Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ENGELHARDT" 8/25/2004 Sangesland spoke with Bob Hayman of RND Services (845-348-6355) HUD is trying to convert this building into apartments. The tank that collapsed was associated with the school, but it was never registered. RND is working out the PBS registration issues first (new PBS number for school? or 2nd tank on church PBS???) RND will do a site assessment on the tank leak problem area to determine the size of the contamination problem. 6/15/2006 Case is transferred to Remediation Group

DEC Remarks: DEC Sigona) investigated on 3/19/1999 at 11:30 A.M. met with superintendent. Performed inspection of tank room. Confirmed the 2 fuel oil spill was contained in vault for aboveground tank. The tank was painted and seemed to be good physical condition resting on solid footings/craddles. The floor was visibly clean with no significant petroleum vapors. The fill pipe supplys oil to aboveground tank vaulted with access. At the exit from boiler room to street the pipe appeared to be moderately corroded. The superintended will relay the info to the manager of the church, and indicated that they will replace the fill line if necessary. Otherwise there is no further action required.DEC SIGONA RESPONDED CONFIRMED CLEANUP.CLOSED 3/18

Spill Cause: CASTLE OIL DRIVER OVERFILLED TANK. SPILLED INTO THE TANK ROOM. PETROLEUM TANK CLEANERS HAS CREWS ENROUTE TO CLEAN UP.

Site Description: The Site is located in an urban area of New York County (Manhattan) on the west side of Park Avenue bounded by 124th and 125th Streets. The site is primarily a paved parking lot. Surrounding uses include residential buildings with first floor retail and commercial buildings with office space to the north across 125th Street; the Metro-North Railroad tracks to the east across Park Avenue followed by residential buildings; an asphalt-paved parking lot to the south across 124th Street; and a residential building with first floor retail in addition to the New York College of Podiatric Medicine to the west. The Site had been residential and had been the location of the former Harlem Central Hotel (later the Hotel Naomi) through the 1970's. It has been a parking lot since approximately 1980. It is unknown at this time if these uses contributed to the contamination identified on-site. The intended use of the site after remedial actions have been completed consists of a mixed use building with parking on the lower, sub-grade floors and retail/commercial and residential above. The RAWP was approved with modifications on March 1, 2006. However, the volunteer/developer did not pursue the remedy immediately. On January 10, 2007 a meeting was held with the new partner in the development, during which they committed to implementing the approved remedy and subsequent development. A Stipulation List was submitted in October 2007 and this was approved by the Department in April 2008. Remedial Construction began on February 28, 2008 with the implementation of the Native Soil Sampling Plan. The subsequent Report was submitted on July 23, 2008. The department has requested cross sectional drawings to facilitate the review of this document.

Env Problem:

There have been at least four separate environmental investigations at the site which included the collection of subsurface soil and/or groundwater samples. Together, these investigations have found that: Fill is present on the site to a depth of approximately 20 feet below grade; A layer of petroleum contamination was identified at the water table across much of the site, varying in thickness up to approximately three feet; Fingerprint analysis of the petroleum layer identified it as #6 fuel oil; No VOCs were found in soil samples at levels above TAGM 4046 RSCOs; SVOCs were found at concentrations below TAGM 4046 RSCOs excepting cPAHs which were routinely found above TAGM 4046 levels; there were a couple of SVOC outliers: 22 ppm dinitrotoluene in a duplicate sample (undetected in the actual sample); and 800 ppm b2ehp in one sample; metals were also found above TAGM levels, but less frequently; (e.g. mercury to 0.47 mg/kg - about one-quarter of the samples were above TAGM; barium at 656 mg/kg in one sample (all others under TAGM); lead at 1050 mg/kg in one sample (all others substantially lower); magnesium mostly over TAGM; PCBs (1260) at 1.6 mg/kg in one shallow, composite soil sample (two other 1260 detections below 20 ug/kg in two other samples; all other samples were ND). No exceedance of groundwater standards by organics was noted. Filtered groundwater samples showed exceedances of standards for aluminum, iron and manganese. Soil samples taken from below the fuel oil and fill layers have shown no impacts. NYSDEC, in

S108524799

consultation with NYSDOH, has determined that the site conditions do not pose a significant threat to human health or the environment. A Part 375 Track 1 Cleanup is proposed for the site. The Native Soil Sampling Plan was approved and started in February 2008. The report was submitted in July 2008. The department has requested the submittal of cross sectional drawings to evaluate the findings.

Health Problem: Human exposures to groundwater contamination are unlikely since the area is served by public water. Since the site is currently covered by pavement and buildings and contaminated soils are at depth, direct contact exposures are unlikely. The proposed remedy calls for most of the contaminated soil to be excavated and properly disposed of off-site. The potential for exposures associated with soil vapor intrusion will be investigated.

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEEO" Demeo responded to the site, A.L. Eastmond did cleanup. 9/20/2004 Sangesland spoke to Issac at Eastmond. He said the surface clean up was done, but two days later a nearby school said there was still a smell so more digging was required 9/21/2004 Issac at Eastmond says cleanup is done. This was the second recent major spill on this site. Cross Ref #0404538 from July 2004. Problem is there are 2 tanks. Building switched the tank numbers and Hess is pumping the oil into the wrong tank which causes the overflow and a spill. Eastmond recommends an overflow protection on tanks. Endpoints, photos and a closure report will be sent into DEC. This spill is closed - Spill 0404538 remains open until report is submitted.
Remarks: A L Eastmond is en route for clean up.

SIDE WALK OUTSIDE (Continued)

S106702786

2 tanks at the site and the building switched the tank numbers. When Hess delivers to "tank 1" they are filling "tank 2". Eastmond suggests installing an overflow alarm. Issac says that they already cleaned up the hole and will now take endpoint samples and photos to close this case out. The new spill number for today's spill (0406637) has been closed out and referenced back to this spill number. 9/28/2004 Sangesland spoke to DeMeo about the spill site. Photo of the site showed most of the latest spill went out into a parking lot area. there was a 2' x 10' area of garden and a small bush, right up next to the building under the vent lines that was saturated in oil. This area needs to be dug out, clean endpoints and the area "should" be cemented over because if it's location under the vent lines. 11/26/2004 Sangesland spoke to rep from Hess to request building's management company #. Need to confirm with property manager that remediation/cement work was completed.

DER Facility ID: 301165
DEC Memo: Sangesland called Petro requesting further details - Rep will call back This spill needs follow-up 10.28.05 Sharif- I called James Young who was not available at that time. Left messege for him to call back about the clean up of the spill. 03/01/06 Sharif Rahman- I spoke with Madeline Reese,(212)828-8573 and she would relay the department's concern to James Young. 03/27/06 Sharif Rahman- Clean up letter went to James Young 355 W 123rd Street, Apt#1A New York, NY 10027 05/11/06 Sharif Rahman- I called Petro ,516-686-2030 and spoke with Keanny @ ext.3324. He informed me the customer's account is not active now and the customer did not respond to fix the tank problem. So, they suspended the delivery due to unsafe condition of the tank. 08/07/06 Rahman- Tried to inspect the baement tank room, but could not get access as no body was found in the house. It looked like the house is now abandoned and no body lives there.Certified mail letter dated May 11' 06 returned undelivered.
Remarks: Tank was leaking releasing 5 gal of material onto the dirt floor. Petro will be stopping the leak. Unknown who is doing the clean up.

DEC Memo: 2/10/05 MT// Leak above product line, owner instructed not to refill tank, but he can use all of the oil currently in the tank. Owner's office 718-454-8555 contact Joe Cohen for the next 3 weeks, Yoshi is the lead person is going on vacation next week for 3 weeks. Owners plan to convert to gas, empty and remove the oil tank and conduct whatever cleanup that is needed.////TTF letter sent 07/18/2005: Called owner of the property at 4 East 132nd Street (Mr. Yoshi of 4 East 132nd Realty LLC) to determine status of cleanup. Yoshi faxed documentation of tank removal that occurred in March 2005. Contents of tank were removed, tank cleaned and purged, fill and vent lines

cut, oil lines disconnected and removed, and the tank was cut up and removed. Tank closure was reviewed by a licensed NYC Fire Department Underground Tank Installer and a Certificate of Affidavit was submitted to the NYC Fire Department Bureau of Fire Prevention on April 21, 2005. There was no release of product from tank into the environment. Documentation was determined to be adequate to close spill. No Further Action letter sent to owner. M. Brand DER NYSDEC Albany.

Remarks: ABOVE LIQUID LEVEL LEAK. HAS NOT BEEN CLEANED UP YET.

 DEC Memo: 7/22/05 - As part of the Spills Reduction Initiative, spill was transferred to Jason Pelton. Jason contacted David Ligamari at M&T Mortgage Corp. to discuss the history of the spill and subsequent cleanup activities. David reported that an oil company overfilled the tank and approximately 50 gallons of fuel oil was spilled in the basement. Petroleum Tank Cleaners was hired and the fuel oil spill was cleaned up on December 6, 2002. The cleanup involved the use of a sorbent material to contain the fuel oil. Two drums of the sorbent material and one drum of petroleum contaminated soil was subsequently removed from the basement by Petroleum Tank Cleaners. David indicated that the basement tank is an above ground storage tank and not an underground storage tank. David also indicated that the tank did not fail, but the spill resulted from an overfill. 9/20/2005 - Jason Pelton contacted Petroleum Tank Cleaners and spoke with Helen Parker about spill cleanup documentation. Helen reviewed the project files and faxed Jason a Non-Hazardous Waste Manifest documenting the removal and disposal of 2 drums of Oil Soaked Debris and 1 drum of Petroleum Contaminated Soil. The waste was transported to General

Environmental Management in Cleveland, Ohio for disposal. The disposal date on the manifest is: 1/3/03. 9/22/05 - Based on communication with M&T Mortgage and the remediation contractor and documentation that the fuel oil spill was cleaned up, Spill Number 0209020 was Closed on September 22, 2005 by Jason Pelton. Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SAWYER" 12/02/2002 Rommel - Duty officer See also spill # 0209046 reported by 1st floor tenant. Overfill into basement. Unclear who ordered oil or what oil company made the delivery. Vought spoke to Mulqueen (FDNY) who responded to the scene. FDNY collected speedy dry and oil into 55 gallon drums which were left on site outside. Spoke to Tommie Collins and Tina Spenson - tenants in building. They indicated that there has not been heat for three weeks. They provided Spoke to Hector at J&N Managing Company 212-721-0424 21 West 86th Street, NY, NY 10024 He provided Mark Landis' phone number 212-724-8300 and cell 917-334-9321. Mr. Landis is the court appointed receiver for this property during the pendency of foreclosure. He is responsible for any necessary cleanup. Mark indicated that he will have to obtain funds from M&T Bank - who foreclosed on building, who will then have to go through HUD - who insured the mortgage. HUD Contact - Cardell Johnson - Housing Specialist - 8004408647 ext. 3467. Spill responder Vought on site 3:00pm. 12/3/2002-Vought-Site visit by vought. According to resident delivery made on 12/2/2002 at approximately 8pm by a green and white truck (previous trucks were green and red). No delivery receipt was left and driver who caused spill put down speedy dry at vent and fill. This was first delivery of oil season. Site inspection revealed FDNY 55 gallon drum, a boiler room covered with impacted adsorbent and impacts to an adjacent kitchen. J&M Realty (Victor Berrios and Mark Landis 212-721-0424) agreed to hire contractor and fix heat (heat had not worked all season). 12/4/2002-Spoke with Isaac Mungra (PTC 718-624-4842) who called in spill #0209093 at same location (spill closed by Vought). PTC arrived on-site and cleaned speedy dry. Cracked concrete by vent needs to be excavated and removed. Tank needs to be tightness test and vault inspected. Boiler room concrete is intact according to PTC. 12/11/2002-Vought-Spoke with Isaac. Speedy dry has been swept and disposed of. Three drums were also removed and impacted concrete and soil by vent has been excavated and sampled. Lab analysis not received yet. Tank still needs tightness testing and/or vault inspected. Called David Legamari (M&T Mortgage Co. 716-848-3772) for vault inspection/tightness testing and left message to call NYSDEC. 1/7/04-Vought-Spill transferred from Vought to Austin. 01/27/04 - Sawyer - Spill transferred from Austin to Sawyer. 7/22/05 - As part of the Spills Reduction Initiative, spill was transferred to Jason Pelton. Jason contacted David Ligammari at M&T Mortgage Corp. to discuss the history of the spill and subsequent cleanup activities. David reported that an oil company overfilled the tank and approximately 50 gallons of fuel oil was spilled in the basement. Petroleum Tank Cleaners was hired and the fuel oil spill was cleaned up on December 6, 2005. The cleanup involved the use of a sorbent material to contain the fuel oil. Two drums of the sorbent material and one drum of petroleum contaminated soil was subsequently removed from the basement by Petroleum Tank Cleaners. David indicated that the basement tank is an above ground storage tank and not an underground storage tank. David also indicated that the tank did not fail, but the spill resulted from an overfill. 9/20/2005 - Jason Pelton contacted Petroleum Tank Cleaners and spoke with Helen Parker

DEC Memo: need to send ttf letter to Property Manager: Mr. Joe Berko (212-687-0777) Berko & Associates 501 Fifth Ave - Suite 1408 New York, NY 10017 Nov. 7, 2005 A "Tank Test Failure Letter" was sent to: Joe Berko Berko & Assoc. 501 Fifth Ave- Suite 1408 New York, NY 10017 11/16/05-Vought-Spoke with Maya Betesh (212-687-0777) and she will be faxing in repair invoices. 05/17/06-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin. 6/14/06 - Raphael Ketani. I called up Berko & Associates and asked to speak to the case manager for the property. I spoke to Joseph Berko. He said that all of the documentation showing that the tank was abandoned in place and that everything was taken care of was sent some time ago. I told him I don't have anything to look at. He said he will send it again. 6/15/06 - Raphael Ketani. Mr. Berko called me back. He stated that

the tank was abandoned in place. I looked up the PBS case #2-610163 and it showed the tank abandoned in place. I told Mr. Berko that I needed the failed tank test results, why the tank failed, and a letter report from Brookside Environmental, the company that abandoned the tank, stating that there were no impacts to drains or the environment. He said he would get these documents for me. 7/20/06 - Raphael Ketani. I left a message for Mr. Berko asking what was presently taking place at the site. 8/2/06 - Raphael Ketani. I spoke to Mr. Berko. He said he was just the mortgage broker at the time. He said that he has the information and will get me the documentation that I need. 8/4/06 - Raphael Ketani. I received the dry fail tank and system test results and the cover letter from Eastside Floors stating there was no environmental impact or impact to the sewer system or drainage system. Also the cover letter stated that no oil was spilled as it was a dry leak, that the tank was abandoned in place, and that they have converted to electric heat. Based upon the above listed documentation, I am closing the spill case.

Remarks: Systems test failure. No product released.

DER Facility ID: 82523
DEC Memo: Transferred to Rutland during Spill Reduction initiative. 9/7/06 - Austin - Assigned from Albany to Region 2 staff (Rahman) for review and closure - end 05/04/07- I spoke with NYC DCAS rep Yuen Wong and relayed the message that the spill case is still open as the department is concerned about the subsurface contamination caused by the buried tanks.No investigation was done since 1994. 05/11/07 Spoke with Mr. Wong(DCAS).Per him, the building is now owned by NYC HPD.Mr. Wong will inform DEC about the contact info of HPD.(SR) 06/01/07 Sharif inspected the lot today. 126 is a vacant lot and 122, where the tanks were buried in 1994, is also a vacant lot(small park-Harlem Success Garden).I observed petroleum like substance coming out of the ground on the vacant lot at 122 W 134th Street.I took photographs of it.Sharif spoke with Vivian Louis, Assitt. Commissioner of HPD and informed her the 13 years old spill at the site.She said she would look into it and have somebody work with DEC to resolve the spill violations. 08/05/08 Letter requesting spill clean up and tank removal information was sent to Keith Kerman Chief of Operations, NYC Parks and Recreation 24 W 61st Street, 5th Floor New York, NY 10023 A picture taken recently of the site also accompanied the letter.(sr) 12/19/08 Sent an email to Gabe Ramos(Gabriel.Ramos@parks.nyc.gov)requesting status update. In his previous email on 09/08/08, he indicated that they were searching for a contractor to do the clean up.(sr) **Rec'd email response from Gabe Ramos indicating that they have a purchase order in place and he is scheduled to meet with the company "Wind Mill Oil" on site to go over the project on Dec 30th 2008.(sr)** 02/24/09 Geo probe drilling scheduled on 02/25/09 by "Wind Mill Oil".(sr) 02/25/09 Performed a site visit today, one 1080 gallon tank found filled with dirt and oil water.Wind Mill will perform a GPR survey for possible presence of other tank,tank will be removed followed by end point sampling.(sr) 06/30/09 Rec'd work plan from Windmill Oil Tank Service. includes: 1- Use GPR to locate & pin-point tanks 2- Excavate, cut & clean tanks prior to removal 3- Remove tanks 4- Take soil samples and have analyzed to meet NYS DEC standard. (sr) 08/27/09 Spoke with Wind Mill Oil Tank Service (Mr. Lee). Work will commence after the school opens next month, as the school has the key to the garden. (sr) 10/23/09 GPR survey was conducted. No other tank was detected on the property. Wind Mill to proceed with tank excavation. (sr) 12/04/09 Tank has been removed by Wind Mill along with contaminated soil. End point sample was taken. Results show residual contamination left minor. Report in edocs. Pictures in edocs. Case closed. (sr)

Remarks: DISCOVERED U/G TANKS TAKEN ON WATER & LEAKING. KRIMGOLD WAS NOTIFIED AT 1115 HRS.

DEC Memo: 4/24/2008 PTC started opening sidewalk thinking spill was minor. Found spill is huge and now they request permission to close up sidewalk and wait until after school is out in June for major dig out. CSL needs to be sent to: Jimmy Merlo, Fuel Division, NYC Schools, 44-36 Vernon Blvd, LIC, NY 11101 04/24/08-Vought-Called PTC Lara and fill line will be replaced tomorrow and small amount of leakage observed in the school basement (stain on wall) however stain was cleaned by PTC. DEC requires: 1)delineation of soil contamination 2)collection of endpoint samples. Vought sent CSL with four month due date and cc to PTC Lara and above requirements to: James Merlo New York City Board of Education 44-36 Vernon Blvd Long Island City, NY 11101 Ph:718-349-5738 08/1/08-Vought-Received call from and spoke to James Merlo and sidewalk will be reopened as school is over and endpoint samples should be received next month and DEC will receive report by 10/1/08. 12/03/08-Vought-Received call from and spoke to Bd. Of Ed. Raymond Correa who replaced James Merlo. Correa will send in report with above requirements to DEC. 12/04/08-Vought-Reveiwed report received from Correa on 12/5/08. Report included site plan, proceed order for Petroleum Tank Cleaners, invoices showing excavation from 4/17/08-4/25/08 and from 8/5/08-8/27/08, disposal manifests and endpoint analyticals. Four endpoint soil samples analyzed and show no TAGM 4046 Required Soil Cleanup Objective exceedences other than PAHs attributable to fill material. Vought called and spoke to PTC Salamack who confirmed that minor spill inside vault was cleaned as well. Spill closed by Vought and NFA sent to Raymond Correa at above address.

Remarks: REMOVING SOIL AND IS A LEAKING FILL LINE

DEC Memo: 11/22/05: This spill transferred from J.Kolleeny to S.Kraszewski.
01/03/06: One 20K tank replaced with one 10K tank. Maximum mechanical stated they would perform 4 borings, one for each side of the 20K tank as part of the site assessment. No record of a site assessment recieved by DEC. No mention of boring made near the fill port. Fascimile from Maxiumu Mechanical states that the soil around the fill port is to be drummed, but no mention of samples taken from this area. Letter from Maximum Mechanical states contaminated soil to be stockpiled on sheeting. No record of the amount of soil removed, tare weights or destination of the material. No mention of end-point sample taken from the excavation. Need the site assessment report mentioned in the correspondence and info about the excavation. - SK 09/01/06: DEC Lead for this spill changed from "unassigned" to S. Kraszewski. - J. Kolleeny 02/08/07 : DEC lead changed from S. Kraszewski to J. Kann. J.Kann 12/30/09: J.Kann - spill consolidated with 9910794

Remarks: SOIL CONTAMINATION FOUND DURING TANK REMOVAL OF 20,000 GALLON TANK. CLEAN UP TAKING PLACE NOW.

DEC Remarks: On 6/18/01 Spill responder De Meo received a report from NYFD regarding fuel oil leaking into a HPD owned apartment building, located at 411 West 128th Street in Manhattan spill 0102976). The oil from an unknown source was coming out of drains and small open excavations in the basement of the above mentioned property. Additionally, in the courtyard behind the property oil was observed leaching through a 20 ft. high retaining wall. A canvas of the area revealed a leaking 5,000 gallon tank at 412 West 129th Street. The above tank was leaking the fuel oil into an open excavation 3 ft x 3ft x 3ft). The building owner was instructed to empty contents of tank and address the impacts to building on W128th. Eastmond Tank cleaners was retained to pump oil and perform cleanup. DLE was notified and responded to scene. Several summons were issued for existing violations. A complete subsurface investigation will be performed.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEO" On 6/18/01 Spill responder De Meo received a report from NYFD regarding fuel oil leaking into a HPD owned apartment building, located at 411 West 128th Street in Manhattan (spill #0102976). The oil from an unknown source was coming out of drains and small open excavations in the basement of the above mentioned property. Additionally, in the courtyard behind the property oil was observed leaching through a 20 ft. high retaining wall. A canvas of the area revealed a leaking 5,000 gallon tank at 412 West 129th Street. The above tank was leaking the fuel oil into an open excavation (3 ft x 3ft x 3ft). The building owner was instructed to empty contents of tank and address the impacts to building on W128th. Eastmond Tank cleaners was retained to pump oil and perform cleanup. DLE was notified and responded to scene. Several summons were issued for existing violations. A complete subsurface investigation will be performed. 6/14/05 Heitzman - Requested additional information from DLA concerning responsible party, summons, violations & subsurface investigation. 10/20/05 Heitzman - No response received from DLA. Documentation requested from property owner. 4/12/06 - No response received from property owner. NEXT STEP: Perform site inspection to determine whether cleanup was complete. Obtain documentation from property owner and/or Regional DLA if available. 10/2/09 - Austin - Spill transferred from Albany staff to Ketani, for further investigation - end 10/20/09 - Raphael Ketani. As the spill originated from 412 West 129th Street, I am designating this site as the responsible party. A previous spill occurred at 412 West 129th Street on 2/20/94. The spill case is #9401941. A 5,000 gal. tank with #6 oil broke. About 100 gals. was released. The oil came through the backyard retaining wall of the building at 411 West 128th Street and entered a storm drain. A.L. Eastmond came and cleaned up the spill. There are no E-docs for this case and no database notes. The case was closed on 7/10/94 by Mark Tibbe of DEC. The subject spill occurred on

6/18/01. Oil was coming through the backyard retaining wall for 411 West 128th Street, and coming out of drains and small excavations in the basement of 411 West 128th Street. The tank at 412 West 129th Street was found to be leaking, again. The PBS registration is number #2-602938. There is one 5,000 gal. AST in touch with the ground. There is no installation date listed. The fuel is #2 oil. The tank location is at 408 West 129th Street, but the building is designated as 408-412 West 129th Street. The operator is listed as Barbaro Delauz (917) 299-7714. The owner is 408-412 West 129th Street Association, LLC, P.O. Box 1799, NY, 10026. The management company is Jack Jaffa and Associates, 56 Willoughby Street, Brooklyn, 11201, Yuri Jaffa (718) 855-6110. There are no E-docs. A letter dated 10/20/2005 was sent by Albany DER to Than-Propp Equities, 405 Park Avenue, NY, 10022, but there was no response. This was the only document in the case file. Today, I found out that the property managers listed in the PBS registration and on the letterhead are incorrect. The latest manager is Manhattan North Management (212) 996-0200. I tried calling the manager, Anna Martinez, but could only leave a voice mail message. 12/15/09 - Raphael Ketani. I made an unannounced site visit. I met the super. of 412 West 129th Street, Michael Smith (917) 299-7714. I asked him whether he had been here in 2001 when the spill took place. He said he had. He showed me the tank room. There was a fairly new tank inside on metal saddles. There were no signs of any problems with the tank. The tank room floor was free of oil stains and there were no odors. Next, Mr. Smith took me to the outside of the tank room. He pointed to the bottom of the outside wall and said that the oil had flowed out of the tank room and under the wall (see E-docs). Then, he said, the oil flowed over the edge of the back courtyard and onto the courtyard of 411 West 128th Street. I looked the area over and there were no signs of an oil spill, neither on the wall, nor in the courtyards. I thanked him for showing me the tank and left. As the tank appeared to be in good condition, and as the spill appeared to have been cleaned up, I have determined that there is no threat to the public or the environment. Therefore, I am closing the spill case.

LEFT MEAASGE THAT THE PROJECT HAS BEEN REASSIGNED TO TIPPLE, REQUESTED CALLBACK 8/2/01 SPOKE WITH SANTA FROM VELOCITY INC.(212)629-0690 PROPERTY TRANSACTION PENDING 12/10/03 mt/// Transferred from Tipple to Rommel 6/8/05 - Site temporarily assigned to TLGibbons in Central office, Albany 7/13/05 - Spoke with son of owner of property in Great Neck @ 516-773-3094. Gave me his fathers name (goes by either Moshe or Mike Samouha) and cell phone (917-653-7056. Mike said he bought property 3 years ago and is currently auto parts store. He want to build on property. Says when he bought property the site was cleaned, tanks removed. He will find paperwork and send. 8/17/05 - Mr. Samouha faxed me papers, but none had to do with tanks and he has no other paperwork. The spill database shows no other spills for this address. Based on discussion with Joe Zelewski, it is recommended that this spill remain open. Recommend sending back to regional office. 8/17/05 - Mike Samouha (11) 550 GALLON TANKS FAILED AIR PRESSURE TEST, UNREADABLE LEAK RATE, SYSTEM FAILURE, WILL NOTIFY OWNER OF FAILURE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SHWS:

Program: HW
Site Code: 57691
Classification: SIGNIFICANT THREAT TO THE PUBLIC HEALTH OR ENVIRONMENT - ACTION REQUIRED.
Region: 2
Acres: 1.700
HW Code: 231004
Record Add: 11/18/1999 12:00:00 PM
Record Upd: 4/14/2009 1:15:00 PM
Updated By: JHOCONNE

Site Description: The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in Manhattan. The entire site is occupied by a building comprised of three connected sections. The site is at an elevation of about 10 feet or less above mean sea level. Surrounding the Site are multi-story residential buildings on the west, south and southeast; the Harlem River Drive and the Harlem River on the east; and the 369th Regiment Armory to the north. From 1970 to 1994 the Site was occupied by an industrial laundry with a dry cleaning operation utilizing tetrachloroethylene (PCE) as a cleaning solvent. A portion of the building was renovated for use as a public school, but such use was discontinued. A Soil Vapor Extraction system (SVE) was installed as part of the Interim Remedial Measures (IRM) to remove PCE. The SVE has been operated continuously since 1997, and was renovated in 2002. April 2005, the SVE was shut off to evaluate the performance of the remedy. During one of the subsequent indoor air quality monitoring events TCE concentration were found to be above the DOH guidance value. The SVE system was re-activated on December 18, 2006. As of this update, the additional remedial investigation was completed during 2008, and NYSDOH required additional vapor intrusion investigation around the site perimeter. The additional vapor intrusion investigation is underway.

Env Problem: From 1970 to 1994 the Site was occupied by an industrial laundry with a dry cleaning operation utilizing tetrachloroethylene (PCE) as a cleaning solvent. Soils beneath the site, and on-site and off-site groundwater are contaminated with PCE. Additional investigation is underway to fully delineate the contamination. There have been documented exceedances of the NYSDOH indoor air guidance values for TCE and PCE in the former basement boiler room (below Room 112).

Health Problem: During renovations to the building in 1996-1997, several rounds of indoor air testing were conducted and on one occasion the data indicated the presence of tetrachloroethene (PCE) above the NYSDOH residential indoor air guideline of 15 parts per billion (ppb).

Interim remedial measures initiated during 1997 to address the source of the contamination included the installation and operation of a shallow soil vapor extraction system. These measures have generally resulted in reducing the levels of tetrachloroethene in indoor air to levels below the 15 ppb guideline. Indoor air sampling conducted in April 2002 only detected trace concentrations of PCE. Exposure to contaminated groundwater is unlikely as public drinking water is supplied to the entire community. Exposure to contaminated soils is unlikely as the affected areas are covered by buildings or pavement.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 07/14/2010
Number of Days to Update: 10	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 07/14/2010
Number of Days to Update: 10	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 05/17/2010
Number of Days to Update: 56	Next Scheduled EDR Contact: 08/30/2010
	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 07/14/2010
Number of Days to Update: 10	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/29/2010	Source: EPA
Date Data Arrived at EDR: 02/09/2010	Telephone: 703-412-9810
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 07/12/2010
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/11/2010
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/23/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/15/2010	Telephone: 703-603-8704
Date Made Active in Reports: 02/10/2010	Last EDR Contact: 07/21/2010
Number of Days to Update: 26	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/23/2009	Source: EPA
Date Data Arrived at EDR: 09/02/2009	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010
Date Made Active in Reports: 05/17/2010
Number of Days to Update: 87

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2010

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/20/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/20/2010	Telephone: 703-603-0695
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 06/14/2010
Number of Days to Update: 82	Next Scheduled EDR Contact: 09/27/2010
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/20/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/20/2010	Telephone: 703-603-0695
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 06/14/2010
Number of Days to Update: 82	Next Scheduled EDR Contact: 09/27/2010
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2009	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/22/2010	Telephone: 202-267-2180
Date Made Active in Reports: 02/11/2010	Last EDR Contact: 07/09/2010
Number of Days to Update: 20	Next Scheduled EDR Contact: 10/18/2010
	Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 05/24/2010	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 05/26/2010	Telephone: 518-402-9622
Date Made Active in Reports: 06/21/2010	Last EDR Contact: 05/26/2010
Number of Days to Update: 26	Next Scheduled EDR Contact: 09/06/2010
	Data Release Frequency: Annually

VAPOR REOPENED: Vapor Intrusion Legacy Site List

"Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

Number of Days to Update: 41	Next Scheduled EDR Contact: 09/27/2010
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007
Date Data Arrived at EDR: 08/26/2009

291 LENOX AVE
NEW YORK, NY 10027

TARGET PROPERTY COORDINATES

Latitude (North):	40.80770 - 40° 48' 27.7"
Longitude (West):	73.9462 - 73° 56' 46.3"
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	588886.4
UTM Y (Meters):	4517733.0
Elevation:	26 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	40073-G8 CENTRAL PARK, NY
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

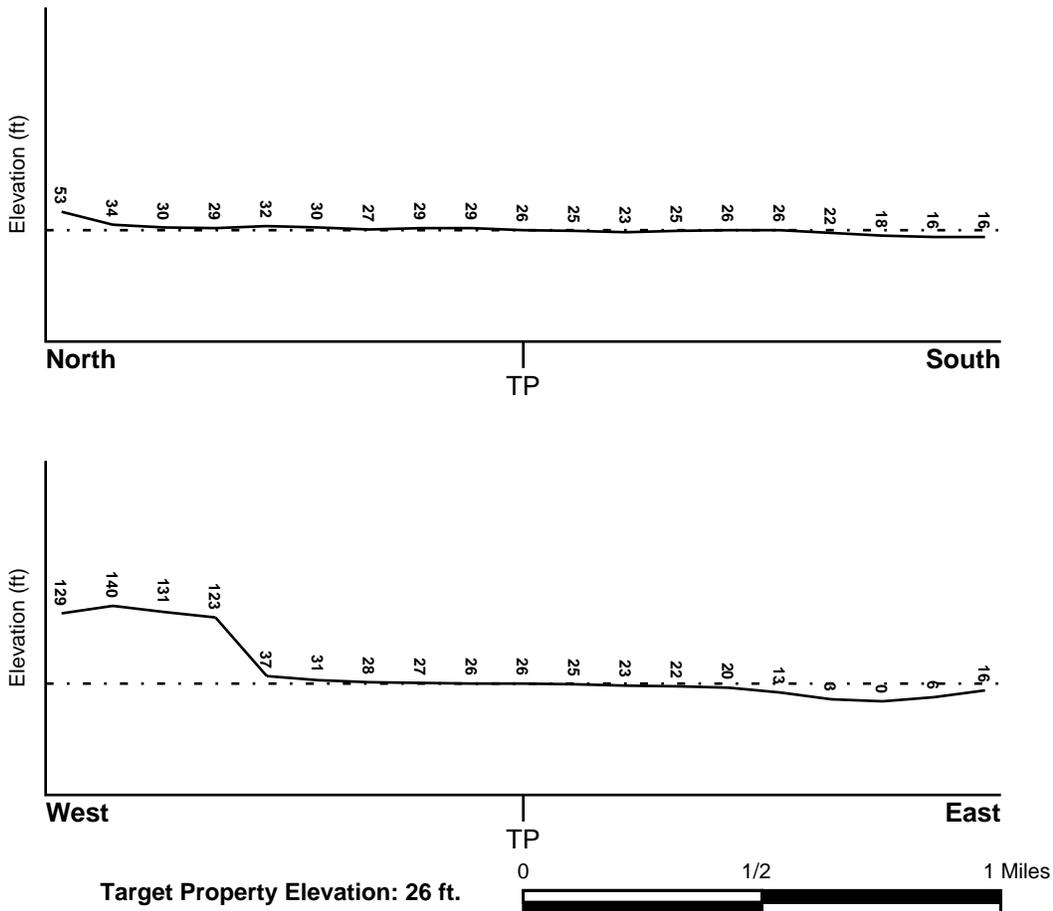

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> NEW YORK, NY	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	360497 - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> CENTRAL PARK	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Ordovician
Series: Lower Ordovician and Cambrian carbonate rocks

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS RADON

AREA RADON INFORMATION

Federal EPA Radon Zone for NEW YORK County: 3

- Note: Zone 1 indoor average level > 4 pCi/L.
- : Zone 2 indoor average level \geq 2 pCi/L and \leq 4 pCi/L.
- : Zone 3 indoor average level < 2 pCi/L.

Not Reported

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Block: 1909/ Lots 25, 26, 27, 28, 29, 30, 31, 32, 33, 38, 39, and 129
Langan Project No.: 170121501**

Dear Sir or Madam:

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above properties, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LUSTs), asbestos abatement, and any other environmental reports that your department may have.

The subject property is located at **281, 283, 285, 287, 289, and 291 Lenox Avenue, 107, 109, 111, and 113 West 124th Street and 108 and 110 West 125th Street, New York, New York (Block 1909 and Lots 25, 26, 27, 28, 29, 30, 31, 32, 33, 38, 39, and 129)**. The property is bounded by West 125th Street to the north, Lenox Avenue to the east, West 124th Street to the south, and 117 West 124th Street and 112 West 125th Street (Lots 24 and 40) to the west.

Please contact me at 212-479-5537 or send your response to my attention at:

Langan Engineering and Environmental Services, P.C.
21 Penn Plaza
360 West 31st Street, 8th floor
New York, New York 10001-2727

Thank you in advance for your cooperation.

Very truly yours,
**LANGAN ENGINEERING &
ENVIRONMENTAL SERVICES, PC**

New York, New York 10027
Block: 1909/ Lots 25, 26, 27, 28, 29, 30, 31, 32, 33, 38, 39, and 129
Langan Project No.: 170121501**

Dear Sir or Madam:

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above properties, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LUSTs), asbestos abatement, and any other environmental reports that your department may have.

The subject property is located at **281, 283, 285, 287, 289, and 291 Lenox Avenue, 107, 109, 111, and 113 West 124th Street and 108 and 110 West 125th Street, New York, New York (Block 1909 and Lots 25, 26, 27, 28, 29, 30, 31, 32, 33, 38, 39, and 129)**. The property is bounded by West 125th Street to the north, Lenox Avenue to the east, West 124th Street to the south, and 117 West 124th Street and 112 West 125th Street (Lots 24 and 40) to the west.

Please contact me at 212-479-5537 or send your response to my attention at:

Langan Engineering and Environmental Services, P.C.
21 Penn Plaza
360 West 31st Street, 8th floor
New York, New York 10001-2727

Thank you in advance for your cooperation.

Very truly yours,
**LANGAN ENGINEERING &
ENVIRONMENTAL SERVICES, PC**

Jennifer Armstrong
Senior Staff Scientist

NEW YORK CITY DEPARTMENT OF ENVIRONMENTAL PROTECTION

Application for Records, Article 6 - New York State Public Officers Law, Freedom of Information Law

Langan Project No.: 170121501**

Dear Ms. Bryant:

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above properties, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LUSTs), asbestos abatement, and any other environmental reports that your department may have.

The subject property is located at **281, 283, 285, 287, 289, and 291 Lenox Avenue, 107, 109, 111, and 113 West 124th Street and 108 and 110 West 125th Street, New York, New York (Block 1909 and Lots 25, 26, 27, 28, 29, 30, 31, 32, 33, 38, 39, and 129)**. The property is bounded by West 125th Street to the north, Lenox Avenue to the east, West 124th Street to the south, and 117 West 124th Street and 112 West 125th Street (Lots 24 and 40) to the west.

Please contact me at 212-479-5537 or send your response to my attention at:

Langan Engineering and Environmental Services, P.C.
21 Penn Plaza
360 West 31st Street, 8th floor
New York, New York 10001-2727

Thank you in advance for your cooperation.

Very truly yours,

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

BUREAU OF BUILDINGS
BOROUGH OF MANHATTAN, CITY OF NEW YORK

EVC **CERTIFICATE OF OCCUPANCY No. 12415 1927**

Supersedes Certificate of Occupancy No.

To the owner or owners of the building:

New York April 13, 1927.

THIS CERTIFIES that the building located on Block 1909 , Lot 28

known as 107 West 124th Street

under a permit, Application No. 252 Alt of 124 , conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of **non-fireproof** construction within the meaning of the building code and may be used and occupied as a **business** building as hereinafter qualified, in a **business** district under the building zone resolution, subject to all the privileges, requirements, limitations, and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
Cellar					Laundry
1st Story	120	14	14	28	Laundry
2nd to 5th Story	120 on each	14	14	28 on each	Factory

This certificate is issued to **Paul Edelstein, representative**
107 West 124th Street, City. , for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1365 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket; but, if approved as a factory building for less than twenty-five persons, it shall not be used for any other purpose.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department, in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. *CS*

Charles Peabody
Superintendent of Buildings, Borough of Manhattan.

Additional copies of this certificate will be loaned, upon written request, to persons having a proprietary interest in the building. *mt*

CREATED BY THE CHARTER NEW YORK CHARTER, FROM 1898 TO 1901, SECTION 4
A certificate of occupancy is issued to the owner or owners of a building when the building is found to conform to the provisions of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

This certificate is issued to **Samuel Lamkin, representative**
235 East 76th Street, City. for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated; no shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc. nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 533 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department, in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Article IX - Special Purpose Districts

Chapter 7

Special 125th Street District

4/30/08

97-00

GENERAL PURPOSES

The "Special 125th Street District" established in this Resolution is designed to promote and protect the public health, safety, general welfare and amenity. The general goals include, among others, the following specific purposes:

- (a) to preserve, protect and promote the special character of 125th Street as Harlem's "Main Street" and the role of 125th Street as Upper Manhattan's premier mixed use corridor;
- (b) to guide development on the 125th Street corridor;
- (c) to expand the retail and commercial character of 125th Street;
- (d) to provide incentives for the creation of visual and performing arts space and enhance the area's role as a major arts, entertainment and cultural destination in the City;
- (e) to support mixed use development throughout the 125th Street corridor, including residential uses, and to provide incentives for the production of affordable housing;
- (f) to ensure that the form of new buildings is compatible and relates to the built character of the 125th Street corridor;
- (g) to enhance the pedestrian environment through appropriate ground floor uses and regulations;

- (h) to promote the most desirable use of land and thus conserve and enhance the value of land and buildings, and thereby protect the City's revenue.

4/30/08

97-01
Definitions

Special 125th Street District

The "Special 125th Street District" is a Special Purpose District designated by the number "125" in which special regulations set forth in Article IX, Chapter 7, apply. The #Special 125th Street District# appears on the #zoning maps# superimposed on other districts and its regulations supersede, supplement and modify those of the districts upon which it is superimposed.

4/30/08

97-02
General Provisions

In harmony with the general purposes of the #Special 125th Street District# and in accordance with the provisions of this Chapter, the express requirements of the Special District shall apply to all #developments#, #enlargements#, alterations and changes of #use# within the Special District. The regulations of the Special District shall supersede, supplement or modify the requirements of the underlying zoning districts on which the Special District is superimposed, except as described in Section 97-05 (Applicability of Special Transit Land Use District Regulations).

Except as modified by the particular provisions of the Special District, the regulations of the underlying zoning districts shall remain in effect. In the event of a conflict between the provisions of this Chapter and other regulations of this Resolution, the provisions of this Chapter shall control.

4/30/08

97-03

District Plan and Maps

The regulations of this Chapter are designed to implement the #Special 125th Street District# Plan. The District Plan, including the map of the #Special 125th Street District#, is set forth in Appendix A of this Chapter and is hereby incorporated as part of this Resolution for the purpose of specifying locations where the special regulations and requirements set forth in this Chapter apply.

4/30/08

97-04

Establishment of Core Subdistrict

In order to carry out the purposes and provisions of this Chapter, the Core Subdistrict is established within the #Special 125th Street District# and includes specific regulations designed to support an arts and entertainment environment along 125th Street. The boundaries of the Core Subdistrict are shown on the map of the #Special 125th Street District# in Appendix A of this Chapter.

4/30/08

97-05

Establishment of Bonused Space Local Arts Advisory Council

A Bonused Space Local Arts Advisory Council shall be created for the purpose of reviewing and making recommendations concerning the Community Engagement Plans of proposed operators of visual or performing arts #uses# pursuant to paragraph (c)(7) of Section 97-423 (Certification for floor area bonus for visual or performing arts uses). The Bonused Space Local Arts Advisory Council shall consist of 11 members: two (2) members appointed by the Commissioner of the Department of

Cultural Affairs, one of whom shall be designated by such Commissioner to serve as Chair, and three (3) members appointed by each of the Council Members for the Councilmanic Districts in which the Special District is located, who will rotate depending upon where the proposed visual or performing arts #use# is located, pursuant to Sections 97-422 and 97-423. Members of the Bonused Space Local Arts Advisory Council shall be members of the Harlem performing or visual arts, non-profit, or business communities and shall serve at the pleasure of the appointing official. The Department of Cultural Affairs shall provide staff assistance to the Bonused Space Local Arts Advisory Council and shall establish guidelines and procedures for the performance of its functions.

In making a recommendation concerning a Community Engagement Plan pursuant to paragraph (c)(7) of Section 97-423, the Bonused Space Local Arts Advisory Council shall consider the prior history and/or proposed scope of outreach and educational activities in Community Boards 9, 10 or 11 by the proposed operator; and the organizational capacity and commitment of the proposed operator to implement local partnerships under the Community Engagement Plan. The Department of Cultural Affairs shall not submit a letter to the Chairperson of the City Planning Commission pursuant to paragraph (c)(7) of Section 97-423 without having first received and considered the written recommendation of the Bonused Space Local Arts Advisory Council, provided that the Bonused Space Local Arts Advisory Council shall have provided the Department of Cultural Affairs with such written recommendation no later than 45 days following receipt of a request for review from the Department of Cultural Affairs.

4/30/08

97-06

Applicability of Special Transit Land Use District Regulations

Wherever the #Special 125th Street District# includes an area which also lies within the #Special Transit Land Use District#, the requirements of the #Special Transit Land Use District#, as set forth in Article IX, Chapter 5, shall

apply, subject to the modifications described in paragraphs (e) and (f) of Section 97-433 (Street wall location).

The #Special Transit Land Use District# includes the area within the #Special 125th Street District# bounded by a line 50 feet west of Second Avenue from 124th Street midway to 125th Street where such area widens to a line 100 feet west of Second Avenue.

4/30/08

97-10

SPECIAL USE AND LOCATION REGULATIONS

4/30/08

97-11

Special Arts and Entertainment Uses

In order to sustain the arts and entertainment character of the 125th Street corridor, the provisions of this Section shall apply.

- (a) The following #uses# shall be designated as entertainment #uses#:

Auditoriums

Bookstores

Clubs, including music, dance or comedy clubs

Eating or drinking establishments, with table service only

Music stores

Studios, art, music, dancing or theatrical

Studios, radio, television or motion picture.

- (b) The following #uses# shall be designated as visual or performing arts #uses#:

Art galleries
Historical exhibits
Literary arts spaces
Museums
Performance spaces
Primary rehearsal spaces
Theaters
Visual/Media arts spaces.

4/30/08

97-12

Arts and Entertainment Use Requirement

Within the Core Subdistrict, as shown on the map in Appendix A of this Chapter, or for that portion of a #zoning lot# located within the Core Subdistrict, for new #developments# or #enlargements# that contain at least 60,000 square feet of #floor area# and are located on #zoning lots# with frontage on 125th Street, an amount of space equivalent to a minimum of five percent of the #floor area# of the #development# or #enlargement# shall be occupied by one or more of the #uses# designated in Section 97-11 (Special Arts and Entertainment Uses).

4/30/08

97-20

LOCATION AND ACCESS REGULATIONS

Within the #Special 125th Street District#, for any #zoning lot# that fronts upon 125th Street, the #use# regulations of the underlying districts shall be modified by the locational and access requirements of this Section, inclusive. On #through lots# or #corner lots# with frontage

along 125th Street, such requirements shall apply within the first 100 feet of the 125th Street #street line#.

4/30/08

97-21

Location and Access of Arts and Entertainment Uses

Any arts and entertainment #uses# listed in Section 97-11 that are provided in order to comply with the requirements of Section 97-12 (Arts and Entertainment Use Requirement) or Section 97-422 (Floor area bonus for visual or performing arts uses) shall be subject to the following location and access requirements:

The designated #uses# listed in Section 97-11 may be located anywhere throughout a #building# that fronts on 125th Street, subject to the following conditions:

- (a) any such designated #uses# within the Core Subdistrict required pursuant to Section 97-12 shall be accessed from 125th Street; and
- (b) any #residential use# shall be located on a floor wholly above any non-#residential use#; or
- (c) any non-#residential use# may be permitted on the same #story# as a #residential use#, provided that:
 - (1) no access exists between non-#residential uses# and #residential uses# at any level; and
 - (2) non-#residential uses# are not located directly over any #residential uses#.

Such non-#residential use#, however, may be located over a #residential use# by authorization of the City Planning Commission upon a finding that sufficient separation of #residential uses# from non-#residential uses# exists within the #building#.

4/30/08

97-22

Uses Not Permitted on the Ground Floor of Buildings

Within the #Special 125th Street District#, the following #uses# are not permitted at the ground floor level of #developments# and #enlargements# that front upon 125th Street, within 100 feet from 125th Street, or within five feet of the as-built level of the adjoining sidewalk. Entranceways and lobby space for access to such #uses# shall be permitted at the ground floor level, pursuant to the provisions of Section 97-221 (Access to non-ground floor uses).

From Use Group 2:

All #uses#.

From Use Groups 3A and 3B:

All #uses#, except for libraries, museums or non-commercial art galleries.

From Use Groups 4A and 4B:

All #uses#, except for houses of worship or playgrounds.

From Use Group 5A:

All #uses#.

From Use Groups 6A, 6B, 6C and 6E:

Banks (except for automated teller machines, provided the length of #street# frontage allocated for automated teller machines shall be no more than 25 feet or 40 percent of the frontage of the #zoning lot#, whichever is less, measured to a depth of 30 feet from 125th Street, except that such frontage need not be less than 20 feet), electrolysis studios, frozen food lockers, laundry establishments, loan offices, offices or veterinary medicine offices.

From Use Group 6D:

All #uses#.

From Use Group 7:

All #uses#, except for bicycle rental or repair shops.

From Use Groups 8A and 8B:

Automobile driving schools, ice vending machines, lumber stores or pawn shops.

From Use Groups 8C, 8D and 8E:

All #uses#.

From Use Groups 9A, 9B and 9C:

All #uses#, except for gymnasiums, public auction rooms, photographic developing or printing establishments for the consumer, or art, music, dancing or theatrical studios.

From Use Groups 10A, 10B and 10C:

Depositories for storage, and wholesale offices or showrooms.

Use Group 11:

All #uses#.

Use Groups 12A and 12B:

Trade expositions.

Use Groups 12C and 12D:

All #uses#.

Use Group 14A and 14B:

All #uses#, except for bicycle sales, rental or repair shops.

Within the Special District, for #developments# and #enlargements# that are no more than one #story#, a #use# permitted by the regulations of the underlying district shall be allowed.

4/30/08

97-221

Access to non-ground floor uses

Within the Special District, for non-ground floor #uses# listed in Section 97-22 with access from 125th Street, the following requirements shall apply:

- (a) Within the Core Subdistrict the #residential# portion of a #building# may be accessed from an entrance on 125th Street only if such #building# does not front upon a #street# other than 125th Street.
- (b) The length of the ground floor #street# frontage on 125th Street allocated to an entranceway or lobby space shall be no more than 25 linear feet or 40 percent of such #street# frontage, whichever is less, except that an entranceway or lobby space need not be less than 20 feet.
- (c) For a #development# or #enlargement# with more than one entranceway or lobby on 125th Street for non-ground floor #uses#, each entranceway or lobby for #uses# listed in Section 97-22 shall be no more than 25 linear feet and, in the aggregate, shall not exceed 40 percent of such ground floor frontage.
- (d) For #developments# or #enlargements# with at least 200 linear feet fronting on 125th Street, the length of #street# frontage on 125th Street allocated to entranceways or lobby space for such #uses# shall be no more than 40 linear feet.

4/30/08

97-23

Transparency Requirements

For all #uses#, other than houses of worship, libraries and primary rehearsal spaces, located on the ground floor of #developments# and #enlargements# that front upon that portion of 125th Street located within the #Special 125th Street District#, the ground floor #street wall# shall be

glazed with materials which may include show windows, glazed transoms or glazed portions of doors. Such glazed area shall occupy at least 70 percent of the area of each such ground floor #street wall#, measured to a height of 12 feet above the level of the adjoining sidewalk or public access area. Not less than 50 percent of such area shall be glazed with transparent materials and up to 20 percent of such area may be glazed with translucent materials.

4/30/08

97-24

Security Gates

Within the #Special 125th Street District#, all security gates installed after April 30, 2008, that are swung, drawn or lowered to secure commercial or community facility premises shall, when closed, permit visibility of at least 75 percent of the area covered by such gate when viewed from the #street#, except that this provision shall not apply to entrances or exits to parking garages.

4/30/08

97-30

SPECIAL SIGN REGULATIONS

#Signs# for all #uses# within the #Special 125th Street District# shall be subject to the applicable #sign# requirements in Section 32-60, inclusive, subject to the modifications of Sections 97-31 through 97-34, inclusive.

#Marquee signs# for an arts #use# may be combined, subject to the requirements of Section 32-641 (Total surface area of signs).

In the event of a conflict between the provisions of this Section, 97-30, inclusive, and other regulations of the Administrative Code, the provisions of this Chapter shall apply.

4/30/08

**97-31
Definitions**

Marquee

A "marquee" is a permanent structure or canopy located above the primary entrance to an arts #use# fronting on 125th Street, that projects over the sidewalk and is attached to, and entirely supported from, the #street wall# of the #building#. The location and dimensions of the #marquee# shall be determined by the requirements of Sections 97-32.

All marquees shall comply with the construction and maintenance requirements of Title 27, Subchapter 4, Article 9, of the New York City Building Code pertaining to projecting signs, or its successor.

Marquee sign

A "marquee sign" is a #sign#, other than an #advertising sign#, mounted on a #marquee# that identifies the arts #use# and provides informational displays about such #use#.

4/30/08

**97-32
Location, Height and Width of Marquees and Marquee Signs**

For the purposes of this Chapter, #marquees# shall be permitted only above the primary entrance to one of the following #uses# fronting upon 125th Street:

Museums

Performance spaces

Theaters.

Marquees shall project over the sidewalk no more than 15 feet from the #lot line# and shall be no nearer to the curb than two feet.

(a) Height of #marquees#

The minimum height of a #marquee# or a #marquee sign# shall be three feet; the maximum height for such structure and #sign# shall be five feet. No part of a #marquee# or a #marquee sign# shall be located at a height higher than three feet below any floor containing a #residential use#.

(b) Width of #marquees#

The width of a #marquee# or a #marquee sign# shall be no greater than 50 percent of the width of the #building# frontage to which it is attached or 40 feet, whichever is less.

4/30/08

97-33

Vertical Distance above Sidewalk of Marquees and Marquee Signs

The minimum vertical distance from the sidewalk for a #marquee# shall be 12 feet; the maximum vertical distance above the sidewalk for such #marquee# shall be 20 feet.

Notwithstanding the provisions of paragraph (b) of Section 32-653 (Additional regulations for projecting signs), additional #signs# may be displayed on a #marquee#, provided such #sign# is no more than two feet above the #marquee#.

No #marquee# or #marquee sign# shall be located at a height higher than three feet below any floor containing a #residential use#.

4/30/08

97-34

Accessory Signs for Visual or Performing Arts Uses

Notwithstanding the regulations of paragraph (b) of Section 32-653 (Additional regulations for projecting signs) and

the relevant provisions of the Administrative Code, only the following visual or performing arts #uses# fronting on 125th Street within the #Special 125th Street District# shall be permitted to erect a #marquee sign# on or above a #marquee#:

Museums

Performance spaces

Theaters.

Flashing #signs# shall not be permitted as #accessory signs# for arts #uses#.

4/30/08

97-40

SPECIAL BULK REGULATIONS

Within the #Special 125th Street District#, all #residential developments# or #enlargements# shall comply with the requirements of Article II, Chapter 8 (Quality Housing) and the applicable #bulk# regulations of the underlying districts, except as modified in this Section, inclusive.

4/30/08

97-41

Floor Area Regulations

The maximum #floor area ratio#, #open space ratio# and #lot coverage# requirements of the applicable underlying district shall apply within the #Special 125th Street District#, unless modified by the following regulations.

11/19/08

97-411

Maximum floor area ratio in C4-4D, C4-7 and C6-3 Districts

In C4-4D, C4-7 or C6-3 Districts, the maximum permitted floor area ratios for new developments or enlargements shall be as listed in the following table for residential, commercial and community facility uses, and may only be increased pursuant to Section 97-42 (Floor Area Bonuses).

MAXIMUM PERMITTED FLOOR AREA RATIO (FAR)
FOR RESIDENTIAL, COMMERCIAL AND COMMUNITY FACILITY USES

District	Outside the Core Subdistrict			Within the Core Subdistrict		
	#Residential Floor Area Ratio#	Commercial #Floor Area Ratio#	Community Facility #Floor Area Ratio#	#Residential Floor Area Ratio#	Commercial #Floor Area Ratio#	Community Facility #Floor Area Ratio#
C4-4D	5.4	4.0	6.0	5.4	4.0	6.0
C4-7	9.0	10.0	10.0	5.4	7.2	7.2
C6-3	6.0	6.0	6.0	5.4	6.0	6.0

7/29/09

97-42

Floor Area Bonuses

The maximum #floor area ratio# for a #development# or #enlargement# within the #Special 125th Street District# may be increased by a floor area bonus, pursuant to Sections 23-90 (INCLUSIONARY HOUSING), inclusive, or 97-422 (Floor area bonus for visual or performing arts uses), which may be used concurrently.

4/30/08

97-421

Inclusionary Housing

Within the #Special 125th Street District#, C4-4D, C4-7 and C6-3 Districts shall be #Inclusionary Housing designated areas#, pursuant to Section 12-10 (DEFINITIONS), for the purpose of making the Inclusionary Housing Program regulations of Section 23-90 (INCLUSIONARY HOUSING), inclusive, and this Section, applicable within the Special District. Within such #Inclusionary Housing designated areas#, the #residential floor area ratio# may be increased

by an Inclusionary Housing bonus, pursuant to the provisions of Sections 23-90, inclusive.

11/19/08

97-422

Floor area bonus for visual or performing arts uses

In C4-4D, C4-7 or C6-3 Districts within the #Special 125th Street District#, for a new #development# or #enlargement# with frontage on 125th Street, the maximum #floor area ratio# otherwise permitted for #residential# or #commercial uses# listed in Section 97-411 may be increased up to the maximum #floor area ratio# specified in the following table, provided that for every four square feet of bonused #floor area#, an amount of space equivalent to one square foot of such bonused #floor area# shall be used for those visual or performing arts #uses# designated in paragraph (b) of Section 97-11 (Special Arts and Entertainment Uses). Such bonused #floor area# shall be permitted only upon certification by the Chairperson of the City Planning Commission to the Commissioner of Buildings that the conditions set forth in Section 97-423 have been met.

MAXIMUM PERMITTED FLOOR AREA RATIO (FAR)
FOR RESIDENTIAL AND COMMERCIAL USES WITH
FLOOR AREA BONUS FOR VISUAL OR PERFORMING ARTS USES

	Outside the Core District				Within the Core Subdistrict			
	#Residential Floor Area Ratio#		Commercial #Floor Area Ratio#		#Residential Floor Area Ratio#		Commercial #Floor Area Ratio#

C4-7	9.0	12.0	10.0	12.0	5.4	7.2	7.2	8.65
C6-3	6.0	8.0	6.0	8.0	5.4	7.2	6.0	8.00

4/30/08

97-423

Certification for floor area bonus for visual or performing arts uses

The #floor area# bonus provisions of Section 97-422 shall apply only upon certification by the Chairperson of the City Planning Commission to the Commissioner of Buildings that the following conditions have been met:

- (a) Drawings have been provided that clearly designate all #floor area# that will result from the permitted increase in #floor area ratio# pursuant to Section 97-422, including the location of such #floor area#.
- (b) Drawings also have been provided that clearly designate all #floor area# and/or below grade floor space for any new visual or performing arts #uses# for which a bonus is to be received pursuant to Section 97-422.

Such drawings shall be of sufficient detail to show that such designated space shall be designed, arranged and used for the new visual arts or performing arts #uses#, and shall also show that:

- (1) all such visual or performing arts #uses# are located at or above the ground floor level of the #building#, except that performance space meeting the requirements of paragraph (b)(4) may be located below grade, and #accessory uses# may be located below grade, subject to the requirements of paragraph (b)(5);
- (2) all bonused #floor area# or below grade space occupied by visual or performing arts #uses# is primarily accessed from 125th Street;
- (3) in the case of primary rehearsal space, where such space does not consist of #accessory uses# subject to the requirements of paragraph (b)(4) of this Section, such space:
 - (i) can be adapted for rehearsals or performances open to the public;
 - (ii) is located on the first #story# of the #development# or on any higher #story# with

a ceiling height not greater than 60 feet above grade;

(iii) has a #streetwall# with at least 50 feet of frontage along 125th Street, and has a minimum area of 2,000 square feet, with a floor-to-ceiling height of not less than nine feet six inches; and

(iv) complies with the following glazing requirements: At least 70 percent of the total surface area of the #streetwall# abutting the primary rehearsal space, measured from finished floor to ceiling shall be glazed. Furthermore, at least 90 percent of such area shall be transparent from within one foot of the finished floor level to at least eight feet above such level. For primary rehearsal spaces located at the corner of 125th Street and an intersecting #street#, the glazing requirements of this Section shall be applied separately for each #streetwall#, and up to 100 feet along such intersecting #street#;

(4) for performance space which is exclusively designed and arranged for the presentation of live drama, music, dance and interactive or multidisciplinary performances open to the public, such space may be below grade provided it has a minimum area of 2,000 square feet of column-free space with a floor-to-ceiling height of not less than 16 feet;

(5) #Accessory# space

(i) For primary rehearsal spaces, no more than 25 percent of the bonused #floor area# or below grade floor space shall be occupied by #uses accessory# to such primary rehearsal spaces. #Accessory uses# shall include but are not limited to educational and classroom space, administrative offices, circulation space, restrooms and equipment space;

(ii) For visual or performing arts #uses# other than a primary rehearsal space, no more than 40 percent of such bonused #floor area# or below grade floor space shall be occupied by #uses accessory# to such visual or performing arts #uses#, provided no single #accessory use# occupies more than 25 percent of the total bonused #floor area# or below grade floor space. #Accessory uses# shall include but are not limited to educational and classroom space, non-primary rehearsal space, administrative offices, lobbies, circulation space, ticket offices, restrooms, dressing rooms, other backstage areas and equipment space; and

(6) Signage

(i) signage that identifies the visual or performing arts facility shall be provided at the 125th Street entrance of the visual or performing arts facility, subject to the requirements of Section 97-30, inclusive; and

(ii) for below grade performance space subject to the requirements of paragraph (b)(4) of this Section, such #sign#, not including any frame or surrounding element, shall be utilized for the additional purpose of informing the public regarding the program of scheduled performances in such facility, and shall be no less than two feet in width and four feet in height, and shall be installed a minimum of two feet, six inches above grade;

(c) A letter from the Department of Cultural Affairs has been submitted to the Chairperson of the City Planning Commission, certifying that:

(1) a signed lease has been provided from the prospective operator of the visual or performing arts space, or a written commitment from the owner of such space in a form acceptable to the City, if such owner is also the operator, for occupancy of such space, and its operation as a

visual or performing arts space for a period of not less than fifteen years, with two five-year renewal options, pursuant to an operating plan and program therefor;

- (2) the proposed operator of the visual or performing arts space is a non-profit organization;
- (3) the proposed operator of the visual or performing arts space has the fiscal and managerial capacity to successfully operate such space;
- (4) the proposed operator of the visual or performing arts space will have a program of regularly scheduled presentations or performances that are open to the public, provided that, in the case of a visual or performing arts space that is a primary rehearsal space, a program of regularly scheduled rehearsals or performances open to the public shall be required only where the proposed operator is the principal user of the primary rehearsal space. In the event that the proposed operator is not the principal user of the primary rehearsal space and such space is made available to multiple organizations or individuals on an hourly, weekly, monthly or similar basis, the proposed operator shall allow open rehearsals or performances open to the public to be sponsored by such organizations or individuals, upon request;
- (5) preliminary design plans have been provided to the Department of Cultural Affairs for the visual or performing arts space, which shall include sufficient detail regarding core, shell, structural, mechanical, electrical, plumbing and HVAC systems necessary to ensure that such visual or performing arts space will operate efficiently for its intended use;
- (6) a written commitment has been provided ensuring that there are financial resources available for the timely completion of the identified scope of work; and
- (7) the proposed operator of the visual or performing arts space has a Community Engagement Plan that

will effectively encourage public access and use of the visual or performing arts space, provide educational opportunities to the local community, and address new, undeveloped and/or underserved audience or participant groups. The Department of Cultural Affairs shall make its determination concerning the sufficiency of the Community Engagement Plan based upon consideration of the written recommendation of the Bonused Space Local Arts Advisory Council with respect thereto.

- (d) A legal commitment by the owner has been provided:
- (1) for the operator of the visual or performing arts space to submit an annual program report, describing the use of the space during the previous year, to the Chairperson of the City Planning Commission, the Commissioner of the Department of Cultural Affairs, the Manhattan Borough President, the applicable Community Board and the local Council Member; and
 - (2) for inspection and ongoing maintenance of the visual or performing arts space to ensure its continued availability for #use# as a visual or performing arts space. Such inspection shall be conducted every five years by a licensed engineer or architect, and a report identifying the operator utilizing the space, describing the condition of the space and identifying any maintenance or repair work necessary to ensure the physical and operational soundness of such space, and establishing a plan and program for such work, including providing that adequate resources be made available to ensure timely completion of such maintenance or repair work, shall be submitted to the Chairperson of the City Planning Commission and the Commissioner of the Department of Cultural Affairs;
- (e) A legal commitment by the owner has been provided for continued occupancy of all #floor area# for which a bonus has been received, pursuant to this Section, as a visual or performing arts space only in accordance with the drawings and design plans provided pursuant to paragraphs (b) and (c) (5) of this Section, and providing further that in the event of a change of

operator, the owner or operator shall obtain a new certification pursuant to this Section. An #adult establishment# #use# shall be prohibited for the life of the #development#.

(1) notwithstanding the provisions of this paragraph, (e), an owner shall not be in violation of such legal commitment during a grace period consisting of:

(i) six (6) months from the date the visual or performing arts space is vacated by the operator, provided owner timely notifies the Departments of City Planning and Cultural Affairs of such vacancy in accordance with the requirements of the legal commitment;

(ii) the period of review by the Chairperson of the City Planning Commission and the Commissioner of the Department of Cultural Affairs with respect to a new operator and any associated change of design or #use# requirements pursuant to this Section, provided that application for certification pursuant to this Section is made no later than the expiration of the six month period set forth in paragraph (e)(1)(i) of this Section;

(iii) any period set forth in such certification as necessary to allow for the modification of design to accommodate a new operator; and

(iv) any event of force majeure;

(2) in the event that the Chairperson of the City Planning Commission determines that the requirements for certification pursuant to this Section with respect to a change of operator and associated change of design or #use# requirements are not satisfied, the grace period set forth in paragraph (e)(1) of this Section shall thereupon apply from the date of such determination;

(f) A legal commitment by the owner has been provided that all visual arts exhibitions or presentations of live drama, music, dance, interactive or multidisciplinary

performances shall be open to the public in accordance with the terms of the letter issued by the Commissioner of Cultural Affairs, pursuant to paragraph (c) of this Section;

- (g) A legal commitment by the owner has been provided that, in the event of an adjudicated violation of the provisions of paragraph (e) of this Section, requiring the continued occupancy of all #floor area# for which a bonus has been received, pursuant to Section 97-422, as a visual and performing arts space only, the owner shall not permit the occupancy of any #floor area# in the #development# or #enlargement# which is vacant as of the date of such adjudication or thereafter, up to the amount of the increased #floor area# permitted under Section 97-422, until such time as the Chairperson of the City Planning Commission has determined that the visual or performing arts space is occupied in accordance with the provisions of this Section.

Such legal commitments shall be in the form of a declaration of restrictions, filed and duly recorded in the Borough Office of the Register of the City of New York, binding upon the owner of the visual or performing arts space and their successors and assigns, a certified copy of which shall be submitted to the Chairperson of the City Planning Commission. The filing of such declaration and the posting of any bond or other security required by the Chairperson of the City Planning Commission under the terms of such declaration, and receipt of a certified copy of such declaration shall be preconditions to issuance of any building permit, including any foundation or alteration permit, for any #development# or #enlargement#.

The owner shall not apply for or accept a temporary certificate of occupancy for such portion of the #development# or #enlargement# identified under the terms of the declaration of restrictions as utilizing the increased #floor area# permitted pursuant to Section 97-422, and the Department of Buildings shall not issue a temporary certificate of occupancy for such portion of the #development# or #enlargement#, until the Commissioner of the Department of Cultural Affairs has certified that the visual or performing

arts space is substantially complete. The owner shall not apply for or accept a permanent certificate of occupancy for such portion of the #development# or #enlargement#, nor shall the Department of Buildings issue a permanent certificate of occupancy for such portion of the #development# or #enlargement#, until the visual or performing arts space has been finally completed in accordance with the approved plans and such final completion has been certified by the Commissioner of the Department of Cultural Affairs. The declaration of restrictions shall be noted on any temporary or final certificate of occupancy for the #building#. The temporary or final certificate of occupancy for any portion of the #development# or #enlargement# identified under the terms of the declaration of restrictions as utilizing the increased #floor area# permitted pursuant to Section 97-422 shall include the provisions of paragraph (e) of this Section, requiring the continued occupancy of all #floor area# for which a bonus has been received as a visual or performing arts space only, as a condition of occupancy of such portion of the #development# or #enlargement#.

In granting the original certification, the Chairperson of the City Planning Commission may specify such changes in design or #use# that would not warrant further certification pursuant to this Section.

4/30/08

97-43

Special Lot Coverage Regulations

The maximum #lot coverage# for #residential use# in C6-3 Districts within the #Special 125th Street District# shall be 70 percent for #interior# or #through lots# and 80 percent for #corner lots#.

Within the Special District, there shall be no maximum #lot coverage# applied to any #zoning lot# comprising a #corner lot# of 5,000 square feet or less.

4/30/08

97-44

Special Height and Setback Regulations

Within the #Special 125th Street District#, the underlying height and setback regulations shall be modified in accordance with the provisions of this Section, inclusive.

The provisions of paragraph (b) of Section 23-663 (Required rear setbacks for tall buildings in other districts) shall not be applicable within the Special District.

4/30/08

97-441

Permitted obstructions

The provisions of Section 33-42 (Permitted Obstructions) shall apply to all #buildings# within the Special District, except that the provisions of paragraph (c) shall not apply. In lieu thereof, the following regulations shall apply:

Elevator or stair bulkheads, roof water tanks, cooling towers or other mechanical equipment (including enclosures) may penetrate a maximum height limit or #sky exposure plane# provided that either:

- (a) the product, in square feet, of the #aggregate width of street walls# of such obstructions facing each #street# frontage, times their average height, in feet, shall not exceed a figure equal to eight times the width, in feet, of the #street wall# of the #building# facing such frontage; or
- (b) for #buildings# at least 120 feet in height, the #lot coverage# of all such obstructions does not exceed 20 percent of the #lot coverage# of the #building#, and the height of all such obstructions does not exceed 40 feet.

In addition, dormers may penetrate a maximum base height in accordance with the provisions of paragraph (c) of Section 23-621 (Permitted obstructions in certain districts).

11/19/08

97-442

Height and setback regulations for C4-7 and C6-3 Districts

The following modifications of the underlying district regulations shall apply for C4-7 and C6-3 Districts within the Special District:

- (a) The minimum and maximum base height of the #street wall# and the maximum height of a #development# or #enlargement# shall be modified, as set forth in the following table:

MINIMUM BASE HEIGHT, MAXIMUM BASE HEIGHT AND
MAXIMUM BUILDING HEIGHT

District	Street Wall Height (in feet)		Maximum Building Height (in feet)
	Minimum Base Height	Maximum Base Height	
C4-7	60	85	195
C6-3	60	85	160

All portions of buildings that exceed a height of 85 feet in C4-7 and C6-3 Districts shall be set back at least 15 feet from the #street line#, except that such setback depth may include the depth of any permitted recess in the #street wall#, according to the provisions of 97-433 (Street wall location).

- (b) Special regulations for certain C4-7 Districts
- (1) For the area located within 50 feet of the 126th Street frontage and between 200 feet east of Adam Clayton Powell Boulevard and 150 feet west of Lenox Avenue/Malcolm X Boulevard, the height of any portion of a #development# or #enlargement# shall be limited to 80 feet.

- (2) For #zoning lots# bounded by 125th Street, Park Avenue and 124th Street, the maximum #building# height shall be 330 feet.
 - (3) For Lots 1 and 7501 on Block 1910, the requirements of City Environmental Quality Review (CEQR) Environmental Designation Number (E-102) have been modified, as set forth in the Technical Memorandum to the Final Environmental Impact Statement for CEQR Number 07DCP030M, dated July 18, 2008.
- (c) In C6-3 Districts, the maximum length of any #story# located above a height of 85 feet shall not exceed 150 feet. Such length shall be measured by inscribing within a rectangle the outermost walls at the level of each #story# entirely above a height of 85 feet. No side of such rectangle shall exceed a width of 150 feet.

4/30/08

97-443

Street wall location

In all #Commercial Districts# within the #Special 125th Street District#, the #street wall# of any #development# or #enlargement# shall be located on the #street line# of 125th Street and extend along the entire #street# frontage of the #zoning lot# up to at least the applicable minimum base height of the underlying district, or the height of the #building#, whichever is less.

The #street wall# location provisions shall be modified, as follows:

- (a) On Park Avenue, within 10 feet of its intersection with any #street#, the #street wall# may be located anywhere within 10 feet of the Park Avenue #street line#. However, to allow articulation of the #street walls# pursuant to the provisions of paragraph (b) of this Section, the #street walls# may be located anywhere within an area bounded by a #street line#,

the #street wall# on Park Avenue and a line connecting these two lines 15 feet from their intersection.

- (b) To allow articulation of #street walls# at the intersection of any two #streets# within the Special District, the #street wall# may be located anywhere within an area bounded by the two #street lines# and a line connecting such #street lines# at points 15 feet from their intersection.
- (c) Recesses, not to exceed three feet in depth from the #street line#, shall be permitted on the ground floor where required to provide access to the #building#. Above a height of the second #story# and up to the applicable maximum base height, recesses are permitted for #outer courts# or balconies, provided that the aggregate length of such recesses does not exceed 30 percent of the length of the #street wall# at any level, and the depth of such recesses does not exceed five feet. No recesses shall be permitted within 20 feet of an adjacent #building# or within 30 feet of the intersection of two #street lines#, except in compliance with corner articulation rules.
- (d) All #developments# or #enlargements# shall comply with the #street wall# location and minimum #street wall# height provisions of this Section, except that such requirements shall not apply to any existing #buildings# that are to remain on the #zoning lot#.
- (e) For any #development# or #enlargement# within the #Special 125th Street District# that is partially within the #Special Transit Land Use District# and located directly over the planned Second Avenue subway line tunnel, the #residential# portion of such #development# or #enlargement# may be subject to the R8A #street wall# requirements and the commercial portion of such #development# or #enlargement# may be subject to the C4-4D #street wall# requirements in lieu of the requirements of this Section.
- (f) The requirements of this Section shall apply within the #Special Transit Land Use District# except that, for the area of the #Special Transit Land Use District# that is also within the #Special 125th Street District#, a #street wall# of a #development# or #enlargement# located on the #street line# of a

#zoning lot# need not exceed 15 feet if that portion of the #development# or #enlargement# is located directly over the planned Second Avenue subway line tunnel.

4/30/08

97-45

Special Provisions for Zoning Lots Divided by District Boundaries

The regulations of Article VII, Chapter 7 (Special Provisions for Zoning Lots Divided by District Boundaries) shall apply within the #Special 125th Street District#, except that for any #zoning lot# that is completely within the Core Subdistrict, #floor area# may be located anywhere on such #zoning lot# without regard to the requirements of Section 77-22 (Floor Area Ratio), subject to the applicable height and setback regulations.

4/30/08

97-50

SPECIAL OFF-STREET PARKING AND OFF-STREET LOADING REGULATIONS

The underlying provisions of Article II, Chapter 5, Article III, Chapter 6 and Article IV, Chapter 4 (Accessory Off-Street Parking and Off-Street Loading Regulations) shall apply within the #Special 125th Street District#, subject to modification by the regulations of this Section, inclusive.

Enclosed parking spaces, or parking spaces covered by a #building#, including such spaces #accessory# to #residences# shall be permitted to occupy the ground floor provided they are located beyond 30 feet of the #street wall# of the #building#.

The applicable district regulations for the location of #accessory# off-street parking spaces along 125th Street within the Special District may be modified, so that such facilities may be provided off-site, within a #Commercial

District#, but at a distance no greater than 1,200 feet from the #zoning lot#.

4/30/08

97-51

Required Accessory Off-Street Residential Parking

#Accessory# off-street parking spaces, open or enclosed, shall be provided for all #developments# or #enlargements# within the #Special 125th Street District# that contain #residences#, according to the provisions of the underlying district, as modified by the provisions of Section 97-50 (SPECIAL OFF-STREET PARKING AND OFF-STREET LOADING REGULATIONS), inclusive.

4/30/08

97-52

Required Accessory Off-Street Commercial Parking

In #Commercial Districts# within the #Special 125th Street District#, #accessory# off-street parking spaces shall be provided if required by Section 36-21, as modified by the provisions of Section 97-50 (SPECIAL OFF-STREET PARKING AND OFF-STREET LOADING REGULATIONS), inclusive, except that no #accessory# parking spaces shall be required for #commercial uses# in C4-4D Districts.

4/30/08

97-53

Location of Access to the Street

Curb cuts for entrances and exits to #accessory# off-street parking facilities or for loading berths shall not be located on 125th Street or any other #wide street# that intersects with 125th Street, other than under the specific conditions of Sections 97-55 (Certification for Access to Required Uses) and 97-56 (Authorization for Access to Permitted Uses).

Such certification or authorization shall not be required if parking and loading requirements can be met through the provisions of 97-54 (Parking Access through Residential Zoning Lots).

4/30/08

97-54

Parking Access through Residential Zoning Lots

When a #residential zoning lot# fronts upon either 124th or 126th Street within the #Special 125th Street District# and the #rear lot line# abuts a #zoning lot# that fronts only on 125th Street, and such #zoning lot# has been vacant since April 30, 2008, access for parking and loading purposes may be made through such #zoning lot#.

4/30/08

97-55

Certification for Access to Required Uses

If access to a required #accessory residential# parking facility or loading berth is not possible because of the requirements of Section 97-53, a curb cut may be allowed if the City Planning Commission certifies to the Commissioner of Buildings that such location is:

- (a) the only possible location for the facility or loading berth;
- (b) not hazardous to traffic safety;
- (c) located not less than 50 feet from the intersection of any two #street lines#; and
- (d) constructed and maintained so as to have a minimal effect on the streetscape.

Such curb cut, if granted, shall be no greater than 20 feet in width.

The Commissioner may refer such matter to the Department of Transportation, or its successor, for a report and may base the determination on such report.

4/30/08

97-56

Authorization for Access to Permitted Parking Facilities or Loading Berths

The City Planning Commission may authorize curb cuts for the following parking facility or loading berths:

- (a) If access to a permitted #accessory residential# or public parking facility is not possible due to the requirements of Section 97-53, the City Planning Commission may authorize curb cuts for such #uses#, provided such curb cuts:
 - (1) will not create or contribute to serious traffic congestion or unduly inhibit vehicular and pedestrian movement; and
 - (2) will not interfere with the efficient functioning of public transit facilities.

- (b) If access to a permitted loading berth is not possible due to the requirements of Section 97-53, the City Planning Commission may authorize curb cuts for such #use#, provided:
 - (1) such loading berths are adjacent to a fully enclosed maneuvering area on the #zoning lot#;
 - (2) such maneuvering area is at least equal in size to the area of the loading berth; and
 - (3) there is adequate space to permit head-in and head-out truck movements to and from the #zoning lot#.

Such curb cut, if granted, shall be no greater than 20 feet in width.

The Commissioner may refer such matter to the Department of Transportation, or its successor, for a report and may base the determination on such report.

Applications for authorizations shall be referred to the affected Community Board for a period of at least 30 days for comment. The City Planning Commission shall grant in whole or in part or deny the application within 60 days of the completion of the Community Board review period.

4/30/08

97-57

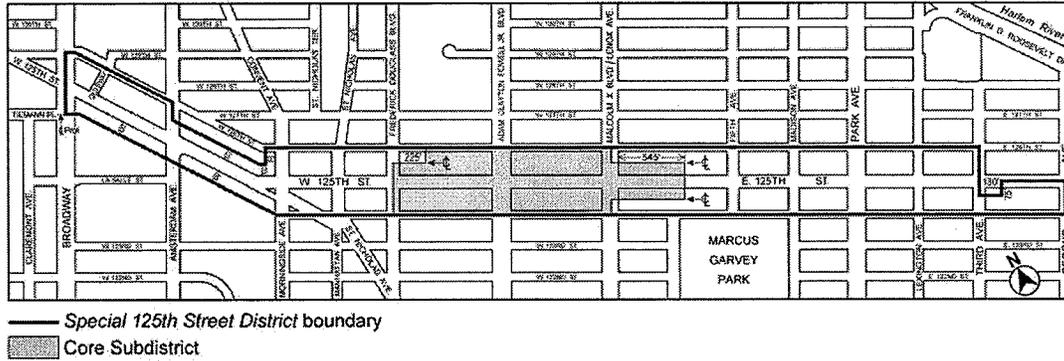

Public Parking Facilities

Notwithstanding the special permit regulations of Section 74-52 (Parking Garages or Public Parking Lots in High Density Central Areas), #public parking garages# with 150 spaces or less shall be permitted as-of-right in C4-7 and C6 Districts, subject to the requirements of Section 36-50, inclusive, pertaining to surfacing and screening, and Section 97-53 (Location of Access to the Street). #Public parking garages# with more than 150 spaces shall be subject to the requirements of Sections 74-512 and 74-52.

#Public parking lots# are not permitted on zoning lots with 125th Street frontage within the Special District.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

City Directory Report. Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

Options for Selecting Adjoining Properties. Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.
4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit www.edrnet.com/2009enhancements

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2006. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

City Directory Report. Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

Options for Selecting Adjoining Properties. Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.
4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit www.edrnet.com/2009enhancements

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2006. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

The EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

City Register Official Signature

THIS INDENTURE, made the 7th day of January, 2004 and
BETWEEN

Lande Realty Corporation, with an office at 224 West
82nd Street, New York, NY 10024

party of the first part, and

113 West 124th Street LLC, with an office c/o Wharton
Realty, Room 1200 at 20 East 46th Street, New York,
NY 10017

party of the second part.

WITNESSETH, that the party of the first part, in consideration of ten dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the

Borough of Manhattan, City and State of New York, designated on the Tax Map of the City of New York, for the Borough of Manhattan, as said Tax Map was on July 16, 1977 and February 10, 1976, respectively.

Section 7 Block 1909 Lots 25 and 140.

known as 113 West 124th Street, [Ⓢ] and 283 West 125th Street, NY
New York, New York

Being the same premises conveyed to the party of the first part from The City of New York by deed dated 3/7/89 and recorded 3/14/89 on Reel 1547 Page 1145.

This conveyance has been made with the consent of the holders of all the outstanding shares of the party of the first part entitled to vote thereon.

TOGETHER with all right, title and interest, if any, of the party of the first part, in and to any streets and roads abutting the above-described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

WITNESSETH, that the party of the first part, in consideration of ten dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Manhattan, City of New York, State of New York identified as follows:

ALL THAT lot or parcel of land, in the Borough of Manhattan, City, County and State of New York, bounded and described as follows:

BEGINNING at the corner formed by the intersection of the northerly side of West 124th Street and the westerly side of Lenox Avenue;

RUNNING THENCE northerly, along said westerly side of Lenox Avenue, 201 feet 10 inches to the southerly side of West 125th Street;

THENCE westerly, along said southerly side of West 125th Street, 150 feet;

THENCE southerly, parallel with Lenox Avenue and part of the distance through two party walls, 201 feet 10 inches to said northerly side of West 124th Street; and

THENCE easterly, along said northerly side of West 124th Street, 150 feet to the point or place of BEGINNING.

Premises known as 281-297 Lenox Avenue a/k/a 101-111 West 124th Street a/k/a 101-111 West 125th Street, New York, N.Y. and designated as Section 7 Block 1909 Lots 26, 27, 28, 29, 29, 30, 31, 32, 33, 38 and 39 as shown on the Tax Map.

Being the same premises conveyed to the grantor from Eldicon Corporation by deed dated 10/31/46 and recorded 11/1/46 in Liber 4472 Page 667.

This conveyance has been made with the consent of the holders of at least two-thirds of the outstanding shares of the party of the first part entitled to vote thereon at a meeting duly called.

TOGETHER with all right, title and interest, if any, of the party of the first part, in and to any streets and roads abutting the above-described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

The EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

THIS INDENTURE, made the 7th day of January, 2004 and
BETWEEN

Lande Realty Corporation, with an office at 224 West
82nd Street, New York, NY 10024

party of the first part, and

113 West 124th Street LLC, with an office c/o Wharton
Realty, Room 1200 at 20 East 46th Street, New York,
NY 10017

party of the second part.

WITNESSETH, that the party of the first part, in consideration of ten dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the

Borough of Manhattan, City and State of New York,
designated on the Tax Map of the City of New York, for
the Borough of Manhattan, as said Tax Map was on July 16,
1977 and February 10, 1976, respectively.

Section 7 Block 1909 Lots 25 and 140.

known as 113 West 124th Street, [Ⓢ] and 283 West 125th Street, NY
New York, New York

Being the same premises conveyed to the party of the first part from The City of New York by deed dated 3/7/89 and recorded 3/14/89 on Reel 1547 Page 1145.

This conveyance has been made with the consent of the holders of all the outstanding shares of the party of the first part entitled to vote thereon.

TOGETHER with all right, title and interest, if any, of the party of the first part, in and to any streets and roads abutting the above-described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the part of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

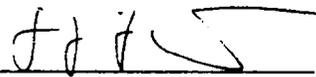

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

REGISTRATIONS:

Registered Professional Engineer – New York – New Jersey

SUMMARY QUALIFICATIONS

Mr. Landes has twenty-eight years project engineering and management experience, the last 15 years as a senior consultant and the prior seven years as manager of engineering and environmental affairs for a worldwide organic and specialty chemical manufacturer. Experience includes environmental compliance audits, risk management and due diligence assignments in the United States and Internationally, Phase I and Phase II environmental assessments, power plant site selection and permitting evaluation, remedial investigations, feasibility studies and remedial measures for transportation-related, industrial and manufacturing facilities. Mr. Landes has managed assignments throughout North and South America, western and central Europe, and Australia. Expertise includes soil and groundwater remediation, permitting, risk management and hazard assessment.

RELEVANT EXPERIENCE

Peter Cooper Village/Stuyvesant Town, New York, NY Mr. Landes managed a team that prepared an Environmental Assessment of both properties, which consisted of 21 residential buildings at Peter Cooper Village and over 100 residential and commercial buildings at Stuyvesant Town. Both communities are home to approximately 25,000 residents. The properties which encompass approximately 100 acres on the east side of Manhattan is home to four former Con Edison manufactured gas plant properties including manufacturing and gas storage facilities. Extensive site characterization work was completed by Con Edison. Our due diligence teams summarized the available data and provided an accurate assessment of environmental conditions on both sites. Environmental Assessment Reports were provided to prospective buyers of the properties. During the negotiations, Mr. Landes provided answers to buyer's questions. This ultimately concluded as the largest real estate deal in history (\$5.4 Billion).

New York City Board of Education – Provided senior environmental and geotechnical consultation to the Chief Executive of Board of Education's Division of School Facilities. Assisted in the decision on the development of new additions to an existing school that was constructed on a site formerly used to manufacture pharmaceuticals in Brooklyn, NY. Numerous remedial investigation and remediation reports were reviewed as well as the owner's conceptual plans for the additions (PS 333). Concerns identified included protection of the health and safety of children, workers and the general public during construction, and the ability to maintain the integrity of a proposed vapor barrier.

JOEL B. LANDES, P.E.

Silverstein Properties, New York – Provided environmental services to assist in the redevelopment of the 7 World Trade Center site destroyed in the 9/11 attacks.

1. Prepared Environmental Assessment Forms as required under the New York SEQRA for the development project.
2. Evaluated previous investigations and developed and implemented a soil and groundwater management plan, approved by NYSDEC, for the excavation of approximately 25,000 cubic yards of soil and demolition of subsurface building features to allow for the construction of a new building foundation.
3. Planned, provided oversight and prepared a closure report (received NYSDEC NFA letter) for the removal of two vaulted 11,500-gallon fuel oil USTs.
4. Provided oversight for the excavation and removal of two 6,500-gallon fuel oil USTs that were damaged and spilled during the 9/11 attacks.

Silverstein Properties, New York – Program Manager for the preparation of specification for management of clean and contaminated soil at the site of a proposed high-rise residential building in midtown New York City. Investigation of subsurface soil and groundwater indicated that the site had been used as a service station and for the manufacture of gas at the turn of the century. The specifications included provisions for handling, characterization and disposal of soil and groundwater that would be disturbed during construction of a subsurface parking garage in the proposed building, and to protect the health of construction workers and future occupants from potential exposure to contaminants.

Pnemo Abex, Cleveland, Ohio – Mr. Landes managed the investigation and cleanup of a 700,000 sq. ft. former aircraft parts manufacturing facility under the Ohio Voluntary Action program. The facility had been in disuse for many years. Through initial site inspections and surveys, our team developed plans and specifications for the decontamination of building components, including wood block floors, asbestos, lead-based paint, and various pits, drains and sumps. Plans and specifications were also prepared for demolition of building, and remediation of soil and groundwater.

Waterside Generating Plant and Office Building, New York, New York

Mr. Landes managed a team that participated with other consultants, attorneys and insurance brokers to evaluate the risks of purchasing and redeveloping four Con Edison properties, one a 1.2 million sq. ft. office and service building that was a former manufactured gas plant (MGP) and one an operating steam and electric generating station covering 6 acres. Based on the limited data available, Langan recommended a geotechnical and environmental investigation program be implemented to evaluate the need for estimate the cost of remediation and redevelopment. The data collected was utilized, along with Langan's construction and remediation experience to evaluate potential remedial cost. A Monte Carlo simulation was developed to assess all probabilities for potential scenarios. Findings indicated that previous estimates were inadequate to cover most probable scenarios. Recommendations were provided to assure adequate insurance coverage.

The Hertz Corporation, New Jersey – Responsible for their program to prepare SPCC Plans for over 200 Hertz car and truck rental facilities throughout the United States. Coordinated and managed six separate operations offices and Professional Engineers in more than 20 states to accomplish this task.

JOEL B. LANDES, P.E.

Sterling Organics, Division of Sterling Drug, Inc., Rensselaer, New York – Responsible for environmental compliance and affairs for a 27 acre specialty chemical and pharmaceutical intermediates manufacturing facility.

- Responsible for preparing and implementing an SPCC Plan for this entire facility. Storage included more than 100,000 gallons of inorganic liquids, 20,000 gallons of fuel oil and 60,000 gallons of organic solvents.
- Filed and obtained permits for over 300 individual emission points for numerous organic chemicals utilized as raw materials and process by-products. These emission points included process vents, general and local exhaust systems, vacuum discharges and storage tanks. Full compliance required two years of negotiation with NYSDEC representatives during which no violations were issued.
- Responsible for the disposal of all solid and hazardous waste generated by the facility. Personally conducted compliance audits of waste transportation contractors and treatment, storage and disposal facilities including landfills, incinerators and fuel processing facilities.
- Responsible for maintaining compliance with wastewater pretreatment requirements and reducing the quantity of contaminants discharged into the wastewater pretreatment system. Conducted internal assessments of plant processes and designed systems that resulted in waste discharge reductions. Provided liaison between plant management and local sewer authority.
- Advised management on environmental impacts of proposed processes.

Confidential Metal Processor, Sofia, Bulgaria – Conducted an environmental, health and safety compliance audit of a privatized copper processing facility. The audit was performed in accordance with World Bank and European Union guidelines and included assessment of air discharge to the atmosphere (including impact on public health) and into the workplace, wastewater discharge to the local sewer treatment system, groundwater discharges from injection wells and stormwater runoff, and noise generation. Also evaluated were former waste disposal practices and current liabilities. Performed air, soil and groundwater investigations and developed baseline environmental conditions of the facility from the point of acquisition. Assisted the client in obtaining financing from the World Bank for proposed environmental improvements.

Confidential Independent Power Producer, Midwest, Mid Atlantic and South – Managed implementation of fatal flaw analyses to evaluate power plant permitting in the following states: Illinois, Maryland, Delaware, New Jersey, Pennsylvania, Kentucky, Ohio and Arkansas. Responsible for developing the technical strategy, selecting the project team, reviewing all deliverables and assisting in the presentations of results to the client. Scope of Work included development and implementation of a Geographic Information System (GIS) tool to assist in locating sites suitable for siting power plants in the PJM region. Collected location data for pipelines, transmission lines, power plants, wastewater treatment plants, land use, population density and other factors, integrated this data into our GIS database and created source maps showing preferred sites. This tool has proven itself through the savings in time and effort to screen a proposed power plant site.

TXU Energy, Brooklyn, New York – Evaluated the Article X Public Service Commission submittal to license a 530 MW, combined cycle power generation facility in Brooklyn, New York. This assignment was part of our due diligence for the acquisition of the right to complete the

JOEL B. LANDES, P.E.

licensing and develop a new power generation site to be constructed on a barge and moored at a Brooklyn pier in Upper New York Bay. Reviewed the impact analysis particularly with respect to the use of river water for cooling on a once-through basis. Found insufficient attention spent on the key stakeholders including the Bay Keeper and accurately predicted significant delays in obtaining the necessary approvals.

Colgate-Palmolive, Paris, France, Mexico City, Mexico, Brazil and Argentina, South America – Managed environmental compliance and due diligence, soil and groundwater investigations, and remedial planning and implementation for the divestiture of manufacturing facilities for Colgate-Palmolive.

CPC International, New Jersey and Illinois – Compliance audits and due diligence of 5 pharmaceutical and specialty chemical manufacturing facilities.

Confidential IPP, Virginia – Due diligence for the acquisition of 7 coal-fired PEPCO power generation facilities in Washington, DC, Delaware and Virginia.

Sithe Energy, New York – Due diligence for the construction of a co-generation facility on the site of pharmaceutical manufacturing facility in Kenilworth, NJ.

Confidential Pharmaceutical Co., Europe, Caribbean, Africa - Due diligence for the acquisition of 24 health care product manufacturing facilities. Phase II site investigations were conducted at each of the facilities. The entire project was managed and the work coordinated from New Jersey.

AMF, Throughout US, Australia, Puerto Rico – Due diligence for the acquisition of 285 manufacturing and end use sporting goods facilities (bowling alleys).

Riverwood, US, Mexico, Central and South America – Due diligence of 14 wood products manufacturing facilities, including two pulp plants. Phase II investigations and permitting assessment were conducted at the facilities.

FPL Energy, Florida – Due diligence for the acquisition of 32 power generation facilities in New Jersey and Massachusetts.

American Home Products, Mexico – Due diligence of a consumer products manufacturing facility for acquisition.

NL Chemicals, New Jersey and Missouri – A hazard and risk assessment of diisocyanate manufacturing facilities. Developed detailed Process and Instrument diagrams, developed and implemented a modified HazOp study to identify, quantify and prioritize potential accidental discharges, and finally, modeled toxic releases and developed recommendations for process alterations.

Elizabethtown Gas Co., - Elizabeth, NJ – Developed and conducted remedial investigations of two former manufactured gas plant sites. Assisted the utility and outside counsel with the negotiation of a Memorandum of Agreement with NJDEP. Recommendations for remedial action justified in the RIR included paving over localized areas that exceeded soil cleanup

JOEL B. LANDES, P.E.

criteria, a Declaration of Environmental Restriction and natural attenuation of groundwater contamination.

New Jersey Turnpike Authority, East Brunswick, NJ – Provided Quality Review for the NJ Turnpike widening project from Exit 11 to Exit 15. This included review and discussion of proposed strategies, such as the reuse of contaminated soil as underlying roadway fill prior to submittal to NJDEP for approval, and review of all proposals and reports prior to deliver to client.

YEARS OF EXPERIENCE: 11

SUMMARY QUALIFICATIONS

Mr. Burke is a Geologist/Environmental Scientist whose experience involves site investigation and remediation, environmental site assessments, in-situ remedial technology, sub-slab depressurization system design, emergency response, environmental and geotechnical site investigations, and health and safety monitoring. Mr. Burke has experience with projects in the NYSDEC Brownfield Cleanup, Voluntary Cleanup, and Spill Programs and NYCDEP "E" Designated sites. He has extensive experience in soil and groundwater investigation and remediation, design of in-situ chemical oxidation and enhanced bioremediation strategies, Phase I Site Assessments, Phase II site investigations, UST Closures, NYSDEC spill closure, remedial excavation oversight, and excavation and off-site treatment and/or disposal of contaminated soils.

RELEVANT EXPERIENCE

82 Irving Place, New York, NY – Served as the project manager for a catastrophic fuel tank rupture within a residential building in historic Gramercy Park, Manhattan. Duties included, but were not limited to, remedial investigation utilizing limited access investigation techniques, health and safety monitoring, and preparation of a remedial action plan. After petroleum impacts were adequately delineated, he managed the remedial measures, completed in accordance with a NYSDEC-approved Remedial Action Plan. Most work was completed utilizing Level C personal protection equipment within a negative pressure enclosure. Mr. Burke served as liaison for the building co-op board, lawyers, DEC and insurance carrier for this project.

1113 York Avenue, New York, NY – Served as the project manager for the closure of 17 underground storage tanks and management of the associated soil remediation at a former car dealership in the Lenox Hill Section of Manhattan, New York. Site activities were conducted under NYCDEP and NYSDEC Spill Prevention and Response Section's oversight. Duties included, but were not limited to the following: NYS BCP application, spill reporting, coordination of investigation and remediation activities, registration and closure of decommissioned underground storage tanks, vapor mitigation, mass excavation and disposal of approximately 25,000 tons of petroleum-impacted soil, development of an odor control and monitoring program, preparation of a NYSDEC and NYCDEP approved Spill Closure Work Plan, MTA coordination, and NYSDEC correspondence. Site work is ongoing.

MICHAEL D. BURKE

Peter Cooper Village/Stuyvesant Town, New York, N.Y. – served as the project manager for the Phase I Environmental Site Assessment of the largest real estate transaction in U.S history. The Phase I was conducted, on an expedited schedule, in accordance with the user’s standard scope of services, and in conformance with the ASTM Standard Practice for Environmental Site Assessments E1527-05 and the USEPA’s All Appropriate Inquiry rule for the purpose of identifying recognized environmental conditions in connection with the subject property. Due diligence included comprehensive review of environmental databases and existing environmental reports. The subject property is a residential development, built on a former MGP site, consisting of 90 acres and 110 buildings on the east side of Manhattan, New York.

Superior Ink, New York, NY – served as the project manager providing oversight for a former commercial site (Superior Ink), which since November 2004, has been in the process of removing petroleum contaminants that were found to have leaked from an underground storage tank (previously removed). Duties included the preparation and implementation of a Waste Characterization Plan and a NYSDEC and NYCDEP-approved Remedial Action Plan, preparation of a NYS BCP application, due diligence for soil disposal, point sampling and soil remediation, confirmation of acceptable residual contamination levels for NYSDEC, remediation oversight, and SSDS and vapor mitigation design. The NYSDEC requirements for spill closure have been met and the spill has been administratively closed. A Final Engineering Report has been submitted to the NYCDEP and a Notice of Satisfaction is eminent.

Bronx Mental Health Redevelopment Project, Bronx, NY – Langan provided due diligence services for redevelopment of the existing hospital facilities that will include a new Adult Facility, Children’s Facility, a Transitional Living Facility, Work Control Facility, and Campus Utilities. The project budget is around \$250 million. As project manager, Mr. Burke was responsible for Phase I services in accordance with the USEPA AA1 Rule and ASTM 1525-05 regulations. Duties included due diligence management and operations including a complete historical review of the site; environmental database review, and comprehensive review of available environmental reports. Services for this 80-acre site were conducted in accordance with DASNY requirements.

2950 Atlantic Avenue, East New York, Brooklyn, NY – Mr. Burke served as project manager in charge of overseeing the site characterization investigation at a Con Edison garage facility. Responsibilities included subsurface investigation to differentiate gasoline contamination from MGP impacts resulting from the operations of a separate responsible party. Duties included installation of 14 soil borings (later converted to permanent monitoring wells), sampling/ testing of monitoring wells contaminants, natural attenuation modeling using the USEPA BIOSCREEN Natural Attenuation Decision Support System model, and preparation of a site characterization report to detail findings for NYSDEC.

Con Edison, East 74th Street Generating Station, New York, NY – served as the project manager for a subsurface investigation of a kerosene spill in the basement of an active Con Edison steam generating facility. Based on the findings of the investigation, Mr. Burke designed the remediation program required to close out the NYSDEC spill number, prepared a NYSDEC approved remedial action plan, and generated the construction bid package. Remediation performed within restricted access under a negative air enclosure. Basement floor drains were replaced and reinforced concrete slab restored to its original condition. Site work is ongoing.

Gowanus Village I, Brooklyn, NY – Managed the implementation of a Remedial Investigation Work Plan for a NYS BCP project sited on a 3.5 acre former coal-fired power plant and sulfur works. Duties included, but were not limited to, implementation of a remedial investigation, preparation of a RIR, and coordination with NYSDEC and NYSDOH.

Con Edison, First Avenue Properties, New York, NY – served as the Assistant Project Manager and Environmental Site Supervisor for the demolition, remedial investigation and excavation of a Con Edison

MICHAEL D. BURKE

Steam Plant, Office Building and associated structures. Most remedial and investigation actions were performed in an active Con Edison steam generating station. Soil was excavated to accommodate site development for commercial and residential use. Duties included but were not limited to the following: report preparation, supervision of field personnel, contractor oversight, implementation of enhanced receptor and soil gas surveys, operations monitoring and maintenance, oversight of cofferdam and slurry wall construction, and addressing questions and concerns from the client and sub-contractors. Responsible for adhering closely to the NYSDEC approved Work Plan and ensuring that remediation activities were completed accordingly.

Queens West Development Corp. Stage II, Long Island City, NY – served as the Assistant Project Manager and Site Remediation Supervisor for the implementation of a large scale Remedial Investigation/Remedial Action conducted as part of the NY State Voluntary Clean-Up Program. Duties included but were not limited to the following: construction management, onsite coordination of remediation activities, scheduling of sub-contractors and field team, report preparation, supervision of onsite personnel, addressing questions and concerns of the client. Responsible for adhering closely to the approved Work Plan and ensured that remedial activities were completed accordingly. Remedial activities included: investigation and closure of four USTs and numerous reported spills, mass excavation and disposal of impacted soils, geoprobe investigations, and soil vapor sampling for the purpose of sub-slab depressurization system design, implementation of enhanced odor control and monitoring program, design and implementation of enhanced bioremediation and in situ chemical oxidation and marine spill response. Upon completion of remediation activities in each operable unit, an Interim Remedial Measures Final Report was generated and summarized all of the remedial work. Project is ongoing.

Poletti Generating Station, Astoria, NY – served as project geologist for a baseline subsurface investigation at an active NY Power Authority facility. Responsibilities included but were not limited to the following: coordination of investigation activities with drilling subcontractors, involved in daily coordination meetings, health and safety oversight, soil boring and groundwater monitoring well installation and addressing questions and concerns of the client. Following completion of investigative work, coordinated the preparation of a Preliminary Site Assessment report.

Arthur Kill Generating Station, Staten Island, NY – served as the environmental site supervisor and health and safety officer for an investigation and remediation oversight program at an active Con Edison facility in Staten Island, NY. Work was performed during a critical response period following a large PCB spill in which there was intense federal, state and city scrutiny. Involved in daily coordination meetings, scheduling, cost control, field design modifications, and daily interaction with sub-contractors and regulatory agencies. Remedial actions included excavation, removal and dewatering of PCB contaminated sediment, in a discharge canal and treatment of resulting wastewater, and scarification of PCB-contaminated brick within the building structure.

K. Hovanian, New Jersey Development Sites, N.J. – served as a field geologist for septic feasibility studies, preliminary geotechnical assessments and oversight of building foundation installations in numerous geologic settings in New Jersey.

LANGAN START: 2007

YEARS OF EXPERIENCE: 10

SUMMARY OF QUALIFICATIONS

Ms. Armstrong has 10 years of experience working on environmental projects in New York. She has conducted Phase I and II Environmental Site Assessments, soil vapor and indoor air quality surveys, and waste characterization investigations. She has also developed remediation investigation and work plans. Her field experience includes soil, soil vapor, groundwater, and indoor air investigations, remedial excavation oversight, and Community Air Monitoring Program (CAMP) management. Ms. Armstrong also has several years of experience in evaluating asbestos consultants and contractors.

LANGAN EXPERIENCE

New York City School Construction Authority (NYCSCA), Various Sites in New York City – Environmental due diligence, including 16 Phase I Environmental Site Assessments for new acquisitions and lease sites. Project sites were located throughout the five boroughs and consisted of properties with various land uses including auto repair facilities, former filling stations and manufacturing facilities, and other commercial properties. Ms. Armstrong has also prepared investigation work plans, performed Phase II Environmental Site Investigations, sub-surface investigations and Indoor Air Quality Investigations for several NYCSCA projects.

84 West 3rd Street, New York, NY – Phase I Environmental Site Assessment and Soil Vapor Investigation. Ms. Armstrong prepared a Phase I Environmental Site Assessment and subsequently performed a Soil Vapor

JENNIFER ARMSTRONG, LEED AP

Intrusion Investigation consisting of sub-slab soil vapor, indoor air, and ambient air samples.

John Jay College Expansion, New York, NY – Project involved the demolition of a parking garage and construction of a multi-story academic building at John Jay College located on 11th Avenue between 58th and 59th Streets. Ms. Armstrong managed the project's Community Air Monitoring Program Management (CAMP) at the site, monitored the serpentine (asbestos-containing) rock and petroleum contaminated soil excavation, and managed the load out and transportation of contaminated soil and rock. She also conducted due diligence of the disposal facilities suggested by the foundation construction contractor.

Pelham Plaza, Pelham Manor, NY – Remedial construction oversight at a former Manufactured Gas Plant (MGP) site. Ms. Armstrong provided oversight on behalf of the property owner to verify that the remediation was performed in accordance with the approved work plan and specifications. Ms. Armstrong was responsible for monitoring the overall project schedule.

Con Edison, East 74th Street Steam Generation Plant, New York, NY – Ms. Armstrong assisted with the investigation and remediation of kerosene-impacted concrete related to a NYSDEC Spill. Ms. Armstrong performed a remedial investigation within an operating steam generation facility, prepared bid specifications and drawings, and assisted Con Edison throughout the bid package finalization process. Familiarity with Con Edison's specific standard procedures was required.

Former Queens County Family Court House, Jamaica, NY – Waste characterization and remediation oversight that included demolition of the Queens County Family Courthouse building and development of the site into a multi-story residential complex and parking garage. Ms. Armstrong performed soil and groundwater sampling and subsequently prepared a Soil Characterization Report. She oversaw the remedial excavation, load out and transportation of contaminated soil and collected post-excavation samples for hot-spot contamination identified at various locations throughout the site. Ms. Armstrong prepared the Remedial Action Report.

Bronx Terminal Market, Bronx, NY – Remediation for a development that will consist of commercial retail space, associated parking, and improvements along the Harlem River waterfront including an esplanade and park. The 17± acre site is located in the Bronx, New York, adjacent to the Harlem River, between the Macombs Avenue Bridge and the 145th Street Bridge. Ms. Armstrong provided contractor oversight for remedial excavation and backfilling, collected endpoint soil samples, and participated in the CAMP.

Pier 4, Bronx, New York - Spill remediation oversight. Ms. Armstrong provided contractor oversight for remedial excavation and backfilling, collected endpoint samples, and prepared a Closure Report for submission to the NYSDEC.

40 Bond Street, New York, New York – Site Management Plan. Ms. Armstrong prepared a Site Management Plan (SMP) for submission to the NYSDEC. The SMP described remedial actions, including excavation and the installation of a sub-slab depressurization system with a vapor barrier, and planned mitigation and monitoring services.

Bronx Mental Health Redevelopment Project, Bronx, New York –Phase I services for an 80-acre hospital facility that will include a new Adult Facility, new Children's Facility, a new Transitional Living Facility, new Work Control Facility, and Campus Utilities. Ms. Armstrong prepared a Phase I ESA in accordance with the AA1 Rule and ASTM 1525-05.

Silvercup West – NYPA Site, Queens, NY – Brownfield Program Application and Waste Characterization

JENNIFER ARMSTRONG, LEED AP

Investigation for the proposed development of the 3.4 acre site for commercial use. Responsibilities included collection of soil samples from Geoprobe® borings and oversight of the installation of temporary monitoring wells. Ms. Armstrong also reviewed the analytical results and prepared the corresponding summaries for the Site Characterization Report.

New York City School Construction Authority (NYCSCA), Queens, NY – Provided compliance audits and general oversight for the asbestos consultants and contractors working under requirements contracts with the NYCSCA. Her main role was to ensure that applicable regulations and contractual obligations were being followed through both document review and on-site audits during abatement activities. She also managed the scheduling of the survey and design group and all project consultants to ensure that project abatement specifications were completed on time to meet the NYCSCA’s financial commitments.

Freshkills Landfill, Staten Island, New York – Public Relations and Operations and Maintenance Plan Preparation. Ms. Armstrong performed public relations for the New York City Department of Sanitation (NYCDOS) and the Fresh Kills Landfill including an annual public consent order meeting involving the New York State Department of Environmental Conservation. She also worked closely with the NYCDOS and updated the Operations and Maintenance Plan as needed.

Various Site Throughout Upstate New York – Environmental due diligence, data review, and general research. Ms. Armstrong completed over 20 Phase I Environmental Site Assessments consisting of historical and regulatory document review for various sites throughout upstate New York including Dutchess and Albany Counties and the Finger Lakes Region. She also reviewed and interpreted laboratory data and provided research for ongoing projects.

1.0 INTRODUCTION

This Site Specific Health and Safety Plan (HASP) was designed to protect against occupational injuries and illnesses from workplace hazards, tasks, and chemical exposures during activities associated with the Phase II Environmental Site Investigation to be completed at West 125th Street and Lenox Avenue in New York, New York ("the Site"). The Site consists of the following addresses: 281-291 Lenox Ave (Block 1909, Lots 29, 129, 30, 31, 32, and 33), 107-113 West 124th Street (Block 1909, Lots 28, 27, 26, 25, and 140), and 108-110 West 125th Street (Block 1909, Lots 38 and 39). This HASP has been developed to comply with Occupational Safety and Health Administration (OSHA) 29 Code of Federal Regulations (CFR) 1910.120(b)(4), Hazardous Waste Operations and Emergency Response and addresses all of the foreseeable activities associated with the proposed investigation activities at the Site. This document establishes personnel protection standards and mandatory safety practices and procedures, and provides for contingencies that may arise while operations are being conducted at known or suspected hazardous waste sites.

All on-site personnel are required to read, review, and strictly comply with this HASP. It is the responsibility of Langan Engineering and Environmental Services, PC (Langan) to ensure that the HASP is implemented and enforced. The HASP may contain sensitive or confidential information and therefore should not be disclosed to persons other than those working on-site. The HASP was prepared in accordance with requirements established by the Occupational Safety and Health Administration (OSHA), the National Institute of Occupational Safety and Health (NIOSH), the Environmental Protection Agency (EPA), and New York City Local Laws.

1.1 Site Description and Background

The Site is an assemblage of properties on the city block located between 124th Street, 125th Street, Adam C. Powell Boulevard, and Lenox Avenue in the Harlem section of the borough of Manhattan, New York. The following addresses comprise the Site: 281-291 Lenox Ave (Block 1909, Lots 29, 129, 30, 31, 32, and 33), 107-113 West 124th Street (Block 1909, Lots 28, 27, 26, 25, and 140), and 108-110 West 125th Street (Block 1909, Lots 38 and 39). The Site is vacant land encompassing an approximate area of 32,410 square feet. Chain-linked fencing surrounds the Site with a locked gate on West 124th Street. The Site is bound by West 125th Street and a 10-story shopping center to the north, Lenox Avenue and multi-story residential buildings with ground-level retail space to the east, West 124th Street and multi-story residential buildings to the south, and a vacant lot and a 1-story retail building to the west.

Beyond adjoining properties, the surrounding area is comprised primarily of multi-story residential and commercial buildings with ground-level retail space and restaurants.

Langan performed a Phase I Environmental Site Assessment at the Site in September 2010 that revealed several on-site recognized environmental concerns (RECs) including historical petroleum bulk storage, historical site use for auto repair, a factory, and dry cleaning, evidence of previous environmental investigation, and several E-designations. Off-site RECs included historical use of surrounding properties for auto repair and a dry cleaner, and an open leaking tank incident at an up-gradient property. The purpose of the Phase II ESI is to investigate potential impacts from the identified RECs on the Site.

1.2 Project Scope and Organization

The general project scope anticipated at the Site is as follows:

A geophysical survey using ground penetrating radar (GPR) and electromagnetic detection equipment will first be conducted to identify remnant UST structures and associated piping and subsurface utilities that may be encountered during the investigation. Approximately 13 soil borings, four permanent groundwater monitoring wells, 4 temporary groundwater monitoring wells, 7 soil vapor samples, and an ambient air sample will be collected during the investigation.

The investigative borings will be advanced to the anticipated basement depth, approximately 18 feet below grade surface (bgs); however, the four soil borings that will be converted to monitoring wells will be advanced to 25 to 30 feet bgs. The driller will use a direct-push Geoprobe® unit for soil borings and temporary wells. Soil samples will be continuously collected from the borings and screened for organic vapors with a photoionization detector (PID). The temporary groundwater monitoring wells will be installed by inserting new, one-inch diameter PVC well screen and riser into the open borehole.

A hollow stem auger drill rig will be used to install permanent monitoring wells. The wells will be constructed with 2-inch diameter polyvinyl chloride (PVC) and 0.02-inch slotted PVC screen extending approximately 5 feet below the groundwater table. Clean filter sand will be placed in the annulus between the borehole and the outside of the screen, from the bottom of the boring to about 1 foot above the top of the screen. A 2-foot-thick hydrated bentonite seal will be placed above the filter sand.

Purge water and grossly contaminated soil generated during the investigation, if encountered,

will be placed in labeled, sealed 55-gallon drums pending off-site transport and disposal o de coordinated by the drilling contractor.

Langan is the Prime Contractor for all project activities. Langan will coordinate with a geophysical contractor to map out subsurface utilities and structures on the Site and to clear boring locations. Langan will retain a licensed drilling contractor to advance the environmental borings and install the monitoring wells. Prior to any intrusive sampling activities, the drilling contractor will coordinate with "One Call" utility locating company for the Site perimeter (streets and sidewalks) utility mark outs. The geophysical survey, the utility clearance results, and "One Call" mark-outs will be the basis to select the final proposed boring/well locations.

1.3 Safety Organization

The Safety Organization at the Site will involve the joint cooperation of all parties Langan and its affiliates (Prime Contractor), and all subcontractors. Subcontractors are responsible for working safely and complying with this HASP.

1.3.1 Safety and Planning Meetings

For routine investigation tasks, a task-specific kick-off meeting to discuss safety issues will take place to review appropriate safety issues prior to starting fieldwork. This meeting will be held in the field on the first day of work. Additional safety meetings will be conducted as the job progresses to discuss health and safety issues related to upcoming tasks. Langan will prepare and maintain documentation of these meetings.

1.3.2 Report of Accidents and Emergencies

All incidents involving injuries or property damage shall be reported to Langan by the appropriate subcontractor Safety Coordinator, and accident/incident reports will be completed for all accidents and incidents by those Safety Coordinators. At a minimum, the information presented in the accident/incident report form (Appendix A) must be provided.

2.0 ASSIGNMENT OF RESPONSIBILITIES

2.1 General

All activities on or around the Site are subject to this health and safety plan. These activities include, but are not limited to investigation and other support activities.

All personnel, including subcontract personnel, will be responsible for continuous adherence to the safety procedures during the performance of this work. Deviations from the procedures or intent of the HASP will not be allowed without express consent of the Langan Site Safety Health Officer (SSHO), who shall coordinate all significant changes with the Langan Project Management staff and subcontractor personnel, as appropriate. The Project Management and field supervisor for each contractor and subcontractor is responsible for ensuring that their personnel follow the established procedures in this HASP. After appropriate warning and notification, personnel who violate health and safety procedures will be dismissed from site operations. It must be remembered that the person most responsible for the health and safety of an individual is the individual him/herself.

Langan and subcontractor Project Management staff will participate in periodic health and safety inspections and accident investigations; attend periodic safety meetings; and coordinate on field-approach or project scope changes that could impact the project safety program. The Langan SSHO will be informed of any changes in approach that could impact existing safety protocols.

Langan employees will be expected to sign the Employee Acknowledgement of Site Specific Health and Safety Plan Form (Appendix B). Project field personnel for all subcontractors will be required to sign an acknowledgement form indicating that they have reviewed and are familiar with the HASP.

2.2 Langan Responsibilities

Langan is the Prime Contractor for the Site and is responsible for setting safety policies as prescribed by local, state, and federal jurisdictions for all work done by contractors (if any) and subcontractors. Langan will directly manage all environmental investigation activities and will be directly responsible for the implementation of this HASP.

2.2.1 Langan Site Safety Health Officer (SSHO)

The Langan SSHO shall be responsible for providing overall technical and administrative oversight of the health and safety program, both on-site and off-site. Additionally, the SSHO will have the following responsibilities:

- The SSHO will review and approve the HASP and any changes to the plan.
- The SSHO will receive and maintain documentation from subcontractor field supervisors or Site Safety Coordinators for all safety related matters, including accident record keeping, accident investigations, safety training, and certifications.

2.2.2 Langan Site Safety Coordinator (SSC)

Langan's Site Safety Coordinator will be responsible for the day-to-day safety compliance of Langan employees and Langan subcontractors, during all field activities. Langan will provide a SSC for all field investigation and remediation work that Langan directly manages. The SSC is a full-time member of Langan's field staff during all work. Depending on the complexity of the work; Langan's Field Supervisor may also serve as the SSC, or a separate member of the field staff will serve as SSC. The primary duties of the SSC will include:

- Directing and implementing requirements of the HASP.
- Attendance at safety and planning meetings.
- Weekly formal and daily site inspections.
- Ensuring that all Langan project personnel and subcontractors working under this HASP have been adequately trained in the recognition and avoidance of unsafe site conditions, the content of this HASP, and regulations applicable to the work in order to control or eliminate hazards or other exposure to illness or injury.
- Authorizing "Stop Work Orders" to subcontractors that shall be executed upon the determination of an imminent health and safety concern.
- Contacting the Langan Project Manager and SSHO on the issuance of the Stop Work Orders when the SSC has made the determination of an imminent health and safety concern.
- Authorizing work to resume upon approval from the Wharton Properties, Langan Project Manager and the SSHO.

- Directing activities as defined in this HASP during emergency situations, subject to restrictions identified in Section 6.
- The SSC will initiate evacuation procedures when necessary, subject to restrictions identified in Section 6.

The SSC will be responsible for assessing daily site activities for compliance with all provisions of the HASP. Deviations will be noted, corrected, and reported to the Langan Project Manager and SSO. The SSC or designee will ensure that required monitoring and hazard evaluations are performed. The SSC will also ensure that subcontractor site safety inspection logs and documents are maintained for inspection at the jobsite as part of the Contractor's Safety Program Evaluation (Section 2.2.4).

2.2.3 Maintenance of Records

Langan will maintain records pertinent to the overall safety program as described in this HASP, including meeting minutes, accident records, safety inspection records, contractor evaluations, records of applicable training, and records of accident investigations.

2.2.4 Contractor's Safety Program Evaluation

Langan will periodically evaluate subcontractor safety performance. Results of this evaluation may be discussed and corrected immediately or, if immediate correction is not possible, forwarded directly to the subcontractor's office for resolution. Langan's Project Management and the subcontractor's Project Management will receive copies of this evaluation. The Contractor's Safety Program Evaluation form can be found in Appendix C.

2.3 Key Personnel and Emergency Telephone Numbers

The key personnel in this project and emergency phone numbers are included in Appendix D.

3.0 STANDARD OPERATING PROCEDURES

3.1 Standard Work Practices

The following work practices and engineering controls may be used during each phase of the project. The work practices are Standard Operating Procedures, and will not be deviated from without the consent of the SSHO.

Hazards associated with site work including drilling, monitoring well installation, soil and groundwater sampling, and cold/heat stress are covered under this HASP.

3.2 Safety Inspection Program

Safety inspections are a key to compliance with safety rules, and the maintenance of safe conditions. Accidents can be a direct result of whether or not these inspections have taken place. Safety inspections will take three forms:

- Everyday inspections – results of which are to be recorded by SSCs or the SSM;
- Weekly inspections – formal inspections that should be recorded on a form similar to the Safety Inspection Form located in Appendix E; and
- Contractor Evaluations – as described in Section 2.2.4.

3.3 Accident Investigations

The purpose of these investigations is to determine cause of an accident so that a similar accident will not occur in the future. Depending on who is directly managing the work, Langan shall determine the nature of such accident, record the findings, and correct the cause. Langan will investigate accidents related to site investigation.

In the event that an injury occurs, an Accident/Incident Report (Appendix A) will be completed within 24-hours of the incident. Langan will provide an investigation report that includes a description of the incident, root cause determination, and preventative actions to be taken to prevent recurrence. Work will not resume on the task until Wharton Properties is satisfied with Langan's preventative action plan.

3.4 Site Hazard Assessments

Hazard assessments shall be performed for each task on this project. Such assessments may involve the use of air sampling, or a site survey for exposure to chemicals and gases or other physical agents such as noise or electricity. During such a survey, engineering or administrative controls will be considered before resorting to Personal Protective Equipment (PPE). If these controls do not adequately address work-related hazards, PPE needs must be evaluated.

3.5 Health Risks

Potential health risks will involve exposure to chemical and physical hazards. Chemical hazards may result from subsurface contaminants and gases, silica in concrete, and other hazards. Physical hazards result from exposure to noise, construction or drilling equipment, electricity, and other utilities. Work methods when near such exposures will need pre-planning and use of exposure limiting controls such as use of analytical equipment for detection of vapors and gases, as well as the use of PPE to aid in the control of many exposures.

3.6 Fire Safety Hazards

Fire hazards include exposures to underground utilities and gases. Volatile organic compounds are likely present in the soil and the groundwater at some locations. Vapor monitoring will be necessary during all on-site activities where flammable/ combustible exposures exist.

3.7 Electrical Utilities

For environmental drilling and other environmental investigation work, Langan's utility mark-out subcontractor will conduct a geophysical survey around all proposed sampling locations to identify subsurface electric utilities and mark the centerline of underground lines. The drilling contractor will notify the NYC One Call Center at (800) 272-4480, in accordance with Code 753, a minimum of 5 working days prior to any drilling on streets and sidewalks. Environmental borings will be offset by at least 5 feet from any identified subsurface utility.

3.8 Drilling Operations

Depending on the particular drill rig employed, these operations can present exposure to the

following:

- Flying objects (chipped asphalt or concrete, soil) and dust. Measures used to control such exposures will include use of water misting apparatus to keep dust down, or use of a guard installed around the drill to protect against flying objects and dust.
- Underground utilities present fire, electrocution, burn, and explosion hazards. Positions of gas, electric, and steam utility lines will be verified as described in Section 3.7. If possible, all lines in the area of drilling should be de-energized, locked-out, and tested before work begins.
- All subsurface utility lines in the area of drilling shall be identified by Langan's geophysical sub-contractor.

3.9 Hearing Conservation

The operation of drill rig equipment may result in momentary high noise levels during advancement of soil borings. Hearing protection (e.g., ear plugs, headphones) will be used as necessary.

3.10 Close Call Program

A "close call" is an undesirable incident that under similar circumstances could have caused injury or damage. The SSHO or the SSC will conduct an incident review at the location where a "close call" occurred. The purpose of the incident review is to identify the cause of the incident, thereby allowing the development of remedies to prevent reoccurrence. Every "close call" shall be considered an incident and shall be thoroughly reviewed.

The SSC or SSHO is responsible for completing incident reports and for seeing that recommendations are addressed. The following procedures should be followed when investigating a "close call":

- Implement temporary controls to prevent further or potential injuries.
- Make sketches and take measurements/photos from several different angles.
- Establish and communicate procedures for conducting employee internal safety self-inspections of the workplace.
- Establish and communicate procedures to review and analyze causal factors related to "close calls" in order to eliminate hazards or reduce their potential reoccurrence.

Establish and communicate guidelines for safety training of all Site workers.

4.0 PERSONAL PROTECTIVE EQUIPMENT

4.1 General Safety Equipment

If entry into a confined space is to be performed, a full-body harness with lifeline, attached to an extraction unit will be part of the required PPE. This will be performed in compliance with Confined Space Standard 1910.146. Entry into confined spaces is not anticipated on this project.

4.2 Levels of Protection per Task

Personal safety protection will be required during all site activities at most of the site locations unless information is obtained indicating that contaminants are not present. Conditions may develop that would require increased protective measures that would require the SSHO/SSC/SSM to stop operations and evaluate the situation. Respirators will likely not be needed on this project. It is anticipated that most work will be performed under Level D protection that consists of the following:

Level D

- a) Standard work clothes
- b) Steel-toe safety boots
- c) Safety glasses (goggles must be worn when splash hazard is present)
- d) Nitrile outer and inner gloves must be worn during all activities requiring contact with soils.
- e) Hard hat (to be worn in the vicinity of active drilling equipment)

If excessive vapors are detected or direct contact with grossly contaminated media is expected, workers may need to upgrade to Level C protection. Level C protection consists of the following:

Level C

- a) Full-face or half-mask air-purifying respirator (APR) or powered air purifier (PAPR), depending on presence and abundance of airborne toxic constituents of concern (cartridges will be disposed at the end of each day's use)
- b) Combination high efficiency particulate absorbing (HEPA) filter/organic vapor cartridges
- c) Tyvek coveralls must be worn if particulate hazard present

- d) Polyethylene (PE)-coated Tyvek coveralls if liquid contamination present
- e) Steel-toe safety boots
- f) Nitrile outer gloves and PVC inner gloves must be worn during all activities requiring contact with soils
- g) Hard hat (must be worn during all site activities)

Neither Level B nor A protection is expected to be required for this project.

5.0 TRAINING

5.1 Site Training Requirements

The following training requirements shall be addressed for Langan employees and all subcontractors. Copies of all training rosters and agendas, and required training certificates shall be forwarded for the review of the SSHO.

- *HAZWOPER* – for those employees involved in emergency response to chemical incidents and those performing site investigations on a potentially uncontrolled hazardous waste site
- *Hazard Communication Training*
- *Emergency Evacuation*
- *Respirator Protection* – for those workers required to use respirators
- *Confined Space Entry* – for those workers involved in such situations
- *Personal Protective Equipment Training*
- *Hearing Conservation*
- *Trade Specific Requirements*

The SSHO, SSCs, SSM, and other supervisory personnel must have attended additional site-specific training to:

- Ensure maximum regard for the health and safety of all employees, the public, and the environment;
- Comply with all laws, rules, and regulations required to safeguard the health and safety of all employees, the public, and the environment;
- Increase the ability of employees to react responsibly and safely under normal conditions and during emergency situations; and
- Educate personnel relative to potential site hazards, adverse chemical effects, and the importance of good safety and industrial hygiene practices.

Formal safety training programs may be held periodically to refresh employees' health and safety awareness.

5.1.1 *Hazwoper Training*

The SSC and any other designated worker that is expected to respond to chemical incidents in an emergency operation or *perform site investigations on a potentially uncontrolled hazardous waste site* must have 40-hour HAZWOPER Training as defined in OSHA 29 CFR 1926.65.

Certificates of completion of 40-hour HAZWOPER, 8-hour refresher, and 8-hour supervisor training for those workers requiring it must be presented to the SSHO and maintained in the project file for the duration of the project.

5.1.2 Hazard Communication Training

All workers will be trained prior to the start of a job in accordance with 29 CFR 1926.59. Workers will receive training for exposure to chemical contaminants, as well as for chemicals brought in on the job. All chemicals to be brought to the job must receive the approval of the Langan Project Manager, SSHO, SSC/SSM, including the provision of Material Safety and Data Sheets (MSDSs) prior to use. The SSC/SSM, SSHO, and the Langan Project Manager must be made aware of any changes made with regard to chemical use on the job. Refer to Appendix F for the formal Hazard Communication Plan and Appendix G for MSDSs.

5.1.3 Respirator Protection Training

There are no building located at the Site that would require familiarization with evacuation procedures.

5.1.4 Respirator Protection Training

In areas where respiratory protection is required, employees are required to have annual training and documentation completed. This is only a part of other requirements mandated to include a medical clearance and respirator fit testing. Please refer to Appendix H for the Respiratory Protection Program.

5.1.5 Personal Protective Equipment Training

Workers are required to have this training at least initially before beginning work. PPE training is again required when the job task changes and different chemical or physical exposures are encountered. Employers should keep records of all training and any updated training efforts. These records shall be available to the SSHO for review.

5.1.6 Hearing Conservation Training

For those employees exposed to an 8-hour time-weighted average noise exposure of 90 dbA or more, hearing conservation training is required on an annual basis. Additionally, annual medical

evaluations and engineering corrections and/or provision of hearing protection is necessary. Exposures to impulse/impact noise shall not exceed a 140 dbA peak sound pressure level.

5.1.7 Trade Specific Requirements

Specialized training shall be provided when serious hazards are present for which employees lack the specific training to do the job safely.

5.2 Tool Box Safety Talks

Toolbox safety talks will take place daily, before the job begins, in order to review:

- Best methods used for tasks scheduled that day, tool selection, and anticipated problems.
- Each worker will be provided access to a copy of the site safety plan and the plan will be reviewed with each worker performing work on-site.
- Workers assigned a respirator shall have been fit-tested with their individual respirator. Fit testing will be performed in accordance with 29 CFR 1926.1128. Fit testing will occur only if it is determined that an upgrade to Level C PPE is required, and will occur prior to Level C work.
- On-site personal hygiene will be reviewed to prevent contaminants from being brought off-site on clothing or footwear.
- Decontamination procedures will be reviewed and demonstrated when necessary.
- Emergency procedures including emergency alarms and exits will be reviewed.
- A review of the area(s) that will be classified as restricted access area(s) and the methods employed to designate these areas.
- Hazards to be expected (from the Hazard Assessment) for each task to be performed that day, and

Tool Box Safety Talks shall be documented, minimally, with an attendance roster and the content of each meeting.

6.0 EMERGENCY PROCEDURES

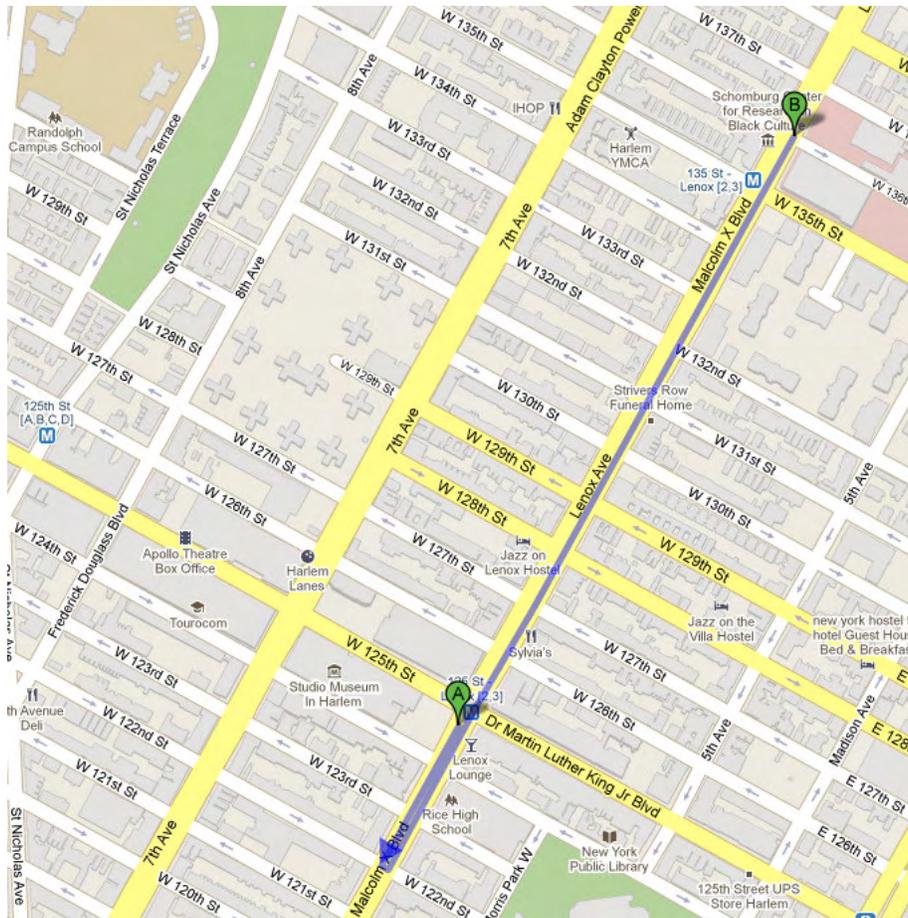

Should outside assistance be needed for accidents, fire, or release of hazardous substances, the emergency numbers will be available and posted at the Site (Appendix D) where a readily accessible telephone is made available for emergency use.

A map showing the directions to the nearest hospital is included as Figure 6-1. Emergency contact is included as Table 6-1.

FIGURE 6-1- *Directions to Hospital (see attached map)*

Site Location: West 125th Street and Lenox Avenue
New York, New York 10037

Hospital Location: Harlem Hospital Center
506 Lenox Avenue
New York, New York 10037
Main: (212) 939-1340
Emergency: (212)-939-2250

Driving Directions to Harlem Hospital Center (0.8 miles – approximately 3 minutes)

1. Head southwest on Lenox Ave/Malcolm X Blvd toward W 124th Street 0.1 mile
2. Make a U-turn at W 122nd St and head northeast on Lenox Ave/Malcolm X Blvd. Destination will be on the right. 0.7 mile

**Table 6-1
EMERGENCY CONTACTS**

In the event of any situation or unplanned occurrence requiring assistance, the appropriate contact(s) should be made from the list below. For emergency situations, contact should first be made with the Field Team Leader (or designee) and the Site Safety Officer, who will notify emergency personnel who will then contact the appropriate response teams. This emergency contacts list must be in an easily accessible location at the Site.

Emergency Contacts

Phone Number

Fire Department:	911
Police:	911
New York City-Long Island One Call Center: (3 day notice required for utility markouts)	(800) 272-4480
Poison Control Center:	(800) 222-1222
Pollution Toxic Chemical Oil Spills:	(800) 424-8802

Medical Emergency

Ambulance Service:	911
Hospital Name:	Harlem Hospital Center
Hospital Information Number:	(212) 939-1340
Hospital Emergency Room Number:	(212) 939-2250
Hospital Address:	506 Lenox Avenue New York, NY 10037
Route to Hospital:	See Figure 6-1
Travel Time From Site:	0.8 miles, 3 minutes

Langan Contacts

Principal/Associate:	Joel Landes, P.E.	(917) 940-3015
Project Manager:	Michael Burke	(347) 633-1923
Health & Safety Officer:	Tony Moffa	(215) 491-6545
Site Safety Coordinator/Site Safety Health Officer	Jennifer Armstrong	(646) 315-4613

6.1 Emergency Site Evacuation Procedure

In the event that an emergency situation arises, including but not limited to fire, explosion, or significant toxic gas release into the ambient atmosphere, the SSC/SSM will implement an immediate evacuation of all project personnel due to immediate or impending danger.

After the emergency has been resolved, the SSC/SSM or Site Supervisor will indicate when staff should resume their normal duties. If dangers are present for those at the designated assembly point, another designated location of assembly will be established.

It will be the responsibility of the SSC/SSM or Site Supervisor to report a fire or emergency to Wharton Properties, assess the seriousness of the situation, and initiate emergency measures until the arrival local fire fighters or other first responders, should they be necessary.

Under no circumstances will incoming visitors be allowed to proceed to the area of concern once an emergency evacuation has been implemented. Visitors or other persons present in the area of the emergency shall be instructed to evacuate the area. The SSC/SSM will ensure that access roads are not obstructed and will remain on-site to provide stand-by assistance upon arrival of emergency personnel.

If it is necessary to temporarily control traffic in the event of an emergency, those persons controlling traffic will wear proper reflection warning vests until the arrival of police or fire personnel.

6.2 Designated Assembly Locations

All personnel will evacuate the Site and assemble at a designated assembly location.

6.3 Accounting for Personnel

All contractor and subcontractor supervisors are responsible for the accounting of all personnel assembled at the designed assembly area.

7.0 MEDICAL PROCEDURES

7.1 Physical Examination Documents

Employees whose work assignments require their presence at a hazardous work site are required to have a baseline medical evaluation prior to commencement of hazardous work activity. The baseline medical evaluation consists of the following [*=Required; •=Preferred]:

- * Medical and Occupational History
- * Physical Examination
- * Pulmonary Function
- Urinalysis
- CBC (with differential and RCB) Chem 24 (SMAC)
- RBC Cholinesterase
- Urine Heavy Metal Panel
- Blood Lead with zinc protoporphyrin (zpp)
- Chest X-Ray (2-view)
- * EKG (over 40 years of age)
- Audiometry

The annual medical evaluation consists of the following [*=Required; •=Preferred]:

- * Physical Examination and History
- * Pulmonary Function
- Urinalysis
- CBC (with differential and RCB) Chem 24 (SMAC)
- RBC Cholinesterase
- Blood Lead with zpp
- EKG (Over 40 years of age)
- Audiometry

Additional tests that may be performed as part of the annual examination include the following [*=Required; •=Preferred]:

- Cholinesterase - plasma
- Urine - heavy metal
- Blood - PCB
- Chest X-Ray (2-view)

Based upon this examination and a review of the employee's job description, the physician identifies any medical restrictions that would affect an employee's ability to safely perform his/her job. If no restrictions are imposed, the physician certifies the employees as capable of

full participation in the work program.

If an employee suspects exposure to a toxic chemical or other hazard while performing project tasks, additional tests may be ordered immediately following the exposure period. Individuals are encouraged to discuss changes in their health status with their respective corporate safety manager and/or physician.

7.2 Access to Exposure and Medical Records

Instructions regarding the existence, location, and availability of employee medical records shall be provided to the employee for all medical exams conducted as a result of their employment; Employee access to records shall be provided in a reasonable time, place and manner, but on no event later than fifteen days after the request is received.

7.3 Physical Examination and Respirator Approval

Medical clearance from a physician for the respirator type to be used is required for each employee before they are allowed to don respiratory protection. Additionally, each employer must select a respirator acceptable for use and that will provide the correct protection for the specific exposure. The employer is responsible for administering fit tests for all new respirators used by employees, and must administer training on a yearly basis.

7.4 Emergency First Aid

All accidents or near miss incidents will be dealt with in a manner to minimize further injury to the individual or others. In the event that an accident does occur, the following general procedures should be followed:

- First aid and other appropriate action shall be given by the qualified individual closest to the event.
- Contact hospital and arrange for ambulance if necessary.
- As soon as practicable, the incident shall be reported to the SSHO and the Project Manager. The SSC/SSM and the SSHO shall be responsible for making all decisions concerning treatment, and/or other appropriate action.

The accident investigation reports/forms as provided in Appendix A will be completed and

forwarded to the Langan SSC/SSHO and will be kept in the project file.

7.5 Heat Stress

Heat stress is a result of a build-up of heat in the body. This can occur when the body produces heat at a greater rate than it is dispersed by conduction, radiation, and evaporation of sweat from the surface of the skin. The internal heat of the body is brought to the surface by blood. When heat build-up occurs, the body temperature is raised causing a fever. When this condition exists it produces a cycle that further aggravates the situation. The fever causes certain body functions to accelerate. This generates excess heat that must be dispersed in addition to the normal heat generated by a person's body. Heat loss from the body is slow during conditions of high temperature and high humidity, such as a hot, humid day. These conditions, however, can be artificially caused by the wearing of non-porous, protective clothing. Therefore, caution should be exercised during field activities performed within high temperature environments.

Based on the allowable work periods (minutes per hour), a work rest regimen should be established based upon ambient conditions at the start of the job, and the acclimatization of the workforce in those conditions. Temperature extremes, as determined by a globe thermometer device (WBGT or equivalent) may require scaling back work cycles within the regimen. Greater active work times are allowable, so long as no symptoms of heat stress are noted. Heat stress symptoms are discussed in detail below.

There are three classes or types of heat stress: heat exhaustion, heat cramps, and heat stroke.

Heat Exhaustion

Heat exhaustion is brought about by the concentration of blood in the vessels of the skin. This condition may lead to an inadequate return of blood to the heart and, eventually, to physical collapse. The symptoms are:

- General weakness
- Excessive perspiration
- Dizziness
- Appearance of having fainted
- Pale and clammy skin
- Weak pulse
- Rapid and shallow breathing

To treat for heat exhaustion, place the individual in a cool place and remove as much clothing as possible. The individual should drink cool water, "Gatorade", or other similar liquid. The individual should be fanned, however, do not over cool or allow chilling. Treat the individual for shock and remove to medical facility if condition persists.

Heat Cramps

Heat cramps are usually caused by loss of salt when an individual has perspired a great deal. Drinking iced liquids quickly or in large amounts can also cause cramps usually in the leg and abdominal muscles. The symptoms of heat cramps are as follows:

- Pain and cramps in legs or abdomen
- Faintness
- Profuse perspiration

Heat Stroke

Heat stroke is a breakdown of the body heat-regulating mechanism causing high fever and collapse. This condition can result in unconsciousness, convulsions, and even death. Persons in poor physical condition or of advanced age are particularly susceptible. The symptoms of heat stroke are:

- Muscle twitching or convulsions
- Dry hot skin
- Flushed skin
- Suddenness of condition
- High body temperature
- Loss of consciousness
- Deep breathing, then shallow or absent
- Dilated pupils

Heat stroke is an immediate medical emergency for which an individual should be transported to a medical facility immediately. In the interim the following steps can be taken. The individual should be removed to a cool environment and the body temperature should be reduced promptly by dousing the body with water or by wrapping in a wet sheet. If ice is available, it should be placed under the arms and around the neck and ankles. Drinking water should be provided. Intake of these liquids will be monitored by supervision so as not to be excessive. Steps should be taken to protect patient from injury during convulsions, especially from biting the tongue.

To avoid problems from heat stress during conditions of high temperature and humidity, supervisors should insure that the employees drink plenty of fluids; should provide breaks in accordance with the previously outlined guidance and monitoring; and should revise work schedules as necessary to take advantage of the cooler parts of the day. Some basic guidelines for maintaining workers' body fluids at normal levels during conditions of high temperature and humidity are as follows:

- Have workers drink 16 ounces of fluid before beginning work.
- Have workers drink 4 to 8 ounces of fluid every 15 to 20 minutes, or at each scheduled break. A total of 1 to 1.6 gallons of fluid per day are recommended, but more may be necessary to maintain body weight.

To measure the effectiveness of the heat recovery rest periods, the employee heart rate should be monitored as follows:

- Count the pulse rate for the last 30 seconds of the first minute of a three-minute period, the last 30 seconds of the second minute, and the last 30 seconds of the third minute.
- Double the count to obtain an equivalent one-minute rate.

If the first rate is less than 100 beats/minute and the second two readings are at least 10 beats/minute less than the previous reading than the rest periods should be considered adequate. Otherwise, the rest periods should be extended.

Another method of measuring the effectiveness of the rest periods is to take oral temperatures. If body temperature exceeds 37.8°C (100°F), then the rest periods should be extended.

If heat stress may be a factor due to ambient temperature and humidity, then it is recommended that both methods be used. In addition, these tests should be performed in the morning prior to any work to establish a background level.

7.6 Cold Stress

The single most important aspect of hypothermia (cold stress) is the fall in the deep core temperature of the body. Workers should be protected from exposure to cold so that the deep core temperature does not fall below 36°C (96.8°F). Lower body temperatures will very likely result in reduced mental alertness, reduction in rational decision-making, or loss of

consciousness.

Pain in the extremities may be the first early warning of danger to cold stress. During exposure to cold, maximum severe shivering develops when the body temperature has fallen to 35°C (95°F). This must be taken as a sign of danger to the workers and exposure to cold should be immediately terminated for all workers when severe shivering becomes evident. Useful physical, or mental work is limited when severe shivering occurs.

Since prolonged exposure to cold air at temperatures well above freezing can lead to dangerous hypothermia, whole body protection must be provided. Adequate insulating clothing to maintain core temperatures above 36°C (96.8°F) must be provided to workers if work is performed in air temperatures below 4°C (40°F). In addition, it should be kept in mind that, the higher the wind speed and the lower the temperature in the work area, the greater the insulation value of the protective clothing required. Special protection of the hands is required to maintain manual dexterity for the prevention of accidents:

- If fine work is to be performed with bare hands for more than 10-20 minutes in an environment below 16°C (60°F), special provisions should be established for keeping the workers' hands warm. Metal handles or tools and control bars should be covered with thermal insulating material at temperatures below -1°C (30°F).
- If the air temperature falls below 16°C (60°F) for sedentary, 4°C (40°F) for light, -7°C (20°F) for moderate work and fine manual dexterity is not required, then the workers must use gloves. Winter "Monkey-grip" gloves consisting of a cotton lining with a textured PVC coating are typically used in cold weather. To prevent contact frostbite, the workers should wear anti-contact gloves.

Provisions for additional body protection is required if work is performed in an environment at or below 4°C (40°F). The workers shall wear cold protective clothing appropriate for the level of cold and physical activity:

- If the air velocity at the job sites is increased by wind, draft, or artificial ventilating equipment, the cooling effect of the wind shall be reduced by shielding the work area, or by wearing an easily removable outer windbreak layer garment.
- If only light work is involved and if the clothing on the worker may become wet on the job site, the outer layer of the clothing in use may be of a type impermeable to water.

With more severe work under such conditions, the outer layer should be water repellent and the outerwear should be changed as it becomes wetted. The SSC/SSM should assure that adequate replacement garments are available for use by the employees.

- If the available clothing does not give adequate protection to prevent hypothermia or frostbite, the SSC/SSM can suspend work on the Site until adequate clothing is available or until weather conditions improve.
- Workers handling evaporative liquids (gasoline, alcohols, solvents, etc.) at air temperatures below 4°C (40°F) shall take special precautions to avoid soaking of clothing or gloves with the liquids because of the added danger of cold injury due to evaporative cooling.

7.7 Emergency Medical Procedures

Should an accident occur during a job related activity in which personnel are injured, the following actions will be taken:

- The SSC/SSM will assume control, and will notify emergency personnel by calling 911 to request an ambulance.
- The SSC/SSM should designate a person to flag down the ambulance and direct it to the injured person.
- Companion personnel who are unaffected by the incident or personnel partially dressed in protective gear but outside the work zone will be alerted to rescue any workers whose health or safety is endangered.
- Under no circumstances shall rescue be attempted without first obtaining help, and re-assessment of hazardous conditions.
- The buddy system will be enforced. Victims will be located and their conditions will be assessed. If possible, the hazardous situation will be brought under complete or temporary control and victims will be assisted or removed from the area.

- The SSC/SSM will determine, based on the type and severity of the illness or injury, whether or not to decontaminate the victim, and whether the victim needs to be stabilized.

The SSC/SSM will insure that well-stocked first aid kits are present at the work site at all times.

7.8 Accident and Injury Report Forms

7.8.1 Accident/Incident Report

All injuries, no matter how slight, shall be reported to the SSC/SSM and to Wharton Properties. An accident/incident report form, attached in Appendix A will be filled out on all accidents by the applicable contractor supervision personnel, the SCC, or the SSM. Copies of all accident/incident reports shall be kept on-site and available for review. Project personnel will be instructed on the location of the first aid station, hospital, doctor and ambulance service near the job. The emergency telephone numbers will be conspicuously posted in site vehicles near the work zone. First aid supplies will be centrally located and conspicuously posted between restricted and non-restricted areas to be readily accessible to all on the Site.

7.8.2 OSHA Form 300

An OSHA Form 300 will be kept at the Langan Corporate Office in Elmwood Park, New Jersey. All recordable injuries or illnesses will be recorded on this form. Subcontractor employers must also meet the requirements of maintaining an OSHA 300 form. The Incident Report form used to capture the details of work-related injuries/illnesses meets the requirements of the OSHA Form 301 (supplemental record) and must be maintained with the OSHA Form 300 for all recordable injuries or illnesses. Forms for recording OSHA work-related injuries and illnesses are included in Appendix I.

8.0 ENVIRONMENTAL CONSIDERATIONS

8.1 Hazardous Substance Assessments

Hazardous Substance Assessments are to be completed for each phase of work as required by OSHA, 29 CFR 1926.65. All contractors involved in operations where there is a possibility of an exposure to their employees of a hazardous discharge will discuss procedures necessary to guard against an occurrence at the weekly safety meetings.

8.2 Site Air Monitoring

An essential component in maintaining low exposure to Site workers is air monitoring of work operations. Volatile organic compounds (VOCs) and fuel oil constituents may be present at drilling locations. The SSC, SSM, or an air-sampling technician will perform air monitoring of organic vapors (OVs) with a photo ionization detector (PID). If above background air monitoring results are encountered in the worker breathing zone for OVs, community air monitoring will be conducted in compliance with the Community Air Monitoring Plan (CAMP) outlined below.

8.2.1 Community Air Monitoring

Continuous monitoring for OVs will be conducted during all ground intrusive activities (i.e., advancement of borings). Upwind concentrations will be measured at the start of each workday and periodically thereafter to establish background concentrations. OVs will be monitored continuously at the downwind perimeter of the hot zone. Monitoring will be conducted with a PID equipped with a 10.6 eV lamp capable of calculating 15-minute running average concentrations. The following actions will be taken based on organic vapor levels measured:

- If total organic vapor levels exceed 5 parts per million (ppm) above background for the 15-minute average at the perimeter, work activities will be temporarily halted and monitoring continued. If levels readily decrease (per instantaneous readings) below 5 ppm above background, work activities will resume with continued monitoring.
- If total organic vapor levels at the downwind perimeter of the hot zone persist at levels in excess of 5 ppm above background but less than 25 ppm, work activities will be halted, the source of vapors identified, corrective actions taken to abate emissions, and monitoring continued. After these steps, work activities will resume provided that the total organic vapor level 200 feet downwind of the hot zone or half the distance to the

nearest potential receptor or residential/commercial structure, whichever is less – but in no case less than 20 feet, is below 5 ppm above background for the 15-minute average.

- If the total organic vapor level is above 25 ppm at the perimeter of the hot zone, activities will be shutdown.
- All 15-minute readings will be recorded and available for NYSDEC and New York State Department of Health (NYSDOH) personnel to review, if requested. Instantaneous readings, if any, will also be recorded.

8.3 Decontamination Procedures

Decontamination areas where personnel and equipment decontamination procedures will be performed, if appropriate, will be located as close as possible to work areas. Appropriate barriers will demarcate these areas and signs and all unauthorized personnel will be excluded. Decontamination could be necessary if contaminated materials are uncovered or spills occur.

Decontamination of field equipment will be necessary for all equipment in contact with contaminated materials. Decontamination activities shall be performed in a designated area lined with polyethylene sheeting that is designed to collect the decontamination reinstate.

8.3.1 Decontamination of Equipment

Decontamination equipment may include the following, as appropriate:

- Wash buckets (1 wash, 1 rinse)
- Several scrub brushes
- Disposable towels
- Seating to facilitate boot removal
- Decontamination solution (e.g., non-phosphate detergent)
- Duct tape
- Hand soap
- Skin wash water source
- Special rinse solutions for hand sampling tools

8.3.2 Personal Decontamination Procedures

The following describes procedures to be employed for personal and equipment decontamination.

PERSONAL DECONTAMINATION PROCEDURES FOR LEVEL D PROTECTION	
1.	Deposit equipment used on-site (tools, sampling devices and containers, monitoring instruments, radios, clipboards, etc.) on plastic drop cloths or in different containers with plastic liners. Segregation at the drop reduces the probability of cross-contamination. During hot weather operations, cool down stations may be set up within this area.
2.	Remove outer gloves and deposit in waste container.
3.	Remove inner gloves and deposit in container.
4.	If clothing has become contaminated, remove it and place it into a poly bag.
5.	Wash hands and face.
6.	Re-dress (as necessary) or put on clean clothes.

PERSONAL DECONTAMINATION PROCEDURES FOR LEVEL C PROTECTION	
1.	Deposit equipment used on-site (tools, sampling devices and containers, monitoring instruments, radios, clip- boards, etc.) on plastic drop cloths or in different containers with plastic liners. Segregation at the drop reduces the probability of cross-contamination. During hot weather operations, cool down stations may be set up within this area.
2.	Scrub outer boot covers and gloves with decon solution or detergent/ water.
3.	Rinse off decon solution from Station 2.
4.	Remove tape around boots and gloves and deposit in waste container.
5.	Remove boot covers and deposit in waste container.
6.	Remove outer gloves and deposit in waste container.
7.	If worker leaves exclusion zone to change canister (or mask), this is the last step in the decontamination procedure. Worker's canister is exchanged, new outer gloves and boot covers donned, and joints taped. Worker returns to duty.
8.	Remove safety boots and place in area with plastic liner.
9.	With assistance of helper, remove splash suit. Deposit in waste container.
10.	Remove respirator. Deposit in container with plastic liner. Avoid touching face with fingers.
11.	Remove inner gloves and deposit in waste container.
12.	If inner clothing has become contaminated, remove it and place it into a poly bag.
13.	Wash hands and face if shower is not available.
14.	Put on clean clothes.

8.4 Investigation Derived Waste (IDW)

IDW, including petroleum-impacted soil and purged groundwater, will be stored temporarily on-site in 55-gallon drums until it has been appropriately characterized for off-site disposal. Transportation and disposal of IDW will be arranged by the drilling contractor upon the receipt of analytical data.

Appendix A
Report of Accident Form

REPORT OF ACCIDENT/INCIDENT

NAME OF AFFECTED EMPLOYEE: _____ DATE _____

Accident Analysis Form

Instructions:

To Determine the **Accident Cause:**

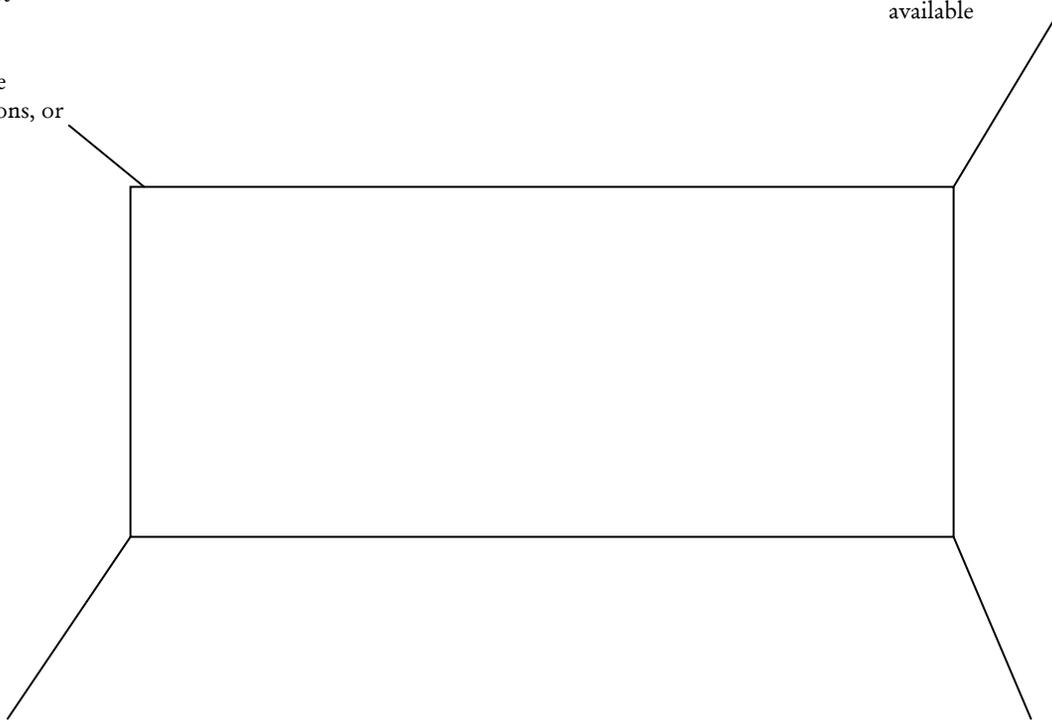

1. Determine if the accident circumstances are in the areas of *People, Equipment, Environment, or Management.*
2. If there are circumstances in a particular section, ask a series of "why ?" questions to determine the reasons for every set of circumstances.
3. When you have run out of "why?" questions, analyze the result. Eliminate any unlikely causes or circumstances that you *cannot control.* Identify the accident cause.
4. Determine what management system needs to be in place to assure that the accident does not happen again.

People

- Lack of procedures
- Procedures not followed
- Procedures not known or understood
- Task too difficult to perform
- PPE not used or not available
- People not trained
- Training inadequate
- Distraction, Emotions, or Fatigue

Equipment

- Equipment not maintained
- Wrong equipment used
- Poor equipment design
- Correct equipment not available

Environment

- Location of employee in
- Temperature extremes
- Poor lighting detect
- Poor housekeeping
- Inadequate ventilation
- Excessive vibration
- Excessive noise
- Condition of work surface

Management

- No management system
- place to control hazard
- Supervision did not
- unsafe conditions or behaviors
- Supervision did not take action to correct unsafe conditions or behaviors
- Lack of supervisor training
- Lack of accountability for safety

Appendix B
Employee Acknowledgement Form

APPENDIX B
EMPLOYEE ACKNOWLEDGEMENT OF SITE SPECIFIC HEALTH
AND SAFETY PLAN

Langan management is committed to the safety of our employees. It is the responsibility of management and supervision to see that every employee is provided with safety instructions for this job, information, the location and opportunity to review the Site Health and Safety Plan. It is also the responsibility of management to provide a safe work environment and observe all safety regulations. No management policy can be effective, however, if each employee does not also have a commitment to the safety policies of the company. To ensure the safety and health of Company employees, the company has developed, and shall implement, the following disciplinary policies.

Any infraction of Langan safety policies and/or Federal, State, or local regulations by a Langan employee will result in disciplinary actions.

- A first infraction will result in a verbal warning and the infraction will be documented and become part of the employee's work record. If, during investigation, it is determined that the employee's first infraction causes or could cause serious harm to himself and/or another employee, the result may be other disciplinary actions, including dismissal.
- A second infraction may result in suspension from work. The duration of the suspension will be determined on a case-by-case basis and will be commensurate with the seriousness of the infraction, and may result in dismissal. The infraction will be documented and become part of the employee's work record.
- A third infraction may result in dismissal. This will be documented and become part of the employee's work record, and the employee's name shall be placed on a not-for-rehire list maintained by the company. All information and documentation will be retained by the Company and will not be available to other employers.

Langan safety policies and regulations were developed to protect each employee, however, **it is every employee's responsibility to observe and follow the company's safety policies.**

I have been notified of, received, and understand Langan safety policies and acknowledge the disciplinary actions that may be taken as a result of non-compliance with such policies.

Site Safety Coordinator/Site Safety Health Officer	Jennifer Armstrong	(646) 315-4613

Appendix E
Safety Inspection Form

Appendix E - Langan Engineering and Environmental Services Inspection Form

Date of Inspection _____ Inspector(s) _____

Description of Job _____

Building No. _____ Location within building _____

Area Location/Description (if outdoors) _____

Item	Y	N	N/A	Comments / Remarks
I. Personal Protective Equipment				
Hard hats are being worn when overhead, falling or flying hazards exist;				
Safety glasses or face shields are used for welding, cutting, nailing (including pneumatic), or when working with concrete and/or harmful chemicals;				
Proper shoes or boots are worn to lessen slipping hazards and prevent toe crushing and nail punctures; and				
Safety belts and/or harness systems are in use for fall protection				
II. Housekeeping & Access Around Site				
Walkways and stairways are kept clear of trash/debris and other materials such as tools and supplies to prevent tripping.				
Boxes, scrap lumber and other materials are picked up and put in a dumpster or trash/debris area to prevent fire and tripping hazards				
Enough light is provided to allow workers to see and to prevent accidents				
III. Stairs & Ladders				
Permanent or temporary guardrails are installed on stairs, before stairs are used for general access, between levels to prevent someone from falling or stepping off edges.				
Manufactured and job-made ladders are kept in good condition and free of defects.				
Ladders are inspected before use for broken rungs or other defects so falls do not happen. Defective ladders are discarded or repaired				

Appendix E - Lagan Engineering and Environmental Services Inspection Form

Item	Y	N	N/A	Comments / Remarks
III. Stairs & Ladders				
Ladders are secured near the top or at the bottom to prevent them from slipping and causing falls				
Ladders are secured on a stable and level surface, when they cannot be tied off, so they cannot be knocked over or their bottoms kicked out.				
Ladders are extended at least 3 feet above the landing to provide a handhold or for balance when getting on and off the ladder from other surfaces				
Ladders are only used for what they were made and not as a platform, runway, or as scaffold planks				
IV. Scaffolds & Other Work Platforms				
Ladders or stairs are provided to get on and off scaffolds and work platforms safely.				
Scaffolds and work platforms are kept free of debris. Tools and materials are kept as neat as possible on scaffolds and platforms. This will help prevent materials from falling and workers from tripping.				
Scaffolds are erected on firm and level foundations.				
First consider the use of finished floors to support the load and provide a stable base.				
Place scaffold legs on firm footing and secured from movement or tipping, especially surfaces on dirt or similar surfaces				
Erect and dismantle scaffolds under the supervision of a competent person.				
The competent person must inspect scaffolds before each use.				
Do not use blocks, bricks, or pieces of lumber to level or stabilize the footings. Manufactured base plates or "mud sills" made of hardwood or equivalent can be used.				
V. Planking				
Fully plank or use manufactured decking to provide a full work platform on scaffolds. The platform decking and/or scaffold planks must be scaffold grade and not have any visible defects.				

Appendix E - Langan Engineering and Environmental Services Inspection Form

Item	Y	N	N/A	Comments / Remarks
V. Planking				
Extend planks or decking material at least 6" over the edge or cleat them to prevent movement. The work platform or planks must not extend more than 12" beyond the end supports to prevent tipping when stepping or working.				
Be sure that manufactured scaffold planks are the proper size and that the end hooks are attached to the scaffold frame.				
VI. Scaffold Guardrails				
Guard scaffold platforms that are more than 10 feet above the ground or floor surface with a standard guardrail. If guardrails are not practical, use other fall protection devices such as safety belts/harnesses and lanyards.				
Place the toprail approximately 42" above the work platform or planking with a midrail about half that high at 21".				
Install toe boards when other workers are below the scaffold.				
VII. Fall Protection - Floor and Wall Openings				
Install guardrails around open floors and walls when the fall distance is 6 feet or more. Be sure the toprails can withstand a 200 lb load.				
Construct guardrails with a toprail approximately 42" high with a midrail about half that high at 21".				
Install toeboards when other workers are below the work area.				
Cover floor openings larger than 2x2 (inches) with material to safely support the working load..				
Use other fall protection systems like slide guards, roof anchors or alternative safe work practices when a guardrail system cannot be used.				
Wear proper shoes or footwear to lessen slipping hazards.				
Train workers on safe work practices before performing work on foundation walls, roofs, trusses, or where performing exterior wall erections and floor installations.				

Appendix E - Langan Engineering and Environmental Services Inspection Form

Item	Y	N	N/A	Comments / Remarks
VIII. Work on Roofs				
Inspect for and remove frost and other slipping hazards before getting onto roof surfaces.				
Wear Cover and secure all skylights and openings, or install guardrails to keep workers from falling through the openings.				
Install slide guards along the roof eave after the first 3 rows of roofing material are installed when the roof pitch is over 4:12 and up to 6:12..				
Use a safety harness system with a solid anchor point on steep roofs with pitch greater than 8:12 or if the ground to eave height exceeds 25 feet.				
Stop roofing operations when storms, high winds or other adverse weather conditions create unsafe conditions.				
IX. Excavations & Trenching - General				
Find the location of all underground utilities by contacting the local utility locating service before digging.				
Keep workers away from digging equipment and never allow workers in an excavation when equipment is in use.				
Keep workers from getting between equipment in use and other obstacles and machinery that can cause crushing hazards				
Keep equipment and the excavated dirt (spoils pile) back 2 feet from the edge of the excavation.				
Have a competent person conduct daily inspections and correct any hazards before workers enter a trench or excavation.				
Provide workers a way to get into and out of a trench or excavation. Ladders and ramps can be used and must be within 25 feet of the worker.				
For excavations and utility trenches over 5 feet deep, use shoring, shields (trench boxes), benching, or slope back the sides. Unless soil analysis has been completed, the earth's slope must be at least 1 1/2 horizontal to 1 vertical.				
Keep water out of trenches with a pump or drainage system, and inspect the area for soil movement and potential cave-ins.				

Appendix E - Langan Engineering and Environmental Services Inspection Form

Item	Y	N	N/A	Comments / Remarks
IX. Excavations & Trenching - General				
Keep drivers in the cab and workers away when dirt and other debris are being loaded into dump trucks. Workers must never be allowed under any load and must stay clear of the back of vehicles.				
X. Foundations After the foundation walls are constructed, special precautions must be taken to prevent injury from cave-ins in the area between the excavation wall and the foundation wall				
The depth of the foundation/basement trench cannot exceed 7 1/2 feet deep unless other cave-in protection is provided. .				
Keep the horizontal width of the foundation trench at least 2 feet wide. Make sure there is no earth vibration while workers are in the trench.				
Plan the foundation trench work to minimize the number of workers in the trench and the length of time they spend there.				
XI. Tools & Equipment				
Maintain all hand tools and equipment in safe condition and check regularly for defects. Broken or damaged tools and equipment must be removed from the jobsite.				
Use double insulated tools, or ensure the tools are grounded.				
Plan the foundation trench work to minimize the number of workers in the trench and the length of time they spend there.				
Use double insulated tools, or ensure the tools are grounded.				
Equip all power saws (circular, skill, table, etc.) with blade guards. Saws must be turned off when unattended.				
Provide training for workers before pneumatic or powder-actuated tools are used.				
Pneumatic and powder-actuated tools must only be used by trained and experienced personnel. Require proper eye protection for workers.				
Never leave cartridges for pneumatic or powder-actuated tools unattended. Keep equipment in a safe place, according to the manufacturers' instructions.				

Appendix E - Langan Engineering and Environmental Services Inspection Form

Item	Y	N	N/A	Comments / Remarks
XII. Vehicles & Mobile Equipment				
Inform workers verbally and provide training to stay clear of backing and turning vehicles and equipment with rotating cabs.				
Maintain back-up alarms for equipment with limited rear view or use someone to help guide them back.				
Verify experience or provide training to crane and heavy equipment operators.				
Maintain at least a 10 foot clearance from overhead power lines when operating equipment.				
Block up the raised bed when inspecting or repairing dump trucks.				
Use a tag line to control materials moved by a crane.				
Provide flagmen with orange and red warning garments while working in vehicular traffic.				
XIII. Electrical				
Prohibit work on new and existing energized (hot) electrical circuits until all power is shut off and a positive "Lockout/Tagout System" is in place.				
Maintain all electrical tools and equipment in safe condition and check regularly for defects.				
Broken or damaged tools and equipment must be removed from the jobsite.				
Protect all temporary power (including extension cords) with Ground Fault Circuit Interrupters (GFCIs). Plug into a GFCI protected temporary power pole, a GFCI protected generator, or use a GFCI extension cord to protect against shocks.				
Locate and identify overhead electrical power lines. Make sure that ladders, scaffolds, equipment or materials never come within 10 feet of electrical power lines.				
XIV. Fire Prevention				
Provide fire extinguishers near all welding, soldering, or other sources of ignition.				

Appendix E - Langan Engineering and Environmental Services Inspection Form

Item	Y	N	N/A	Comments / Remarks
XIV. Fire Prevention				
Avoid spraying of paint, solvents or other types of flammable materials in rooms with poor ventilation. Buildup of fumes and vapors can cause explosions or fires.				
Store gasoline and other flammable materials in a safety can outdoors or in an approved storage facility.				
Provide one fire extinguisher within 100 feet of employees for each 3,000 square feet of building.				
XV. Asbestos				
Conduct air monitoring where there may be asbestos exposure				
<p>Where employees may be exposed to asbestos, establish a program which includes:</p> <ul style="list-style-type: none"> a. Awareness training b. Health effects of asbestos exposure c. Caution labels and signs d. Use of appropriate respiratory protection e. Protective clothing f. Change areas for storage of work and street clothes g. Medical surveillance h. Recordkeeping i. Personnel certifications j. Contractor licensing 				
Establish regulated areas if the permissible exposure limit (PEL) is likely to be exceeded				
<p>Employ the following engineering controls to minimize asbestos fiber release:</p> <ul style="list-style-type: none"> a. Local ventilation exhaust b. HEPA filtration and vacuuming c. Work area isolation d. Wet handling methods 				

Appendix E - Langan Engineering and Environmental Services Inspection Form

Item	Y	N	N/A	Comments / Remarks
XV. Asbestos				
Ensure all activities are being conducted in accordance with USEPA, USOSHA, USDOT, NYSDOL, NYCDEP, and NYCDOS rules and regulations.				
Ensure all power tools are equipped with HEPA filtered local exhaust ventilation.				
Ensure all asbestos waste is properly labeled and disposed of.				
XVI. Dusts, Gases, Fumes, and Mists				
Ensure material safety data sheets (MSDS) are maintained on each product in use at the construction site.				
Provide adequate ventilation				
Ensure proper protective equipment is used to protect against overexposure				
XVII. Silica				
Provide adequate exhaust to remove silica particles from the work area				
Provide respirators for employees who may be overexposed to silica dust particles				
XVIII. Noise				
Provide hearing protectors when noise levels exceed 90 decibels on the A weighted scale (dbA)				
Enforce the use of hearing protective equipment				
Establish administrative controls to reduce or eliminate excessive noise				
XIX. Respiratory Protection				
Have a written respiratory protection program in effect in accordance with 29 CFR 1910.134				
Selection of respirators should be based on the amount and type of toxin present, and should be comfortable to the user				

Appendix E - Langan Engineering and Environmental Services Inspection Form

Item	Y	N	N/A	Comments / Remarks
XIX. Respiratory Protection				
The issuance of respiratory equipment should include the following: a. Instruction in the proper use of respiratory equipment b. Allowing the user to become familiar with the equipment prior to use c. Qualitative or quantitative fit testing d. Positive and negative pressure field testing prior to each use e. Maintenance of fit test records				
Ensure workers are properly trained in the use of respiratory protective equipment, and are familiar with the written respiratory protection program				
Ensure workers are familiar with the following: a. Cleaning of the respirator b. Storage of the respirator c. Inspecting of the respirator d. Procedures for ordering and installing replacement parts				
Ensure all workers who wear respirators have been medically cleared to wear such equipment				
Procedures are in place to monitor the work area environment to ensure proper respiratory equipment has been selected				
XX. Hazardous Materials				
Store flammable and combustible liquids in approved containers, and in approved fire cabinets when not in use				
Keep flammable and combustible liquids (except for storage in approved fire cabinets) at least 25 feet from any ignition source (smoking materials, open flames, electrical power, grinders, etc.)				
Use bonding straps on bare metal of containers when transferring flammable or combustible liquids between containers				
Use grounding straps on flammable or combustible liquid metal drums (when transferring liquid)				
Paint spray equipment that is bonded and grounded				
Store caustics, acids, flammables and combustibles, and oxidizers separately				

Appendix E - Langan Engineering and Environmental Services Inspection Form

Item	Y	N	N/A	Comments / Remarks
XX. Hazardous Materials				
Compressed gas cylinders should be strapped in storage and transport, segregated by full or empty, and secured against falls				
Compressed gas cylinders should be tagged “empty” or “MT” when spent				
Hazardous material and chemical containers should be properly labeled (including squeeze bottles)				
Prohibit eating, smoking, drinking and applying cosmetics in hazardous materials storage and use areas				
Ensure a spill control and response program is in effect				
Store waste chemicals (including waste paint, solvents, etc), contaminated rags, debris (including paint cans, stir sticks, paper, plastic, etc) in accumulated storage as designated by the SSHO and as follows: <ul style="list-style-type: none"> a. Segregated containers labeled “Hazardous Waste” with a description of the waste b. Keep lids closed on containers c. Date full containers and arrange for removal from the site 				
If waste water is being generated, ensure the following: <ul style="list-style-type: none"> a. Label containers as described above b. Store tanks in secondary contained areas as approved by the SSHO c. Date full containers and arrange for removal from the site d. Do not overfill tanks or mishandle the waste water 				
Obtain MSDS for all new materials brought onto the site				
XXI. Confined Spaces				
Provide training for employees in confined space entry				
Provide proper and appropriate equipment				

Appendix E - Langan Engineering and Environmental Services Inspection Form

Item	Y	N	N/A	Comments / Remarks
XXI. Confined Spaces				
In manholes, ensure that vehicular exhaust or carbon monoxide cannot permeate into the space				
Examine the space for decaying vegetation or animal matter which may produce methane				
Survey the space for possible industrial waste which may contribute to the accumulation of a toxic or combustible atmosphere				
If there is inadequate natural air movement and forced ventilation is not provided, test the atmosphere for combustible gases and air contaminants				
Ensure the space is ventilated to safe levels of toxic or combustible gases before employees enter				
If ventilation is not sufficient to remove the hazardous atmosphere, ensure the employees entering the space wear the proper and approved respiratory protective equipment prior to entering the space				
Ensure that employees are trained in the use of respirators				
Ensure that the confined space entry program is in effect, and that entry permits have been filled out				
Ensure constant communication with employees in the immediate vicinity who are not within the confined space				
Ensure that the internal atmosphere is tested for toxic and combustible gases

HAZARD COMMUNICATION PROGRAM

APPENDIX F

HAZARD COMMUNICATION PROGRAM

This program has been developed to maintain compliance with 29 CFR 1926.59, the Hazard Communication Standard for the Construction Industry, 29 CFR 1910.1200, the Hazard Communication Standard for the General Industry, 29 CFR 1926.65, the Hazardous Waste Operations and Emergency Response Regulations for the Construction Industry and 29 CFR 1910.120, the Hazardous Waste Operations and Emergency Response Regulations for the General Industry. This Hazard Communication Program applies to all hazardous chemicals used at Langan Engineering and Environmental Services (Langan) job sites, however it does not apply to Hazardous Waste as defined by the Solid Waste Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6901 et seq.), when subject to regulations issued under that Act by the Environmental Protection Agency (EPA).

1.0 LABELS AND OTHER FORMS OF WARNING:

- 1) All containers of hazardous chemicals must be labeled, tagged, or marked with:
 - a. The identity of the hazardous chemical contained therein;
 - b. Appropriate hazard warnings.

No employee shall remove or deface existing labels on incoming containers of hazardous chemicals, unless the container is immediately marked with the required information.

- 2) The contents of all storage tanks are identified by the Tank Numbers on the storage tanks. The Tank Numbers will also be noted on the appropriate MSDS.
- 3) If the required information is not conveyed on the existing labeling of an incoming container, immediately notify the Manager of Regulatory Affairs in order to have new labels affixed.
- 4) Portable containers into which hazardous chemicals are transferred from labeled containers, and which are intended only for the immediate use of the employee who performs the transfer, are not required to be labeled.

HAZARD COMMUNICATION PROGRAM

2.0 MATERIAL SAFETY DATA SHEETS:

- 1) A copy of the Material Safety Data Sheet (MSDS) that meets the requirements of 29CFR 1910.1200 (g)(2) for every hazardous chemical, used at the Langan job site, must be kept in each appropriate work area.
- 2) If no MSDS is on file for a hazardous chemical in use, or does not arrive with first shipment, immediately notify the Langan Safety Officer so one may be obtained.
- 3) Should new significant health information become available for a hazardous chemical, an updated MSDS will immediately be requested from the manufacturer by the Langan's Safety Manager.

3.0 EMPLOYEE INFORMATION AND TRAINING:

- 1) Employees shall be informed of:
 - a. The requirements of the Hazard Communication Standards (29 CFR 1926.59 and 1910.1200);
 - b. Any operations in their work area where hazardous chemicals are present;
 - c. The location and availability of this written program, the required list of hazardous chemicals, and MSDS's.
- 2) Employee training shall include:
 - a. Methods and observations to be used to detect the presence or release of a hazardous chemical;
 - b. The physical and health hazards of the chemicals in the work area;
 - c. Measures or procedures the employee can take to protect themselves from exposure to hazardous chemicals (i.e. standard work practices, emergency procedures, appropriate safety equipment);
 - d. The details of this program, including an explanation of the labeling system and MSDS's, and how employees can obtain and use the appropriate information.

HAZARD COMMUNICATION PROGRAM

- 3) All training will be conducted by the Langan's Environmental Safety/Compliance Manager, or his designee.
- 4) Training will be presented by:
 - a. A slide presentation covering classes, labels, and marking of hazardous chemicals and the hazard communication requirements - "Classes/Labels/Markings of Hazardous Chemicals" along with a handout supplying definitions of the various physical and chemical hazards.
 - b. A review of Langan's sites written Hazard Communication Program covering the locations of the written program; the location and appropriate hazards and protective equipment to be used for each hazardous chemical at Langan's job sites, and how to read and understand an MSDS.
- 5) Training will be performed for new employees prior to their initial assignment. In addition, employee's training will be updated whenever a new hazard is introduced into the workplace through regular weekly safety meetings.

4.0 CONTRACTORS:

Contractors will be notified of all chemical hazards in their work area, any special instructions and all required safety equipment as outlined in the CONTRACTOR NOTIFICATION PROCEDURE (Attachment A).

5.0 HAZARDS FOR NON-ROUTINE TASKS - CONFINED SPACE ENTRY:

Anyone entering a confined space will follow the Confined Space Entry Procedures as described in Appendix I of this HASP, and be informed of the hazards to be encountered in the confined space, prior to entry, by the person completing the confined space entry permit.

RIGHT TO KNOW LAW

(180 Laws of New York - Chapter 551)

The "Right To Know" Law maintains that workers have an inherent right to know all of the health hazards associated with their exposure to toxic substances for two reasons:

HAZARD COMMUNICATION PROGRAM

- 1) Employees have a right to make an informed decision about the possible costs of employment to health and life.
- 2) Employees can observe symptoms of toxicity in themselves, understand the relationship between the symptoms and exposure, and can therefore evaluate the need for any corrective action.

6.0 EMPLOYEE RIGHTS:

§ Employees or their representatives may request and must receive, upon request, all information concerning the hazards of toxic substances in the workplace.

§ An employee may refuse to work with a toxic substance if he has requested information about it and has not received the written reply within 72 hours (3 working days, excluding weekends and public holidays) of its receipt by the employer.

§ An employee may exercise any right pursuant to, or directly related to, the "Right To Know" Law without fear of any discrimination what so ever.

§ An employee must not be required to waive any rights under the "Right To Know" Law as a condition of employment.

§ An employee may file a complaint with the Department of Labor if he or she has been discriminated against in violation of the "Right To Know" Law.

HAZARD COMMUNICATION PROGRAM

MSDS COPY REQUEST

Name: _____

The substance to which I am routinely exposed, and for which I am requesting a copy of a Material Safety Data Sheet is:

(Employee must use a separate request for each Material Safety Data Sheet requested)

My reason for requesting this information is:

(Employee Signature)

(Date)

G I have received a copy of the
MSDS which I requested.

(Employee Signature/Date)

G A copy of the MSDS for _____ which you have requested is not
available. We are making every effort to obtain a copy from our supplier.

(Compliance Manager (Safety)

(Date)

(Employee Signature)

(Date)

HAZARD COMMUNICATION PROGRAM

GENERAL TOXICOLOGY PRINCIPALS

ACUTE EFFECTS: Health effects from exposure to a toxin for less than 24 hours, and it usually refers to a single continuous exposure to a high concentration of a chemical. Acute exposures to chemicals are rapidly absorbed and is likely to produce immediate toxic effects, but acute effects can also produce delayed toxicity that may or may not be similar to the toxic effects of chronic exposure.

CHRONIC EFFECTS: Health effects from repeated exposures to a toxin for more than three months. Chronic effects tend to occur at a delayed time after the exposure, which is known as the latency period.

DISTINCTION BETWEEN TOXICITY AND HAZARD: An extremely toxic chemical that is sealed in a container and stored properly poses very little hazard. On the other hand, drinking five gallons of water, which is not toxic, in one sitting could be very hazardous.

DOSE-RESPONSE RELATIONSHIP: Refers to the measurement and analysis of the doses, or levels of exposure, at which toxic effects will occur.

HAZARD: The degree of probability that an injury or illness will occur under the specified conditions of use of a product.

HAZARDOUS CHEMICALS: Any chemical which is a physical or health hazard.

HEALTH HAZARD: A chemical for which there is a significant evidence that acute or chronic health effects may occur in exposed employees.

LATENCY PERIOD: The period of time between the initial exposure and the onset of symptoms related to the toxic effects of the exposure. Toxins associated with long latency periods are of a concern since the lack of an immediate effect generates a lack of caution when it comes to wearing personal protective equipment.

LD50: A single dose of a material which on a basis of laboratory tests is expected to kill 50% of a group of test animals. The LD50 is usually expressed as milligrams of materials per kilogram of animal body weight (mg/Kg).

LC50: The concentration of a material in air which, on the basis of laboratory tests, is expected to kill 50% of a group of test animals when administered as a single exposure. The LC50 is expressed as parts of a material per million parts of air, by volume (ppm) for gases and vapors, or as milligrams of material per cubic meter of air (mg/m³) for dusts, mists, and fumes.

HAZARD COMMUNICATION PROGRAM

PHYSICAL HAZARD: A chemical that is a combustible liquid, a compressed gas, explosive, flammable, an organic peroxide, an oxidizer, pyrophoric, unstable (reactive), or water reactive.

SUBCHRONIC EFFECTS: Health effects from repeated exposures to a toxin for less than three months.

TOXICITY: The ability of a chemical to produce harmful effects.

HEALTH HAZARDS

CARCINOGEN: Causes cancer

CORROSIVE: A chemical that causes visible destruction of, or irreversible alterations to living tissue (i.e. hydrochloric acid, sulfuric acid).

EXTREMELY TOXIC: A chemical that has:

- 1) An LD50 single oral dose for rats of less than 1 milligram per kilogram (mg/Kg) of body weight, or;
- 2) An LC50 4-hour vapor exposure for rats of less than 10 parts per million (ppm), or;
- 3) An LD50 skin exposure to rabbits of less than 5 mg/Kg of body weight, or;
- 4) A probable lethal dose to humans of less than 1 grain (one taste).

HIGHLY TOXIC: A chemical that has:

- 1) An LD50 single oral dose for rats of greater than 1 mg/Kg of body weight, but less than 50 mg/Kg of body weight, or;
- 2) An LC50 4-hour vapor exposure for rats of greater than 10 ppm, but less than 100 ppm, or;
- 3) An LD50 skin exposure to rabbits of greater than 5 mg/Kg of body weight, but less than 43 mg/Kg of body weight, or;
- 4) A probable lethal dose to humans of greater than 1 grain (1 taste), but less than 4 cubic centimeters (cc) (1 teaspoon).

HAZARD COMMUNICATION PROGRAM

IMMEDIATELY DANGEROUS TO LIFE OR HEALTH (IDLH): Any condition that poses an immediate or delayed threat to life that would cause irreversible adverse health effects or that would interfere with an individual's ability to escape from a permit space.

IRRITANT: A substance that produces an irritating effect when it contacts skin, eyes, nose, or respiratory system (e.g. tear gas).

SENSITIZER: A chemical that causes a substantial proportion of exposed people or animals to develop an allergic reaction in normal tissue after repeated exposure to the chemical.

TARGET ORGAN EFFECTS: Effects on specific body organs by certain chemicals (i.e. carbon tetrachloride - causes liver damage).

TOXIC: A chemical that has:

- 1) An LD50 single oral dose for rats of greater than 50 mg/Kg of body weight, but less than 5,000 mg/Kg of body weight, or;
- 2) An LC50 4-hour vapor exposure for rats of greater than 100 ppm, but less than 10,000 ppm, or;
- 3) An LD50 skin exposure to rabbits of greater than 43 mg/Kg of body weight, but less than 2,810 mg/Kg of body weight, or;
- 4) A probable lethal dose to humans of greater than 4 cc (1 teaspoon), but less than 1 pint (250 grams).

COMBUSTION DEFINITIONS AND PROPERTIES

AUTOIGNITION TEMPERATURE: The temperature at which a material will ignite without an external source of ignition.

BOILING LIQUID EXPANDING VAPOR EXPLOSION (BLEVE): Occurs when a liquefied flammable gas containers is heated up and causes the liquid to boil and change to a gas, which expands and causes the container to explode.

DEFLAGRATION: An explosion which occurs slower than the speed of sound, and produces no shock wave.

HAZARD COMMUNICATION PROGRAM

DETONATION: An explosive chemical reaction with a rate of less than 1/100th of a second.

EXOTHERM: Any material which is capable of releasing energy when it burns.

EXPLOSION: Effect produced by the sudden and violent expansion of gases which may or may not be accompanied by shock waves, or disruption of the enclosing materials.

FIRE POINT: The temperature, usually about five to ten degrees above the flash point at which the ignitable mixture will continue to burn.

FLAMMABILITY/EXPLOSIVE LIMITS:

Lower Flammable Limit (LFL): The point at which an air and vapor mixture is too lean for combustion.

Upper Flammable Limit (UFL): The point at which an air and vapor mixture is too rich for combustion.

Lower Explosive Limit (LEL): When the concentration of a material is too small for an explosion to occur.

Upper Explosive Limit (UEL): The level at which there is too much material present for an explosion to occur.

FLASH POINT: The lowest temperature at which a material gives off enough vapors to form an ignitable mixture.

SPONTANEOUS COMBUSTION: Occurs when combustible solids are heated to the ignition point by an internal source of heating.

PHYSICAL HAZARDS

COMBUSTIBLE LIQUID: Having flash points at or above 100 EF but below 200 EF (e.g. fuel oils, ethylene glycol).

COMPRESSED GAS: A gas having a pressure exceeding 40 psi at 70 EF or;

§ A gas having a pressure exceeding 40 psi at 130 EF regardless of the pressure at 70 EF or;

§ A liquid having a vapor pressure exceeding 40 psi at 100 EF (e.g. LP Gas, acetylene, hydrogen).

HAZARD COMMUNICATION PROGRAM

EXPLOSIVE: A chemical that causes a sudden, almost instantaneous release of pressure, gas, and heat when subjected to sudden shock, pressure, or high temperature.

FLAMMABLE:

Aerosol: Yields a flame projection exceeding 18 inches at full valve opening or a flashback at any degree of valve opening.

Gas: Forms a flammable mixture with air at a concentration of 13% by volume or less, or forms a range of flammable mixtures with air wider than 12% by volume, regardless of the lower limit.

Liquid: Has a flash point below 100 EF (e.g. acetone, gasoline, methyl alcohol)

Solid: A solid, other than blasting agent or explosive, that is liable to cause fire through friction, absorption, moisture, spontaneous chemical change, or retained from manufacturing or processing, or which can be ignited readily and when ignited burns so vigorously and persistently as to create a serious hazard (e.g., magnesium powder).

ORGANIC PEROXIDE: A chemical that is explosively sensitive to heat, shock, or friction and is potentially toxic (e.g., benzoyl peroxide).

OXIDIZER: A chemical other than a blasting agent or explosive, that initiates or promotes combustion in other materials, there by causing fire either of itself or through the release of oxygen or other gases (e.g., ammonium nitrate fertilizer, hydrogen peroxide solution).

PYROPHORIC: A chemical that will ignite spontaneously in air at a temperature of 130 EF or below (e.g., aluminum alkyls, alkyl boranes).

UNSTABLE (REACTIVE): A chemical which in the pure state, or as produced or transported, will vigorously polymerize, decompose, condense, or will become self-reactive under conditions of shocks, pressure, or temperature (e.g., picric acid).

WATER REACTIVE: A chemical that reacts with water to release a gas that is either flammable or presents a health hazard (e.g., sodium metal, potassium metal).

NO SMOKING REGULATIONS

Smoking represents a dual hazard in a hazardous waste handling operational area. The first hazard is the flammability danger posed by smoking in areas where flammable materials are stored or handled. The

HAZARD COMMUNICATION PROGRAM

second hazard is the contamination danger whereby toxic materials can be transferred from hands (gloves) to cigarettes and inhaled or ingested during smoking.

PRECAUTIONS:

§ Do not smoke in operational areas.

§ Always wash hands prior to smoking (or eating).

HAZARD COMMUNICATION PROGRAM

HAZARDOUS CHEMICALS

HAZARDOUS CHEMICALS	HAZARD
Diesel Fuel	<p>Contains petroleum distillate and aliphatic and aromatic hydrocarbons</p> <p>OSHA PEL 8-hr TWA –5 mg/m³ OSHA STEL - 100 mg/m³</p> <p><i>PPE: Use nitrile, neoprene, or PVC gloves. If deemed necessary by degree of exposure chemical protective clothing is recommended. A NIOSH/MSHA-approved air-purifying respirator with organic vapor cartridges or canister may be permissible under certain circumstances where airborne concentrations are or may be expected to exceed exposure limits or for odor or irritation.</i></p>
No. 6 Fuel Oil	<p>A combustible complex combination of heavy petroleum hydrocarbons (some carcinogenic). The amount of sulfur varies with product specification. Hydrogen Sulfide (H₂S) may be present in trace quantities</p> <p>Fuel Oil OSHA PEL 8-hr TWA –5 mg/m³ (as oil mist) and 0.2 mg/m³ as mineral oil</p> <p>Hydrogen Sulfide OSHA Exposure Limits –20 ppm ceiling/50 ppm peak</p> <p><i>PPE: Use nitrile, neoprene, or PVC gloves. If deemed necessary by degree of exposure chemical protective clothing is recommended. If a hydrogen sulfide hazard is present (that is, exposure potential above H₂S permissible exposure limit), use a positive-pressure SCBA or Type C supplied air respirator with escape bottle. Where it has been determined that there is no hydrogen sulfide exposure hazard (that is, exposure potential below H₂S permissible exposure limit), a NIOSH/ MSHA-approved air-purifying respirator with organic vapor cartridges or canister may be permissible under certain circumstances where airborne concentrations are or may be expected to exceed exposure limits or for odor or irritation.</i></p>
Naphthalene (Tar comphor, white tar)	<p>Organic solid. Colorless to brown solid with an odor of mothballs (normally shipped as a molten solid). Combustible solid, but will take some effort to ignite.</p> <p>OSHA PEL 8-hr TWA – 50 mg/m³; IDLH – 250 mg/m³</p> <p><i>PPE: Use rubber glove and safety shoes, full-body coverall (tyvek suit), Chemical cartridge respirator in combination with High Efficiency Particulate P100 respirator, face shield, if exposure is over 10 times the OSHA Permissible Exposure Limit (PEL) use any self-contained breathing apparatus that has a full facepiece and is operated in a pressure demand mode.</i></p>
Polycyclic Aromatic Hydrocarbons	<p>Flammable liquids. Inhalation, ingestion, and skin absorption hazard, exhibits toxic effects on the eyes, skin, respiratory system, and central nervous system, liver and kidneys. Symptoms include eye and nose irritation, drowsiness, dermatitis, chemical pneumonia, narcosis, and cracked skin.</p> <p>OSHA Permissible Exposure Ceiling Limit: 8-hr TWA: 500 ppm</p> <p>Immediately Dangerous to Life and Health at 10% LEL, approximately 2.2 x OSHA Permissible Exposure limit (PEL)</p> <p><i>PPE: Use full body chemical protective clothing, organic vapor cartridge respirator, rubber gloves, safety glasses, or goggles. If over 10 times PEL, any self-contained breathing apparatus in pressure demand mode.</i></p>

HAZARD COMMUNICATION PROGRAM

HAZARDOUS CHEMICALS	HAZARD
Isobutylene	<p>Non-carcinogenic compressed gas that does not contain oxygen. Product is relatively nontoxic. Simple hydrocarbons can irritate the eyes, mucous membranes and respiratory system at high concentrations. Inhalation of high concentrations may cause dizziness, disorientation, incoordination, narcosis, nausea or narcotic effects. This product may displace oxygen if released in a confined space.</p> <p><i>PPE: Protective gloves made of plastic or rubber.</i></p>
Alconox	<p>Biodegradable detergent used for decontamination.</p> <p>OSHA PEL – Not Applicable</p> <p><i>PPE: Impermeable protective gloves.</i></p>

HAZARD COMMUNICATION PROGRAM

**POTENTIALLY HAZARDOUS OPERATIONS, ASSOCIATED AIR CONTAMINANTS AND
RECOMMENDED PPE**

Process Type	Contaminant Examples	Recommended PPE
<p>Equipment Removal: Dismantling and removal of electrical switches and panels, transformers, vapor lamps and fluorescent fixtures</p>	<p><i>Gases:</i> Carbon monoxide; Ozone</p> <p><i>Dusts. Fumes, mists:</i> Polychlorinated biphenyls (PCB), Arsenic, Barium, Cadmium, Chromium, Lead, Mercury; Naphthalene</p>	<p>Employ engineering controls such as work area containment and ventilation. PPE: Use rubber glove and safety shoes, full-body chemical protective clothing. Combination organic vapor and mercury cartridge respirator, face shield, if exposure is over 10 times the OSHA Permissible Exposure Limit (PEL) use any self-contained breathing apparatus that has a full facepiece and is operated in a pressure demand mode with Level A protection.</p>
<p>Solid Operations: Pouring; Mixing; Separations; Extraction; Crushing; Conveying; Loading; Bagging</p>	<p><i>Dusts:</i> Arsenic, Barium, Chromium, Lead; Cadmium; Mercury; Cement; Quartz (free silica); Fibrous glass</p>	<p>Employ engineering controls such as work area containment and ventilation. PPE: Use rubber glove and safety shoes, full-body coverall (tyvek suit), High Efficiency Particulate P100 respirator, face shield, if exposure is over 10 times the OSHA Permissible Exposure Limit (PEL) use any self-contained breathing apparatus that has a full facepiece and is operated in a pressure demand mode. If Mercury is present use mercury chemical cartridge in combination with P100 and OV filters.</p>

HAZARD COMMUNICATION PROGRAM

ATTACHMENT A

CONTRACTOR NOTIFICATION PROCEDURE

In order to ensure the safety of contractors performing work at this facility, the following procedures must be followed:

- § At the time a contractor is hired, the attached Contractor's Notice (Attachment A) must be delivered to the contractor informing them of the rules that must be followed at this facility.
- § The Facility Notification of Contractor Work (Attachment B) must be completed and forwarded to the Corporate Safety Officer by the person hiring the contractor.
- § The bottom portion of the FACILITY NOTIFICATION will then be completed, signed, and returned to the originator indicating any special instructions or safety equipment required. This information is to be relayed to the contractor by the person hiring them prior to the contractor beginning work.
- § A new FACILITY NOTIFICATION must be completed prior to the contractor working in an area different than was authorized in the notification.
- § A copy of the authorized FACILITY NOTIFICATION with any special instructions and/or additional safety equipment will be forwarded to the Site Safety Officer. The Site Safety Officer will verify that all contractors' employees have the required safety equipment as outlined in the FACILITY NOTIFICATION before being allowed access to the facility.
- § The Site Safety Officer will not admit any contractor without an authorized FACILITY NOTIFICATION.
- § Prior to allowing a contractor access to the facility, the Site Safety Officer will contact the Department Manager or Foreman for the area the work is to be performed. (Note: This will be indicated on the FACILITY NOTIFICATION). The Department Manager or Foreman will complete and sign the WORK PERMIT (Attachment C) authorizing the contractor to work in the specified area for that immediate work shift indicating any special instructions for the contractor on the permit.
- § The contractor will retain the WORK PERMIT until the end of the shift. He will then return it to the Site Safety Officer when signing out.

SAFETY ORIENTATION - AWARENESS TRAINING

FOR AUTHORIZED EMPLOYEES AND SUBCONTRACTORS

NAME OF JOB-SITE:
PRESENTED BY:
DATE/TIME/LOCATION:

AWARENESS TRAINING OUTLINE REVIEWED WITH ACKNOWLEDGMENT SHEET ATTACHED:

I. INTRODUCTION

- 1) Corporate Safety Statement
- 2) Safety Program Synopsis
- 3) Conduct on Customers Property
- 4) Fitness For Duty Program
- 5) Brief review of following sections of Subpart C - General Safety and Health Provisions:
 - § 1926.20(a) Contractor requirements: Must maintain site free of conditions that are Aunsanitary, hazardous, or dangerous to health or safety@. OSHA=s definition of a ACompetent Person@.
 - § 1926.21 Safety Training and Education: employees must be instructed in recognition, avoidance and prevention of unsafe conditions.
 - § 1926.23 First Aid & Medical Attention. Access to medical records and confidentiality.
 - § 1926.25 Housekeeping
- 6) Brief review of the following sections of Subpart D:
 - § 1926.51 Sanitation; Potable/non-potable water; toilets/washing facilities; Food handling.
 - § 1926.1101 Asbestos; only certified personnel may handle asbestos containing materials.
 - § 1926.65 Hazardous Materials - only certified personnel may handle hazardous materials.

II. HAZARD COMMUNICATION (1926.59; 1910.1200)

HAZARD COMMUNICATION PROGRAM

- 1) Purpose of standard
- 2) Sources of information: Material Safety Data Sheets (MSDS), labels
- 3) Material Safety Data Sheets:
 - § Materials for which required
 - § Definition of basic terminology:
 - ∇ flammable/combustible liquids
 - ∇ flash point
 - ∇ corrosive
 - ∇ chronic/acute exposures
 - ∇ routes of entry (give examples, particularly of inhalation)
 - ∇ target organs
 - § Review sample MSDS
 - § Right of access and location of MSDS
- 4) Labeling
 - § Requirements for labeling - all containers must be labeled.
 - § Alternative methods (signs, placards, batch ticket, etc.)
- 5) Process Safety Management (1926.64; 1910.119)
 - § Prevent catastrophic releases hazardous chemicals

III. PERSONAL PROTECTIVE EQUIPMENT (1926 SUBPART E)

- 1) Head Protection (1926.100; 1910.135)
 - § General requirements - hard hats required at all times
 - § ANSI standards
 - § Care for and inspection
- 2) Hearing Protection (1926.101; 1926.52; 1910.95)
 - § Brief review of Occupational Noise Exposure requirements (decibel levels, effect on hearing, audiometric exams)
 - § Hearing protection types; noise reduction ratings

HAZARD COMMUNICATION PROGRAM

- § Signs for posted areas
- 3) Eye and Face Protection (1926.102, 1910.133)
 - § ANSI Safety Glasses required at all times (Z-87)
 - § Review selection guide for types of protection
- 4) Respiratory Protection (1926.103, 1910.134)
 - § Proper use and limitations of respirators (half and full face)
 - § Requirements for fit testing and ability to wear determination
 - § Fit check procedures when donning
 - § Care for, cleaning, inspection, and storage
- 5) Other
 - § Safety shoes
 - § Gloves
 - § Protective clothing and chemical protection
 - § Electrical protection

IV. FIRE PROTECTION (1926 SUBPART F)

Lagan Personnel are not fire fighters. Use of extinguishers are for inception stage only. Immediately call for professional firefighters.

- 1) Concept of fire triangle
- 2) Classes of fire
- 3) Extinguisher types appropriate for hazard
- 4) Hands on demonstration of use (when permissible)
- 5) Flammable/combustible liquid storage
- 6) Approved safety cans for flammable liquids
- 7) Quantities limitations for storage
- 8) Bonding/grounding requirements
- 9) Maintain access to exits, emergency equipment
- 10) Hot Work Permits

HAZARD COMMUNICATION PROGRAM

- 11) Temporary heating devices (1926.154)

V. FALL PROTECTION (1926 SUBPART M)

- 1) Six (6) foot elevation requirement
- 2) Design specifications for lifelines and lanyards
- 3) Show how to wear harness properly
- 4) Inspection if the responsibility of worker to be performed prior to putting on
- 5) Ladders
 - § Condition of ladders
 - § Proper pitch and securing/tie off
 - § Rails extend 36" above landing
- 6) Guarding floor and wall openings (1926.500)
 - § General description of when guardrail protection is required
- 7) Crane suspended personnel platforms (1926.550 (g) - If used
- 8) Aerial lifts (1926.556)
 - § Fall protection requirements must comply when stepping foot within basket
 - § Only full body harness acceptable (no use of safety Abelts@)

HAZARD COMMUNICATION PROGRAM

VI. CONFINED SPACE ENTRY (1910.146)

- 1) Definition of and examples
- 2) Permit required/non-permit required spaces
- 3) Atmospheric testing requirements
- 4) Rescue plans, retrieval devices
- 5) Safety monitor responsibilities

VII. LOCKOUT/TAGOUT (1910.147)

- 1) Applies to all energy sources
- 2) General purpose & examples of when required
- 3) Use of lock box technique
- 4) Must be aware of plant specific procedures

VIII. DEMOLITION (1926 SUBPART T)

- 1) Engineering Survey
- 2) Shoring/bracing of walls and floors
- 3) Utility services/process line disconnects
- 4) Presence of hazardous materials
 - § Asbestos; certified workers required
 - § Lead; requirements to check lead content, work practices and training based on presence of lead.
 - § Cadmium; requirements to check cadmium content, work practices and training based on presence of cadmium.
- 5) Protection of floor/wall openings and entrances

IX. GENERAL SAFE WORK PRACTICES

- 1) Proper body mechanics and lifting techniques
- 2) Project Emergency and Evacuation Plan
- 3) Emergency telephone numbers posted in job-site office/trailer.

X. SITE SPECIFIC HAZARDS/TOPICS

--

HAZARD COMMUNICATION PROGRAM

**SITE SAFETY AND HEALTH ORIENTATION AWARENESS &
ACKNOWLEDGMENT**

DECLARATION OF UNDERSTANDING
NAME OF JOB-SITE:
PRESENTED BY:
DATE/TIME/LOCATION:

The undersigned have participated in; acknowledge, understand and will follow the safety procedures, rules and guidelines covered during the LANGAN Orientation/Safety Training (copy of topics attached). I understand that copies of all procedures are available to me at any time and I have received copies of all requested procedures. By signing below I understand these safety rules are for my own protection and I will follow them to protect my co-workers the environment and me. I understand these safety rules are a condition of employment and failure to follow safe work practices may result in disciplinary action and/or loss of employment. If I ever believe an unsafe condition may exist I will stop work immediately and contact my foreman/supervisor/project manager.

Section 3 - Hazards Identification, Including Emergency Overview ALCONOX

Health Hazards Acute & Chronic: PROLONGED EXPOSURE TO DUST MAY IRRITATE MUCOUS MEMBRANES.

Signs & Symptoms of Overexposure:
SEE HEALTH HAZARDS.

Medical Conditions Aggravated by Exposure:
NONE SPECIFIED BY MANUFACTURER.

LD50 LC50 Mixture: NONE SPECIFIED BY MANUFACTURER.

Route of Entry Indicators:

Inhalation: YES

Skin: NO

Ingestion: NO

Carcinogenicity Indicators

NTP: NO

IARC: NO

OSHA: NO

Carcinogenicity Explanation: NOT RELEVANT

Section 4 - First Aid Measures ALCONOX

First Aid:

EYES: FLUSH WITH PLENTY OF WATER FOR AT LEAST 15 MIN. SKIN: FLUSH WITH PLENTY OF WATER. INGEST: DRINK LARGE QTY OF WATER TO DILUTE MATERIAL. GET MED ATTN FOR DISCOMFORT. INHAL: REMOVE TO FRESH AIR. SU PPORT BRTHG (GIVE O*2/ARTF RESP) (FP N).

Section 5 - Fire Fighting Measures ALCONOX

Fire Fighting Procedures:

WEAR NIOSH/MSHA APPROVED SCBA AND FULL PROTECTIVE EQUIPMENT (FP N).

Unusual Fire or Explosion Hazard:

NONE.

Extinguishing Media:

WATER, CARBON DIOXIDE, DRY CHEMICAL, FOAM SAND/EARTH.

Flash Point: **Flash Point Text:** NONE

Autoignition Temperature:

Autoignition Temperature Text: N/A

Lower Limit(s): N/A

Upper Limit(s): N/A

Section 6 - Accidental Release Measures
ALCONOX

Spill Release Procedures:

MATERIAL FOAMS PROFUSELY, SHOVEL & RECOVER AS MUCH AS POSSIBLE. RINSE REMAINDER TO SEWER. MATERIAL IS COMPLETELY BIODEGRADABLE.

Section 7 - Handling and Storage
ALCONOX

Handling and Storage Precautions:

Other Precautions:

Section 8 - Exposure Controls & Personal Protection
ALCONOX

Respiratory Protection:

NIOSH/MSHA APPROVED DUST MASK.

Ventilation:

LOCAL EXHAUST: NORMAL.

Protective Gloves:

IMPERVIOUS GLOVES (FP N).

Eye Protection: CHEMICAL WORKERS GOGGLES (FP N).

Other Protective Equipment: NOT REQUIRED.

Work Hygienic Practices: NONE SPECIFIED BY MANUFACTURER.

Supplemental Health & Safety Information: NONE SPECIFIED BY MANUFACTURER.

SAFETY DATA SHEET

Based on Directive 2001/58/EC et seq. of the Commission of the European Communities

BENZ[a]ANTHRACENE

1. Identification of the substance/preparation and of the company/undertaking

1.1 Identification of the substance or preparation:

Synonyms: benzo(a)anthracene

CAS No. : 56-55-3 BCR number : BCR-271
EC index No. : 601-033-00-9 NFPA code : N.D.
EINECS No. : 200-280-6 Molecular weight : 228.30
RTECS No. : CV9275000 Formula : C18H12

1.2 Use of the substance or the preparation:

Certified reference material for laboratory use only

1.3 Company/undertaking identification:

Institute for Reference Materials and Measurements
Retieseweg
B-2440 Geel
Tel. : +32 14 57 12 11
Fax : +32 14 58 42 73

1.4 Telephone number for emergency:

+32 70 245 245
Antigifcentrum
p/a Militair Hospitaal Koningin Astrid, Bruynstraat, B-1120 Brussel

2. Composition/information on ingredients

Hazardous ingredients	CAS No. EINECS No.	Conc. in %	Hazard symbol	Risks (R-phrases)
Benzo[a]anthracene	56-55-3 200-280-6	100	T;N	45-50/53 (1)

(1) For R-phrases in full: see heading 16

3. Hazards identification

- May cause cancer
- Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment

4. First aid measures

4.1 Eye contact:

- Consult a doctor/medical service if irritation persists
- Rinse immediately with water

4.2 Skin contact:

- Consult a doctor/medical service if irritation persists
- Wash with water and soap
- Remove clothing before washing

4.3 After inhalation:

- Consult a doctor/medical service if breathing problems develop
- Remove the victim into fresh air
- Unconscious: maintain adequate airway and respiration

4.4 After ingestion:

- Consult a doctor/medical service if you feel unwell
- Immediately give lots of water to drink
- Never give water to an unconscious person

BENZ[a]ANTHRACENE

BENZ[a]ANTHRACENE

5. Fire-fighting measures

5.1 Suitable extinguishing media:

- Water spray
- Alcohol foam
- Polymer foam
- ABC powder
- Carbon dioxide

5.2 Unsuitable extinguishing media:

- Solid water jet ineffective as extinguishing medium

5.3 Special exposure hazards:

- Not easily combustible
- Upon combustion CO and CO₂ are formed

5.4 Instructions:

- Take account of toxic firefighting water
- Use firefighting water moderately and contain it

5.5 Special protective equipment for firefighters:

- Heat/fire exposure: compressed air/oxygen apparatus
- Dust cloud production: compressed air/oxygen apparatus

6. Accidental release measures

6.1 Personal protection/precautions: see heading 8.1/8.3/10.3

6.2 Environmental precautions:

- Prevent soil and water pollution
- Substance must not be discharged into the sewer
- Dam up the solid spill

6.3 Methods for cleaning up:

- Stop dust cloud by covering with sand/earth
- Carefully collect the spill/leftovers
- Scoop solid spill into closing containers
- Take collected spill to manufacturer/competent authority
- Clean contaminated surfaces with an excess of water
- Wash clothing and equipment after handling

7. Handling and storage

7.1 Handling:

- Observe strict hygiene
- Avoid prolonged and repeated contact with skin
- Avoid raising dust
- Do not discharge the waste into the drain
- Remove contaminated clothing immediately

7.2 Storage:

- Keep container tightly closed. Store in a cool area. Store in a dry area.
- Store in a dark area.
- Keep away from: heat sources, ignition sources, oxidizing agents, acids

Storage temperature	: N.D.	°C
Quantity limits	: N.D.	kg
Storage life	: N.D.	
Materials for packaging	:	
- suitable	:no data available	
- to avoid	:no data available	

7.3 Specific uses:

See information supplied by the manufacturer

BENZ[a]ANTHRACENE

8. Exposure controls/Personal protection

8.1 Exposure limit values:

TLV-TWA	:	mg/m ³	-	ppm
TLV-STEL	:	mg/m ³	-	ppm
TLV-Ceiling	:	mg/m ³		ppm
OES-LTEL	:	mg/m ³		ppm
OES-STEL	:	mg/m ³		ppm
MAK	:	mg/m ³		ppm
TRK	:	mg/m ³		ppm
MAC-TGG 8 h	:	mg/m ³		
MAC-TGG 15 min.	:	mg/m ³		
MAC-Ceiling	:	mg/m ³		
VME-8 h	:	mg/m ³		ppm
VLE-15 min.	:	mg/m ³		ppm
GWBB-8 h	:	mg/m ³		ppm
GWK-15 min.	:	mg/m ³		ppm
Momentary value	:	mg/m ³		ppm
EC	:	mg/m ³		ppm
EC-STEL	:	mg/m ³		ppm

Sampling methods:

- Benz(a)Anthracene (Polynuclear aromatic hydrocarbons) NIOSH 5506
- Benz(a)Anthracene (Polynuclear aromatic hydrocarbons) NIOSH 5515
- Benz(a)Anthracene OSHA CSI

8.2 Exposure controls:

8.2.1 Occupational exposure controls:

- Measure the concentration in the air regularly
- Work under local exhaust/ventilation

8.2.2 Environmental exposure controls: see heading 13

8.3 Personal protection:

8.3.1 respiratory protection:

- Dust production: dust mask with filter type P3
- High dust production: compressed air/oxygen apparatus

8.3.2 hand protection:

- Gloves
Suitable materials: No data available
- Breakthrough time: N.D.

8.3.3 eye protection:

- Safety glasses
- In case of dust production: protective goggles

8.3.4 skin protection:

- Protective clothing
- In case of dust production: head/neck protection
Suitable materials: No data available

BENZ[a]ANTHRACENE

9. Physical and chemical properties

9.1 General information:

Appearance (at 20°C)	: Crystalline solid / Scales
Odour	: Odourless
Colour	: Colourless to fluorescent yellow-green

9.2 Important health, safety and environmental information:

pH value	: N.D.	
Boiling point/boiling range	: N.A.	°C
Flashpoint	: N.D.	°C
Explosion limits	: N.D.	vol% (°C)
Vapour pressure (at 20°C)	: 0.00007	hPa
Vapour pressure (at 50°C)	: N.D.	hPa
Relative density (at 20°C)	: 1.3	
Water solubility	: 0.00001	g/100 ml
Soluble in	: Ether, acetone, oils/fats	
Relative vapour density	: N.D.	
Viscosity	: N.D.	Pa.s
Partition coefficient n-octanol/water	: 5.61/5.79	
Evaporation rate		
ratio to butyl acetate	: N.D.	
ratio to ether	: N.D.	

9.3 Other information:

Melting point/melting range	: 160	°C
Auto-ignition point	: N.D.	°C
Saturation concentration	: N.D.	g/m ³

10. Stability and reactivity

10.1 Conditions to avoid/reactivity:

- Stable under normal conditions

10.2 Materials to avoid:

- Keep away from: heat sources, ignition sources, oxidizing agents, acids

10.3 Hazardous decomposition products:

- Upon combustion CO and CO₂ are formed
- Reacts violently with (strong) oxidizers
- Decomposes on exposure to (strong) acids

11. Toxicological information

11.1 Acute toxicity:

LD50 oral rat	: N.D.	mg/kg
LD50 dermal rat	: N.D.	mg/kg
LD50 dermal rabbit	: N.D.	mg/kg
LC50 inhalation rat	: N.D.	mg/l/4 h
LC50 inhalation rat	: N.D.	ppm/4 h

BENZ[a]ANTHRACENE

11.2 Chronic toxicity:

EC carc. cat. : 2
EC muta. cat. : not listed
EC repr. cat. : not listed

Carcinogenicity (TLV) : A2
Carcinogenicity (MAC) : K
Carcinogenicity (VME) : not listed
Carcinogenicity (GWBB) : not listed

Carcinogenicity (MAK) : 2
Mutagenicity (MAK) : not listed
Teratogenicity (MAK) : -

IARC classification : 2A

11.3 Routes of exposure: ingestion, inhalation, eyes and skin
Caution! Substance is absorbed through the skin

11.4 Acute effects/symptoms:

AFTER SKIN CONTACT
- Slight irritation

11.5 Chronic effects:

- Probably human carcinogenic
- Mutagenicity: AMES test positive
- Probably human mutagenic

ON CONTINUOUS/REPEATED EXPOSURE/CONTACT:
- No specific information available

SIMILAR PRODUCTS CAUSE FOLLOWING SYMPTOMS:
- Feeling of weakness
- Photoallergy
- Skin rash/inflammation
- Cracking of the skin
- Skin cancer
- Lung tissue affection/degeneration
- Enlargement/affection of the liver
- Affection of the renal tissue

12. Ecological information

12.1 Ecotoxicity:

- LC50 (65 h) : 0.0018 mg/l (PIMEPHALES PROMELAS)
- EC50 (96 h) : 0.01 mg/l (DAPHNIA PULEX)

12.2 Mobility:

- Volatile organic compounds (VOC): 0%
- Photolysis in water
- Ozonation in water
- Insoluble in water

For other physicochemical properties see heading 9.

12.3 Persistence and degradability:

- biodegradation BOD₅ : N.D. % ThOD
- water : - Not readily biodegradable in water
- soil : T ½: > 100 days

12.4 Bioaccumulative potential:

- log P_{ow} : 5.61/5.79
- BCF : 72 h : 350 (LEUCISCUS IDUS)
- Highly bioaccumulative

BENZ[a]ANTHRACENE

12.5 Other adverse effects:

- **WGK** : 3 (Classification based on the R-phrases in compliance with Verwaltungsvorschrift wassergefährdender Stoffe (VwVwS) of 17 May 1999)
- **Effect on the ozone layer** : Not dangerous for the ozone layer (Council Regulation (EC) 3093/94)
- **Greenhouse effect** : no data available
- **Effect on waste water purification** : no data available

13. Disposal considerations

13.1 Provisions relating to waste:

- Waste material code (91/689/EEC, Council Decision 2001/118/EC, O.J. L47 of 16/2/2001): 16 05 06 (laboratory chemicals, consisting of or containing dangerous substances, including mixtures of laboratory chemicals)
- Waste material code (Flanders): 001, 045, 691
- Waste code (Germany): 59302
- Hazardous waste (91/689/EEC)

13.2 Disposal methods:

- Dissolve or mix with a combustible solvent
- Remove to an authorized incinerator equipped with an afterburner and a flue gas scrubber
- Do not discharge into surface water (2000/60/EEC, Council Decision 2455/2001/EC)

13.3 Packaging/Container:

- Waste material code packaging (91/689/EEC, Council Decision 2001/118/EC, O.J. L47 of 16/2/2001): 15 01 10 (packaging containing residues of or contaminated by dangerous substances)

BENZ[a]ANTHRACENE

When substances and their packaging meet the conditions established by ADR/RID/ADNR in chapter 3.4, **only** the following prescriptions shall be complied with:
each package shall display a diamond-shaped figure with the following inscription:
- 'UN 3077'
or, in the case of different goods with different identification numbers within a single package:
- the letters 'LQ'

BENZ[a]ANTHRACENE

15. Regulatory information

Enumerated in substance list Annex I of directive 67/548/EEC et sequens

Toxic

Dangerous for the environment

- R45 : May cause cancer
R50/53 : Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment
- S53 : Avoid exposure - obtain special instructions before use
S45 : In case of accident or if you feel unwell, seek medical advice (show the label where possible)
S60 : This material and/or its container must be disposed of as hazardous waste
S61 : Avoid release to the environment. Refer to special instructions/safety data sheets.

16. Other information

The information provided on this MSDS is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered as a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other material or in any process, unless specified in the text.

N.A. = NOT APPLICABLE
N.D. = NOT DETERMINED
* = INTERNAL CLASSIFICATION

Full text of any R-phrases referred to under heading 2:

- R45 : May cause cancer
R50/53 : Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment

Exposure limits:

HAZARDOUS SUBSTANCE FACT SHEET

Common Name: **BENZO(a)PYRENE**

CAS Number: 50-32-8

DOT Number: None

RTK Substance number: 0207

Date: August 1992 Revision: July 1998

HAZARD SUMMARY

- * **Benzo(a)pyrene** can affect you when breathed in and by passing through your skin.
- * **Benzo(a)pyrene** is a CARCINOGEN--HANDLE WITH EXTREME CAUTION.
- * Exposure may damage the developing fetus.
- * **Benzo(a)pyrene** can cause skin irritation with rash and/or burning sensations. Repeated exposure can cause skin changes such as thickening and darkening.
- * Exposure can irritate and/or burn the eyes on contact.
- * Except in laboratories, **Benzo(a)pyrene** is usually mixed with other "Coal Tar Pitch" chemicals. CONSULT THE NEW JERSEY DEPARTMENT OF HEALTH and SENIOR SERVICES HAZARDOUS SUBSTANCE FACT SHEETS ON COAL TAR SUBSTANCES.

IDENTIFICATION

Benzo(a)pyrene is a pale yellow, crystalline solid or a powder. In its pure form it is used as a laboratory reagent. **Benzo(a)pyrene** also forms as a gaseous by-product when certain carbon substances burn, such as coal tar pitch chemicals.

REASON FOR CITATION

- * **Benzo(a)pyrene** is on the Hazardous Substance List because it is regulated by OSHA and cited by ACGIH, IARC, NIOSH, NTP, EPA, HHAG and DOT.
- * This chemical is on the Special Health Hazard Substance List because it is a **CARCINOGEN** and a **MUTAGEN**.
- * Definitions are provided on page 5.

HOW TO DETERMINE IF YOU ARE BEING EXPOSED

The New Jersey Right to Know Act requires most employers to label chemicals in the workplace and requires public employers to provide their employees with information and training concerning chemical hazards and controls. The federal OSHA Hazard Communication Standard, 1910.1200, requires private employers to provide similar training and information to their employees.

- * Exposure to hazardous substances should be routinely evaluated. This may include collecting personal and area air samples. You can obtain copies of sampling results from your employer. You have a legal right to this information under OSHA 1910.20.

- * If you think you are experiencing any work-related health problems, see a doctor trained to recognize occupational diseases. Take this Fact Sheet with you.

WORKPLACE EXPOSURE LIMITS

OSHA: The legal airborne permissible exposure limit (PEL) for *Coal Tar Pitch Volatiles (benzene-soluble fraction)* is **0.2 mg/m³** averaged over an 8-hour workshift.

NIOSH: The recommended airborne exposure limit for *Coal Tar Pitch Volatiles (cyclohexane-extractable fraction)* is **0.1 mg/m³** averaged over a 10-hour workshift.

ACGIH: ACGIH recommends that worker exposures, by all routes, be controlled to levels as low as can be reasonably achieved.

- * **Benzo(a)pyrene** is a PROBABLE CARCINOGEN in humans. There may be no safe level of exposure to a carcinogen, so all contact should be reduced to the lowest possible level.
- * The above exposure limits are for air levels only. When skin contact also occurs, you may be overexposed, even though air levels are less than the limits listed above.

WAYS OF REDUCING EXPOSURE

- * Enclose operations and use local exhaust ventilation at the site of chemical release. If local exhaust ventilation or enclosure is not used, respirators should be worn.
- * A regulated, marked area should be established where **Benzo(a)pyrene** is handled, used, stored, or formed.
- * Wear protective work clothing.
- * Wash thoroughly immediately after exposure to **Benzo(a)pyrene** and at the end of the workshift.
- * Post hazard and warning information in the work area. In addition, as part of an ongoing education and training effort, communicate all information on the health and safety hazards of **Benzo(a)pyrene** to potentially exposed workers.

This Fact Sheet is a summary source of information of all potential and most severe health hazards that may result from exposure. Duration of exposure, concentration of the substance and other factors will affect your susceptibility to any of the potential effects described below.

HEALTH HAZARD INFORMATION

Acute Health Effects

The following acute (short-term) health effects may occur immediately or shortly after exposure to **Benzo(a)pyrene**:

- * **Benzo(a)pyrene** can cause skin irritation with rash and/or burning sensations. Exposure to sunlight and the chemical together can increase these effects.
- * Exposure can irritate and/or burn the eyes on contact.

Chronic Health Effects

The following chronic (long-term) health effects can occur at some time after exposure to **Benzo(a)pyrene** and can last for months or years:

Cancer Hazard

- * **Benzo(a)pyrene** is a PROBABLE CARCINOGEN in humans. There is some evidence that it causes skin, lung, and bladder cancer in humans and in animals.
- * **Benzo(a)pyrene** has caused CANCER in the offspring of animals exposed to the substance during pregnancy.
- * Many scientists believe there is no safe level of exposure to a carcinogen.

Reproductive Hazard

- * **Benzo(a)pyrene** may damage the developing fetus.
- * There is some evidence that **Benzo(a)pyrene** may affect sperm and testes (male reproductive glands).
- * **Benzo(a)pyrene** may be transferred to nursing infants through the exposed mother's milk.

Other Long-Term Effects

- * Repeated exposure to **Benzo(a)pyrene** can cause skin changes such as thickening, darkening, and pimples. Later skin changes include loss of color, reddish areas, thinning of the skin, and warts.

MEDICAL

Medical Testing

If warts or other growths on the skin get larger or change color, they should be examined by a doctor for possible early skin cancer. Skin cancer is very often easily cured when detected early.

Any evaluation should include a careful history of past and present symptoms with an exam. Medical tests that look for damage already done are not a substitute for controlling exposure.

Request copies of your medical testing. You have a legal right to this information under OSHA 1910.20.

Mixed Exposures

- * Sunlight may cause a rash to develop in people exposed to **Benzo(a)pyrene** and increases the risk of skin cancer.
- * Tobacco smoke also contains **Benzo(a)pyrene**. Smoking may increase the risk of lung cancer with exposure to **Benzo(a)pyrene**.

WORKPLACE CONTROLS AND PRACTICES

Unless a less toxic chemical can be substituted for a hazardous substance, **ENGINEERING CONTROLS** are the most effective way of reducing exposure. The best protection is to enclose operations and/or provide local exhaust ventilation at the site of chemical release. Isolating operations can also reduce exposure. Using respirators or protective equipment is less effective than the controls mentioned above, but is sometimes necessary.

In evaluating the controls present in your workplace, consider: (1) how hazardous the substance is, (2) how much of the substance is released into the workplace and (3) whether harmful skin or eye contact could occur. Special controls should be in place for highly toxic chemicals or when significant skin, eye, or breathing exposures are possible.

In addition, the following controls are recommended:

- * Where possible, automatically transfer **Benzo(a)pyrene** from drums or other storage containers to process containers.
- * Use a Class I, Type B, biological safety hood when working with **Benzo(a)pyrene** in a laboratory.

Good **WORK PRACTICES** can help to reduce hazardous exposures. The following work practices are recommended:

- * Workers whose clothing has been contaminated by **Benzo(a)pyrene** should change into clean clothing promptly.
- * Do not take contaminated work clothes home. Family members could be exposed.
- * Contaminated work clothes should be laundered by individuals who have been informed of the hazards of exposure to **Benzo(a)pyrene**.

- * Eye wash fountains should be provided in the immediate work area for emergency use.
- * If there is the possibility of skin exposure, emergency shower facilities should be provided.
- * On skin contact with **Benzo(a)pyrene**, immediately wash or shower to remove the chemical. At the end of the workshift, wash any areas of the body that may have contacted **Benzo(a)pyrene**, whether or not known skin contact has occurred.
- * Do not eat, smoke, or drink where the above chemicals or **Benzo(a)pyrene** are handled, processed, or stored, since the chemical can be swallowed. Wash hands carefully before eating or smoking.
- * In laboratories DO NOT DRY SWEEP for clean-up. Use a vacuum or a wet method to reduce dust during clean-up.
- * When vacuuming, a high efficiency particulate absolute (HEPA) filter should be used, not a standard shop vacuum.

PERSONAL PROTECTIVE EQUIPMENT

WORKPLACE CONTROLS ARE BETTER THAN PERSONAL PROTECTIVE EQUIPMENT. However, for some jobs (such as outside work, confined space entry, jobs done only once in a while, or jobs done while workplace controls are being installed), personal protective equipment may be appropriate.

OSHA 1910.132 requires employers to determine the appropriate personal protective equipment for each hazard and to train employees on how and when to use protective equipment.

The following recommendations are only guidelines and may not apply to every situation.

Clothing

- * Avoid skin contact with **Benzo(a)pyrene**. Wear protective gloves and clothing. Safety equipment suppliers/manufacturers can provide recommendations on the most protective glove/clothing material for your operation.
- * All protective clothing (suits, gloves, footwear, headgear) should be clean, available each day, and put on before work.

Eye Protection

- * Wear dust-proof goggles and face shield when working with powders or dust, unless full facepiece respiratory protection is worn.
- * Where exposure to volatilized *Coal Tar* products may occur, wear gas-proof goggles and face shield, unless full facepiece respiratory protection is worn.

Respiratory Protection

IMPROPER USE OF RESPIRATORS IS DANGEROUS.

Such equipment should only be used if the employer has a written program that takes into account workplace conditions, requirements for worker training, respirator fit testing and medical exams, as described in OSHA 1910.134.

- * Where the potential exists for exposures over **0.1 mg/m³**, use a MSHA/NIOSH approved supplied-air respirator with a full facepiece operated in a pressure-demand or other positive-pressure mode. For increased protection use in combination with an auxiliary self-contained breathing apparatus operated in a pressure-demand or other positive-pressure mode.
- * Exposure to **80 mg/m³** of *Coal Tar Pitch Volatiles* is immediately dangerous to life and health. If the possibility of exposure above **80 mg/m³** exists, use a MSHA/NIOSH approved self-contained breathing apparatus with a full facepiece operated in a pressure-demand or other positive-pressure mode.

QUESTIONS AND ANSWERS

- Q: If I have acute health effects, will I later get chronic health effects?
- A: Not always. Most chronic (long-term) effects result from repeated exposures to a chemical.
- Q: Can I get long-term effects without ever having short-term effects?
- A: Yes, because long-term effects can occur from repeated exposures to a chemical at levels not high enough to make you immediately sick.
- Q: What are my chances of getting sick when I have been exposed to chemicals?
- A: The likelihood of becoming sick from chemicals is increased as the amount of exposure increases. This is determined by the length of time and the amount of material to which someone is exposed.
- Q: When are higher exposures more likely?
- A: Conditions which increase risk of exposure include dust releasing operations (grinding, mixing, blasting, dumping, etc.), other physical and mechanical processes (heating, pouring, spraying, spills and evaporation from large surface areas such as open containers), and "confined space" exposures (working inside vats, reactors, boilers, small rooms, etc.).
- Q: Is the risk of getting sick higher for workers than for community residents?
- A: Yes. Exposures in the community, except possibly in cases of fires or spills, are usually much lower than those found in the workplace. However, people in the community may be exposed to contaminated water as well as to chemicals in the air over long periods. Because of this, and because of exposure of children or people who are already ill, community exposures may cause health problems.
- Q: Don't all chemicals cause cancer?
- A: No. Most chemicals tested by scientists are not cancer-causing.

- Q: Should I be concerned if a chemical causes cancer in animals?
- A: Yes. Most scientists agree that a chemical that causes cancer in animals should be treated as a suspected human carcinogen unless proven otherwise.
- Q: But don't they test animals using much higher levels of a chemical than people usually are exposed to?
- A: Yes. That's so effects can be seen more clearly using fewer animals. But high doses alone don't cause cancer unless it's a cancer agent. In fact, a chemical that causes cancer in animals at high doses could cause cancer in humans exposed to low doses.
- Q: Can men as well as women be affected by chemicals that cause reproductive system damage?
- A: Yes. Some chemicals reduce potency or fertility in both men and women. Some damage sperm and eggs, possibly leading to birth defects.
- Q: But aren't pregnant women at the greatest risk from reproductive hazards?
- A: Not necessarily. Pregnant women are at greatest risk from chemicals which harm the developing fetus. However, chemicals may affect the ability to have children, so both men and women of childbearing age are at high risk.

The following information is available from:

New Jersey Department of Health and Senior Services
Occupational Disease and Injury Services
PO Box 360
Trenton, NJ 08625-0360
(609) 984-1863
(609) 292-5677 (fax)

Web address: <http://www.state.nj.us/health/eoh/odisweb/>

Industrial Hygiene Information

Industrial hygienists are available to answer your questions regarding the control of chemical exposures using exhaust ventilation, special work practices, good housekeeping, good hygiene practices, and personal protective equipment including respirators. In addition, they can help to interpret the results of industrial hygiene survey data.

Medical Evaluation

If you think you are becoming sick because of exposure to chemicals at your workplace, you may call personnel at the Department of Health and Senior Services, Occupational Disease and Injury Services, who can help you find the information you need.

Public Presentations

Presentations and educational programs on occupational health or the Right to Know Act can be organized for labor unions, trade associations and other groups.

Right to Know Information Resources

The Right to Know Infoline (609) 984-2202 can answer questions about the identity and potential health effects of chemicals, list of educational materials in occupational health, references used to prepare the Fact Sheets, preparation of the Right to Know survey, education and training programs, labeling requirements, and general information regarding the Right to Know Act. Violations of the law should be reported to (609) 984-2202.

DEFINITIONS

ACGIH is the American Conference of Governmental Industrial Hygienists. It recommends upper limits (called TLVs) for exposure to workplace chemicals.

A **carcinogen** is a substance that causes cancer.

The **CAS number** is assigned by the Chemical Abstracts Service to identify a specific chemical.

A **combustible** substance is a solid, liquid or gas that will burn.

A **corrosive** substance is a gas, liquid or solid that causes irreversible damage to human tissue or containers.

DEP is the New Jersey Department of Environmental Protection.

DOT is the Department of Transportation, the federal agency that regulates the transportation of chemicals.

EPA is the Environmental Protection Agency, the federal agency responsible for regulating environmental hazards.

A **fetus** is an unborn human or animal.

A **flammable** substance is a solid, liquid, vapor or gas that will ignite easily and burn rapidly.

The **flash point** is the temperature at which a liquid or solid gives off vapor that can form a flammable mixture with air.

HHAG is the Human Health Assessment Group of the federal EPA.

IARC is the International Agency for Research on Cancer, a scientific group that classifies chemicals according to their cancer-causing potential.

A **miscible** substance is a liquid or gas that will evenly dissolve in another.

mg/m³ means milligrams of a chemical in a cubic meter of air. It is a measure of concentration (weight/volume).

MSHA is the Mine Safety and Health Administration, the federal agency that regulates mining. It also evaluates and approves respirators.

A **mutagen** is a substance that causes mutations. A **mutation** is a change in the genetic material in a body cell. Mutations can lead to birth defects, miscarriages, or cancer.

NAERG is the North American Emergency Response Guidebook. It was jointly developed by Transport Canada, the United States Department of Transportation and the Secretariat of Communications and Transportation of Mexico. It is a guide for first responders to quickly identify the specific or generic hazards of material involved in a transportation incident, and to protect themselves and the general public during the initial response phase of the incident.

NCI is the National Cancer Institute, a federal agency that determines the cancer-causing potential of chemicals.

NFPA is the National Fire Protection Association. It classifies substances according to their fire and explosion hazard.

NIOSH is the National Institute for Occupational Safety and Health. It tests equipment, evaluates and approves respirators, conducts studies of workplace hazards, and proposes standards to OSHA.

NTP is the National Toxicology Program which tests chemicals and reviews evidence for cancer.

OSHA is the Occupational Safety and Health Administration, which adopts and enforces health and safety standards.

PEOSHA is the Public Employees Occupational Safety and Health Act, a state law which sets PELs for New Jersey public employees.

ppm means parts of a substance per million parts of air. It is a measure of concentration by volume in air.

A **reactive** substance is a solid, liquid or gas that releases energy under certain conditions.

A **teratogen** is a substance that causes birth defects by damaging the fetus.

TLV is the Threshold Limit Value, the workplace exposure limit recommended by ACGIH.

The **vapor pressure** is a measure of how readily a liquid or a solid mixes with air at its surface. A higher vapor pressure indicates a higher concentration of the substance in air and therefore increases the likelihood of breathing it in.

New Jersey Department of Health and Senior Services

HAZARDOUS SUBSTANCE FACT SHEET

Common Name: **BENZO(b)FLUORANTHENE**

CAS Number: 205-99-2
DOT Number: None

RTK Substance number: 0208
Date: September 1995 Revision: July 2001

HAZARD SUMMARY

- * **Benzo(b)fluoranthene** can affect you when breathed in and may be absorbed through the skin.
- * **Benzo(b)fluoranthene** is a CARCINOGEN--HANDLE WITH EXTREME CAUTION.
- * Contact with **Benzo(b)fluoranthene** can cause skin and eye irritation.
- * Because the major hazards associated with **Benzo(b)fluoranthene** come from exposure to *Coal Tar Pitch*, CONSULT THE NEW JERSEY DEPARTMENT OF HEALTH AND SENIOR SERVICES HAZARDOUS SUBSTANCE FACT SHEET ON COAL TAR PITCH.

IDENTIFICATION

Benzo(b)fluoranthene is a colorless, needle-shaped solid. It is used as a research chemical and is present in coal, and coke oven emissions, and petroleum products.

REASON FOR CITATION

- * **Benzo(b)fluoranthene** is on the Hazardous Substance List because it is regulated by OSHA and cited by ACGIH, NIOSH, NTP, IARC, HHAG and EPA.
- * This chemical is on the Special Health Hazard Substance List because it is a **CARCINOGEN**.
- * Definitions are provided on page 5.

HOW TO DETERMINE IF YOU ARE BEING EXPOSED

The New Jersey Right to Know Act requires most employers to label chemicals in the workplace and requires public employers to provide their employees with information and training concerning chemical hazards and controls. The federal OSHA Hazard Communication Standard, 1910.1200, requires private employers to provide similar training and information to their employees.

- * Exposure to hazardous substances should be routinely evaluated. This may include collecting personal and area air samples. You can obtain copies of sampling results from your employer. You have a legal right to this information under OSHA 1910.1020.

- * If you think you are experiencing any work-related health problems, see a doctor trained to recognize occupational diseases. Take this Fact Sheet with you.

WORKPLACE EXPOSURE LIMITS

The following exposure limits are for **Benzo(b)fluoranthene** (measured as *Coal Tar Pitch volatiles*):

- OSHA: The legal airborne permissible exposure limit (PEL) is **0.2 mg/m³** averaged over an 8-hour workshift.
- NIOSH: The recommended airborne exposure limit is **0.1 mg/m³** averaged over a 10-hour workshift.
- ACGIH: The recommended airborne exposure limit is **0.2 mg/m³** averaged over an 8-hour workshift.

- * **Benzo(b)fluoranthene** is a PROBABLE CARCINOGEN in humans. There may be no safe level of exposure to a carcinogen, so all contact should be reduced to the lowest possible level.
- * The above exposure limits are for air levels only. When skin contact also occurs, you may be overexposed, even though air levels are less than the limits listed above.

WAYS OF REDUCING EXPOSURE

- * Enclose operations and use local exhaust ventilation at the site of chemical release. If local exhaust ventilation or enclosure is not used, respirators should be worn.
- * A regulated, marked area should be established where **Benzo(b)fluoranthene** is handled, used, or stored.
- * Wear protective work clothing.
- * Wash thoroughly immediately after exposure to **Benzo(b)fluoranthene** and at the end of the workshift.
- * Post hazard and warning information in the work area. In addition, as part of an ongoing education and training effort, communicate all information on the health and safety hazards of **Benzo(b)fluoranthene** to potentially exposed workers.

This Fact Sheet is a summary source of information of all potential and most severe health hazards that may result from exposure. Duration of exposure, concentration of the substance and other factors will affect your susceptibility to any of the potential effects described below.

HEALTH HAZARD INFORMATION

Acute Health Effects

The following acute (short-term) health effects may occur immediately or shortly after exposure to **Benzo(b)fluoranthene**:

- * Contact with **Benzo(b)fluoranthene** can cause skin and eye irritation.

Chronic Health Effects

The following chronic (long-term) health effects can occur at some time after exposure to **Benzo(b)fluoranthene** and can last for months or years:

Cancer Hazard

- * **Benzo(b)fluoranthene** is a PROBABLE CARCINOGEN in humans. It has been shown to cause lung, liver and skin cancer in animals.
- * Many scientists believe there is no safe level of exposure to a carcinogen. Such substances may also have the potential for causing reproductive damage in humans.

Reproductive Hazard

- * According to the information presently available to the New Jersey Department of Health and Senior Services, **Benzo(b)fluoranthene** has not been tested for its ability to affect reproduction.

Other Long-Term Effects

- * **Benzo(b)fluoranthene** has not been tested for other chronic (long-term) health effects.

MEDICAL

Medical Testing

There is no special test for this chemical. However, if illness occurs or overexposure is suspected, medical attention is recommended.

Examine your skin periodically for growths or changes in warts or moles. Skin cancers are usually easily curable when removed early.

Any evaluation should include a careful history of past and present symptoms with an exam. Medical tests that look for damage already done are not a substitute for controlling exposure.

Request copies of your medical testing. You have a legal right to this information under OSHA 1910.1020.

WORKPLACE CONTROLS AND PRACTICES

Unless a less toxic chemical can be substituted for a hazardous substance, **ENGINEERING CONTROLS** are the most effective way of reducing exposure. The best protection is to enclose operations and/or provide local exhaust ventilation at the site of chemical release. Isolating operations can also reduce exposure. Using respirators or protective equipment is less effective than the controls mentioned above, but is sometimes necessary.

In evaluating the controls present in your workplace, consider: (1) how hazardous the substance is, (2) how much of the substance is released into the workplace and (3) whether harmful skin or eye contact could occur. Special controls should be in place for highly toxic chemicals or when significant skin, eye, or breathing exposures are possible.

In addition, the following controls are recommended:

- * Where possible, automatically transfer **Benzo(b)fluoranthene** from drums or other storage containers to process containers.
- * A Class I, Type B, biological safety hood should be used when mixing, handling, or preparing **Benzo(b)fluoranthene**.

Good **WORK PRACTICES** can help to reduce hazardous exposures. The following work practices are recommended:

- * Workers whose clothing has been contaminated by **Benzo(b)fluoranthene** should change into clean clothing promptly.
- * Do not take contaminated work clothes home. Family members could be exposed.
- * Contaminated work clothes should be laundered by individuals who have been informed of the hazards of exposure to **Benzo(b)fluoranthene**.
- * Eye wash fountains should be provided in the immediate work area for emergency use.
- * If there is the possibility of skin exposure, emergency shower facilities should be provided.
- * On skin contact with **Benzo(b)fluoranthene**, immediately wash or shower to remove the chemical. At the end of the workshift, wash any areas of the body that may have contacted **Benzo(b)fluoranthene**, whether or not known skin contact has occurred.
- * Do not eat, smoke, or drink where **Benzo(b)fluoranthene** is handled, processed, or stored, since the chemical can be swallowed. Wash hands carefully before eating, drinking, smoking, or using the toilet.
- * Use a vacuum or a wet method to reduce dust during clean-up. **DO NOT DRY SWEEP.**
- * When vacuuming, a high efficiency particulate air (HEPA) filter should be used, not a standard shop vacuum.

PERSONAL PROTECTIVE EQUIPMENT

WORKPLACE CONTROLS ARE BETTER THAN PERSONAL PROTECTIVE EQUIPMENT. However, for some jobs (such as outside work, confined space entry, jobs done only once in a while, or jobs done while workplace controls are being installed), personal protective equipment may be appropriate.

OSHA 1910.132 requires employers to determine the appropriate personal protective equipment for each hazard and to train employees on how and when to use protective equipment.

The following recommendations are only guidelines and may not apply to every situation.

Clothing

- * Avoid skin contact with **Benzo(b)fluoranthene**. Wear protective gloves and clothing. Safety equipment suppliers/manufacturers can provide recommendations on the most protective glove/clothing material for your operation.
- * All protective clothing (suits, gloves, footwear, headgear) should be clean, available each day, and put on before work.

Eye Protection

- * Wear impact resistant eye protection with side shields or goggles.
- * Wear a face shield along with goggles when working with corrosive, highly irritating or toxic substances.

Respiratory Protection

IMPROPER USE OF RESPIRATORS IS DANGEROUS. Such equipment should only be used if the employer has a written program that takes into account workplace conditions, requirements for worker training, respirator fit testing and medical exams, as described in OSHA 1910.134.

- * Where the potential exists for exposure over **0.1 mg/m³** (as *Coal Tar Pitch volatiles*), use a MSHA/NIOSH approved supplied-air respirator with a full facepiece operated in a pressure-demand or other positive-pressure mode. For increased protection use in combination with an auxiliary self-contained breathing apparatus operated in a pressure-demand or other positive-pressure mode.
- * Exposure to **80 mg/m³** (as *Coal Tar Pitch volatiles*) is immediately dangerous to life and health. If the possibility of exposure above **80 mg/m³** (as *Coal Tar Pitch volatiles*) exists, use a MSHA/NIOSH approved self-contained breathing apparatus with a full facepiece operated in a pressure-demand or other positive-pressure mode.

QUESTIONS AND ANSWERS

Q: If I have acute health effects, will I later get chronic health effects?

A: Not always. Most chronic (long-term) effects result from repeated exposures to a chemical.

Q: Can I get long-term effects without ever having short-term effects?

A: Yes, because long-term effects can occur from repeated exposures to a chemical at levels not high enough to make you immediately sick.

Q: What are my chances of getting sick when I have been exposed to chemicals?

A: The likelihood of becoming sick from chemicals is increased as the amount of exposure increases. This is determined by the length of time and the amount of material to which someone is exposed.

Q: When are higher exposures more likely?

A: Conditions which increase risk of exposure include dust releasing operations (grinding, mixing, blasting, dumping, etc.), other physical and mechanical processes (heating, pouring, spraying, spills and evaporation from large surface areas such as open containers), and "confined space" exposures (working inside vats, reactors, boilers, small rooms, etc.).

Q: Is the risk of getting sick higher for workers than for community residents?

A: Yes. Exposures in the community, except possibly in cases of fires or spills, are usually much lower than those found in the workplace. However, people in the community may be exposed to contaminated water as well as to chemicals in the air over long periods. This may be a problem for children or people who are already ill.

Q: Don't all chemicals cause cancer?

A: No. Most chemicals tested by scientists are not cancer-causing.

Q: Should I be concerned if a chemical causes cancer in animals?

A: Yes. Most scientists agree that a chemical that causes cancer in animals should be treated as a suspected human carcinogen unless proven otherwise.

Q: But don't they test animals using much higher levels of a chemical than people usually are exposed to?

A: Yes. That's so effects can be seen more clearly using fewer animals. But high doses alone don't cause cancer unless it's a cancer agent. In fact, a chemical that causes cancer in animals at high doses could cause cancer in humans exposed to low doses.

(609) 292-5677 (fax)

Web address: <http://www.state.nj.us/health/eoh/odisweb/>

Industrial Hygiene Information

Industrial hygienists are available to answer your questions regarding the control of chemical exposures using exhaust ventilation, special work practices, good housekeeping, good hygiene practices, and personal protective equipment including respirators. In addition, they can help to interpret the results of industrial hygiene survey data.

Medical Evaluation

If you think you are becoming sick because of exposure to chemicals at your workplace, you may call personnel at the Department of Health and Senior Services, Occupational Health Service, who can help you find the information you need.

Public Presentations

Presentations and educational programs on occupational health or the Right to Know Act can be organized for labor unions, trade associations and other groups.

Right to Know Information Resources

The Right to Know Infoline (609) 984-2202 can answer questions about the identity and potential health effects of chemicals, list of educational materials in occupational health, references used to prepare the Fact Sheets, preparation of the Right to Know Survey, education and training programs, labeling requirements, and general information regarding the Right to Know Act. Violations of the law should be reported to (609) 984-2202.

DEFINITIONS

ACGIH is the American Conference of Governmental Industrial Hygienists. It recommends upper limits (called TLVs) for exposure to workplace chemicals.

A **carcinogen** is a substance that causes cancer.

The **CAS number** is assigned by the Chemical Abstracts Service to identify a specific chemical.

A **combustible** substance is a solid, liquid or gas that will burn.

A **corrosive** substance is a gas, liquid or solid that causes irreversible damage to human tissue or containers.

DEP is the New Jersey Department of Environmental Protection.

DOT is the Department of Transportation, the federal agency that regulates the transportation of chemicals.

EPA is the Environmental Protection Agency, the federal agency responsible for regulating environmental hazards.

A **fetus** is an unborn human or animal.

A **flammable** substance is a solid, liquid, vapor or gas that will ignite easily and burn rapidly.

The **flash point** is the temperature at which a liquid or solid gives off vapor that can form a flammable mixture with air.

HHAG is the Human Health Assessment Group of the federal EPA.

IARC is the International Agency for Research on Cancer, a scientific group that classifies chemicals according to their cancer-causing potential.

A **miscible** substance is a liquid or gas that will evenly dissolve in another.

mg/m³ means milligrams of a chemical in a cubic meter of air. It is a measure of concentration (weight/volume).

MSHA is the Mine Safety and Health Administration, the federal agency that regulates mining. It also evaluates and approves respirators.

A **mutagen** is a substance that causes mutations. A **mutation** is a change in the genetic material in a body cell. Mutations can lead to birth defects, miscarriages, or cancer.

NAERG is the North American Emergency Response Guidebook. It was jointly developed by Transport Canada, the United States Department of Transportation and the Secretariat of Communications and Transportation of Mexico. It is a guide for first responders to quickly identify the specific or generic hazards of material involved in a transportation incident, and to protect themselves and the general public during the initial response phase of the incident.

NCI is the National Cancer Institute, a federal agency that determines the cancer-causing potential of chemicals.

NFPA is the National Fire Protection Association. It classifies substances according to their fire and explosion hazard.

NIOSH is the National Institute for Occupational Safety and Health. It tests equipment, evaluates and approves respirators, conducts studies of workplace hazards, and proposes standards to OSHA.

NTP is the National Toxicology Program which tests chemicals and reviews evidence for cancer.

OSHA is the Occupational Safety and Health Administration, which adopts and enforces health and safety standards.

PEOSHA is the Public Employees Occupational Safety and Health Act, a state law which sets PELs for New Jersey public employees.

PIH is a DOT designation for chemicals which are Poison Inhalation Hazards.

ppm means parts of a substance per million parts of air. It is a measure of concentration by volume in air.

A **reactive** substance is a solid, liquid or gas that releases energy under certain conditions.

A **teratogen** is a substance that causes birth defects by damaging the fetus.

TLV is the Threshold Limit Value, the workplace exposure limit recommended by ACGIH.

The **vapor pressure** is a measure of how readily a liquid or a solid mixes with air at its surface. A higher vapor pressure indicates a higher concentration of the substance in air and therefore increases the likelihood of breathing it in.

New Jersey Department of Health and Senior Services

HAZARDOUS SUBSTANCE FACT SHEET

Common Name: **CHRYSENE**

CAS Number: 218-01-9
DOT Number: None

RTK Substance number: 0441
Date: April 1994 Revision: December 1999

HAZARD SUMMARY

- * **Chrysene** can affect you when breathed in and by passing through your skin.
- * If skin contaminated with **Chrysene** is exposed to sunlight, a rash or sunburn effect and permanent changes in skin pigment can occur.
- * **Chrysene** is almost always found in *Coal Tar Pitch*, *Coal Tar Creosote*, or other coal tar products. If you work with coal, tar, soot, pitch, asphalt, etc., you may be exposed to **Chrysene**.
- * *CONSULT THE NEW JERSEY DEPARTMENT OF HEALTH AND SENIOR SERVICES HAZARDOUS SUBSTANCE FACT SHEETS ON COAL TAR PITCH AND COAL TAR CREOSOTE.*

IDENTIFICATION

Pure **Chrysene** is a colorless to off-white flake which is used in laboratories and dye manufacturing. **Chrysene** is most often found in black or brown tars and pitches.

REASON FOR CITATION

- * **Chrysene** is on the Hazardous Substance List because it is regulated by OSHA and cited by ACGIH, DOT, NIOSH, HHAG and EPA.
- * Definitions are provided on page 5.

HOW TO DETERMINE IF YOU ARE BEING EXPOSED

The New Jersey Right to Know Act requires most employers to label chemicals in the workplace and requires public employers to provide their employees with information and training concerning chemical hazards and controls. The federal OSHA Hazard Communication Standard, 1910.1200, requires private employers to provide similar training and information to their employees.

- * Exposure to hazardous substances should be routinely evaluated. This may include collecting personal and area air samples. You can obtain copies of sampling results from your employer. You have a legal right to this information under OSHA 1910.1020.

- * If you think you are experiencing any work-related health problems, see a doctor trained to recognize occupational diseases. Take this Fact Sheet with you.

WORKPLACE EXPOSURE LIMITS

The following exposure limits are for *Coal Tar Pitch Volatiles*:

- OSHA: The legal airborne permissible exposure limit (PEL) is **0.2 mg/m³** averaged over an 8-hour workshift.
- NIOSH: The recommended airborne exposure limit is **0.1 mg/m³** averaged over a 10-hour workshift.
- ACGIH: An exposure limit has not been determined for this suspected carcinogen. Worker exposure by all routes should be carefully controlled to the lowest possible level.

- * The above exposure limits are for air levels only. When skin contact also occurs, you may be overexposed, even though air levels are less than the limits listed above.

WAYS OF REDUCING EXPOSURE

- * Where possible, enclose operations and use local exhaust ventilation at the site of chemical release. If local exhaust ventilation or enclosure is not used, respirators should be worn.
- * Wear protective work clothing.
- * Wash thoroughly immediately after exposure to **Chrysene** and at the end of the workshift.
- * Post hazard and warning information in the work area. In addition, as part of an ongoing education and training effort, communicate all information on the health and safety hazards of **Chrysene** to potentially exposed workers.

This Fact Sheet is a summary source of information of all potential and most severe health hazards that may result from exposure. Duration of exposure, concentration of the substance and other factors will affect your susceptibility to any of the potential effects described below.

HEALTH HAZARD INFORMATION

Acute Health Effects

The following acute (short-term) health effects may occur immediately or shortly after exposure to **Chrysene**:

- * If skin contaminated with **Chrysene** is exposed to sunlight, a rash or sunburn effect can occur, sometimes with blisters.

Chronic Health Effects

The following chronic (long-term) health effects can occur at some time after exposure to **Chrysene** and can last for months or years:

Cancer Hazard

- * There is limited evidence that **Chrysene** causes cancer in animals. It may cause skin cancer.
- * Many scientists believe there is no safe level of exposure to a carcinogen. Such substances may also have the potential for causing reproductive damage in humans.

Reproductive Hazard

- * According to the information presently available to the New Jersey Department of Health and Senior Services, **Chrysene** has not been tested for its ability to affect reproduction.

Other Long-Term Effects

- * Permanent changes in skin pigment can occur if contaminated skin is exposed to sunlight.

MEDICAL

Medical Testing

- * There is no special test for this chemical. However, monthly, carefully look at any skin areas that have been exposed. Any growth (like a mole) that increases in size or shows changes in color should be examined by a physician. Skin cancer is curable when detected early.

Any evaluation should include a careful history of past and present symptoms with an exam. Medical tests that look for damage already done are not a substitute for controlling exposure.

Request copies of your medical testing. You have a legal right to this information under OSHA 1910.1020.

Mixed Exposures

- * Sunlight exposure on skin contaminated with *Coal Tar* chemicals can cause rash and later, pigment changes. Persons who smoke cigarettes may be at increased risk for lung cancer with his chemical. This can be significantly reduced by stopping smoking as well as by reducing exposures.

WORKPLACE CONTROLS AND PRACTICES

Unless a less toxic chemical can be substituted for a hazardous substance, **ENGINEERING CONTROLS** are the most effective way of reducing exposure. The best protection is to enclose operations and/or provide local exhaust ventilation at the site of chemical release. Isolating operations can also reduce exposure. Using respirators or protective equipment is less effective than the controls mentioned above, but is sometimes necessary.

In evaluating the controls present in your workplace, consider: (1) how hazardous the substance is, (2) how much of the substance is released into the workplace and (3) whether harmful skin or eye contact could occur. Special controls should be in place for highly toxic chemicals or when significant skin, eye, or breathing exposures are possible.

In addition, the following control is recommended:

- * Where possible, automatically transfer pure **Chrysene** from drums or other storage containers to process containers.

Good **WORK PRACTICES** can help to reduce hazardous exposures. The following work practices are recommended:

- * Workers whose clothing has been contaminated by **Chrysene** should change into clean clothing promptly.
- * Do not take contaminated work clothes home. Family members could be exposed.
- * Contaminated work clothes should be laundered by individuals who have been informed of the hazards of exposure to **Chrysene**.
- * Eye wash fountains should be provided in the immediate work area for emergency use.
- * If there is the possibility of skin exposure, emergency shower facilities should be provided.
- * On skin contact with **Chrysene**, immediately wash or shower to remove the chemical. At the end of the workshift, wash any areas of the body that may have contacted **Chrysene**, whether or not known skin contact has occurred.
- * Do not eat, smoke, or drink where **Chrysene** is handled, processed, or stored, since the chemical can be swallowed. Wash hands carefully before eating, drinking, smoking, or using the toilet.
- * For pure **Chrysene** use a vacuum or a wet method to reduce dust during clean-up. **DO NOT DRY SWEEP.**

PERSONAL PROTECTIVE EQUIPMENT

WORKPLACE CONTROLS ARE BETTER THAN PERSONAL PROTECTIVE EQUIPMENT. However, for some jobs (such as outside work, confined space entry, jobs done only once in a while, or jobs done while workplace controls are being installed), personal protective equipment may be appropriate.

OSHA 1910.132 requires employers to determine the appropriate personal protective equipment for each hazard and to train employees on how and when to use protective equipment.

The following recommendations are only guidelines and may not apply to every situation.

Clothing

- * Avoid skin contact with **Chrysene**. Wear protective gloves and clothing. Safety equipment suppliers/manufacturers can provide recommendations on the most protective glove/clothing material for your operation.
- * All protective clothing (suits, gloves, footwear, headgear) should be clean, available each day, and put on before work.

Eye Protection

- * For pure **Chrysene** wear impact resistant eye protection with side shields or goggles.
- * Wear a face shield along with goggles when working with corrosive, highly irritating or toxic substances.

Respiratory Protection

IMPROPER USE OF RESPIRATORS IS DANGEROUS. Such equipment should only be used if the employer has a written program that takes into account workplace conditions, requirements for worker training, respirator fit testing and medical exams, as described in OSHA 1910.134.

- * Where the potential exists for exposure over **0.1 mg/m³**, (as *Coal Tar Pitch Volatiles*) use a MSHA/NIOSH approved supplied-air respirator with a full facepiece operated in a pressure-demand or other positive-pressure mode. For increased protection use in combination with an auxiliary self-contained breathing apparatus operated in a pressure-demand or other positive-pressure mode.
- * Exposure to **80 mg/m³** (as *Coal Tar Pitch Volatiles*) is immediately dangerous to life and health. If the possibility of exposure above **80 mg/m³** (as *Coal Tar Pitch Volatiles*) exists, use a MSHA/NIOSH approved self-contained breathing apparatus with a full facepiece operated in a pressure-demand or other positive-pressure mode.

QUESTIONS AND ANSWERS

- Q: If I have acute health effects, will I later get chronic health effects?
- A: Not always. Most chronic (long-term) effects result from repeated exposures to a chemical.
- Q: Can I get long-term effects without ever having short-term effects?
- A: Yes, because long-term effects can occur from repeated exposures to a chemical at levels not high enough to make you immediately sick.
- Q: What are my chances of getting sick when I have been exposed to chemicals?
- A: The likelihood of becoming sick from chemicals is increased as the amount of exposure increases. This is determined by the length of time and the amount of material to which someone is exposed.
- Q: When are higher exposures more likely?
- A: Conditions which increase risk of exposure include dust releasing operations (grinding, mixing, blasting, dumping, etc.), other physical and mechanical processes (heating, pouring, spraying, spills and evaporation from large surface areas such as open containers), and "confined space" exposures (working inside vats, reactors, boilers, small rooms, etc.).
- Q: Is the risk of getting sick higher for workers than for community residents?
- A: Yes. Exposures in the community, except possibly in cases of fires or spills, are usually much lower than those found in the workplace. However, people in the community may be exposed to contaminated water as well as to chemicals in the air over long periods. This may be a problem for children or people who are already ill.
- Q: Don't all chemicals cause cancer?
- A: No. Most chemicals tested by scientists are not cancer-causing.
- Q: Should I be concerned if a chemical causes cancer in animals?
- A: Yes. Most scientists agree that a chemical that causes cancer in animals should be treated as a suspected human carcinogen unless proven otherwise.
- Q: But don't they test animals using much higher levels of a chemical than people usually are exposed to?
- A: Yes. That's so effects can be seen more clearly using fewer animals. But high doses alone don't cause cancer unless it's a cancer agent. In fact, a chemical that causes cancer in animals at high doses could cause cancer in humans exposed to low doses.

===== Physical/Chemical Properties =====

HCC:T6
Boiling Pt:B.P. Text:509F,265C
Vapor Density:9.60
Spec Gravity:>1(H2O=1)
Appearance and Odor:OFF-WHITE TO YELLOW-GREEN CRYSTALLINE

===== Stability and Reactivity Data =====

Stability Indicator/Materials to Avoid:YES
OXIDIZING AGENTS.

===== Disposal Considerations =====

Waste Disposal Methods:COMPLY WITH ALL APPLICABLE FEDERAL, STATE, OR
LOCAL REGULATIONS.

MATERIAL SAFETY DATA SHEET

□i□□□□□□□□□□ □□□□□□□□

□ □□□ □□□□□□

Electricity in Petroleum Fuel Systems" address special precautions and design requirements involving loading rates, grounding, bonding, filter installation, conductivity additives and especially the hazards associated with "switch loading." ["Switch Loading" is when a higher flash point product (such as diesel) is loaded into tanks previously containing a low flash point product (such as gasoline) and the electrical charge generated during loading of the diesel results in a static ignition of the vapor from the previous cargo (gasoline).]

Note: When conductivity additives are used or are necessary the product should achieve 25 picosiemens/meter or greater at the handling temperature.

□□□□□□ □□□□□□□□□□

Keep away from flame, sparks, excessive temperatures and open flame. Use approved vented containers. Keep containers closed and clearly labeled. Empty product containers or vessels may contain explosive vapors. Do not pressurize, cut, heat, weld or expose such containers to sources of ignition.

Store in a well-ventilated area. This storage area should comply with NFPA 30 "Flammable and Combustible Liquid Code". Avoid storage near incompatible materials. The cleaning of tanks previously containing this product should follow API Recommended Practice (RP) 2013 "Cleaning Mobile Tanks In Flammable and Combustible Liquid Service" and API RP 2015 "Cleaning Petroleum Storage Tanks".

W□□□□□□□□□□ □□□□□□□□□□

Emergency eye wash capability should be available in the near proximity to operations presenting a potential splash exposure. Use good personal hygiene practices. Avoid repeated and/or prolonged skin exposure. Wash hands before eating, drinking, smoking, or using toilet facilities. Do not use as a cleaning solvent on the skin. Do not use solvents or harsh abrasive skin cleaners for washing this product from exposed skin areas. Waterless hand cleaners are effective. Promptly remove contaminated clothing and launder before reuse. Use care when laundering to prevent the formation of flammable vapors which could ignite via washer or dryer. Consider the need to discard contaminated leather shoes and gloves.

Naphthalene (91-20-3)	OSHA ACGIH	10 ppm TWA 10 ppm TWA / 15 ppm STEL		A4, Skin

□□□□□□□□□□ □□□□□□□□

Use adequate ventilation to keep vapor concentrations of this product below occupational exposure and flammability limits, particularly in confined spaces.

□□□□□□□□ □□□□□□□□□□

Safety glasses or goggles are recommended where there is a possibility of splashing or spraying.

□□□□ □□□□□□□□□□

Gloves constructed of nitrile, neoprene, or PVC are recommended. Chemical protective clothing such as of E.I. DuPont TyChem®, Saranex® or equivalent recommended based on degree of exposure. Note: The resistance of specific material may vary from product to product as well as with degree of exposure. Consult manufacturer specifications for further information.

00000000000 00000000000

A NIOSH/MSHA-approved air-purifying respirator with organic vapor cartridges or canister may be permissible under certain circumstances where airborne concentrations are or may be expected to exceed exposure limits or for odor or irritation. Protection provided by air-purifying respirators is limited. Refer to OSHA 29 CFR 1910.134, NIOSH Respirator Decision Logic, and the manufacturer for additional guidance on respiratory protection selection.

Use a positive pressure, air-supplied respirator if there is a potential for uncontrolled release, exposure levels are not known, in oxygen-deficient atmospheres, or any other circumstance where an air-purifying respirator may not provide adequate protection.

This material has been positive in a mutagenicity study.

SAFETY DATA SHEET

Based on Directive 2001/58/EC et seq. of the Commission of the European Communities

FLUORANTHENE

1. Identification of the substance/preparation and of the company/undertaking

1.1 Identification of the substance or preparation:

Synonyms: 1,2-benzacenaphthene, benzo(jk)fluorene
CAS No. : 206-44-0 BCR number : BCR-160R
EC index No. : N.A. NFPA code : N.D.
EINECS No. : 205-912-4 Molecular weight : 202.26
RTECS No. : LL4025000 Formula : C₁₆H₁₀

1.2 Use of the substance or the preparation:

Certified reference material for laboratory use only

1.3 Company/undertaking identification:

Institute for Reference Materials and Measurements
Retieseweg
B-2440 Geel
Tel. : +32 14 57 12 11
Fax : +32 14 58 42 73

1.4 Telephone number for emergency:

+32 70 245 245
Antigifcentrum
p/a Militair Hospitaal Koningin Astrid, Bruynstraat, B-1120 Brussel

2. Composition/information on ingredients

Hazardous ingredients	CAS No. EINECS No.	Conc. in %	Hazard symbol	Risks (R-phrases)
fluoranthene	206-44-0 205-912-4	100	Xn;N	22-36-51/53-68 (1)

(1) For R-phrases in full: see heading 16

3. Hazards identification

- Harmful if swallowed
- Irritating to eyes
- Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment
- Possible risk of irreversible effects

4. First aid measures

4.1 Eye contact:

- Consult a doctor/medical service
- Rinse immediately with plenty of water
- Do not apply neutralizing agents

4.2 Skin contact:

- Consult a doctor/medical service
- Wash immediately with lots of water
- Do not apply (chemical) neutralizing agents

4.3 After inhalation:

- Consult a doctor/medical service
- Remove the victim into fresh air
- Unconscious: maintain adequate airway and respiration

4.4 After ingestion:

- Consult a doctor/medical service

Reason for revision : Directive 2001/58/EC

FLUORANTHENE

- Never give water to an unconscious person

FLUORANTHENE

5. Fire-fighting measures

5.1 Suitable extinguishing media:

- Water spray
- Alcohol foam
- Polymer foam
- ABC powder
- Carbon dioxide

5.2 Unsuitable extinguishing media:

- No data available

5.3 Special exposure hazards:

- Combustible
- It's dust is explosive with air
- Upon combustion CO and CO2 are formed

5.4 Instructions:

- Take account of toxic firefighting water
- Use firefighting water moderately and contain it

5.5 Special protective equipment for firefighters:

- Heat/fire exposure: compressed air/oxygen apparatus
- Dust cloud production: compressed air/oxygen apparatus

6. Accidental release measures

6.1 Personal protection/precautions: see heading 8.1/8.3/10.3

6.2 Environmental precautions:

- Prevent soil and water pollution
- Substance must not be discharged into the sewer
- Dam up the solid spill
- Knock down/dilute dust cloud with water spray

6.3 Methods for cleaning up:

- Stop dust cloud by covering with sand/earth
- Carefully collect the spill/leftovers
- Scoop solid spill into closing containers
- Clean contaminated surfaces with an excess of water
- Wash clothing and equipment after handling

7. Handling and storage

7.1 Handling:

- Observe strict hygiene
- Avoid prolonged and repeated contact with skin
- Avoid raising dust
- Do not discharge the waste into the drain
- Clean contaminated clothing

7.2 Storage:

- Keep container tightly closed
- Store in a dry area
- Store in a dark area
- Meet the legal requirements.
- Keep away from: heat sources, oxidizing agents

Storage temperature	: < 4	°C
Quantity limits	: N.D.	kg
Storage life	: N.D.	
Materials for packaging	:	
- suitable	: glass	
- to avoid	: no data available	

7.3 Specific uses: N.D.

FLUORANTHENE

8. Exposure controls/Personal protection

8.1 Exposure limit values:

TLV-TWA : not listed
TLV-STEL : not listed
TLV-Ceiling : not listed

OES-LTEL : not listed
OES-STEL : not listed
MEL-LTEL : not listed
MEL-STEL : not listed

MAC-TGG 8 h : not listed
MAC-TGG 15 min. : not listed
MAC-Ceiling : not listed

VME-8 h : not listed
VLE-15 min. : not listed

GWBB-8 h : not listed
GWL-15 min. : not listed
Momentary value : not listed

Sampling methods:

- Fluoranthene (Polynuclear aromatic hydrocarbon) NIOSH 5506
- Fluoranthene OSHA CSI
- Fluoranthene (Polynuclear aromatic hydrocarbon) NIOSH 5515

8.2 Exposure controls:

8.2.1 Occupational exposure controls:

- Measure the concentration in the air regularly
- Work under local exhaust/ventilation

8.2.2 Environmental exposure controls: see heading 13

8.3 Personal protection:

8.3.1 respiratory protection:

- Dust production: dust mask with filter type P3
- High dust production: compressed air/oxygen apparatus

8.3.2 hand protection:

- Gloves
Suitable materials: Rubber
- Breakthrough time: N.D.

8.3.3 eye protection:

- Safety glasses
- In case of dust production: protective goggles

8.3.4 skin protection:

- Protective clothing
- In case of dust production: head/neck protection
Suitable materials: Rubber

FLUORANTHENE

9. Physical and chemical properties

9.1 General information:

Appearance (at 20°C) : Crystalline solid / Needles
Odour : N.D.
Colour : Colourless to light-yellow

9.2 Important health, safety and environmental information:

pH value : N.D.
Boiling point/boiling range : 384 °C
Flashpoint : 198 °C
Explosion limits : N.D. vol% (°C)
Vapour pressure (at 20°C) : < 0.01 hPa
Vapour pressure (at 50°C) : N.D. hPa
Relative density (at 20°C) : 1.30
Water solubility : 0.00002 g/100 ml
Soluble in : Ethanol, ether, chloroform, acetic acid, carbondisulfide
Relative vapour density : N.D.
Viscosity : N.D. Pa.s
Partition coefficient n-octanol/water : 5.33
Evaporation rate
ratio butyl acetate : N.D.
ratio ether : N.D.

9.3 Other information:

Melting point/melting range : 110 °C
Auto-ignition point : N.D. °C
Saturation concentration : N.D. g/m³

10. Stability and reactivity

10.1 Conditions to avoid/reactivity:

- No data available

10.2 Materials to avoid:

- Keep away from: heat sources, oxidizing agents

10.3 Hazardous decomposition products:

- Upon combustion CO and CO₂ are formed

FLUORANTHENE

11. Toxicological information

11.1 Acute toxicity:

LD50 oral rat	: 2000	mg/kg
LD50 dermal rat	: N.D.	mg/kg
LD50 dermal rabbit	: 3180	mg/kg
LC50 inhalation rat	: N.D.	mg/l/4 h
LC50 inhalation rat	: N.D.	ppm/4 h

11.2 Chronic toxicity:

EC carc. cat. : not listed
EC muta. cat. : not listed
EC repr. cat. : not listed

Carcinogenicity (TLV) : not listed
Carcinogenicity (MAC) : not listed
Carcinogenicity (VME) : not listed
Carcinogenicity (GWBB) : not listed

Carcinogenicity (MAK) : not listed
Mutagenicity (MAK) : not listed
Teratogenicity (MAK) : not listed

IARC classification : 3

11.3 Routes of exposure: ingestion, inhalation, eyes and skin

11.4 Acute effects/symptoms:

- **AFTER EYE CONTACT**
- Irritation of the eye tissue

11.5 Chronic effects:

- Possible risks of irreversible effects
- Not classified as toxic to reproduction (EC)
- **SIMILAR PRODUCTS CAUSE FOLLOWING SYMPTOMS:**
- Tingling/irritation of the skin
- Nausea
- Accelerated heart action
- Disturbances of heart rate
- Enlargement/affection of the liver
- Risk of lung oedema

FLUORANTHENE

12. Ecological information

12.1 Ecotoxicity:

fluoranthene:

- LC50 (96 h) : 4 mg/l (LEPOMIS MACROCHIRUS)
- LC50 (48 h) : 320 mg/l (DAPHNIA MAGNA)
- EC50 (96 h) : 54 mg/l (SELENASTRUM CAPRICORNUTUM)

12.2 Mobility:

- Volatile organic compounds (VOC): 0%
- Forming sediments in water
- Insoluble in water
- Substance sinks in water

For other physicochemical properties see heading 9.

12.3 Persistence and degradability:

- biodegradation BOD₅ : N.D. % ThOD
- water : - N.D.
- soil : T ½: N.D. days

12.4 Bioaccumulative potential:

- log P_{ow} : 5.33
- BCF : h : 3981 (PIMEPHALES PROMELAS)
- Highly bioaccumulative

12.5 Other adverse effects:

- WGK : 3 (Classification based on the R-phrases in compliance with Verwaltungsvorschrift wassergefährdender Stoffe (VwVwS) of 17 May 1999)
- Effect on the ozone layer : Not dangerous for the ozone layer (Council Regulation (EC) No 3093/94, O.J. L333 of 22/12/94)
- Greenhouse effect : no data available
- Effect on waste water purification : no data available

13. Disposal considerations

13.1 Provisions relating to waste:

- Waste material code (91/689/EEC, Council Decision 2001/118/EC, O.J. L47 of 16/2/2001): 16 05 06 (laboratory chemicals, consisting of or containing dangerous substances, including mixtures of laboratory)
- Waste material code (Flanders): 001, 045, 691
- Waste code (Germany): 59302
- Hazardous waste (91/689/EEC)

13.2 Disposal methods:

- Do not discharge into surface water (2000/60/EEC, Council Decision 2455/2001/EC, O.J. L331 of 15/12/2001)
- Remove to an authorized incinerator equipped with an afterburner and a flue gas scrubber

13.3 Packaging/Container:

- Waste material code packaging (91/689/EEC, Council Decision 2001/118/EC, O.J. L47 of 16/2/2001): 15 01 10 (packaging containing residues of or contaminated by dangerous substances)

FLUORANTHENE

14. Transport information

90

3077

14.1 Classification of the substance in compliance with UN Recommendations

UN number : 3077
CLASS : 9

PACKING : III
PACKING INSTRUCTIONS PASSENGER AIRCRAFT :
PACKING INSTRUCTIONS CARGO AIRCRAFT :

14.7 Special precautions in connection with transport : none

When substances and their packaging meet the conditions established by ADR/RID/ADNR in chapter 3.4, **only** the following prescriptions shall be complied with:

each package shall display a diamond-shaped figure with the following inscription:

- 'UN 3077'

or, in the case of different goods with different identification numbers within a single package:

- the letters 'LQ'

FLUORANTHENE

15. Regulatory information

Not listed in Annex I of directive 67/548/EEC et sequens. Labelling established on the basis of the available data.

Harmful

Dangerous for the environment

- R22 : Harmful if swallowed
R36 : Irritating to eyes
R51/53 : Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment
R68 : Possible risk of irreversible effects
- S(02) : (Keep out of reach of children)
S22 : Do not breathe dust
S26 : In case of contact with eyes, rinse immediately with plenty of water and seek medical advice
S36/37 : Wear suitable protective clothing and gloves
S46 : If swallowed, seek medical advice immediately and show this container or label
S61 : Avoid release to the environment. Refer to special instructions/safety data sheets.

16. Other information

The information provided on this MSDS is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered as a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other material or in any process, unless specified in the text.

N.A. = NOT APPLICABLE
N.D. = NOT DETERMINED
***** = INTERNAL CLASSIFICATION

Full text of any R-phrases referred to under heading 2:

- R22 : Harmful if swallowed
R36 : Irritating to eyes
R51/53 : Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment
R68 : Possible risk of irreversible effects

Exposure limits:

Chemical Safety

SEE IMPORTANT INFORMATION ON BACK

INDENO(1,2,3-cd)PYRENE		ICSC: 0730
IMPORTANT DATA		
<p>PHYSICAL STATE; APPEARANCE: YELLOW CRYSTALS</p> <p>CHEMICAL DANGERS: Upon heating, toxic fumes are formed.</p> <p>OCCUPATIONAL EXPOSURE LIMITS: TLV not established. MAK: Carcinogen category: 2; (DFG 2004).</p>	<p>ROUTES OF EXPOSURE: The substance can be absorbed into the body by inhalation of its aerosol and through the skin.</p> <p>INHALATION RISK: Evaporation at 20°C is negligible; a harmful concentration of airborne particles can, however, be reached quickly.</p> <p>EFFECTS OF LONG-TERM OR REPEATED EXPOSURE: This substance is possibly carcinogenic to humans.</p>	
PHYSICAL PROPERTIES		
<p>Boiling point: 536°C Melting point: 164°C Solubility in water: none</p>	<p>Octanol/water partition coefficient as log Pow: 6.58</p>	
ENVIRONMENTAL DATA		
<p>This substance may be hazardous to the environment; special attention should be given to air quality and water quality. Bioaccumulation of this chemical may occur in fish.</p>		
NOTES		
<p>Indeno(1,2,3-cd)pyrene is present as a component of polycyclic aromatic hydrocarbons (PAH) content in the environment usually resulting from the incomplete combustion or pyrolysis of organic matters, especially fossil fuels and tobacco. ACGIH recommends environment containing Indeno(1,2,3-c,d)pyrene should be evaluated in terms of the TLV-TWA for coal tar pitch volatile, as benzene soluble 0.2 mg/m³. Insufficient data are available on the effect of this substance on human health, therefore utmost care must be taken. Card has been partly updated in October 2005. See section Occupational Exposure Limits.</p>		
ADDITIONAL INFORMATION		
<p>LEGAL NOTICE Neither the CEC nor the IPCS nor any person acting on behalf of the CEC or the IPCS is responsible for the use which might be made of this information</p>

² As stated in the ACGIH 1994-95 Threshold Limit Values for Chemical Substances and Physical Agents

3. Hazards Identification

EMERGENCY OVERVIEW

This product does not contain oxygen and may cause asphyxia if released in a confined area. Simple hydrocarbons can cause irritation and central nervous system depression at high concentrations. flammable.

ROUTE OF ENTRY:

Skin Contact Yes	Skin Absorption No	Eye Contact Yes	Inhalation Yes	Ingestion No
---------------------	-----------------------	--------------------	-------------------	-----------------

PRODUCT NAME: ISOBUTYLENE

HEALTH EFFECTS:

Exposure Limits No	Irritant Yes	Sensitization No
Teratogen No	Reproductive Hazard No	Mutagen No
Synergistic Effects None Reported		

Carcinogenicity: -- NTP: No IARC: No OSHA: No

EYE EFFECTS:

Irritation may occur.

SKIN EFFECTS:

None anticipated as product is a gas at room temperature.

INGESTION EFFECTS:

Ingestion is unlikely.

INHALATION EFFECTS:

Product is relatively nontoxic. Simple hydrocarbons can irritate the eyes, mucous membranes and respiratory system at high concentrations.

Inhalation of high concentrations may cause dizziness, disorientation, incoordination, narcosis, nausea or narcotic effects.

This product may displace oxygen if released in a confined space. Maintain oxygen levels above 19.5% at sea level to prevent asphyxiation.

Effects of oxygen deficiency resulting from simple asphyxiants may include: rapid breathing, diminished mental alertness, impaired muscular coordination, faulty judgement, depression of all sensations, emotional instability, and fatigue. As asphyxiation progresses, nausea, vomiting, prostration, and loss of consciousness may result, eventually leading to convulsions, coma, and death.

Oxygen deficiency during pregnancy has produced developmental abnormalities in humans and experimental animals.

Health: 1
Flammability: 4
Reactivity: 0

RATINGS SYSTEM

0 = No Hazard
1 = Slight Hazard
2 = Moderate Hazard
3 = Serious Hazard
4 = Severe Hazard

4. First Aid Measures

EYES:

Never introduce oil or ointment into the eyes without medical advice! If pain is present, refer the victim to an ophthalmologist for further treatment and follow up.

SKIN:

MSDS: G-53

Revised: 6/7/96

PRODUCT NAME: ISOBUTYLENE

Remove contaminated clothing and wash affected area with soap and water. If irritation persists, seek medical attention.

INGESTION:

Not normally required. Seek immediate medical attention.

INHALATION:

PROMPT MEDICAL ATTENTION IS MANDATORY IN ALL CASES OF OVEREXPOSURE TO PRODUCT. RESCUE PERSONNEL SHOULD BE EQUIPPED WITH SELF-CONTAINED BREATHING APPARATUS. Conscious persons should be assisted to an uncontaminated area and inhale fresh air. Quick removal from the contaminated area is most important. Unconscious persons should be moved to an uncontaminated area, given assisted (artificial) respiration and supplemental oxygen. Further treatment should be symptomatic and supportive.

5. Fire Fighting Measures

Conditions of Flammability: Flammable liquid and vapor		
Flash point: -105 °F (-76 °C)	Method: Closed Cup	Autoignition Temperature: 869 °F (465 °C)
LEL(%): 1.8	UEL(%): 9.6	
Hazardous combustion products: Carbon monoxide, Carbon dioxide		
Sensitivity to mechanical shock: None		
Sensitivity to static discharge: Not Available		

FIRE AND EXPLOSION HAZARDS:

Isobutylene is heavier than air and may travel a considerable distance to an ignition source. Isobutylene is a flammable gas! Keep away from open flame and other sources of ignition. Do not allow smoking in storage areas or when handling.

EXTINGUISHING MEDIA:

Water, carbon dioxide, dry chemical.

FIRE FIGHTING INSTRUCTIONS:

If possible, stop the flow of gas with a remote valve. Use water spray to cool fire exposed containers. If fire is extinguished and flow of gas is continued, increase ventilation to prevent a build up of a flammable/ explosive atmosphere. Extinguish sources of ignition.

Be cautious of a Boiling Liquid Evaporating Vapor Explosion, BLEVE, if flame is impinging on surrounding containers. Direct 500 GPM water stream onto containers above the liquid level with remote monitors. Limit the number of personnel in proximity to the fire. Evacuate surrounding areas to at least 3000 feet in all directions.

6. Accidental Release Measures

Evacuate all personnel from affected area. Use appropriate protective equipment. Increase ventilation to prevent build up of a flammable/explosive atmosphere. Extinguish all sources of ignition! If leak is in user's equipment, be certain to purge piping with inert gas prior to attempting repairs. If leak is in container or container valve, contact the appropriate emergency telephone number listed in Section 1 or call your closest BOC location

MSDS: G-53

Revised: 6/7/96

7. Handling and Storage

Earth bond and ground all lines and equipment associated with the product system. Electrical equipment should be non-sparking and explosion proof.

Use only in well-ventilated areas. Valve protection caps must remain in place unless container is secured with valve outlet piped to use point. Do not drag, slide or roll cylinders. Use a suitable hand truck for cylinder movement. Use a pressure regulator when connecting cylinder to lower pressure (<250 psig) piping or systems. Do not heat cylinder by any means to increase the discharge rate of product from the cylinder. Use a check valve or trap in the discharge line to prevent hazardous back flow into the cylinder.

Protect cylinders from physical damage. Store in cool, dry, well-ventilated area away from heavily trafficked areas and emergency exits. Do not allow the temperature where cylinders are stored to exceed 130°F (54°C). Cylinders should be stored upright and firmly secured to prevent falling or being knocked over. Full and empty cylinders should be segregated. Use a "first in-first out" inventory system to prevent full cylinders from being stored for excessive periods of time.

Post "No Smoking" signs in storage or use areas.

For additional recommendations consult Compressed Gas Association Pamphlet P-1.

Never carry a compressed gas cylinder or a container of a gas in cryogenic liquid form in an enclosed space such as a car trunk, van or station wagon. A leak can result in a fire, explosion, asphyxiation or a toxic exposure.

8. Exposure Controls, Personal Protection

EXPOSURE LIMITS¹:

INGREDIENT	% VOLUME	PEL-OSHA ²	TLV-ACGIH ³	LD ₅₀ or LC ₅₀ Route/Species
Isobutylene FORMULA: C ₄ H ₈ CAS: 115-11-7 RTECS #: UD0890000	99.0 to 99.8	Simple Asphyxiant	Simple Asphyxiant	LC ₅₀ 620 mg/m ³ /3H (rat)

¹ Refer to individual state or provincial regulations, as applicable, for limits which may be more stringent than those listed here.

² As stated in 29 CFR 1910, Subpart Z (revised July 1, 1993)

³ As stated in the ACGIH 1994-1995 Threshold Limit Values for Chemical Substances and Physical Agents.

ENGINEERING CONTROLS:

Use local exhaust to prevent accumulation. Use general ventilation to prevent build up of flammable concentrations. May use hood with forced ventilation when handling small quantities. If product is handled routinely where the potential for leaks exists, all electrical equipment must be rated for use in potentially flammable atmospheres. Consult the National Electrical Code for details.

EYE/FACE PROTECTION:

Safety goggles or glasses.

SKIN PROTECTION:

Protective gloves made of plastic or rubber.

PRODUCT NAME: ISOBUTYLENE

RESPIRATORY PROTECTION:

Positive pressure air line with full-face mask and escape bottle or self-contained breathing apparatus should be available for emergency use.

OTHER/GENERAL PROTECTION:

Safety shoes, safety shower, eyewash.

9. Physical and Chemical Properties

PARAMETER	VALUE	UNITS
Physical state (gas, liquid, solid)	: Gas	
Vapor pressure at 70°F	: 39	psia
Vapor density at STP (Air = 1)	: 1.98	
Evaporation point	: Not Available	
Boiling point	: 19.5	°F
	: -6.9	°C
Freezing point	: -220.6	°F
	: -140.3	°C
pH	: Not Available	
Specific gravity	: Not Available	
Oil/water partition coefficient	: Not Available	
Solubility (H2O)	: Insoluble	
Odor threshold	: Not Available	
Odor and appearance	: A colorless gas with an unpleasant odor similar to that of burning coal.	

10. Stability and Reactivity

STABILITY:

Stable

CONDITIONS TO AVOID (STABILITY):

None

INCOMPATIBLE MATERIALS:

Oxidizers

PRODUCT NAME: ISOBUTYLENE

HAZARDOUS DECOMPOSITION PRODUCTS:

Carbon monoxide

11. Toxicological Information

Oxygen deficiency during pregnancy has produced developmental abnormalities in humans and experimental animals.

No chronic effects data given in the Registry of Toxic Effects of Chemical Substances (RTECS) or Sax, Dangerous Properties of Industrial Materials, 7th ed.

12. Ecological Information

No data given.

13. Disposal Considerations

Do not attempt to dispose of residual waste or unused quantities. Return in the shipping container PROPERLY LABELED, WITH ANY VALVE OUTLET PLUGS OR CAPS SECURED AND VALVE PROTECTION CAP IN PLACE to BOC Gases or authorized distributor for proper disposal.

14. Transport Information

PARAMETER	United States DOT	Canada TDG
PROPER SHIPPING NAME:	Isobutylene	Isobutylene
HAZARD CLASS:	2.1	2.1
IDENTIFICATION NUMBER:	UN 1055	UN 1055
SHIPPING LABEL:	FLAMMABLE GAS	FLAMMABLE GAS

15. Regulatory Information

Isobutylene is listed under the accident prevention provisions of section 112(r) of the Clean Air Act (CAA) with a threshold quantity (TQ) of 10,000 pounds.

SARA TITLE III NOTIFICATIONS AND INFORMATION

SARA TITLE III - HAZARD CLASSES:

Acute Health Hazard

Fire Hazard

Sudden Release of Pressure Hazard

16. Other Information

Compressed gas cylinders shall not be refilled without the express written permission of the owner. Shipment of a compressed gas cylinder which has not been filled by the owner or with his/her (written) consent is a violation of transportation regulations.

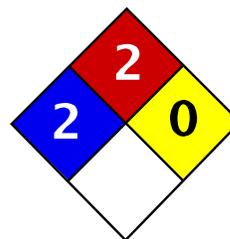

MSDS: G-53

1-800-424-9300

International CHEMTREC, call: 1-703-527-3887

For non-emergency assistance, call: 1-281-441-4400

Section 2: Composition and Information on Ingredients

Composition:

Name	CAS #	% by Weight
Naphthalene	91-20-3	100

Toxicological Data on Ingredients: Naphthalene: ORAL (LD50): Acute: 490 mg/kg [Rat]. 533 mg/kg [Mouse]. 1200 mg/kg [Guinea pig]. DERMAL (LD50): Acute: 20001 mg/kg [Rabbit]. VAPOR (LC50): Acute: 170 ppm 4 hour(s) [Rat].

Section 3: Hazards Identification

Potential Acute Health Effects:

Very hazardous in case of ingestion. Hazardous in case of eye contact (irritant), of inhalation. Slightly hazardous in case of skin contact (irritant, permeator). Severe over-exposure can result in death.

Potential Chronic Health Effects:

CARCINOGENIC EFFECTS: A4 (Not classifiable for human or animal.) by ACGIH.

MUTAGENIC EFFECTS: Not available.

TERATOGENIC EFFECTS: Not available.

DEVELOPMENTAL TOXICITY: Classified Development toxin [POSSIBLE].

The substance is toxic to blood, kidneys, the nervous system, the reproductive system, liver, mucous membranes, gastrointestinal tract, upper respiratory tract, central nervous system (CNS).

Repeated or prolonged exposure to the substance can produce target organs damage. Repeated exposure to an highly toxic material may produce general deterioration of health by an accumulation in one or many human organs.

Section 4: First Aid Measures

Eye Contact:

Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Cold water may be used. Do not use an eye ointment. Seek medical attention.

Skin Contact:

After contact with skin, wash immediately with plenty of water. Gently and thoroughly wash the contaminated skin with running water and non-abrasive soap. Be particularly careful to clean folds, crevices, creases and groin. Cover the irritated skin with an emollient. If irritation persists, seek medical attention. Wash contaminated clothing before reusing.

Serious Skin Contact: Not available.

Inhalation: Allow the victim to rest in a well ventilated area. Seek immediate medical attention.

Serious Inhalation:

Evacuate the victim to a safe area as soon as possible. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If the victim is not breathing, perform mouth-to-mouth resuscitation. **WARNING:** It may be hazardous to the person providing aid to give mouth-to-mouth resuscitation when the inhaled material is toxic, infectious or corrosive. Seek immediate medical attention.

Ingestion:

Do not induce vomiting. Examine the lips and mouth to ascertain whether the tissues are damaged, a possible indication that the toxic material was ingested; the absence of such signs, however, is not conclusive. Loosen tight clothing such as a collar, tie, belt or waistband. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek immediate medical attention.

Serious Ingestion: Not available.

Section 5: Fire and Explosion Data

Flammability of the Product: Flammable.

Auto-Ignition Temperature: 567°C (1052.6°F)

Flash Points: CLOSED CUP: 88°C (190.4°F). OPEN CUP: 79°C (174.2°F).

Flammable Limits: LOWER: 0.9% UPPER: 5.9%

Products of Combustion: These products are carbon oxides (CO, CO₂).

Fire Hazards in Presence of Various Substances: Not available.

Explosion Hazards in Presence of Various Substances:

Risks of explosion of the product in presence of mechanical impact: Not available.

Risks of explosion of the product in presence of static discharge: Not available.

Fire Fighting Media and Instructions:

Flammable solid.

SMALL FIRE: Use DRY chemical powder.

LARGE FIRE: Use water spray or fog. Cool containing vessels with water jet in order to prevent pressure build-up, autoignition or explosion.

Special Remarks on Fire Hazards: Not available.

Special Remarks on Explosion Hazards: Not available.

Section 6: Accidental Release Measures

Small Spill: Use appropriate tools to put the spilled solid in a convenient waste disposal container.

Large Spill:

Flammable solid.

Stop leak if without risk. Do not touch spilled material. Use water spray curtain to divert vapor drift. Prevent entry into sewers, basements or confined areas; dike if needed. Eliminate all ignition sources. Call for assistance on disposal. Be careful that the product is not present at a concentration level above TLV. Check TLV on the MSDS and with local authorities.

Section 7: Handling and Storage

Precautions:

Keep locked up Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not ingest. Do not breathe dust. Avoid contact with eyes Wear suitable protective clothing In case of insufficient ventilation, wear suitable respiratory equipment If ingested, seek medical advice immediately and show the container or the label. Keep away from incompatibles such as oxidizing agents.

Storage:

Flammable materials should be stored in a separate safety storage cabinet or room. Keep away from heat. Keep away from sources of ignition. Keep container tightly closed. Keep in a cool, well-ventilated place. Ground all equipment containing material. Keep container dry. Keep in a cool place.

Section 8: Exposure Controls/Personal Protection

Engineering Controls:

Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

Personal Protection:

Splash goggles. Lab coat. Dust respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

Personal Protection in Case of a Large Spill:

Splash goggles. Full suit. Dust respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

Exposure Limits:

Israel: TWA: 10 (ppm)
TWA: 10 STEL: 15 (ppm) from ACGIH (TLV) [1995]
TWA: 52 STEL: 79 (mg/m³) from ACGIH [1995]
Australia: STEL: 15 (ppm)
Consult local authorities for acceptable exposure limits.

Section 9: Physical and Chemical Properties

Physical state and appearance: Solid. (Crystalline solid.)

Odor: Aromatic.

Taste: Not available.

Molecular Weight: 128.19 g/mole

Color: White.

pH (1% soln/water): Not available.

Boiling Point: 218°C (424.4°F)

Melting Point: 80.2°C (176.4°F)

Critical Temperature: Not available.

Specific Gravity: 1.162 (Water = 1)

Vapor Pressure: Not applicable.

Vapor Density: 4.4 (Air = 1)

Volatility: Not available.

Odor Threshold: 0.038 ppm

Water/Oil Dist. Coeff.: Not available.

Ionicity (in Water): Not available.

Dispersion Properties:

Partially dispersed in hot water, methanol, n-octanol.

Very slightly dispersed in cold water.

See solubility in methanol, n-octanol.

Solubility:

Partially soluble in methanol, n-octanol.

Very slightly soluble in cold water, hot water.

Section 10: Stability and Reactivity Data

Stability: The product is stable.

Instability Temperature: Not available.

Conditions of Instability: Not available.

Incompatibility with various substances: Highly reactive with oxidizing agents.

Corrosivity: Non-corrosive in presence of glass.

Special Remarks on Reactivity: Not available.

Special Remarks on Corrosivity: May attack some forms of rubber and plastic

Polymerization: No.

Section 11: Toxicological Information

Routes of Entry: Absorbed through skin. Dermal contact. Eye contact. Inhalation. Ingestion.

Toxicity to Animals:

WARNING: THE LC50 VALUES HEREUNDER ARE ESTIMATED ON THE BASIS OF A 4-HOUR EXPOSURE.

Acute oral toxicity (LD50): 490 mg/kg [Rat].

Acute dermal toxicity (LD50): 20001 mg/kg [Rabbit].

Acute toxicity of the vapor (LC50): 170 ppm 4 hour(s) [Rat].

Chronic Effects on Humans:

CARCINOGENIC EFFECTS: A4 (Not classifiable for human or animal.) by ACGIH.

DEVELOPMENTAL TOXICITY: Classified Development toxin [POSSIBLE].

The substance is toxic to blood, kidneys, the nervous system, the reproductive system, liver, mucous membranes, gastrointestinal tract, upper respiratory tract, central nervous system (CNS).

Other Toxic Effects on Humans:

Very hazardous in case of ingestion.

Hazardous in case of inhalation.

Slightly hazardous in case of skin contact (irritant, permeator).

Special Remarks on Toxicity to Animals: Not available.

Special Remarks on Chronic Effects on Humans: Not available.

Special Remarks on other Toxic Effects on Humans: Not available.

Section 12: Ecological Information

Ecotoxicity: Ecotoxicity in water (LC50): 305.2 ppm 96 hour(s) [Trout].

BOD5 and COD: Not available.

Products of Biodegradation:

Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

Toxicity of the Products of Biodegradation: The products of degradation are more toxic.

Special Remarks on the Products of Biodegradation: Not available.

Section 13: Disposal Considerations

Waste Disposal:

Section 14: Transport Information

DOT Classification: CLASS 4.1: Flammable solid.

Identification: : Naphthalene, refined : UN1334 PG: III

Special Provisions for Transport: Marine Pollutant

Section 15: Other Regulatory Information

Federal and State Regulations:

Rhode Island RTK hazardous substances: Naphthalene

Pennsylvania RTK: Naphthalene

Florida: Naphthalene

Minnesota: Naphthalene

Massachusetts RTK: Naphthalene

TSCA 8(b) inventory: Naphthalene

TSCA 8(a) PAIR: Naphthalene

TSCA 8(d) H and S data reporting: Naphthalene: 06/01/87

SARA 313 toxic chemical notification and release reporting: Naphthalene: 1%

CERCLA: Hazardous substances.: Naphthalene: 100 lbs. (45.36 kg)

Other Regulations:

OSHA: Hazardous by definition of Hazard Communication Standard (29 CFR 1910.1200).

EINECS: This product is on the European Inventory of Existing Commercial Chemical Substances.

Other Classifications:

WHMIS (Canada):

CLASS B-4: Flammable solid.

CLASS D-1B: Material causing immediate and serious toxic effects (TOXIC).

CLASS D-2B: Material causing other toxic effects (TOXIC).

DSCL (EEC):

R36- Irritating to eyes.

R40- Possible risks of irreversible effects.

R48/22- Harmful: danger of serious damage to health by prolonged exposure if swallowed.

R48/23- Toxic: danger of serious damage to health by prolonged exposure through inhalation.

R63- Possible risk of harm to the unborn child.

HMIS (U.S.A.):

Health Hazard: 2

Fire Hazard: 2

Reactivity: 0

Personal Protection: E

National Fire Protection Association (U.S.A.):

TETRACHLOROETHYLENE

1. Product Identification

Synonyms: ethylene tetrachloride; tetrachloroethene; perchloroethylene; carbon bichloride; carbon dichloride

CAS No.: 127-18-4

Molecular Weight: 165.83

Chemical Formula: Cl₂C:CCl₂

Product Codes:

J.T. Baker: 9218, 9360, 9453, 9465, 9469

Mallinckrodt: 1933, 8058

2. Composition/Information on Ingredients

Ingredient	CAS No	Percent	Hazardous
Tetrachloroethylene	127-18-4	99 - 100%	Yes

3. Hazards Identification

Emergency Overview

WARNING! HARMFUL IF SWALLOWED, INHALED OR ABSORBED THROUGH SKIN. CAUSES IRRITATION TO SKIN, EYES AND RESPIRATORY TRACT. AFFECTS CENTRAL NERVOUS SYSTEM, LIVER AND KIDNEYS. SUSPECT CANCER HAZARD. MAY CAUSE CANCER. Risk of cancer depends on level and duration of exposure.

SAF-T-DATA^(tm) Ratings (Provided here for your convenience)

Health Rating: 2 - Moderate (Poison)

Flammability Rating: 0 - None

Reactivity Rating: 1 - Slight

Contact Rating: 2 - Moderate (Life)

Lab Protective Equip: GOGGLES; LAB COAT; VENT HOOD; PROPER GLOVES

Storage Color Code: Blue (Health)

Potential Health Effects

Inhalation:

Irritating to the upper respiratory tract. Giddiness, headache, intoxication, nausea and vomiting may follow the inhalation of large amounts while massive amounts can cause breathing arrest, liver and kidney damage, and death. Concentrations of 600 ppm and more can affect the central nervous system after a few minutes.

Ingestion:

Not highly toxic by this route because of low water solubility. Used as an oral dosage for hookworm (1 to 4 ml). Causes abdominal pain, nausea, diarrhea, headache, and dizziness.

Skin Contact:

Causes irritation to skin. Symptoms include redness, itching, and pain. May be absorbed through the skin with possible systemic effects.

Eye Contact:

Causes irritation, redness, and pain.

Chronic Exposure:

May cause liver, kidney or central nervous system damage after repeated or prolonged exposures. Suspected cancer risk from animal studies.

Aggravation of Pre-existing Conditions:

Persons with pre-existing skin disorders or eye problems or impaired liver or kidney function may be more susceptible to the effects of the substance. The use of alcoholic beverages enhances the toxic effects.

4. First Aid Measures

Inhalation:

Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

Ingestion:

Aspiration hazard. If swallowed, DO NOT INDUCE VOMITING. Give large quantities of water. Never give anything by mouth to an unconscious person. Get medical attention immediately.

Skin Contact:

Wash skin with soap or mild detergent and water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Call a physician.

Eye Contact:

Immediately flush eyes with plenty of water for at least 15 minutes, lifting lower and upper eyelids occasionally. Get medical attention immediately.

Note to Physician:

Do not administer adrenaline or epinephrine to a victim of chlorinated solvent poisoning.

5. Fire Fighting Measures

Fire:

Not considered to be a fire hazard but becomes hazardous in a fire situation because of vapor generation and possible degradation to phosgene (highly toxic) and hydrogen chloride (corrosive). Vapors are heavier than air and collect in low-lying areas.

Explosion:

Not considered to be an explosion hazard. Containers may explode when involved in a fire.

Fire Extinguishing Media:

Use any means suitable for extinguishing surrounding fire. Water spray may be used to keep fire exposed containers cool.

Special Information:

In the event of a fire, wear full protective clothing and NIOSH-approved self-contained breathing apparatus with full facepiece operated in the pressure demand or other positive pressure mode.

6. Accidental Release Measures

Ventilate area of leak or spill. Wear appropriate personal protective equipment as specified in Section 8. Isolate hazard area. Keep unnecessary and unprotected personnel from entering. Contain and recover liquid when possible. Neutralize with alkaline material (soda ash, lime), then absorb with an inert material (e. g., vermiculite, dry sand, earth), and place in a chemical waste container. Do not use combustible materials, such as saw dust. Do not flush to sewer! US Regulations (CERCLA) require reporting spills and releases to soil, water and air in excess of reportable quantities. The toll free number for the US Coast Guard National Response Center is (800) 424-8802.

7. Handling and Storage

Store in a cool, dry, ventilated area away from sources of heat or ignition. Isolate from flammable materials. Protect from direct sunlight. Wear special protective equipment (Sec. 8) for maintenance break-in or where exposures may exceed established exposure levels. Wash hands, face, forearms and neck when exiting restricted areas. Shower, dispose of outer clothing, change to clean garments at the end of the day. Avoid cross-contamination of street clothes. Wash hands before eating and do not eat, drink, or smoke in workplace. Containers of this material may be hazardous when empty since they retain product residues (vapors, liquid); observe all warnings and precautions listed for the product.

8. Exposure Controls/Personal Protection

Airborne Exposure Limits:

-OSHA Permissible Exposure Limit (PEL):

100 ppm (TWA), 200 ppm (ceiling),

300 ppm/5min/3-hour (max)

-ACGIH Threshold Limit Value (TLV):

25 ppm (TWA), 100 ppm (STEL); listed as A3, animal carcinogen

Ventilation System:

A system of local and/or general exhaust is recommended to keep employee exposures below the Airborne Exposure Limits. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area. Please refer to the ACGIH document, *Industrial Ventilation, A Manual of Recommended Practices*, most recent edition, for details.

Personal Respirators (NIOSH Approved):

If the exposure limit is exceeded, wear a supplied air, full-facepiece respirator, airlined hood, or full-facepiece self-contained breathing apparatus.

Skin Protection:

Wear impervious protective clothing, including boots, gloves, lab coat, apron or coveralls, as appropriate, to prevent skin contact.

Eye Protection:

Use chemical safety goggles and/or full face shield where dusting or splashing of solutions is possible. Maintain eye wash fountain and quick-drench facilities in work area.

9. Physical and Chemical Properties

Appearance:

Clear, colorless liquid.

Odor:

Ethereal odor.

Solubility:

0.015 g in 100 g of water.

Specific Gravity:

1.62 @ 20C/4C

pH:

No information found.

% Volatiles by volume @ 21C (70F):

100

Boiling Point:

121C (250F)

Melting Point:

-19C (-2F)

Vapor Density (Air=1):

5.7

Vapor Pressure (mm Hg):

18 @ 25C (77F)

Evaporation Rate (BuAc=1):

0.33 (trichloroethylene = 1)

10. Stability and Reactivity

Stability:

Stable under ordinary conditions of use and storage. Slowly decomposed by light. Deteriorates rapidly in warm, moist climates.

Hazardous Decomposition Products:

Carbon dioxide and carbon monoxide may form when heated to decomposition. Hydrogen chloride gas and phosgene gas may be formed upon heating. Decomposes with moisture to yield trichloroacetic acid and hydrochloric acid.

Hazardous Polymerization:

Will not occur.

Incompatibilities:

Strong acids, strong oxidizers, strong alkalis, especially NaOH, KOH; finely divided metals, especially zinc, barium, lithium. Slowly corrodes aluminum, iron and zinc.

Conditions to Avoid:

Moisture, light, heat and incompatibles.

11. Toxicological Information

Oral rat LD50: 2629 mg/kg; inhalation rat LC50: 4100 ppm/6H; investigated as a tumorigen, mutagen, reproductive effector.

Ingredient	---NTP Carcinogen---		IARC Category
	Known	Anticipated	
Tetrachloroethylene (127-18-4)	No	Yes	2A

12. Ecological Information

Environmental Fate:

When released into the soil, this material is expected to quickly evaporate. When released into the soil, this material may leach into groundwater. When released into the soil, this material may biodegrade to a moderate extent. When released to water, this material is expected to quickly evaporate. When released into water, this material is not expected to biodegrade. This material is not expected to significantly bioaccumulate. When released into the air, this material may be moderately degraded by reaction with photochemically produced hydroxyl radicals.

Environmental Toxicity:

The LC50/96-hour values for fish are between 1 and 10 mg/l. The LC50/96-hour values for fish are between 10 and 100 mg/l. This material is expected to be toxic to aquatic life.

13. Disposal Considerations

Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and sent to a RCRA approved incinerator or disposed in a RCRA approved waste facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements.

14. Transport Information

WARNING:

THIS PRODUCT CONTAINS A CHEMICAL(S) KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER.

Australian Hazchem Code: 2[Z]

Poison Schedule: None allocated.

WHMIS:

This MSDS has been prepared according to the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all of the information required by the CPR.

16. Other Information

NFPA Ratings: Health: 2 Flammability: 0 Reactivity: 0

Label Hazard Warning:

WARNING! HARMFUL IF SWALLOWED, INHALED OR ABSORBED THROUGH SKIN. CAUSES IRRITATION TO SKIN, EYES AND RESPIRATORY TRACT. AFFECTS CENTRAL NERVOUS SYSTEM, LIVER AND KIDNEYS. SUSPECT CANCER HAZARD. MAY CAUSE CANCER. Risk of cancer depends on level and

duration of exposure.

Label Precautions:

Do not get in eyes, on skin, or on clothing.

Do not breathe vapor or mist.

Keep container closed.

Use only with adequate ventilation.

Wash thoroughly after handling.

Label First Aid:

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. If swallowed, DO NOT INDUCE VOMITING. Give large quantities of water. Never give anything by mouth to an unconscious person. In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. In all cases call a physician.

Product Use:

Laboratory Reagent.

Revision Information:

No Changes.

New Jersey Department of Health and Senior Services

HAZARDOUS SUBSTANCE FACT SHEET

Common Name: **PHENANTHRENE**

CAS Number: 85-01-8

DOT Number: UN 1137

RTK Substance number: 3004

Date: August 1999

HAZARD SUMMARY

- * **Phenanthrene** can affect you when breathed in and may be absorbed through the skin.
- * Contact can irritate the skin and eyes. If skin contaminated with **Phenanthrene** is exposed to sunlight a rash or skin burn may occur, sometimes with blisters.
- * Breathing **Phenanthrene** can irritate the nose and throat.
- * **Phenanthrene** may cause a skin allergy. If allergy develops, very low future exposure can cause itching and a skin rash.
- * *CONSULT THE NEW JERSEY DEPARTMENT OF HEALTH AND SENIOR SERVICES HAZARDOUS SUBSTANCE FACT SHEET ON COAL TAR PITCH.*

IDENTIFICATION

Phenanthrene is a colorless, crystalline substance with a weak aromatic odor. It is used in the manufacture of dyes, explosives and drugs, and in biological research.

REASON FOR CITATION

- * **Phenanthrene** is on the Hazardous Substance List because it is regulated by OSHA and cited by ACGIH, DOT, NIOSH, HHAG, NFPA and EPA.
- * Definitions are provided on page 5.

HOW TO DETERMINE IF YOU ARE BEING EXPOSED

The New Jersey Right to Know Act requires most employers to label chemicals in the workplace and requires public employers to provide their employees with information and training concerning chemical hazards and controls. The federal OSHA Hazard Communication Standard, 1910.1200, requires private employers to provide similar training and information to their employees.

- * Exposure to hazardous substances should be routinely evaluated. This may include collecting personal and area air samples. You can obtain copies of sampling results from your employer. You have a legal right to this information under OSHA 1910.1020.
- * If you think you are experiencing any work-related health problems, see a doctor trained to recognize occupational diseases. Take this Fact Sheet with you.

WORKPLACE EXPOSURE LIMITS

The following exposure limits are for *Coal Tar Pitch volatiles*:

- OSHA: The legal airborne permissible exposure limit (PEL) is **0.2 mg/m³** averaged over an 8-hour workshift.
- NIOSH: The recommended airborne exposure limit is **0.1 mg/m³** averaged over a 10-hour workshift.
- ACGIH: The recommended airborne exposure limit is **0.2 mg/m³** averaged over an 8-hour workshift.

- * The above exposure limits are for air levels only. When skin contact also occurs, you may be overexposed, even though air levels are less than the limits listed above.

WAYS OF REDUCING EXPOSURE

- * Where possible, enclose operations and use local exhaust ventilation at the site of chemical release. If local exhaust ventilation or enclosure is not used, respirators should be worn.
- * Wear protective work clothing.
- * Wash thoroughly immediately after exposure to **Phenanthrene** and at the end of the workshift.
- * Post hazard and warning information in the work area. In addition, as part of an ongoing education and training effort, communicate all information on the health and safety hazards of **Phenanthrene** to potentially exposed workers.

This Fact Sheet is a summary source of information of all potential and most severe health hazards that may result from exposure. Duration of exposure, concentration of the substance and other factors will affect your susceptibility to any of the potential effects described below.

HEALTH HAZARD INFORMATION

Acute Health Effects

The following acute (short-term) health effects may occur immediately or shortly after exposure to **Phenanthrene**:

- * Contact can irritate the skin and eyes. If skin contaminated with **Phenanthrene** is exposed to sunlight a rash or skin burn effect may occur, sometimes with blisters.
- * Breathing **Phenanthrene** can irritate the nose and throat.

Chronic Health Effects

The following chronic (long-term) health effects can occur at some time after exposure to **Phenanthrene** and can last for months or years:

Cancer Hazard

- * There is no evidence that **Phenanthrene** causes cancer in animals. This is based on test results presently available to the New Jersey Department of Health and Senior Services from published studies.

Reproductive Hazard

- * According to the information presently available to the New Jersey Department of Health and Senior Services, **Phenanthrene** has not been tested for its ability to affect reproduction.

Other Long-Term Effects

- * **Phenanthrene** may cause a skin allergy. If allergy develops, very low future exposure can cause itching and a skin rash.

MEDICAL

Medical Testing

If symptoms develop or overexposure is suspected, the following is recommended:

- * Evaluation by a qualified allergist, including careful exposure history and special testing, may help diagnose skin allergy.

Any evaluation should include a careful history of past and present symptoms with an exam. Medical tests that look for damage already done are not a substitute for controlling exposure.

Request copies of your medical testing. You have a legal right to this information under OSHA 1910.1020.

WORKPLACE CONTROLS AND PRACTICES

Unless a less toxic chemical can be substituted for a hazardous substance, **ENGINEERING CONTROLS** are the most effective way of reducing exposure. The best protection is to enclose operations and/or provide local exhaust ventilation at the site of chemical release. Isolating operations can also reduce exposure. Using respirators or protective equipment is less effective than the controls mentioned above, but is sometimes necessary.

In evaluating the controls present in your workplace, consider: (1) how hazardous the substance is, (2) how much of the substance is released into the workplace and (3) whether harmful skin or eye contact could occur. Special controls should be in place for highly toxic chemicals or when significant skin, eye, or breathing exposures are possible.

In addition, the following control is recommended:

- * Where possible, automatically transfer **Phenanthrene** from drums or other storage containers to process containers.

Good **WORK PRACTICES** can help to reduce hazardous exposures. The following work practices are recommended:

- * Workers whose clothing has been contaminated by **Phenanthrene** should change into clean clothing promptly.
- * Do not take contaminated work clothes home. Family members could be exposed.
- * Contaminated work clothes should be laundered by individuals who have been informed of the hazards of exposure to **Phenanthrene**.
- * Eye wash fountains should be provided in the immediate work area for emergency use.
- * If there is the possibility of skin exposure, emergency shower facilities should be provided.
- * On skin contact with **Phenanthrene**, immediately wash or shower to remove the chemical. At the end of the workshift, wash any areas of the body that may have contacted **Phenanthrene**, whether or not known skin contact has occurred.
- * Do not eat, smoke, or drink where **Phenanthrene** is handled, processed, or stored, since the chemical can be swallowed. Wash hands carefully before eating, drinking, smoking, or using the toilet.
- * Use a vacuum or a wet method to reduce dust during clean-up. **DO NOT DRY SWEEP.**

PERSONAL PROTECTIVE EQUIPMENT

WORKPLACE CONTROLS ARE BETTER THAN PERSONAL PROTECTIVE EQUIPMENT. However, for some jobs (such as outside work, confined space entry, jobs done only once in a while, or jobs done while workplace controls are being installed), personal protective equipment may be appropriate.

OSHA 1910.132 requires employers to determine the appropriate personal protective equipment for each hazard and to train employees on how and when to use protective equipment.

The following recommendations are only guidelines and may not apply to every situation.

Clothing

- * Avoid skin contact with **Phenanthrene**. Wear protective gloves and clothing. Safety equipment suppliers/manufacturers can provide recommendations on the most protective glove/clothing material for your operation.
- * All protective clothing (suits, gloves, footwear, headgear) should be clean, available each day, and put on before work.

Eye Protection

- * Wear impact resistant eye protection with side shields or goggles.
- * Wear a face shield along with goggles when working with corrosive, highly irritating or toxic substances.

Respiratory Protection

IMPROPER USE OF RESPIRATORS IS DANGEROUS.

Such equipment should only be used if the employer has a written program that takes into account workplace conditions, requirements for worker training, respirator fit testing and medical exams, as described in OSHA 1910.134.

- * Where the potential exists for exposure over **0.1 mg/m³** (as *Coal Tar Pitch volatiles*), use a MSHA/NIOSH approved supplied-air respirator with a full facepiece operated in a pressure-demand or other positive-pressure mode. For increased protection use in combination with an auxiliary self-contained breathing apparatus operated in a pressure-demand or other positive-pressure mode.
- * Exposure to **80 mg/m³** (as *Coal Tar Pitch volatiles*) is immediately dangerous to life and health. If the possibility of exposure above **80 mg/m³** (as *Coal Tar Pitch volatiles*) exists, use a MSHA/NIOSH approved self-contained breathing apparatus with a full facepiece operated in a pressure-demand or other positive-pressure mode.

QUESTIONS AND ANSWERS

- Q: If I have acute health effects, will I later get chronic health effects?
- A: Not always. Most chronic (long-term) effects result from repeated exposures to a chemical.
- Q: Can I get long-term effects without ever having short-term effects?
- A: Yes, because long-term effects can occur from repeated exposures to a chemical at levels not high enough to make you immediately sick.

- Q: What are my chances of getting sick when I have been exposed to chemicals?
- A: The likelihood of becoming sick from chemicals is increased as the amount of exposure increases. This is determined by the length of time and the amount of material to which someone is exposed.
- Q: When are higher exposures more likely?
- A: Conditions which increase risk of exposure include dust releasing operations (grinding, mixing, blasting, dumping, etc.), other physical and mechanical processes (heating, pouring, spraying, spills and evaporation from large surface areas such as open containers), and "confined space" exposures (working inside vats, reactors, boilers, small rooms, etc.).
- Q: Is the risk of getting sick higher for workers than for community residents?
- A: Yes. Exposures in the community, except possibly in cases of fires or spills, are usually much lower than those found in the workplace. However, people in the community may be exposed to contaminated water as well as to chemicals in the air over long periods. This may be a problem for children or people who are already ill.

The following information is available from:

New Jersey Department of Health and Senior Services
Occupational Health Service
PO Box 360
Trenton, NJ 08625-0360
(609) 984-1863
(609) 292-5677 (fax)

Web address: <http://www.state.nj.us/health/eoh/odisweb/>

Industrial Hygiene Information

Industrial hygienists are available to answer your questions regarding the control of chemical exposures using exhaust ventilation, special work practices, good housekeeping, good hygiene practices, and personal protective equipment including respirators. In addition, they can help to interpret the results of industrial hygiene survey data.

Medical Evaluation

If you think you are becoming sick because of exposure to chemicals at your workplace, you may call personnel at the Department of Health and Senior Services, Occupational Health Service, who can help you find the information you need.

Public Presentations

Presentations and educational programs on occupational health or the Right to Know Act can be organized for labor unions, trade associations and other groups.

Right to Know Information Resources

The Right to Know Infoline (609) 984-2202 can answer questions about the identity and potential health effects of chemicals, list of educational materials in occupational health, references used to prepare the Fact Sheets, preparation of the Right to Know survey, education and training programs, labeling requirements, and general information regarding the Right to Know Act. Violations of the law should be reported to (609) 984-2202.

DEFINITIONS

ACGIH is the American Conference of Governmental Industrial Hygienists. It recommends upper limits (called TLVs) for exposure to workplace chemicals.

A **carcinogen** is a substance that causes cancer.

The **CAS number** is assigned by the Chemical Abstracts Service to identify a specific chemical.

A **combustible** substance is a solid, liquid or gas that will burn.

A **corrosive** substance is a gas, liquid or solid that causes irreversible damage to human tissue or containers.

DEP is the New Jersey Department of Environmental Protection.

DOT is the Department of Transportation, the federal agency that regulates the transportation of chemicals.

EPA is the Environmental Protection Agency, the federal agency responsible for regulating environmental hazards.

A **fetus** is an unborn human or animal.

A **flammable** substance is a solid, liquid, vapor or gas that will ignite easily and burn rapidly.

The **flash point** is the temperature at which a liquid or solid gives off vapor that can form a flammable mixture with air.

HHAG is the Human Health Assessment Group of the federal EPA.

IARC is the International Agency for Research on Cancer, a scientific group that classifies chemicals according to their cancer-causing potential.

A **miscible** substance is a liquid or gas that will evenly dissolve in another.

mg/m³ means milligrams of a chemical in a cubic meter of air. It is a measure of concentration (weight/volume).

MSHA is the Mine Safety and Health Administration, the federal agency that regulates mining. It also evaluates and approves respirators.

A **mutagen** is a substance that causes mutations. A **mutation** is a change in the genetic material in a body cell. Mutations can lead to birth defects, miscarriages, or cancer.

NAERG is the North American Emergency Response Guidebook. It was jointly developed by Transport Canada, the United States Department of Transportation and the Secretariat of Communications and Transportation of Mexico. It is a guide for first responders to quickly identify the specific or generic hazards of material involved in a transportation incident, and to protect themselves and the general public during the initial response phase of the incident.

NCI is the National Cancer Institute, a federal agency that determines the cancer-causing potential of chemicals.

NFPA is the National Fire Protection Association. It classifies substances according to their fire and explosion hazard.

NIOSH is the National Institute for Occupational Safety and Health. It tests equipment, evaluates and approves respirators, conducts studies of workplace hazards, and proposes standards to OSHA.

NTP is the National Toxicology Program which tests chemicals and reviews evidence for cancer.

OSHA is the Occupational Safety and Health Administration, which adopts and enforces health and safety standards.

PEOSHA is the Public Employees Occupational Safety and Health Act, a state law which sets PELs for New Jersey public employees.

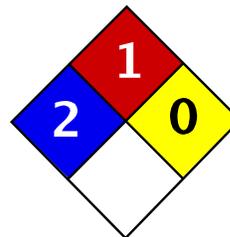

ppm means parts of a substance per million parts of air. It is a measure of concentration by volume in air.

A **reactive** substance is a solid, liquid or gas that releases energy under certain conditions.

A **teratogen** is a substance that causes birth defects by damaging the fetus.

TLV is the Threshold Limit Value, the workplace exposure limit recommended by ACGIH.

The **vapor pressure** is a measure of how readily a liquid or a solid mixes with air at its surface. A higher vapor pressure indicates a higher concentration of the substance in air and therefore increases the likelihood of breathing it in.

International CHEMTREC, call: 1-703-527-3887

For non-emergency assistance, call: 1-281-441-4400

Section 2: Composition and Information on Ingredients

Composition:

Name	CAS #	% by Weight
Pyrene	129-00-00	100

Toxicological Data on Ingredients: Pyrene: ORAL (LD50): Acute: 2700 mg/kg [Rat]. 800 mg/kg [Mouse].

Section 3: Hazards Identification

Potential Acute Health Effects:

Hazardous in case of eye contact (irritant), of ingestion, of inhalation. Slightly hazardous in case of skin contact (irritant, permeator).

Potential Chronic Health Effects:

CARCINOGENIC EFFECTS: 3 (Not classifiable for human.) by IARC.

MUTAGENIC EFFECTS: Mutagenic for mammalian somatic cells. Mutagenic for bacteria and/or yeast.

TERATOGENIC EFFECTS: Not available.

DEVELOPMENTAL TOXICITY: Not available.

Repeated or prolonged exposure is not known to aggravate medical condition.

Section 4: First Aid Measures

Eye Contact:

Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention.

Skin Contact:

In case of contact, immediately flush skin with plenty of water. Cover the irritated skin with an emollient. Remove contaminated clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention.

Serious Skin Contact: Not available.

Inhalation:

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

Serious Inhalation: Not available.

Ingestion:

Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If large quantities of this material are swallowed, call a physician immediately. Loosen tight clothing such as a collar, tie, belt or waistband.

Serious Ingestion: Not available.

Section 5: Fire and Explosion Data

Flammability of the Product: May be combustible at high temperature.

Auto-Ignition Temperature: Not available.

Flash Points: Not available.

Flammable Limits: Not available.

Products of Combustion: These products are carbon oxides (CO, CO₂).

Fire Hazards in Presence of Various Substances:

Slightly flammable to flammable in presence of heat, of combustible materials.
Non-flammable in presence of shocks.

Explosion Hazards in Presence of Various Substances:

Risks of explosion of the product in presence of mechanical impact: Not available.
Slightly explosive in presence of heat.
Non-explosive in presence of open flames and sparks.

Fire Fighting Media and Instructions:

SMALL FIRE: Use DRY chemical powder.
LARGE FIRE: Use water spray, fog or foam. Do not use water jet.

Special Remarks on Fire Hazards: Not available.

Special Remarks on Explosion Hazards: Not available.

Section 6: Accidental Release Measures

Small Spill:

Use appropriate tools to put the spilled solid in a convenient waste disposal container. Finish cleaning by spreading water on the contaminated surface and dispose of according to local and regional authority requirements.

Large Spill:

Use a shovel to put the material into a convenient waste disposal container. Finish cleaning by spreading water on the contaminated surface and allow to evacuate through the sanitary system.

Section 7: Handling and Storage

Precautions:

Keep locked up.. Keep away from heat. Keep away from sources of ignition. Empty containers pose a fire risk, evaporate the residue under a fume hood. Ground all equipment containing material. Do not ingest. Do not breathe dust. Avoid contact with eyes. Wear suitable protective clothing. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Keep away from incompatibles such as oxidizing agents.

Storage:

Keep container tightly closed. Keep container in a cool, well-ventilated area. Do not store above 24°C (75.2°F). Preferably refrigerate.

Section 8: Exposure Controls/Personal Protection

Engineering Controls:

Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

Personal Protection: Safety glasses. Synthetic apron. Gloves (impervious).

Personal Protection in Case of a Large Spill:

Splash goggles. Full suit. Boots. Gloves. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

Exposure Limits: Not available.

Section 9: Physical and Chemical Properties

Physical state and appearance: Solid. (Crystalline solid. Powdered solid.)

Odor: Not available.

Taste: Not available.

Molecular Weight: 202.26 g/mole

Color: Yellow.

pH (1% soln/water): Not applicable.

Boiling Point: 404°C (759.2°F)

Melting Point: 151.2°C (304.2°F)

Critical Temperature: Not available.

Specific Gravity: 1.271 @ 23 C (Water = 1)

Vapor Pressure: Not applicable.

Vapor Density: Not available.

Volatility: Not available.

Odor Threshold: Not available.

Water/Oil Dist. Coeff.: The product is more soluble in oil; $\log(\text{oil/water}) = 4.9$

Ionicity (in Water): Not available.

Dispersion Properties:

Is not dispersed in cold water, hot water.
See solubility in diethyl ether.

Solubility:

Soluble in diethyl ether.
Insoluble in cold water, hot water.
Pyrene is fairly soluble in organic solvents.
It is soluble in alcohol, benzene, carbon disulfide, ether, petroleum ether, and toluene

Section 10: Stability and Reactivity Data

Stability: The product is stable.

Instability Temperature: Not available.

Conditions of Instability: Excess heat, incompatible materials

Incompatibility with various substances: Reactive with oxidizing agents.

Corrosivity: Not available.

Special Remarks on Reactivity: Not available.

Special Remarks on Corrosivity: Not available.

Polymerization: Will not occur.

Section 11: Toxicological Information

Routes of Entry: Inhalation. Ingestion.

Toxicity to Animals: Acute oral toxicity (LD50): 800 mg/kg [Mouse].

Chronic Effects on Humans:

CARCINOGENIC EFFECTS: 3 (Not classifiable for human.) by IARC.

MUTAGENIC EFFECTS: Mutagenic for mammalian somatic cells. Mutagenic for bacteria and/or yeast.

Other Toxic Effects on Humans:

Hazardous in case of ingestion, of inhalation.

Slightly hazardous in case of skin contact (irritant, permeator).

Special Remarks on Toxicity to Animals: Not available.

Special Remarks on Chronic Effects on Humans:

May affect genetic material (mutagenic).

May cause cancer (tumorigenic) according to animal data.

Special Remarks on other Toxic Effects on Humans:

Acute Potential Health Effects:

Skin: May cause skin irritation. May be absorbed through skin.

Eyes: May cause eye irritation. Conjunctival irritation may be noted.

Inhalation: May cause respiratory tract irritation.

Ingestion: May cause gastrointestinal tract irritation. May affect behavior/Central Nervous System (excitation and muscel spasicity), liver and urinary system, and immune system, and blood.

Section 12: Ecological Information

Ecotoxicity: Ecotoxicity in water (LC50): 1.8 mg/l 48 hours [Water flea].

BOD5 and COD: Not available.

Products of Biodegradation:

Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

Toxicity of the Products of Biodegradation: The products of degradation are less toxic than the product itself.

Special Remarks on the Products of Biodegradation: Not available.

Section 13: Disposal Considerations

Waste Disposal:

Waste must be disposed of in accordance with federal, state and local environmental control regulations.

Section 14: Transport Information

DOT Classification: Not a DOT controlled material (United States).

Identification: Not applicable.

Special Provisions for Transport: Not applicable.

Section 15: Other Regulatory Information

Federal and State Regulations:

Connecticut carcinogen reporting list.: Pyrene
Illinois chemical safety act: Pyrene
New York release reporting list: Pyrene
Pennsylvania RTK: Pyrene
Massachusetts RTK: Pyrene
Massachusetts spill list: Pyrene
New Jersey: Pyrene
New Jersey spill list: Pyrene

New Jersey Department of Health and Senior Services

HAZARDOUS SUBSTANCE FACT SHEET

Common Name: **TRICHLOROETHYLENE**

CAS Number: 79-01-6
DOT Number: UN 1710

RTK Substance number: 1890
Date: April 1994 Revision: January 2000

HAZARD SUMMARY

- * **Trichloroethylene** can affect you when breathed in.
- * **Trichloroethylene** may cause mutations. Handle with extreme caution.
- * Contact can irritate and burn the skin and eyes with possible eye damage.
- * Exposure can cause lightheadedness, dizziness, unconsciousness, visual disturbances, nausea and vomiting. Very high levels can cause irregular heartbeat which can be fatal.
- * **Trichloroethylene** may cause a skin allergy. If allergy develops, very low future exposure can cause itching and a skin rash.
- * Repeated exposure can cause memory loss, headache, and depression.
- * **Trichloroethylene** may damage the liver and kidneys.

- * If you think you are experiencing any work-related health problems, see a doctor trained to recognize occupational diseases. Take this Fact Sheet with you.
- * **ODOR THRESHOLD = 82 to 110 ppm.**
- * The range of accepted odor threshold values is quite broad. Caution should be used in relying on odor alone as a warning of potentially hazardous exposures.

IDENTIFICATION

Trichloroethylene is a colorless liquid with a sweet odor. It is used as a solvent for degreasing and dry cleaning, and in printing inks, paints, lacquers, varnishes, and adhesives.

REASON FOR CITATION

- * **Trichloroethylene** is on the Hazardous Substance List because it is regulated by OSHA and cited by ACGIH, DOT, NIOSH, DEP, HHAG, NFPA and EPA.
- * This chemical is on the Special Health Hazard Substance List because it is a **MUTAGEN**.
- * Definitions are provided on page 5.

HOW TO DETERMINE IF YOU ARE BEING EXPOSED

The New Jersey Right to Know Act requires most employers to label chemicals in the workplace and requires public employers to provide their employees with information and training concerning chemical hazards and controls. The federal OSHA Hazard Communication Standard, 1910.1200, requires private employers to provide similar training and information to their employees.

- * Exposure to hazardous substances should be routinely evaluated. This may include collecting personal and area air samples. You can obtain copies of sampling results from your employer. You have a legal right to this information under OSHA 1910.1020.

WORKPLACE EXPOSURE LIMITS

OSHA: The legal airborne permissible exposure limit (PEL) is **100 ppm** averaged over an 8-hour workshift, **200 ppm** not to be exceeded during any 15 minute work period, and **300 ppm** for 5 minutes in any 2-hour work period.

NIOSH: The recommended airborne exposure limit is **25 ppm** averaged over a 10-hour workshift.

ACGIH: The recommended airborne exposure limit is **50 ppm** averaged over an 8-hour workshift and **100 ppm** as a STEL (short term exposure limit).

- * **Trichloroethylene** may cause mutations. All contact with this chemical should be reduced to the lowest possible level.

WAYS OF REDUCING EXPOSURE

- * Where possible, enclose operations and use local exhaust ventilation at the site of chemical release. If local exhaust ventilation or enclosure is not used, respirators should be worn.
- * Wear protective work clothing.
- * Wash thoroughly immediately after exposure to **Trichloroethylene** and at the end of the workshift.
- * Post hazard and warning information in the work area. In addition, as part of an ongoing education and training effort, communicate all information on the health and safety hazards of **Trichloroethylene** to potentially exposed workers.

This Fact Sheet is a summary source of information of all potential and most severe health hazards that may result from exposure. Duration of exposure, concentration of the substance and other factors will affect your susceptibility to any of the potential effects described below.

HEALTH HAZARD INFORMATION

Acute Health Effects

The following acute (short-term) health effects may occur immediately or shortly after exposure to **Trichloroethylene**:

- * Contact can irritate and burn the skin and eyes with possible eye damage.
- * Exposure can cause lightheadedness, dizziness, unconsciousness, visual disturbances, nausea and vomiting. Very high levels can cause irregular heartbeat which can be fatal.

Chronic Health Effects

The following chronic (long-term) health effects can occur at some time after exposure to **Trichloroethylene** and can last for months or years:

Cancer Hazard

- * There is limited evidence that **Trichloroethylene** causes cancer in animals. It may cause lung and liver cancer.
- * **Trichloroethylene** may cause mutations (genetic changes).
- * Many scientists believe there is no safe level of exposure to a carcinogen.

Reproductive Hazard

- * There is no evidence that **Trichloroethylene** affects reproduction. This is based on test results presently available to the New Jersey Department of Health and Senior Services from published studies.

Other Long-Term Effects

- * **Trichloroethylene** may cause a skin allergy. If allergy develops, very low future exposure can cause itching and a skin rash.
- * Repeated exposure can cause memory loss, headache, intolerance of alcohol, depression, and weakness in the arms and legs.
- * **Trichloroethylene** may damage the liver and kidneys.
- * Repeated contact can cause irritation, blistering, roughening, and cracking of the exposed skin.

MEDICAL

Medical Testing

For those with frequent or potentially high exposure (half the TLV or greater, or significant skin contact), the following are recommended before beginning work and at regular times after that:

- * Liver and kidney function tests.

If symptoms develop or overexposure is suspected, the following are recommended:

- * Exam of the nervous system. Consider nerve conduction tests.
- * Urinary *Trichloroacetic Acid* level (for repeated exposures) or blood **Trichloroethylene** levels (for acute exposure).
- * Evaluation by a qualified allergist, including careful exposure history and special testing, may help diagnose skin allergy.

Any evaluation should include a careful history of past and present symptoms with an exam. Medical tests that look for damage already done are not a substitute for controlling exposure.

Request copies of your medical testing. You have a legal right to this information under OSHA 1910.1020.

Mixed Exposures

- * Because more than light alcohol consumption can cause liver damage, drinking alcohol can increase the liver damage caused by **Trichloroethylene**.

WORKPLACE CONTROLS AND PRACTICES

Unless a less toxic chemical can be substituted for a hazardous substance, **ENGINEERING CONTROLS** are the most effective way of reducing exposure. The best protection is to enclose operations and/or provide local exhaust ventilation at the site of chemical release. Isolating operations can also reduce exposure. Using respirators or protective equipment is less effective than the controls mentioned above, but is sometimes necessary.

In evaluating the controls present in your workplace, consider: (1) how hazardous the substance is, (2) how much of the substance is released into the workplace and (3) whether harmful skin or eye contact could occur. Special controls should be in place for highly toxic chemicals or when significant skin, eye, or breathing exposures are possible.

In addition, the following control is recommended:

- * Where possible, automatically pump liquid **Trichloroethylene** from drums or other storage containers to process containers.

Good **WORK PRACTICES** can help to reduce hazardous exposures. The following work practices are recommended:

- * Workers whose clothing has been contaminated by **Trichloroethylene** should change into clean clothing promptly.
- * Contaminated work clothes should be laundered by individuals who have been informed of the hazards of exposure to **Trichloroethylene**.
- * Eye wash fountains should be provided in the immediate work area for emergency use.
- * If there is the possibility of skin exposure, emergency shower facilities should be provided.
- * On skin contact with **Trichloroethylene**, immediately wash or shower to remove the chemical. At the end of the workshift, wash any areas of the body that may have contacted **Trichloroethylene**, whether or not known skin contact has occurred.
- * Do not eat, smoke, or drink where **Trichloroethylene** is handled, processed, or stored, since the chemical can be swallowed. Wash hands carefully before eating, drinking, smoking, or using the toilet.
- * Do not smoke in the work area. Even a little vapor inhaled through a burning cigarette, cigar, or pipe will be converted into more highly toxic substances.

PERSONAL PROTECTIVE EQUIPMENT

WORKPLACE CONTROLS ARE BETTER THAN PERSONAL PROTECTIVE EQUIPMENT. However, for some jobs (such as outside work, confined space entry, jobs done only once in a while, or jobs done while workplace controls are being installed), personal protective equipment may be appropriate.

OSHA 1910.132 requires employers to determine the appropriate personal protective equipment for each hazard and to train employees on how and when to use protective equipment.

The following recommendations are only guidelines and may not apply to every situation.

Clothing

- * Avoid skin contact with **Trichloroethylene**. Wear solvent-resistant gloves and clothing. Safety equipment suppliers/manufacturers can provide recommendations on the most protective glove/clothing material for your operation.
- * All protective clothing (suits, gloves, footwear, headgear) should be clean, available each day, and put on before work.
- * ACGIH recommends *Viton*, *Polyvinyl Alcohol*, *Teflon* and *Silver Shield* as protective materials.

Eye Protection

- * Wear indirect-vent, impact and splash resistant goggles when working with liquids.
- * Wear a face shield along with goggles when working with corrosive, highly irritating or toxic substances.
- * Contact lenses should not be worn when working with this substance.

Respiratory Protection

IMPROPER USE OF RESPIRATORS IS DANGEROUS.

Such equipment should only be used if the employer has a written program that takes into account workplace conditions, requirements for worker training, respirator fit testing and medical exams, as described in OSHA 1910.134.

- * Where the potential exists for exposure over **25 ppm**, use a MSHA/NIOSH approved supplied-air respirator with a full facepiece operated in a pressure-demand or other positive-pressure mode. For increased protection use in combination with an auxiliary self-contained breathing apparatus operated in a pressure-demand or other positive-pressure mode.
- * Exposure to **1,000 ppm** is immediately dangerous to life and health. If the possibility of exposure above **1,000** exists, use a MSHA/NIOSH approved self-contained breathing apparatus with a full facepiece operated in a pressure-demand or other positive-pressure mode.

HANDLING AND STORAGE

- * Prior to working with **Trichloroethylene** you should be trained on its proper handling and storage.
- * **Trichloroethylene** must be handled and stored away from operations which generate HIGH TEMPERATURES such as ARC WELDING or CUTTING, UNSHIELDED RESISTANCE HEATING, OPEN FLAMES, and HIGH INTENSITY LIGHT, as poisonous gases are produced.
- * **Trichloroethylene** must be stored to avoid contact with CHEMICALLY ACTIVE METALS (such as ALUMINUM, POTASSIUM, SODIUM, MAGNESIUM and ZINC); NITRIC ACID; and REDUCING AGENTS since violent reactions occur.
- * **Trichloroethylene** is not compatible with OXIDIZING AGENTS (such as PERCHLORATES, PEROXIDES, PERMANGANATES, CHLORATES, NITRATES, CHLORINE, BROMINE and FLUORINE).
- * **Trichloroethylene** in contact with STRONG BASES (such as SODIUM HYDROXIDE and POTASSIUM HYDROXIDE) results in the evolution of spontaneously flammable and explosive *Dichloroacetylene*.
- * Store in tightly closed containers in a cool, well-ventilated area away from SUNLIGHT and MOISTURE.

QUESTIONS AND ANSWERS

- Q: If I have acute health effects, will I later get chronic health effects?
- A: Not always. Most chronic (long-term) effects result from repeated exposures to a chemical.
- Q: Can I get long-term effects without ever having short-term effects?
- A: Yes, because long-term effects can occur from repeated exposures to a chemical at levels not high enough to make you immediately sick.
- Q: What are my chances of getting sick when I have been exposed to chemicals?
- A: The likelihood of becoming sick from chemicals is increased as the amount of exposure increases. This is determined by the length of time and the amount of material to which someone is exposed.
- Q: When are higher exposures more likely?
- A: Conditions which increase risk of exposure include physical and mechanical processes (heating, pouring, spraying, spills and evaporation from large surface areas such as open containers), and "confined space" exposures (working inside vats, reactors, boilers, small rooms, etc.).
- Q: Is the risk of getting sick higher for workers than for community residents?
- A: Yes. Exposures in the community, except possibly in cases of fires or spills, are usually much lower than those found in the workplace. However, people in the community may be exposed to contaminated water as well as to chemicals in the air over long periods. This may be a problem for children or people who are already ill.
- Q: What are the likely health problems from chemicals which cause mutations?
- A: There are two primary health concerns associated with mutagens: (1) cancers can result from changes induced in cells and, (2) adverse reproductive and developmental outcomes can result from damage to the egg and sperm cells.
- Q: Don't all chemicals cause cancer?
- A: No. Most chemicals tested by scientists are not cancer-causing.
- Q: Should I be concerned if a chemical causes cancer in animals?
- A: Yes. Most scientists agree that a chemical that causes cancer in animals should be treated as a suspected human carcinogen unless proven otherwise.

- Q: But don't they test animals using much higher levels of a chemical than people usually are exposed to?
- A: Yes. That's so effects can be seen more clearly using fewer animals. But high doses alone don't cause cancer unless it's a cancer agent. In fact, a chemical that causes cancer in animals at high doses could cause cancer in humans exposed to low doses.

The following information is available from:

New Jersey Department of Health and Senior Services
Occupational Health Service
PO Box 360
Trenton, NJ 08625-0360
(609) 984-1863
(609) 292-5677 (fax)

Web address: <http://www.state.nj.us/health/eoh/odisweb/>

Industrial Hygiene Information

Industrial hygienists are available to answer your questions regarding the control of chemical exposures using exhaust ventilation, special work practices, good housekeeping, good hygiene practices, and personal protective equipment including respirators. In addition, they can help to interpret the results of industrial hygiene survey data.

Medical Evaluation

If you think you are becoming sick because of exposure to chemicals at your workplace, you may call personnel at the Department of Health and Senior Services, Occupational Health Service, who can help you find the information you need.

Public Presentations

Presentations and educational programs on occupational health or the Right to Know Act can be organized for labor unions, trade associations and other groups.

Right to Know Information Resources

The Right to Know Infoline (609) 984-2202 can answer questions about the identity and potential health effects of chemicals, list of educational materials in occupational health, references used to prepare the Fact Sheets, preparation of the Right to Know survey, education and training programs, labeling requirements, and general information regarding the Right to Know Act. Violations of the law should be reported to (609) 984-2202.

DEFINITIONS

ACGIH is the American Conference of Governmental Industrial Hygienists. It recommends upper limits (called TLVs) for exposure to workplace chemicals.

A **carcinogen** is a substance that causes cancer.

The **CAS number** is assigned by the Chemical Abstracts Service to identify a specific chemical.

A **combustible** substance is a solid, liquid or gas that will burn.

A **corrosive** substance is a gas, liquid or solid that causes irreversible damage to human tissue or containers.

DEP is the New Jersey Department of Environmental Protection.

DOT is the Department of Transportation, the federal agency that regulates the transportation of chemicals.

EPA is the Environmental Protection Agency, the federal agency responsible for regulating environmental hazards.

A **fetus** is an unborn human or animal.

A **flammable** substance is a solid, liquid, vapor or gas that will ignite easily and burn rapidly.

The **flash point** is the temperature at which a liquid or solid gives off vapor that can form a flammable mixture with air.

HHAG is the Human Health Assessment Group of the federal EPA.

IARC is the International Agency for Research on Cancer, a scientific group that classifies chemicals according to their cancer-causing potential.

A **miscible** substance is a liquid or gas that will evenly dissolve in another.

mg/m³ means milligrams of a chemical in a cubic meter of air. It is a measure of concentration (weight/volume).

MSHA is the Mine Safety and Health Administration, the federal agency that regulates mining. It also evaluates and approves respirators.

A **mutagen** is a substance that causes mutations. A **mutation** is a change in the genetic material in a body cell. Mutations can lead to birth defects, miscarriages, or cancer.

NAERG is the North American Emergency Response Guidebook. It was jointly developed by Transport Canada, the United States Department of Transportation and the Secretariat of Communications and Transportation of Mexico. It is a guide for first responders to quickly identify the specific or generic hazards of material involved in a transportation incident, and to protect themselves and the general public during the initial response phase of the incident.

NCI is the National Cancer Institute, a federal agency that determines the cancer-causing potential of chemicals.

NFPA is the National Fire Protection Association. It classifies substances according to their fire and explosion hazard.

NIOSH is the National Institute for Occupational Safety and Health. It tests equipment, evaluates and approves respirators, conducts studies of workplace hazards, and proposes standards to OSHA.

NTP is the National Toxicology Program which tests chemicals and reviews evidence for cancer.

OSHA is the Occupational Safety and Health Administration, which adopts and enforces health and safety standards.

PEOSHA is the Public Employees Occupational Safety and Health Act, a state law which sets PELs for New Jersey public employees.

ppm means parts of a substance per million parts of air. It is a measure of concentration by volume in air.

A **reactive** substance is a solid, liquid or gas that releases energy under certain conditions.

A **teratogen** is a substance that causes birth defects by damaging the fetus.

TLV is the Threshold Limit Value, the workplace exposure limit recommended by ACGIH.

The **vapor pressure** is a measure of how readily a liquid or a solid mixes with air at its surface. A higher vapor pressure indicates a higher concentration of the substance in air and therefore increases the likelihood of breathing it in.

RESPIRATORY PROTECTION PROGRAM

1.0 PURPOSE

The standard established uniform guidelines for complying with the requirements of the Occupational Safety and Health Administration (OSHA) for Respiratory Protection, Title 29, Part 1910, Section 134 of the Code of Federal Regulations, and provides organization-wide procedures for the proper selection, use and care of respiratory protective equipment.

2.0 SCOPE

This standard applies to all Langan projects with which there is a potentially elevated airborne exposure above regulatory permissible exposure limits.

3.0 POLICY

Every consideration will be given to the use of effective administrative and engineering controls to eliminate or reduce exposure to respiratory hazards to the point where respirators are not required in controlling toxic substances, appropriate respiratory protective equipment will be provided by the company at no charge to the employee.

Respiratory protective devices will be appropriate for the hazardous material(s) involved, and the extent and nature of the work requirements and conditions.

Employees required to use respirators will be properly fitted, appropriately tested, medically screened, and thoroughly trained in their use.

4.0 CODES AND REGULATIONS

General applicability of Codes and Regulations. Except to the extent that requirements that are more stringent are written directly into this standard, all applicable codes and regulations have the same force and effect as if copied directly into this standard.

FEDERAL REGULATIONS: Those standards governing the development of this program include, but are not limited to, the following:

Asbestos Regulations - Industrial

Title 29, Part 1910 Section 1001 of the Code of Federal Regulations

Asbestos Regulations - Construction

Title 29, Part 1926, Section 1101 of the Code of Federal Regulations

Lead Regulations - Construction

**HASP
RESPIRATORY PROTECTION PROGRAM**

Title 29, Part 1926, Section 62 of the Code of Federal Regulations

Respiratory Protection

Title 29, Part 1910, Section 134 of the Code of Federal regulations, as revised April 8, 1998.

Access to Employee Exposure and Medical Records

Title 29, Part 1910, Section 20 of the Codes of Federal Regulations

NIOSH Approvals for Respirators

Title 42 CFR 84, of the Code of Federal Regulations, as revised April 8, 1998.

American National Standards Institute (ANSI)

American National Standard: Practices for respiratory Protection, Z88, 2-1980, revised 1992.

5.0 DESIGNATION OF ADMINISTRATOR

The designated program administrator if the Corp. Safety Officer who has the responsibility for implementation of, and the adherence to, the provisions of this respiratory protection program. The Corp. Safety Officer will designate a person who is responsible for the enforcement of the program at each job site. This will be the site supervisor/foreman or on-site safety representative.

In order to comply with OSHA's competent person requirements, the person designated must have two qualifications. He or she must have experience in identifying and controlling exposures, and authority to promptly prevent and correct hazardous conditions.

6.0 PURCHASE OF APPROVED EQUIPMENT

In order to comply with the provisions of OSHA's Standard on Respiratory Protection, 29 CFR 1910.134, all respiratory protective equipment purchased by Langan will have been tested by the National Institute of Occupational Safety and Health (NIOSH) and will carry a joint NIOSH/MSHA approval number for that specific respirator assembly. All respiratory protective equipment purchased after October 8, 1998 will have been tested by NIOSH and will carry a NIOSH specified approval number for that specific respirator assembly.

7.0 RESPIRATORY SELECTION

In selecting the correct respirator for a given circumstance the following factors must be taken into consideration:

Nature of the Hazard - In order to make subsequent decisions, the nature of the hazard must be identified to ensure that an over exposure does not occur. These include oxygen deficiency, physical properties of the hazard, actual concentrations of the toxic substances, the Permissible Exposure Limits (PEL), and the warning characteristics.

*U:\DATA5\170121501\OFFICE DATA\REPORTS\PHASE II WORK PLAN\HASP\APPENDICES\APPENDIX_H
RESPIRATORY PROTECTION PROGRAM.DOC*

**HASP
RESPIRATORY PROTECTION PROGRAM**

Nature of the Hazardous Operations - For proper respirator selection, it is necessary to know the details of the operations which require employees to use devices. These include operations or process characteristics, and work characteristics which may necessitate alternate respirator selection.

Location of the Hazardous Area - This is important in the selection process so that a backup system may be planned, if necessary. Respirable or emergency operations may be planned.

Time Respiratory Protection is Required - The length of time a respirator will have to be worn by an employee is a factor which must be evaluated. This is most pronounced when using SCBA equipment where, by definition, the air supply is limited. However, time is also a factor during routine use of air purifying respirators when the employee's breathing and comfort become affected by clogged filter cartridges which may need changing.

Employee's Health - Effective usage of a respirator is dependent on an individual's ability to wear a respirator as determined by a physician. Most respiratory devices increase physical stress on the body, especially the heart and lung. Care should be taken to ensure that medical determination has been made that an individual is capable of wearing a respirator for the duration of the work assignment (See Section 11.0 of the Standard).

Work Activity - The type of work activities to be performed while wearing a respirator is vitally important in the respirator selection. The proper respirator will be one which is least disruptive to the task being conducted, yet providing the desired protection.

Respirator Characteristics, Capabilities, and Limitations - The tables in Exhibits 1 and 2 have been reproduced from ANSI Z99.2-1992. They provide a description of various respirator characteristics, capabilities, and limitations.

Protection Factors - The protection afforded by respirators is dependent upon the seal of the face piece to the face. The degree of protection may be ascertained and a relative safety factor as designed. Protection factors are only applicable if all elements of an effective respirator program are in place and being enforced.

7.1 SELECTION

Where respirators are used, Langan, will select and provide, at no cost to the employees, the appropriate respirator, as specified in the following charts, and will ensure that the employee uses the respirator provided.

Exhibit 3 - Selection Chart for Routine Respirator Use

7.2 COMFORT

Once the type of respirator has been selected, that is applicable and suitable for the purpose intended, the selection process should give consideration to the fit and comfort of the respirator.

The employee should be given the opportunity to select a respirator which provides the most comfortable fit. Since each respirator represents a different size and shape, a respirator which fits better during selection will provide better protection after fit testing. For this purpose, the employee should be shown how to access a comfortable device and should eliminate those which are obviously ill fitting.

*U:\DATA5\170121501\OFFICE DATA\REPORTS\PHASE II WORK PLAN\HASP\APPENDICES\APPENDIX_H
RESPIRATORY PROTECTION PROGRAM.DOC*

**HASP
RESPIRATORY PROTECTION PROGRAM**

An assessment of comfort should include the following points:

Chin properly placed	Fit across nose bridge
Positioning of mask on nose	Room for safety glasses
Strap tension	Distance from nose to bridge
Room to talk	Tendency to slip
Cheeks filled out	Hindrance to movement

8.0 ISSUANCE OF EQUIPMENT

When practical, respirators should be assigned to individual employees for their exclusive use and labeled for identification in such a way as not to affect the performance of the respirator.

8.1 FITTING

After the employee has been shown how to assess a respirator, he/she should be shown how to don a respirator, how it should be positioned on the face, how to set strap tension, and how to determine a proper fit.

Note: The instruction should take the form of a review and should not be considered the employee's formal training.

The employee should hold each face piece up to the face and eliminate those which obviously do not give a comfortable or proper fit. Normally, fitting should start with a half-face mask and if a good fit cannot be found, the employee should then try a full-face mask.

8.2 FAMILIARIZATION

Once the proper fitting respirator has been selected, the employee should don the device, adjusting the face piece and tension straps. He/she should wear the mask for as least five minutes before taking it off and putting it on several times, adjusting the straps each time to become familiar with the respirator and adept at setting the proper tension on the straps.

**HASP
RESPIRATORY PROTECTION PROGRAM**

8.3 FIT-TESTING REQUIREMENTS

OSHA requires that respirators be fitted properly and that they be tested for their face piece to face seal. There are currently two methods acceptable for conducting these tests. Qualitative and Quantitative Fit Testing. The Qualitative method is a fast, easily conducted test that can be performed almost anywhere, while the Quantitative method requires the use of bulky test chambers and very expensive electronic equipment. The Qualitative method applies only to negative pressure non-powered air-purifying respirators. Due to numerous field locations in which fit testing must be accomplished the Qualitative fit test shall be utilized throughout Langan's organization.

Qualitative fit testing is based on the wearer's subjective response to the test agent of chemical of which the two most popular tests are: the odorous vapor test, and the taste test. (See Exhibit 5 procedures). The following represents a brief summary of how to conduct each of these tests.

8.3.1 ODOROUS VAPOR TEST

The odorous vapor test relies on the respirator wearer's ability to detect odorous materials, usually isoamyl acetate saturated material around the outside of the respirator. If the wearer is unable to smell the chemical, then a satisfactory fit is assumed to be achieved.

When an air-purifying respirator is tested by this method, it should be equipped with an inorganic vapor cartridge which removes the test vapor from the air.

Note: This test is solely dependent upon the employee's honest response, there is no involuntary reaction. For that reason, it is the preferred test method.

8.3.2 TASTE TEST

The taste test relies upon the wearer's ability to detect a chemical substance, usually sodium saccharin, by tasting it inside the respirator. The test performed by placing an enclosure over the respirator wearer's head and shoulders, and spraying the test agent into the enclosure with a nebulizer. If the wearer is unable to taste the chemical, then a satisfactory fit is assumed to be achieved.

Note: This test is totally dependent on the wearer's honest indication of taste. There is no involuntary response and therefore is not preferred as the method of testing. When conducting this type of test, the person being tested must not be allowed to eat, drink, chew gum or tobacco, or smoke.

8.4 FIELD TEST

There are two tests that are used in the field to check the seal of the respirator. These are known as the positive and negative pressure sealing tests. Each of these two tests must be performed every time a respirator is put on, and prior to entering a contaminated area.

**HASP
RESPIRATORY PROTECTION PROGRAM**

Note: Although both the positive and negative pressure tests are considered essential to a good respiratory protection program and should always be used prior to entering an area of exposure, they are recognized solely as a field test and cannot be substituted for the qualitative fit test.

8.4.1 POSITIVE PRESSURE TEST

1. This test only applies to those respirators which have an exhalation valve which can be blocked. The exhalation valve may have to be removed for the test.
2. Close or block off at the exhalation valve.
3. Exhale gently into face pieces.
4. If a slight pressure is built up, with no apparent outward leakage around face pieces to face, seal is assumed to be satisfactory.

8.4.2 NEGATIVE PRESSURE TEST

1. Close the inlet opening or hose of the respirator face pieces with the hand(s), tape or the other means.
2. Inhale gently so that the face pieces collapse slightly and hold the breath for ten seconds.
3. If the face piece remains slightly collapsed and no inward leakage occurs, then the face piece to seal is assumed satisfactory.

8.5 RECORD KEEPING OF TEST RESULTS

A summary of the test results for each employee on whom a qualitative fit test was conducted will be documented on the Respirator Test Summary (See Exhibit 6). This record will then become a part of the employee's medical record and will be retained for the same time period as the medical records.

9.0 TRAINING

Respirators will not be issued to individuals (including company officials, subcontractors, or visitors) who have not received appropriate training and medical clearance.

9.1 TRAINING PROGRAM

The extent and frequency of employee *training depends primarily on the nature and extent of the hazard*. As a minimum, all employees and supervisory personnel will be trained in basic respirator practices. It must be remembered that respirators are effective only when they are acceptable to the employee and worn properly by him/her. Because proper use depends especially upon the wearer's motivation, it is important that the need for the respirator be explained fully.

The basic respirator-training program must include:

***U:\DATA5\170121501\OFFICE DATA\REPORTS\PHASE II WORK PLAN\HASP\APPENDICES\APPENDIX_H
RESPIRATORY PROTECTION PROGRAM.DOC***

**HASP
RESPIRATORY PROTECTION PROGRAM**

- § A discussion of the nature of airborne contaminants against which the employee must be protected and why engineering and/or administrative controls have not been effective in controlling exposure to the point where respirators are not required.
- § A discussion of why the respirator, which has been selected for this job, is the proper device for this particular purpose.
- § Instruction on the respirator's limitations, emphasizing such things as oxygen deficiency, toxic contaminants which are immediately dangerous to life or health, and the need for changing filter cartridges when indicated to do so by testing, or when breathing resistance increases to an uncomfortable level.
- § Instructions on how to inspect the respirator and ensure that it is in proper working condition.
- § Instructions on how to put on a respirator, how it should be positioned on the face, how to set strap tension and how to wear the respirator comfortably.
- § Instructions on the method of fit-testing used and the proper way to conduct positive and negative pressure test each time the respirator is put on. During this instruction, the wearer must be made to understand that the respirator cannot be used when conditions prevent a satisfactory face piece to face seal. If this condition cannot be corrected, the employee cannot be allowed into the area requiring the use of a respirator.
- § Instructions in the proper care and maintenance of the respirator.
- § A discussion on the value of medical surveillance and air sample exposure monitoring.
- § Field training to recognize and cope with any type of emergency while using the respirator.

9.2 RESPIRATOR TRAINING RECORD

Upon completion of the basic respirator training program, the employee will be required to read and sign the Respirator Training Record (See Exhibit 5) attesting to the fact that they have received the basic training program and feel confident in their ability to use the respirator properly. The signed and dated Respiratory Training Record will then become part of the employee's medical records and will be retained for the same period of time as those records.

10.0 CARE AND MAINTENANCE

Personnel involved in respirator maintenance must be thoroughly trained. Substitution of parts from different brands or type of respirators invalidate approval of the device. Repairs and adjustments should never be made beyond the manufacturer's recommendations.

**HASP
RESPIRATORY PROTECTION PROGRAM**

10.1 CLEANING THE RESPIRATOR

Respirators must be cleaned and disinfected after each day's use when they are assigned to one individual or after each use if they are assigned to more than one person. The following procedures are recommended for cleaning and disinfecting the respirator:

- § If required, remove and discard filters or cartridges.
- § Wash face piece and breathing tube in detergent and warm water (120⁰F) or cleaner/disinfectant solution. Use a soft brush to facilitate removal of dirt. Cleaner/disinfectant solutions are available from respirator manufacturers or it can be made using a solution of water and household chemicals such as two tablespoons of chlorine bleach to one gallon of water or one teaspoon or tincture of iodine solution is sufficient for disinfecting. Do not use an alcohol-based solution to clean and disinfect a respirator face piece.
- § Rinse completely in clean warm water.
- § Air-dry in clean air.
- § Clean out other parts, as recommended by the manufacturer.
- § Inspect the valves, head straps, and other parts - replace with new parts if defective.
- § Place face piece in a plastic bag or container for storage in an assigned area.
- § Insert new filters or cartridges prior to use, making sure the seals are tight.

10.2 STORING THE RESPIRATOR

When they are not being used, respirators should be individually sealed in plastic bags and stored at convenient locations in order to protect them against dust, sunlight, extreme temperatures, excessive moisture, or damaging chemicals. They should be stored in such a way that the face piece and exhalation valve are not being distorted.

10.3 INSPECTING THE RESPIRATORS

All respirators should be inspected before and after use, and at least monthly by a competent person to assure that they are in satisfactory working condition. A general inspection checklist should include:

- § Tightness of connections
- § Conditions of face piece straps, connecting tubes, and cartridge
- § Condition of exhalation and inhalation valves: If the side of the exhalation valve gaps even slightly, it must be replaced with a new valve.

**HASP
RESPIRATORY PROTECTION PROGRAM**

§ Pliability and flexibility of rubber parts: Deteriorated rubber parts must be replaced, unused rubber parts should be worked, stretched and manipulated, with a massaging action.

§ Proper function of regulations and warning devices

Respiratory protection is no better than the condition of the respirator in use, even though it is worn conscientiously. Frequently, random inspections must be conducted by a qualified individual to assure that the respirators are properly selected, fitted, used, cleaned, and maintained.

On the inside of the respirator face piece, the manufacturer is required to affix a stamp indicating the production date of the face piece. Respirator face pieces have a life expectancy of three years, therefore, face pieces should be replaced after every three years of use.

Note: For a detailed respirator checklist, refer to the Respirator Inspection Chart in Exhibit 7.

10.4 CARE AND MAINTENANCE RECORDS

A written record should be maintained of the Care and Maintenance program within each individual company. Information contained on this record should include inspection reports, replacement parts used, dates of repair, cleaning and type of disinfectant used and the names of persons doing the work. The respirator should be identified by manufacturer, model, and approval number. Records should be retained for a period of five years.

11.0 MEDICAL REQUIREMENTS

Employees of Langan will not be assigned to tasks requiring the use of a respirator unless it has been determined that they are physically able to perform work, and use the respirator.

11.1 MEDICAL EXAMINATIONS

Employees who are working at or above the Action Level¹ of a toxic substance for thirty (30) days or more per year, or who are using a negative pressure respirator, will be required to undergo a medical evaluation of the following frequency:

§ Prior to assignment of a respirator for those employees who will be issued a negative pressure respirator.

§ At least annually thereafter.

Each procedure of the medical examination and evaluation will be performed by or under the supervision of a licensed physician and will include, as a minimum, a chest x-ray both posterior and anterior, a medical and

¹ There is no Action level associated with asbestos exposure, therefore, workers assigned to asbestos work areas will be issued respirators independent of employee exposure levels.

**HASP
RESPIRATORY PROTECTION PROGRAM**

work history and special emphasis directed to the pulmonary, cardiovascular, and gastrointestinal systems to determine the presence of any possible respiratory diseases. A pulmonary function test which will include both the maximum amount of air that can be expired from the lungs after full inhalation (FVC) and maximum amount of air forcibly expired in one second after exhalation (FEV10).

The only exception to this requirement, for an initial medical examination, is if the employee or company can provide adequate records/documentation to show that he/she has been examined in accordance with the provision of this program within the past one (1) year period.

11.2 MEDICAL FORMS

When conducting the initial medical examination, the standard medical questionnaire must be used. During the annual re-examination, the abbreviated standardized medical questionnaire should be used.

In addition to the standardizing questionnaires, the physician must also be furnished with a copy of the latest OSHA standards governing the type of exposure the employee will be involved in. A description of the employee's duties as they relate to the exposure, the anticipated exposure level, a description of the respiratory protection equipment to be used, and any available information from the previous medical examinations of the employee must also be furnished to the physician.

At the conclusion of the examination, the physician will submit a written opinion to Langan. This will contain the results of the examination, and conditions discovered by the physician that will prohibit the employee from using a respirator and any recommendations from the physician regarding the employee's limitations. It will also contain a statement from the physician that he/she has informed the employee of the results of the examination. A copy of the physician's opinion must be furnished to the employee by the company within thirty (30) days of its receipt by the company.

11.3 MAINTENANCE RECORDS

All records pertaining to the employee's medical examination must be retained for a period of thirty (30) years.

12.0 WORK AREA SURVEILLANCE

As of October 8, 1998, the Respiratory Protection Standard 29 CFR 1910.134, requires the employer to monitor the continued effectiveness and appropriateness of the respirators selected for a particular work area. This includes identification of work area containment(s), the nature of the hazards, concentration at the breathing zone and, if appropriate, biological monitoring. The industrial hygienist who is conducting the air sampling should carefully document any apparent deficiencies in surveillance necessary to the respirator program.

**HASP
RESPIRATORY PROTECTION PROGRAM**

13.0 VOLUNTARY USE OF RESPIRATORS²

Langan will periodically perform Negative Exposure Assessments (NEA) in order to document worker exposure and ensure the proper selection of respirators. If the NEA indicates that a specific work practice does not require the use of respirators, then the employees assigned to such tasks will not be issued respirators. However, if employees voluntarily decide to wear respirators, they must participate in the Langan Medical Surveillance Program.

14.0 PROGRAM EVALUATION

The program administration should periodically assess the effectiveness of the respiratory protection program during all phases of operation in which respiratory protection is being used. Frequent walk-through inspections during these activities should be conducted to monitor and document supervisor and worker compliance with the requirements of the program. In addition to specific evaluations of the respirator cleaning, inspection, maintenance, desired results of these operations are consistently achieved.

15.0 VIOLATION AND DISCIPLINARY ACTION

Due to Langan's heavy involvement in various industrial facilities, respiratory protection is a crucial part of the company's overall safety program. As such, mandatory compliance with all aspects of this program, by those employees required to use a respirator, is a condition of continuing employment.

15.1 Disciplinary Action

When it has come to the attention of a supervisor that an employee has deliberately removed his/her respirator or broken the face piece to the seal while in the contaminated area, the employee will be immediately suspended from work and instructed to leave the job site pending a final disposition. Random spot checks will be conducted to determine the effectiveness of the employee's fit test. Should the check, which will be a positive or negative pressure test conducted under the direction of a supervisor, indicated that the employee's respirator does not have satisfactory seal, the employee will be advised accordingly and instructed to leave the contaminated area. A written citation will be issued to the employee the first time he/she fails a random check. Two such citations on the same job will be sufficient cause for dismissal.

16.0 REPORTING RESPIRATOR PROBLEMS

Occasionally, the company may find a defect in the design or performance of a respirator. The best course to follow is to report these findings to the administrator of the company's respiratory protection program, which in turn, should report to Langan's Safety Officer. The respirator carries with it the approval of the National Institute of Occupational Safety and Health (NIOSH), the Corporate Safety Officer will report the findings to the respirator's manufacturer and to NIOSH.

² As of October 8, 1998, Respiratory Protection Programs must include provisions for voluntary use of respirators.

***HASP
RESPIRATORY PROTECTION PROGRAM***

This will be done by notifying the manufacturer of the defect in a report format and forwarding a copy of the report to NIOSH. The report will include the following:

- § The name, address, and telephone number of Langan
- § The name of the respirator's manufacturer
- § Model number of the respirator
- § The name and part number (if possible) of the defective part
- § A brief description of the respirator's use when the defect was discovered
- § A description of the defect
- § A description of the defects adverse effect on the respirator's performance

This report should be addressed to the NIOSH Division of Safety Research, testing and Certification Branch, 944 Chestnut Ridge Road, Morgan Town, West Virginia 26595.

EXHIBIT 1

CLASSIFICATION AND DESCRIPTION OF RESPIRATOR BY MODE OF OPERATION

1.0 ATMOSPHERE-SUPPLYING RESPIRATORS

A respirable atmosphere independent of the ambient air is supplied to the wearer.

Self-Contained Breathing Apparatus (SCBA). A supply of oxygen, or oxygen-generating material is carried by the wearer. Normally equipped with full-face piece, but may be equipped with a quarter-mask face piece, half-mask, helmet, hood or mouthpiece, and nose clamp.

1.1 CLOSED-CIRCUIT SCBA (Oxygen only, negative pressure or positive pressure)

1.1.1 COMPRESSED OR LIQUID OXYGEN TYPE

Equipped with a face piece or mouth piece and nose clamp. High-pressure oxygen from a gas cylinder passes through a high pressure-reducing valve and, in some designs, through a low-pressure admission valve to a breathing bag or container. Liquid oxygen is converted to low pressure gaseous oxygen and delivered to the breathing bag. The wearer inhales from the bag, through a corrugated tube connected to a mouthpiece or face piece and a one way check valve. Exhaled air passed through check valve and tube into a container of carbon dioxide removing chemical or as the bag deflates sufficiently to actuate an admission valve. A pressure-relief system is provided; and a manual bypass system and saliva trap may be provided depending upon the design.

1.1.2 OXYGEN-GENERATING TYPE

Equipped with a face piece or mouth piece and nose clamp. Water vapor in the exhaled breath reacts with chemicals in the canister to release oxygen to the breathing bag. The wearer inhales from the bag through a corrugated tube and one-way check valve at the face piece. Exhaled air passes through a second check valve breathing tube assembly into the canister. The oxygen-release rate is governed by the volume of exhaled air. Carbon dioxide in the exhaled breath is removed by the canister fill.

1.2 OPEN-CIRCUIT SCBA (Compressed air, compressed oxygen, liquid air, liquid oxygen).

A bypass system is provided in case of regulator failure, except on escape-type units.

1.2.1 DEMAND TYPE C

Equipped with a face piece or mouth piece and nose clamp. The demand valve permits oxygen or air flow only during inhalation. Exhaled breath passes to ambient atmosphere through a valve(s) in the face piece.

**HASP
RESPIRATORY PROTECTION PROGRAM**

1.2.2 PRESSURE-DEMAND TYPE D

Equipped with a face piece only. Positive pressure is maintained in the face piece. The apparatus may have provisions for the wearer to select the demand or pressure-demand mode of operation, in which case the demand mode should be used only when donning or removing the apparatus.

1.3. SUPPLIED-AIR RESPIRATOR

1.3.1 HOSE MASK

Equipped with a face piece, breathing tube, rugged safety harness, and a large diameter heavy-duty non-kinking air supply hose. The breathing tube and air-supply hose are securely attached to the harness. The face piece is equipped with an exhalation valve. The harness has provisions for attaching a safety line.

1.3.2 HOSE MASK WITH BLOWER

Air is supplied by a motor driven or hand operated blower. The wearer can continue to inhale through the hose if the blower fails. Up to 200 feet (91 meters) of hose length is permissible.

1.3.3 HOSE MASK WITHOUT BLOWER

The wearer provides motivating force to pull air through the hose. The hose inlet is anchored and filled with a funnel or like object covered with a fine mesh screen to prevent entrance of coarse particulate matter. Up to 75 feet (23 meters) of hose length permissible.

1.4. AIR-LINE RESPIRATOR

Respirable air is supplied through a small diameter hose from a compressor or compressed air cylinder(s). The hose is attached to the wearer by a belt or other suitable means and can be detached readily in an emergency. A flow-control valve or orifice is provided to govern the rate of air to the wearer. Exhaled air passes to the ambient atmosphere through a valve(s) or opening(s) in the enclosure (face piece, helmet, hood or suit). Up to 300 feet (91 meters) of hose length is permissible.

1.4.1 CONTINUOUS-FLOW CLASS

Equipped with a face piece, hood, helmet, or suit. At least 115 liters (4 cubic feet) of air per minute to light-fitting face pieces and 170 liters (6 cubic feet) of air per minute to loose-fitting helmets, hoods, and suits are required. Air is supplied to a suit through a system of internal tubes to the head, trunk, and extremities through valves located in appropriate parts of then suit.

1.4.2 DEMAND TYPE C

Equipped with a face piece only. The demand valve permits the flow of air only during inhalation.

**HASP
RESPIRATORY PROTECTION PROGRAM**

1.4.3 PRESSURE-DEMAND TYPE D

Equipped with a face piece only. A positive pressure is maintained in the face piece.

1.4.4 COMBINATION AIR-LINE RESPIRATORS WITH AUXILIARY SELF-CONTAINED AIR SUPPLY

Include an airline respirator with an auxiliary self-contained air supply. To escape from a hazardous atmosphere in the event the primary air supply fails to operate, the wearer switches to the auxiliary self-contained air supply. Devices approved for both entry into and escape from dangerous atmospheres have a low-pressure warning alarm and contain at least 15-minute self-contained air supply.

1.4.5 COMBINATION ATMOSPHERE-SUPPLY AND AIR-PURIFYING RESPIRATORS

Provide the wearer with the option of using either of two different modes of operation:

1. An atmosphere-supplying respirator with an auxiliary air purifying attachment which provides protection in the event the air supply fails; or
2. An air-purifying respirator with an auxiliary self-contained air supply which is used when the atmosphere may exceed safe conditions for use of an air-purifying respirator.

2.0 AIR-PURIFYING RESPIRATORS

Ambient air, prior to being inhaled, is passed through a filter, cartridge or canister which removes particles, vapors, gases, or a combination of these contaminants. The breathing action of the wearer operates the non-powered type of respirator. The power type contains a blower - stationary or carried by the wearer - which passes ambient air through an air-purifying component and then supplies purified air to the respirator inlet covering.

The non-powered type is equipped with a face piece or mouth piece and nose clamp. The powered type is equipped with a face piece, helmet, hood, or suit.

2.1. VAPOR - AND GAS - REMOVING RESPIRATOR

Equipped with cartridge(s) or canister(s) to remove a single vapor or gas (for example, chlorine gas), a single class of vapors or gases (for example: dust and fume), from air. Filter may be a replaceable part of a permanent part of the respirator. Filter may be the single-use or the reusable type.

2.2. PARTICULATE-REMOVING RESPIRATORS

Equipped with filter(s) to remove a single type of particulate matter (for example: dust), or a combination of two or more types of particulate matter (for example: dust and fume), from air. Filter may be a replaceable part of a permanent part of the respirator. Filter may be the single-use or the reusable type.

HASP
RESPIRATORY PROTECTION PROGRAM

2.3. COMBINATION PARTICULATE - AND VAPOR - AND GAS - REMOVING RESPIRATOR

Equipped with cartridge(s) or canister(s) to remove particulate matter, vapors, and gases from air. The filter may be a permanent part, or replacement part of a cartridge or canister.

- A. Device procedures negative pressure on respiratory inlet covering during inhalation
- B. Device procedures positive pressure on respiratory inlet covering during both inhalation and exhalation.
- C. Equipped with a demand valve that is activated on initiation of inhalation and permits the flow of breathing atmosphere to the face piece. On exhalation, pressure in the face piece becomes positive and the demand valve is deactivated.
- D. A positive pressure is maintained in the face piece by a spring loaded or balanced regulator and exhalation valve.

**HASP
RESPIRATORY PROTECTION PROGRAM**

EXHIBIT 2

CAPABILITIES OF RESPIRATORS

1.0 ATMOSPHERE-SUPPLYING RESPIRATORS

Atmosphere-supplying respirators provide protection against deficiency and toxic atmospheres. The breathing atmosphere is independent of ambient atmospheric conditions.

1.1. GENERAL LIMITATION

Except for some airline suits, no protection is provided against skin irritation by material such as ammonia and hydrogen chloride, or against sorption of materials such as hydrogen cyanide, tritium, or organic phosphate pesticides through the skin. Face pieces present special problems to individuals required to wear prescriptive lenses (See 9.1). Use of atmosphere-supplying respirators in atmospheres immediately dangerous to life or health is limited to specific devices under specified conditions (See Table 5 and 9.3 and 9.4).

1.2. SELF CONTAINED BREATHING APPARATUS (SCBA)

The wearer carries his/her own breathing atmosphere.

1.2.1. LIMITATIONS

The period over which the device will provide protection is limited by the amount of air or oxygen in the apparatus, the ambient atmospheric pressure (service life of open-circuit devices is cut in half by a doubling of the atmospheric pressure), and the type of work being performed. Some SCBA devices have a short service life (less than 15 minutes) and are suitable only for escape (self-rescue) from an irrespirable atmosphere.

Chief limitations of SCBA devices are their weight or bulk, or both, limited service life, and the training required for their maintenance and safe use.

1.3. CLOSED-CIRCUIT SCBA

The closed-circuit operation conserves oxygen and permits longer service life at reduced weight. The negative pressure type produces a negative pressure in the respiratory -inlet covering during inhalation, and this may permit leakage of contaminants, whereas the positive pressure type always maintains a positive pressure in the respiratory-inlet covering, and is less apt to permit inward leakage of contaminants.

1.3.1. OPEN-CIRCUIT SCBA

The demand type produces a negative pressure in the respiratory-inlet covering during inhalation, whereas the pressure-demand type maintains a positive pressure in the respiratory-inlet covering during inhalation, and is less apt to permit inward leakage of contaminants.

**HASP
RESPIRATORY PROTECTION PROGRAM**

1.3.2. SUPPLIED-AIR RESPIRATORS

The respirable air supply is not limited to the quantity the individual can carry, and the devices are lightweight and simple.

1.3.2.1 LIMITATIONS

Limited to use in atmospheres from which the wearer can escape unharmed without the aid of the respirator. The wearer is restricted in movement by the hose and must return to a respirable atmosphere by re-tracing his/her route of entry. The hose is subject to being severed or pinched off.

1.4. HOSE MASK

The hose inlet or blower must be located and secured in a respirable atmosphere.

1.4.1. HOSE MASK WITH BLOWER

If the blower fails, the unit still provides protection, although a negative pressure exists in the face piece during inhalation.

1.4.2. HOSE MASK WITHOUT BLOWER

Maximum hose length may restrict application of device.

1.5. AIR-LINE RESPIRATOR (Continuous Flow, Demand, and Pressure-Demand Types)

The demand type produces a negative pressure in the face piece on inhalation, whereas continuous-flow and pressure-demand types maintain a positive pressure in the respiratory-inlet covering and are less apt to permit inward leakage of contaminants. Airline suits may protect against atmospheres that irritate the skin or that may be absorbed through unbroken skin.

1.5.1. LIMITATIONS

Airline respirators provide no protection if the air supply fails. Some contaminants, such as tritium, may penetrate the material of an airline suit and limit its effectiveness. Other contaminants, such as fluorine, may react chemically with the material on an airline suit and damage it.

1.5.2. COMBINATION AIR-LINE RESPIRATORS WITH AUXILIARY SC AIR SUPPLY

The advantages and disadvantages, expressed above, of the mode of operation being used will govern. The mode with greater limitations (air-purifying mode) will mainly determine the overall capabilities and limitation of the respirator, since the wearer may for some reason fail to change the mode of operation even though conditions would require such a change.

**HASP
RESPIRATORY PROTECTION PROGRAM**

2.0 AIR-PURIFYING RESPIRATORS

2.1. GENERAL LIMITATIONS

Air purifying respirators do not protect against oxygen-deficient atmospheres, or against skin irritations by, or sorption through the skin, of airborne contaminants. The maximum contaminant concentration against which an air-purifying respirator will protect is determined by the design efficiency and capacity of the cartridge, canister, or filter, and face piece-to-face seal on the user. For gases and vapors, the maximum concentration for which the air-purifying element is designated is specified by the manufacturer or is listed on labels of cartridges and canisters.

Non-powered air purifying will not provide the maximum design protection specified unless the face piece or mouth piece/nose clamp is carefully fitted to the wearer's face to prevent inward leakage (See 7.4). The time period over which protection is provided is dependent on canister, cartridge, or filter type; concentration of contaminant; humidity levels in the ambient atmosphere; and the wearer's respiratory rate.

The proper type of canister, cartridge, or filter must be selected for the particular atmosphere and conditions. Non-powered air-purifying respirators may cause discomfort, due to noticeable resistance to inhalation. This problem is minimized in powered respirators. Respirators face piece present special problems to individual required to wear prescription lenses (See 9.1). These devices do have the advantage of being small, light, and simple in operation. Use of air-purifying respirators in atmosphere immediately dangerous to life or health is limited to specific devices under specific conditions (See Table 5 and 9.3 and 9.4).

2.2. VAPOR AND GAS-REMOVING RESPIRATORS

2.2.1. LIMITATIONS

No protection is provided against particulate contaminants. A rise in canister or cartridge temperature indicates that a gas vapor is being removed from the inspired air. An uncomfortably high temperature indicates a high concentration of gas or vapor and requires and immediate return to fresh air.

Use should be avoided in atmosphere where the contaminant(s) lacks sufficient warning properties (that is: odor, taste, or irritation at a concentration in air at or above the (permissible exposure limit). Vapor-and-gas-removing respirators are not approved for contaminants that lack adequate warning properties.

Not for use in atmospheres immediately dangerous to life or health unless the device is a powered-type respirator with escape provisions (See Table 5).

§ Full Face Piece Respirator provides protection against eye irritation, in addition to respiratory protection.

§ Quarter-mask and Half-mask Face Piece Respirator provides a fabric covering (facelet) available from some manufacturers shall not be used.

**HASP
RESPIRATORY PROTECTION PROGRAM**

§ Mouthpiece Respirator shall be used only for escape applications. Mouth breathing detection of contaminant by odor. Nose clamps must be securely in place to prevent nasal breathing.

§ Limitations include no protection is provided against particulate contaminants. A rise in canister or cartridge temperature indicates that a gas or vapor is being removed from the inspired air.

3.0 PARTICULATE-REMOVING RESPIRATORS

3.1. LIMITATIONS

Protection against non-volatile particles only. No protection against gases and vapors. Not for use in atmosphere immediately dangerous to life or health unless the device is a powered-type respirator with escape provisions (See Table 5).

3.1.1. FULL FACE PIECE RESPIRATOR

Provide protection against eye irritation, in addition to respiratory protection.

3.1.2. QUARTER-MASK AND HALF-MASK FACE PIECE RESPIRATOR

A fabric covering (facelet) available from some manufacturers shall not be used unless approved for use with respirator.

3.1.3. MOUTH PIECE RESPIRATOR

Shall be used only for escape application. Mouth breathing prevents detection of contaminant by odor. Nose clamp must be securely in place to prevent nasal breathing.

**3.2. COMBINATION PARTICULATE-AND-VAPOR-AND-GAS REMOVING
RESPIRATORS**

The advantages and disadvantages of the component sections of the combinations respirator as described above apply.

**HASP
RESPIRATORY PROTECTION PROGRAM**

EXHIBIT 3

SELECTION CHART FOR ROUTINE RESPIRATOR USE

Airborne Concentration of Contaminant	Required Respirator
< Permissible Exposure Limit (PEL) over 8-hour Time Weighted Average (TWA) ³	Respirators not required
≥ PEL but < 10 x PEL	Half-mask air-purifying respirator other than a disposable respirator, equipped with appropriate filter cartridge and/or canister.
≥ 10 x PEL but < 50 x PEL	Full-face piece air-purifying respirator other than a disposable respirator, equipped with appropriate filter cartridge and/or canister.
≥ 50 x PEL but < 100 x PEL	Full-face piece powered air-purifying respirator other than a disposable respirator, equipped with appropriate filter cartridge and/or canister. or Full-face piece supplied-air respirator operated in the continuous flow mode.
≥ 100 x PEL but < 1,000 x PEL	Full-face piece supplied-air respirator operated in the pressure demand mode.
≥ 1,000 x PEL or any unknown concentration	Full-face piece supplied-air respirator operated in the pressure demand mode equipped with a full-face piece self-contained supplied-air escape unit..

³ If at or above the Action Level (normally set at one-half the PEL), medical and employee exposure monitoring is required, as well as the issuance of proper respiratory protection.

**HASP
RESPIRATORY PROTECTION PROGRAM**

EXHIBIT 4

PROCEDURES FOR CONDUCTING A QUALITATIVE FIT-TEST

Part I. OSHA-Accepted Fit Test Protocols

A. Fit Testing Procedures -- General Requirements

The employer shall conduct fit testing using the following procedures. The requirements in this appendix apply to all OSHA-accepted fit test methods, both QLFT and QNFT.

1. The test subject shall be allowed to pick the most acceptable respirator from a sufficient number of respirator models and sizes so that the respirator is acceptable to, and correctly fits, the user.
2. Prior to the selection process, the test subject shall be shown how to put on a respirator, how it should be positioned on the face, how to set strap tension and how to determine an acceptable fit. A mirror shall be available to assist the subject in evaluating the fit and positioning of the respirator. This instruction may not constitute the subject's formal training on respirator use, because it is only a review.
3. The test subject shall be informed that he/she is being asked to select the respirator that provides the most acceptable fit. Each respirator represents a different size and shape, and if fitted and used properly, will provide adequate protection.
4. The test subject shall be instructed to hold each chosen facepiece up to the face and eliminate those that obviously do not give an acceptable fit.
5. The more acceptable facepieces are noted in case the one selected proves unacceptable; the most comfortable mask is donned and worn at least five minutes to assess comfort. Assistance in assessing comfort can be given by discussing the points in the following item A.6. If the test subject is not familiar with using a particular respirator, the test subject shall be directed to don the mask several times and to adjust the straps each time to become adept at setting proper tension on the straps.
6. Assessment of comfort shall include a review of the following points with the test subject and allowing the test subject adequate time to determine the comfort of the respirator:
 - (a) Position of the mask on the nose
 - (b) Room for eye protection
 - (c) Room to talk
 - (d) Position of mask on face and cheeks
7. The following criteria shall be used to help determine the adequacy of the respirator fit:
 - (a) Chin properly placed;

**HASP
RESPIRATORY PROTECTION PROGRAM**

- (b) Adequate strap tension, not overly tightened;
 - (c) Fit across nose bridge;
 - (d) Respirator of proper size to span distance from nose to chin;
 - (e) Tendency of respirator to slip;
 - (f) Self-observation in mirror to evaluate fit and respirator position.
7. The test subject shall conduct a user seal check, either the negative and positive pressure seal checks described in Appendix B-1 of this section or those recommended by the respirator manufacturer which provide equivalent protection to the procedures in Appendix B-1. Before conducting the negative and positive pressure checks, the subject shall be told to seat the mask on the face by moving the head from side-to-side and up and down slowly while taking in a few slow deep breaths. Another facepiece shall be selected and retested if the test subject fails the user seal check tests.
 8. The test shall not be conducted if there is any hair growth between the skin and the facepiece sealing surface, such as stubble beard growth, beard, mustache or sideburns which cross the respirator sealing surface.
 9. Any type of apparel which interferes with a satisfactory fit shall be altered or removed.
 10. If a test subject exhibits difficulty in breathing during the tests, she or he shall be referred to a physician or other licensed health care professional, as appropriate, to determine whether the test subject can wear a respirator while performing her or his duties.
 11. If the employee finds the fit of the respirator unacceptable, the test subject shall be given the opportunity to select a different respirator and to be retested.
 12. Exercise regimen. Prior to the commencement of the fit test, the test subject shall be given a description of the fit test and the test subject's responsibilities during the test procedure. The description of the process shall include a description of the test exercises that the subject will be performing. The respirator to be tested shall be worn for at least 5 minutes before the start of the fit test.
 13. The fit test shall be performed while the test subject is wearing any applicable safety equipment that may be worn during actual respirator use which could interfere with respirator fit.
 14. Test Exercises. (a) The following test exercises are to be performed for all fit testing methods prescribed in this appendix, except for the CNP method. A separate fit testing exercise regimen is contained in the CNP protocol. The test subject shall perform exercises, in the test environment, in the following manner:
 - (1) Normal breathing. In a normal standing position, without talking, the subject shall breathe normally.
 - (2) Deep breathing. In a normal standing position, the subject shall breathe slowly and deeply, taking caution so as not to hyperventilate.

HASP
RESPIRATORY PROTECTION PROGRAM

- (3) Turning head side to side. Standing in place, the subject shall slowly turn his/her head from side to side between the extreme positions on each side. The head shall be held at each extreme momentarily so the subject can inhale at each side.
- (4) Moving head up and down. Standing in place, the subject shall slowly move his/her head up and down. The subject shall be instructed to inhale in the up position (i.e., when looking toward the ceiling).
- (5) Talking. The subject shall talk out loud slowly and loud enough so as to be heard clearly by the test conductor. The subject can read from a prepared text such as the Rainbow Passage, count backward from 100, or recite a memorized poem or song.

Rainbow Passage

When the sunlight strikes raindrops in the air, they act like a prism and form a rainbow. The rainbow is a division of white light into many beautiful colors. These take the shape of a long round arch, with its path high above, and its two ends apparently beyond the horizon. There is, according to legend, a boiling pot of gold at one end. People look, but no one ever finds it. When a man looks for something beyond reach, his friends say he is looking for the pot of gold at the end of the rainbow.

- (6) Grimace. The test subject shall grimace by smiling or frowning. (This applies only to QNFT testing; it is not performed for QLFT)
- (7) Bending over. The test subject shall bend at the waist as if he/she were to touch his/her toes. Jogging in place shall be substituted for this exercise in those test environments such as shroud type QNFT or QLFT units that do not permit bending over at the waist. (8) Normal breathing. Same as exercise (1).
 - (a) Each test exercise shall be performed for one minute except for the grimace exercise which shall be performed for 15 seconds. The test subject shall be questioned by the test conductor regarding the comfort of the respirator upon completion of the protocol. If it has become unacceptable, another model of respirator shall be tried. The respirator shall not be adjusted once the fit test exercises begin. Any adjustment voids the test, and the fit test must be repeated.

Qualitative Fit Test (QLFT) Protocols

1. General
 - (a) The employer shall ensure that persons administering QLFT are able to prepare test solutions, calibrate equipment and perform tests properly, recognize invalid tests, and ensure that test equipment is in proper working order.
 - (b) The employer shall ensure that QLFT equipment is kept clean and well maintained so as to operate within the parameters for which it was designed.

**HASP
RESPIRATORY PROTECTION PROGRAM**

2. Isoamyl Acetate Protocol

Note: This protocol is not appropriate to use for the fit testing of particulate respirators. If used to fit test particulate respirators, the respirator must be equipped with an organic vapor filter.

(a) Odor Threshold Screening

Odor threshold screening, performed without wearing a respirator, is intended to determine if the individual tested can detect the odor of isoamyl acetate at low levels.

- (1) Three 1 liter glass jars with metal lids are required.
- (2) Odor-free water (e.g., distilled or spring water) at approximately 25 deg. C (77 deg. F) shall be used for the solutions.
- (3) The isoamyl acetate (IAA) (also known as isopentyl acetate) stock solution is prepared by adding 1 ml of pure IAA to 800 ml of odor-free water in a 1 liter jar, closing the lid and shaking for 30 seconds. A new solution shall be prepared at least weekly.
- (4) The screening test shall be conducted in a room separate from the room used for actual fit testing. The two rooms shall be well-ventilated to prevent the odor of IAA from becoming evident in the general room air where testing takes place.
- (5) The odor test solution is prepared in a second jar by placing 0.4 ml of the stock solution into 500 ml of odor-free water using a clean dropper or pipette. The solution shall be shaken for 30 seconds and allowed to stand for two to three minutes so that the IAA concentration above the liquid may reach equilibrium. This solution shall be used for only one day.
- (6) A test blank shall be prepared in a third jar by adding 500 cc of odor-free water.
- (7) The odor test and test blank jar lids shall be labeled (e.g., 1 and 2) for jar identification. Labels shall be placed on the lids so that they can be peeled off periodically and switched to maintain the integrity of the test.
- (8) The following instruction shall be typed on a card and placed on the table in front of the two test jars (i.e., 1 and 2): "The purpose of this test is to determine if you can smell banana oil at a low concentration. The two bottles in front of you contain water. One of these bottles also contains a small amount of banana oil. Be sure the covers are on tight, then shake each bottle for two seconds. Unscrew the lid of each bottle, one at a time, and sniff at the mouth of the bottle. Indicate to the test conductor which bottle contains banana oil."
- (9) The mixtures used in the IAA odor detection test shall be prepared in an area separate from where the test is performed, in order to prevent olfactory fatigue in the subject.
- (10) If the test subject is unable to correctly identify the jar containing the odor test

**HASP
RESPIRATORY PROTECTION PROGRAM**

solution, the IAA qualitative fit test shall not be performed.

- (11) If the test subject correctly identifies the jar containing the odor test solution, the test subject may proceed to respirator selection and fit testing.
- (b) Isoamyl Acetate Fit Test
 - (1) The fit test chamber shall be a clear 55-gallon drum liner suspended inverted over a 2-foot diameter frame so that the top of the chamber is about 6 inches above the test subject's head. If no drum liner is available, a similar chamber shall be constructed using plastic sheeting. The inside top center of the chamber shall have a small hook attached.
 - (2) Each respirator used for the fitting and fit testing shall be equipped with organic vapor cartridges or offer protection against organic vapors.
 - (3) After selecting, donning, and properly adjusting a respirator, the test subject shall wear it to the fit testing room. This room shall be separate from the room used for odor threshold screening and respirator selection, and shall be well-ventilated, as by an exhaust fan or lab hood, to prevent general room contamination.
 - (4) A copy of the test exercises and any prepared text from which the subject is to read shall be taped to the inside of the test chamber.
 - (5) Upon entering the test chamber, the test subject shall be given a 6-inch by 5-inch piece of paper towel, or other porous, absorbent, single-ply material, folded in half and wetted with 0.75 ml of pure IAA. The test subject shall hang the wet towel on the hook at the top of the chamber. An IAA test swab or ampule may be substituted for the IAA wetted paper towel provided it has been demonstrated that the alternative IAA source will generate an IAA test atmosphere with a concentration equivalent to that generated by the paper towel method.
 - (6) Allow two minutes for the IAA test concentration to stabilize before starting the fit test exercises. This would be an appropriate time to talk with the test subject; to explain the fit test, the importance of his/her cooperation, and the purpose for the test exercises; or to demonstrate some of the exercises.
 - (7) If at any time during the test, the subject detects the banana-like odor of IAA, the test is failed. The subject shall quickly exit from the test chamber and leave the test area to avoid olfactory fatigue.
 - (8) If the test is failed, the subject shall return to the selection room and remove the respirator. The test subject shall repeat the odor sensitivity test, select and put on another respirator, return to the test area and again begin the fit test procedure described in (b) (1) through (7) above. The process continues until a respirator that fits well has been found. Should the odor sensitivity test be failed, the subject shall wait at least 5 minutes before retesting. Odor sensitivity will usually have returned by this time.

**HASP
RESPIRATORY PROTECTION PROGRAM**

- (9) If the subject passes the test, the efficiency of the test procedure shall be demonstrated by having the subject break the respirator face seal and take a breath before exiting the chamber.
- (10) When the test subject leaves the chamber, the subject shall remove the saturated towel and return it to the person conducting the test, so that there is no significant IAA concentration buildup in the chamber during subsequent tests. The used towels shall be kept in a self-sealing plastic bag to keep the test area from being contaminated.

3. Saccharin Solution Aerosol Protocol

The entire screening and testing procedure shall be explained to the test subject prior to the conduct of the screening test.

- (a) Taste threshold screening. The saccharin taste threshold screening, performed without wearing a respirator, is intended to determine whether the individual being tested can detect the taste of saccharin.
 - (1) During threshold screening as well as during fit testing, subjects shall wear an enclosure about the head and shoulders that is approximately 12 inches in diameter by 14 inches tall with at least the front portion clear and that allows free movements of the head when a respirator is worn. An enclosure substantially similar to the 3M hood assembly, parts # FT 14 and # FT 15 combined, is adequate.
 - (2) The test enclosure shall have a 3/4-inch (1.9 cm) hole in front of the test subject's nose and mouth area to accommodate the nebulizer nozzle.
 - (3) The test subject shall don the test enclosure. Throughout the threshold screening test, the test subject shall breathe through his/her slightly open mouth with tongue extended. The subject is instructed to report when he/she detects a sweet taste.
 - (4) Using a DeVilbiss Model 40 Inhalation Medication Nebulizer or equivalent, the test conductor shall spray the threshold check solution into the enclosure. The nozzle is directed away from the nose and mouth of the person. This nebulizer shall be clearly marked to distinguish it from the fit test solution nebulizer.
 - (5) The threshold check solution is prepared by dissolving 0.83 gram of sodium saccharin USP in 100 ml of warm water. It can be prepared by putting 1 ml of the fit test solution (see (b)(5) below) in 100 ml of distilled water.
 - (6) To produce the aerosol, the nebulizer bulb is firmly squeezed so that it collapses completely, then released and allowed to fully expand.
 - (7) Ten squeezes are repeated rapidly and then the test subject is asked whether the saccharin can be tasted. If the test subject reports tasting the sweet taste during the ten squeezes, the screening test is completed. The taste threshold is noted as ten regardless of the number of squeezes actually completed.

**HASP
RESPIRATORY PROTECTION PROGRAM**

- (8) If the first response is negative, ten more squeezes are repeated rapidly and the test subject is again asked whether the saccharin is tasted. If the test subject reports tasting the sweet taste during the second ten squeezes, the screening test is completed. The taste threshold is noted as twenty regardless of the number of squeezes actually completed.
- (9) If the second response is negative, ten more squeezes are repeated rapidly and the test subject is again asked whether the saccharin is tasted. If the test subject reports tasting the sweet taste during the third set of ten squeezes, the screening test is completed. The taste threshold is noted as thirty regardless of the number of squeezes actually completed.
- (10) The test conductor will take note of the number of squeezes required to solicit a taste response.
- (11) If the saccharin is not tasted after 30 squeezes (step 10), the test subject is unable to taste saccharin and may not perform the saccharin fit test.

Note to paragraph 3. (a): If the test subject eats or drinks something sweet before the screening test, he/she may be unable to taste the weak saccharin solution.

- (12) If a taste response is elicited, the test subject shall be asked to take note of the taste for reference in the fit test.
 - (13) Correct use of the nebulizer means that approximately 1 ml of liquid is used at a time in the nebulizer body.
 - (14) The nebulizer shall be thoroughly rinsed in water, shaken dry, and refilled at least each morning and afternoon or at least every four hours.
- (b) Saccharin solution aerosol fit test procedure.
- (1) The test subject may not eat, drink (except plain water), smoke, or chew gum for 15 minutes before the test.
 - (2) The fit test uses the same enclosure described in 3. (a) above.
 - (3) The test subject shall don the enclosure while wearing the respirator selected in section I. A. of this appendix. The respirator shall be properly adjusted and equipped with a particulate filter(s).
 - (4) A second DeVilbiss Model 40 Inhalation Medication Nebulizer or equivalent is used to spray the fit test solution into the enclosure. This nebulizer shall be clearly marked to distinguish it from the screening test solution nebulizer.
 - (5) The fit test solution is prepared by adding 83 grams of sodium saccharin to 100 ml of warm water.
 - (6) As before, the test subject shall breathe through the slightly open mouth with tongue

**HASP
RESPIRATORY PROTECTION PROGRAM**

extended, and report if he/she tastes the sweet taste of saccharin.

- (7) The nebulizer is inserted into the hole in the front of the enclosure and an initial concentration of saccharin fit test solution is sprayed into the enclosure using the same number of squeezes (either 10, 20 or 30 squeezes) based on the number of squeezes required to elicit a taste response as noted during the screening test. A minimum of 10 squeezes is required.
- (8) After generating the aerosol, the test subject shall be instructed to perform the exercises in section I. A. 14. of this exhibit.
- (9) Every 30 seconds the aerosol concentration shall be replenished using one half the original number of squeezes used initially (e.g., 5, 10 or 15).
- (10) The test subject shall indicate to the test conductor if at any time during the fit test the taste of saccharin is detected. If the test subject does not report tasting the saccharin, the test is passed.
- (11) If the taste of saccharin is detected, the fit is deemed unsatisfactory and the test is failed. A different respirator shall be tried and the entire test procedure is repeated (taste threshold screening and fit testing).
- (12) Since the nebulizer has a tendency to clog during use, the test operator must make periodic checks of the nebulizer to ensure that it is not clogged. If clogging is found at the end of the test session, the test is invalid.

4. Bitrex™ (Denatonium Benzoate) Solution Aerosol Qualitative Fit Test Protocol

The Bitrex™ (Denatonium benzoate) solution aerosol QLFT protocol uses the published saccharin test protocol because that protocol is widely accepted. Bitrex is routinely used as a taste aversion agent in household liquids which children should not be drinking and is endorsed by the American Medical Association, the National Safety Council, and the American Association of Poison Control Centers. The entire screening and testing procedure shall be explained to the test subject prior to the conduct of the screening test.

(a) Taste Threshold Screening.

The Bitrex taste threshold screening, performed without wearing a respirator, is intended to determine whether the individual being tested can detect the taste of Bitrex.

- (1) During threshold screening as well as during fit testing, subjects shall wear an enclosure about the head and shoulders that is approximately 12 inches (30.5 cm) in diameter by 14 inches (35.6 cm) tall. The front portion of the enclosure shall be clear from the respirator and allow free movement of the head when a respirator is worn. An enclosure substantially similar to the 3M hood assembly, parts # FT 14 and # FT 15 combined, is adequate.
- (2) The test enclosure shall have a 3/4 inch (1.9 cm) hole in front of the test subject's nose and mouth area to accommodate the nebulizer nozzle.

**HASP
RESPIRATORY PROTECTION PROGRAM**

- (3) The test subject shall don the test enclosure. Throughout the threshold screening test, the test subject shall breathe through his or her slightly open mouth with tongue extended. The subject is instructed to report when he/she detects a bitter taste
 - (4) Using a DeVilbiss Model 40 Inhalation Medication Nebulizer or equivalent, the test conductor shall spray the Threshold Check Solution into the enclosure. This Nebulizer shall be clearly marked to distinguish it from the fit test solution nebulizer.
 - (5) The Threshold Check Solution is prepared by adding 13.5 milligrams of Bitrex to 100 ml of 5% salt (NaCl) solution in distilled water.
 - (6) To produce the aerosol, the nebulizer bulb is firmly squeezed so that the bulb collapses completely, and is then released and allowed to fully expand.
 - (7) An initial ten squeezes are repeated rapidly and then the test subject is asked whether the Bitrex can be tasted. If the test subject reports tasting the bitter taste during the ten squeezes, the screening test is completed. The taste threshold is noted as ten regardless of the number of squeezes actually completed.
 - (8) If the first response is negative, ten more squeezes are repeated rapidly and the test subject is again asked whether the Bitrex is tasted. If the test subject reports tasting the bitter taste during the second ten squeezes, the screening test is completed. The taste threshold is noted as twenty regardless of the number of squeezes actually completed.
 - (9) If the second response is negative, ten more squeezes are repeated rapidly and the test subject is again asked whether the Bitrex is tasted. If the test subject reports tasting the bitter taste during the third set of ten squeezes, the screening test is completed. The taste threshold is noted as thirty regardless of the number of squeezes actually completed.
 - (10) The test conductor will take note of the number of squeezes required to solicit a taste response.
 - (11) If the Bitrex is not tasted after 30 squeezes (step 10), the test subject is unable to taste Bitrex and may not perform the Bitrex fit test.
 - (12) If a taste response is elicited, the test subject shall be asked to take note of the taste for reference in the fit test.
 - (13) Correct use of the nebulizer means that approximately 1 ml of liquid is used at a time in the nebulizer body.
 - (14) The nebulizer shall be thoroughly rinsed in water, shaken to dry, and refilled at least each morning and afternoon or at least every four hours.
- (b) Bitrex Solution Aerosol Fit Test Procedure.
- (1) The test subject may not eat, drink (except plain water), smoke, or chew gum for 15

**HASP
RESPIRATORY PROTECTION PROGRAM**

minutes before the test.

- (2) The fit test uses the same enclosure as that described in 4. (a) above.
- (3) The test subject shall don the enclosure while wearing the respirator selected according to section I. A. of this appendix. The respirator shall be properly adjusted and equipped with any type particulate filter(s).
- (4) A second DeVilbiss Model 40 Inhalation Medication Nebulizer or equivalent is used to spray the fit test solution into the enclosure. This nebulizer shall be clearly marked to distinguish it from the screening test solution nebulizer.
- (5) The fit test solution is prepared by adding 337.5 mg of Bitrex to 200 ml of a 5% salt (NaCl) solution in warm water.
- (6) As before, the test subject shall breathe through his or her slightly open mouth with tongue extended, and be instructed to report if he/she tastes the bitter taste of Bitrex.
- (7) The nebulizer is inserted into the hole in the front of the enclosure and an initial concentration of the fit test solution is sprayed into the enclosure using the same number of squeezes (either 10, 20 or 30 squeezes) based on the number of squeezes required to elicit a taste response as noted during the screening test.
- (8) After generating the aerosol, the test subject shall be instructed to perform the exercises in section I. A. 14. of this exhibit.
- (9) Every 30 seconds the aerosol concentration shall be replenished using one half the number of squeezes used initially (e.g., 5, 10 or 15).
- (10) The test subject shall indicate to the test conductor if at any time during the fit test the taste of Bitrex is detected. If the test subject does not report tasting the Bitrex, the test is passed.
- (11) If the taste of Bitrex is detected, the fit is deemed unsatisfactory and the test is failed. A different respirator shall be tried and the entire test procedure is repeated (taste threshold screening and fit testing).

5. Irritant Smoke (Stannic Chloride) Protocol

This qualitative fit test uses a person's response to the irritating chemicals released in the "smoke" produced by a stannic chloride ventilation smoke tube to detect leakage into the respirator.

- (a) General Requirements and Precautions
 - (1) The respirator to be tested shall be equipped with high efficiency particulate air (HEPA) or P100 series filter(s).
 - (2) Only stannic chloride smoke tubes shall be used for this protocol.

**HASP
RESPIRATORY PROTECTION PROGRAM**

- (3) No form of test enclosure or hood for the test subject shall be used.
- (4) The smoke can be irritating to the eyes, lungs, and nasal passages. The test conductor shall take precautions to minimize the test subject's exposure to irritant smoke. Sensitivity varies, and certain individuals may respond to a greater degree to irritant smoke. Care shall be taken when performing the sensitivity screening checks that determine whether the test subject can detect irritant smoke to use only the minimum amount of smoke necessary to elicit a response from the test subject.
- (5) The fit test shall be performed in an area with adequate ventilation to prevent exposure of the person conducting the fit test or the build-up of irritant smoke in the general atmosphere.

(b) Sensitivity Screening Check

The person to be tested must demonstrate his or her ability to detect a weak concentration of the irritant smoke.

- (1) The test operator shall break both ends of a ventilation smoke tube containing stannic chloride, and attach one end of the smoke tube to a low flow air pump set to deliver 200 milliliters per minute, or an aspirator squeeze bulb. The test operator shall cover the other end of the smoke tube with a short piece of tubing to prevent potential injury from the jagged end of the smoke tube.
- (2) The test operator shall advise the test subject that the smoke can be irritating to the eyes, lungs, and nasal passages and instruct the subject to keep his/her eyes closed while the test is performed.
- (3) The test subject shall be allowed to smell a weak concentration of the irritant smoke before the respirator is donned to become familiar with its irritating properties and to determine if he/she can detect the irritating properties of the smoke. The test operator shall carefully direct a small amount of the irritant smoke in the test subject's direction to determine that he/she can detect it.

(c) Irritant Smoke Fit Test Procedure

- (1) The person being fit tested shall don the respirator without assistance, and perform the required user seal check(s).
- (2) The test subject shall be instructed to keep his/her eyes closed.
- (3) The test operator shall direct the stream of irritant smoke from the smoke tube toward the face seal area of the test subject, using the low flow pump or the squeeze bulb. The test operator shall begin at least 12 inches from the facepiece and move the smoke stream around the whole perimeter of the mask. The operator shall gradually make two more passes around the perimeter of the mask, moving to within six inches of the respirator.
- (4) If the person being tested has not had an involuntary response and/or detected the

**HASP
RESPIRATORY PROTECTION PROGRAM**

irritant smoke, proceed with the test exercises.

- (5) The exercises identified in section I.A. 14. of this exhibit shall be performed by the test subject while the respirator seal is being continually challenged by the smoke, directed around the perimeter of the respirator at a distance of six inches.
- (6) If the person being fit tested reports detecting the irritant smoke at any time, the test is failed. The person being retested must repeat the entire sensitivity check and fit test procedure.
- (7) Each test subject passing the irritant smoke test without evidence of a response (involuntary cough, irritation) shall be given a second sensitivity screening check, with the smoke from the same smoke tube used during the fit test, once the respirator has been removed, to determine whether he/she still reacts to the smoke. Failure to evoke a response shall void the fit test.
- (8) If a response is produced during this second sensitivity check, then the fit test is passed.

B. Quantitative Fit Test (QNFT) Protocols

The following quantitative fit testing procedures have been demonstrated to be acceptable: Quantitative fit testing using a non-hazardous test aerosol (such as corn oil, polyethylene glycol 400 [PEG 400], di-2-ethyl hexyl sebacate [DEHS], or sodium chloride) generated in a test chamber, and employing instrumentation to quantify the fit of the respirator; Quantitative fit testing using ambient aerosol as the test agent and appropriate instrumentation (condensation nuclei counter) to quantify the respirator fit; Quantitative fit testing using controlled negative pressure and appropriate instrumentation to measure the volumetric leak rate of a facepiece to quantify the respirator fit.

1. General

- (a) The employer shall ensure that persons administering QNFT are able to calibrate equipment and perform tests properly, recognize invalid tests, calculate fit factors properly and ensure that test equipment is in proper working order.
- (b) The employer shall ensure that QNFT equipment is kept clean, and is maintained and calibrated according to the manufacturer's instructions so as to operate at the parameters for which it was designed.

2. Generated Aerosol Quantitative Fit Testing Protocol

- (a) Apparatus.
 - (1) Instrumentation. Aerosol generation, dilution, and measurement systems using particulates (corn oil, polyethylene glycol 400 [PEG 400], di-2-ethyl hexyl sebacate [DEHS] or sodium chloride) as test aerosols shall be used for quantitative fit testing.
 - (2) Test chamber. The test chamber shall be large enough to permit all test

**HASP
RESPIRATORY PROTECTION PROGRAM**

subjects to perform freely all required exercises without disturbing the test agent concentration or the measurement apparatus. The test chamber shall be equipped and constructed so that the test agent is effectively isolated from the ambient air, yet uniform in concentration throughout the chamber.

- (3) When testing air-purifying respirators, the normal filter or cartridge element shall be replaced with a high efficiency particulate air (HEPA) or P100 series filter supplied by the same manufacturer.
- (4) The sampling instrument shall be selected so that a computer record or strip chart record may be made of the test showing the rise and fall of the test agent concentration with each inspiration and expiration at fit factors of at least 2,000. Integrators or computers that integrate the amount of test agent penetration leakage into the respirator for each exercise may be used provided a record of the readings is made.
- (5) The combination of substitute air-purifying elements, test agent and test agent concentration shall be such that the test subject is not exposed in excess of an established exposure limit for the test agent at any time during the testing process, based upon the length of the exposure and the exposure limit duration.
- (6) The sampling port on the test specimen respirator shall be placed and constructed so that no leakage occurs around the port (e.g., where the respirator is probed), a free air flow is allowed into the sampling line at all times, and there is no interference with the fit or performance of the respirator. The in-mask sampling device (probe) shall be designed and used so that the air sample is drawn from the breathing zone of the test subject, midway between the nose and mouth and with the probe extending into the facepiece cavity at least 1/4 inch.
- (7) The test setup shall permit the person administering the test to observe the test subject inside the chamber during the test.
- (8) The equipment generating the test atmosphere shall maintain the concentration of test agent constant to within a 10 percent variation for the duration of the test.
- (9) The time lag (interval between an event and the recording of the event on the strip chart or computer or integrator) shall be kept to a minimum. There shall be a clear association between the occurrence of an event and its being recorded.
- (10) The sampling line tubing for the test chamber atmosphere and for the respirator sampling port shall be of equal diameter and of the same material. The length of the two lines shall be equal.
- (11) The exhaust flow from the test chamber shall pass through an appropriate filter (i.e., high efficiency particulate filter) before release.

**HASP
RESPIRATORY PROTECTION PROGRAM**

- (12) When sodium chloride aerosol is used, the relative humidity inside the test chamber shall not exceed 50 percent.
 - (13) The limitations of instrument detection shall be taken into account when determining the fit factor.
 - (14) Test respirators shall be maintained in proper working order and be inspected regularly for deficiencies such as cracks or missing valves and gaskets.
- (b) Procedural Requirements.
- (1) When performing the initial user seal check using a positive or negative pressure check, the sampling line shall be crimped closed in order to avoid air pressure leakage during either of these pressure checks.
 - (2) The use of an abbreviated screening QLFT test is optional. Such a test may be utilized in order to quickly identify poor fitting respirators that passed the positive and/or negative pressure test and reduce the amount of QNFT time. The use of the CNC QNFT instrument in the count mode is another optional method to obtain a quick estimate of fit and eliminate poor fitting respirators before going on to perform a full QNFT.
 - (3) A reasonably stable test agent concentration shall be measured in the test chamber prior to testing. For canopy or shower curtain types of test units, the determination of the test agent's stability may be established after the test subject has entered the test environment.
 - (4) Immediately after the subject enters the test chamber, the test agent concentration inside the respirator shall be measured to ensure that the peak penetration does not exceed 5 percent for a half mask or 1 percent for a full facepiece respirator.
 - (5) A stable test agent concentration shall be obtained prior to the actual start of testing.
 - (6) Respirator restraining straps shall not be over-tightened for testing. The straps shall be adjusted by the wearer without assistance from other persons to give a reasonably comfortable fit typical of normal use. The respirator shall not be adjusted once the fit test exercises begin.
 - (7) The test shall be terminated whenever any single peak penetration exceeds 5 percent for half masks and 1 percent for full facepiece respirators. The test subject shall be refitted and retested.
 - (8) Calculation of fit factors.
 - a. The fit factor shall be determined for the quantitative fit test by taking the ratio of the average chamber concentration to the

**HASP
RESPIRATORY PROTECTION PROGRAM**

concentration measured inside the respirator for each test exercise except the grimace exercise.

- b. The average test chamber concentration shall be calculated as the arithmetic average of the concentration measured before and after each test (i.e., 7 exercises) or the arithmetic average of the concentration measured before and after each exercise or the true average measured continuously during the respirator sample.
- c. The concentration of the challenge agent inside the respirator shall be determined by one of the following methods:
- d. (A) Average peak penetration method means the method of determining test agent penetration into the respirator utilizing a strip chart recorder, integrator, or computer. The agent penetration is determined by an average of the peak heights on the graph or by computer integration, for each exercise except the grimace exercise. Integrators or computers that calculate the actual test agent penetration into the respirator for each exercise will also be considered to meet the requirements of the average peak penetration method.

(B) Maximum peak penetration method means the method of determining test agent penetration in the respirator as determined by strip chart recordings of the test. The highest peak penetration for a given exercise is taken to be representative of average penetration into the respirator for that exercise.

(C) Integration by calculation of the area under the individual peak for each exercise except the grimace exercise. This includes computerized integration.

(D) The calculation of the overall fit factor using individual exercise fit factors involves first converting the exercise fit factors to penetration values, determining the average, and then converting that result back to a fit factor. This procedure is described in the following equation:

$$PV_1 = ff_1 / \text{Conc.}_{\text{out}}$$

$$PV_2 = ff_2 / \text{Conc.}_{\text{out}}$$

$$PV_3 = ff_3 / \text{Conc.}_{\text{out}}$$

$$PV_{\text{Avg}} = (PV_1 + PV_2 + PV_3) / 3$$

$$\text{Off} = \text{Conc.}_{\text{out}} / PV_{\text{Avg}}$$

Where PV_1 , PV_2 , PV_3 , etc. are the penetration values for exercises

**HASP
RESPIRATORY PROTECTION PROGRAM**

1, 2, 3;

Conc._{out} is the ambient (outside face mask) air concentration;

Where ff₁, ff₂, ff₃, etc. are the fit factors for exercises 1, 2, 3; and

Off is the overall fit factor

- (9) The test subject shall not be permitted to wear a half mask or quarter facepiece respirator unless a minimum fit factor of 100 is obtained, or a full facepiece respirator unless a minimum fit factor of 500 is obtained.
 - (10) Filters used for quantitative fit testing shall be replaced whenever increased breathing resistance is encountered, or when the test agent has altered the integrity of the filter media.
2. Ambient aerosol condensation nuclei counter (CNC) quantitative fit testing protocol.
 3. The ambient aerosol condensation nuclei counter (CNC) quantitative fit testing (Portacount™) protocol quantitatively fit tests respirators with the use of a probe. The probed respirator is only used for quantitative fit tests. A probed respirator has a special sampling device, installed on the respirator, that allows the probe to sample the air from inside the mask. A probed respirator is required for each make, style, model, and size that the employer uses and can be obtained from the respirator manufacturer or distributor. The CNC instrument manufacturer, TSI Inc., also provides probe attachments (TSI sampling adapters) that permit fit testing in an employee's own respirator. A minimum fit factor pass level of at least 100 is necessary for a half-mask respirator and a minimum fit factor pass level of at least 500 is required for a full facepiece negative pressure respirator. The entire screening and testing procedure shall be explained to the test subject prior to the conduct of the screening test.
 - (a) Portacount Fit Test Requirements.
 - (1) Check the respirator to make sure the sampling probe and line are properly attached to the facepiece and that the respirator is fitted with a particulate filter capable of preventing significant penetration by the ambient particles used for the fit test (e.g., NIOSH 42 CFR 84 series 100, series 99, or series 95 particulate filter) per manufacturer's instruction.
 - (2) Instruct the person to be tested to don the respirator for five minutes before the fit test starts. This purges the ambient particles trapped inside the respirator and permits the wearer to make certain the respirator is comfortable. This individual shall already have been trained on how to wear the respirator properly.
 - (3) Check the following conditions for the adequacy of the respirator fit: Chin properly placed; Adequate strap tension, not overly

**HASP
RESPIRATORY PROTECTION PROGRAM**

tightened; Fit across nose bridge; Respirator of proper size to span distance from nose to chin; Tendency of the respirator to slip; Self-observation in a mirror to evaluate fit and respirator position.

- (4) Have the person wearing the respirator do a user seal check. If leakage is detected, determine the cause. If leakage is from a poorly fitting facepiece, try another size of the same model respirator, or another model of respirator.
 - (5) Follow the manufacturer's instructions for operating the Portacount and proceed with the test.
 - (6) The test subject shall be instructed to perform the exercises in section I. A. 14. of this exhibit
 - (7) After the test exercises, the test subject shall be questioned by the test conductor regarding the comfort of the respirator upon completion of the protocol. If it has become unacceptable, another model of respirator shall be tried.
- (b) Portacount Test Instrument.
- (1) The Portacount will automatically stop and calculate the overall fit factor for the entire set of exercises. The overall fit factor is what counts. The Pass or Fail message will indicate whether or not the test was successful. If the test was a Pass, the fit test is over.
 - (2) Since the pass or fail criterion of the Portacount is user programmable, the test operator shall ensure that the pass or fail criterion meet the requirements for minimum respirator performance in this Appendix.
 - (3) A record of the test needs to be kept on file, assuming the fit test was successful. The record must contain the test subject's name; overall fit factor; make, model, style, and size of respirator used; and date tested.

4. The CNP protocol provides an alternative to aerosol fit test methods.

The CNP fit test method technology is based on exhausting air from a temporarily sealed respirator facepiece to generate and then maintain a constant negative pressure inside the facepiece. The rate of air exhaust is controlled so that a constant negative pressure is maintained in the respirator during the fit test. The level of pressure is selected to replicate the mean inspiratory pressure that causes leakage into the respirator under normal use conditions. With pressure held constant, air flow out of the respirator is equal to air flow into the respirator. Therefore, measurement of the exhaust stream that is required to hold the pressure in the temporarily sealed respirator constant yields a direct measure of leakage air flow into the respirator. The CNP fit test method measures leak rates through the facepiece as a method for

**HASP
RESPIRATORY PROTECTION PROGRAM**

determining the facepiece fit for negative pressure respirators. The CNP instrument manufacturer Dynatech Nevada also provides attachments (sampling manifolds) that replace the filter cartridges to permit fit testing in an employee's own respirator. To perform the test, the test subject closes his or her mouth and holds his/her breath, after which an air pump removes air from the respirator facepiece at a pre-selected constant pressure. The facepiece fit is expressed as the leak rate through the facepiece, expressed as milliliters per minute. The quality and validity of the CNP fit tests are determined by the degree to which the in-mask pressure tracks the test pressure during the system measurement time of approximately five seconds. Instantaneous feedback in the form of a real-time pressure trace of the in-mask pressure is provided and used to determine test validity and quality. A minimum fit factor pass level of 100 is necessary for a half-mask respirator and a minimum fit factor of at least 500 is required for a full facepiece respirator. The entire screening and testing procedure shall be explained to the test subject prior to the conduct of the screening test.

(a) CNP Fit Test Requirements.

- (1) The instrument shall have a non-adjustable test pressure of 15.0 mm water pressure.
- (2) The CNP system defaults selected for test pressure shall be set at -- 15 mm of water (-0.58 inches of water) and the modeled inspiratory flow rate shall be 53.8 liters per minute for performing fit tests.

(Note: CNP systems have built-in capability to conduct fit testing that is specific to unique work rate, mask, and gender situations that might apply in a specific workplace. Use of system default values, which were selected to represent respirator wear with medium cartridge resistance at a low-moderate work rate, will allow inter-test comparison of the respirator fit.)

- (3) The individual who conducts the CNP fit testing shall be thoroughly trained to perform the test.
- (4) The respirator filter or cartridge needs to be replaced with the CNP test manifold. The inhalation valve downstream from the manifold either needs to be temporarily removed or propped open.
- (5) The test subject shall be trained to hold his or her breath for at least 20 seconds.
- (6) The test subject shall don the test respirator without any assistance from the individual who conducts the CNP fit test.
- (7) The QNFT protocol shall be followed according to section I.C.1. of this exhibit with an exception for the CNP test exercises.

(b) CNP Test Exercises.

**HASP
RESPIRATORY PROTECTION PROGRAM**

- (1) Normal breathing. In a normal standing position, without talking, the subject shall breathe normally for 1 minute. After the normal breathing exercise, the subject needs to hold head straight ahead and hold his or her breath for 10 seconds during the test measurement.
- (2) Deep breathing. In a normal standing position, the subject shall breathe slowly and deeply for 1 minute, being careful not to hyperventilate. After the deep breathing exercise, the subject shall hold his or her head straight ahead and hold his or her breath for 10 seconds during test measurement.
- (3) Turning head side to side. Standing in place, the subject shall slowly turn his or her head from side to side between the extreme positions on each side for 1 minute. The head shall be held at each extreme momentarily so the subject can inhale at each side. After the turning head side to side exercise, the subject needs to hold head full left and hold his or her breath for 10 seconds during test measurement. Next, the subject needs to hold head full right and hold his or her breath for 10 seconds during test measurement.
- (4) Moving head up and down. Standing in place, the subject shall slowly move his or her head up and down for 1 minute. The subject shall be instructed to inhale in the up position (i.e., when looking toward the ceiling). After the moving head up and down exercise, the subject shall hold his or her head full up and hold his or her breath for 10 seconds during test measurement. Next, the subject shall hold his or her head full down and hold his or her breath for 10 seconds during test measurement.
- (5) Talking. The subject shall talk out loud slowly and loud enough so as to be heard clearly by the test conductor. The subject can read from a prepared text such as the Rainbow Passage, count backward from 100, or recite a memorized poem or song for 1 minute. After the talking exercise, the subject shall hold his or her head straight ahead and hold his or her breath for 10 seconds during the test measurement.
- (6) Grimace. The test subject shall grimace by smiling or frowning for 15 seconds.
- (7) Bending Over. The test subject shall bend at the waist as if he or she were to touch his or her toes for 1 minute. Jogging in place shall be substituted for this exercise in those test environments such as shroud-type QNFT units that prohibit bending at the waist. After the bending over exercise, the subject shall hold his or her head straight ahead and hold his or her breath for 10 seconds during the test measurement.
- (8) Normal Breathing. The test subject shall remove and re-do the

**HASP
RESPIRATORY PROTECTION PROGRAM**

respirator within a one-minute period. Then, in a normal standing position, without talking, the subject shall breathe normally for 1 minute. After the normal breathing exercise, the subject shall hold his or her head straight ahead and hold his or her breath for 10 seconds during the test measurement. After the test exercises, the test subject shall be questioned by the test conductor regarding the comfort of the respirator upon completion of the protocol. If it has become unacceptable, another model of a respirator shall be tried.

- (c) CNP Test Instrument.
 - (1) The test instrument shall have an effective audio warning device when the test subject fails to hold his or her breath during the test. The test shall be terminated whenever the test subject failed to hold his or her breath. The test subject may be refitted and retested.
 - (2) A record of the test shall be kept on file, assuming the fit test was successful. The record must contain the test subject's name; overall fit factor; make, model, style and size of respirator used; and date tested.

Part II. New Fit Test Protocols

- A. Any person may submit to OSHA an application for approval of a new fit test protocol. If the application meets the following criteria, OSHA will initiate a rulemaking proceeding under section 6(b)(7) of the OSH Act to determine whether to list the new protocol as an approved protocol in this Exhibit.
- B. The application must include a detailed description of the proposed new fit test protocol. This application must be supported by either:
 - 1. A test report prepared by an independent government research laboratory (e.g., Lawrence Livermore National Laboratory, Los Alamos National Laboratory, the National Institute for Standards and Technology) stating that the laboratory has tested the protocol and had found it to be accurate and reliable; or
 - 2. An article that has been published in a peer-reviewed industrial hygiene journal describing the protocol and explaining how test data support the protocol's accuracy and reliability.
- C. If OSHA determines that additional information is required before the Agency commences a rulemaking proceeding under this section, OSHA will so notify the applicant and afford the applicant the opportunity to submit the supplemental information. Initiation of a rulemaking proceeding will be deferred until OSHA has received and evaluated the supplemental information.

RECORD KEEPING

The Respirator Test Summary, shown in Exhibit 6, must be completed after each fit-test.

RESPIRATOR TRAINING RECORD

Your signature on the respirator Training Record will attest to your having received and understood the following respirator training information which both OSHA and Langan require as part of their Respiratory Protection Program.

The required respirator training consists of the following:

An explanation of the problems involved in misusing or inter-changing parts of the respirator.

A discussion of why engineering controls could not prevent the use of respiratory protection.

How and why this make and model was chosen for this specific project.

The limitations of this make and model was chosen for this specific project.

How to put on this respirator and properly adjust the face piece and tension straps.

How to wear this respirator properly.

What the essential points of the care and maintenance of this respirator are.

How to recognize and handle emergencies which may occur while using this respirator.

How to properly inspect, clean, and disinfect this respirator.

How to properly use an Air Purifying Respirator.

Appendix I
OSHA 300 Forms

OSHA Forms for Recording Work-Related Injuries and Illnesses

Dear Employer:

This booklet includes the forms needed for maintaining occupational injury and illness records for 2004. These new forms have changed in several important ways from the 2003 recordkeeping forms.

In the December 17, 2002 Federal Register (67 FR 77165-77170), OSHA announced its decision to add an occupational hearing loss column to OSHA's Form 300, Log of Work-Related Injuries and Illnesses. This forms package contains modified Forms 300 and 300A which incorporate the additional column M(5) Hearing Loss. Employers required to complete the injury and illness forms must begin to use these forms on January 1, 2004.

In response to public suggestions, OSHA also has made several changes to the forms package to make the recordkeeping materials clearer and easier to use:

- On Form 300, we've switched the positions of the day count columns. The days "away from work" column now comes before the days "on job transfer or restriction."
- We've clarified the formulas for calculating incidence rates.
- We've added new recording criteria for occupational hearing loss to the "Overview" section.
- On Form 300, we've made the column heading "Classify the Case" more prominent to make it clear that employers should mark only one selection among the four columns offered.

The Occupational Safety and Health Administration shares with you the goal of preventing injuries and illnesses in our nation's workplaces. Accurate injury and illness records will help us achieve that goal.

*Occupational Safety and Health Administration
U.S. Department of Labor*

What's Inside...

In this package, you'll find everything you need to complete OSHA's Log and the *Summary of Work-Related Injuries and Illnesses* for the next several years. On the following pages, you'll find:

- ▼ **An Overview: Recording Work-Related Injuries and Illnesses** — General instructions for filling out the forms in this package and definitions of terms you should use when you classify your cases as injuries or illnesses.
- ▼ **How to Fill Out the Log** — An example to guide you in filling out the Log properly.
- ▼ **Log of Work-Related Injuries and Illnesses** — Several pages of the Log (but you may make as many copies of the Log as you need.) Notice that the Log is separate from the *Summary*.
- ▼ **Summary of Work-Related Injuries and Illnesses** — Removable *Summary* pages for easy posting at the end of the year. Note that you post the *Summary* only, not the Log.
- ▼ **Worksheet to Help You Fill Out the Summary** — A worksheet for figuring the average number of employees who worked for your establishment and the total number of hours worked.
- ▼ **OSHA's 301: Injury and Illness Incident Report** — A copy of the OSHA 301 to provide details about the incident. You may make as many copies as you need or use an equivalent form.

Take a few minutes to review this package. If you have any questions, visit us online at www.osha.gov or call your local OSHA office. We'll be happy to help you.

An Overview: Recording Work-Related Injuries and Illnesses

The Occupational Safety and Health (OSHA) Act of 1970 requires certain employers to prepare and maintain records of work-related injuries and illnesses. Use these definitions when you classify cases on the Log. OSHA's recordkeeping regulation (see 29 CFR Part 1904) provides more information about the definitions below.

The *Log of Work-Related Injuries and Illnesses* (Form 300) is used to classify work-related injuries and illnesses and to note the extent and severity of each case. When an incident occurs, use the *Log* to record specific details about what happened and how it happened. The *Summary* — a separate form (Form 300A) — shows the totals for the year in each category. At the end of the year, post the *Summary* in a visible location so that your employees are aware of the injuries and illnesses occurring in their workplace.

Employers must keep a *Log* for each establishment or site. If you have more than one establishment, you must keep a separate *Log* and *Summary* for each physical location that is expected to be in operation for one year or longer.

Note that your employees have the right to review your injury and illness records. For more information, see 29 Code of Federal Regulations Part 1904.35, *Employee Involvement*.

Cases listed on the *Log of Work-Related Injuries and Illnesses* are not necessarily eligible for workers' compensation or other insurance benefits. Listing a case on the *Log* does not mean that the employer or worker was at fault or that an OSHA standard was violated.

When is an injury or illness considered work-related?

An injury or illness is considered work-related if an event or exposure in the work environment caused or contributed to a condition or significantly aggravated a preexisting condition. Work-relatedness is

presumed for injuries and illnesses resulting from events or exposures occurring in the workplace, unless an exception specifically applies. See 29 CFR Part 1904.5(b)(2) for the exceptions. The work environment includes the establishment and other locations where one or more employees are working or are present as a condition of their employment. See 29 CFR Part 1904.5(b)(1).

Which work-related injuries and illnesses should you record?

Record those work-related injuries and illnesses that result in:

- ▶ death,
- ▶ loss of consciousness,
- ▶ days away from work,
- ▶ restricted work activity or job transfer, or
- ▶ medical treatment beyond first aid.

You must also record work-related injuries and illnesses that are significant (as defined below) or meet any of the additional criteria listed below.

You must record any significant work-related injury or illness that is diagnosed by a physician or other licensed health care professional. You must record any work-related case involving cancer, chronic irreversible disease, a fractured or cracked bone, or a punctured eardrum. See 29 CFR 1904.7.

What are the additional criteria?
You must record the following conditions when they are work-related:

- ▶ any needlestick injury or cut from a sharp object that is contaminated with another person's blood or other potentially infectious material;
- ▶ any case requiring an employee to be medically removed under the requirements of an OSHA health standard;
- ▶ tuberculosis infection as evidenced by a positive skin test or diagnosis by a physician or other licensed health care professional after exposure to a known case of active tuberculosis;
- ▶ an employee's hearing test (audiogram) reveals 1) that the employee has experienced a Standard Threshold Shift (STS) in hearing in one or both ears (averaged at 2000, 3000, and 4000 Hz) and 2) the employee's total hearing level is 25 decibels (dB) or more above audiometric zero (also averaged at 2000, 3000, and 4000 Hz) in the same ear(s) as the STS.

What is medical treatment?

Medical treatment includes managing and caring for a patient for the purpose of combating disease or disorder. The following are not considered medical treatments and are NOT recordable:

- ▶ visits to a doctor or health care professional solely for observation or counseling;

What do you need to do?

1. Within 7 calendar days after you receive information about a case, decide if the case is recordable under the OSHA recordkeeping requirements.
2. Determine whether the incident is a new case or a recurrence of an existing one.
3. Establish whether the case was work-related.
4. If the case is recordable, decide which form you will fill out as the injury and illness incident report.
You may use *OSHA's 301: Injury and Illness Incident Report* or an equivalent form. Some state workers compensation, insurance, or other reports may be acceptable substitutes, as long as they provide the same information as the OSHA 301.

How to work with the Log

1. Identify the employee involved unless it is a privacy concern case as described below.
2. Identify when and where the case occurred.
3. Describe the case, as specifically as you can.
4. Classify the seriousness of the case by recording the **most serious outcome** associated with the case, with column G (Death) being the most serious and column J (Other recordable cases) being the least serious.
5. Identify whether the case is an injury or illness. If the case is an injury, check the injury category. If the case is an illness, check the appropriate illness category.

- ▼ diagnostic procedures, including administering prescription medications that are used solely for diagnostic purposes, and any procedure that can be labeled first aid. (See below for more information about first aid.)

What is first aid?

If the incident required only the following types of treatment, consider it first aid. Do NOT record the case if it involves only:

- ▼ using non-prescription medications at non-prescription strength;
- ▼ administering tetanus immunizations;
- ▼ cleaning, flushing, or soaking wounds on the skin surface;
- ▼ using wound coverings, such as bandages, BandAids™, gauze pads, etc., or using SteriStrips™ or butterfly bandages.
- ▼ using hot or cold therapy;
- ▼ using any totally non-rigid means of support, such as elastic bandages, wraps, non-rigid back belts, etc.;
- ▼ using temporary immobilization devices while transporting an accident victim (splints, slings, neck collars, or back boards).
- ▼ drilling a fingernail or toenail to relieve pressure, or draining fluids from blisters;
- ▼ using eye patches;
- ▼ using simple irrigation or a cotton swab to remove foreign bodies not embedded in or adhered to the eye;
- ▼ using irrigation, tweezers, cotton swab or other simple means to remove splinters or foreign material from areas other than the eye;

- ▼ using finger guards;
- ▼ using massages;
- ▼ drinking fluids to relieve heat stress

How do you decide if the case involved restricted work?

Restricted work activity occurs when, as the result of a work-related injury or illness, an employer or health care professional keeps, or recommends keeping, an employee from doing the routine functions of his or her job or from working the full workday that the employee would have been scheduled to work before the injury or illness occurred.

How do you count the number of days of restricted work activity or the number of days away from work?

Count the number of calendar days the employee was on restricted work activity or was away from work as a result of the recordable injury or illness. Do not count the day on which the injury or illness occurred in this number. Begin counting days from the day after the incident occurs. If a single injury or illness involved both days away from work and days of restricted work activity, enter the total number of days for each. You may stop counting days of restricted work activity or days away from work once the total of either or the combination of both reaches 180 days.

Under what circumstances should you NOT enter the employee's name on the OSHA Form 300?

You must consider the following types of injuries or illnesses to be privacy concern cases:

- ▼ an injury or illness to an intimate body part or to the reproductive system,
 - ▼ an injury or illness resulting from a sexual assault,
 - ▼ a mental illness,
 - ▼ a case of HIV infection, hepatitis, or tuberculosis,
 - ▼ a needlestick injury or cut from a sharp object that is contaminated with blood or other potentially infectious material (see 29 CFR Part 1904.8 for definition), and other illnesses, if the employee independently and voluntarily requests that his or her name not be entered on the log.
- You must not enter the employee's name on the OSHA 300 Log for these cases. Instead, enter "privacy case" in the space normally used for the employee's name. You must keep a separate, confidential list of the case numbers and employee names for the establishment's privacy concern cases so that you can update the cases and provide information to the government if asked to do so.

If you have a reasonable basis to believe that information describing the privacy concern case may be personally identifiable even though the employee's name has been omitted, you may use discretion in describing the injury or illness on both the OSHA 300 and 301 forms. You must enter enough information to identify the cause of the incident and the general severity of

the injury or illness, but you do not need to include details of an intimate or private nature.

What if the outcome changes after you record the case?

If the outcome or extent of an injury or illness changes after you have recorded the case, simply draw a line through the original entry or, if you wish, delete or white-out the original entry. Then write the new entry where it belongs. Remember, you need to record the most serious outcome for each case.

Classifying injuries

An injury is any wound or damage to the body resulting from an event in the work environment.

Examples: Cut, puncture, laceration, abrasion, fracture, bruise, contusion, chipped tooth, amputation, insect bite, electrocution, or a thermal, chemical, electrical, or radiation burn. Sprain and strain injuries to muscles, joints, and connective tissues are classified as injuries when they result from a slip, trip, fall or other similar accidents.

Classifying illnesses

Skin diseases or disorders

Skin diseases or disorders are illnesses involving the worker's skin that are caused by work exposure to chemicals, plants, or other substances.

Examples: Contact dermatitis, eczema, or rash caused by primary irritants and sensitizers or poisonous plants; oil acne; friction blisters, chrome ulcers; inflammation of the skin.

Respiratory conditions

Respiratory conditions are illnesses associated with breathing hazardous biological agents, chemicals, dust, gases, vapors, or fumes at work.

Examples: Silicosis, asbestosis, pneumonitis, pharyngitis, rhinitis or acute congestion; farmer's lung, beryllium disease, tuberculosis, occupational asthma, reactive airways dysfunction syndrome (RAADS), chronic obstructive pulmonary disease (COPD), hypersensitivity pneumonitis, toxic inhalation injury, such as metal fume fever; chronic obstructive bronchitis, and other pneumoconioses.

Poisoning

Poisoning includes disorders evidenced by abnormal concentrations of toxic substances in blood, other tissues, other bodily fluids, or the breath that are caused by the ingestion or absorption of toxic substances into the body.

Examples: Poisoning by lead, mercury,

cadmium, arsenic, or other metals; poisoning by carbon monoxide, hydrogen sulfide, or other gases; poisoning by benzene, benzol, carbon tetrachloride, or other organic solvents; poisoning by insecticide sprays, such as parathion or lead arsenate; poisoning by other chemicals, such as formaldehyde.

Hearing Loss

Noise-induced hearing loss is defined for recordkeeping purposes as a change in hearing threshold relative to the baseline audiogram of an average of 10 dB or more in either ear at 2000, 3000 and 4000 hertz, and the employee's total hearing level is 25 decibels (dB) or more above audiometric zero (also averaged at 2000, 3000, and 4000 hertz) in the same ear(s).

All other illnesses

All other occupational illnesses.
Examples: Heatstroke, sunstroke, heat exhaustion, heat stress and other effects of environmental heat; freezing, frostbite, and other effects of exposure to low temperatures; decompression sickness; effects of ionizing radiation (isotopes, x-rays, radium); effects of nonionizing radiation (welding flash, ultra-violet rays, lasers); anthrax; bloodborne pathogenic diseases, such as AIDS, HIV, hepatitis B or hepatitis C; brucellosis; malignant or benign tumors; histoplasmosis; coccidioidomycosis.

When must you post the Summary?

You must post the *Summary* only — not the *Log* — by February 1 of the year following the year covered by the form and keep it posted until April 30 of that year.

How long must you keep the Log and Summary on file?

You must keep the *Log* and *Summary* for 5 years following the year to which they pertain.

Do you have to send these forms to OSHA at the end of the year?

No. You do not have to send the completed forms to OSHA unless specifically asked to do so.

How can we help you?

If you have a question about how to fill out the *Log*,

- visit us online at www.osha.gov or
- call your local OSHA office.

Optional

Calculating Injury and Illness Incidence Rates

What is an incidence rate?

An incidence rate is the number of recordable injuries and illnesses occurring among a given number of full-time workers (usually 100 full-time workers) over a given period of time (usually one year). To evaluate your firm's injury and illness experience over time or to compare your firm's experience with that of your industry as a whole, you need to compute your incidence rate. Because a specific number of workers and a specific period of time are involved, these rates can help you identify problems in your workplace and/or progress you may have made in preventing work-related injuries and illnesses.

How do you calculate an incidence rate?

You can compute an occupational injury and illness incidence rate for all recordable cases or for cases that involved days away from work for your firm quickly and easily. The formula requires that you follow instructions in paragraph (a) below for the total recordable cases or those in paragraph (b) for cases that involved days away from work, and for both rates the instructions in paragraph (c).

(a) To find out the total number of recordable injuries and illnesses that occurred during the year, count the number of line entries on your OSHA Form 300, or refer to the OSHA Form 300A and sum the entries for columns (C), (H), (I), and (J).

(b) To find out the number of injuries and illnesses that involved days away from work, count the number of line entries on your OSHA Form 300 that received a check mark in column (H), or refer to the entry for column

(H) on the OSHA Form 300A.

(c) The number of hours all employees actually worked during the year. Refer to OSHA Form 300A and optional worksheet to calculate this number.

You can compute the incidence rate for all recordable cases of injuries and illnesses using the following formula:

$$\frac{\text{Total number of injuries and illnesses} \times 200,000}{\text{Number of hours worked by all employees}} = \text{Total recordable case rate}$$

(The 200,000 figure in the formula represents the number of hours 100 employees working 40 hours per week, 50 weeks per year would work, and provides the standard base for calculating incidence rates.)

You can compute the incidence rate for recordable cases involving days away from work, days of restricted work activity or job transfer (DART) using the following formula:

$$\frac{\text{Number of entries in column H} + \text{Number of entries in column I} \times 200,000}{\text{Number of hours worked by all employees}} = \text{DART incidence rate}$$

You can use the same formula to calculate incidence rates for other variables such as cases involving restricted work activity (column (I) on Form 300A), cases involving skin disorders (column (M-2) on Form 300A), etc. Just substitute the appropriate total for these cases, from Form 300A, into the formula in place of the total number of injuries and illnesses.

What can I compare my incidence rate to?

The Bureau of Labor Statistics (BLS) conducts a survey of occupational injuries and illnesses each year and publishes incidence rate data by

various classifications (e.g., by industry, by employer size, etc.). You can obtain these published data at www.bls.gov/iif or by calling a BLS Regional Office.

Worksheet

$$\begin{array}{l} \text{Total number of} \\ \text{injuries and illnesses} \\ \boxed{} \end{array} \times 200,000 \div \begin{array}{l} \text{Number of} \\ \text{hours worked} \\ \text{by all employees} \\ \boxed{} \end{array} = \begin{array}{l} \text{Total recordable} \\ \text{case rate} \\ \boxed{} \end{array}$$

$$\begin{array}{l} \text{Number of entries in} \\ \text{Column H} + \text{Column I} \\ \boxed{} \end{array} \times 200,000 \div \begin{array}{l} \text{Number of} \\ \text{hours worked} \\ \text{by all employees} \\ \boxed{} \end{array} = \begin{array}{l} \text{DART incidence} \\ \text{rate} \\ \boxed{} \end{array}$$

How to Fill Out the Log

The *Log of Work-Related Injuries and Illnesses* is used to classify work-related injuries and illnesses and to note the extent and severity of each case. When an incident occurs, use the *Log* to record specific details about what happened and how it happened.

If your company has more than one establishment or site, you must keep separate records for each physical location that is expected to remain in operation for one year or longer.

We have given you several copies of the *Log* in this package. If you need more than we provided, you may photocopy and use as many as you need.

The *Summary* — a separate form — shows the work-related injury and illness totals for the year in each category. At the end of the year, count the number of incidents in each category and transfer the totals from the *Log* to the *Summary*. Then post the *Summary* in a visible location so that your employees are aware of injuries and illnesses occurring in their workplace.

You don't post the Log. You post only the Summary at the end of the year.

OSHA's Form 300 (Rev. 01/2004)

Log of Work-Related Injuries and Illnesses

Attention: This form contains information relating to the health and safety of employees. It is to be used to protect the confidentiality of employees to the extent possible while the information is being used for occupational safety and health purposes.

Year 20 20
 U.S. Department of Labor
 Occupational Safety and Health Administration
 Form approved OSHA # 1114-0118

You must record information about every work-related death and about every work-related injury or illness that involves loss of consciousness, restricted work activity or job transfer, loss of one or more full days of work, or significant work-related injury or illness that is diagnosed by a physician or licensed health care professional. You must also record work-related injury and illness that are recorded on the OSHA Form 301 or equivalent form for each injury or illness recorded on this form. If you're not sure whether a case is recordable, call your local OSHA office for help.

Establishment name XYZ Company
 City Jayville State ME

Identify the person		Describe the case		Classify the case based on the most serious outcome for that case		Enter the number of employees affected by each case		Check the injury/illness or absence case type of illness	
(A) Case #	(B) Employee's name	(C) Job title (e.g., "Welder")	(D) Date of injury or onset of illness	(E) Where the event occurred (e.g., "Loading dock north of building")	(F) Describes injury or illness, parts of body affected, and all affected employees that are directly injured (e.g., "Second degree burns on right forearm from employer's torch")	(G) Death	(H) Job transfer or restriction	(I) Restricted work activity	(J) Other
1	Mark Bagin	Welder	5 / 25	warehouse	fracture, left arm and left leg, fell from ladder	<input type="checkbox"/>	12 days	15 days	<input type="checkbox"/>
2	Shana Alexander	Foundry man	7 / 2	pouring deck	poisoning from lead fumes	<input type="checkbox"/>	30 days	30 days	<input type="checkbox"/>
3	Sam Switzer	Elevator	8 / 5	2nd floor stairwell	limken left foot, fell over ban	<input type="checkbox"/>	7 days	30 days	<input type="checkbox"/>
4	Ralph Benelle	Laborer	9 / 17	packaging dept	Back strain lifting boxes	<input type="checkbox"/>	3 days	30 days	<input type="checkbox"/>
5	Lured Daniels	Machine opr.	10 / 23	production floor	died in cnc	<input checked="" type="checkbox"/>			<input type="checkbox"/>

Be as specific as possible. You can use two lines if you need more room.

Revise the log if the injury or illness progresses and the outcome is more serious than you originally recorded for the case. Cross out, erase, or white-out the original entry.

Choose ONLY ONE of these categories. Classify the case by recording the most serious outcome of the case, with column G (death) being the most serious and column J (Other recordable cases) being the least serious.

Note whether the case involves an injury or an illness.

Log of Work-Related Injuries and Illnesses

You must record information about every work-related death and about every work-related injury or illness that involves loss of consciousness, restricted work activity or job transfer, days away from work, or medical treatment beyond first aid. You must also record significant work-related injuries and illnesses that meet any of the specific recording criteria listed in 29 CFR Part 1904.12. Feel free to use two lines for a single case if you need to. You must complete an Injury and Illness Incident Report (OSHA Form 301) or equivalent form for each injury or illness recorded on this form. If you're not sure whether a case is recordable, call your local OSHA office for help.

Attention: This form contains information relating to employee health and must be used in a manner that protects the confidentiality of employees to the extent possible while the information is being used for occupational safety and health purposes.

Year 20 _____

U.S. Department of Labor
Occupational Safety and Health Administration

Form approved OMB no. 1218-0178

Establishment name _____

City _____

State _____

Identify the person

(A) Case no. _____

(B) Employee's name _____

(C) Job title (e.g., Welder) _____

(D) Date of injury or onset of illness _____
month/day

(E) Where the event occurred (e.g., Loading dock north end)

(F) Describe injury or illness, parts of body affected, and object/substance that directly injured or made person ill (e.g., Second degree burns on right forearm from acetylene torch)

Classify the case

CHECK ONLY ONE box for each case based on the most serious outcome for that case:

Remained at Work		On job transfer or restriction		Away from work		Death	
(G)	(H)	(I)	(J)	(K)	(L)	(M)	(N)

Summary of Work-Related Injuries and Illnesses

Year 20 _____

U.S. Department of Labor
Occupational Safety and Health Administration

Form approved OMB no. 1218-0176

All establishments covered by Part 1904 must complete this Summary page, even if no work-related injuries or illnesses occurred during the year. Remember to review the Log to verify that the entries are complete and accurate before completing this summary.

Using the Log, count the individual entries you made for each category. Then write the totals below, making sure you've added the entries from every page of the Log. If you had no cases, write "0."

Employees, former employees, and their representatives have the right to review the OSHA Form 300 in its entirety. They also have limited access to the OSHA Form 301 or its equivalent. See 29 CFR Part 1904.35, in OSHA's recordkeeping rule, for further details on the access provisions for these forms.

Number of Cases

Total number of deaths	Total number of cases with days away from work	Total number of cases with job transfer or restriction	Total number of other recordable cases
(G) _____	(H) _____	(I) _____	(J) _____

Number of Days

Total number of days away from work	Total number of days of job transfer or restriction
(K) _____	(L) _____

Injury and Illness Types

Total number of . . . (M)	(4) Poisonings
(1) Injuries	(5) Hearing loss
(2) Skin disorders	(6) All other illnesses
(3) Respiratory conditions	

Post this Summary page from February 1 to April 30 of the year following the year covered by the form.

Public reporting burden for this collection of information is estimated to average 60 minutes per response, including time to review the instructions, search and gather the data needed, and complete and review the collection of information. Persons are not required to respond to the collection of information unless it displays a currently valid OMB control number. If you have any comments about these estimates or any other aspects of this data collection, contact: US Department of Labor, OSHA Office of Statistical Analysis, Room N-3614, 200 Constitution Avenue, NW, Washington, DC 20210. Do not send the completed forms to this office.

Establishment information

Your establishment name _____

Street _____

City _____ State _____ ZIP _____

Industry description (e.g., *Manufacture of motor truck trailers*) _____

Standard Industrial Classification (SIC), if known (e.g., 3715) _____

OR _____

North American Industrial Classification (NAICS), if known (e.g., 336212) _____

Employment information (If you don't have these figures, see the Worksheet on the back of this page to estimate.)

Annual average number of employees _____

Total hours worked by all employees last year _____

Knowingly falsifying this document may result in a fine.

I certify that I have examined this document and that to the best of my knowledge the entries are true, accurate, and complete.

Company executive _____ Title _____

Phone _____ / / Date _____

Optional

Worksheet to Help You Fill Out the Summary

At the end of the year, OSHA requires you to enter the average number of employees and the total hours worked by your employees on the summary. If you don't have these figures, you can use the information on this page to estimate the numbers you will need to enter on the Summary page at the end of the year.

How to figure the average number of employees who worked for your establishment during the year:

- Add** the total number of employees your establishment paid in all pay periods during the year. Include all employees: full-time, part-time, temporary, seasonal, salaried, and hourly.
- Count** the number of pay periods your establishment had during the year. Be sure to include any pay periods when you had no employees.
- Divide** the number of employees by the number of pay periods.
- Round the answer** to the next highest whole number. Write the rounded number in the blank marked *Annual average number of employees*.

For example, Acme Construction figured its average employment this way:

For pay period... Acme paid this number of employees...

1	10	Number of employees paid = 830	1
2	0	Number of pay periods = 26	2
3	15	830 = 31.92	3
4	30	26	4
5	40	31.92 rounds to 32	
▼	20	32 is the annual average number of employees	
24	15		
25	+10		
26	830		

How to figure the total hours worked by all employees:

Include hours worked by salaried, hourly, part-time and seasonal workers, as well as hours worked by other workers subject to day to day supervision by your establishment (e.g., temporary help services workers).

Do not include vacation, sick leave, holidays, or any other non-work time, even if employees were paid for it. If your establishment keeps records of only the hours paid or if you have employees who are not paid by the hour, please estimate the hours that the employees actually worked.

If this number isn't available, you can use this optional worksheet to estimate it.

Optional Worksheet

_____ **Find** the number of full-time employees in your establishment for the year.

X _____ **Multiply** by the number of work hours for a full-time employee in a year.

_____ This is the number of full-time hours worked.

+ _____ **Add** the number of any overtime hours as well as the hours worked by other employees (part-time, temporary, seasonal)

_____ **Round** the answer to the next highest whole number. Write the rounded number in the blank marked *Total hours worked by all employees last year*.

OSHA's Form 301 Injury and Illness Incident Report

This *Injury and Illness Incident Report* is one of the first forms you must fill out when a recordable work-related injury or illness has occurred. Together with the *Log of Work-Related Injuries and Illnesses* and the accompanying *Summary*, these forms help the employer and OSHA develop a picture of the extent and severity of work-related incidents.

Within 7 calendar days after you receive information that a recordable work-related injury or illness has occurred, you must fill out this form or an equivalent. Some state workers' compensation, insurance, or other reports may be acceptable substitutes. To be considered an equivalent form, any substitute must contain all the information asked for on this form.

According to Public Law 91-596 and 29 CFR 1904, OSHA's recordkeeping rule, you must keep this form on file for 5 years following the year to which it pertains.

If you need additional copies of this form, you may photocopy and use as many as you need.

Completed by _____

Title _____

Phone (____) _____ Date ____/____/____

Attention: This form contains information relating to employee health and must be used in a manner that protects the confidentiality of employees to the extent possible while the information is being used for occupational safety and health purposes.

U.S. Department of Labor
Occupational Safety and Health Administration

Form approved OMB no. 1218-0176

Information about the employee

- 1) Full name _____
- 2) Street _____
City _____ State _____ ZIP _____
- 3) Date of birth ____/____/____
- 4) Date hired ____/____/____
- 5) Male Female

Information about the physician or other health care professional

- 6) Name of physician or other health care professional _____

Facility _____
Street _____
City _____ State _____ ZIP _____
- 7) If treatment was given away from the worksite, where was it given?

Facility _____
Street _____
City _____ State _____ ZIP _____
- 8) Was employee treated in an emergency room?
 Yes No
- 9) Was employee hospitalized overnight as an in-patient?
 Yes No

Information about the case

- 10) Case number from the Log _____ (Transfer the case number from the Log after you record the case.)
- 11) Date of injury or illness ____/____/____ AM / PM
- 12) Time employee began work _____ AM / PM
- 13) Time of event _____ AM / PM Check if time cannot be determined
- 14) **What was the employee doing just before the incident occurred?** Describe the activity, as well as the tools, equipment, or material the employee was using. Be specific. *Examples:* "climbing a ladder while carrying roofing materials"; "spraying chlorine from hand sprayer"; "daily computer key-entry."
- 15) **What happened?** Tell us how the injury occurred. *Examples:* "When ladder slipped on wet floor, worker fell 20 feet"; "Worker was sprayed with chlorine when gasket broke during replacement"; "Worker developed soreness in wrist over time."
- 16) **What was the injury or illness?** Tell us the part of the body that was affected and how it was affected; be more specific than "hurt," "pain," or "sore." *Examples:* "strained back"; "chemical burn, hand"; "carpal tunnel syndrome."
- 17) **What object or substance directly harmed the employee?** *Examples:* "concrete floor"; "chlorine"; "radial arm saw." If this question does not apply to the incident, leave it blank.
- 18) **If the employee died, when did death occur?** Date of death ____/____/____

Public reporting burden for this collection of information is estimated to average 29 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Persons are not required to respond to the collection of information unless it displays a current valid OMB control number. If you have any comments about this estimate or any other aspects of this data collection, including suggestions for reducing this burden, contact: US Department of Labor, OSHA, Office of Statistical Analysis, Room N-3634, 200 Constitution Avenue, NW, Washington, DC 20210. Do not send the completed forms to this office.

Re: Geophysical Survey Report
Lenox Avenue & 125th Street
New York, New York 10027

Dear Mr. Burke:

Nova Geophysical Services (NOVA) is pleased to provide findings of our geophysical survey at the above referenced project site located at Lenox Avenue between 124th Street and 125th Street, New York, New York (the "Site"). Please see attached Geophysical Survey map for more details.

□□□□□□□□□□ □□ □□□□□□□□□□□□□□□□

NOVA performed a Geophysical survey consisting of Ground Penetrating Radar (GPR), Electromagnetic (EM) surveys and comprehensive subsurface utility (CSUL) surveys at the proposed Site. The purpose of this survey is to identify underground anomalies such as underground storage tanks (USTs), current and former utility lines, former structures, abnormalities and to verify that proposed environmental soil boring locations are clear of subsurface structures and utilities located at the project site on November 8th 2010.

The equipment selected for this investigation will be included a CSUL Pipe and Cable Locator (an magnetic detector), Ditch-Witch utility locator, Electromagnetic detector (Geonics EM61), MALAs and NOGGIN's 250 MHz and 500 MHz ground-penetrating radar (GPR) units, and a Conquest Concrete based GPR with 750 to 1000 MHz antenna units.

A GPR system consists of a radar control unit, control cable and a transducer (antenna). The control unit transmits a trigger pulse at a normal repetition rate of 500 MHz. The trigger pulse is sent to the transmitter electronics in the transducer via the control cable. The transmitter electronics amplify the trigger pulses into bipolar pulses that are radiated to the surface. The transformed pulses vary in shape and frequency according to the transducer used. In the subsurface, variations of the signal occur at boundaries where there is a dielectric contrast (void, steel, soil type, etc.). Signal reflections travel back to the control unit and are represented as color graphic images for interpolation.

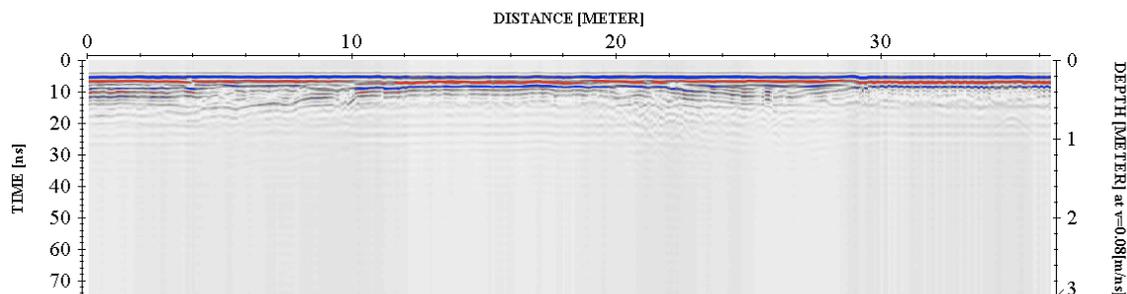

Methodology

The project site and proposed soil boring locations were first screened using the Geonics(tm) electromagnetic detector by carrying the instrument over the boring locations at the site in 5' x 5' traverses. When evidence of anomalies were observed, the Ditch-witch(tm) utility locator was then used to determine if the anomalies were utilities or other large sub-surface metal objects. Finally, GPR profiles were collected over each metal-detector anomaly and inspected for reflections, which could be indicative of USTs. Proposed environmental Sample locations were established in areas that were not conflict with subsurface structures or utilities.

NOVA Processing

In order to improve the quality of the results and to better identify subsurface anomalies NOVA processed the collected data. The processes flow is briefly described at this section.

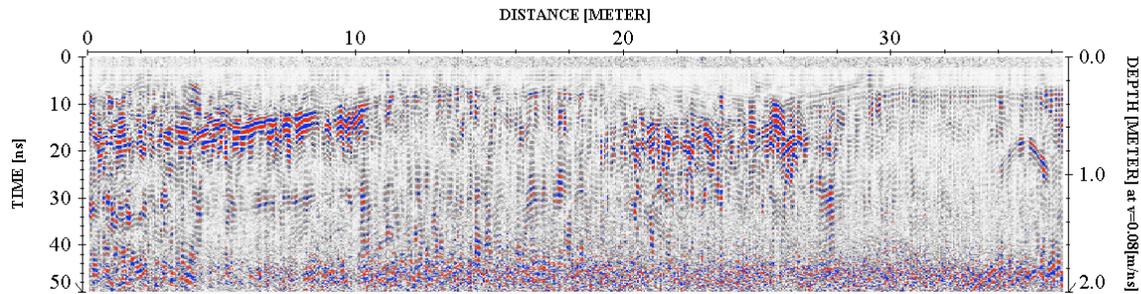

NOVA Processing Flow

□□□□□□□□□□ □□□□□□ □□□□□□

□angan □ngin □ring □ n □ir □n □ n a □□ri □□□□n □□

Lenox Avenue & 125th Street
New York, New York 10027

The above example shows the significance of data processing. The last image (step 5) has higher resolution than the starting image (raw data – step 1) and describes the subsurface anomalies more accurately.

□□□□□□□□ □□□□□□□□

Nova observed following physical conditions at the time of the survey:

□□□ □□ a □□r: Cloudy & light rain.

□□□ □: 38 degrees

□□ r a □□: Non-paved vacant lot and concrete paved city sidewalks.

□□□□□□□ i a □□ i □□ □□□□□□ □□□: Excessive Geophysical Noise Level (GNL) was medium level due to existence of former building foundations and underground subway line adjacent to the subject property.

□□□□□□□□

The results of the geophysical survey identified following anomalies located at the project Site:

- Geophysical survey identified minor anomalies located throughout the project Site. Further evaluations of these anomalies were appeared to be reflection of remnant of former building foundations including but not limited to steel beams, bricks, concrete blocks, and unconsolidated soils located throughout of the project site.
- Geophysical survey identified scattered anomalies located throughout of the surveyed areas. None of these anomalies were consistant with any underground storage tanks (USTs).

Geophysical Engineering & Environmental Services

Geophysical Engineering & Environmental Services

Lenox Avenue & 125th Street
New York, New York 10027

- Geophysical survey identified former utility lines (electric, sewer, gas, water) located along the north, east and south sides of the project site.
- NOVA cleared and marked all of the proposed environmental soil boring locations at the project site.
- Geophysical Survey Plan portrays the areas investigated during the geophysical survey.

If you have any questions please do not hesitate to contact the undersigned.

Sincerely,

Geophysical Engineering & Environmental Services

Levent Eskicakit, P.G., E.P.
Project Engineer

LABORATORY DATA DELIVERABLES

Technical Report

prepared for:

Langan Engineering & Environmental Services
21 Penn Plaza, 360 West 31st Street
New York NY, 10001
Attention: Stuart Knoop

Report Date: 11/24/2010
Client Project ID: 170121501
York Project (SDG) No.: 10K0596

Report Date: 11/24/2010
Client Project ID: 170121501
York Project (SDG) No.: 10K0596

Langan Engineering & Environmental Services
21 Penn Plaza, 360 West 31st Street
New York NY, 10001
Attention: Stuart Knoop

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 16, 2010 and listed below. The project was identified as your project: **170121501**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

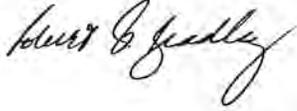

Please contact Client Services at 203.325.1371 with any questions regarding this report.

General Notes for York Project (SDG) No.: 10K0596

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

Notes and Definitions

- S-BN Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.
- S-AC Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.
- QM-05 The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data are acceptable.
- J Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
- B Analyte is found in the associated analysis batch blank.

ND Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.

RL REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.

MDL METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.

NR Not reported

RPD Relative Percent Difference

Wet The data has been reported on an as-received (wet weight) basis

Low Bias Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.

High Bias High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.

Non-Dir. Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

Corrective Action: COC begins with Page 2 of 3. Did not receive COC stating Page 1 of 3 or 3 of 3.

Langan Engineering & Environmental Services
21 Penn Plaza, 360 West 31st Street
New York NY, 10001
Attention: Stuart Knoop

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 17, 2010 and listed below. The project was identified as your project: **170121501**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

General Notes for York Project (SDG) No.: 10K0636

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

Notes and Definitions

J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
B	Analyte is found in the associated analysis batch blank.
<hr/>	
ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 24, 2010 and listed below. The project was identified as your project: **170121501**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

General Notes for York Project (SDG) No.: 10K0822

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

Notes and Definitions

S-AC	Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data are acceptable.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
B	Analyte is found in the associated analysis batch blank.

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 15, 2010 and listed below. The project was identified as your project: **170121501**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

General Notes for York Project (SDG) No.: 10K0528

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

Notes and Definitions

S-GC	Two surrogates are used for this analysis. One surrogate recovered within control limits therefore the analysis is acceptable.
S-AC	Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data are acceptable.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
B	Analyte is found in the associated analysis batch blank.

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

Corrective Action:

Technical Report

prepared for:

Langan Engineering & Environmental Services
21 Penn Plaza, 360 West 31st Street
New York NY, 10001
Attention: Stuart Knoop

Report Date: 11/19/2010
Client Project ID: 170121501
York Project (SDG) No.: 10K0498

Report Date: 11/19/2010
Client Project ID: 170121501
York Project (SDG) No.: 10K0498

Langan Engineering & Environmental Services
21 Penn Plaza, 360 West 31st Street
New York NY, 10001
Attention: Stuart Knoop

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 15, 2010 and listed below. The project was identified as your project: **170121501**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

General Notes for York Project (SDG) No.: 10K0498

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

Notes and Definitions

- QL-02 This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
- J Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
- B Analyte is found in the associated analysis batch blank.
-
- ND Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
- RL REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
- MDL METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
- NR Not reported
- RPD Relative Percent Difference
- Wet The data has been reported on an as-received (wet weight) basis
- Low Bias Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
- High Bias High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
- Non-Dir. Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

Corrective Action:

Attention: Stuart Knoop

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 16, 2010 and listed below. The project was identified as your project: **170121501**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

General Notes for York Project (SDG) No.: 10K0500

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

Notes and Definitions

- QL-02 This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
- J Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
- B Analyte is found in the associated analysis batch blank.
-
- ND Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
- RL REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
- MDL METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
- NR Not reported
- RPD Relative Percent Difference
- Wet The data has been reported on an as-received (wet weight) basis
- Low Bias Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
- High Bias High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
- Non-Dir. Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 15, 2010 and listed below. The project was identified as your project: **170121501**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

General Notes for York Project (SDG) No.: 10K0528

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

Notes and Definitions

S-GC	Two surrogates are used for this analysis. One surrogate recovered within control limits therefore the analysis is acceptable.
S-AC	Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data are acceptable.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
B	Analyte is found in the associated analysis batch blank.

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

Attention: Stuart Knoop

Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 11, 2010 and listed below. The project was identified as your project: **170121501**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

<u>York Sample ID</u>	<u>Client Sample ID</u>	<u>Matrix</u>	<u>Date Collected</u>	<u>Date Received</u>

General Notes for York Project (SDG) No.: 10K0443

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

Notes and Definitions

J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
B	Analyte is found in the associated analysis batch blank.

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

Corrective Action: Lab received (1) 40ml VOA vial labeled Trip Blank that is not on COC. Assumed sample date of 11/09/2010.
PG 11-15-10
