Street are being sampled today, from around 10:30 a.m. to 2:30 p.m. The attached diagram shows the 6 wells; we will also be taking a few measurements to make any minor corrections to the site plan. I'll let you know if we have measurable LNAPL today." 8/25/08 - Obligado - Email from Greffinius. They need to relocate MW6 due to utility work in the sidewalk. I sent a letter approving a relocation of MW6. 9/3/08 - Obligado - Cover letter for 1Q08 and 2Q08 monitoring reports. Delta is monitoring vapors from SVE ssystem. Concentrations

decreasing in effluent. Review 2/19/08 monitoring report. 6 monitoring wells were sampled on January 18, 2008. GW is at 6.65 to 7.89 ft. Impacts found at MW2 - 9,380 ug/l BTEX. Proposes continued monitoring. Review May 16, 2008 monitoring report. LNAPL not detected High BTEX in MW2, 6200 ug/l. Proposes continued monitoring. 7/3/09 - Obligado - Sent email to Dave requiring submission of overdue monitoring reports. 8/18/09 - Obligado - Quarterly reports submitted. 1/12/09 - Obligado - Review of quarterly reports. The most recent report for 3Q09 shows BTEX concentration of 2996 for MW2. No LNAPL present. Monitoring wells MW1-MW6 were gauged and sampled. A request for decreasing monitoring to Semi-Annual was also submitted based on fluctuating but generally decreasing concentration trends and the lack of free product since July 2007 in monitoring well MW-Sidewalk. I sent a letter to Guy Roberts cc to Delta rejecting the request and requiring 1) continued quarterly monitoring, 2) addition of MWSidewalk to monitoring network 3) monitoring well survey and contour maps 4) hydrographs 5) documentation of SSDS operation. Required submission of next monitoring report within 90 days

DEC Region: 2  
DER Facility ID: 233941  
DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "DEMEO" 3/9/01 TJD Spill caused by leaking suction & return lines. Two basement sumps have accumulated #2 Fuel oil resulting from release. Lines have been replaced. AL Eastmond has been retained to test tank (2000 gallon), pump out pits daily and investigate extent of sub-surface contamination. Manager in charge of project for storage USA is Carlos Gonzalez (212) 924-5111. NYCDEP notified, issued violations for discharge to city sewers (Storage USA was pumping product from pits into sewer) this discharge has been abated. Adjacent properties were canvassed to determine potential impacts, no problems found other than odor complaints @ 525 W 20th Street, odors have started to disipate since discharge to sewer was abated. Actual date of discovery was approximately one week prior to notification. 3/15/01 TJD Site visit to determine compliance with verbal directives given on 3/9/01. Storage USA has not been vacuuming sumps as directed. Only two vacuum events 3/8 & 3/9 performed by AL Eastmond. Do Work letter sent to RP today. ECO Smith visited sited today and has issued multiple summons to manager. A third impacted sump discovered in bottom of freight elevator shaft - pump in sump. Manager has been directed to disconnect and remove pump from service. 04/28/2005: DEC Lead changed from TJ DeMeo to J.M. Krimgold. 10/31/05 - OBLIGADO - file transferred from Krimgold to Obligado 11/7/05 - Obligado - Review Remedial Action Work Plan. Background - Site contaminated with #2 fuel oil as a result of a leak in a boiler supply line connected to a former 2000 gallon onsite underground storage tank. 10 Wells installed at the site. NAPL present on ground water. VEFR conducted in 2003, 15 gallons of NAPL removed. NYAPL recovery system in RW3, manual baling in RW2 and RW1. AS of June 2004, 4000 gallons of total fluids removed including 128 gallons of NAPL. DTW is 5 to 7 ft bgs. GW flow to SW. Ground water impacts due to No 2 fuel oil in mw0, mw5, and mw6. Proposal - Baseline assessment - Collect 6 to 8 soil samples for STARS VOCs and SVOCS, TPH, TOC, COD. Soil borings will be converted into monitoring wells and 6 ground water samples for STARS, TPH, natural attenuation parameters, electron acceptors will be collected. Proposes 2 PermeOx (Calcium Peroxide) injections over a 12 month period to enhance

biodegradation. Baseline, Post Injection, and quarterly monitoring proposed. 11/15/05 - Obligado - called Glenn Netuschil, at Roux to discuss RAP. Left message. 11/16/05 - Obligado - speak with Glenn (631)232-2600, approve RAP. Roux will proceed with baseline soil and ground water sampling, then ORC injection. Can expect report in 1-2 months. Sent RAP approval letter to: Gary Dorin Edison Properties 100 Washington Street Newark, NJ 07102 Fax copy to Roux at 631-232-9898 11/29/05 - Spoke with Glen, baseline investigation taking place this week, 11/28-12/2/05. 2/1/06 - Obligado - call Glenn, during geoprobe for baseline assessment, noticed product stained soils (fuel oil) in one geoprobe point. So they installed a well and found 1 foot of product. They have been recovering product at and are seeing product levels decrease. Once product levels decrease to an acceptable level they will proceed with approved RAP. 3/28/06 - Obligado - called Glenn, product thicknesses are decreasing, max thickness is a few inches in one well. 6/26/06 - Obligado - Still 0.2 feet of product. Put spill buster in well with product to increase recovery. 1/3/07 - Obligado - Spoke to Glenn he said they are still removing product with a spill buster. They used a vac truck to remove the recovered product. The 55 gallon drum was about 3/4 full (~40 gallons of product removed) from tank. While the Vac truck was there they performed EFR on the wells with product. He will send me the baseline investigation results. 2/22/07 - Obligado - After discussion with Kumar about #2 fuel oil found at an adjacent site (sp0609814) sent letter to Edison Properties requiring the installation of an additional well to the east of the free product plume. Also required quarterly monitoring program implementation as per the RAP. 7/10/07 - Obligado - Called Glen to inquire about status of well installation. 10/26/07 - Obligado - Called Glen to inquire about site status. Left message to call back the DEC. 10/31/07 - Obligado - Called Glen again, left message to call DEC. Emailed Glenn as well. 12/3/07 - Obligado - During November I spoke with Glen about this site. I told him I have received no documentation about the well installation or any site activities since Feb. He said a report has been prepared and it is under review and I should receive it shortly. 12/14/07 - Obligado - Reviewed Summary Report, submitted by Roux Associates, dated December 5, 2007. The report documents the remedial efforts at the site since the baseline assessment in 2005. Roux has been recovering product from the injection points and RW3 using bailers and absorbent socks. The Magnum Spill buster system was then moved to RW3 and IP2. A VEFR event occurred in IP2 and RW3 in September 2006, in which 200 gallons of fluids were removed. An additional well was installed MW10 by hand in storage area to delineate the product to the southwest. 0.01 ft was encountered during April 2007, No product has been found in gauging events since then. Product levels have been decreasing in most wells. The most recent gauging data from 6/28/07 show a max product thickness of 0.25 ft in IP2. They will continue monthly product monitoring and continuous recovery via Magnum Spill buster. Ground water monitoring shows constituents characteristic of a diesel release, low levels of VOCs with the greatest constituent is Naphthalene, max naphthalene is 270 ppb in MW10. The report recommends conducting sampling event in December and continue product gauging and monitoring. They will Once product levels decrease to below 0.02 ft they will implement the PermeOx injection. 3/3/08 - Obligado - Spoke to Glenn Netuschil. He said coned was doing work in the sidewalk in the vicinity 531 w 21st street and of one of the monitoring wells is in the way of the work and he asked what site the well was

associated with. I told him it was 521 W. 21st street site and gave him the contact information for Delta. 9/25/08 - Obligado - Have not received any documentation for this site. Called Glenn Netuschil. He said they haven't sampled since December 07. Required monthly monitoring, quarterly sampling, and quarterly reporting. Well should be sampled in October. A quarterly report should be submitted in November. 11/25/08 - Obligado - Glen requested extension until 12/14/08 to submit report. I approved extension. 6/24/09 - Obligado - Reviewed quarterly report, submitted December 2008. Documents product removal activities. Product thickness decreased to less than 2 inches. Roux recommends going forward with PermeOx injections. I called Glenn Netuschil. They went ahead with the injections in February 2009. They will submit will submit a quarterly report by July 31, 2009. 10/16/09 - Obligado - Reviewed Spill closure request. Roux requested spill closure after one round of sampling. I rejected the spill closure petition and required 1) quarterly sampling for minimum of 1 year 2) monthly gauging and product recovery if present 3) confirmatory soil sampling prior to spill closure. Required quarterly report to be submitted within 90 days of receipt or will be referred to legal. 12/14/09 - Obligado - Spoke with Glen Netuschil. They question requirements. Glenn asked if they could do quarterly gauging. I said monthly gauging is required due to the history of free product. He also questioned need for soil sampling. I told him soil sampling is required for spill closure. Contaminated soil can act as a continuing source for ground water contamination. I told him the report must be submitted by 90 day deadline. 3/4 - Obligado - I reviewed the 4th quarter 2009 report, dated 1/29/10. The report provides analytical results from monitoring wells sampled in December 2009. The report does not contain any gauging data. I sent an email to Charlie McGuckin requiring the next report due 4/30/10 contain monthly gauging data from all monitoring wells and including the injection wells.

Remarks: oil discovered in sump hole broken oil lines discovered. eastman on the way for clean up

DEC Remarks: 3/9/01 TJD Spill caused by leaking suction return lines. Two basement sumps have accumulated 2 Fuel oil resulting from release. Lines have been replaced. AL Eastmond has been retained to test tank (2000 gallon), pump out pits daily and investigate extent of sub-surface contamination. Manager in charge of project for storage USA is Carlos Gonzalez (212) 924-5111. NYCDEP notified, issued violations for discharge to city sewers (Storage USA was pumping product from pits into sewer) this discharge has been abated. Adjacent properties were canvassed to determine potential impacts, no problems found other than odor complaints @ 525 W 20th Street, odors have started to dissipate since discharge to sewer was abated. Actual date of discovery was approximately one week prior to notification. 3/15/01 TJD Site visit to determine compliance with verbal directives given on 3/9/01. Storage USA has not been vacuuming sumps as directed. Only two vacuum events 3/8-3/9 performed by AL Eastmond. Do Work letter sent to RP today. ECO Smith visited site today and has issued multiple summons to manager. A third impacted sump discovered in bottom of freight elevator shaft - pump in sump. Manager has been directed to disconnect and remove pump from service.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Status: No violations found

**FINDS:**

Registry ID: 110004409907

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region: 2  
DER Facility ID: 131980  
DEC Memo: letter to be sent Last update by JBMCCULL on 12/20/05 - transferred back to R-2 3/5/08 - Austin - Assigned to Ketani for further investigation - end 4/21/08 - Raphael Ketani. The spill occurred on 5/11/89. The UST was filled with water and the top of the tank and the cement were seeping oil. The tank holds #6 oil. Richard Breslow, 559 W. 45 Street, NY (212) 265-4023 was on the original spill report as the spiller. There is no file for the case. I checked Property Shark, NYC Property Tax listings, and ACRIS and found the owners as: 27th Street Property, LLC, c/o Centaur Properties, LLC, 35 E. 21 Street, 3rd Floor, NY, 10010; and Gaiety Investments, Ltd., c/o Hartman & Craven, LLP, 488 Madison Avenue, NY, 10022. The PBS registration is for 536 W. 27 Street. The number is #2-476560. It shows a 5000 gal. tank that was closed, but used to contain #6 oil. I sent CSLs to both 27th Street Property and Gaiety Investments, Ltd. 4/23/08 - Raphael Ketani. Joe Graceson of Centaur Properties (212) 308-4443 called and left his phone number in a voice mail message. I made contact with Mr. Graceson. He said that Centaur is the sole owner. He said that the building uses gas only. The building was bought from Gaiety a little while ago. Centaur has had little cooperation from Gaiety in obtaining old records. He asked for any records that DEC has. I told him we have nothing. He asked what the next step would be if he can't find any information regarding the cleanup. I told him that Centaur will have to hire an environmental company to do an investigation and cleanup. I told him that DEC will need to receive the investigation plan, the site investigation report, the remediation plan, and the remediation report. He said he understood. With that, the conversation ended. 4/28/08 - Raphael Ketani. Steve O'Connell of Hartman & Craven (212) 836-4933 called. He said he represents Gaiety. He said that his company was involved when Gaiety first purchased the property and when they recently sold it. He said that Gaiety has no involvement with the site. 5/28/08 - Raphael Ketani. Mohammed Ahmed of Fleming Lei Shue called and said that he can't find any records or plans showing where the fuel tank used to be. He asked whether DEC had any records. I told him "No." He said he will try to put together an investigation plan. He said that he thinks he has a general idea of where the tank used to be. I told

him that it may "boil down" to just doing some geoprobing all over the basement. He said that may be what will happen. 5/29/08 - Raphael Ketani. Mr. Ahmed called. He said that he found a 1 page document from the NYFD stating that the tank was removed. I told him to send the document to me. I also told him that this doesn't preclude doing a soil investigation. He said he understood and that he will send a proposal for the work to be done. I received the Fire Department document by FAX from Mr. Ahmed. 6/3/08 - Raphael Ketani. Today I received the site investigation plan dated 5/29/08 via e-mail from Mr. Ahmed. I reviewed the plan, found it acceptable and e-mail Mr. Ahmed to go ahead with the work. 8/15/08 - Raphael Ketani. In preparation for case transfer, I am annotating the database as regards what needs to be done at the site to resolve the alleged or known environmental contamination. Followup is needed to see whether Fleming Lei Shue conducted the investigation and to get a copy of the report. Mr. Ahmed (212) 675-3225 called me. He said that the report is complete. He said he will send it, but only a little contamination was found on the concrete slab that used to support the tank. He said the groundwater has a little benzene, but this is not from the tank as it had #6 oil. He said the benzene levels are in the single digits to about 19 ppb. 09/02/08-HRAHMED-Returned Mohamed of Flemming Lee Sue call and left a message to call back. 09/03/08-HRAHMED-Mohamed sent me Limited Site Assessment Report with end point sample analyticles. As per the report, "New York City Fire Department (FDNY) records have indicated that the UST has been removed from the Site". 09/24/08-HRAHMED-Met with Mohamed of Flemming Lee Sue. No visual sign of affected drain or pit, no odor noticed. The opening of the basement is small. The base floor is a concrete finished basement. It used to be a club. this case is closed.

Remarks: BURIED UNDERGROUND TANK FILLED WITH WATER BUT SURFACE SOIL AROUND TANKTOP & CEMENT IS SEEPING WITH OIL, OIL WAS SAMPLED.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018  
Waste name: BENZENE

Violation Status: No violations found

**FINDS:**

Registry ID: 110004430964

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the

estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Hazardous Waste Summary:

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007  
Waste name: CHROMIUM

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

NCES (National Center for Education Statistics) is the primary federal entity for collecting and analyzing data related to education in the United States and other nations and the institute of education sciences.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET,

**1000163059**

WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "ROMMEL" 4/12/04-Vought-Spill transferred from Sullivan to Rommel as per Rommel. letter to be sent Previous note by JBMCCULL of C.O. Spill transferred back to R-2 3/7/08 - Austin - Assigned to Ketani for further investigation - end 7/10/08 - Raphael Ketani. There is no paper file. The spill happened on 8/10/94. They stuck a probe to 9' and found contaminated soil. The contaminant is #2 oil or diesel. They were planning to pull the tanks and remove the contaminated soil. The address is 501-513 W. 19 Street, Manhattan. I could not find a PBS case no matter which address, or which alternate address I used. I checked Property Shark for the alternate addresses. 513 W. 19 Street has an alternate address of 511 W. 19 Street, and block and lot 691/25. 501 W. 19 Street has alternate addresses of 153 10th Avenue, 501-505 W. 19 Street, and 153-159 10th Avenue. Block and lot are 691/29. In the NYC Property Tax listings, the owner of these two

**501-513 W. 19TH STREET (Continued)**

**S101340991**

parcels is Tenth Avenue Realty Associates, LP, 362 Kingsland Avenue, Brklyn, 11222-1905. I sent a CSL to Tenth Avenue Realty Associates. 7/14/08 - Raphael Ketani. I received a call today from Ron Tramosch of Core Environmental (718) 762-0544. He said he represents his client, 10th Avenue Realty. He said they gave him a the CSL letter. He explained that the property was bought in May 1995 from Broadway Building Materials. The site was changed from a building materials store to a truck servicing business (Mendon Trucking). During August 2006, they received an offer to sell the property. It consists of 3 lots, each of which fronts on 10th Avenue. Core did a Phase I. During September 2007, Core was asked to do a Phase II. This was when the two 550 diesel tanks were discovered. The NYC DOB records showed the 2 tanks. They were installed in 1940 and removed in 1994. The primary address is 153 10th Avenue. The soil and groundwater samples show contamination. There is also contamination from the MGP site across the street - 8200 ppb of 2-methyl naphthalene. There will be condos built on the site. There is an E-designation, but the project has not moved through the NYC DEP offices, yet. I told him that the tanks have to be registered and that the DEC needs copies of a plan showing the installation of a vapor barrier. He said both of these items will be taken care of. I told him that DEC can't close its spill case until these things are done. He said he understood. Lastly, I told him that DEC will review the Phase I and Phase II, and that we may require additional investigative work. 7/16/08 - Raphael Ketani. Yesterday, I received the Phase I and Phase II for the site. The work and reports were put together and submitted by CORE Environmental. I began my review of the reports. The Phase I stated that the proposed site remedy will be: excavation to 13' below grade for construction; installation of a containment wall; installation of vapor barrier below foundation and an active venting system; site management plan to address residual contamination; institutional controls in the form of an environmental easement. The Phase I also stated that there is an adjoining site to the north that had leaking gas tanks, an adjoining site to the southwest that had a leaking diesel tank, and a site to the southwest that was an MGP factory. There are 8 active ASTs on the site for storing various oil and waste oil products, and two 550 gal. USTs. An oil water separator is below ground. Groundwater is believed to be 7' to 9' below the surface. The Phase II had the soil and groundwater analytical results. Boring SB-10 was the only soil sample with elevated results. Ethylbenzene had 5600 ppb (limit 5500 ppb) and n-propylbenzene had 4800 ppb (limit 3700 ppb). There were 4 other VOC analytes with hits in the thousands of ppbs, but they didn't exceed TAGM. All of the other borings were completely non-detect for all of the VOCs. For the SVOCs, almost all of the analytes were non-detect in soil samples. SB-6 had 6 TAGM exceedences, but these were benzo series analytes and the hits were in the low thousands of ppbs. No hits for VOCs and SVOCs were detected in the groundwater sample from MW-3. However, MW-1 had 6 VOC hits from 53 ppb to 180 ppb, and 3 SVOC hits from 1100 ppb to 8200 ppb. MW-1 is near the fuel USTs and the fuel pump. With the exception of the 3 SVOC hits, no other SVOC analytes were detected. These SVOC analytes (2-methynaphthalene, fluorene, and phenanthrene) can all come from the MGP process. The former MGP site and its gas tanks were very near the site to the west and south. I finished my review and sent an approval letter for the Phase I and Phase II. I also stated in the letter that they should collect as much of the groundwater as possible and take another water sample to check on the level of

S101340991

contamination. Lastly, I told them that the two USTs and the waste oil tanks need to be registered, and that DEC needs something in writing confirming that a vapor barrier will be installed. The area the site is in was heavily industrialized. The low level VOC contamination probably originated from the USTs and/or the fuel pump and associated lines. I spoke to Mr. Tramosch (718) 762-0544 and told him about the letter that will be sent to Tenth Avenue Realty Associates, regarding the Phase I and Phase II and the analytical results. I mentioned that the letter will contain a request to do groundwater collection, the taking of another groundwater sample at MW-1 to confirm the contamination levels, submission of a PBS registration form for all of the USTs and waste oil tanks, and submission of a document stating that a vapor barrier will be installed. The contact person at NYC DEP is: Angela Licita, Permitting, NYC DEP, 59-17 Junction Blvd., 10th Floor, Elmhurst, NY, 11373. 7/22/08 - Raphael Ketani. Mr. Tramosch called regarding the 7/16/08 letter I had sent. The main issue was the installation of a vapor barrier. He said that the owner of the property doesn't have a developer on board, or in mind for the property. Development of the site for a condominium building is years away. I told him that the Spills Unit deals with short term cases, and can not wait several years for the developer to produce an architectural plan showing a vapor barrier. I reminded Mr. Tramosch that the DEC is requiring groundwater extraction, water resampling one month from the extraction date, along with a plan showing the vapor barrier. I told him that DEC is concerned with the public safety and that NYC DEP will also require the vapor barrier as this will be a residential building. He said he understood. I told him that a possible solution is for DEC to issue an NFA letter when the contaminated groundwater is gone, or present at much lower levels near TAGM, and have the vapor barrier listed on the letter as a requirement of construction. Mr. Tramosch said this would be a reasonable solution. 8/18/08 - Raphael Ketani. The case is being prepared for transfer due to a case realignment within the unit. A report needs to be submitted containing the volume of water collected and the analytical results from a groundwater sample taken one month later. All of the tanks that were or still are present on site need to be registered. The case manager may want to request specs for the vapor barrier.

Remarks: STUCK PROBE IN GROUND FOUND CONTAMINATED SOIL AT 9 FEET. WILL PULL TANKS OUT -ONCE THEY CAN SEE ALL CONTAMINATED SOIL THEY CAN REMOVE IT STUCK PILE.

Site Description: This site is located adjacent to the Avenue C Loop Road on the south side of East 19th Street between Avenues A and B in the borough of Manhattan in New York City, New York County, New York. The site location is within the present-day residential campus of Stuyvesant Town, which extends across 61-acres from First Avenue to Avenue C and from East 14th Street to East 20th Street. The complex includes 35 high-rise buildings, playgrounds, sport courts, and underground parking garages. The former East 19th Street Station site is designated as part of Tax Block 972, on the tax map of the City of New York, New York. The portion of the Stuyvesant Town campus associated with the East 19th Station site contains portions of a residential high-rise apartment building and a private underground parking garage. The East 19th Street Station was part of the larger facility called the East 14th Street Works, which was operated by Con Edison's predecessor companies including the Consolidated Gas Company of New York, the New York Steam Company, the Standard Gas Company, and the Manhattan Gas Light Company (Langan, 2003). The majority of that larger facility was located on the eastern side of Avenue C between East 14th and East 16th Streets. The East 19th Street Station reportedly began operations between 1863 and 1868 as a holder site and operated until approximately 1921. Based on the historic maps of the area, a single gas holder (approximately 500,000 cubic feet capacity) and a small unidentified structure occupied the site. The holder station was replaced by an auto/truck garage and then sold to Improvement Garage, Inc. in 1943. Stuyvesant Town Corporation acquired the land in 1944 for the development of the Stuyvesant Town

apartment complex. Several investigations have been performed at the East 19th Street Station site and are listed below. MGP Research Report and Preliminary Environmental Evaluation performed by Langan in 2001; Evaluation of Indoor Air and Soil Gas Sampling performed by The RETEC Group, Inc. (RETEC) in 2003; Site Characterization Study (SCS) performed by Haley & Aldrich, Inc. (H&A) in 2004; Interim Remedial Investigation performed by GEI in 2007; Water valve replacement activities performed by the property owner with oversight provided by RETEC/GEI in 2006 and 2007; and Remedial Investigation (RI) performed by AECOM from 2006 through 2008. The Final RI Report was approved in August 2009. An Interim Site Management Plan (ISMP) is currently being implemented which consists of Quarterly Indoor Air Sampling and NAPL Monitoring and Recovery.

Env Problem: Relatively low levels of soil contamination have been found at the site.

Health Problem: Public water is provided to the area, thereby preventing exposures to groundwater. Site-related contamination has been found, but it is not available for direct contact. Current data indicate that vapors are not migrating into the on-site residential building. Additional data will be assessed as it becomes available.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

**Hazardous Waste Summary:**

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D003  
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: U080  
Waste name: METHANE, DICHLORO-

**FINDS:**

Registry ID: 110004406367

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Actual:**  
**5 ft.**

Site Description: The site is located along 11th Avenue, between 18th and 19th Streets. It is the location of an office building designed by Frank Gehry. This site was a transition to the BCP from former Site V00624. Remediation was completed in accordance with a Remedial Action Work Plan approved under the VCP. An Environmental Easement for the property was filed on July 31, 2006, restricting future use to industrial/commercial, and requiring: 1) monitoring and maintenance of the subsurface barrier, 2) continuous operation of a sub-level ventilation system 3) annual certification. The Final Engineering Report, which documents the successful remediation of this site, was approved on August 31, 2006. A Certificate of Completion was issued for this site on September 27, 2006. Institutional controls required by the environmental easement were certified February 9, 2007. Annual certification of institutional and engineering controls was most recently approved on April 19, 2010.

Env Problem: The site was significantly contaminated with MGP wastes and petroleum. The RAWP required excavation of the site to depths of 15 to 18 feet across the site to accommodate the construction of a new office building with subsurface parking. Subsurface barriers and an active ventilation system were also components of the site remedy. Construction activities started in summer 2004 and were official completed with the approval of the Final Engineering Report on August 31, 2006.

Health Problem: On-site soils and groundwater are contaminated with petroleum-related contaminants. The site is paved; therefore, direct contact exposure is not expected. The area is served with public water; therefore, ingestion exposure is not expected. Assessment of the potential for inhalation exposures via vapor intrusion will be conducted during the remedial investigation.

Assessment of the potential for inhalation exposures via vapor intrusion will be conducted during the remedial investigation.

**BROWNFIELDS:**

Program: BCP

Site Code: 57373

Site Description: The site is located along 11th Avenue, between 18th and 19th Streets. It is the location of an office building designed by Frank Gehry. This site was a transition to the BCP from former Site V00624. Remediation was completed in accordance with a Remedial Action Work Plan approved under the VCP. An Environmental Easement for the property was filed on July 31, 2006, restricting future use to industrial/commercial, and requiring: 1) monitoring and maintenance of the subsurface barrier, 2) continuous operation of a sub-level ventilation system 3) annual certification. The Final Engineering Report, which documents the successful remediation of this site, was approved on August 31, 2006. A Certificate of Completion was issued for this site on September 27, 2006. Institutional controls required by the environmental easement were certified February 9, 2007. Annual certification of institutional and engineering controls was most recently approved on April 19, 2010.

Env Problem: The site was significantly contaminated with MGP wastes and petroleum. The RAWP required excavation of the site to depths of 15 to 18 feet across the site to accommodate the construction of a new office building with subsurface parking. Subsurface barriers and an active ventilation system were also components of the site remedy.

**19TH STREET DEVELOPMENT SITE (Continued)**

**S105857225**

Construction activities started in summer 2004 and were official completed with the approval of the Final Engineering Report on August 31, 2006.

Health Problem: On-site soils and groundwater are contaminated with petroleum-related contaminants. The site is paved; therefore, direct contact exposure is not expected. The area is served with public water; therefore, ingestion exposure is not expected. Assessment of the potential for inhalation exposures via vapor intrusion will be conducted during the remedial investigation.

**BROWNFIELDS:**

Program: BCP

Site Code: 58929

Site Description: This site encompasses the entire block between 17th St, 18th St, 10th Avenue, and 11th Avenue in the lower west side of Manhattan. It is currently used as a parking lot. Surrounding land use is primarily commercial. A former elevated RR right of way, now converted to park use, crosses the eastern edge of the site. The BCP site is one parcel in the larger Con Edsion W 18th St MGP, V00530. Much of the gas making and purification facilities of the W 18th Street MGP were located on this parcel. Con Edison completed a site characterization (SC) investigation during 2004, and the full remedial investigation (RI) was approved on 4/4/06. Significant tar contamination was identified throughout the property. A remedy was selected in May 2008. The remedy has not yet been implemented, due to the entry of this parcel into the Brownfield Cleanup Program.

Env Problem: Results from the Con Edison investigation completed under V00530 indicate that a significant amount of coal tar contamination is present, associated with former MGP structures located on this property. MGP contamination appears to have migrated from this property (primarily to the north and west), but does not appear to have impacted the Hudson River. (12/15/10)

Health Problem: Public water is provided to the area, thereby preventing exposures to groundwater. Under current conditions as a parking lot, direct contact with waste is unlikely. The potential for exposures will be need to be addressed during the planned remediation of the site.

DEC Remarks: 11/17/99 Call from Mark Turoff - Environmental consultant hired to work this job. pager 917-525-3087 cell 917-750-1843 Mr. Turoff requested an extension in time until late December. Sangesland asked several specific questions about what was being done on the site now (new tenent moving in?) Are there any other tanks on the site? will the tank be removed or abandoned in place? Mr. Turoff knew nothing. Sangesland asked him to answer these questions and plan what needed to be done. Submit that in writing and then PERHAPS the actual work could be postponed until late Dec. 99 11/26/99 - Mr. Turoff sent a letter dated 11/22/99 requesting an extension of deadline date. NONE of the information requested in 11/17/99 telephone conversation was submitted in this letter. Mr. Turoff requested a written extension of the deadline, but since he did not submit what was requested, no such letter will be sent out. 12/6/99 - Call from owner saying Trinity Consulting was on site chopping open the floor .... no notification was made to DEC about this work).... Sampling will be done 12/7/99 early AM 12/7/99 - Six GeoProbe borings were pushed down to 10 - 12 to bedrock. Sangesland was on site for the first 4 borings - all appeared clean. Borings will be sent in for testing. If the results come back clean, the site will be closed out. 12/29/99 - Trinity sent in data from several soil borings. After Sangesland left the site on 11/7/99 another tank was found in the garage. This new tank was a clean motor oil storage tank used to put into cars during service. Borings were done around this one also. All borings were tested to EPA 8270. All results were below detection limits except for 1 taken near the fill line of the used motor oil tank. The one high sample had the following values: Eco Test Lab) all below 300 ug/kg except: Fluoranthene = 420 Pyrene = 380 Ben o a)anthracene = 440 Chrysene = 440 Ben

o b)fluoranthene = 500 Ben o k)fluoranthene = 500 DEC status on this site is NOT closed, but it will be listed as inactive with no further action required. Since the source is gone and the contamination was just around the fill line and not wide spread, DEC direction is to have the tanks filled and taken out of service. Over time natural attenuation should remediate the site. In it s expected use as an art gallery with a concrete floor, this should have no impact on either health or environment. In the future if the use of the property changes, this issue may need to be addressed again. 1/11/2000 - Vinnie Lovari from Island Tank 718-967-9424) was given permission to open up the tanks, recheck si e and then closed them out in place. PBS Registration paperwork will be sent after the work is done. 1/26/2000 - Spill event is closed out.

**Hazardous Waste Summary:**

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008  
Waste name: LEAD

Waste code: D009  
Waste name: MERCURY

Waste code: D010  
Waste name: SELENIUM

Waste code: D018

Date Rec Updated: 3/15/2011 11:59:15 AM

Updated By: JHOCONNE

Site Description: The Site is located in an urban area of New York County (Manhattan) on the east side of 10th Avenue between W. 16th and W. 17th Streets (the site does not include the building on the southeast corner of 10th Ave. and W. 17th St.) The former site features include several buildings and a paved parking lot. The site buildings were unused and were demolished. The most recent uses of the site include a warehouse for electrical construction equipment; an electrical contractor area; a vehicle garage and outdoor parking area; an outdoor garden supplies store; a restaurant; auto body shop; and classroom space for a theater company. Surrounding uses include multi-story residential buildings with and without lower-level commercial uses, parking, and playgrounds. The High Line, an elevated rail line which was used in the past for freight and is now unused, is to the west of and partially over the western end of the site (with aerial easement). Prior uses include various freight and automobile uses, with underground fuel storage tanks, and unspecified manufacturing. An investigation pertaining to the removal of underground storage tanks occurred in the early 1990's. A Phase I and limited Phase II Environmental Site Assessment was performed in 2004. A Remedial Investigation was conducted under the BCP in 2005. The RI Report was approved in March 2006. The Remedial Action Work Plan with Stipulations was approved by the Department on April 26, 2006. For remedial purposes, the site was divided into two Operable Units (OUs): Operable Unit 1 (OU1) is the eastern portion of the site which is fully occupied by the new residential building. Operable Unit 2 (OU2) is the High Line area that extends along 10th Avenue and the western portion of 16th Street. A Track 4 cleanup was achieved for the site. Engineering and Institutional Controls have been instituted to manage the residual contamination. These controls have been memorialized in the Environmental Easement that has been recorded in the New York County Clerk's office. The Final Engineering Report and Site Management Plan were submitted in November 2007, and a Certificate of Completion was issued on October 6, 2008.

Env Problem: Based on the investigations conducted at the site, the primary contaminants of concern were related to the past uses of petroleum, and to historic fill which was present across the entire site. The site soils were contaminated with volatile organic compounds (VOCs) related to petroleum (benzene, toluene, ethylbenzene, xylene, naphthalene) and, to a much lesser degree with chlorinated solvents (e.g. tetrachloroethene). Contaminants also included semi-volatile organic compounds of petroleum origin. Exceedances of applicable standards, criteria and guidance for both soil and groundwater had been identified. As part of the remediation, the petroleum contaminated soil and the historic fill was excavated from OU-1 and disposed of at regulated facilities. Groundwater was treated on site, and the clean effluent was discharged to the New York City sewer under a permit. The contaminated soil and groundwater in OU-2 were remediated through injection of ORC (Oxygen Release Compound) into the underlying groundwater and subsoil. The top one foot of soil in OU-2 was removed through excavation. A Part 375 Track 4 cleanup was attained for the site. Engineering controls were installed to manage the residual contamination and include a composite cover system which consists of the concrete foundation of the building, a vapor-barrier membrane and a sub-slab depressurization system. Institutional controls, which include use restrictions and prohibitions, have also

Health Problem: been memorialized in an Environmental Easement that has been recorded in the New York County Clerk's Office. Public water is provided to the area, thereby preventing exposures to groundwater. The remedial action work plan for the site calls for the removal of contaminated soil from the site prior to construction of a residential building on-site. Soil gas is contaminated by chlorinated solvents that are likely due to an off-site source. The site owner will include measures in the building construction to prevent soil vapor migration into the building.

An investigation pertaining to the removal of underground storage tanks occurred in the early 1990's. A Phase I and limited Phase II Environmental Site Assessment was performed in 2004. A Remedial Investigation was conducted under the BCP in 2005. The RI Report was approved in March 2006. The Remedial Action Work Plan with Stipulations was approved by the Department on April 26, 2006. For remedial purposes, the site was divided into two Operable Units (OUs): Operable Unit 1 (OU1) is the eastern portion of the site which is fully occupied by the new residential building. Operable Unit 2 (OU2) is the High Line area that extends along 10th Avenue and the western portion of 16th Street. A Track 4 cleanup was achieved for the site. Engineering and Institutional Controls have been instituted to manage the residual contamination. These controls have been memorialized in the Environmental Easement that has been recorded in the New York County Clerk's office. The Final Engineering Report and Site Management Plan were submitted in November 2007, and a Certificate of Completion was issued on October 6, 2008.

Env Problem: Based on the investigations conducted at the site, the primary contaminants of concern were related to the past uses of petroleum, and to historic fill which was present across the entire site. The site soils were contaminated with volatile organic compounds (VOCs) related to petroleum (benzene, toluene, ethylbenzene, xylene, naphthalene) and, to a much lesser degree with chlorinated solvents (e.g. tetrachloroethene). Contaminants also included semi-volatile organic compounds of petroleum origin. Exceedances of applicable standards, criteria and guidance for both soil and groundwater had been identified. As part of the remediation, the petroleum contaminated soil and the historic fill was excavated from OU-1 and disposed of at regulated facilities. Groundwater was treated on site, and the clean effluent was discharged to the New York City sewer under a permit. The contaminated soil and groundwater in OU-2 were remediated through injection of ORC (Oxygen Release Compound) into the underlying groundwater and subsoil. The top one foot of soil in OU-2 was removed through excavation. A Part 375 Track 4 cleanup was attained for the site. Engineering controls were installed to manage the residual contamination and include a composite cover system which consists of the concrete foundation of the building, a vapor-barrier membrane and a sub-slab depressurization system. Institutional controls, which include use restrictions and prohibitions, have also been memorialized in an Environmental Easement that has been recorded in the New York County Clerk's Office.

Health Problem: Public water is provided to the area, thereby preventing exposures to groundwater. The remedial action work plan for the site calls for the removal of contaminated soil from the site prior to construction of a residential building on-site. Soil gas is contaminated by chlorinated solvents that are likely due to an off-site source. The site owner

Site Code: 59118

Site Description: The Site is located in an urban area of New York County (Manhattan) on the east side of 10th Avenue between W. 16th and W. 17th Streets (the site does not include the building on the southeast corner of 10th Ave. and W. 17th St.) The former site features include several buildings and a paved parking lot. The site buildings were unused and were demolished. The most recent uses of the site include a warehouse for electrical construction equipment; an electrical contractor area; a vehicle garage and outdoor parking area; an outdoor garden supplies store; a restaurant; auto body shop; and classroom space for a theater company. Surrounding uses include multi-story residential buildings with and without lower-level commercial uses, parking, and playgrounds. The High Line, an elevated rail line which was used in the past for freight and is now unused, is to the west of and partially over the western end of the site (with aerial easement). Prior uses include various freight and automobile uses, with underground fuel storage tanks, and unspecified manufacturing. An investigation pertaining to the removal of underground storage tanks occurred in the early 1990's. A Phase I and limited Phase II Environmental Site Assessment was performed in 2004. A Remedial Investigation was conducted under the BCP in 2005. The RI Report was approved in March 2006. The Remedial Action Work Plan with Stipulations was approved by the Department on April 26, 2006. DEC Remarks: On March 12, 2001, DEC Sigona called David Nickerson and requested a copy of the report left Message on voice mail). On June 5, 2001, DEC Sigona received the results of soil investigation for tank installation, dated June 1, 2001. DEC s comments regarding the results of a site investigation performed by Parsons Engineering Science, Inc. PES ) at the above referenced site. The results of the investigation report, dated June 1, 2001 reveal the presence of petroleum contamination which exceed recommended cleanup levels in the DEC s Technical Administrative Guidance Memorandum TAGM) Determination of Soil Cleanup Objectives and Cleanup Level s, dated January 24, 1994. The results of laboratory analysis for soil collected from test borings Nos. SB-1, SB-2, SB-4, SB-5 and SB-6 all exceed the level recommended for the cleanup of semi-volatile petroleum contamination. The level of volatile petroleum compounds evident in the soil sample collected from soil boring No. SB-3 exceed the cleanup level of all tentatively identified compounds, which cannot exceed 10 ppm. The level of p-Isopropyl toluene found in the soil sample was detected at 11 ppm. However, the laboratory reported a detection limit for benzene and MTBE at 0.94 ppm and 19.0 ppm respectively, which exceed the required detection limit acceptable to this Department. The levels of petroleum vapors recorded by field soil testing ranged from non-detectable to as high as 1140 ppm in soil boring No. SB-3. The PES investigation did not include the installation of groundwater monitoring wells or collection of any groundwater samples. The depth of the soil borings ranged from 3 feet to 10 feet below grade and indicated the presence of materials, including, wet fill material, concrete, gravel, sand and refusal. A Geoprobe TM drill was used to collect the samples and was unable to penetrate some of the refusal at the site. The DEC recognized that the PBS facility was being upgraded to replace two aboveground 2,000 gallon diesel storage tank and piping systems with two new 6,000 gallon aboveground tanks. Moreover, the existing tanks passed inspections and tests for tightness following the closure and removal activities, and did not appear to be a direct source of the contamination. Rather, the consultant suggests that the contamination was likely the result of background contamination from historic fill material placed on the site. While

**S103941004**

this may provide a plausible explanation for the elevated levels of semi-volatile petroleum hydrocarbons or Polynuclear Aromatic Hydrocarbons (PAHs), it does not explain why there were elevated levels of volatile organic compounds (VOCs). The DEC is concerned that the presence of these VOCs may be the result of gasoline or diesel fuel spills on the parking lot area. Based upon these results the baseline site assessment performed, DEC requires additional investigatory and remedial actions pursuant to the requirements of 6 NYCRR Part 611 and Article 12 of the NYS Navigation Law. All areas with elevated VOC contaminated soils must be remediated. In this regard, GL has at least two options, A and B, as follows: A) If GL chooses to further assess the extent of petroleum contamination prior to remediation, then you must sample soils and/or groundwater around and below the boring sample location SB-3. The assessment must conform to DEC's Spill Prevention Operations Technology Series SPOTS 14) Site Assessments at Bulk Storage Facilities, dated August 1, 1994. B) If GL chooses to remediate the petroleum contamination prior to assessment, then you must excavate site soils around boring sample location SB-3. GL must then collect and analyze endpoint soil and samples below and/or groundwater around the excavation every 15- 20 linear feet, in accordance sampling guidelines referenced in DEC's SPOTS 14. In either event, GL should evaluate the quality of soils that are immediately surrounding the former boring location SB-3 for compliance with TAGM) Determination of Soil Cleanup Objectives and Cleanup Levels, dated January 24, 1994. GL should be advised to further document the nature of the fill material throughout the upper ten feet layer of the property, referenced by PES. All of the petroleum contaminated soils must be excavated and disposed off-site in accordance with 6 NYCRR Part 364. Polynuclear Aromatic Hydrocarbons (PAHs) - The report notes the presence of PAHs. We concur that these chemicals appear to be from fill material previously brought to the site. The concentration of PAHs in the various samples taken at the site have not been demonstrated to be a hazardous waste. It is suggested that you maintain a two-foot thick cover of clean soil or an equivalent protective layer of concrete or asphalt be placed on all areas where soils exceeded TAGM levels for PAHs at the Site. Wherever surface soils exist, you should place a clean 2 foot layer of soil. Any material brought to the site should not be a material that would be considered a regulated solid waste under 6 NYCRR Part 360. Any clean soil cover which is placed on the site should be properly landscaped to effect soil erosion control. This would effectively provide a protective layer to further eliminate the possible risk to human health from any subsurface soils that do not meet TAGM soil cleanup levels. GL must implement the required remedial actions to address the VOC contamination, and submit the results of the required confirmatory laboratory testing referenced in item No. 1, by April 1, 2002. In addition, GL should include a description of any additional actions taken to prevent possible exposure to PAHs in the subsurface soils at this site.

Remark: Caller was calling for greyhound they got the results back in december and found petroleum constituents in the soil. call the complaint.

Program: BCP  
 Site Code: 359020

**Actual:**  
**28 ft.**

Site Description: Location: The Site is located at 555 West 34th Street, also known as 400 Eleventh Avenue, between 10th and 11th Avenues in Manhattan, New York City, New York County. Site Features: The property is identified as Block 706, Lot 1 in New York City's tax records and consists of a 37,800 square-foot (1.02 acre) rectangular-shaped vacant parcel. The surrounding urban area consists primarily of retail and commercial business. Current Uses: Current use of this site is for commercial and industrial uses. Future use of this site will be for unrestricted use. Historical Use: The BCP Agreement was signed by the DEC on February 21, 2007. The Citizen's Participation Plan has been approved. A Remedial Investigation Report (RIR) and a Remedial Work Plan (RWP) have been approved. Site clean up work began on August 27, 2007. The majority of the site remediation was completed in March 2008. Currently, the NYC MTA is constructing an entrance to the new No.7 subway line extension in the middle of this BCP site.

Env Problem: Nature and Extent of Contamination: Two 4000 USTs were removed on 2006. Eight 550 gallon USTs abandoned in-place were removed in the fall of 2007. Of the 5 reported petroleum spills associated with this site, all are closed. Bedrock is at 17 to 24 feet deep. Contamination: Except in the Amtrak easement, all soil and suspected contaminants at this site, primarily from petroleum, have been removed to bedrock. These contaminants were impacting the soil and shallow groundwater. Areal/Depth Extent: The bedrock aquifer does not appear to be contaminated. The shallow groundwater aquifer is at 20 to 26 feet deep. The shallow groundwater contamination is basically from petroleum compounds, including MTBE. Concentrations: Metals contamination is not a problem at this site. The shallow groundwater was pumped and removed during the site excavation in 2007. Off-site contamination is not known but will be evaluated as part of this BCP Project.

Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Contact Name: JEROME KUNG  
Contact Phone: (212) 338-6754  
DEC Region: 2  
DER Facility ID: 294186  
DEC Memo: need to contact either jeff bohlen at envirotrack (631-471-1500) or Jerome Kung at verizon (212-338-6754) to determine what work is being done on the site. No letter has been sent yet. 06/21/05-SR// Spoke with jeff Bohlen(516-807-8983). He will forward all necessary documents to DEC. 10.07.05 Sharif is currently reviewing the subsurface investigation report submitted by Envirotrac. 3/20/06- DEC Piper reviewed tank closure report. As per report and database, there are two historic spills at the property, 9007995 and 9314833. In 1994, two 4K gasoline UST's were removed, and two 3K gasoline UST were installed. Samples collected from the limits of the excavation detected petroleum impacted soils in the vicinity of these USTs. Additionally, 8- 550 gal USTs are located in the basement of the property. These tanks were allegedly closed along w/ the two 4K gal USTs. SVOC's were detected exceeding NYSDEC TCLP guidance values. Spills 9007995 and 9314833 were closed on 8/6/96 after receipt of tank closure reports for the 2 4K USTs and 8- 550 USTs. In June-August 2005, seven (7) MWs were installed on site. Lab analytical revealed VOC's , SVOC's, and metals above TAGM 4046. Note: the groundwater was determined to be slightly to moderately saline. From Jan 6- 11, 2006, Envirotrac removed the two 3K gasoline USTs that were installed in 1994 and constructed of double wall fiberglass. A total of six (6) endpoint samples were collected from the excavation. With the exception of the West sidewall in which 226 ppb of benzene was detected, no other VOC's were detected above TAGM 4046. Additional excavation was performed in the area of the two- 4K UST remote fills and the two- 3K UST remote fills. Analytical results suggest that VOC's were not present above TAGM 4046, however SVOC's were. In additon to the sampling performed in reference to the UST's, soil samples were collected at the base of the Truck Elevator Shaft where it was determined that VOC's and SVOC's were detected above TAGM 4046, due to a bad seal. To minimize any future impact, the seals were replaced and vegetable oil was used in place of pet. based hydraulic oil. As per the report, the property is currently in negotiations to be sold. This party reportedly plans on razing the building and excavating to bedrock. ~45 feet bgs. In the meantime Envirotrac recommends quarterly sampling of the MW network. Referred to K. Tang 3/21/06 - reviewed the tank closure report. Soil and GW contamination is minimal, max GW VOCs is ~200 ppb and only one side wall sample is slight above TAGM 4046. Spill closed. - KST  
Remarks: DURING SOIL BORINGS FOUND OIL IN GROUND:

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

|   | Data Release Frequency: Quarterly      |

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

### DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

## ***Federal CERCLIS list***

### CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

|   | Data Release Frequency: Varies          |

## ***Federal CERCLIS NFRAP site List***

### CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/11/2011

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2011  
Date Data Arrived at EDR: 04/05/2011  
Date Made Active in Reports: 05/02/2011  
Number of Days to Update: 27

Source: Environmental Protection Agency

Data Release Frequency: Quarterly

### **RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/11/2011  
Date Data Arrived at EDR: 04/05/2011

### **RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2011  
Date Data Arrived at EDR: 04/05/2011

### NJ SHWS: Known Contaminated Sites in New Jersey

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

### **State and tribal leaking storage tank lists**

#### NY LTANKS: Spills Information Database

Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

## NY RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

## **State and tribal voluntary cleanup sites**

### NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

## ***State and tribal Brownfields sites***

### NY ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

### US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

|   | Data Release Frequency: Quarterly      |

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

|   |   |

|   | Data Release Frequency: Biennially     |

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## NY HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

## NY SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

Date of Government Version: 04/18/2011

## NY E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

## EDR PROPRIETARY RECORDS

### ***EDR Proprietary Records***

#### Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

## Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

East Map: 40073-F8 BROOKLYN, NY  
Most Recent Revision: 1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

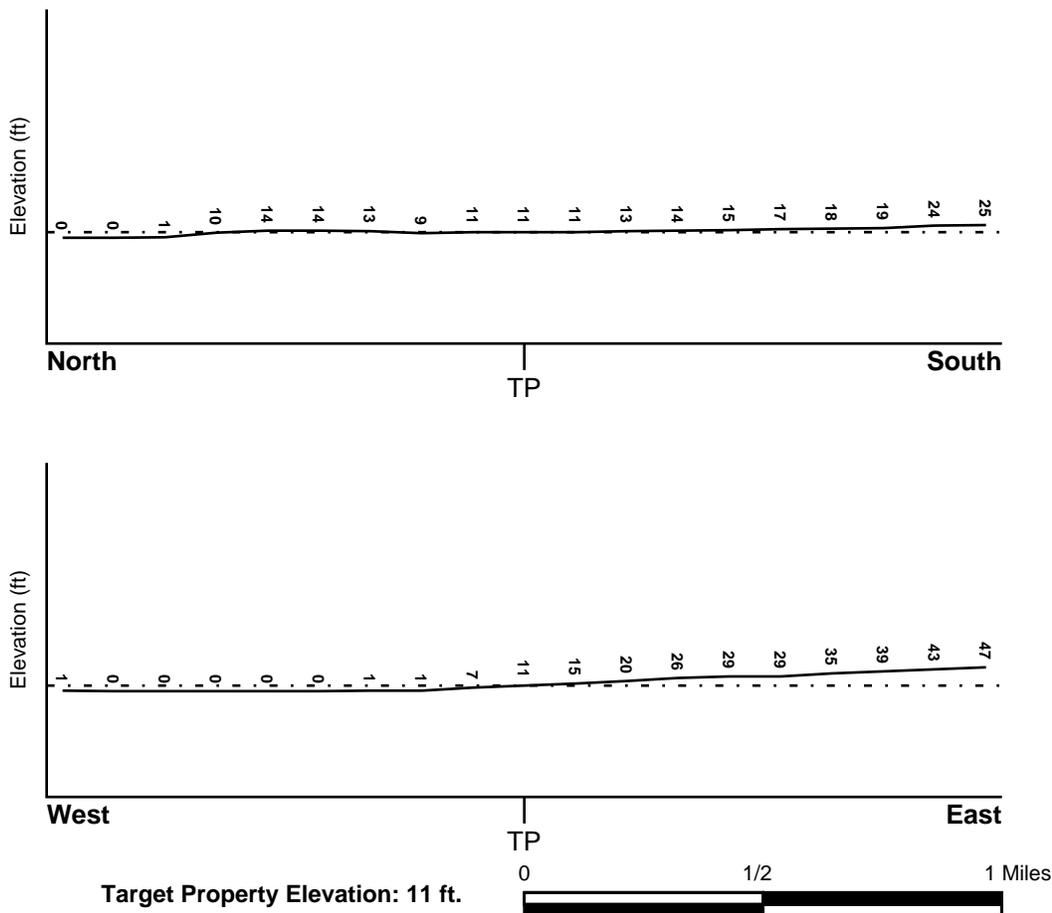

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

Target Property County

YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius: 1.25 miles  
Location Relative to TP: 1/4 - 1/2 Mile ENE  
Site Name: MANHATTAN GENERAL MAIL FACILITY  
Site EPA ID Number: NY618000352  
Groundwater Flow Direction: NOT AVAILABLE.  
Inferred Depth to Water: not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.  
Hydraulic Connection: Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site.  
Sole Source Aquifer: No information about a sole source aquifer is available  
Data Quality: Information is inferred in the CERCLIS investigation report(s)

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION</u><br><u>FROM TP</u> | <u>GENERAL DIRECTION</u><br><u>GROUNDWATER FLOW</u> |
|---------------|-----------------------------------|---|
| Not Reported  |                                   |   |

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

Era: Paleozoic  
System: Ordovician  
Series: Lower Ordovician and Cambrian carbonate rocks  
Code: OC (*decoded above as Era, System & Series*)

#### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

## OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Surficial Soil Types: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock  
very gravelly - loamy sand  
stratified  
sandy loam

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### New York Public Water Wells

Source: New York Department of Health

Telephone: 518-458-6731

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Database

Department of Environmental Conservation

Telephone: 518-402-8072

These files contain records, in the database, of wells that have been drilled.

### RADON

#### State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Dear Mr. McMahan:

NYSDEC/Region 2 has reviewed your request for the above referenced records under New York State's Freedom of Information Law (FOIL). Please note that most of our records are filed by number under the names of individuals or corporations. We have no way of locating or retrieving records if they are filed under names or addresses other than those you have provided.

If no records have been located, this does not necessarily mean, and should not be interpreted to mean that There have never been any violations, complaints, claims, investigations or inquiries involving those names or addresses. We cannot make any representations as to whether there are or have been any such violations, complaints, claims, investigations or inquiries.

After a diligent search of Region 2 available files, no records could be located for the names and/or addresses you provided.

Please email your future FOILs to Region directly to the following email address: [r2foil@gw.dec.state.ny.us](mailto:r2foil@gw.dec.state.ny.us)

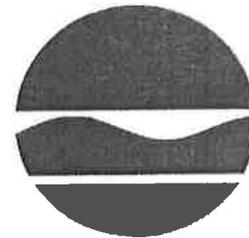

Thank you for your request. If additional information is needed, please call Gloria Silva/Or Cynthia Whiting/FOIL Secretary at (718) 482-4507, or email me at: [r2foil@gw.dec.state.ny.us](mailto:r2foil@gw.dec.state.ny.us)

Sincerely yours,

Joe Martens  
Commissioner

July 25, 2011

Chris McMahon  
Langan Engineering  
River Drive Center 1  
Elmwood Park, NJ 07407

Dear Mr. McMahon:

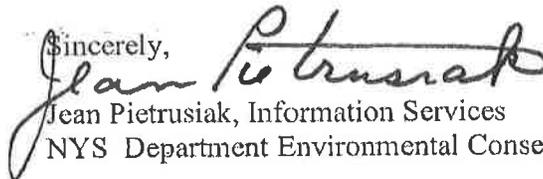

In response to your recent request, we have reviewed the New York Natural Heritage Program database with respect to an Environmental Assessment for One Lot, a two story building, Project # 1002 42 701, site as indicated on the map you provided, located at 508-518 West 24<sup>th</sup> Street, Manhattan.

Enclosed is a report of rare or state-listed animals and plants, significant natural communities, and other significant habitats, which our databases indicate occur, or may occur, on your site or in the immediate vicinity of your site. For most sites, comprehensive field surveys have not been conducted; the enclosed report only includes records from our databases. We cannot provide a definitive statement as to the presence or absence of all rare or state-listed species or significant natural communities. This information should not be substituted for on-site surveys that may be required for environmental impact assessment.

The enclosed report may be included in documents that will be available to the public. However, any enclosed maps displaying locations of rare species are considered sensitive information, and are intended only for the internal use of the recipient; they should not be included in any document that will be made available to the public, without permission from the New York Natural Heritage Program.

The presence of the plants and animals identified in the enclosed report may result in this project requiring additional review or permit conditions. For further guidance, and for information regarding other permits that may be required under state law for regulated areas or activities (e.g., regulated wetlands), please contact the appropriate NYS DEC Regional Office, Division of Environmental Permits, as listed at [www.dec.ny.gov/about/39381.html](http://www.dec.ny.gov/about/39381.html).

Our databases are continually growing as records are added and updated. If this proposed project is still under development one year from now, we recommend that you contact us again so that we may update this response with the most current information.

Sincerely,  
  
Jean Pietrusiak, Information Services  
NYS Department Environmental Conservation

## Natural Heritage Report on Rare Species and Ecological Communities

NY Natural Heritage Program, NYS DEC, 625 Broadway, 5th Floor,  
Albany, NY 12233-4757  
(518) 402-8935

~The information in this report includes only records entered into the NY Natural Heritage databases as of the date of the report. This report is not a definitive statement on the presence or absence of all rare species or significant natural communities at or in the vicinity of this site.

~Refer to the User's Guide for explanations of codes, ranks and fields.

~Location maps for certain species and communities may not be provided 1) if the species is vulnerable to disturbance, 2) if the location and/or extent is not precisely known, 3) if the location and/or extent is too large to display, and/or 4) if the animal is listed as Endangered or Threatened by New York State.

2 Records Processed

More detailed information about many of the rare and listed animals and plants in New York, including biology, identification, habitat, conservation, and management, are available online in Natural Heritage's Conservation Guides at [www.acris.nynhp.org](http://www.acris.nynhp.org), from NatureServe Explorer at <http://www.natureserve.org/explorer>, from NYSDEC at <http://www.dec.ny.gov/animals/7494.html> (for animals), and from USDA's Plants Database at <http://plants.usda.gov/index.html> (for plants).

More detailed information about many of the natural community types in New York, including identification, dominant and characteristic vegetation, distribution, conservation, and management, is available online in Natural Heritage's Conservation Guides at [www.acris.nynhp.org](http://www.acris.nynhp.org). For descriptions of all community types, go to <http://www.dec.ny.gov/animals/29384.html> and click on Draft Ecological Communities of New York State.

**HOW TO REQUEST DATA FOR A PROJECT SITE**  
**from the New York Natural Heritage Program**

Requests should be submitted in writing. Please send a request letter which provides all of the following information. We will provide a report on the rare species of plants and animals, and on the significant ecological communities, which are or may be in the vicinity of the project site.

Requests for data from the New York Natural Heritage Program are handled in the order in which they are received. Faxed requests are discouraged due to the poor quality of faxed maps. Since our office receives many requests each day, we strongly encourage you to contact us during the early stages of a project. You will receive the official response in writing.

**NECESSARY INFORMATION.** In order for us to determine what data you are requesting and respond to your request more quickly, the following information should be included. If your request lacks this information, our response will be delayed.

1. Write a brief description of the proposed project or activity (e.g., residential development, landfill siting, bridge repair, cellular communication tower). Include the current use of the project site.
2. Tell us why you need the data (e.g., environmental assessment under SEQR, wetland permit, management plan, town planning). Include any documents which are expected to include the data (e.g., EAF, DEIS, Phase I Assessment), and, if applicable, the Lead Agency for SEQR review.
3. Include the name of all counties and towns where the proposed project is located.
4. Include the name of all 7 1/2 minute U.S.G.S. topographical maps where the proposed project is located.
5. Include a photocopy of the appropriate 7 1/2 minute (1:24,000 or 1:25,000 scale) U.S.G.S. topographical or NYS DOT planimetric map(s), at a scale that includes identifiable geographic features. The preferred map size is 8 1/2" x 11". Tax maps, architectural drawings, aerial photography, or road maps are generally not useful.
6. Clearly mark the boundary of the proposed project with a colored pen or highlighter.

**EXAMPLE OF A COMPLETE DATA REQUEST:**

"A 250 unit housing development is proposed for 400 acres in the Town of Red Hook, Dutchess County. The site is currently undeveloped, and mostly wooded with some former agricultural fields. We have been contracted to review the environmental impacts of the project and prepare the Environmental Assessment Form under SEQR, to be reviewed by the Town of Red Hook acting as Lead Agency. In order to complete the EAF, we will need to know whether the proposed project would likely impact any ecologically significant areas or rare species of plants or animals. Enclosed is a photocopy of the Saugerties USGS quadrangle showing the location of the proposed development in red."

**WHERE TO SEND YOUR DATA REQUEST:**

Information Services  
~~New York Natural Heritage Program~~  
New York State Department of Environmental Conservation  
625 Broadway, 5<sup>th</sup> Floor  
Albany, New York 12233 -4757  
phone: (518) 402-8935 fax: (518) 402-8925

att J. Petrusiak

*Handwritten notes:*  
- Arrow pointing to item 1  
- "The description of project" (written diagonally across items 5 and 6)  
- "Request" (written vertically on the right side)  
- "Thanks" (written at the bottom right)

Re: Freedom of Information Law Request (FOIL) # 71157

Caswell F. Holloway  
Commissioner

Vincent Saplenza, P.E.  
Deputy Commissioner  
Bureau of Wastewater  
Treatment

96-05 Horace Harding Expwy  
Corona, NY 11368

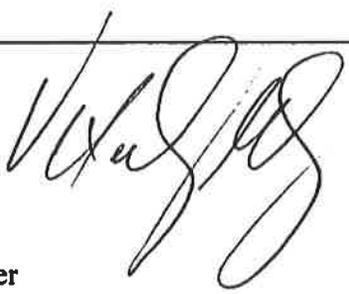

Tel. (718) 595-4906  
Fax (718) 595-6950  
vsaplenza@dep.nyc.gov

Dear Sir or Madam:

I am writing in response to your FOIL request (see attached). This response specifically addresses only those aspects of your request related to the discharge of wastewater or other materials to a New York City public sewer. As this letter only pertains to records in the custody of the Division of Pollution Control and Monitoring, if your request was also directed to other divisions within the Bureau of Wastewater Treatment or to other bureaus within the Department of Environmental Protection, then you will receive a separate response from those divisions or bureaus.

Concerning your request, the **Division of Pollution Control and Monitoring:**

- cannot identify the requested location because \_\_\_\_\_
- after search, has not identified any records responsive to your request.
- has identified records responsive to your request. Please telephone me at (718) 595-4756 to arrange for an appointment to review the information.
- other \_\_\_\_\_

Sincerely, 

Vitaly Weiler  
FOIL Liaison  
Division of Pollution Control and Monitoring

8 July 2011

FOIL #71157

Re: Request for Review of Information  
508 West 24<sup>th</sup> Street  
Tax Map Block 695, Lot 44  
Manhattan, New York 10011  
Langan Project No. 100242701

Dear Mr. Prero:

Langan Engineering and Environmental Services, Inc. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting a general records search for the above-referenced property. Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, ground water sampling, asbestos abatement, radon, hazardous materials, and any other documents that your office may have regarding the above-referenced property.

The subject property consists of one lot located at 508-518 West 24<sup>th</sup> Street (Block 695 Lot 44,47). The site contains a 2-story building with a 7,406 sq. ft. footprint. The building is currently owned by Metro Group International Inc.

If possible, please fax me a response to (201) 794-6913 and send a hard-copy response to my attention at the address listed below.

Please contact me at (201) 398-4899 ext. 4434 if there are any questions regarding this request. Thank you in advance for your assistance.

Sincerely,

Langan Engineering and Environmental Services, Inc.

Dear Mr. Bonafide:

As part of an Environmental Site Assessment for the above-referenced site, Langan Engineering and Environmental Services, Inc. is seeking any available information regarding the potential presence of archaeological/historical resources in the site area. A site location map is enclosed.

The subject property consists of one lot located at 508-518 West 24<sup>th</sup> Street (Block 695 Lot 44,47). The site contains a 2-story building with a 7,406 sq. ft. footprint. The building is currently owned by Metro Group International Inc.

If possible, please fax me a response to (201) 794-6913 and send a hard-copy response to my attention at the address listed below.

Please contact me at (201) 398-4899 ext. 4434 if there are any questions regarding this request. Thank you in advance for your assistance.

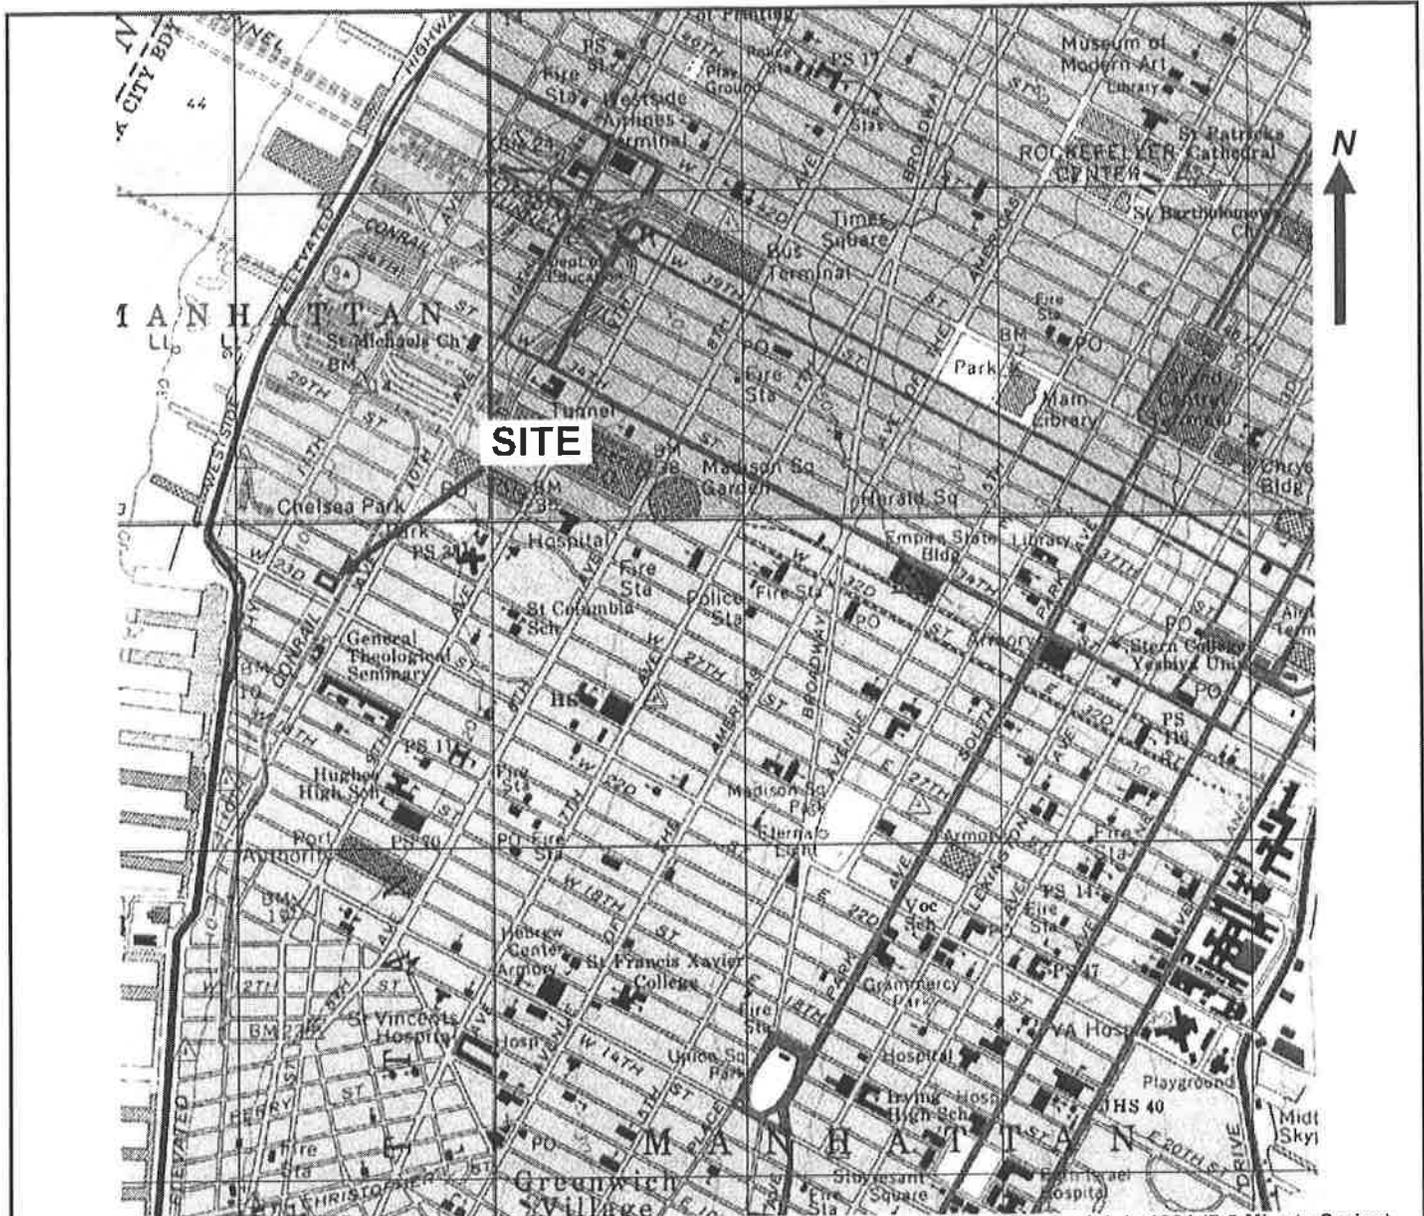

Sincerely,

508 West 24<sup>th</sup> Street  
Tax Map Block 695, Lot 44  
Manhattan, New York 10011  
Langan Project No. 100242701**

Dear Ms. Pietrusiak:

Langan Engineering and Environmental Services, Inc. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting information regarding the presence of critical habitat/ endangered species within a ½ mile radius of the subject property.

The subject property consists of one lot located at 508-518 West 24<sup>th</sup> Street (Block 695 Lot 44,47). The site contains a 2-story building with a 7,406 sq. ft. footprint. The building is currently owned by Metro Group International Inc.

If possible, please fax me a response to (201) 794-6913 and send a hard-copy response to my attention at the address listed below.

Please contact me at (201) 398-4899 ext. 4434 if there are any questions regarding this request. Thank you in advance for your assistance.

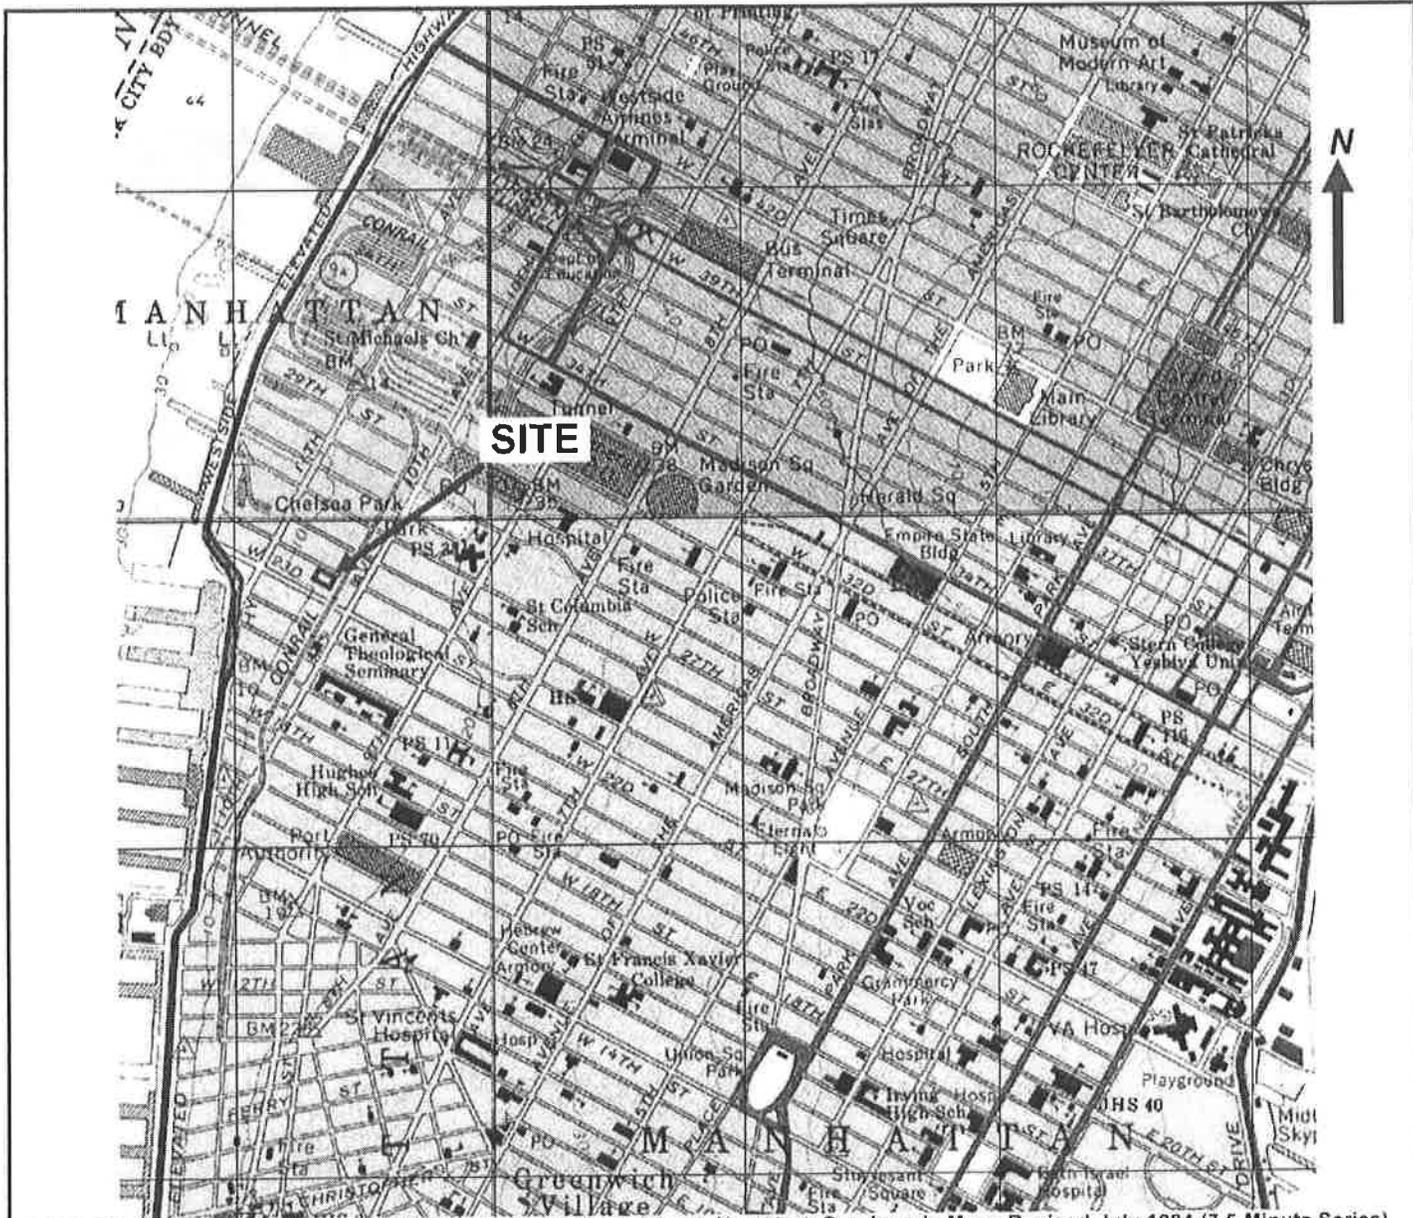

Sincerely,  
**Langan Engineering and Environmental Services, Inc.**

Chris McMahon

**Re: Request for Review of Information  
508 West 24<sup>th</sup> Street  
Tax Map Block 695, Lot 44  
Manhattan, New York 10011  
Langan Project No. 100242701**

Dear Ms. Earl:

Langan Engineering and Environmental Services, Inc. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting a general records search for the above-reference property. Attached is the NYSDEC Freedom of Information form. Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, ground water sampling, asbestos abatement, radon, hazardous materials, and any other documents that your department may have regarding the above-referenced property.

The subject property consists of one lot located at 508-518 West 24<sup>th</sup> Street (Block 695 Lot 44,47). The site contains a 2-story building with a 7,406 sq. ft. footprint. The building is currently owned by Metro Group International Inc.

If possible, please fax me a response to (201) 794-6913 and send a hard-copy response to my attention at the address listed below.

Please contact me at (201) 398-4899 ext. 4434 if there are any questions regarding this request. Thank you in advance for your assistance.

Sincerely,

**Langan Engineering and Environmental Services, Inc.**

508 West 24<sup>th</sup> Street  
Tax Map Block 695, Lot 44  
Manhattan, New York 10011  
Langan Project No. 100242701**

Dear Ms. Lewis:

Langan Engineering and Environmental Services, Inc. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting a general records search for the above-reference property. Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, ground water sampling, asbestos abatement, radon, hazardous materials, and any other documents that your office may have regarding the above-referenced property.

The subject property consists of one lot located at 508-518 West 24<sup>th</sup> Street (Block 695 Lot 44,47). The site contains a 2-story building with a 7,406 sq. ft. footprint. The building is currently owned by Metro Group International Inc.

If possible, please fax me a response to (201) 794-6913 and send a hard-copy response to my attention at the address listed below.

Please contact me at (201) 398-4899 ext. 4434 if there are any questions regarding this request. Thank you in advance for your assistance.

Sincerely,

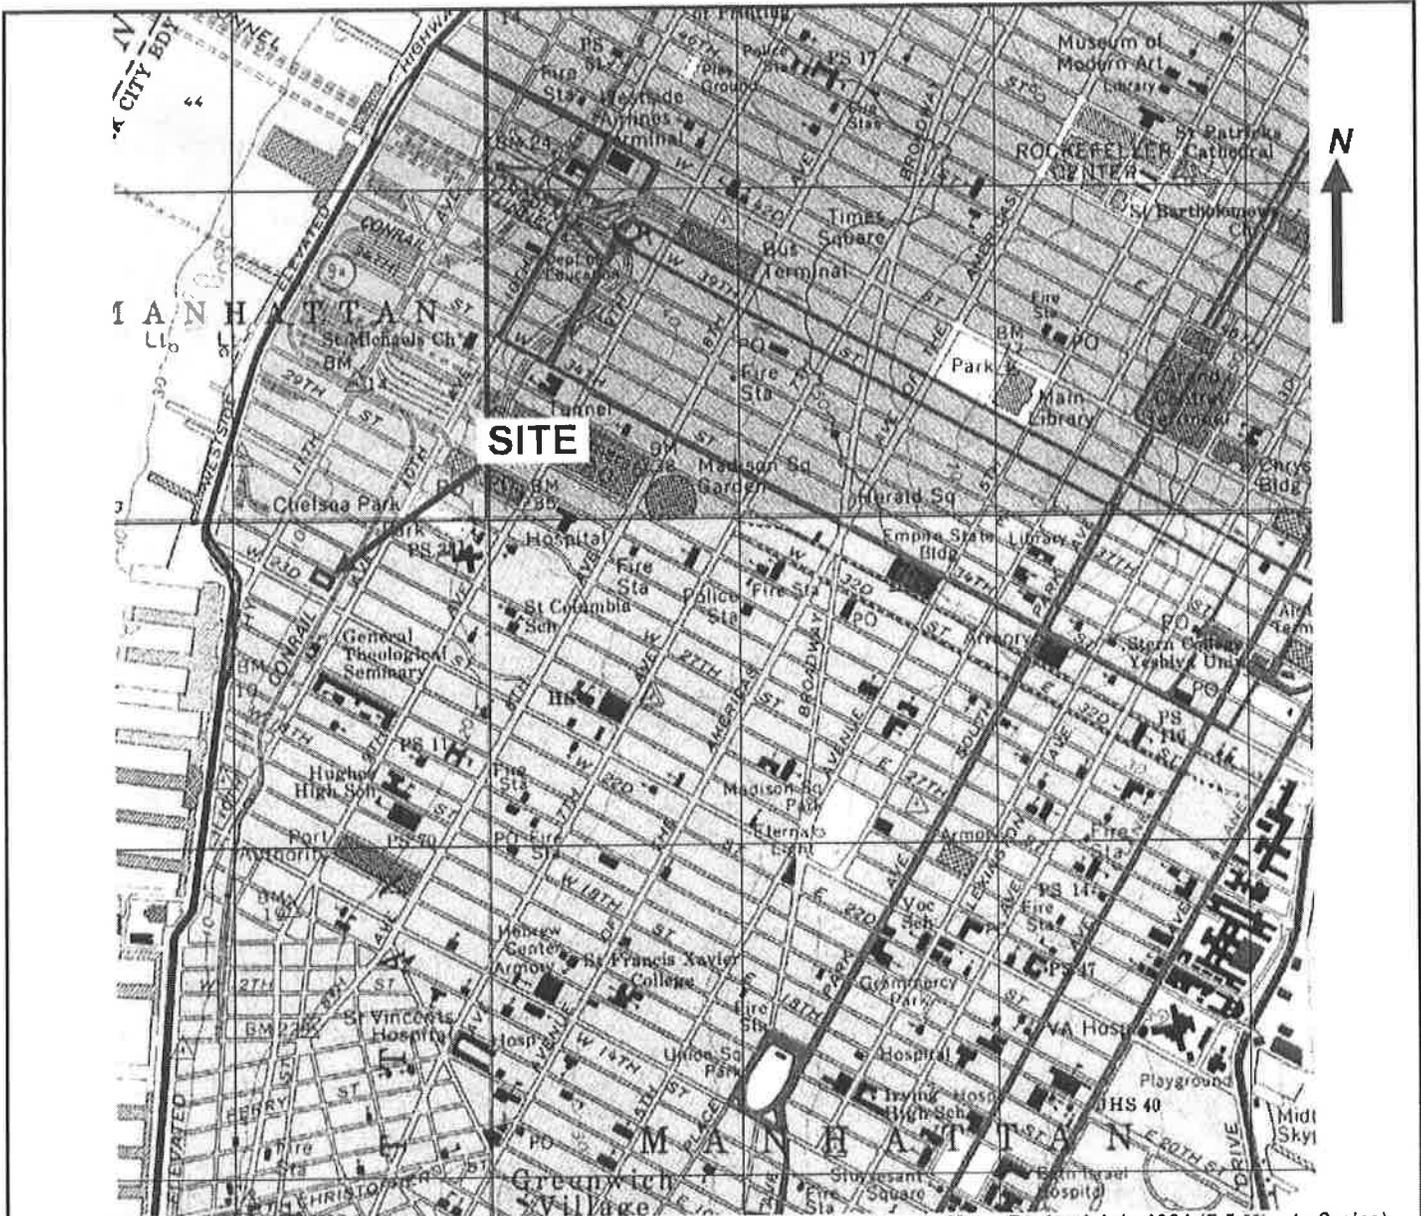

**Langan Engineering and Environmental Services, Inc.**

Christopher McMahon  
Senior Staff Geologist

Dear Mr. Laws:

Langan Engineering and Environmental Services, Inc. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting a general records search for the above-reference property. Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, hazardous materials, and any other documents that your department may have regarding the above-referenced property. In particular, we are interested in the results of a storage tank permit search for any records pertaining to the storage of fuel oil, motor oil, gasoline, or other hazardous or flammable liquids that your department may have. Please find the record search request form with the required search fee enclosed.

The subject property consists of one lot located at 508-518 West 24<sup>th</sup> Street (Block 695 Lot 44,47). The site contains a 2-story building with a 7,406 sq. ft. footprint. The building is currently owned by Metro Group International Inc.

If possible, please fax me a response to (201) 794-6913 and send a hard-copy response to my attention at the address listed below.

Please contact me at (201) 398-4899 ext. 4434 if there are any questions regarding this request. Thank you in advance for your assistance.

Sincerely,

**Langan Engineering and Environmental Services, Inc.**

**SUMMARY QUALIFICATIONS**

In his 8 years experience as a consulting Geologist, Mr. McMahon has worked on projects for commercial, residential, and public facilities in four states including Pennsylvania, New York, New Jersey, and Connecticut, under various EPA, USACOE, PADEP, NJDEP, and NYSDEC programs, as well as, varying client protocols.

These projects have included the completion of Phase I environmental site assessments and the design and oversight of Phase II investigations of soil, sediments, groundwater, surface water, soil gas, and air. These projects have required coordination of records acquisition and environmental sampling, construction/demolition activities, wetland permitting issues, and report submittals with site development plans. Mr. McMahon also has significant field experience including implementation and management of all phases of environmental projects involving soil, sediment, groundwater, surface water, and soil vapor contamination including Phase I inspections, Phase II site investigations, Remedial Investigations, and Remedial Actions.

Many of these projects have included his oversight of remedial actions to clean up or mitigate hazardous waste sites in rural, urban, and industrial settings. These remedial action designs have included in-situ soil remedial injections, contaminated soil removal/disposal management plans, and soil vapor intrusion mitigation systems including advanced vapor barriers and sub-slab depressurization systems.

**RELEVANT EXPERIENCE**

**NYSDEC (Region 7) Site Remedial Investigation**

Project Geologist at a former industrial facility in Hillcrest, New York. Responsibilities included installation and sampling of soil gas implants, indoor, and sub-slab air sampling according to NYSDEC and DOH standards. Coordinated and directed junior field staff for the field investigation, directed remedial investigation contractor coordination, and completed preliminary reports.

## **Christopher McMahon**

---

### **Former Manufactured Gas Plant Site Remedial Investigation**

Project Geologist at a Former MGP site in Geneva, New York. Responsibilities included excavation of test pits, installation of bedrock and overburden monitoring wells, bedrock core logging, borehole geophysical surveys and hydraulic conductivity surveying. Sampling responsibilities included groundwater, soil, surface soil and water, sediment and indoor air. Also responsible for subcontractor coordination.

### **NYSDEC (Region 2) Superfund Site Remedial Investigation**

Project Field Geologist at a former dry-cleaning supplies warehouse in Jamaica, Queens, New York. Responsibilities included supervising subcontractors, collecting soil, groundwater, and soil gas samples for laboratory analysis, coordinating hazardous waste disposal, and vendors, and monitoring air quality to conform with URS health and safety standards. The site was located on a busy commercial parking lot, which required daily coordination with client.

### **NYSDEC (Region 5) Superfund Site Remedial Investigation**

Project Field Geologist at a former HAZMAT fire training area in Whitehall, New York. Responsibilities included supervising subcontractors, collecting environmental samples, conducting slug tests to estimate the hydraulic conductivity of various soil facies. The data collected was used in GIS to predict the rate of contaminant migration, which helped close the site. Coordination of field staff, vendors, and business owners at a neighboring site were essential to the successful completion of this project.

### **Former Manufactured Gas Plant Site Investigation/Confidential Client**

Field Geologist for a bedrock investigation at a former MGP facility in Mechanicville, New York. Responsible for supervision of subcontractors, and collection of environmental samples.

### **Remedial Investigation of Industrial Facility/Confidential Client**

Field Geologist responsible for soil gas survey at a former industrial facility in Batavia, New York. Responsibilities included supervision of junior field staff, set-up and operation of field monitoring equipment, and installation and collection of Gore-sorbors.

### **OGS Geotechnical Survey for Construction**

Field Geologist responsible for conducting a geotechnical investigation at an active medium security prison in Rome, New York. Responsible for supervising subcontractor, coordinating with OGS and collecting geotechnical samples for a construction site.

### **Report Tabulation/Various Clients**

Compile and organize historical soil, groundwater elevations, and groundwater analytical data using Microsoft excel, access, word, adobe acrobat and other software programs. Information is utilized for the construction of maps and cross-sections to evaluate the nature, extent and fate of soil and groundwater contamination. Also Bentley Microstation for the generation of engineering maps.

**EDUCATION**

Montclair State University, New Jersey: M.S. Geology  
Montclair State University, New Jersey: M.A. Environmental Science  
Cook College, Rutgers University, New Jersey: B.S. Environmental Science

**PROFESSIONAL REGISTRATIONS**

Underground Storage Tank Certification, New Jersey  
AHERA Asbestos Inspector  
Professional Geologist - DE, KY  
Licensed Environmental Professional - CT

**YEARS OF EXPERIENCE: 25**

**SUMMARY QUALIFICATIONS**

Mr. Ciambuschini has over twenty-five years experience in hydrogeologic and environmental investigations including management of environmental and geotechnical investigations relating to petroleum and chlorinated solvent spill sites, underground storage tank sites, manufactured gas plant sites, landfills, wastewater treatment facilities and industrial/commercial sites. His experience includes managing environmental compliance audits, remedial investigation, pre-acquisition due diligence and permitting assessment, feasibility studies and design, construction and operation of complex innovative remediation systems to treat, contain and recover contaminated soil and groundwater. These projects are managed under various NJDEP, PADEP, NYDEC, NYCDEP and CTDEP programs. Mr. Ciambuschini provides consultation to a diverse group of clients including private developers, utilities, retail and industrial facilities and is expert in assessing remediation options and funding options under various state and federal grant, loan and tax reimbursement programs including Brownfield programs.

**RELEVANT EXPERIENCE**

**Former Petroleum Refinery - Nassau County, New York (Brownfield)** – Senior Project Manager for remediation of a former oil storage and distribution facility on a 15-acre site to allow for retail redevelopment. Remedial investigation including conventional soil and groundwater drilling and sampling programs to assess the extent of shallow petroleum and deep chlorinated volatile organic contamination, aquifer testing and assessment of tidal influence on groundwater flow and nutrient concentrations in groundwater, geophysical assessment of stratigraphic zones and contaminant pathways and pre-design assessment of physical and chemical soil properties. Remedial design and pilot testing for oil recovery from an upper aquifer zone included biosparging in conjunction with separate phase groundwater recovery and remediation for an underlying sand unit included chemical oxidation in conjunction with biosparging/biotreatment as a polishing stage. Design of a multi-layered sub-slab soil venting and monitoring system was also conducted to allow for future site reuse.

## **STEVEN CIAMBRUSCHINI, P.G., L.E.P.**

### **Senior Associate**

---

**Unilever USA - New Jersey (State Hazardous Waste Sites, RCRA, ISRA)** – Conducted and designed remedial investigations that included soil and groundwater sampling, geophysical surveys, CPT, aquifer testing and ecological risk assessment (sediment sampling and bioassay) to assess impacts to glacial lacustrine sediments and fractured bedrock (along the Ramapo Fault) in former UST, lagoon and manufacturing areas of former pharmaceutical and textile plants. Designed cost effective biosparging and nutrient recirculation systems to address the presence of petroleum and chlorinated solvent impact to soil, groundwater, surface water and onsite wetlands and coordinated wetland permitting to allow for excavation and mitigation of impacted wetland areas. Innovative technologies including thermal treatment and biosparging have been utilized or proposed to address deep, compact soils while conventional techniques including deep excavation using sheeting and dewatering have been conducted to address more accessible impacted areas. Data management tools including EQUIS, GIS and GINT are utilized to manage data generated from on going sampling of over 40 monitoring wells and operation and monitoring of various remediation systems.

**Pan Graphics – Bergen County, New Jersey (ISRA)** – Senior project manager for investigation and remediation of a former chromium plating facility. Detailed investigation of chromium impacts to soil, groundwater and onsite structures and completion of remediation using insitu injection of calcium polysulfate to address onsite contamination. Offsite investigation conducted to assess impacts to subsurface utilities and adjoining residential buildings. Offsite receptor survey and risk assessment completed and remedial alternatives currently being evaluated.

**New Jersey Turnpike – Various Sites** - Senior project manager for General Environmental Services contract for the New Jersey Turnpike and Garden State Parkway. Key completed projects included sampling and risk assessment survey of air quality at toll booths along facility roadways; training, permitting and coordination associated with the NJ Stormwater Quality Regulations for Roadway and Maintenance facilities; Remedial Investigation and development of Remedial Alternatives for a former landfill and tar manufacturing site located along the Turnpike; development of a environmental permitting guide for use by all NJ Turnpike employees to determine permitting requirements and schedules for roadway projects, numerous underground storage tank closures at office and maintenance facilities; and natural resource permitting including threatened and endangered species surveys, wetlands surveys and permitting and Pinelands permitting at multiple facilities.

**Watermark North Bergen, New Jersey (Voluntary Cleanup)** - Completed remedial investigation, development of soil management and Health and Safety Plans and associated monitoring and submittals documenting implementation of engineering and institutional controls at a residential development completed on impacted fill material. Coordination with Langan's geotechnical and civil engineering disciplines was required in order to maximize soil reuse options, properly manage impacted groundwater during construction (design of waterproof subsurface building areas) and document site wide cap within a Remedial Action Report. Biennial Certification is currently being conducted to document maintenance of the site wide engineering control.

**Flintkote Site, East Rutherford, New Jersey (Voluntary Cleanup)** - Investigation and Remediation of a former asphalt roofing manufacturing facility. Investigation included subsurface investigation within and outside of existing building to delineate the extent of tar impacted soil and groundwater, geophysical investigation to assess the presence of USTs, delineation of contamination associated with large ASTs and subsurface holding tanks and associated piping. Asbestos and lead-base paint surveys of the existing building was also completed. Remediation

## **STEVEN CIAMBRUSCHINI, P.G., L.E.P.**

### **Senior Associate**

---

including removal of No. 6 fuel oil USTs, soils impact by PCBs, metals and dioxin, and containment of NAPL associated with discharges of No. 6 oil and roofing tar.

**Liberty Science Center, New Jersey ( EO 215)** – Completed Environmental Assessment Survey (EAS) and Preliminary Assessment and Site and Remedial Investigation of a former landfill and railyard facility in conjunction with initial construction and subsequent expansion of the LSC facility. Completion of soil management plan and oversight of soil management and health and safety monitoring associated with onsite reuse and capping of impacted soil during construction. Designed and provided installation oversight of a subslab methane venting system for the building expansion and submitted Remedial Action Reports and subsequent certifications of engineering controls during various phases of construction.

**Con Edison Appendix B Spill Sites** - This program includes investigation and remediation of spills of dielectric and fuel oil feeder lines throughout NYC. Detailed assessment using geophysical surveys, mapping, and drilling techniques to assess the location of utility corridors below heavily trafficked roadways and contaminant migration pathways is conducted and coordinated with various city agencies including MTA, DOL, and NYCDOB. Langan has designed, installed, maintained and operated oil recovery systems and coordinated cleanup of dielectric fluid spills into subsurface structures including subways within and below the most heavily traveled roadways in Manhattan. Under Langan's guidance, fifteen sites have been assessed, remediated and cases closed by NYSDEC. Numerous product recovery systems are currently being operated and continue to recover hundreds of gallons of oil impacted groundwater via cost efficient skimming and recovery methods.

**Blue Back Square - West Hartford, CT (UST, Transfer Act, Brownfield)** - Project manager responsible for environmental engineering for the urban redevelopment of downtown West Hartford at a former automobile repair garage. BBS is a million square foot mixed-use development consisting of residential, office, retail, municipal parking garages, public buildings and public spaces. In order to allow for site redevelopment, Langan was tasked with delineated the extent of impacted soil and groundwater in the area of underground storage tanks, hydraulic lifts, former repair and painting areas and floor drains and designing an implementing a soil management plan during construction to allow for reuse of geotechnically suitable soils below proposed building areas. In addition to coordination of health and safety and soil reuse requirements during site work, Langan provided required documentation of remediation (soil excavation, disposal and reuse) as the Licensed Environmental Professional for the project and designed and is currently implementing a groundwater monitoring program in conjunction with permitting for building sump designs for discharge in impacted groundwater and use of sub-slab venting systems to address volatilization of contaminants from groundwater into buildings to allow for continued use of the site.

**Former MGP Site – Brooklyn, New York (VCP Site)** – Project director responsible Site activities including installation of test borings and monitoring wells, excavation of petroleum impacted soils, pilot testing of vapor extraction and thermal remediation technologies were conducted to address contamination at a former Brooklyn Union Gas site. Langan is currently assessing remediation options, vapor collection/treatment, and long-term ground water monitoring requirements in former gas-holder areas to allow for construction of retail buildings.

## **STEVEN CIAMBRUSCHINI, P.G., L.E.P.**

### **Senior Associate**

---

**Stop and Shop – Emerson, New Jersey** - Project director responsible for Preliminary Assessment, Site and Remedial Investigation and Remedial Action of a former dry cleaning, metals plating and maintenance facility. Investigation included soil and groundwater assessment and geophysical surveys and remediation included removal of underground storage tanks, subsurface holding tanks and conveyance piping and demolition and decontamination of former building structures. Groundwater monitoring is currently being conducted in accordance with a CEA to assess both onsite and offsite TCE concentrations.

**Brooklyn Law School – Brooklyn, New York (DEC Spill Response Site)** – Conducted pre-construction Site/Remedial Investigation activities to assess the extent and impact of petroleum spills from past dumping and underground storage tank discharges. Investigation activities included completion of test pits, test borings and monitoring wells, and review of previous, existing, and proposed site topographic conditions to assess extent of contaminated fill materials, native soil and soil disposal/reuse options.

**Greenwich Street Site – Manhattan, New York (DEC, DEP Spill Response Site)** – Conducted Preliminary Assessment and Site/Remedial Investigation activities to assess the type and extent of petroleum and chlorinated solvent contamination resulting from past spills from former USTs, fuel oil feeder lines and dry wells at historical garage, industrial and residential facilities. Site Investigation and Remedial Investigation Workplans and Reports and a Health and Safety Plan for proposed site construction were prepared by Langan for submittal to NYSDEC – Division of Environmental Remediation, NYCDEP and the NYC Bureau of Standards and Appeals. A Remediation Plan including hot spot excavation, soil reuse and site capping was approved to these agencies based on a risk-based remedial alternatives analysis.

**Proposed Supermarket Sites – North White Plains and White Plains, New York (WCHD Lead Sites)** – Conducted site investigations consisting of soil and groundwater sampling at former dry cleaners, auto dealership and repair shop sites to assess impacts of discharges of petroleum contamination from underground storage tanks and hydraulic lifts and feeder lines and of chlorinated solvents from dry cleaning and degreasing operations. Remedial activities included UST removals, and soil excavation and offsite disposal. No further action recommendations were approved by the Westchester County Health Department regarding petroleum releases. Ongoing ground water monitoring is currently being conducted as part of a Voluntary Cleanup Agreement with NYSDEC.

**Dayton Plaza – Queens, New York (Inactive Hazardous Waste Site)** – Completed Site and Remedial Investigation activities including a completion of test borings and monitoring wells, air sampling to assess contaminant volatilization issues, geoprobe sampling and a tidal elevation survey to assess the extent of chlorinated solvent contamination resulting from past discharges from a dry cleaners. Designed, installed and operated an air sparing/soil vapor extraction system to address elevated levels of tetrachloroethene and vinyl chloride in ground water. The site is currently listed as a Classification 2 Inactive Hazardous Waste Site. As operation of the SVE/AS system has resulted in decreasing contaminant concentrations in soil and ground water, a petition for reclassification has been filed.

## **STEVEN CIAMBRUSCHINI, P.G., L.E.P.**

### **Senior Associate**

---

**Former Macy's Facility – Bloomfield, New Jersey** (Voluntary Cleanup – Asbestos/Demolition) Managed/coordinated Remedial investigation and Remedial Action activities to address areas of concern including underground storage tanks and past discharges of chlorinated solvents. Prepared demolition/asbestos specifications for a 500,000 ft<sup>2</sup> building and managed air monitoring and demolition/construction activities relating to the former building and proposed retail building.

**Stop & Shop/Edwards Food Stores – Retail/Supermarket Development** – Various projects in New Jersey, New York, Pennsylvania and Connecticut requiring completion of Phase I and Phase II Assessments prior to proposed site redevelopment. Coordination and oversight of Remedial Investigation and Remedial Action activities including underground storage tank removals, asbestos abatement, and lead-based paint abatement. Preparation/submittal and review of cleanup plans and bid specifications for completion of investigation/abatement activities and for review by local/state/federal agencies under voluntary cleanup, Brownfields, Underground Storage Tank, Property Transfer Act, and Environmental Quality Act regulations.

**Rubin Organization/Retail Facility, Warrington, Pennsylvania** – (Pre-construction Surveys) – Conducted Phase I and Phase II investigations addressing issues including underground storage tanks, asbestos abatement and building demolition. Prepared Hydraulic Investigation regarding surface water drainage issues and impact to groundwater concerns regarding karstic terrain.

**Westwood Linen Company, Westwood, New Jersey** (Voluntary Cleanup – Demolition/Redevelopment) Completion of Phase I Assessment, Remedial Investigation and Remedial Action activities at a 70 year old laundry/dry cleaner facility. Remedial investigation activities included aquifer testing and delineation of chlorinated solvents in groundwater, delineation of pesticide contaminated soil and an assessment of impacts to onsite and offsite ecological receptors (wetlands). Remedial Action included excavation, offsite disposal and site restoration of a large area of pesticide contaminated soil. Coordination with site developer and lenders regarding asbestos abatement, tank removals and well abandonment for proposed site redevelopment.

**Halby Chemical Sites, Delaware** (CERCLA) - Field operations leader responsible for implementation of sampling operations and sampling QC. Preparation of Preliminary Assessment Report and review of Ecological Risk Assessment issues.

**Scientific Chemical Processing, Carlstadt, New Jersey** (CERCLA) - Onsite contractor coordination for site remediation associated with HDPE liner installation.

**Norton-Chemplast, Wayne, New Jersey** (ISRA, BUST, NJPDES) - Field investigation and preparation of remedial investigation reports for ISRA investigation of Teflon manufacturing facility. Soil remediation, UST removal, groundwater plume delineation of chlorinated solvents, and aquifer testing completed. Designed and implemented a seismic refraction survey to assess subsurface conditions relative to transport of chlorinated solvents in unconsolidated and bedrock aquifers.

**NJ Transit, Lakewood Bus Garage** (BUST) - Test borings and monitoring wells completed as part of a subsurface investigation of former underground storage tanks and past discharges from hydraulic lifts. Preparation of RI/RAW for soil and groundwater remediation which included an assessment of innovative technologies to address under-building contaminants. Provided information in RI/RAW for incorporation of petroleum contaminants detected onsite into a site wide Classification Exemption Area.

## **STEVEN CIAMBRUSCHINI, P.G., L.E.P.**

### **Senior Associate**

---

**Norton-Chemplast, Wayne, New Jersey** (ISRA) – Preliminary Site Assessment, field investigation and report preparation for a soil and groundwater ISRA investigation of the Nylon 6 casting facility. Design and Implementation of seismic refraction survey to assess bedrock topography and impact on migration of chlorinated solvents.

**Wallace & Tiernan - Pennwalt, Belleville, New Jersey** (ISRA and BUST) - Field investigation and report preparation for an ISRA investigation of a 70 year old chlorinator manufacturing facility. Areas of environmental concern include fourteen underground storage tanks, drum storage areas, and plating room blow-down. Tank removals and abandonment, asbestos surveys, soil and groundwater remediation completed under ISRA and UST regulations. Groundwater monitoring and assessment of remediation options is ongoing.

**S.B. Thomas Depot, Metuchen, New Jersey** (BUST) – Completion of a Remedial Investigation to assess the impact of petroleum product discharge from three underground storage tanks to soil and groundwater. Submitted a Remedial Action Work Plan which included a Natural Remediation Compliance Program and a Request for Classification Exemption Area.

**County of Sussex, New Jersey** (BUST, MOA) - Completion of Phase I Assessment, oversight and coordination of underground storage tank removals, soil investigation of chemical fire pits and debris piles, and waste classification and disposal activities. Investigations conducted under Memorandum of Agreement and NJDEP Landfill Disruption Permit.

**Phase I Environmental Assessments** - Approximately 100 projects throughout New Jersey, New York, Pennsylvania, Connecticut and Washington.

**Branson Ultrasonics, Shelton, Connecticut** - Evaluation and determination of local geologic and hydrogeologic conditions to assess pathways of groundwater contamination. Field investigations included installation of bedrock monitoring wells and collection of oriented core samples.

**Pierson's Creek, Newark, New Jersey** - Development and implementation of a sediment sampling plan designed to assess contaminant concentrations in Pierson's Creek, health and safety protocol and remediation options for sediment treatment/disposal.

### **ADDITIONAL TRAINING AND SHORT COURSES**

Hazardous Waste Site Training, OSHA 29 CFR 1910.120(e) certification

Permitting Hazardous Waste Disposal Facilities: USEPA

Operation and Maintenance of Wastewater Treatment Facilities: Rutgers University

Groundwater Pollution and Hydrology: Rutgers University

Underground Storage Tank Remediation Technology and Regulation Seminars: USEPA/NJDEP

Diagnostic Inspection Workshop for Wastewater Treatment Facilities: USEPA

Remediation of NAPL Contaminated Sites: Stevens Institute of Technology

NJDEP Technical Regulations Seminar

Natural Attenuation of Chlorinated Solvents – LEP Required Course

Statistics for Environmental Professionals – LEP Required Course

**STEVEN CIAMBRUSCHINI, P.G., L.E.P.**  
**Senior Associate**

---

**PROFESSIONAL AFFILIATIONS**

National Ground Water Association, Association of Ground Water Scientists and Engineers  
American Association of Petroleum Geologists  
Environmental Professionals of Connecticut

**APPENDIX C**  
**FIELD SAMPLING LOGS**

## CASE NARRATIVE / CONFORMANCE SUMMARY

**Client:** Langan Engineering & Environmental

**Job No** JA94763

**Site:** 508 West 24th Street, Manhattan, NY

**Report Date** 12/29/2011 2:35:52 P

Between 12/15/2011 and 12/16/2011, 4 Sample(s), 0 Trip Blank(s) and 0 Field Blank(s) were received at Accutest Laboratories. Samples were intact and chemically preserved, unless noted below. An Accutest Job Number of JA94763 was assigned to the project. Laboratory sample ID, client sample ID and dates of sample collection are detailed in the report's Results Summary Section.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

### Volatiles by GCMS By Method TO-15

**Matrix:** AIR

**Batch ID:** V3W1004

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA94310-2DUP were used as the QC samples indicated.

**Matrix:** AIR

**Batch ID:** V3W1005

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA94631-6DUP were used as the QC samples indicated.

**Matrix:** AIR

**Batch ID:** VW1411

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA94958-3DUP were used as the QC samples indicated.

**Matrix:** AIR

**Batch ID:** VW1412

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA95085-21DUP were used as the QC samples indicated.

Accutest certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting Accutest's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

Accutest Laboratories is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. Data release is authorized by Accutest Laboratories indicated via signature on the report cover

## Accutest Laboratories Sample Receipt Summary

**Accutest Job Number:** JA94763      **Client:** LANGAN ENGINEERING      **Immediate Client Services Action Required:** Yes  
**Date / Time Received:** 12/15/2011 1330      **Delivery Method:** Accutest Courier      **Client Service Action Required at Login:** No  
**Project:** 508 W 24TH STREET      **No. Coolers:**      **Airbill #'s:**

**Cooler Security**      Y or N      Y or N  
1. Custody Seals Present:        3. COC Present:    
2. Custody Seals Intact:        4. SmpI Dates/Time OK

**Cooler Temperature**      Y or N  
1. Temp criteria achieved:    
2. Cooler temp verification: \_\_\_\_\_  
3. Cooler media: \_\_\_\_\_

**Quality Control Preservation**      Y      N      N/A  
1. Trip Blank present / cooler:     
2. Trip Blank listed on COC:     
3. Samples preserved properly:    
4. VOCs headspace free:

Comments

DID NOT RECEIVE "SV3" OR "SV1"  
SUMMA CANS A895, A644  
FLOW CONTROLLERS FC235, FC238  
  
REVISION 12/16/11  
MISSING SUMMAS REC'D 12/16/11 1800 COURIER ROBIN

**Sample Integrity - Documentation**      Y or N  
1. Sample labels present on bottles:    
2. Container labeling complete:    
3. Sample container label / COC agree:

**Sample Integrity - Condition**      Y or N  
1. Sample recvd within HT:    
2. All containers accounted for:    
3. Condition of sample: \_\_\_\_\_  
Intact

**Sample Integrity - Instructions**      Y      N      N/A  
1. Analysis requested is clear:    
2. Bottles received for unspecified tests:    
3. Sufficient volume recvd for analysis:    
4. Compositing instructions clear:     
5. Filtering instructions clear:

Soil samples reported on a dry weight basis unless otherwise indicated on result page.

## CASE NARRATIVE / CONFORMANCE SUMMARY

**Client:** Langan Engineering & Environmental

**Job No** JA94786

**Site:** 508 West 24th Street, Manhattan, NY

**Report Date** 1/5/2012 10:46:33 AM

On 12/15/2011, 11 Sample(s), 0 Trip Blank(s) and 1 Field Blank(s) were received at Accutest Laboratories at a temperature of 5.2 C. Samples were intact and chemically preserved, unless noted below. An Accutest Job Number of JA94786 was assigned to the project. Laboratory sample ID, client sample ID and dates of sample collection are detailed in the report's Results Summary Section.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

### Volatiles by GCMS By Method SW846 8260B

|                   |                          |
|-------------------|--------------------------|
| <b>Matrix:</b> AQ | <b>Batch ID:</b> V2C4139 |
|-------------------|--------------------------|

- All samples were analyzed within the recommended method holding time.
- Sample(s) JA94862-1MS, JA94862-3DUP were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.

|                   |                          |
|-------------------|--------------------------|
| <b>Matrix:</b> SO | <b>Batch ID:</b> V3C3676 |
|-------------------|--------------------------|

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA94562-17ADUP, JA94562-18AMS were used as the QC samples indicated.
- Matrix Spike Recovery(s) for 2-Butanone (MEK), Acetone are outside control limits. Outside control limits due to matrix interference.

|                   |                          |
|-------------------|--------------------------|
| <b>Matrix:</b> SO | <b>Batch ID:</b> V3C3678 |
|-------------------|--------------------------|

- All samples were analyzed within the recommended method holding time.
- Sample(s) JA94786-7MS, JA94786-8DUP were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- RPD(s) for Duplicate for 2-Butanone (MEK), Acetone, Carbon disulfide, m,p-Xylene, Methylene chloride are outside control limits for sample JA94786-8DUP. High RPD due to possible sample analyzed from different vials.

|                   |                          |
|-------------------|--------------------------|
| <b>Matrix:</b> SO | <b>Batch ID:</b> V3C3682 |
|-------------------|--------------------------|

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA95164-1MS, JA95164-1MSD were used as the QC samples indicated.

|                   |                         |
|-------------------|-------------------------|
| <b>Matrix:</b> SO | <b>Batch ID:</b> VD7764 |
|-------------------|-------------------------|

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA95302-8MS, JA95302-8MSD were used as the QC samples indicated.
- JA94786-2: Dilution required due to matrix interference.

|                   |                         |
|-------------------|-------------------------|
| <b>Matrix:</b> SO | <b>Batch ID:</b> VV5275 |
|-------------------|-------------------------|

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA95214-9MS, JA95214-9MSD were used as the QC samples indicated.

## Extractables by GCMS By Method SW846 8270D

**Matrix:** AQ

**Batch ID:** OP53710

- All samples were extracted within the recommended method holding time.
- Sample(s) JA94722-1MS, JA94722-1MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- Blank Spike Recovery(s) for 1,1'-Biphenyl, 2,3,4,6-Tetrachlorophenol, 2,4,5-Trichlorophenol, 2,4,6-Trichlorophenol, 2,4-Dinitrotoluene, 2-Chlorophenol, 4,6-Dinitro-o-cresol, 4-Chlorophenyl phenyl ether, Acenaphthene, Acenaphthylene, Anthracene, Benzo(g,h,i)perylene, Carbazole, Chrysene, Di-n-butyl phthalate, Dibenzo(a,h)anthracene, Dibenzofuran, Fluoranthene, Fluorene, Indeno(1,2,3-cd)pyrene, N-Nitrosodiphenylamine, Phenanthrene are outside control limits. Outside of in house control limits.
- Matrix Spike Recovery(s) for 2,4-Dinitrophenol, 4-Nitrophenol are outside control limits. Outside control limits due to matrix interference.
- Matrix Spike Duplicate Recovery(s) for 2,4-Dinitrophenol, 4-Nitrophenol, 2,3,4,6-Tetrachlorophenol, 2,4,5-Trichlorophenol, 2,4,6-Trichlorophenol, 4,6-Dinitro-o-cresol are outside control limits. Outside control limits due to matrix interference.
- RPD(s) for MS/MSD for 2,3,4,6-Tetrachlorophenol, 2,4,5-Trichlorophenol, 2,4,6-Trichlorophenol, 4,6-Dinitro-o-cresol, Pentachlorophenol are outside control limits for sample OP53710-MSD. Outside control limits due to matrix interference.

**Matrix:** AQ

**Batch ID:** OP53865

- The data for SW846 8270D meets quality control requirements.
- JA94786-12: Confirmation run.

**Matrix:** SO

**Batch ID:** OP53697

- All samples were extracted within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA94786-1MS, JA94786-1MSD were used as the QC samples indicated.
- Matrix Spike Recovery(s) for 2,4-Dinitrophenol are outside control limits. Outside control limits due to matrix interference.
- Matrix Spike Duplicate Recovery(s) for 2,4-Dinitrophenol are outside control limits. Outside control limits due to matrix interference.
- RPD(s) for MS/MSD for Pentachlorophenol are outside control limits for sample OP53697-MSD. Outside control limits due to matrix interference.

## Extractables by GC By Method SW846 8081B

**Matrix:** AQ

**Batch ID:** OP53750

- All samples were extracted within the recommended method holding time.
- Sample(s) JA95043-3MS, JA95043-3MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- OP53750-BS1 for delta-BHC: Recalculate recovery base on the true value due to defect of spike solution.

**Matrix:** SO

**Batch ID:** OP53706

- All samples were extracted within the recommended method holding time.
- Sample(s) JA94786-1MS, JA94786-1MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- OP53706-BS1 for delta-BHC: Recalculate recovery base on the true value due to defect of spike solution.

## Extractables by GC By Method SW846 8082A

**Matrix:** AQ                      **Batch ID:** OP53749

- All samples were extracted within the recommended method holding time.
- Sample(s) JA95043-3MS, JA95043-3MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.

**Matrix:** SO                      **Batch ID:** OP53707

- All samples were extracted within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA94707-1AMS, JA94707-1AMSD were used as the QC samples indicated.

## Metals By Method SW846 6010C

**Matrix:** AQ                      **Batch ID:** MP61972

- All samples were digested within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA94762-6MS, JA94762-6MSD, JA94762-6SDL were used as the QC samples for metals.
- RPD(s) for Serial Dilution for Aluminum, Arsenic, Beryllium, Cadmium, Chromium, Copper, Lead, Nickel, Silver, Vanadium are outside control limits for sample MP61972-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

**Matrix:** SO                      **Batch ID:** MP61958

- All samples were digested within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA94786-1MS, JA94786-1MSD, JA94786-1SDL were used as the QC samples for metals.
- Matrix Spike Recovery(s) for Aluminum, Antimony, Calcium, Iron are outside control limits. Spike recovery indicates possible matrix interference and/or sample nonhomogeneity.
- Matrix Spike Duplicate Recovery(s) for Antimony, Manganese, Potassium, Calcium are outside control limits. Spike recovery indicates possible matrix interference and/or sample nonhomogeneity.
- RPD(s) for MS/MSD for Calcium are outside control limits for sample MP61958-S2. High rpd due to possible sample nonhomogeneity.
- RPD(s) for Serial Dilution for Silver are outside control limits for sample MP61958-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).

## Metals By Method SW846 7470A

**Matrix:** AQ                      **Batch ID:** MP62043

- All samples were digested within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA94031-3MS, JA94031-3MSD were used as the QC samples for metals.

## Metals By Method SW846 7471B

**Matrix:** SO                      **Batch ID:** MP62007

- All samples were digested within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA94786-1MS, JA94786-1MSD were used as the QC samples for metals.

## Wet Chemistry By Method SM18 2540G

**Matrix:** SO                      **Batch ID:** GN59801

- The data for SM18 2540G meets quality control requirements.

Accutest certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting Accutest's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

Accutest Laboratories is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. Data release is authorized by Accutest Laboratories indicated via signature on the report cover

### Custody Documents and Other Forms

---

Includes the following where applicable:

- Chain of Custody

# Accutest Laboratories Sample Receipt Summary

Accutest Job Number JA94786

Client:

Date / Time Received: 12/15/2011

Project:

No. Coolers: 1

Airbill #'s:

Delivery Method:

### Cooler Security

Y or N

Y or N

- 1. Custody Seals Present:   3. COC Present:
- 2. Custody Seals Intact:   4. Smpl Dates/Time OK

### Cooler Temperature

Y or N

- 1. Temp criteria achieved:
- 2. Cooler temp verification: IR Gun
- 3. Cooler media: Ice (Bag)

### Quality Control Preservation

Y or N

N/A

- 1. Trip Blank present / cooler:
- 2. Trip Blank listed on COC:
- 3. Samples preserved properly:
- 4. VOCs headspace free:

### Sample Integrity - Documentation

Y or N

- 1. Sample labels present on bottles:
- 2. Container labeling complete:
- 3. Sample container label / COC agree:

### Sample Integrity - Condition

Y or N

- 1. Sample recvd within HT:
- 2. All containers accounted for:
- 3. Condition of sample: Intact

### Sample Integrity - Instructions

Y or N

N/A

- 1. Analysis requested is clear:
- 2. Bottles received for unspecified tests:
- 3. Sufficient volume recvd for analysis:
- 4. Compositing instructions clear:
- 5. Filtering instructions clear:

Soil samples reported on a dry weight basis unless otherwise indicated on result page.

## CASE NARRATIVE / CONFORMANCE SUMMARY

**Client:** Langan Engineering & Environmental

**Job No** JA94991

**Site:** 508 West 24th Street, Manhattan, NY

**Report Date** 1/3/2012 12:28:35 PM

On 12/16/2011, 8 Sample(s), 0 Trip Blank(s) and 0 Field Blank(s) were received at Accutest Laboratories at a temperature of 3 C. Samples were intact and chemically preserved, unless noted below. An Accutest Job Number of JA94991 was assigned to the project. Laboratory sample ID, client sample ID and dates of sample collection are detailed in the report's Results Summary Section.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

### Volatiles by GCMS By Method SW846 8260B

**Matrix:** SO

**Batch ID:** VV5275

- All samples were analyzed within the recommended method holding time.
- Sample(s) JA95214-9MS, JA95214-9MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.

**Matrix:** SO

**Batch ID:** VX5204

- All samples were analyzed within the recommended method holding time.
- Sample(s) JA94991-1MS, JA94991-1MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- RPD(s) for MS/MSD for 1,1,1-Trichloroethane, 1,1-Dichloroethane, 1,1-Dichloroethene, 1,2-Dichloropropane, Benzene, Bromochloromethane, Bromodichloromethane, Carbon disulfide, Carbon tetrachloride, Chlorobenzene, Chloroform, cis-1,2-Dichloroethene, Methylene chloride, Styrene, Toluene, trans-1,2-Dichloroethene, Trichloroethene are outside control limits for sample JA94991-1MSD. Outside control limits due to matrix interference.

**Matrix:** SO

**Batch ID:** VX5209

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA95312-3MS, JA95312-3MSD were used as the QC samples indicated.
- Blank Spike Recovery(s) for Acetone are outside control limits. High percent recoveries and no associated positive found in the QC batch.
- Matrix Spike Recovery(s) for Acetone are outside control limits. Outside control limits due to matrix interference.
- RPD(s) for MS/MSD for 2-Butanone (MEK), Acetone are outside control limits for sample JA95312-3MSD. Outside control limits due to matrix interference.

### Extractables by GCMS By Method SW846 8270D

**Matrix:** SO

**Batch ID:** OP53755

- All samples were extracted within the recommended method holding time.
- Sample(s) JA94991-1MS, JA94991-1MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- OP53755-MB1 for Terphenyl-d14: Outside of in house control limits.
- JA94991-5 for Terphenyl-d14: Outside of in house control limits.

## Extractables by GC By Method SW846 8081B

|                   |                          |
|-------------------|--------------------------|
| <b>Matrix:</b> SO | <b>Batch ID:</b> OP53765 |
|-------------------|--------------------------|

- All samples were extracted within the recommended method holding time.
- Sample(s) JA94991-1MS, JA94991-1MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- RPD(s) for MS/MSD for 4,4'-DDD, 4,4'-DDE, 4,4'-DDT, Aldrin, alpha-BHC, alpha-Chlordane, beta-BHC, delta-BHC, Dieldrin, Endosulfan sulfate, Endosulfan-I, Endosulfan-II, Endrin, Endrin aldehyde, Endrin ketone, gamma-BHC (Lindane), gamma-Chlordane, Heptachlor, Heptachlor epoxide, Methoxychlor are outside control limits for sample OP53765-MSD. Analytical precision exceeds standard laboratory control limits.

## Extractables by GC By Method SW846 8082A

|                   |                          |
|-------------------|--------------------------|
| <b>Matrix:</b> SO | <b>Batch ID:</b> OP53764 |
|-------------------|--------------------------|

- All samples were extracted within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA94991-1MS, JA94991-1MSD were used as the QC samples indicated.

## Metals By Method SW846 6010C

|                   |                          |
|-------------------|--------------------------|
| <b>Matrix:</b> SO | <b>Batch ID:</b> MP61994 |
|-------------------|--------------------------|

- All samples were digested within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA94991-1MS, JA94991-1MSD, JA94991-1SDL were used as the QC samples for metals.
- Matrix Spike Recovery(s) for Antimony, Calcium, Copper, Iron, Manganese, Potassium are outside control limits. Spike recovery indicates possible matrix interference and/or sample nonhomogeneity.
- Matrix Spike Duplicate Recovery(s) for Aluminum, Antimony, Calcium are outside control limits. Spike recovery indicates possible matrix interference and/or sample nonhomogeneity.
- RPD(s) for MS/MSD for Calcium, Copper are outside control limits for sample MP61994-S2. High rpd due to possible sample nonhomogeneity.
- RPD(s) for Serial Dilution for Antimony, Arsenic, Selenium, Silver, Thallium are outside control limits for sample MP61994-SD1. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).
- MP61994-SD1 for Zinc: Serial dilution indicates possible matrix interference.

## Metals By Method SW846 7471B

|                   |                          |
|-------------------|--------------------------|
| <b>Matrix:</b> SO | <b>Batch ID:</b> MP62037 |
|-------------------|--------------------------|

- All samples were digested within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA94991-1MS, JA94991-1MSD were used as the QC samples for metals.

## Wet Chemistry By Method ASTM 4643-00

|                   |                          |
|-------------------|--------------------------|
| <b>Matrix:</b> SO | <b>Batch ID:</b> GN59821 |
|-------------------|--------------------------|

- The data for ASTM 4643-00 meets quality control requirements.

|                   |                          |
|-------------------|--------------------------|
| <b>Matrix:</b> SO | <b>Batch ID:</b> GN59852 |
|-------------------|--------------------------|

- The data for ASTM 4643-00 meets quality control requirements.

Accutest certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting Accutest's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

Accutest Laboratories is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. Data release is authorized by Accutest Laboratories indicated via signature on the report cover

ND = Not detected MDL - Method Detection Limit

RL = Reporting Limit

E = Indicates value exceeds calibration range

J = Indicates an estimated value

B = Indicates analyte found in associated method blank

N = Indicates presumptive evidence of a compound

## Report of Analysis

Client Sample ID: LB-4 1'-3' 022

Lab Sample ID: JA94991-4

Matrix: SO - Soil

Project: 508 West 24th Street, Manhattan, NY

Date Sampled: 12/15/11

Date Received: 12/16/11

Percent Solids: 88.8

## Metals Analysis

## CASE NARRATIVE / CONFORMANCE SUMMARY

**Client:** Langan Engineering & Environmental

**Job No** JA95043

**Site:** 508 West 24th Street, Manhattan, NY

**Report Date** 1/6/2012 8:30:39 AM

On 12/16/2011, 4 Sample(s), 1 Trip Blank(s) and 1 Field Blank(s) were received at Accutest Laboratories at a temperature of 4 C. Samples were intact and chemically preserved, unless noted below. An Accutest Job Number of JA95043 was assigned to the project. Laboratory sample ID, client sample ID and dates of sample collection are detailed in the report's Results Summary Section.

Specified quality control criteria were achieved for this job except as noted below. For more information, please refer to the analytical results and QC summary pages.

### Volatiles by GCMS By Method SW846 8260B

**Matrix:** AQ

**Batch ID:** V3D2946

- All samples were analyzed within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA95040-12MS, JA95040-12MSD were used as the QC samples indicated.

**Matrix:** AQ

**Batch ID:** V4D846

- All samples were analyzed within the recommended method holding time.
- Sample(s) JA95043-3MS, JA95043-3MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- Blank Spike Recovery(s) for Tetrachloroethene are outside control limits. Pentachloroethane may dechlorinate in deionized water resulting in low recovery bias and high recovery bias for tetrachloroethene. The phenomena does not occur in field samples and does not impact sample data.
- RPD(s) for MS/MSD for Carbon disulfide are outside control limits . Outside control limits due to matrix interference.
- JA95043-5: (pH=5)Sample pH did not satisfy field preservation criteria.

### Extractables by GCMS By Method SW846 8270D

**Matrix:** AQ

**Batch ID:** OP53779

- All samples were extracted within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA95043-3MS, JA95043-3MSD were used as the QC samples indicated.
- Matrix Spike Recovery(s) for 2,4-Dinitrophenol, 4,6-Dinitro-o-cresol, 4-Nitrophenol are outside control limits. Outside control limits due to matrix interference.
- Matrix Spike Duplicate Recovery(s) for 2,4-Dinitrophenol, 4,6-Dinitro-o-cresol, 4-Nitrophenol are outside control limits. Probable cause due to matrix interference.
- RPD(s) for MS/MSD for Di-n-butyl phthalate, Fluoranthene are outside control limits. Outside control limits due to matrix interference.

### Extractables by GC By Method SW846 8081B

**Matrix:** AQ

**Batch ID:** OP53750

- All samples were extracted within the recommended method holding time.
- Sample(s) JA95043-3MS, JA95043-3MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.
- OP53750-BS1 for delta-BHC: Recalculate recovery base on the true value due to defect of spike solution.

## Extractables by GC By Method SW846 8082A

**Matrix:** AQ**Batch ID:** OP53749

- All samples were extracted within the recommended method holding time.
- Sample(s) JA95043-3MS, JA95043-3MSD were used as the QC samples indicated.
- All method blanks for this batch meet method specific criteria.

## Metals By Method SW846 6010C

**Matrix:** AQ**Batch ID:** MP62021

- All samples were digested within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA95043-3FMS, JA95043-3FMSD, JA95043-3FSDL, JA95043-3MS, JA95043-3MSD, JA95043-3SDL were used as the QC samples for metals.
- Matrix Spike Recovery(s) for Manganese are outside control limits. Spike amount low relative to the sample amount. Refer to lab control or spike blank for recovery information.
- RPD(s) for Serial Dilution for Arsenic, Chromium, Copper, Lead, Selenium, Silver, Zinc, Aluminum, Arsenic, Iron, Nickel, Vanadium, Manganese are outside control limits for sample MP62021-SD1, MP62021-SD2. Percent difference acceptable due to low initial sample concentration (< 50 times IDL).
- MP62021-SD2 for Manganese: Serial dilution indicates possible matrix interference.

## Metals By Method SW846 7470A

**Matrix:** AQ**Batch ID:** MP62061

- All samples were digested within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA95043-3MS, JA95043-3MSD were used as the QC samples for metals.

**Matrix:** AQ**Batch ID:** MP62079

- All samples were digested within the recommended method holding time.
- All method blanks for this batch meet method specific criteria.
- Sample(s) JA95043-3FMS, JA95043-3FMSD were used as the QC samples for metals.

Accutest certifies that data reported for samples received, listed on the associated custody chain or analytical task order, were produced to specifications meeting Accutest's Quality System precision, accuracy and completeness objectives except as noted.

Estimated non-standard method measurement uncertainty data is available on request, based on quality control bias and implicit for standard methods. Acceptable uncertainty requires tested parameter quality control data to meet method criteria.

Accutest Laboratories is not responsible for data quality assumptions if partial reports are used and recommends that this report be used in its entirety. Data release is authorized by Accutest Laboratories indicated via signature on the report cover
