# CERTIFICATION

I, Craig Werle, am a Qualified Environmental Professional, as defined in RCNY § 43-1402(ar). I have primary direct responsibility for implementation of the Remedial Investigation for the Former Getty Service Station Site, (OER Project No. 14EH-N323M, NYC VCP Site No. 14CVCP243M). I am responsible for the content of this Remedial Investigation Report (RIR), have reviewed its contents and certify that this RIR is accurate to the best of my knowledge and contains all available environmental information and data regarding the property.

Craig A. Werle, P.G.  
Qualified Environmental Professional

# EXECUTIVE SUMMARY

The Remedial Investigation Report (RIR) provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy pursuant to RCNY§43-1407(f). The remedial investigation (RI) described in this document is consistent with applicable guidance.

## Site Location and Current Usage

The Site is located at 239 10<sup>th</sup> Avenue in the Chelsea section in Manhattan, New York and is identified as Block 696 and Lot 32 on the New York City Tax Map. Figure 1 shows the Site location. The Site is 5,535-square feet and is bounded by a parking garage and residential building to the north, West 24<sup>th</sup> Street to the south, mixed-use buildings to the east across 10<sup>th</sup> Avenue, and a one-story art gallery followed by the Highline Park to the west. A map of the site boundary is shown in Figure 2. Currently, the Site is occupied by the closed Getty service station and contains a one-story commercial building previously used as a convenience store.

## Summary of Proposed Redevelopment Plan

The proposed future use of the Site will consist of a mixed-use condominium building occupying the entire footprint of the property with basement and sub-basement levels. The upper floors will be comprised of residential units and the ground floor will have some commercial space. Layout of the proposed site development is presented in Figure 3. The current zoning designation is C6-3 which is approved for the development of mixed use residential and commercial buildings. The proposed use is consistent with existing zoning for the property.

The building will be eleven stories high and will include a rear courtyard. The basement level is planned to include the entire property footprint (5,535 square feet). The sub-basement level will include setbacks on the north and west sides and will measure approximately 3,961 square feet. The sub-basement level will provide amenities for the building residents and the basement level will consist of commercial and mechanical space. The proposed construction includes excavation of onsite soils down to 30 feet below grade to accommodate the construction of the basement and sub-basements. An additional 8 feet will be excavated in a limited central area for the installation of an elevator pit and sump. The anticipated volume of soil to be excavated is 5,245 cubic yards (CY). The proposed Site redevelopment plan includes the

construction of a soil mix cut-off wall along the perimeter of the Site that will be socketed into bedrock. The water table occurs at approximately 7 to 10 feet below grade, therefore dewatering is anticipated.

### **Summary of Past Uses of Site and Areas of Concern**

The Site is located in an area of historical mixed-use residential, commercial, and light industrial usage and was operated as a gasoline filling station from at least 1930 until its recent decommissioning in 2013. Historic Sanborn Maps identify that the Site operated as a small portion of a gas light fixture manufacturing facility that occupied the eastern third of the block in the 1890's.

The AOCs identified for this site include:

1. The entire property since the Site was a former gasoline filling station.
2. Two gasoline USTs and associated product piping and dispensers located onsite.

### **Summary of the Work Performed under the Remedial Investigation**

VHS 239, LLC performed the following scope of work:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e., structures, buildings, etc.);
2. Performed a geophysical survey of the Site utilizing Ground Penetrating Radar (GPR) and electromagnetic locator;
3. Installed seven soil borings across the entire project Site, and collected seventeen soil samples for chemical analysis from the soil borings to evaluate soil quality;
4. Installed one groundwater monitoring well and took measurements from existing groundwater wells to establish groundwater flow direction and collected five groundwater samples (from new and existing wells) for chemical analysis to evaluate groundwater quality;
5. Installed three soil vapor probes around Site perimeter and collected three samples for chemical analysis.

## Summary of Environmental Findings

1. Elevation of the property ranges from 10 to 12 feet.
2. Depth to groundwater ranges from 7 to 10 feet at the Site.
3. Groundwater flow is generally from south to southwest beneath the Site.
4. Depth to bedrock is approximately 55 feet at the Site.
5. The stratigraphy of the site, from the surface down, consists of 10 feet of fill underlain by 20 feet of fine to medium sand with interbedded layers of silt.
6. Soil/fill samples collected during investigation were compared to 6NYCRR Part 375 Track 1 Soil Cleanup Objectives (SCOs). VOCs including 1,2,4-trimethylbenzene (ranging from 6,800 to 61,000 micrograms per kilogram ( $\mu\text{g}/\text{kg}$ )) in three shallow samples; benzene at 380  $\mu\text{g}/\text{kg}$  in one shallow sample; ethylbenzene (ranging from 1,100 to 8,200  $\mu\text{g}/\text{kg}$  in two shallow samples; n-propylbenzene (at 9,400  $\mu\text{g}/\text{kg}$ ) in one shallow sample, and toluene (at 920  $\mu\text{g}/\text{kg}$ ) in one shallow sample exceeded Track 1 Unrestricted Use SCOs. SVOCs including benzo(b)fluoranthene (maximum [max.] of 1,400  $\mu\text{g}/\text{kg}$ ), ideno[1,2,3-cd]pyrene (max. of 670  $\mu\text{g}/\text{kg}$ ) and naphthalene (at 13,000  $\mu\text{g}/\text{kg}$ ) exceeded Track 1 Unrestricted Use SCOs in three shallow samples. Metals including chromium (max. of 190 ppm); copper (max. of 150 ppm); lead (max. of 100 ppm); mercury (max. of 0.32 ppm); and zinc (max. of 300 ppm) exceeded Track 1 Unrestricted Use SCOs in five shallow soil samples. PCBs exceeded Track 1 Unrestricted Use SCOs in three shallow soil samples and ranged from 189 to 805 ppm. Pesticides 4,4'-DDE (max. of 10.3  $\mu\text{g}/\text{kg}$ ); 4,4'-DDT (max. of 8.96  $\mu\text{g}/\text{kg}$ ); and dieldrin (7.28  $\mu\text{g}/\text{kg}$ ) exceeded Track 1 Unrestricted Use SCOs in three shallow soil samples. Based on these results, the exceedances found across the Site are indicative of past site operations as a service station and the presence of historic fill. Endpoint soil samples collected from each boring at the proposed redevelopment excavation depth of 30 feet did not detect any VOC, SVOC, or metal constituents above Track 1 Unrestricted Use Criteria standards.
7. Groundwater sample results were compared to NYSDEC Division of Water Technical and Operational Guidance Series (TOGS) 1.1.1 Ambient Water Quality Standards (AWQS). Laboratory analysis of groundwater showed that some VOCs, SVOCs, and

metals exceeded the AWQS in some locations. Total VOC concentrations varied from non-detect to 712 micrograms per liter ( $\mu\text{g/L}$ ) and off-site VOC concentrations ranged from 727 to 5,909  $\mu\text{g/L}$ . Analytical results identified concentrations of benzene (max. of 380  $\mu\text{g/L}$ ), toluene (max. of 29  $\mu\text{g/L}$ ), ethylbenzene (max. of 14,000  $\mu\text{g/L}$ ) and m+p xylenes (max. of 720  $\mu\text{g/L}$ ) and other petroleum breakdown products in some onsite and offsite wells as a result of past site operations. These concentrations have significantly reduced over last five years. SVOCs including chrysene (0.11  $\mu\text{g/L}$  in SB-1/TP-1), naphthalene (14  $\mu\text{g/L}$  in MW-7 and 280  $\mu\text{g/L}$  in MW-5), and pentachlorophenol (9.3  $\mu\text{g/L}$  in MW-5) exceeded their AWQS. Several metals were identified but only iron (max. of 35,100  $\mu\text{g/L}$ ), manganese (max. of 2234  $\mu\text{g/L}$ ), and sodium (max. of 749,000  $\mu\text{g/L}$ ) in the dissolved samples exceeded their respective AWQS.

8. Soil vapor samples collected during the RI were compared to the compounds listed in Table 3.1 Air Guideline Values Derived by the NYSDOH located in the New York State Department of Health (NYSDOH) Final Guidance for Evaluating Soil Vapor Intrusion. Soil vapor samples collected during the 2014 RI indicated petroleum related VOCs were present at moderate concentrations and chlorinated VOCs were present at low concentrations. The petroleum related compounds included trimethylbenzene, cyclohexane, ethylbenzene, heptane, isooctane, xylenes, MTBE, n-hexane, and toluene. The chlorinated VOC tetrachloroethene (PCE) was detected at 15.6  $\mu\text{g/m}^3$  in one of three samples. Carbon tetrachloride, TCA and TCE were not detected. Concentrations of PCE are below the monitoring range established by NYSDOH matrix.

# REMEDIAL INVESTIGATION REPORT

## 1.0 SITE BACKGROUND

VHS 239, LLC plans to enroll in the New York City Voluntary Cleanup Program (NYC VCP) to investigate and remediate a 0.1-acre site located at 239 10<sup>th</sup> Avenue in Chelsea section of Manhattan, New York. Mixed commercial residential use is proposed for the property. The RI work was performed between January 31 and February 10, 2014. This RIR summarizes the nature and extent of contamination and provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy that is protective of human health and the environment consistent with the use of the property pursuant to RCNY§ 43-1407(f).

### 1.1 Site Location and Current Usage

The Site is located at 239 10<sup>th</sup> Avenue in the Chelsea section in Manhattan, New York and is identified as Block 696 and Lot 32 on the New York City Tax Map. Figure 1 shows the Site location. The Site is 5,535-square feet and is bounded by a parking garage and residential building to the north, West 24<sup>th</sup> Street to the south, mixed-use buildings to the east across 10<sup>th</sup> Avenue, and a one-story art gallery followed by the Highline Park to the west. A map of the site boundary is shown in Figure 2. Currently, the Site is occupied by the closed Getty service station and contains a one-story commercial building (approximately 1,900 square feet) previously used as a convenience store.

### 1.2 Proposed Redevelopment Plan

The proposed future use of the Site will consist of a mixed use condominium building occupying the entire footprint of the property with basement and sub-basement levels. Layout of the proposed site development is presented in Figure 3. The current zoning designation is C6-3 which is approved for the development of mixed use residential and commercial buildings. The upper floors will be comprised of residential units and the ground floor will have some commercial space. The proposed use is consistent with existing zoning for the property. The building will be eleven stories high and will include a rear courtyard. The basement level is planned to include the entire property footprint (5,535 square feet). The sub-basement level will include setbacks on the north and west sides and will measure approximately 3,961 square feet. The sub-basement level will provide amenities for the building residents and the basement level

will consist of commercial space and mechanical space. The proposed construction includes excavation of onsite soils down to 30 feet below grade to accommodate the construction of the basement and sub-basements. An additional 8 feet will be excavated in a limited central area for the installation of an elevator pit and sump. The anticipated volume of soil to be excavated is 5,245 cubic yards (CY). The proposed Site redevelopment plan includes the construction of a soil mix cut-off wall along the perimeter of the Site that will be socketed into bedrock. The water table occurs at approximately 7 to 10 feet below grade, therefore dewatering is anticipated.

### **1.3 Description of Surrounding Property**

The surrounding area is used for industrial, commercial, and residential purposes. Mixed-use residential and commercial buildings border the Site to the west, north, and east across 10<sup>th</sup> Avenue. A carwash borders the Site to the south across West 24<sup>th</sup> street.

The majority of surrounding properties have a commercial zoning designation or a mixed residential and commercial building zoning designation. According to the NYCOER Speed GIS Database, a school (Avenues NYC) and a daycare (Hudson Guild Child's Center) are located within 500-foot radius from the Site. Figure 4 shows the surrounding land usage.

## **2.0 SITE HISTORY**

### **2.1 Past Uses and Ownership**

The Site is located in an area of historical mixed use residential, commercial, and light industrial usage and was operated as a gasoline filling station from at least 1930 until its recent decommissioning in 2013. Historic Sanborn Maps identify that the Site operated as a small portion of a gas light fixture manufacturing facility that occupied the eastern third of the block in the 1890's.

### **2.2 Previous Investigations**

The Phase I ESA completed by Merrit Environmental Consulting Corporation (Merrit) in April 2013 concluded that, based on the information provided, gasoline volatile organic compounds (VOCs) are present in the groundwater beneath the Site at concentrations above the NYSDEC Groundwater Quality Standards.

The Phase I ESA also noted the following recognized environmental conditions (RECs):

- Evidence of spills (Spill #9707190 remains open);
- Two 10,000-gallon gasoline USTs are located at the property;
- Three 4,000-gallon gasoline USTs, twelve 550-gallon gasoline USTs, one 275-gallon fuel oil UST, and two fueling pump island were removed from the Site in 1998; and
- Groundwater impacted with VOCs is present in the subsurface at the Site.

The Phase I also noted the Site has an E-designation for Hazardous Materials, Air Quality and Noise; and that exterior drainage basins exit at the property.

In September 1997, Tyree Environmental Corporation conducted a repair of a remote fill located the southern edge of the property. During the repair activities, petroleum impacted soil was encountered and Spill #97-07190 was assigned by the NYSDEC.

In 1998, a site-wide soils remediation program was carried out at the Site that included the removal of twelve 550-gallon gasoline USTs, three 4,000-gallon gasoline USTs, one 275-gallon fuel oil UST and two fueling pump islands and a total of 1,853 tons of impacted soil. Seven sidewall samples (SW-1 through SW-7) were collected between 5 and 10 feet below grade and post-excavation bottom samples (SW-8, SW-9, Fuel Oil Tank) were collected from 10 to 20 feet below grade. Analytical results identified concentrations of BTEX and other petroleum breakdown products above the NYSDEC Part 375 Restricted Residential Use Criteria in the unsaturated zone and above NYSDEC Restricted Commercial/Industrial Use Criteria in the saturated zone.

Groundwater sampling activities at the Site began with collection of a grab groundwater sample from the excavation following the UST removals in 1998. Analytical results revealed that groundwater was impacted with BTEX (33 parts per million [ppm]) and MTBE (276 ppm). Based on these results, monitoring wells MW-1 through MW-3 were installed onsite in April 2001. NYSDEC subsequently requested the installation of additional offsite monitoring wells (MW-4 through MW-7) in the sidewalk bordering the property to delineate any offsite impacts. These wells were installed and sampled in April 2005. Analytical results revealed that offsite BTEX concentrations exceeded NYSDEC Ambient Water Quality Standards (AWQS). Monitoring wells MW-8 through MW-12 were installed farther offsite to complete the delineation of groundwater impacts. These wells were installed between May 2006 and March 2012. Quarterly groundwater monitoring from the onsite/offsite well network has been conducted by Tyree Environmental Corporation (Tyree) from 2001 through 2012. In Tyree's October 2012 Quarterly Monitoring Report, a request to close Spill #97-07190 was made to NYSDEC based on soil and groundwater quality conditions.

### **2.3 Site Inspection**

A Site inspection was performed on January 20, 2014 by Craig Werle of Roux Associates. During the inspection, it was observed that the Site was an inactive Getty Service Station. The one-story convenience store, as well as the pump islands and canopy, remained onsite. Three unlabeled drums are located adjacent to the convenience store. Three monitoring wells are onsite and nine monitoring wells are offsite.

## 2.4 Areas of Concern

Areas of Concern (AOCs) generally include areas where existing or former activities are known or suspected to have resulted in generation, manufacture, refinement, transport, storage, handling, treatment, discharge, release and/or disposal of contaminated media.

The AOCs identified for this site include:

1. The entire property since the Site was a former gasoline filling station.
2. Two gasoline USTs and associated product piping and dispensers located onsite.

The Site has been a former gasoline filling station since the 1930's until its recent decommissioning in 2013. Two 10,000-gallon USTs, subsurface product piping and two pump islands remain at the Site that will be removed as part of site development activities.

## **3.0 PROJECT MANAGEMENT**

### **3.1 Project Organization**

The Qualified Environmental Profession (QEP) responsible for preparation of this RIR is Craig Werle.

### **3.2 Health and Safety**

All work described in this RIR was performed in full compliance with applicable laws and regulations, including Site and OSHA worker safety requirements and HAZWOPER requirements. The Health and Safety Plan (HASP) is included in Appendix B.

### **3.3 Materials Management**

All material encountered during the RI was managed in accordance with applicable laws and regulations.

## **4.0 REMEDIAL INVESTIGATION ACTIVITIES**

VHS 239, LLC performed the following scope of work:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e., structures, buildings, etc.);
2. Performed a geophysical survey of the Site utilizing Ground Penetrating Radar (GPR) and electromagnetic locator;
3. Installed seven soil borings across the entire project Site, and collected seventeen soil samples for chemical analysis from the soil borings to evaluate soil quality;
4. Installed one groundwater monitoring well throughout the Site and took water level measurements from existing groundwater wells to establish groundwater flow direction and collected five groundwater samples (from new and existing wells) for chemical analysis to evaluate groundwater quality;
5. Installed three soil vapor probes around Site perimeter and collected three samples for chemical analysis.

### **4.1 Geophysical Investigation**

A geophysical survey was performed on January 31, 2014 by Diversified Geophysics, Inc. (DGI). The geophysical survey was comprised of a series of GPR traverses and site-wide radio frequency/electromagnetic (RF/EM) scans. GPR data was collected with Sensors and Software 250 MHz Noggin SmartCard. All utility located were painted with appropriate color on the concrete sidewalk. The geophysical survey indicated that all services to the convenience store were located. Water, electric and sanitary sewer services entered/exited the property on West 24<sup>th</sup> Street and were located to the west of the tank farm in the southwest corner of the property. Unknown linear anomalies were observed west/east from the east exterior wall of the store to 10<sup>th</sup> Avenue at a point 4ft north of the SE corner of the store, at 3.5 ft east of the adjacent building and approximately 6ft north of northernmost fuel pumps.

The final geophysical survey report is provided as Appendix C.

### **4.2 Borings and Monitoring Wells**

#### **Drilling and Soil Logging**

Drilling was performed by Aquifer Drilling and Testing (ADT) between February 3 and 10, 2014. A total of one soil boring/temporary well and six soil borings were advanced using direct push drilling method to depths varying from 32 to 38 feet below grade. A summary of the soil boring construction details is included in Table 1.

Boring logs were prepared by a geologist and are attached in Appendix D. A map showing the location of soil borings and monitoring wells is shown in Figure 5. The boring logs include a description of the soil types and non-soil materials; soil screening results from photoionization detector (PID), depth to groundwater, presence of soil mottling, presence of odor, vapors, soil discoloration, and presence of free and/or residual product. Elevated PID readings were observed near the groundwater table. The soil was mostly comprised of fill followed by fine to medium grained sand mixed with gravel and interbedded layers of silt.

### **Groundwater Monitoring Well Construction**

One temporary monitoring well (SB-1/TP-1) was installed in front of the former convenience store. The intended well location was inside the store, however, the low ceiling height precluded drill rig access. Construction details are presented in Table 1. The temporary monitoring well as well as existing well locations are shown in Figure 5.

### **Survey**

The temporary monitoring well was not surveyed, however the existing Site monitoring wells have been previously surveyed.

### **Water Level Measurement**

Water level measurements were conducted with the use of a water level meter. Water level data was measured from the top of the casing and is included in Table 2. A groundwater flow map based on a survey of the onsite and offsite wells on December 2013 is included as Figure 6.

## **4.3 Sample Collection and Chemical Analysis**

Sampling performed as part of the field investigation was conducted for all Areas of Concern and also considered other means for bias of sampling based on professional judgment, area history, discolored soil, stressed vegetation, drainage patterns, field instrument measurements, odor, or other field indicators. All media including soil, groundwater and soil vapor have been sampled and evaluated in the RIR. Discrete (grab) samples have been used for final delineation of the nature and extent of contamination and to determine the impact of contaminants on public health and the environment. The sampling performed and presented in this RIR provides sufficient basis for evaluation of remedial action alternatives, establishment of a qualitative human health exposure assessment, and selection of a final remedy.

## **Soil Sampling**

Sampling equipment was decontaminated by using water and detergent solution between soil boring locations to avoid cross contamination. All soil samples were stored on ice in a cooler and transported under chain of custody procedures to Alpha Analytical, which is a New York State Department of Health (NYSDOH)-certified environmental laboratory.

Seventeen soil samples were collected for chemical analysis during this RI. Data on soil sample collection for chemical analyses, including dates of collection and sample depths as well as the number of QA/QC samples, are reported in Tables 3 and 4, respectively. Figure 5 shows the location of samples collected in this investigation. Laboratories and analytical methods are shown below.

## **Groundwater Sampling**

Groundwater sampling was performed using a peristaltic pump and dedicated tubing. Sampling equipment was decontaminated by using water and detergent solution to clean the pump between well locations. All groundwater samples were stored on ice in a cooler and transported under chain of custody procedures to Alpha Analytical, which is a NYSDOH-certified environmental laboratory.

Five groundwater samples were collected for chemical analysis during this RI. Groundwater sample collection data as well as QA/QC samples are reported in Tables 3 and 4, respectively. Sampling logs with information on purging and sampling of groundwater monitoring wells is included in Appendix E. Figure 5 shows the location of groundwater sampling. Laboratories and analytical methods are shown below.

## **Soil Vapor Sampling**

Soil vapor implants were set at 5 feet below grade and were installed using direct push drilling methods. Each temporary implant was constructed with a 6-inch stainless steel screen connected to the inner tubing. The space surrounding the screen zone was filled with clean sand. The soil vapor probes were sealed above the sampling zone with bentonite slurry to prevent outdoor air infiltration and the remainder of the borehole backfilled with clean material. Sampling occurred for 2 hours. Samples were collected in Summa canisters that were certified by the laboratory. A tracer gas was used in accordance with NYSDOH protocols to serve as QA/QC device to verify the integrity of the soil vapor probe seal. All soil vapor samples were

transported under chain of custody procedures to Alpha Analytical, which is a NYSDOH-certified environmental laboratory.

Three soil vapor probes were installed and three soil vapor samples were collected for chemical analysis during this RI. Soil vapor sampling locations are shown in Figure 5. Soil vapor sample collection data is reported in Table 3. Soil vapor sampling logs are included in Appendix E. Methodologies used for soil vapor assessment conform to the *NYS DOH Final Guidance on Soil Vapor Intrusion, October 2006*.

### Chemical Analysis

Chemical analytical work presented in this RIR has been performed in the following manner:

<b>Factor</b>	<b>Description</b>
Quality Assurance Officer	The chemical analytical quality assurance is directed by Wendy Shen
Chemical Analytical Laboratory	Chemical analytical laboratory used in the RI is NYS ELAP certified and was Alpha Analytical
Chemical Analytical Methods	<p>Soil analytical methods:</p> <ul style="list-style-type: none"> <li>• TAL Metals by EPA Method 6010C (rev. 2007)</li> <li>• VOCs by EPA Method 8260C (rev. 2006)</li> <li>• SVOCs by EPA Method 8270D (rev. 2007)</li> <li>• Pesticides by EPA Method 8081B (rev. 2000)</li> <li>• PCBs by EPA Method 8082A (rev. 2000)</li> </ul> <p>Groundwater analytical methods:</p> <ul style="list-style-type: none"> <li>• TAL Metals by EPA Method 6010C (rev. 2007)</li> <li>• VOCs by EPA Method 8260C (rev. 2006)</li> <li>• SVOCs by EPA Method 8270D (rev. 2007)</li> <li>• Pesticides by EPA Method 8081B (rev. 2000)</li> <li>• PCBs by EPA Method 8082A (rev. 2000)</li> </ul> <p>Soil vapor analytical methods:</p> <ul style="list-style-type: none"> <li>• VOCs by TO-15 VOC parameters.</li> </ul>

## **Results of Chemical Analyses**

Laboratory data for soil, groundwater and soil vapor are summarized in Tables 5 to 15. Laboratory data deliverables for all samples evaluated in this RIR are provided in digital form in Appendix F, G and H, respectively.

## **5.0 ENVIRONMENTAL EVALUATION**

### **5.1 Geological and Hydrogeological Conditions**

#### **Stratigraphy**

The Bedrock Geologic Map of New York (Lower Hudson Sheet) identifies the lithology in the area of the Site as metamorphic rocks of sedimentary and volcanic origin, specifically Manhattan schist. The subsurface is characterized by bedrock that is exposed generally within one meter of the surface (Cadwell et al. 1989). Overburden soils are characterized as till deposited beneath glacial ice consisting of variable texture (boulders to silt), usually poorly sorted sand-rich diamict, with varying degrees of permeability and compaction measuring between 1-50 meters in thickness (Sirkin et al. 1988).

The Site is underlain by historic fill of approximately 10 feet of thickness followed by 20 feet of fine to medium grained sands mixed with interbedded layers of silt. Depth to bedrock is approximately at 55 feet below grade.

#### **Hydrogeology**

Groundwater occurs within the unconsolidated soils. A table of water level data for all monitoring wells is included in Table 2. The average depth to groundwater is 8 feet and the range in depth is 7 to 10 feet. A map of groundwater level elevations with groundwater contours and inferred flow lines is shown in Figure 6. Groundwater flow is from south to southwest.

### **5.2 Soil Chemistry**

Data collected during the RI is sufficient to delineate the vertical and horizontal distribution of contaminants in soil/fill at the Site. A summary table of data for chemical analyses performed on soil samples is included in Tables 5 to 9. Figure 7 shows the location and posts the values for soil/fill that exceed the 6NYCRR Part 375 Track 1 Soil Cleanup Objectives (SCOs).

Soil samples collected during the RI detected VOCs, SVOCs, Metals, PCBs, and Pesticides above the NYSDEC Track 1 SCOs. All exceedances were detected at depths up to 10 feet below grade and were found across the Site.

VOC exceedances were all detected between 6 and 10 feet below grade in SB-3, SB-4, and SB-6. No Track 1 SCO exceedances were detected in the shallow (0-2) or deep (two foot

interval below the depth of excavation) samples. Concentrations ranged from 6,800 to 61,000 micrograms per kilogram ( $\mu\text{g}/\text{kg}$ ) for 1,2,4-trimethylbenzene (in SB-4, SB-6, and SB-3); 380  $\mu\text{g}/\text{kg}$  for benzene (in SB-3); 1,100 to 8,200  $\mu\text{g}/\text{kg}$  for ethylbenzene (in SB-6 and SB-3); 9,400  $\mu\text{g}/\text{kg}$  for n-propylbenzene (in SB-3) and 920  $\mu\text{g}/\text{kg}$  for toluene (in SB-3).

SVOC exceedances were detected between 0 to 10 feet below grade in SB-1, SB-3, and SB-4. No Track 1 SCO exceedances were detected in the deep (two foot interval below the depth of excavation) samples. Concentrations ranged from 1,100 to 1,400  $\mu\text{g}/\text{kg}$  for benzo(b)fluoranthene (in SB-4 and SB-3); 540 to 670  $\mu\text{g}/\text{kg}$  for ideno[1,2,3-cd]pyrene (in SB-1, SB-3 and SB-4); 13,000  $\mu\text{g}/\text{kg}$  for naphthalene (in SB-3).

Metals exceedances were detected between 0 to 10 feet below grade in SB-1, SB-2, SB-4, and SB-5. No Track 1 SCO exceedances were detected in the deep (two foot interval below the depth of excavation) samples. Concentrations ranged from 31 to 190 milligrams per kilogram ( $\text{mg}/\text{kg}$ ) for chromium (in SB-4 and SB-2); 58 to 150  $\text{mg}/\text{kg}$  for copper (in SB-2 and SB-1); 65 to 100  $\text{mg}/\text{kg}$  for lead (in SB-1 and SB-2); 0.32  $\text{mg}/\text{kg}$  for mercury (in SB-2); 200 to 300  $\text{mg}/\text{kg}$  for zinc (in SB-2, SB-5, and SB-1).

PCBs exceedances were detected between 0 to 2 feet below grade in SB-1, SB-4, and SB-6. Concentrations ranged from 189 in SC-1 to 805  $\text{mg}/\text{kg}$  in SB-4.

Pesticides exceedances were detected between 0 to 10 feet below grade in SB-2, SB-4, and SB-6. Concentrations ranged from 4.76 to 10.3  $\mu\text{g}/\text{kg}$  for 4,4'-DDE (in SB-4, SB-6, and SB-2); 7.38 to 8.96  $\mu\text{g}/\text{kg}$  for 4,4'-DDT (in SB-6 and SB-4); 7.28  $\mu\text{g}/\text{kg}$  for dieldrin (in SB-6).

Endpoint soil samples collected from each boring at the proposed redevelopment excavation depth of 30 feet did not detect any VOC, SVOC, or metal constituents above Track 1 Unrestricted Use Criteria standards.

Based on these results, the exceedances found across the Site are indicative of past site operations as a service station and the presence of historic fill.

### **5.3 Groundwater Chemistry**

Data collected during the RI is sufficient to delineate the distribution of contaminants in groundwater at the Site. A summary table of data for chemical analyses performed on

groundwater samples is included in Tables 10 to 14. Exceedances of applicable groundwater standards are shown.

Figure 8 shows the location and posts the values for groundwater that exceed the New York State 6NYCRR Part 703.5 Class GA groundwater standards.

Groundwater samples collected during the December 2013 sampling round and RI (February 2014) detected VOCs, SVOCs and Metals above the NYSDEC AWQSGVs (no pesticides or PCBs exceeded the AWQSGVs).

Onsite where soil remediation has taken place in the past, total VOC concentrations varied from non-detect in MW-2 to 712.2 micrograms per liter ( $\mu\text{g/L}$ ) in temporary well SB-1. Immediately offsite, where soil remediation was not possible due to buried utilities, total VOC concentrations ranged from 727.8  $\mu\text{g/L}$  in MW-7 to 5,909  $\mu\text{g/L}$  in MW-5. VOCs exceedances from samples collected during this RI were consistent with previous groundwater sampling, which indicate the presence of petroleum impacts associated with the former service station, however the trend has been declining over the years. Natural attenuation of residual contamination has been demonstrated to be a significant factor in reducing BTEX concentrations over the past 5 years. Over the last five years, onsite well MW-2 has had BTEX decline from 183  $\mu\text{g/L}$  to non-detect and MW-3 declined from 9,407  $\mu\text{g/L}$  to 51.6  $\mu\text{g/L}$ . Offsite, well MW-5 has had BTEX decline from 5,970  $\mu\text{g/L}$  to 2,591  $\mu\text{g/L}$  and MW-7 has had BTEX decline from 11,198  $\mu\text{g/L}$  to 378.8  $\mu\text{g/L}$ . Benzene AWQSGV exceedances ranged from 7.1 to 380  $\mu\text{g/L}$  (in MW-3, MW-7, SB-1/TP-1, and MW-5), toluene AWQSGV exceedances ranged from 6.8 to 29  $\mu\text{g/L}$  (in MW-7 and MW-5), ethylbenzene AWQSGV exceedances ranged from 12 to 14,000  $\mu\text{g/L}$  (in MW-3, SB-1/TP-1, MW-7, and MW-5), m+p xylene AWQSGV exceedances ranged from 8.5 to 720  $\mu\text{g/L}$  (in MW-3, MW-7, and MW-5), and o-xylene concentrations ranged from 22 to 62  $\mu\text{g/L}$  (in MW-7, MW-3, and MW-5). Several other VOCs including 1,2,4,5-tetramethylbenzene (maximum [max.] concentration of 110  $\mu\text{g/L}$  in MW-5), 1,2,4-trimethylbenzene (max. concentration of 1,800  $\mu\text{g/L}$ ), 1,3,5-trimethylbenzene (max. of 450  $\mu\text{g/L}$ ), isopropylbenzene (max. of 98  $\mu\text{g/L}$ ), MTBE (max. of 26  $\mu\text{g/L}$ ), naphthalene (max. of 650  $\mu\text{g/L}$ ), n-butylbenzene (max. of 32  $\mu\text{g/L}$ ), n-propylbenzene (max. of 330  $\mu\text{g/L}$ ), p-isopropyltoluene (max. of  $\mu\text{g/L}$ ), and sec-butylbenzene (max. of 15  $\mu\text{g/L}$ ) were also detected at concentrations exceeding the AWQSGVs.

SVOCs exceedances were detected in SB-1/TP-1, MW-5 and MW-7 and included chrysene (0.11 µg/L in SB-1/TP-1), naphthalene (14 µg/L in MW-7 and 280 µg/L in MW-5), and pentachlorophenol (9.3 µg/L in MW-5).

Metals exceedances were detected in SB-1/TP-1, MW-2, MW-3, MW-5, and MW-7 for iron, lead, manganese, and sodium (both total and dissolved analysis). Dissolved metals exceeding AWQSGV included iron (max. of 35,100 µg/L in MW-5), manganese (max. of 2234 µg/L in MW-5) and sodium (max. of 749,000 µg/L in MW-2).

## **5.4 Soil Vapor Chemistry**

Data collected during the RI is sufficient to delineate the distribution of contaminants in soil vapor at the Site. A summary table of data for chemical analyses performed on soil vapor samples is included in Table 15.

Figure 9 shows the location and posts the values for soil vapor samples with detected concentrations.

VOCs were found in all three soil vapor points (SV-1, SV-2, and SV-3) at 4 to 5 feet below grade. The compounds detected were primarily hydrocarbons related to gasoline. The compounds detected in all three samples included: trimethylbenzene, cyclohexane, ethylbenzene, heptane, isooctane, xylenes, MTBE, n-hexane, and toluene ranging from 9.86 µg/m<sup>3</sup> (micrograms per cubic meter) for o-xylene in SV-3 to 9,250 µg/m<sup>3</sup> for isooctane in SV-2. Tetrachloroethene was detected at 15.6 µg/m<sup>3</sup> in one sample, SV-1. Because this compound was never used or stored on site, it is assumed to have originated from an offsite source.

The planned future use of the Site will include a vapor barrier for water proofing purposes. In addition, the soil excavation down to 30 feet below grade will result in the removal of all potential source material that could generate soil vapor.

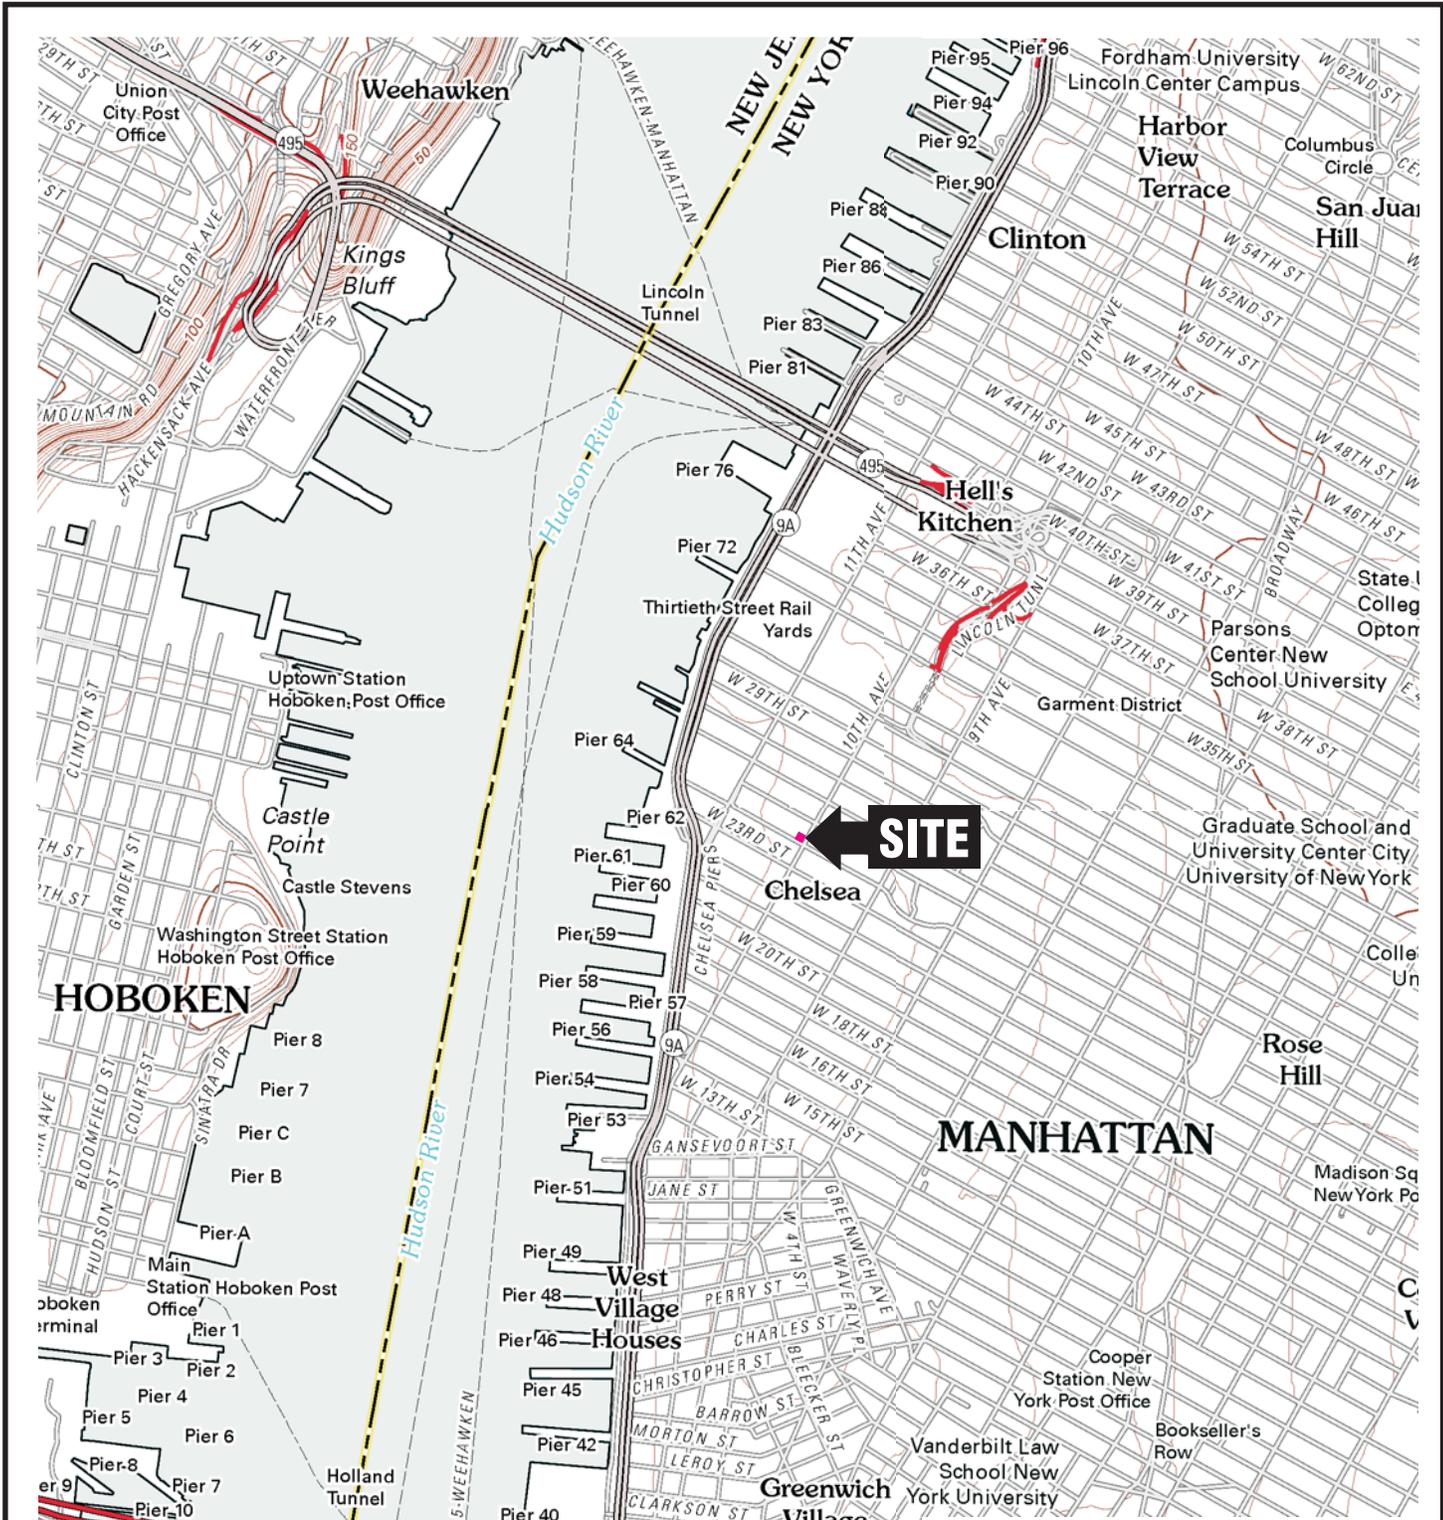

## **5.5 Prior Activity**

Based on an evaluation of the data and information from the RIR, disposal of significant amounts of hazardous waste is not suspected at this site.

## **5.6 Impediments to Remedial Action**

There are no known impediments to remedial action at this property.

**Inspection Date** March 12, 2013  
**Summary Date** April 18, 2013  
**Final Report Date** April 19, 2013

#### **4.1 EXECUTIVE SUMMARY**

Merritt Environmental Consulting Corp. (MECC) was retained by Victor Seven Inc. to conduct a Phase I Environmental Site Assessment (ESA) at 239-243 10<sup>th</sup> Avenue, AKA 501-503 West 24<sup>th</sup> Street, New York, New York 10001.

The on site investigation was conducted on March 12, 2013.

**Based on our site reconnaissance, database review and historical investigation, the following Recognized Environmental Conditions (RECs) were noted at the time of our inspection.**

*A Recognized Environmental Condition means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under compliance with laws.*

The site contains an active Getty gasoline station with two (2) active 10,000-gallon gasoline Underground Storage Tanks (USTs) present. At the time of our on-site inspection, MECC observed several groundwater monitoring wells at the site.

Our regulatory database review identified several New York State Department of Environmental Conservation (NYSDEC) Spill Numbers assigned to the site. The following spill case has not been closed:

Getty Gas #341  
239 10<sup>th</sup> Ave  
Spill No. 9707190  
Spill Date: 9/17/1997  
Close Date: Not Closed

On March 14, 2013, MECC submitted a freedom of information request to the NYSDEC for additional information regarding the on-site spill events.

The documents provided included several letters, reports, and other correspondence between the NYSDEC, Getty Corp., and Tyree Environmental Corp. dated from 2000 through 2012. According to a stipulation agreement effective August 10, 2006, Getty Corporation has agreed to clean up and remove the discharge of petroleum that occurred at the subject site.

The documentation indicates that the Spill No. 9707190 was assigned on September 17, 1997 when petroleum impacted soil was discovered. Three (3) 4,000-gallon gasoline USTs, twelve (12) 550-gallon gasoline USTs, one (1) 275-gallon fuel oil UST, two (2) fueling pump island, and the remote fill were removed in 1998 by Tyree Environmental Corp. A total of 1,852 tons of impacted soil were removed, and nine (9) endpoint soil samples were collected. Analysis of the soil samples revealed elevated concentrations of volatile organic compounds (VOCs). Spill No. 9810383 was assigned and subsequently closed.

Initial groundwater sampling conducted in 2000 revealed elevated concentrations of VOCs above NYSDEC Groundwater Quality Standards. Additional monitoring wells were installed from 2001 onward to delineate the contaminant plume. Numerous Quarterly Monitoring Reports prepared by Tyree Environmental Corp. for monitoring periods between August 2000 and December 2011 were provided. The most recent monitoring report indicates that gasoline-related VOCs exceeded NYSDEC groundwater standards in six (6) of the nine (9) monitoring wells. The compounds detected at elevated levels included include benzene, toluene, ethylbenzene, and xylenes (BTEX) as well as methyl tert-butyl ether (MTBE).

**On April 16, 2013, the following information was provided to MECC:**

- Quarterly Monitoring Report prepared by Tyree Environmental Corp. for the period April 2012 through June 2012
- Quarterly Monitoring Report prepared by Tyree Environmental Corp. for the period July 2012 through September 2012

On March 5, 2012 Tyree installed two (2) groundwater monitoring wells (MW-11 and MW-12) in order to further delineate downgradient groundwater impacts. Grab samples obtained from these wells following well development indicated VOCs slightly above NYSDEC Groundwater Quality Standards (GQS).

No VOCs were detected above NYSDEC GQS levels in the sample collected from MW-12 on August 1, 2013. MW-11 was not sampled due to sidewalk construction. Elevated concentrations of VOCs remain at well points MW-1, MW-2, MW-3, MW-5, MW-6, and MW-7. The highest levels were found in MW-7: benzene (889 ppb), toluene (71.9 ppb), ethylbenzene (2,190 ppb), total xylenes (4,670 ppb) and MTBE (88.3 ppb).

Tyree anticipated that the groundwater contamination will continue to attenuate naturally and requested that the NYSDEC close Spill No. 9707190.

On April 16, 2013, MECC researched the NYSDEC Spill Incidents Database, which indicates that this spill case remains open at this time.

**Conclusions/Recommendations**

**Based on the information provided, gasoline-related volatile organic compounds (VOCs) are present in the groundwater beneath the subject site at concentrations above NYSDEC Groundwater Quality Standards.**

**Quarterly groundwater monitoring has been ongoing since at least August 2000. Getty Corporation has entered into a Stipulation Agreement with the NYSDEC to clean up and remove the discharge of petroleum that occurred at the subject site, and has retained Tyree Environmental Corp to conduct the required work.**

**The most recent information provided consists of a Quarterly Monitoring Report prepared by Tyree Environmental Corp. for the period July 2012 through September 2012. This report indicates that groundwater contamination is minimal in the two (2) offsite wells required by the NYSDEC to further delineate the contamination downgradient of the site. Based on these findings, Tyree requested that the NYSDEC close Spill No. 9707190.**

**MECC notes that elevated concentrations of gasoline-related VOCs remain in the groundwater beneath the subject site, especially in the vicinity of wells MW-5, MW-6, and MW-7. On April 16, 2013, MECC researched the NYSDEC Spill Incidents Database, which indicates that this spill case remains open at this time.**

**Based on this information, it is unknown whether the results of this recent study will be found satisfactory by the NYSDEC or if additional work will be required to receive case closure.**

**NOTE**

*The subject property is listed as an "E" designated lot. According to a NYCDOB memorandum (12/23/03), "E" designated lots are amendments to the New York City Zoning Maps that may include environmental designations of certain tax lots that have physical or historical evidence of uses related to hazardous materials. Zoning Resolution 11-15 provides that the Department of Buildings may not issue a building permit for work on a tax lot labeled "E", until the Department of Buildings is provided with a report from the Department of Environmental Protection stating that the environmental requirements for the lot have been met.*

*The "E" designations would require that the fee owner of the site conduct a testing and sampling protocol and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings. Once approval is granted by the NYCDEP, the work can be performed in accordance to required regulations in order to receive a notice of satisfaction.*

*Under the NYCDEP E-designation program, a comprehensive environmental investigation must be conducted in accordance with receiving a NYCDEP notice to proceed-notice of satisfaction. The scope of work required, may uncover additional sub-surface impacts not previously discovered or tested for (IE: pesticides/herbicides/metals).*

*An "E" designation only needs to be complied with during the redevelopment of a site. Part of the "E" designation submittal includes architectural drawings on the proposed development. MECC has not been informed of the future usage of the site. Therefore, we cannot comment on the time frame in which the "E" designation would need to be addressed.*

**The following de minimis conditions were noted but are not considered Recognized Environmental Conditions (RECs).**

*A de minimis condition is one that generally does not present a material risk of harm to public health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate governmental agencies (excluding local asbestos & lead situations).*

**ITEM**

1	Two (2) unmarked storage drums were observed on the property. The contents of these drums are unknown. It is recommended that the drums be removed and disposed of properly.
---	--

**The following Historical Recognized Environmental Conditions (HRECs) were identified in our database search.**

*A Historical Recognized Environmental Condition (HREC) is an environmental condition which in the past would have been considered a Recognized Environmental Condition (REC), but which may or may not be considered a recognized environmental condition currently. Such as a past release of any hazardous substances or petroleum products which has been remediated, with such remediation accepted by the responsible regulatory agency (for example, as evidenced by the issuance of a no further action letter or equivalent).*

**The following New York State Department of Environmental Conservation (NYSDEC) spill events occurred at the subject property and have been closed:**

**Getty Gas Station

## **TABLE OF CONTENTS**

### **4.1) Executive Summary**

- 4.1.1 Recognized Environmental Conditions (RECs) / De Minimis Conditions
- 4.2.1 Historical Recognized Environmental Conditions (HRECs)

### **4.2) Introduction**

- 4.2.1 Purpose
- 4.2.2 Detailed Scope of Services
- 4.2.3 Significant Assumptions
- 4.2.4 Limitations and Exceptions
- 4.2.5 Special Terms and Conditions
- 4.2.6 User Reliance

### **4.3) Site Description**

- 4.3.1 Location and Legal Description
- 4.3.2 Site and Vicinity General Characteristics
- 4.3.3 Current Use of the Property
- 4.3.4 Descriptions of Structures, Roads, Other Improvements on the Site
- 4.3.5 Current Uses of the adjoining Properties

### **4.4) User Provided Information**

- 4.4.1 Title Records
- 4.4.2 Environmental Liens
- 4.4.3 Specialized Knowledge
- 4.4.4 Commonly Known or Reasonably Ascertainable Information
- 4.4.5 Valuation Reduction for Environmental Issues
- 4.4.6 Owner, Property Manager, and Occupant Information
- 4.4.7 Reason for Performing Phase I
- 4.4.8 Other / Additional Information Provided

### **4.5) Records Review**

- 4.5.1 Standard Environmental Record Sources
- 4.5.2 Database Searches
- 4.5.2A Additional Environmental Record Sources
- 4.5.2B Orphan Sites
- 4.5.3 Physical Setting Source(s)
- 4.5.4 Historical Use Information on the Property
- 4.5.4A Data Gaps
- 4.5.5 Historical Use Information on Adjoining Properties

**4.6) Site Reconnaissance**

- 4.6.1 Methodology and Limiting Conditions
- 4.6.2 General Site Setting
- 4.6.3 Exterior Observations
- 4.6.4 Interior Observations
- 4.6.5 Underground Storage Tanks (USTs) and Drums
- 4.6.6 Aboveground Storage Tanks (ASTs) and Drums
- 4.6.7 Electrical Transformers (PCBs)
- 4.6.8 Natural Gas
- 4.6.9 Vapor Encroachment /Vapor Intrusion
- 4.6.10 Non-Scope ASTM Considerations

**4.7) Interviews**

- 4.7.1 Interview with Owner
- 4.7.2 Interview with Site Representative
- 4.7.3 Interviews with Occupants

## **4.2) INTRODUCTION**

### **4.2.1 PURPOSE**

*The report was prepared by Merritt Environmental Consulting Corp., whose purpose is to provide comprehensive Phase I Environmental Site Assessments (ESA) in accordance with American Society of Testing Materials (ASTM E 1527-05) standards for a Phase I Environmental Site Assessment. The survey personnel are trained in the field of Environmental Site inspections as Certified Environmental Specialist (CES) by the Environmental Assessment Association as well as asbestos investigators by the Federal Environmental Protection Agency and NY State.*

### **4.2.2 DETAILED SCOPE OF SERVICES**

*For the Phase I Environmental Site Assessment (ESA), Merritt Environmental Consulting Corp. performed the following primary tasks:*

- 1. Physical site inspection by Certified Environmental Specialists (CES) who traversed the interior and exterior areas of the site by foot, in addition to conducting a review of adjacent areas and their exteriors.*
- 2. Investigations of historical usage of site based upon:
  - a. Interview of persons knowledgeable about the sites current and past usage.*
  - b. Review of historical sources provided**
- 3. Review of USGS geologic and 7.5 Minute Topographical Maps.*
- 4. Review of the federal and state environmental databases as per ASTM E1527-05 guidelines, as well as a review of pertinent information provided by local government records.*
- 5. Limited survey of site for the presence of electrical transformers that may contain Poly-chlorinated biphenyl (PCBs).*
- 6. Limited survey for the presence of friable asbestos containing material (ACM).*
- 7. Limited survey of site for the presence of lead based paint surfaces within common areas.*
- 8. Inspection of water supply, gas supply, garbage disposal practices, groundwater flow, storm and sanitary discharge methods.*
- 9. Review of Radon averages as published by the local and state regulatory agencies.*
- 10. Inspection for petroleum storage tanks, above and below grade, stored on site.*
- 11. Review of report by a senior certified environmental specialist (CES).*
- 12. Unless provided with a Bank Scope of Work (SOW) prior to inspection, no other items have been included.*

#### **4.2.3 SIGNIFICANT ASSUMPTIONS**

*Information and records provided by the client and outside vendors retained by Merritt Environmental Consulting Corp. are assumed to be correct and complete.*

#### **4.2.4 LIMITATIONS AND EXCEPTIONS**

*The contents of this report are correct to our knowledge and belief. This report and conclusions stated herein are, however, limited to actual knowledge based upon a visual inspection of the Property, the examination of readily available public records concerning the current and prior use of the Property, and interviews with individuals knowledgeable about present and past property uses.*

*Merritt Environmental Consulting Corp. has performed this Phase I Environmental Site Assessment (ESA) of the Property in accordance with the detailed scope of work in section 4.2.2.*

***Merritt Environmental Consulting Corp. cannot guarantee that the Property is completely free of hazardous substances or other materials or conditions that could subject the Client to potential liability. The presence or absence of any such condition can only be confirmed through the collection and analysis of soil and groundwater samples, as well as through testing building materials that may contain asbestos or lead paint. This is beyond the scope of the investigation.***

*Merritt Environmental Consulting Corp. has no interest other than professional in this Assessment and neither its performance, nor compensation for same, is contingent upon the findings and recommendations that are represented herein.*

#### *Transfer Property Acts*

*Many states have enacted property transfer laws that require notification of environmental conditions to a buyer. This ESA is not designed to meet those parameters or determine if a transfer act applies to the subject site*

#### **4.2.5 SPECIAL TERMS AND CONDITIONS**

*There are no special terms or conditions to the content of the report that are in addition to the scope outlined in Section 4.2.2.*

#### **4.2.6 RELIANCE**

*This Phase I Assessment was performed at the client's request utilizing methods and procedures that are consistent with acceptable professional standards ASTM-E1527-05.*

*The report has been prepared for the sole use of MECC's client. No other party may use the report without the written authority of MECC.*

### **4.3) SITE DESCRIPTION**

#### **4.3.1 LOCATION AND LEGAL DESCRIPTION**

The property address is 239-243 10<sup>th</sup> Avenue, AKA 501-503 West 24<sup>th</sup> Street. The legal site address is Block 696, Lot 32. The site is located in the Chelsea section of Manhattan, New York.

#### **4.3.2 SITE AND VICINITY GENERAL CHARACTERISTICS**

The current site is situated on a plot size 5,520 square feet.

The current structure was built in 1950.

The weather conditions during our on-site inspection consisted of rain. The temperature was approximately 52°.

#### **4.3.3 CURRENT USE OF THE PROPERTIES**

**The site contains an active Getty gasoline station with two (2) active 10,000-gallon gasoline Underground Storage Tanks (USTs) present. At the time of our on-site inspection, MECC observed several groundwater monitoring wells at the site. Our regulatory database review identified several New York State Department of Environmental Conservation (NYSDEC) Spill Numbers assigned to the site. Spill No. 9707190 has not been closed.**

#### **4.3.4 DESCRIPTIONS OF STRUCTURES, ROADS AND OTHER IMPROVEMENTS**

- A.** The current site consists of a 1-story commercial gas station with convenience store building, located on a plot size approximately 5,520 square feet (building size is approximately 1,904 square feet). There are no basements or subbasements at the subject site.
- B.** The site is located on the west side of 10<sup>th</sup> Avenue between the corners of West 24<sup>th</sup> Street and West 25<sup>th</sup> Street.
- C.** The heating system for this site is located on the roof and is supplied by an individual gas fired roof top HVAC unit.
- D. *STORM AND SANITARY DISCHARGE***

There are no on-site sanitary services such as cesspools or septic tanks located on the property. The sanitary discharge for this building empties into the New York City municipal sewer system located under West 24th Street.

## **E. WATER SUPPLY**

The U.S. Environmental Protection Agency estimates that drinking water can comprise 20% or more of a person's total exposure to lead. Although lead in drinking water is rarely the single cause of lead poisoning, it can significantly increase a person's total lead exposure. Infants who are fed baby formula or drinks mixed with hot water from the tap are the most vulnerable to lead in drinking water. Lead solder can leach into the water supply. Standing water in the piping system can aid in the leaching process.

The EPA action level for lead in drinking water is 15 parts per billion, (PPB).

A sample with lead levels that equal or exceed 15 PPB is considered to have elevated levels of lead, and it is recommended that response action be taken. This response action may include additional testing, replacement of plumbing components, or an operations and maintenance program.

## **FINDINGS**

A 1" copper water main enters the property from West 24<sup>th</sup> Street. The main is connected to a water meter located on the ground floor. The domestic water is supplied by New York City through aqueducts from upstate reservoirs.

There are no private ground water wells servicing this property.

No testing of the water was conducted under this scope.

## **F. GARBAGE DISPOSAL**

There are currently no active incinerators located on the property. The garbage to be disposed of is placed in the rear of the building in a portable can with cover. This container is picked up several times per week by private sanitation (Bavaro).

### **4.3.5 CURRENT USES OF THE ADJOINING PROPERTIES**

North	The Highline Park / Parking garage
South	Car wash / Commercial building
East	10 <sup>th</sup> Avenue / Trestler on 10 <sup>th</sup> / US Post Office
West	2-story commercial building

#### **4.4) USER PROVIDED INFORMATION**

##### **4.4.1 TITLE RECORDS**

No title records were provided.

##### **4.4.2 ENVIRONMENTAL LIENS**

Merritt Environmental Consulting Corp. (MECC) has retained Environmental Data Resources (EDR) to conduct an Environmental Lien Search on the site. No environmental liens were indicated (See Appendix A).

##### **4.4.3 SPECIALIZED KNOWLEDGE**

No information regarding specialized knowledge was provided.

##### **4.4.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION**

Merritt Environmental Consulting Corp. (MECC) has used the following New York State websites to research information on the subject property:

- NYC Housing and Preservation
- NYC Department of Finance
- NYC Department of Buildings
- Oasis

##### **4.4.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES**

No information regarding the valuation reduction for environmental issues was provided by the owner.

##### **4.4.6 OWNER, PROPERTY MANAGER AND OCCUPANT INFORMATION**

The current owner of the site is Leemilts Petroleum Inc. which purchased the property in 1977.

The current occupant is a commercial gasoline station.

##### **4.4.7 REASON FOR PERFORMING PHASE I**

Merritt Environmental Consulting Corp. (MECC) was retained to perform a Phase I Environmental Site Assessment (ESA) as an agent for the buyer conducting a due diligence evaluation prior to purchasing site.

##### **4.4.8 OTHER/ADDITIONAL INFORMATION PROVIDED**

Quarterly Monitoring Reports

## **4.5) RECORDS REVIEW**

### **4.5.1 STANDARD ENVIRONMENTAL RECORD SOURCES**

The federal government and New York State have compiled database lists of contaminated, potentially hazardous and regulated sites that may impact the subject property. Environmental Data Resources (EDR) has provided this information to Merritt Environmental Consulting Corp. (MECC).

### **4.5.2A DATABASE SEARCHES**

The following Federal and State databases were reviewed by Merritt Environmental Consulting Corp. (MECC) on March 13, 2013, with the corresponding distance.

#### **FINDINGS**

The closest 15 sites have been included in Appendix A.

**Due to the density of the area, several of the site printouts have been omitted from the report.**

#### **FEDERAL**

<b>Database</b>	<b>Radius Searched</b>
1. Federal National Priority List	1 Mile
2. Federal CERCLIS list	½ Mile
3. Federal RCRA TSD facilities list	½ Mile
4. Federal RCRA generators list	Site & Adjacent Properties
5. Federal ERNS list	Site

**National Priorities List (NPL)** - list compiled by EPA pursuant to CERCLA 42 USC 9605(a)(8)(B) of properties with the highest priority for cleanup pursuant to EPA's Hazard Ranking System.

Findings: 1 site located within a 1-mile radius.

**Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS)** - the list of sites compiled by EPA that EPA has investigated or is currently investigating for potential hazardous substance contamination for possible inclusion on the National Priorities List.

Findings: 1 site located within a ½-mile radius.

**Resource Conservation Recovery Act (RCRA) Treatment Storage Disposal (TSD) facilities** - those facilities on which treatment, storage, and/or disposal of hazardous wastes takes place, as defined and regulated by RCRA. Inclusion on the RCRA TSD list does not imply contamination has occurred at the site.

Findings: No sites located within a ½-mile radius.

**Resource Conservation Recovery Act (RCRA) generators list** - list kept by EPA of those persons or entities that generate hazardous wastes as defined and regulated by RCRA. Inclusion on the RCRA list does not imply contamination has occurred at the site.

Findings: No generators listed at property.  
22 generators listed within a ¼-mile radius.

**Emergency Response Notification System (ERNS) list** - list of reported CERCLA hazardous substance releases or spills in quantities greater than the reportable quantity, as maintained at the National Response Center. Notification requirements for such releases or spills are codified in 40 CFR Parts 302 & 355.

Findings: Site not listed.

### STATE AND LOCAL RECORDS

Database	Radius Searched
1. State lists of Haz. Waste Sites	1 Mile
2. State landfill/solid waste site lists	½ Mile
3. State leaking tank lists (LTANKS)	½ Mile
4. State registered tanks	¼ Mile
5. E Designation	Site

**Department of Environmental Conservation (DEC)** lists the contaminated sites throughout the State and classifies the degree of contamination. Number 1 being highly contaminated; number 5 being the least hazardous to the public.

**code:**

1. Causing or presenting an imminent danger of causing irreversible or irreparable damage to the public health or environment - immediate action required;
2. Significant threat to the public health or environment - action required;
- 2a. Temporary classification assigned to sites that have inadequate and/or insufficient data for inclusion in any of the other classifications;
3. Does not present a significant threat to the public health or the environment - action may be deferred;
4. Site is properly closed - requires continued management;
5. Site is properly closed, no evidence of present or potential adverse impact - no further action is required.

Findings: No sites located within a 1-mile radius.

**Solid Waste Disposal Site** - any place, location, tract of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term landfill and is also known as a garbage dump, trash dump or by similar terms.

Findings: 2 sites located within a ½-mile radius.

**Spill Logs/LTANKS list** – New York State Department of Environmental Conservation (NYSDEC) has a computerized list of spills that have occurred as of 1986, including the present status of the sites. In addition, the leaking tank (LTANKS) database was also reviewed for reported incidents in the area.

Findings: 83 LTANKS located within a ½-mile radius.  
48 NY Spills located within a 1/8-mile radius.

**The following events occurred at the target property:**

Getty Gas Station

239 10<sup>th</sup> Ave/Manh/Getty  
239 10<sup>th</sup> Avenue  
Spill No. 9005116  
Spill Date: 8/8/1990  
Close Date: 7/16/1992

On March 14, 2013, MECC submitted a freedom of information request to the NYSDEC for additional information regarding the on-site spill events.

The documents provided included several letters, reports, and other correspondence between the NYSDEC, Getty Corp., and Tyree Environmental Corp. dated from 2000 through 2012.

The documentation indicates that the Spill No. 9707190 was assigned on September 17, 1997 when petroleum impacted soil was discovered during the repair of a remote fill. Three (3) 4,000-gallon gasoline USTs, twelve (12) 550-gallon gasoline USTs, one (1) 275-gallon fuel oil UST, two (2) fueling pump island, and the remote fill were removed in 1998 by Tyree Environmental Corp. A total of 1,852 tons of impacted soil was removed, and nine (9) endpoint soil samples were collected. Analysis of the soil samples revealed elevated concentrations of volatile organic compounds (VOCs). Spill No. 9810383 was assigned and subsequently closed.

Initial groundwater sampling conducted in 2000 revealed elevated concentrations of VOCs above NYSDEC groundwater quality standards. Additional monitoring wells were installed from 2001 onward to delineate the contaminant plume. Numerous Quarterly Monitoring Reports prepared by Tyree Environmental Corp. for monitoring periods between August 2000 and December 2011 were provided. The most recent monitoring report indicates that gasoline-related VOCs exceeded NYSDEC groundwater standards in six (6) of the nine (9) monitoring wells. The compounds

detected at elevated levels included include benzene, toluene, ethylbenzene, and xylenes (BTEX) as well as methyl tert-butyl ether (MTBE).

On March 5, 2012 Tyree installed two (2) groundwater monitoring wells (MW-11 and MW-12) in order to further delineate downgradient groundwater impacts. Grab samples obtained from these wells following well development indicated VOCs slightly above NYSDEC Groundwater Quality Standards (GQS).

No VOCs were detected above NYSDEC GQS levels in the sample collected from MW-12 on August 1, 2013. MW-11 was not sampled due to sidewalk construction. Elevated concentrations of VOCs remain at well points MW-1, MW-2, MW-3, MW-5, MW-6, and MW-7. The highest levels were found in MW-7: benzene (889 ppb), toluene (71.9 ppb), ethylbenzene (2,190 ppb), total xylenes (4,670 ppb) and MTBE (88.3 ppb).

Tyree anticipated that the groundwater contamination will continue to attenuate naturally and requested that the NYSDEC close Spill No. 9707190.

On April 16, 2013, MECC researched the NYSDEC Spill Incidents Database, which indicates that this spill case remains open at this time.

**State registered tanks** - state lists of storage tanks required to be registered under Subtitle I, Section 9002 of RCRA.

Findings:           5 registered tanks located on site.  
                      90 registered tank sites located within a 1/4-mile radius.

**E Designation-** According to a NYCDOB memorandum (12/23/03), "E" designated lots are amendments to the New York City Zoning Maps that may include environmental designations of certain tax lots that have physical or historical evidence of uses related to hazardous materials. Zoning Resolution 11-15 provides that the Department of Buildings may not issue a building permit for work on a tax lot labeled "E", until the Department of Buildings is provided with a report from the Department of Environmental Protection stating that the environmental requirements for the lot have been met.

Findings:           **The subject property is listed as an "E" designated lot.**

**Lot 32, Tax Block 696**

**239 10 Avenue**

**E-No. E-142**

**Effective Date: 6/23/2005**

**Satisfaction date: Not Reported**

**Description: Underground Gasoline Storage Tanks Testing Protocol,  
Window Wall Attenuation & Alternate Ventilation**

The "E" designations would require that the fee owner of the site conduct a testing and sampling protocol and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings. Once approval is granted by the NYCDEP, the work can be performed in accordance to required regulations in order to receive a notice of satisfaction.

As previously outlined, an "E" designation only needs to be complied with during the redevelopment of a site. Part of the "E" designation submittal includes architectural drawings on the proposed development.

Under the NYCDEP E-designation program, a comprehensive environmental investigation must be conducted in accordance with receiving a NYCDEP notice to proceed-notice of satisfaction. The scope of work required, may uncover additional sub-surface impacts not previously discovered or tested for (IE: pesticides/herbicides/metals).

#### 4.5.2 ADDITIONAL RECORDS SEARCHED

Database	Radius Searched
1. Indian Reservation	1 Mile
2. Indian LUST	½ Mile
3. Indian UST	¼ Mile
4. Hist Auto Station	Site

**EDR Historical Auto Stations-** EDR has searched selected national collections of business directories and has collected listings of potential gas station /filling station /service station sites that were available to EDR researchers. EDR's review was limited to those categories that might, in EDR's opinion, include gas station /filling station /service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, etc.

Findings: **Site is listed.**

**Name: Power Test Gas Station**  
**Year: 1999-2002**  
**Address: 239 10<sup>th</sup> Ave**

**Name: S & J Petroleum**  
**Year: 2003**  
**Address: 239 10<sup>th</sup> Ave**

**Name: SRJ Petroleum**  
**Year: 2004**  
**Address: 239 10<sup>th</sup> Ave**

**Name: A & R Petroleum**  
**Year: 2010**  
**Address: 239 10<sup>th</sup> Ave**

#### 4.5.2B ORPHAN SITES

Our database review indicated several sites that cannot be positively plotted (orphan sites). A total of 20 sites were classified as orphans.

The subject site does not appear on the orphan list.

### **4.5.3 PHYSICAL SETTING SOURCES**

#### **A. BODIES OF WATER**

The nearest body of water to the subject site is the Hudson River, which is approximately 1/4 mile west of the site.

#### **B. GROUND WATER FLOW**

Through information provided by EDR, hydrological data involving ground water flow has been obtained. Based on our findings, the hydrological groundwater flows in a westerly direction eventually emptying into the Hudson River.

Groundwater in this area is at a depth of approximately 12 feet.

Drinking water for the five boroughs has been supplied by the New York reservoir system for many years (See Map in Appendix A). Groundwater is not a primary source of drinking water for Manhattan.

#### **C. ECOLOGICAL SENSITIVE AREA**

Based on information provided by Environmental Data Resources (EDR), no designated wetlands are located in the immediate vicinity of the property.

#### **SITE GEOLOGY AND TOPOGRAPHY**

Information pertaining to the hydrogeologic setting in the vicinity of the subject property was obtained from a review of selected published documents and maps. United States Geological Survey (USGS) 7.5-minute Topographic Maps were used to characterize surface topography, water table elevation and drainage. Subsurface characteristics were obtained from USGS Surficial and Bedrock Geology Maps from the lower Hudson Sheet.

#### **4.5.4 HISTORICAL USE INFORMATION ON THE PROPERTY**

- A. Sanborn Fire Insurance maps** of the site and immediate area were available for the years 1890, 1899, 1911, 1928, 1930, 1950, 1976, 1979, 1980, 1982, 1985, 1987, 1988, 1991, 1992, 1993, 1994, 1995, 1996, 2001, 2002, 2003, 2004, and 2005. The maps indicate the following information:

*1890 through 1928 Sanborn Maps*

The subject property and adjoining properties consist of commercial and manufacturing facilities.

*1930 through 2005 Sanborn Maps*

The subject property is developed with a filling station. The adjoining properties consist of an auto repair shop to the north, a car wash to the south across W. 24<sup>th</sup> Street, commercial and residential buildings to the east across 10<sup>th</sup> Avenue, and a former rail line (present-day Highline Park) followed by auto repair shops to the west.

- B. Aerial Photographs** of the site and immediate area were available for the years 1924, 1943, 1954, 1966, 1975, 1984, 1995, 1997, 2006, 2008, 2009, 2010 and 2011. The photos indicate the following information:

This section of Manhattan has been developed with residential and commercial buildings from 1924 through the latest aerial photo available (2011).

**C. City Directories**

City Directories were ordered for the site (See Appendix A). The search indicated the following:

1920-1927	P Frink Inc
1938-2006	Service Station

Due to the size of the City Directories provided, the adjacent property listings have been omitted. They are on file in our office.

**D. Topographic Maps**

A topographic map (topo) is a color coded line-and-symbol representation of natural and selected artificial features plotted to a scale. Topos show the shape, elevation, and development of the terrain in precise detail by using contour lines and color coded symbols. The colors of the lines usually indicate similar classes of information. For example, topographic contours (brown); lakes, streams, irrigation ditches, etc. (blue); land grids and important roads (red); secondary roads and trails, railroads, boundaries, etc. (black).

Historical topographic maps are a valuable historical resource for documenting the prior use of a property and its surrounding area.

Topographic Maps of the site and immediate area were available for the years 1891, 1900, 1905, 1925, 1947, 1955, 1967, and 1981.

#### **4.5.4A DATA GAPS**

No significant data gaps were noted within the historical research conducted by Merritt Environmental Consulting Corp (MECC).

#### **4.5.5 HISTORICAL USE INFORMATION ON ADJOINING PROPERTIES**

The above historical sources were reviewed by Merritt Environmental Consulting Corp. (MECC) for the adjoining properties on the north, south, east & west.

The adjoining properties consist of an auto repair shop to the north, a car wash to the south across W. 24<sup>th</sup> Street, commercial and residential buildings to the east across 10<sup>th</sup> Avenue, and a former rail line (present-day Highline Park) followed by auto repair shops to the west.

## **4.6) SITE RECONNAISSANCE**

### **4.6.1 METHODOLOGY AND LIMITING CONDITIONS**

At the time of our inspection, the following areas were accessed by Mr. Gary Pollack, of our staff: ground floor, utilities areas, mechanical areas, retail space, parking lots, and all accessible exterior areas of the site.

### **4.6.2 GENERAL SITE SETTING**

West side of 10<sup>th</sup> Avenue; Topography is flat

### **4.6.3 EXTERIOR OBSERVATIONS**

**Two unmarked storage drums were observed on the property. The content of these drums is unknown. It is recommended that the drums be removed and disposed of properly.**

**Several monitoring test wells were observed on the property on the front sidewalk, driveway, and parking lot.**

### **4.6.4 INTERIOR OBSERVATIONS**

The interior inspection revealed no evidence of any on-site staining of petroleum products, chemicals, or other hazardous materials.

### **4.6.5 UNDERGROUND STORAGE TANKS (UST) AND DRUMS**

Each year, thousands of petroleum leaks and spills are reported to the Department of Environmental Conservation (DEC). Thousands of others may go unreported mainly because they have not yet been discovered. These leaks can enter the ground, seep into an aquifer and contaminate a water supply. In some places, water wells have been closed down and people have had to vacate their homes. Even small amounts of petroleum in soil or groundwater can be tasted or smelled and can subsequently affect health.

Leaking petroleum storage tanks are a major source of groundwater contamination. The DEC estimates that there may be as many as 185,000 tanks storing petroleum, which are subject to state regulations. Many of these tanks are bare steel and were installed in the 1950s and 1960s. These tanks have weakened by rust and have a fifty percent chance of developing leaks.

### ***FINDINGS***

**There are two (2) 10,000-gallon underground gasoline storage tanks (USTs) buried under the ground slab driveway on the property holding gasoline.**

### ***TANK REGISTRATION:***

The tanks are currently registered with New York State Department of Environmental Conservation (NYSDEC), (permit #2-151270), which expires on June 29, 2014.

#### **4.6.6 ABOVEGROUND STORAGE TANKS (AST)**

No aboveground tanks or storage drums were observed in any of the accessible areas at the time of our inspection.

#### **4.6.7 ELECTRICAL TRANSFORMERS (PCBs)**

Transformers often contain poly-chlorinated biphenyl (PCB) Askarel coolant liquid and are generally used in hazardous locations where flammability is of concern. PCB transformers are no longer produced because of EPA's ban on the manufacture of new equipment containing PCBs. However, older equipment does remain in certain areas and may contain PCBs.

As of January, 1979, Polychlorinated Biphenyls (PCB) and other toxic materials used in fluorescent ballasts were phased out. Any building constructed prior to 1979 may contain PCB in minor quantities and is not considered a major health threat.

Further evaluation goes beyond the scope of a Phase I Environmental Report. Should you need any additional information, a technical engineer may be contacted for assistance.

#### **FINDINGS**

No electrical transformers were observed on the property.

As per the Toxic Substance Control Act (TSCA), the transformer owner, i.e. the utility company, is responsible for all transformer maintenance and all spills of PCBs from their transformers.

Fluorescent light fixtures were not inspected for PCB content under the scope of this assessment.

#### **4.6.8 NATURAL GAS**

There is one underground gas main entering the building from 10<sup>th</sup> Avenue. The main is connected to a meter located on the exterior of the building. The gas is then distributed to the heating system only.

Gas service is provided by Con Edison.

#### **4.6.9 VAPOR ENCROACHMENT /VAPOR INTRUSION CONDITION**

A Vapor Encroachment Condition (VEC) is defined by ASTM E2600-10 as “the presence or likely presence of contaminant of concern (COC) vapors in the subsurface of the Target Property (TP) caused by the release of vapors from the contaminated soil or groundwater or both either on or near the TP”.

Vapor Intrusion (VI) occurs when contaminant of concern (COC) vapors enter a structure from the subsurface and impact the indoor air quality (IAQ) of a building. At high enough concentrations, vapor intrusion may present a health risk to the building’s occupants.

MECC conducted a review of historical resources and regulatory database listings to identify any potential sources of contamination at the subject site that may result in Vapor Encroachment or Vapor Intrusion. In addition, MECC has reviewed available information for surrounding properties within the appropriate search distances to identify potential sources of a VEC/VIC at the subject site.

This is not intended to meet the criteria of a Vapor Encroachment Screen (VES) as outlined by ASTM E2600-10 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transaction. This is beyond the scope of a Phase I ESA.

#### **FINDINGS:**

The site contains an active Getty gasoline station with two (2) active 10,000-gallon gasoline Underground Storage Tanks (USTs) present. At the time of our on-site inspection, MECC observed several groundwater monitoring wells at the site.

Our regulatory database review identified several New York State Department of Environmental Conservation (NYSDEC) Spill Numbers assigned to the site. The following spill case has not been closed:

Getty Gas #341  
239 10<sup>th</sup> Ave  
Spill No. 9707190  
Spill Date: 9/17/1997  
Close Date: Not Closed

On March 14, 2013, MECC submitted a freedom of information request to the NYSDEC for additional information regarding the on-site spill events.

The documents provided included several letters, reports, and other correspondence between the NYSDEC, Getty Corp., and Tyree Environmental Corp. dated from 2000 through 2012. According to a stipulation agreement effective August 10, 2006, Getty Corporation has agreed to clean up and remove the discharge of petroleum that occurred at the subject site.

The documentation indicates that the Spill No. 9707190 was assigned on September 17, 1997 when petroleum impacted soil was discovered. Three (3) 4,000-gallon gasoline USTs, twelve (12) 550-gallon gasoline USTs, one (1) 275-gallon fuel oil UST, two (2) fueling pump island, and the remote fill were removed in 1998 by Tyree Environmental Corp. A total of 1,852 tons of impacted soil were removed, and nine (9) endpoint soil samples were collected. Analysis of the soil samples revealed elevated concentrations of volatile organic compounds (VOCs). Spill No. 9810383 was assigned and subsequently closed.

Initial groundwater sampling conducted in 2000 revealed elevated concentrations of VOCs above NYSDEC Groundwater Quality Standards. Additional monitoring wells were installed from 2001 onward to delineate the contaminant plume. Numerous Quarterly Monitoring Reports prepared by Tyree Environmental Corp. for monitoring periods between August 2000 and December 2011 were provided. The most recent monitoring report indicates that gasoline-related VOCs exceeded NYSDEC groundwater standards in six (6) of the nine (9) monitoring wells. The compounds detected at elevated levels included benzene, toluene, ethylbenzene, and xylenes (BTEX) as well as methyl tert-butyl ether (MTBE).

**On April 16, 2013, the following information was provided to MECC:**

- Quarterly Monitoring Report prepared by Tyree Environmental Corp. for the period April 2012 through June 2012
- Quarterly Monitoring Report prepared by Tyree Environmental Corp. for the period July 2012 through September 2012

On March 5, 2012 Tyree installed two (2) groundwater monitoring wells (MW-11 and MW-12) in order to further delineate downgradient groundwater impacts. Grab samples obtained from these wells following well development indicated VOCs slightly above NYSDEC Groundwater Quality Standards (GQS).

No VOCs were detected above NYSDEC GQS levels in the sample collected from MW-12 on August 1, 2013. MW-11 was not sampled due to sidewalk construction. Elevated concentrations of VOCs remain at well points MW-1, MW-2, MW-3, MW-5, MW-6, and MW-7. The highest levels were found in MW-7: benzene (889 ppb), toluene (71.9 ppb), ethylbenzene (2,190 ppb), total xylenes (4,670 ppb) and MTBE (88.3 ppb).

Tyree anticipated that the groundwater contamination will continue to attenuate naturally and requested that the NYSDEC close Spill No. 9707190.

On April 16, 2013, MECC researched the NYSDEC Spill Incidents Database, which indicates that this spill case remains open at this time.

#### 4.6.10 NON-SCOPE ASTM CONSIDERATIONS

There may be environmental issues or conditions at a property that parties may wish to assess in connection with commercial real estate that are outside the scope of this practice (the non-scope considerations). Some substances may be present on a property in quantities and under conditions that may lead to contamination of the property or of nearby properties but are not included in CERCLA's definition of hazardous substances (42 U.S.C. §9601(14)) or do not otherwise present potential CERCLA liability. In any case, they are beyond the scope of this practice. There may be standards or protocols for assessment of potential hazards and conditions associated with non-scope conditions developed by governmental entities, professional organizations, or other private entities. Asbestos-Containing Building Materials, Lead-Based Paint, and Radon are several non-scope considerations that persons may want to assess in connection with commercial real estate.

#### A. ASBESTOS

The EPA has identified over 3,000 products used in buildings containing asbestos fibers. Our inspection of the premises is to determine the presence of **friable asbestos**, as defined by the Federal Environmental Protection Agency as any material, which may be pulverized with hand pressure. This material has the potential to release asbestos fibers into the atmosphere and in turn may be hazardous to the building occupants' health.

**We have not inspected for or included in our report any building materials, which may contain non-friable asbestos such as vinyl asbestos floor tiles, exterior asbestos shingles, asbestos roofing felts, etc. Many of these materials are still manufactured today and not considered hazardous unless the material is cut, sawed, or grounded in a manner that might release asbestos fibers into the atmosphere.**

We have used the 4-category system as defined by Asbestos Hazardous Emergency Response Act (AHERA) to designate the different conditions of asbestos noted throughout the areas of the site. This report is not designed to meet the AHERA protocols.

1. Good Condition  
*Material with no visible damage or deterioration to very limited damage or deterioration.*
  
2. Fair Condition  
*Material with one or more of the following characteristics:*
  - *A few water stains or less than one tenth of insulation with missing jackets.*
  - *Crushed insulation or water stains, gouges, puncture or mars on up to one tenth of the insulation if the damage is evenly distributed (or up to one quarter if the damage is localized).*
  
3. Poor Condition  
*Material with one or more of the following characteristics:*
  - *Missing jackets on at least one tenth of the piping equipment.*
  - *Crushed or heavily gouged or punctured insulation on at least one tenth of pipe runs/risers, boiler, tank duct, etc., if the damage is evenly distributed (one quarter if the damage is localized).*

4. Significantly Damaged

*Thermal systems insulation on pipes, boilers, tanks, ducts, and other thermal system insulation equipment which the insulation has lost its structural integrity, or its covering, in whole or in part, is crushed, water-stained, gouged, punctured, missing, or not intact such that is not able to contain fibers. Damage may be further illustrated by occasional puncture, gouges, or other signs of physical injury to ACM; occasional water damage on the protective coverings/jackets; or exposed ACM ends or joints. Asbestos debris, originating from the ACM in question may also indicate damage.*

## **ASBESTOS FINDINGS**

**No friable asbestos containing material was observed in any of the accessible areas of the building.**

Many buildings' fireproofing is concealed in a plenum above the ceiling. These areas were not accessible and, therefore, we are unable to determine the type of fireproofing for those areas above the first floor.

Amounts of ACM identified by MECC should be verified by a licensed abatement company. Amounts are not provided as an estimating tool of material to be addressed.

Asbestos samples taken do not satisfy the requirements of an asbestos survey promulgated by city, state or federal regulations. They were taken to identify the presence of asbestos in certain locations (i.e. pipe insulation, boiler jackets, fire proofing, etc.).

## **B. LEAD BASED PAINT**

Lead-based paint (LBP) was used extensively in buildings and structures that were constructed prior to 1978 and can be hazardous when damaged (i.e., chipped, broken, crumbling, pulverized); lead is toxic to humans particularly to children, if ingested, inhaled, or otherwise absorbed. Exposure to lead can cause health problems in children ranging from damage to the brain and nervous system, behavioral and learning problems (such as hyperactivity), slowed growth, hearing problems and headaches. In adults the health problems can range from difficulties during pregnancy, other reproductive problems, high blood pressure, digestive problems, nerve disorders, memory and concentration problems and muscle and joint pain.

Our research indicates the building was constructed **prior to 1978**, and lead based paint is assumed to be present throughout the building.

## **FINDINGS**

The painted surface in the common areas inspected by Merritt Environmental Consulting Corp's staff did not demonstrate signs of peeling or cracking. No samples of the paint were analyzed since this is beyond the scope of this Assessment.

Research of the Housing Preservation and Development (HPD) Department records did not

reveal any lead based paint violations against the subject site (See Appendix A).

New York City Local Law 101A was enacted on August 1, 2004 and focuses on dwelling units and common areas in buildings built before 1960. Owner occupied cooperatives and condominiums are exempt – but common areas in these buildings are covered under the law. An owner has the obligation to investigate in any apartment in a pre-1960 building occupied by a child seven years of age or under and in common areas for all of the conditions that might create a lead paint hazard. These investigations are required at least once a year.

The owner is required to correct a lead based paint hazard which is defined as “any condition in a dwelling or dwelling unit that causes exposure to lead from lead-contaminated dust, or from lead based paint that is peeling, or from lead based paint that is present on chewable surfaces, deteriorated sub-surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects”.

This Phase I Environmental Site Assessment (ESA) is not designed to make a determination of a building owners compliance with local law 101A.

In addition, the site is not used for residential purposes.

A lead based paint survey in accordance with The Housing & Urban Development (HUD) guidelines was not conducted under the scope of this assessment.

#### **C. MOLD**

Our on-site inspection did not reveal any visible evidence of mold or mold spores in any of the accessible areas inspected.

#### **D. RADON**

Radon first gained national attention in early 1984, when extremely high levels of indoor radon were found in areas of Connecticut, Pennsylvania, New Jersey, and New York. Radon is a colorless, odorless radioactive gas. Nearly one out of every 15 homes in the U.S. is estimated to have elevated annual average levels of indoor radon. EPA established a Radon Program in 1985 to assist States and homeowners in reducing their risk of lung cancer from indoor radon.

#### ***FINDINGS***

The New York State Department of Health indicates the average radon level for this area of Manhattan to be 1.4 picocuries per liter (pCi/L), which is below the EPA action level of 4 pCi/L.

**A radon canister was not initiated at the time of our inspection since this is beyond the scope of this assessment.**

## **4.7) INTERVIEWS**

### **4.7.1 INTERVIEW WITH OWNER**

The owner was not present during our inspection.

### **4.7.2 INTERVIEW WITH SITE REPRESENTATIVE**

During our on-site visit, we interviewed Verny Valverde, who is the purchaser's representative.

Copies of the above records of communications are included in Appendices, Section 10.6.

### **4.7.3 INTERVIEWS WITH OCCUPANTS (TENANTS)**

No other individuals were interviewed regarding the facility.

### **4.7.4 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS**

We are researching the New York City Health & Fire Department records for any information of hazardous operations including, past spills, leaks or violations. The information provided indicates that no records were found responsive to our request.

According to a NYCDOB memorandum (12/23/03), "E" designated lots are amendments to the New York City Zoning Maps that may include environmental designations of certain tax lots that have physical or historical evidence of uses related to hazardous materials. Zoning Resolution 11-15 provides that the Department of Buildings may not issue a building permit for work on a tax lot labeled "E", until the Department of Buildings is provided with a report from the Department of Environmental Protection stating that the environmental requirements for the lot have been met.

**On March 13, 2013 MECC researched the NYC Building Department and found that there are "E" designations associated with the property. The process to remove an "E" designation and receive a notice of satisfaction includes the following:**

- **Submitting a work plan to the New York City Department of Environmental Protection**
- **Conducting a sub-surface investigation**
- **Submit results to the New York City Department of Environmental Protection**

**The process can take several months and cost over \$20,000 to satisfy the requirement for removing an "E" designation. However, the "E" designation is only addressed during the redevelopment of a site. MECC has not been informed of the future usage of the site. Therefore, we cannot comment on the time frame in which the "E" designation would need to be addressed.**

### **4.7.5 INTERVIEWS WITH OTHERS**

No additional interviews were conducted as part of this assessment.

A questionnaire was forwarded to Ran Korolik on March 13, 2013. We have not yet received a completed questionnaire (See Appendix A).

#### **4.8) REPORT FINDINGS**

**Based on our site reconnaissance, database review and historical investigation, the following Recognized Environmental Conditions (RECs) were noted at the time of our inspection.**

*A Recognized Environmental Condition means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under compliance with laws.*

The site contains an active Getty gasoline station with two (2) active 10,000-gallon gasoline Underground Storage Tanks (USTs) present. At the time of our on-site inspection, MECC observed several groundwater monitoring wells at the site.

Our regulatory database review identified several New York State Department of Environmental Conservation (NYSDEC) Spill Numbers assigned to the site. The following spill case has not been closed:

Getty Gas #341  
239 10<sup>th</sup> Ave  
Spill No. 9707190  
Spill Date: 9/17/1997  
Close Date: Not Closed

On March 14, 2013, MECC submitted a freedom of information request to the NYSDEC for additional information regarding the on-site spill events.

The documents provided included several letters, reports, and other correspondence between the NYSDEC, Getty Corp., and Tyree Environmental Corp. dated from 2000 through 2012. According to a stipulation agreement effective August 10, 2006, Getty Corporation has agreed to clean up and remove the discharge of petroleum that occurred at the subject site.

The documentation indicates that the Spill No. 9707190 was assigned on September 17, 1997 when petroleum impacted soil was discovered. Three (3) 4,000-gallon gasoline USTs, twelve (12) 550-gallon gasoline USTs, one (1) 275-gallon fuel oil UST, two (2) fueling pump island, and the remote fill were removed in 1998 by Tyree Environmental Corp. A total of 1,852 tons of impacted soil were removed, and nine (9) endpoint soil samples were collected. Analysis of the soil samples revealed elevated concentrations of volatile organic compounds (VOCs). Spill No. 9810383 was assigned and subsequently closed.

Initial groundwater sampling conducted in 2000 revealed elevated concentrations of VOCs above NYSDEC Groundwater Quality Standards. Additional monitoring wells were installed from 2001 onward to delineate the contaminant plume. Numerous Quarterly Monitoring Reports prepared by Tyree Environmental Corp. for monitoring periods between August 2000 and December 2011 were provided. The most recent monitoring report indicates that gasoline-related VOCs exceeded NYSDEC groundwater standards in six (6) of the nine (9) monitoring wells. The compounds detected at elevated levels included benzene, toluene, ethylbenzene, and xylenes (BTEX) as well as methyl tert-butyl ether (MTBE).

**On April 16, 2013, the following information was provided to MECC:**

- Quarterly Monitoring Report prepared by Tyree Environmental Corp. for the period April 2012 through June 2012
- Quarterly Monitoring Report prepared by Tyree Environmental Corp. for the period July 2012 through September 2012

On March 5, 2012 Tyree installed two (2) groundwater monitoring wells (MW-11 and MW-12) in order to further delineate downgradient groundwater impacts. Grab samples obtained from these wells following well development indicated VOCs slightly above NYSDEC Groundwater Quality Standards (GQS).

No VOCs were detected above NYSDEC GQS levels in the sample collected from MW-12 on August 1, 2013. MW-11 was not sampled due to sidewalk construction. Elevated concentrations of VOCs remain at well points MW-1, MW-2, MW-3, MW-5, MW-6, and MW-7. The highest levels were found in MW-7: benzene (889 ppb), toluene (71.9 ppb), ethylbenzene (2,190 ppb), total xylenes (4,670 ppb) and MTBE (88.3 ppb).

Tyree anticipated that the groundwater contamination will continue to attenuate naturally and requested that the NYSDEC close Spill No. 9707190.

On April 16, 2013, MECC researched the NYSDEC Spill Incidents Database, which indicates that this spill case remains open at this time.

**Conclusions/Recommendations**

**Based on the information provided, gasoline-related volatile organic compounds (VOCs) are present in the groundwater beneath the subject site at concentrations above NYSDEC Groundwater Quality Standards.**

**Quarterly groundwater monitoring has been ongoing since at least August 2000. Getty Corporation has entered into a Stipulation Agreement with the NYSDEC to clean up and remove the discharge of petroleum that occurred at the subject site, and has retained Tyree Environmental Corp to conduct the required work.**

**The most recent information provided consists of a Quarterly Monitoring Report prepared by Tyree Environmental Corp. for the period July 2012 through September 2012. This report indicates that groundwater contamination is minimal in the two (2) offsite wells required by the NYSDEC to further delineate the contamination downgradient of the site. Based on these findings, Tyree requested that the NYSDEC close Spill No. 9707190.**

**MECC notes that elevated concentrations of gasoline-related VOCs remain in the groundwater beneath the subject site, especially in the vicinity of wells MW-5, MW-6, and MW-7. On April 16, 2013, MECC researched the NYSDEC Spill Incidents Database, which indicates that this spill case remains open at this time.**

**Based on this information, it is unknown whether the results of this recent study will be found satisfactory by the NYSDEC or if additional work will be required to receive case closure.**

**NOTE**

*The subject property is listed as an "E" designated lot. According to a NYCDOB memorandum (12/23/03), "E" designated lots are amendments to the New York City Zoning Maps that may include environmental designations of certain tax lots that have physical or historical evidence of uses related to hazardous materials. Zoning Resolution 11-15 provides that the Department of Buildings may not issue a building permit for work on a tax lot labeled "E", until the Department of Buildings is provided with a report from the Department of Environmental Protection stating that the environmental requirements for the lot have been met.*

*The "E" designations would require that the fee owner of the site conduct a testing and sampling protocol and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings. Once approval is granted by the NYCDEP, the work can be performed in accordance to required regulations in order to receive a notice of satisfaction.*

*Under the NYCDEP E-designation program, a comprehensive environmental investigation must be conducted in accordance with receiving a NYCDEP notice to proceed-notice of satisfaction. The scope of work required, may uncover additional sub-surface impacts not previously discovered or tested for (IE: pesticides/herbicides/metals).*

*An "E" designation only needs to be complied with during the redevelopment of a site. Part of the "E" designation submittal includes architectural drawings on the proposed development. MECC has not been informed of the future usage of the site. Therefore, we cannot comment on the time frame in which the "E" designation would need to be addressed.*

**The following de minimis conditions were noted but are not considered Recognized Environmental Conditions (RECs).**

*A de minimis condition is one that generally does not present a material risk of harm to public health or the environment and that generally would not be subject of an enforcement action if brought to the attention of appropriate governmental agencies (excluding local asbestos & lead situations).*

**ITEM**

1	Two (2) unmarked storage drums were observed on the property. The contents of these drums are unknown. It is recommended that the drums be removed and disposed of properly.
---	--

**The following Historical Recognized Environmental Conditions (HRECs) were identified in our database search.**

*A Historical Recognized Environmental Condition (HREC) is an environmental condition which in the past would have been considered a Recognized Environmental Condition (REC), but which may or may not be considered a recognized environmental condition currently. Such as a past release of any hazardous substances or petroleum products which has been remediated, with such remediation accepted by the responsible regulatory agency (for example, as evidenced by the issuance of a no further action letter or equivalent).*

The following New York State Department of Environmental Conservation (NYSDEC) spill events occurred at the subject property and have been closed:

Getty Gas Station  
239 10 Av  
Spill No. 8806159  
Spill Date: 10/20/1988  
Close Date: 7/29/1994

Getty Gas Station  
239 10 Av

#### **4.9 OPINIONS**

Based on our site reconnaissance, database review, historical review and interviews with persons familiar with the subject site and adjacent properties, the above Recognized Environmental Conditions (RECs) and de minimis conditions were identified under the scope of services outlined in Section 4.2.2.

Since the Historical Recognized Environmental Conditions (HRECs) have been addressed, they do not appear to impact the site.

#### **4.10 CONCLUSION**

Merritt Environmental Consulting Corp has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Practice E1527 of 239-243 10<sup>th</sup> Avenue, AKA 501-503 West 24<sup>th</sup> Street, New York, New York 10001, the property. Any exceptions to, or deletions from, this practice are described in Section [4.2.2] of this report.

#### **4.11 DEVIATIONS**

The assessment was performed in accordance with the ASTM 1527-05 Standards as well as the detailed scope of services outlined in section 4.2.2 of this report.

**4.12 ADDITIONAL SERVICES**

No additional services were performed beyond the detailed scope of services in section 4.2.2.

**4.13 REFERENCES**

All references relied upon are located in Appendix A.

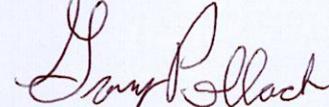

**4.14 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL**

We thank you for allowing Merritt Environmental Consulting Corp., to serve as your Environmental Consultant for this project. We declare that, to the best our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312, and

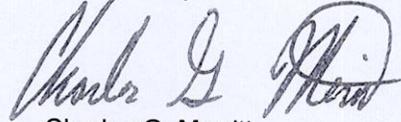

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the "All Appropriate Inquiries" in conformance with the standards and practices set forth in 40 CFR Part 312.

Should you have any questions regarding the contents of this report, please feel free to contact us to discuss the report in further detail.

# FINAL ASSESSMENT ROLL 2012-2013 | City of New York

Taxable Status Date: **January 5, 2012**

Re: Freedom of Information Request

Dear Mr. LoCicero:

Merritt Environmental Consulting Corp. (MECC) would like to review any files retained by the NYS Department of Health concerning the following property:

- **239-243 10<sup>th</sup> Avenue aka 501-503 West 24<sup>th</sup> Street  
New York, New York 10001**
- **Block: 696, Lot: 32**

The information we are interested in is underground storage tanks, site contamination, or violations that have been issued to the site. If you have any questions, please feel free to contact me.

Very truly yours,

A handwritten signature in black ink, appearing to read 'Charles G. Merritt', is written over a circular stamp or seal that is partially obscured by the signature.

Re: FOIL #: 13-03-256  
Your Project No. M9245

Dear Mr. Merritt:

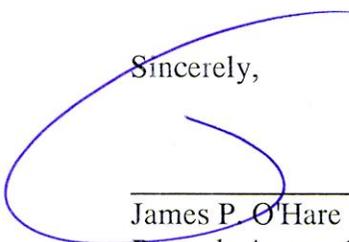

This will acknowledge receipt of your 3/13/2013 request for records under the Freedom of Information Law.

Your request has been forwarded to the appropriate Department program area(s) to identify documents that are responsive to your request and which may be made available pursuant to all applicable provisions of the Freedom of Information Law.

It is estimated that within 20 business days we will complete your request or we will notify you in writing if the responsible program area(s) should require additional time to locate, assemble and review responsive documents.

Please note that, pursuant to Article 6 of the Public Officers Law, a charge *maybe* applied to your request, including the actual cost of the medium used to respond to your Freedom of Information Law request and/or other related costs. When responsive records have been identified, you will be informed of any cost and how payment should be made.

Sincerely,

  
\_\_\_\_\_

Re: FOIL #: 13-03-256  
Your File #: M9245

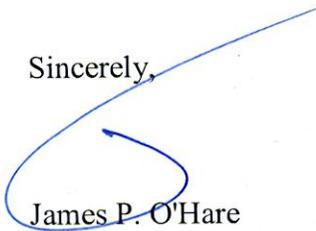

Dear Mr. Merritt:

This letter responds to your Freedom of Information Law request of March 13, 2013, in which you requested environmental records for 239-243 10<sup>th</sup> Avenue AKA 501-503 West 24<sup>th</sup> Street New York, New York 10001. Please be advised that no records responsive to your request have been located.

Should you feel that you have been unlawfully denied access to records, you may appeal such denial in writing within 30 days to the Records Access Appeals Officer, Division of Legal Affairs, Empire State Plaza, 2438 Corning Tower, Albany, New York, 12237-0026.

Should you require additional information or wish to discuss this matter further, please do not hesitate to contact me at (518) 474-8734.

Sincerely,

  
James P. O'Hare

# NYSDEC SPILL REPORT FORM

**DEC REGION:** 2 **SPILL NUMBER:** 9707190  
**SPILL NAME:** GETTY S/S #341 - GETTY PROPERTIES **DEC LEAD:** KGHALE

on 1/23/2005. Highly contaminated soil found in B-5(4'-8'), B-6(6'-8'), and B-7(6'-8'). however, groundwater was just slight high contaminated in B-6.

10/25/2005 - Feng - Quarterly Monitoring Report, 5/2005 - 7/2005. 7 monitoring wells onsite. groundwater flows to south at depth of 7.04' to 8.54' below grade. W-1, decreasing, 146ppb BTEX and 37ppb MTBE. W-2, decreasing, 274ppb BTEX and 104ppb MTBE. W-3, decreasing and fluctuating, 1,649ppb BTEX and 461ppb MTBE. W-4, 1,753ppb BTEX and no MTBE. W-5, 9,975ppb BTEX and <46.0ppb MTBE. W-6, 4,718ppb BTEX and 58ppb MTBE. W-7, 18,230ppb BTEX and 16,700ppb MTBE.

11/2/2005 - Feng - Quarterly Monitoring Report, 8/2005 - 10/2005. 7 monitoring wells onsite. groundwater flows to south at depth of 7.21' to 8.71' below grade. W-1, decreasing, 12ppb BTEX and 13ppb MTBE. W-2, decreasing, 7ppb BTEX and 45ppb MTBE. W-3, decreasing and fluctuating, 2,518ppb BTEX and 262ppb MTBE. W-4, decreasing, 1,418ppb BTEX and no MTBE. W-5, increasing, 11,608ppb BTEX and 74ppb MTBE. W-6, 4,336ppb BTEX and MTBE MDL. W-7, sharply decreased, 2,461ppb BTEX and 211ppb MTBE.

11/18/2005 - Feng - STIP sent to Getty Properties with request of 1) wells installation of one (1) downgradient of W-2 and W-7, one (1) east to W-5 and one (1) southeast to W-6. 2) surrounding properties sketch. CC to Tyree and Delta. STIP due 12/19/2005.

2/17/2006 - Feng - on 2/9/2006 Received signed STIP with modified CAP. (RJF)

2/27/2006 - Feng - Quarterly Monitoring Report, 11/2005 - 1/2006. The site is an active Lukoil gasoline station/convenience store. Groundwater flows to south at the depth of 7.06' to 8.87' below grade. 7 monitoring wells onsite. W-1, 254 ppb BTEX, 34 ppb MTBE. W-2, increased and 343 ppb BTEX, increased and 231 ppb MTBE. W-3, decreased and 1,644 ppb BTEX, decreased and 62 ppb MTBE. W-4, decreased and 1,140 ppb BTEX, MTBE ND. W-5, sharply decreased and 5,170 ppb BTEX, MTBE ND. W-6, decreased and 3,328 ppb BTEX, MTBE ND. W-7, decreased and 2,012 ppb BTEX, decreased and 127 ppb MTBE. (RJF)

4/6/2006 - Feng - Stip cancelled due to dropping in concentration. Wait for next quarter monitoring report. (RJF)

5/16/2006 - Feng - WorkPlan submitted by Tyree, dated 5/12/2006. Tyree proposed to install 3 offsite monitoring wells. One locate at sidewalk across West 24th Street (P-8), one at sidewalk across southeast corner (P-9), and one at the sidewalk across 10th Ave (P-10). The wells will be constructed of 2" schedule 40 flush joint PVC having 15' of 0.02" slotted screen and 5' of riser. Each wells will be installed 10' into groundwater. The WorkPlan is approved and approval email sent to Joe Rennie. (RJF)

6/20/2006 - Feng - Subsurface Investigation Report, dated 6/5/2006. Tyree installed 3 offsite monitoring wells, 20 feet 2-inch PVC. Groundwater encountered at approximately 8 feet below grade. Soil and Groundwater samples were collected (Chain of Custody indicated that), but only soil samples analyticals were presented. PID reading = 0 for depth from 0-20'. Slight VOCs and SVOCs detected in soil but below TAGM 4046. Emailed Joe Rennie for groundwater data. (RJF)

6/28/2006 - Feng - Quarterly Monitoring Report, 2/2006 - 4/2006. The site is active Lukoil gasoline station/convenience store. As of sampling and monitoring on 4/12/2006, groundwater flows to south at the depth of 7.92' to 9.41' bg. 7 monitoring wells onsite. W-1, 75 ppb BTEX, 28 ppb MTBE. W-2, 30 ppb BTEX, 291 ppb MTBE. W-3, increased and 8,520 ppb BTEX (1,280 ppb B, 4,280 ppb T, 770 ppb E, 2,190 ppb X), 57 ppb MTBE. W-4, 2,438 ppb BTEX (25 ppb B, 33 ppb T, 1,000 ppb E, 1,380 ppb X), MTBE ND. W-5, 7,969 ppb BTEX (2,320 ppb B, 119 ppb T, 2,190 ppb E, 3,340 ppb X), 102 ppb MTBE. W-6, 2,423 ppb BTEX (322 ppb B, 31 ppb T, 1,010 ppb E, 1,060 ppb X), 19 ppb MTBE. W-7, increased and 22,780 ppb BTEX (6,310 ppb B, 8,870 ppb T, 1,520 ppb E, 6,080 ppb X), increased and 8,350 ppb MTBE. Stipulation Agreement sent to Getty Properties and cc to Tyree and Delta. STIP due 7/24/2006.(RJF)

8/16/2006 - Feng - Stipulation Agreement executed on 8/10/2006. (RJF)

8/17/2006 - Feng - Quarterly Monitoring Report, 4/2006 - 7/2006, by Tyree. The site is active Lukoil gasoline station/convenience store. Groundwater flows to south at the depth of 7.38' to 8.87' bg. As of sampling on 7/24/2006, 9

**SPILL NAME:** GETTY S/S #341 - GETTY PROPERTIES **DEC LEAD:** KGHALE

monitoring wells. W-1, 57 ppb BTEX, 8 ppb MTBE. W-2, 13 ppb BTEX, 35 ppb MTBE. W-3, 6,862 ppb BTEX (635 ppb B, 3,260 ppb T, 346 ppb E, 2,621 ppb X), 114 ppb MTBE. W-4, 2,047 ppb BTEX, ND MTBE. W-5, 10,968 ppb BTEX (1,440 ppb B, 128 ppb T, 1,940 ppb E, 7,460 ppb X), ND MTBE. W-6, 2,982 ppb BTEX, 23 ppb MTBE. W-7, 24,900 ppb BTEX (6,320 ppb B, 5,590 ppb T, 1,430 ppb E, 11,560 ppb X), 4,700 ppb MTBE. W-8, both ND. W-9, destroyed during sidewalk repair. W-10, both ND.

Emailed Rob Szczepanski (Tyree) to approve the delineation of contamination, RAP due 11/17/2006 as per the Stipulation Agreement. (RJF)

10/26/2006 - Feng - The adjacent property will be developed, 245 10th Ave and 502 West 24th Street, E-142-Designation Site of NYCDEP. Called Amy Ma of NYCDEP to inform her about the existing spill in the Getty Station locate 239 10th Ave. (RJF)

11/15/2006 - Feng - Quarterly Monitoring Report, 8/2006 - 10/2006, 10/19/2006, by Tyree. Active Lukoil gasoline station/convenience store. Groundwater sampled and gauged 10/16/2006. 9 monitoring wells. DTW 8.31' to 9.83' bg. Flow direction south. No LNAPL. BTEX range ND to 30,410 ppb (MW-7). MTBE range ND to 3,330 ppb (MW-7). (RJF)

1/18/2007 - Feng - Getty Properties portfolio meeting with Tyree and Delta. DEC staff has informed Tyree and Delta about the site development at the adjacent property, and the dewatering process may affect the contamination plume. Tyree will contact DEP before the preparation of RAP. (RJF)

1/23/2007 - Feng - Email Rob S. (Tyree) the contact person info in DEP and the adjacent project info. (RJF)

6/6/2007 - Feng - Quarterly Monitoring Report, 11/2006 - 1/2007, 2/2007. Groundwater monitored 1/30/2007. 9 monitoring wells. Active gasoline station. DTW 7.94' to 9.47' bg. Flows southerly. LNAPL in W-7 (0.26'). W-1, 185 ppb BTEX, 163 ppb MTBE. W-2, 9 ppb BTEX, 24 ppb MTBE. W-3, 18,410 ppb BTEX, 102 ppb MTBE. W-4, not accessible. W-5, 10,606 ppb BTEX, 33 ppb MTBE. W-6m 1,953 ppb BTEX, 36 ppb MTBE. W-7, 0.26' of LNAPL. W-8, ND. W-9, destroyed. W-10, 3 ppb BTEX, MTBE ND. (RJF)

7/9/2007 - Feng - Quarterly Monitoring Report, 2/2007 - 4/2007, 5/2007. Groundwater sampled 4/30/2007. 9 monitoring wells. DTW 9.06' to 16.76' bg. Flows to south. No LNAPL. W-1, 1,255 ppb BTEX, 129 ppb MTBE. W-2, 1,572 ppb BTEX, 362 ppb MTBE. W-3, Dry. W-4, NA. W-5, dry. W-6, NA. W-7, NA. W-8, ND. W-10, ND. (RJF)

11/7/2007 - Feng - Quarterly Monitoring Report, 5/2007 - 7/2007, 8/2007. Groundwater sampled 7/30/2007. 9 monitoring wells were sampled. DTW 8.11' to 9.27' bg. Flows to south. No LNAPL. BTEX range ND to 5,980 ppb. MTBE range ND to 393 ppb. (RJF)

11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. Tyree will sample for one more quarter to evaluate the site condition after the dewatering process at the adjacent site. Need to sample MW-4. RAP to be submitted by 2/2008. (RJF)

1/28/2008 - Feng - Quarterly Monitoring Report, 8/2007 - 10/2007, 11/2007. Active Lukoil gasoline station/convenience store. Groundwater gauged and sampled 10/23/2007. 9 monitoring wells. DTW 10.05' to 16.37' bg. Flows to south. No LNAPL. BTEX range ND to 5,131 ppb (W-6). MTBE range ND to 252 ppb (W-3). (RJF)

3/19/2008 - Feng - eDoc Quarterly Monitoring Report 1Q2008. (RJF)

3/20/2008 - Feng - Email to Tyree and Delta for RAP status. (RJF)

3/24/2008 - Feng - Quarterly Monitoring Report, 11/2007 - 1/2008, 2/2008. Active Lukoil gasoline station/convenience store. Groundwater was gauged and sampled 1/14/2008. 9 monitoring wells. No DTW available due to water probe broke onsite. Flows to south. No LNAPL. BTEX range ND to 4,203 ppb (W-1). MTBE range ND to 412 ppb (W-2). (RJF)

7/11/2008 - 2Q2008, 2/2008 - 4/2008, 5/2008. Active Lukoil gasoline station/convenience store. Groundwater was gauged and sampled 4/25/2008. 9 monitoring wells. DTW 9.65' to 11.58' bg. Flows to south. No LNAPL. BTEX range ND to 10,765 ppb (W-3). MTBE range ND to 191 ppb (W-3).

# NYSDEC SPILL REPORT FORM

DEC REGION: 2 SPILL NUMBER: 9707190  
 SPILL NAME: GETTY S/S #341 - GETTY PROPERTIES DEC LEAD: KGHALE

email Tyree for RAP status. (RJF)

9/4/2008 - Getty Properties portfolio meeting with Delta and Tyree. The dewatering that started 4/2007 was stopped 2/2008. MW-4 was not sampled because storage box was on top of that. Wait to see the rebound before the delineation. Possible monitoring wells will be installed between the service building and the tank. (RJF)

1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. Review 2Q2009 quarterly for possible delineation. (RJF)

3/18/2009 - Quarterly Monitoring Report, 5/2008 - 7/2008, 8/2008, by Tyree. Active Lukoil gasoline station convenience store. Groundwater was gauged and sampled 7/22/2008. 9 monitoring wells. NO LNAPL. DTW 9.21' to 10.67' bg. Flows to south. BTEX range ND to 7,530 ppb (W-3). MTBE range ND to 165 ppb (W-3). (RJF)

5/6/2009 - Quarterly Monitoring Report, 8/2008 - 10/2008, 11/2008, by Tyree. Active Lukoil gasoline station convenience store. Groundwater was gauged and sampled 10/30/2008. 10 monitoring wells. NO LNAPL. DTW 8.11' to 9.66' bg. flows to south. BTEX range ND to 20,856 ppb (W-7). MTBE range ND to 192 ppb (W-7). (RJF)

11/6/2009 - 2Q2009, 4/2009-6/2009, 9/2009, pdf, by Tyree. Active Lukoil gasoline station convenience store. 12 monitoring wells. Groundwater was gauged 4/24/2009, 5/29/2009, 6/19/2009 and 7/9/2009. NO LNAPL. DTW 8.11' to 9.66' bg. Flows to south. Groundwater was sampled 6/19/2009. BTEX range ND to 11,198 ppb (W-7). MTBE range ND to 274 ppb (W-2). (RJF)

7/9/2010 - Reviewed Investigation Work Plan, dated 6/3/2010, by Tyree. Tyree proposes 2 wells W-11 and W-12 in west of W-7 and north of W-7. Work Plan is approved. Report due 10/2010.

2/8/2012 - Reviewed the Subsurface Investigation Work Plan, dated 5/17/2011, by Tyree. Tyree proposes to install 2 monitoring wells at the sidewalk along West 24th Street. Tyree mentioned that refusals were hit during the previous attempt to install wells as per the 7/2010 approved work plan.

2/10/2012 - Letter sent to Getty approving the work plan. Report due 4/2012. DEC provides comments, 1) sample groundwater and soil for CP-51 list VOCs; 2) conduct site history review to identify the reason why W-5, W-6 and W-7 with elevated BTEX concentration. Notified Getty that the case has been transferred to Central Office. All the future correspondences shall be directed to the new project manager, Kevin Hale. (J. Feng)

on 1/23/2005. Highly contaminated soil found in B-5(4'-8'), B-6(6'-8'), and B-7(6'-8'). however, groundwater was just slight high contaminated in B-6.

10/25/2005 - Feng - Quarterly Monitoring Report, 5/2005 - 7/2005. 7 monitoring wells onsite. groundwater flows to south at depth of 7.04' to 8.54' below grade. W-1, decreasing, 146ppb BTEX and 37ppb MTBE. W-2, decreasing, 274ppb BTEX and 104ppb MTBE. W-3, decreasing and fluctuating, 1,649ppb BTEX and 461ppb MTBE. W-4, 1,753ppb BTEX and no MTBE. W-5, 9,975ppb BTEX and <46.0ppb MTBE. W-6, 4,718ppb BTEX and 58ppb MTBE. W-7, 18,230ppb BTEX and 16,700ppb MTBE.

11/2/2005 - Feng - Quarterly Monitoring Report, 8/2005 - 10/2005. 7 monitoring wells onsite. groundwater flows to south at depth of 7.21' to 8.71' below grade. W-1, decreasing, 12ppb BTEX and 13ppb MTBE. W-2, decreasing, 7ppb BTEX and 45ppb MTBE. W-3, decreasing and fluctuating, 2,518ppb BTEX and 262ppb MTBE. W-4, decreasing, 1,418ppb BTEX and no MTBE. W-5, increasing, 11,608ppb BTEX and 74ppb MTBE. W-6, 4,336ppb BTEX and MTBE MDL. W-7, sharply decreased, 2,461ppb BTEX and 211ppb MTBE.

11/18/2005 - Feng - STIP sent to Getty Properties with request of 1) wells installation of one (1) downgradient of W-2 and W-7, one (1) east to W-5 and one (1) southeast to W-6. 2) surrounding properties sketch. CC to Tyree and Delta. STIP due 12/19/2005.

2/17/2006 - Feng - on 2/9/2006 Received signed STIP with modified CAP. (RJF)

2/27/2006 - Feng - Quarterly Monitoring Report, 11/2005 - 1/2006. The site is an active Lukoil gasoline station/convenience store. Groundwater flows to south at the depth of 7.06' to 8.87' below grade. 7 monitoring wells onsite. W-1, 254 ppb BTEX, 34 ppb MTBE. W-2, increased and 343 ppb BTEX, increased and 231 ppb MTBE. W-3, decreased and 1,644 ppb BTEX, decreased and 62 ppb MTBE. W-4, decreased and 1,140 ppb BTEX, MTBE ND. W-5, sharply decreased and 5,170 ppb BTEX, MTBE ND. W-6, decreased and 3,328 ppb BTEX, MTBE ND. W-7, decreased and 2,012 ppb BTEX, decreased and 127 ppb MTBE. (RJF)

4/6/2006 - Feng - Stip cancelled due to dropping in concentration. Wait for next quarter monitoring report. (RJF)

5/16/2006 - Feng - WorkPlan submitted by Tyree, dated 5/12/2006. Tyree proposed to install 3 offsite monitoring wells. One locate at sidewalk across West 24th Street (P-8), one at sidewalk across southeast corner (P-9), and one at the sidewalk across 10th Ave (P-10). The wells will be constructed of 2" schedule 40 flush joint PVC having 15' of 0.02" slotted screen and 5 of riser. Each wells will be installed 10' into groundwater. The WorkPlan is approved and approval email sent to Joe Rennie. (RJF)

6/20/2006 - Feng - Subsurface Investigation Report, dated 6/5/2006. Tyree installed 3 offsite monitoring wells, 20 feet 2-inch PVC. Groundwater encountered at approximately 8 feet below grade. Soil and Groundwater samples were collected (Chain of Custody indicated that), but only soil samples analyticals were presented. PID reading = 0 for depth from 0-20'. Slight VOCs and SVOCs detected in soil but below TAGM 4046. Emailed Joe Rennie for groundwater data. (RJF)

6/28/2006 - Feng - Quarterly Monitoring Report, 2/2006 - 4/2006. The site is active Lukoil gasoline station/convenience store. As of sampling and monitoring on 4/12/2006, groundwater flows to south at the depth of 7.92' to 9.41' bg. 7 monitoring wells onsite. W-1, 75 ppb BTEX, 28 ppb MTBE. W-2, 30 ppb BTEX, 291 ppb MTBE. W-3, increased and 8,520 ppb BTEX (1,280 ppb B, 4,280 ppb T, 770 ppb E, 2,190 ppb X), 57 ppb MTBE. W-4, 2,438 ppb BTEX (25 ppb B, 33 ppb T, 1,000 ppb E, 1,380 ppb X), MTBE ND. W-5, 7,969 ppb BTEX (2,320 ppb B, 119 ppb T, 2,190 ppb E, 3,340 ppb X), 102 ppb MTBE. W-6, 2,423 ppb BTEX (322 ppb B, 31 ppb T, 1,010 ppb E, 1,060 ppb X), 19 ppb MTBE. W-7, increased and 22,780 ppb BTEX (6,310 ppb B, 8,870 ppb T, 1,520 ppb E, 6,080 ppb X), increased and 8,350 ppb MTBE. Stipulation Agreement sent to Getty Properties and cc to Tyree and Delta. STIP due 7/24/2006.(RJF)

8/16/2006 - Feng - Stipulation Agreement executed on 8/10/2006. (RJF)

8/17/2006 - Feng - Quarterly Monitoring Report, 4/2006 - 7/2006, by Tyree. The site is active Lukoil gasoline station/convenience store. Groundwater flows to south at the depth of 7.38' to 8.87' bg. As of sampling on 7/24/2006, 9

monitoring wells. W-1, 57 ppb BTEX, 8 ppb MTBE. W-2, 13 ppb BTEX, 35 ppb MTBE. W-3, 6,862 ppb BTEX (635 ppb B, 3,260 ppb T, 346 ppb E, 2,621 ppb X), 114 ppb MTBE. W-4, 2,047 ppb BTEX, ND MTBE. W-5, 10,968 ppb BTEX (1,440 ppb B, 128 ppb T, 1,940 ppb E, 7,460 ppb X), ND MTBE. W-6, 2,982 ppb BTEX, 23 ppb MTBE. W-7, 24,900 ppb BTEX (6,320 ppb B, 5,590 ppb T, 1,430 ppb E, 11,560 ppb X), 4,700 ppb MTBE. W-8, both ND. W-9, destroyed during sidewalk repair. W-10, both ND.

Emailed Rob Szczepanski (Tyree) to approve the delineation of contamination, RAP due 11/17/2006 as per the Stipulation Agreement. (RJF)

10/26/2006 - Feng - The adjacent property will be developed, 245 10th Ave and 502 West 24th Street, E-142-Designation Site of NYCDEP. Called Amy Ma of NYCDEP to inform her about the existing spill in the Getty Station locate 239 10th Ave. (RJF)

11/15/2006 - Feng - Quarterly Monitoring Report, 8/2006 - 10/2006, 10/19/2006, by Tyree. Active Lukoil gasoline station/convenience store. Groundwater sampled and gauged 10/16/2006. 9 monitoring wells. DTW 8.31' to 9.83' bg. Flow direction south. No LNAPL. BTEX range ND to 30,410 ppb (MW-7). MTBE range ND to 3,330 ppb (MW-7). (RJF)

1/18/2007 - Feng - Getty Properties portfolio meeting with Tyree and Delta. DEC staff has informed Tyree and Delta about the site development at the adjacent property, and the dewatering process may affect the contamination plume. Tyree will contact DEP before the preparation of RAP. (RJF)

1/23/2007 - Feng - Email Rob S. (Tyree) the contact person info in DEP and the adjacent project info. (RJF)

6/6/2007 - Feng - Quarterly Monitoring Report, 11/2006 - 1/2007, 2/2007. Groundwater monitored 1/30/2007. 9 monitoring wells. Active gasoline station. DTW 7.94' to 9.47' bg. Flows southerly. LNAPL in W-7 (0.26'). W-1, 185 ppb BTEX, 163 ppb MTBE. W-2, 9 ppb BTEX, 24 ppb MTBE. W-3, 18,410 ppb BTEX, 102 ppb MTBE. W-4, not accessible. W-5, 10,606 ppb BTEX, 33 ppb MTBE. W-6m 1,953 ppb BTEX, 36 ppb MTBE. W-7, 0.26' of LNAPL. W-8, ND. W-9, destroyed. W-10, 3 ppb BTEX, MTBE ND. (RJF)

7/9/2007 - Feng - Quarterly Monitoring Report, 2/2007 - 4/2007, 5/2007. Groundwater sampled 4/30/2007. 9 monitoring wells. DTW 9.06' to 16.76' bg. Flows to south. No LNAPL. W-1, 1,255 ppb BTEX, 129 ppb MTBE. W-2, 1,572 ppb BTEX, 362 ppb MTBE. W-3, Dry. W-4, NA. W-5, dry. W-6, NA. W-7, NA. W-8, ND. W-10, ND. (RJF)

11/7/2007 - Feng - Quarterly Monitoring Report, 5/2007 - 7/2007, 8/2007. Groundwater sampled 7/30/2007. 9 monitoring wells were sampled. DTW 8.11' to 9.27' bg. Flows to south. No LNAPL. BTEX range ND to 5,980 ppb. MTBE range ND to 393 ppb. (RJF)

11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. Tyree will sample for one more quarter to evaluate the site condition after the dewatering process at the adjacent site. Need to sample MW-4. RAP to be submitted by 2/2008. (RJF)

1/28/2008 - Feng - Quarterly Monitoring Report, 8/2007 - 10/2007, 11/2007. Active Lukoil gasoline station/convenience store. Groundwater gauged and sampled 10/23/2007. 9 monitoring wells. DTW 10.05' to 16.37' bg. Flows to south. No LNAPL. BTEX range ND to 5,131 ppb (W-6). MTBE range ND to 252 ppb (W-3). (RJF)

3/19/2008 - Feng - eDoc Quarterly Monitoring Report 1Q2008. (RJF)

3/20/2008 - Feng - Email to Tyree and Delta for RAP status. (RJF)

3/24/2008 - Feng - Quarterly Monitoring Report, 11/2007 - 1/2008, 2/2008. Active Lukoil gasoline station/convenience store. Groundwater was gauged and sampled 1/14/2008. 9 monitoring wells. No DTW available due to water probe broke onsite. Flows to south. No LNAPL. BTEX range ND to 4,203 ppb (W-1). MTBE range ND to 412 ppb (W-2). (RJF)

7/11/2008 - 2Q2008, 2/2008 - 4/2008, 5/2008. Active Lukoil gasoline station/convenience store. Groundwater was gauged and sampled 4/25/2008. 9 monitoring wells. DTW 9.65' to 11.58' bg. Flows to south. No LNAPL. BTEX range ND to 10,765 ppb (W-3). MTBE range ND to 191 ppb (W-3).

# NYSDEC SPILL REPORT FORM

DEC REGION: 2 SPILL NUMBER: 9707190  
 SPILL NAME: GETTY S/S #341 - GETTY PROPERTIES DEC LEAD: KGHALE

email Tyree for RAP status. (RJF)

9/4/2008 - Getty Properties portfolio meeting with Delta and Tyree. The dewatering that started 4/2007 was stopped 2/2008. MW-4 was not sampled because storage box was on top of that. Wait to see the rebound before the delineation. Possible monitoring wells will be installed between the service building and the tank. (RJF)

1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. Review 2Q2009 quarterly for possible delineation. (RJF)

3/18/2009 - Quarterly Monitoring Report, 5/2008 - 7/2008, 8/2008, by Tyree. Active Lukoil gasoline station convenience store. Groundwater was gauged and sampled 7/22/2008. 9 monitoring wells. NO LNAPL. DTW 9.21' to 10.67' bg. Flows to south. BTEX range ND to 7,530 ppb (W-3). MTBE range ND to 165 ppb (W-3). (RJF)

5/6/2009 - Quarterly Monitoring Report, 8/2008 - 10/2008, 11/2008, by Tyree. Active Lukoil gasoline station convenience store. Groundwater was gauged and sampled 10/30/2008. 10 monitoring wells. NO LNAPL. DTW 8.11' to 9.66' bg. flows to south. BTEX range ND to 20,856 ppb (W-7). MTBE range ND to 192 ppb (W-7). (RJF)

11/6/2009 - 2Q2009, 4/2009-6/2009, 9/2009, pdf, by Tyree. Active Lukoil gasoline station convenience store. 12 monitoring wells. Groundwater was gauged 4/24/2009, 5/29/2009, 6/19/2009 and 7/9/2009. NO LNAPL. DTW 8.11' to 9.66' bg. Flows to south. Groundwater was sampled 6/19/2009. BTEX range ND to 11,198 ppb (W-7). MTBE range ND to 274 ppb (W-2). (RJF)

7/9/2010 - Reviewed Investigation Work Plan, dated 6/3/2010, by Tyree. Tyree proposes 2 wells W-11 and W-12 in west of W-7 and north of W-7. Work Plan is approved. Report due 10/2010.

2/8/2012 - Reviewed the Subsurface Investigation Work Plan, dated 5/17/2011, by Tyree. Tyree proposes to install 2 monitoring wells at the sidewalk along West 24th Street. Tyree mentioned that refusals were hit during the previous attempt to install wells as per the 7/2010 approved work plan.

2/10/2012 - Letter sent to Getty approving the work plan. Report due 4/2012. DEC provides comments, 1) sample groundwater and soil for CP-51 list VOCs; 2) conduct site history review to identify the reason why W-5, W-6 and W-7 with elevated BTEX concentration. Notified Getty that the case has been transferred to Central Office. All the future correspondences shall be directed to the new project manager, Kevin Hale. (J. Feng)

**Re: NYSDEC Spill No. 97-07190**  
**Getty S/S 341, 239 10<sup>th</sup> Ave, New York, NY**

Dear Mr. Shea,

The New York State Department of Environmental Conservation (the Department) has reviewed the Subsurface Investigation Work Plan (Work Plan) dated May 17, 2011, prepared by Tyree Environmental Corp. (Tyree), for the above referenced site. Tyree proposes to install two monitoring wells at both sidewalks along West 24<sup>th</sup> Street to delineate the extent of the contamination. The Department hereby approves the Work Plan. A report summarizing the findings of this investigation work must be submitted to the Department by April 2012. The Department requires at least five days notice in advance of any field work at the site. The Department also provides the following comments:

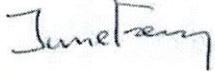

1. All the groundwater and soil samples shall be analyzed for the NYSDEC CP-51 list of volatile organic compounds.
2. A review of the site history shall be conducted to find out the reason why elevated BTEX concentrations have been detected in monitoring wells W-5, W-6 and W-7. These monitoring wells are located in the sidewalks along 10<sup>th</sup> Ave and West 24<sup>th</sup> Street.

The Responsible Party and its contractors are solely responsible for safe execution of all intrusive and other work performed under the Work Plan. In particular, the Responsible Party and its contractors are responsible for the structural integrity of excavations, and protection of the structural integrity of buildings, utilities, and other structures, both onsite and offsite, that may be adversely affected by these intrusive actions. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform work under the Work Plan. Further, the Responsible Party and its contractors are solely responsible for the identification of utilities that may be affected by work under the Work Plan and the implementation of all required, appropriate, or necessary health and safety measures during performance of work under the approved Work Plan.

Please note that this spill case has been transferred to the Central Office of the Department. All future correspondences shall be directed to Mr. Kevin Hale, Engineering Geologist II, Division of Environmental Remediation, NYS DEC, 625 Broadway, Albany, NY, 12207.

If you have any questions, please do not hesitate to contact me at the above phone number or email.

Sincerely,

A handwritten signature in cursive script that reads "June Feng".

June Feng  
Environmental Engineer 1

Good afternoon Justin!

I looked in the e-docs for this case and did not see the May revised work plan. Please send it again, but by e-mail. June will get back to you after she reviews it.

Rafiel

>>> "Justin Keller" <JKeller@tyreeorg.com> 1/11/2012 3:35 PM >>>  
Greetings June and Raphiel,

Tyree Environmental Corp. (Tyree), on behalf of Getty Properties Corp. (GPC), is pleased to provide the NYSDEC Region II with the attached Fourth Quarter 2011 Monitoring Report for the Former Getty Service Station #00341 located at 239 10th Avenue, New York, New York for your review.

Of note: In May 2011 Tyree submitted a revised Subsurface Investigation Work Plan (SIWP) to the NYSDEC for the subject site. The revised SIWP was developed in accordance with correspondence from the New York State Department of Environmental Conservation (NYSDEC) dated September 15, 2010 in an effort to resolve the drilling refusals previously encountered and documented in Tyree's December 2010 Subsurface Investigation Report. Two (2) monitoring wells will be installed off-site in order to delineate soil and groundwater impacts downgradient of existing MW-7.

Getty would greatly appreciate a timely review of the May 2011 SIWP. With your approval Tyree will obtain the necessary permit(s) and schedule the drilling activities.

Tyree will also incorporate the necessary roadbox replacement for well

MW-10 to the proposed drilling activities described above in order to regain access to that groundwater monitoring location.

If you have any questions, please do not hesitate to contact me.

Thank  
you.

Sincerely,

Justin C. Keller

Former Getty Service Station # 00341  
239 10<sup>th</sup> Avenue  
New York, New York 10010  
NYSDEC Spill # 97-07190

Dear Sirs:

Attached please find a revised Subsurface Investigation Work Plan (SIWP) prepared for the above referenced site. This revised SIWP was developed in accordance with correspondence from the New York State Department of Environmental Conservation (NYSDEC) dated September 15, 2010 in an effort to resolve the drilling refusals previously encountered and documented in Tyree's December 2010 Subsurface Investigation Report. Two (2) monitoring wells will be installed offsite in order to delineate soil and groundwater impacts downgradient of existing monitoring well MW-7. A detailed site map identifying the proposed monitoring wells is enclosed as **Figure 1**. Historical groundwater analytical results are summarized in **Table 1**.

## Subsurface Investigation Work Plan

1. A truck mounted drill rig will be utilized to install two (2) groundwater monitoring wells as indicated on the attached site plan (**Figure 1**). The proposed monitoring well MW-11 will be installed into sidewalk along the north side of W. 24<sup>th</sup> Street approximately 40 feet west of existing monitoring well MW-7. The proposed monitoring well MW-12 will be installed into sidewalk along the south side of W. 24<sup>th</sup> Street approximately 30 feet west of existing monitoring well MW-8. Soil samples will be physically characterized using the Unified Soil Classification System (USCS) system and qualitatively screened for the presence of volatile organic compounds (VOCs) with a Photoionization Detector (PID). Two (2) soil samples from each monitoring well location will be collected for laboratory analysis, one sample at the interval exhibiting the highest PID reading and the other sample from the soil/groundwater interface. If no recordable PID readings are identified throughout the vertical column, one soil sample will be collected at the soil/groundwater interface. The monitoring wells will be installed to at least

# Tyree Environmental Corp.

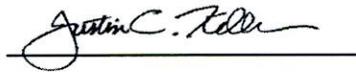

208 Route 109, Suite 100, Farmingdale, New York · Fax: 631.249.6724 · Phone: 631.249.3150

ten (10) feet into groundwater. The depth to water is approximately seven (7) to ten (10) feet below grade.

2. Analytical testing will be performed by a New York State certified laboratory. Groundwater and soil samples will be analyzed for NYSDEC STARS-list volatile organic compounds via EPA Method 8260 and MTBE. A summary of historical groundwater analytical results are included in **Table 1**.
3. The monitoring wells will be installed as 2-inch diameter PVC monitoring wells. Each monitoring well will have fifteen feet of 0.020 slot screen and appropriate length of riser casing. Each well will be finished flush to grade with steel, 8-inch diameter manholes, locking j-plugs and 2' x 2' concrete pads. Monitoring wells MW-11 and MW-12 will be developed using low-flow purging techniques to remove fine-grained particles and increase the hydraulic connection between the surrounding material and the well screen. Following a period of purging equal to three well volumes, groundwater samples will be collected and transferred to laboratory supplied glassware, packed on ice, and shipped via overnight courier to a New York certified laboratory. Once the initial sampling is completed, the wells will be sampled on a quarterly basis.
4. The monitoring wells will be surveyed into the existing monitoring well network to to determine groundwater flow direction.
5. The monitoring well installations will commence following NYSDEC approval. Before any field work begins, a DigSafe markout will be called in to locate any existing utilities. A Subsurface Investigation Report will be prepared and submitted to the NYSDEC within 90 days of work plan approval. This report will include analytical results for soil and groundwater samples presented in tabular format, a site map, and recommendations for further action if needed.

If you have any questions or comments, please feel free to contact me at (631) 249-3150 ext. 229 or at JKeller@TyreeOrg.com.

Sincerely,

Justin C. Keller  
Environmental Project Manager

Farmingdale, New York 11735

**REPORTING PERIOD – OCTOBER 2011 THROUGH DECEMBER 2011**

**INTRODUCTION**

This Quarterly Monitoring Report (QMR) has been prepared by Tyree Environmental Corp. (Tyree), on behalf of Getty Properties Corp. (Getty), to summarize the groundwater sampling and gauging conducted at the subject site (Service Station) in accordance with the requirements set forth by the New York State Department of Environmental Conservation (NYSDEC) regarding spill number 97-07190. A map depicting the current site layout is included in **Figure 1**.

**SITE DESCRIPTION**

The subject property, located at 239 10<sup>th</sup> Avenue, New York, New York, is currently utilized as a LukOil gas station that provides commercial gasoline retail and automotive service. The subject site currently consists of a 1-story masonry building with convenience store, office and restroom. The site is presently improved with two (2) 10,000-gallon gasoline underground storage tanks (USTs), fueling canopy, two (2) dispenser pump islands and a total of four (4) product dispensers.

The subject property is bordered by 10<sup>th</sup> Avenue followed by multi-level residential apartments with ground-floor commercial fronts to the east and West 24<sup>th</sup> Street followed by a 1-story car wash to the south. The Bryce Wolkowitz Art Gallery and multi-level residential center surrounds the remainder of the property to the north and to the west.

There are currently three (3) on-site monitoring wells [MW-1 through MW-3] and seven (7) off-site monitoring wells [MW-4 through MW-10] utilized in the ongoing groundwater monitoring program. Historical summaries of the groundwater elevation data and groundwater chemistry data have been provided in **Tables 1 and 2**, respectively.

### **SITE GEOLOGY / HYDROGEOLOGY**

The Bedrock Geologic Map of New York (Lower Hudson Sheet) identifies the lithology in the area of the site as metamorphic rocks of sedimentary and volcanic origin, specifically Fordham gneiss. The subsurface is characterized by bedrock that is exposed generally within one meter of the surface (Cadwell et al. 1989). The overburden soil is characterized as till deposited beneath glacier ice consisting of variable texture (boulders to silt), usually poorly sorted sand-rich diamict, with varying degrees of permeability and compaction measuring between 1-50 meters in thickness (Sirkin et al. 1988).

The surficial geology at the subject site has been investigated up to a maximum depth of 25 feet below grade (fbg). The depth of the bedrock surface beneath the subject site has not yet been determined. The geologic conditions encountered during previous subsurface investigations consisted mainly of fine to medium grained sands mixed with gravels, boulders, construction debris and interbedded layers of silt.

The site topography is generally flat and the surface elevation is situated at approximately 43 feet above mean sea level (msl). Groundwater occurs within the unconsolidated soils at depths ranging from approximately 7 to 10 fbg and currently flows to the south. Based on historical gauging data, there appears to be an appreciable degree of seasonal variation in the direction of groundwater flow at the site, periodically fluctuating between south, southwest and west.

### **SITE HISTORY**

On September 17, 1997 Tyree conducted a repair of the remote fill located along the southern edge of the subject property. During the repair activities petroleum impacted soil was encountered and spill number 97-07190 was issued by the NYSDEC Region II. Approximately one (1) cubic yard of impacted soil was removed from around the fill portal. In 1998 Tyree removed three (3) 4000-gallon underground storage tanks (USTs), twelve (12) 550-gallon gasoline USTs, one (1) 275-gallon fuel oil UST, two (2) fueling pump islands and the remote fill from the subject site as per the EPA mandate for tank upgrades. During the removal activities petroleum impacted soil was encountered around the USTs and spill number 98-10383 was issued by the NYSDEC Region II. A total of

1,852.91 tons of impacted soil was removed up to a depth of twenty (20) fbg from the former UST locations and disposed of at Posillico Bros. of Farmingdale, New York.

Following the removal of impacted soils, nine (9) endpoint samples were collected around the gasoline USTs at a depth of five (5) to ten (10) fbg. Laboratory analytical results identified concentrations of volatile organic compounds (VOCs) including MTBE exceeding NYSDEC guidance values from samples collected from bottom and from the south and east walls of the tank field. One (1) endpoint sample was collected from bottom of the fuel oil UST at a depth of twenty (20) fbg. Laboratory analytical results identified concentrations of VOCs including MTBE as well as semi-volatile organic compounds (SVOCs) exceeding NYSDEC guidance values from the bottom sample. Spill number 98-10383 was subsequently closed by the NYSDEC on October 18, 2005.

In June 2000 Tyree began collecting groundwater samples from an existing monitoring well [MW-3] on-site previously installed by outside contractors and located in the northeast corner of the subject property. Baseline groundwater analytical results identified elevated concentrations of VOCs including MTBE exceeding NYSDEC Groundwater Quality Standards (GWQS).

In April 2001 Tyree installed monitoring wells MW-1 and MW-2 along the southern edge of the property to delineate the hydrocarbon impacts on-site. These wells were constructed of 2-inch diameter PVC and set to a maximum depth of approximately 25 fbg with 23 feet of 0.020 slot well screen and appropriate riser casing. Detailed subsurface lithology at each boring location was recorded in field boring logs however no representative soil samples were collected for analysis during the subsurface investigation of 2001. Baseline groundwater analytical results for wells MW-1 and MW-2 identified detectable levels of VOCs including MTBE exceeding NYSDEC GWQS.

In April 2005 monitoring wells MW-4 through MW-7 were installed in the sidewalk bordering the subject property along 10<sup>th</sup> Avenue and West 24<sup>th</sup> Street to delineate soil and groundwater impacts off-site. These wells were constructed of 2-inch diameter PVC and set to a maximum depth of approximately 20 fbg with 15 feet of 0.020 slot well screen and appropriate riser casing. Laboratory analytical results for soil samples collected from MW-5 through MW-7 identified VOCs exceeding NYSDEC standards. Baseline groundwater analytical results for wells MW-4, MW-6 and MW-7 indicated detectable levels of VOCs including MTBE exceeding NYSDEC GWQS.

In May 2006 monitoring wells MW-8 through MW-10 were installed in the sidewalk across 10<sup>th</sup> Avenue and West 24<sup>th</sup> Street to further characterize hydrogeologic conditions and to delineate soil and groundwater impacts off-site. These wells were constructed of 2-inch diameter PVC and set to a maximum depth of approximately 20 fbg with 15 feet of 0.020 slot well screen and appropriate riser casing. Laboratory analytical results from soil samples collected during the subsurface investigation did not identify any VOCs or SVOCs exceeding NYSDEC standards. Baseline groundwater analytical results did not identify petroleum impacts to groundwater above NYSDEC standards at any of the off-site locations for MW-8 through MW-10.

On September 15, 2010 Tyree conducted a subsurface investigation at the subject site in order to further delineate groundwater impacts north and west of existing monitoring well MW-7 in accordance with the meeting held between the NYSDEC, Tyree, and Antea Group on February 24, 2010. Tyree advanced six (6) borings [RF-1 through RF-6] on and off-site in an attempt to install two (2) new groundwater monitoring wells. All boring attempts resulted in refusal at a maximum depth of five fbg due to various subsurface conditions (impenetrable rock, existing municipal utilities and collapsing pea gravel in close proximity to the USTs and the associated vent lines).

### **WELL GAUGING / SAMPLING INFORMATION**

Prior to sampling, each monitoring well was gauged for static water level and then purged of three well volumes or until dry. Once the groundwater within each monitoring well recharged to at least 90 percent of its static water level, groundwater samples were collected. Summaries of the groundwater elevation data and groundwater chemistry data measured during the October 28, 2011 groundwater sampling event (including complete historical data) have been provided in **Tables 1 and 2**, respectively.

<b>Dates Wells Gauged:</b>	October 28, 2011
<b>Number of Wells Gauged:</b>	Nine (9)
<b>Gauged Well Identifications:</b>	MW-1 through MW-9
<b>Wells Not Gauged and Reason:</b>	MW-10 – Manhole cover sealed shut - requires repair or replacement.
<b>Dates Wells Sampled:</b>	October 28, 2011
<b>Number of Wells Sampled:</b>	Nine (9)
<b>Sampled Well Identifications:</b>	MW-1 through MW-9
<b>Wells Not Sampled and Reason:</b>	MW-10 – Manhole cover sealed shut - requires repair or replacement.
<b>Liquid Phase Hydrocarbons (LPH) Detected and LPH Thickness:</b>	None
<b>Generalized Groundwater Flow Direction:</b>	South
<b>Wells Not Used in Contouring and Reason:</b>	None

**Laboratory Analytical Parameters  
and Methods:**

BTEX, MTBE: MW-1 through MW-9 via  
United States Environmental Protection  
Agency (USEPA) Method 8260

**New York-Certified Laboratory:**

Accutest Laboratories; Dayton, New Jersey

**LABORATORY ANALYTICAL RESULTS**

Laboratory analytical results associated with the October 28, 2011 groundwater sampling event indicate that target compounds of concern (COCs) exceeded NYSDEC groundwater standards at the following monitoring well locations:

<b>MW-1</b>	benzene (345 ppb), toluene (8.8 ppb), ethylbenzene (6.2 ppb), total xylenes (7.1 ppb) and MTBE (11.2 ppb)
<b>MW-2</b>	MTBE (21.8 ppb)
<b>MW-3</b>	benzene (15.7 ppb)
<b>MW-4</b>	none
<b>MW-5</b>	benzene (94.7 ppb), toluene (18.6 ppb), ethylbenzene (1,490 ppb) and total xylenes (2,350 ppb)
<b>MW-6</b>	benzene (220 ppb), toluene (12.8 ppb), ethylbenzene (247 ppb) and total xylenes (72.8 ppb)
<b>MW-7</b>	benzene (1,030 ppb), toluene (116 ppb), ethylbenzene (2,520 ppb), total xylenes (6,360 ppb) and MTBE (89.7 ppb)
<b>MW-8</b>	none
<b>MW-9</b>	none

Historical groundwater elevation results are summarized in **Table 1** and plotted over time in **Graph 1** (Hydrograph). A groundwater elevation map for the October 28, 2011 groundwater gauging event is included as **Figure 1**. Historical groundwater analytical results are summarized in **Table 2** and plotted in **Graph 2** (Total BTEX vs. Time) and **Graph 3** (MTBE vs. Time). Total BTEX and MTBE plume maps associated with the October 28, 2011 groundwater sampling event are included as **Figures 2 and 3**, respectively. In addition, a copy of the original laboratory analytical data package associated with the October 28, 2011 groundwater sampling event has been included in **Appendix A**.

## SITE PROGRESS UPDATE

In May 2011 Tyree submitted a revised Subsurface Investigation Work Plan (SIWP) to the NYSDEC for the subject site. The revised SIWP was developed in accordance with correspondence from the New York State Department of Environmental Conservation (NYSDEC) dated September 15, 2010 in an effort to resolve the drilling refusals previously encountered and documented in Tyree's December 2010 Subsurface Investigation Report. Two (2) monitoring wells will be installed off-site in order to delineate soil and groundwater impacts downgradient of existing MW-7. Upon approval Tyree will schedule the drilling activities.

Tyree will also incorporate the necessary roadbox replacement for well MW-10 to the proposed drilling activities described above in order to regain access to that groundwater monitoring location.

## SUMMARY OF UPCOMING EVENTS

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal NPL site list***

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 02/01/2013 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<b><i>HUDSON RIVER PCBs</i></b>	<b><i>NO STREET APPLICABLE</i></b>	<b><i>W 1/4 - 1/2 (0.347 mi.)</i></b>	<b><i>0</i></b>	<b><i>37</i></b>

## EXECUTIVE SUMMARY

### ***Federal CERCLIS list***

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/04/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

HUDSON RIVER PCBS	NO STREET APPLICABLE	W 1/4 - 1/2 (0.347 mi.)	0	37

### ***Federal CERCLIS NFRAP site List***

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/05/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 15 RCRA-CESQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### **Federal institutional controls / engineering controls registries**

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 12/19/2012 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
HUDSON RIVER PCBS	NO STREET APPLICABLE	W 1/4 - 1/2 (0.347 mi.)	0	37

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 12/19/2012 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

HUDSON RIVER PCBS	NO STREET APPLICABLE	W 1/4 - 1/2 (0.347 mi.)	0	37

### **State and tribal landfill and/or solid waste disposal site lists**

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 01/07/2013 has revealed that there are 2 NY SWF/LF sites within approximately 0.5 miles of the target property.

### **State and tribal leaking storage tank lists**

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 11/19/2012 has revealed that there are 81 NY LTANKS sites within approximately 0.5 miles of the target property.

NY HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the NY HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 72 NY HIST LTANKS sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### State and tribal registered storage tank lists

NY TANKS: This database contains records of facilities that are or have been regulated under Bulk Storage Program. Tank information for these facilities may not be releasable by the state agency.

A review of the NY TANKS list, as provided by EDR, and dated 01/02/2013 has revealed that there are 3 NY TANKS sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
EMPIRE CITY SUBWAY COMPANY LTD	177-83 10TH AVENUE	SSW 1/8 - 1/4 (0.180 mi.)	AJ254	818

### Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 11/19/2012 has revealed that there are 46 NY Spills sites within approximately 0.125 miles of the target property.

## EXECUTIVE SUMMARY

NY Hist Spills: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 25 NY Hist Spills sites within approximately 0.125 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/12/2013 has revealed that there are 35 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 4 EDR MGP sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 62 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 10 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Tank Info:

Site ID: 4669  
Tank Number: 001  
Tank ID: 57593  
Tank Status: In Service  
Tank Type: Equivalent technology  
Pipe Model: Not reported

Equipment Records:

C02 - Pipe Location - Underground/On-ground  
H01 - Tank Leak Detection - Interstitial - Electronic Monitoring  
I02 - Overfill - High Level Alarm  
D06 - Pipe Type - Fiberglass Reinforced Plastic (FRP)  
G04 - Tank Secondary Containment - Double-Walled (Underground)  
L07 - Piping Leak Detection - Pressurized Piping Leak Detector  
H99 - Tank Leak Detection - Other  
L08 - Piping Leak Detection - Tank Top Sump  
I01 - Overfill - Float Vent Valve  
F04 - Pipe External Protection - Fiberglass  
K01 - Spill Prevention - Catch Basin  
A00 - Tank Internal Protection - None  
J01 - Dispenser - Submersible  
E04 - Piping Secondary Containment - Double-Walled (Underground)  
B04 - Tank External Protection - Fiberglass  
Install Date: 12/01/1998  
Capacity Gallons: 10000  
Tightness Test Method: 21

DEC Memo: 3/14/03: REASSIGNED FROM ROMMEL TO VOUGHT. 11/20/2003-Vought-See closed spill #'s 9830017 and 0211201 at same location. 11/24/2004: Sent letter to Getty requesting an investigatory work plan and environmental site history. (Harrington)1/13/2005: Approved SI work plan (installation of four (4) monitoring wells). Harrington3/24/2005: Project transferred to Vought - Region 2. (Harrington)08/31/2005 - Feng - Project transferred from Vought to Feng. 10/18/2005 - Feng - Spill#: 98-10383 has been consolidated into this spill#. 10/25/2005 - Feng - Subsurface Investigation Report, dated 5/2/2005. on 4/12-13/2005, Tyree installed 3 off-site monitoring wells in sidewalk adjacent to 10th Ave and 1 in sidewalk adjacent to West 24th St as per the Work Plan approved by Harrington on 1/23/2005. Highly contaminated soil found in B-5(4'-8'), B-6(6'-8'), and B-7(6'-8'). however, groundwater was just slight high contaminated in B-6. 10/25/2005 - Feng - Quarterly Monitoring Report, 5/2005 - 7/2005. 7 monitoring wells onsite. groundwater flows to south at depth of 7.04' to 8.54' below grade. W-1, decreasing, 146ppb BTEX and 37ppb MTBE. W-2, decreasing, 274ppb BTEX and 104ppb MTBE. W-3, decreasing and fluctuating, 1,649ppb BTEX and 461ppb MTBE. W-4, 1,753ppb BTEX and no MTBE. W-5, 9,975ppb BTEX and <46.0ppb MTBE. W-6, 4,718ppb BTEX and 58ppb MTBE. W-7, 18,230ppb BTEX and 16,700ppb MTBE. 11/2/2005 - Feng - Quarterly Monitoring Report, 8/2005 - 10/2005. 7 monitoring wells onsite. groundwater flows to south at depth of 7.21' to 8.71' below grade. W-1, decreasing, 12ppb BTEX and 13ppb MTBE. W-2, decreasing, 7ppb BTEX and 45ppb MTBE. W-3, decreasing and fluctuating, 2,518ppb BTEX and 262ppb MTBE. W-4, decreasing, 1,418ppb BTEX and no MTBE. W-5, increasing, 11,608ppb BTEX and 74ppb MTBE. W-6, 4,336ppb BTEX and MTBE MDL. W-7, sharply decreased, 2,461ppb BTEX and 211ppb MTBE. 11/18/2005 - Feng - STIP sent to Getty Properties with request of 1) wells installation of one (1) downgradient of W-2 and W-7, one (1) east to W-5 and one (1) southeast to W-6. 2) surrounding properties sketch. CC to Tyree and Delta. STIP due 12/19/2005. 2/17/2006 - Feng - on 2/9/2006 Received signed STIP with modified CAP. (RJF)2/27/2006 - Feng - Quarterly Monitoring Report, 11/2005 - 1/2006. The site is an active Lukoil gasoline station/convenience store. Groundwater flows to south at the depth of 7.06' to 8.87' below grade. 7 monitoring wells onsite. W-1, 254 ppb BTEX, 34 ppb MTBE. W-2, increased and 343 ppb BTEX, increased and 231 ppb MTBE. W-3, decreased and 1,644 ppb BTEX, decreased and 62 ppb MTBE. W-4, decreased and 1,140 ppb BTEX, MTBE ND. W-5, sharply decreased and 5,170 ppb BTEX, MTBE ND. W-6, decreased and 3,328 ppb

BTEX, MTBE ND. W-7, decreased and 2,012 ppb BTEX, decreased and 127 ppb MTBE. (RJF)4/6/2006 - Feng - Stip cancelled due to dropping in concentration. Wait for next quarter monitoring report.  
(RJF)5/16/2006 - Feng - WorkPlan submitted by Tyree, dated 5/12/2006. Tyree proposed to install 3 offsite monitoring wells. One locate at sidewalk across West 24th Street (P-8), one at sidewalk across southeast corner (P-9), and one at the sidewalk across 10th Ave (P-10). The wells will be constructed of 2" schedule 40 flush joint PVC having 15' of 0.02" slotted screen and 5' of riser. Each wells will be installed 10' into groundwater. The WorkPlan is approved and approval email sent to Joe Rennie. (RJF)6/20/2006 - Feng - Subsurface Investigation Report, dated 6/5/2006. Tyree installed 3 offsite monitoring wells, 20 feet 2-inch PVC. Groundwater encountered at approximately 8 feet below grade. Soil and Groundwater samples were collected (Chain of Custody indicated that), but only soil samples analyticals were presented. PID reading = 0 for depth from 0-20'. Slight VOCs and SVOCs detected in soil but below TAGM 4046. Emailed Joe Rennie for groundwater data. (RJF)6/28/2006 - Feng - Quarterly Monitoring Report, 2/2006 - 4/2006. The site is active Lukoil gasoline station/convenience store. As of sampling and monitoring on 4/12/2006, groundwater flows to south at the depth of 7.92' to 9.41' bg. 7 monitoring wells onsite. W-1, 75 ppb BTEX, 28 ppb MTBE. W-2, 30 ppb BTEX, 291 ppb MTBE. W-3, increased and 8,520 ppb BTEX (1,280 ppb B, 4,280 ppb T, 770 ppb E, 2,190 ppb X), 57 ppb MTBE. W-4, 2,438 ppb BTEX (25 ppb B, 33 ppb T, 1,000 ppb E, 1,380 ppb X), MTBE ND. W-5, 7,969 ppb BTEX (2,320 ppb B, 119 ppb T, 2,190 ppb E, 3,340 ppb X), 102 ppb MTBE. W-6, 2,423 ppb BTEX (322 ppb B, 31 ppb T, 1,010 ppb E, 1,060 ppb X), 19 ppb MTBE. W-7, increased and 22,780 ppb BTEX (6,310 ppb B, 8,870 ppb T, 1,520 ppb E, 6,080 ppb X), increased and 8,350 ppb MTBE. Stipulation Agreement sent to Getty Properties and cc to Tyree and Delta. STIP due 7/24/2006. (RJF)8/16/2006 - Feng - Stipulation Agreement executed on 8/10/2006. (RJF)8/17/2006 - Feng - Quarterly Monitoring Report, 4/2006 - 7/2006, by Tyree. The site is active Lukoil gasoline station/convenience store. Groundwater flows to south at the depth of 7.38' to 8.87' bg. As of sampling on 7/24/2006, 9 monitoring wells. W-1, 57 ppb BTEX, 8 ppb MTBE. W-2, 13 ppb BTEX, 35 ppb MTBE. W-3, 6,862 ppb BTEX (635 ppb B, 3,260 ppb T, 346 ppb E, 2,621 ppb X), 114 ppb MTBE. W-4, 2,047 ppb BTEX, ND MTBE. W-5, 10,968 ppb BTEX (1,440 ppb B, 128 ppb T, 1,940 ppb E, 7,460 ppb X), ND MTBE. W-6, 2,982 ppb BTEX, 23 ppb MTBE. W-7, 24,900 ppb BTEX (6,320 ppb B, 5,590 ppb T, 1,430 ppb E, 11,560 ppb X), 4,700 ppb MTBE. W-8, both ND. W-9, destroyed during sidewalk repair. W-10, both ND. Emailed Rob Szczepanski (Tyree) to approve the delineation of contamination, RAP due 11/17/2006 as per the Stipulation Agreement. (RJF) 10/26/2006 - Feng - The adjacent property will be developed, 245 10th Ave and 502 West 24th Street, E-142-Designation Site of NYCDEP. Called Amy Ma of NYCDEP to inform her about the existing spill in the Getty Station locate 239 10th Ave. (RJF)11/15/2006 - Feng - Quarterly Monitoring Report, 8/2006 - 10/2006, 10/19/2006, by Tyree. Active Lukoil gasoline station/convenience store. Groundwater sampled and gauged 10/16/2006. 9 monitoring wells. DTW 8.31' to 9.83' bg. Flow direction south. No LNAPL. BTEX range ND to 30,410 ppb (MW-7). MTBE range ND to 3,330 ppb (MW-7). (RJF)1/18/2007 - Feng - Getty Properties portfolio meeting with Tyree and Delta. DEC staff has informed Tyree and Delta about the site development at the adjacent property, and the dewatering process may affect the contamination plume. Tyree will contact DEP before the preparation of

RAP. (RJF)1/23/2007 - Feng - Email Rob S. (Tyree) the contact person info in DEP and the adjacent project info. (RJF)6/6/2007 - Feng - Quarterly Monitoring Report, 11/2006 - 1/2007, 2/2007. Groundwater monitored 1/30/2007. 9 monitoring wells. Active gasoline station. DTW 7.94' to 9.47' bg. Flows southerly. LNAPL in W-7 (0.26'). W-1, 185 ppb BTEX, 163 ppb MTBE. W-2, 9 ppb BTEX, 24 ppb MTBE. W-3, 18,410 ppb BTEX, 102 ppb MTBE. W-4, not accessible. W-5, 10,606 ppb BTEX, 33 ppb MTBE. W-6m 1,953 ppb BTEX, 36 ppb MTBE. W-7, 0.26' of LNAPL. W-8, ND. W-9, destroyed. W-10, 3 ppb BTEX, MTBE ND. (RJF)7/9/2007 - Feng - Quarterly Monitoring Report, 2/2007 - 4/2007, 5/2007. Groundwater sampled 4/30/2007. 9 monitoring wells. DTW 9.06' to 16.76' bg. Flows to south. No LNAPL. W-1, 1,255 ppb BTEX, 129 ppb MTBE. W-2, 1,572 ppb BTEX, 362 ppb MTBE. W-3, Dry. W-4, NA. W-5, dry. W-6, NA. W-7, NA. W-8, ND. W-10, ND. (RJF)11/7/2007 - Feng - Quarterly Monitoring Report, 5/2007 - 7/2007, 8/2007. Groundwater sampled 7/30/2007. 9 monitoring wells were sampled. DTW 8.11' to 9.27' bg. Flows to south. No LNAPL. BTEX range ND to 5,980 ppb. MTBE range ND to 393 ppb. (RJF)11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. Tyree will sample for one more quarter to evaluate the site condition after the dewatering process at the adjacent site. Need to sample MW-4. RAP to be submitted by 2/2008. (RJF)1/28/2008 - Feng - Quarterly Monitoring Report, 8/2007 - 10/2007, 11/2007. Active Lukoil gasoline station/convenience store. Groundwater gauged and sampled 10/23/2007. 9 monitoring wells. DTW 10.05' to 16.37' bg. Flows to south. No LNAPL. BTEX range ND to 5,131 ppb (W-6). MTBE range ND to 252 ppb (W-3). (RJF)3/19/2008 - Feng - eDoc Quarterly Monitoring Report 1Q2008. (RJF)3/20/2008 - Feng - Email to Tyree and Delta for RAP status. (RJF)3/24/2008 - Feng - Quarterly Monitoring Report, 11/2007 - 1/2008, 2/2008. Active Lukoil gasoline station/convenience store. Groundwater was gauged and sampled 1/14/2008. 9 monitoring wells. No DTW available due to water probe broke onsite. Flows to south. No LNAPL. BTEX range ND to 4,203 ppb (W-1). MTBE range ND to 412 ppb (W-2). (RJF)7/11/2008 - 2Q2008, 2/2008 - 4/2008, 5/2008. Active Lukoil gasoline station/convenience store. Groundwater was gauged and sampled 4/25/2008. 9 monitoring wells. DTW 9.65' to 11.58' bg. Flows to south. No LNAPL. BTEX range ND to 10,765 ppb (W-3). MTBE range ND to 191 ppb (W-3). email Tyree for RAP status. (RJF)9/4/2008 - Getty Properties portfolio meeting with Delta and Tyree. The dewatering that started 4/2007 was stoped 2/2008. MW-4 was not sampled because storage box was on top of that. Wait to see the rebound before the delineation. Possible monitoring wells will be installed between the service building and the tank. (RJF)1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. Review 2Q2009 quarterly for possbile delineation. (RJF)3/18/2009 - Quarterly Monitoring Report, 5/2008 - 7/2008, 8/2008, by Tyree. Active Lukoil gasoline station convenience store. Groundwater was gauged and sampled 7/22/2008. 9 monitoring wells. NO LNAPL. DTW 9.21' to 10.67' bg. Flows to south. BTEX range ND to 7,530 ppb (W-3). MTBE range ND to 165 ppb (W-3). (RJF)5/6/2009 - Quarterly Monitoring Report, 8/2008 - 10/2008, 11/2008, by Tyree. Active Lukoil gasoline station convenience store. Groundwater was gauged and sampled 10/30/2008. 10 monitoring wells. NO LNAPL. DTW 8.11' to 9.66' bg. flows to south. BTEX range ND to 20,856 ppb (W-7). MTBE range ND to 192 ppb (W-7). (RJF)11/6/2009 - 2Q2009, 4/2009-6/2009, 9/2009, pdf, by Tyree. Active Lukoil gasoline station convenience store. 12 monitoring wells. Groundwater was gauged 4/24/2009, 5/29/2009, 6/19/2009 and 7/9/2009. NO LNAPL. DTW 8.11' to 9.66' bg. Flows to south. Groundwater was sampled 6/19/2009.

BTEX range ND to 11,198 ppb (W-7). MTBE range ND to 274 ppb (W-2). (RJF)7/9/2010 - Reviewed Investigation Work Plan, dated 6/3/2010, by Tyree. Tyree proposes 2 wells W-11 and W-12 in west of W-7 and north of W-7. Work Plan is approved. Report due 10/2010. 2/8/2012 - Reviewed the Subsurface Investigation Work Plan, dated 5/17/2011, by Tyree. Tyree proposes to install 2 monitoring wells at the sidewalk along West 24th Street. Tyree mentioned that refusals were hit during the previous attempt to install wells as per the 7/2010 approved work plan. 2/10/2012 - Letter sent to Getty approving the work plan. Report due 4/2012. DEC provides comments, 1) sample groundwater and soil for CP-51 list VOCs; 2) conduct site history review to identify the reason why W-5, W-6 and W-7 with elevated BTEX concentration. Notified Getty that the case has been transferred to Central Office. All the future correspondences shall be directed to the new project manager, Kevin Hale. (J. Feng)

Remarks: A LEAK IN THE REMOTE FILL. SOIL WAS REMOVED AND LEAK WAS REPAIRED.ORIGINAL SPILL ASSIGNED TO O'DOWD.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 02/01/2013	Source: EPA
Date Data Arrived at EDR: 03/01/2013	Telephone: N/A
Date Made Active in Reports: 03/13/2013	Last EDR Contact: 03/01/2013
Number of Days to Update: 12	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 02/01/2013	Source: EPA
Date Data Arrived at EDR: 03/01/2013	Telephone: N/A
Date Made Active in Reports: 03/13/2013	Last EDR Contact: 03/01/2013
Number of Days to Update: 12	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### ***Federal Delisted NPL site list***

#### DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/01/2013	Source: EPA
Date Data Arrived at EDR: 03/01/2013	Telephone: N/A
Date Made Active in Reports: 03/13/2013	Last EDR Contact: 03/01/2013
Number of Days to Update: 12	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

### ***Federal CERCLIS list***

#### CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/04/2013	Source: EPA
Date Data Arrived at EDR: 03/01/2013	Telephone: 703-412-9810
Date Made Active in Reports: 03/13/2013	Last EDR Contact: 03/01/2013
Number of Days to Update: 12	Next Scheduled EDR Contact: 06/10/2013
	Data Release Frequency: Quarterly

#### FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 07/31/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/09/2012	Telephone: 703-603-8704
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 01/11/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Varies

### ***Federal CERCLIS NFRAP site List***

#### CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/05/2013	Source: EPA
Date Data Arrived at EDR: 03/01/2013	Telephone: 703-412-9810
Date Made Active in Reports: 03/13/2013	Last EDR Contact: 01/04/2013
Number of Days to Update: 12	Next Scheduled EDR Contact: 03/11/2013
	Data Release Frequency: Quarterly

### ***Federal RCRA CORRACTS facilities list***

#### CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 02/12/2013  
Date Data Arrived at EDR: 02/21/2013  
Date Made Active in Reports: 02/27/2013  
Number of Days to Update: 6

Last EDR Contact: 02/08/2013  
Next Scheduled EDR Contact: 05/27/2013  
Data Release Frequency: Quarterly

### ***Federal RCRA non-CORRACTS TSD facilities list***

#### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/12/2013  
Date Data Arrived at EDR: 02/15/2013  
Date Made Active in Reports: 02/27/2013  
Number of Days to Update: 12

Telephone: (212) 637-3660  
Last EDR Contact: 02/15/2013  
Next Scheduled EDR Contact: 04/15/2013  
Data Release Frequency: Quarterly

### ***Federal RCRA generators list***

#### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/12/2013  
Date Data Arrived at EDR: 02/15/2013  
Date Made Active in Reports: 02/27/2013  
Number of Days to Update: 12

Source: Environmental Protection Agency  
Telephone: (212) 637-3660  
Last EDR Contact: 02/15/2013  
Next Scheduled EDR Contact: 04/15/2013  
Data Release Frequency: Quarterly

#### **RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/12/2013  
Date Data Arrived at EDR: 02/15/2013  
Date Made Active in Reports: 02/27/2013  
Number of Days to Update: 12

Source: Environmental Protection Agency  
Telephone: (212) 637-3660  
Last EDR Contact: 02/15/2013  
Next Scheduled EDR Contact: 04/15/2013  
Data Release Frequency: Quarterly

#### **RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/12/2013  
Date Data Arrived at EDR: 02/15/2013  
Date Made Active in Reports: 02/27/2013  
Number of Days to Update: 12

Source: Environmental Protection Agency  
Telephone: (212) 637-3660  
Last EDR Contact: 02/15/2013  
Next Scheduled EDR Contact: 04/15/2013  
Data Release Frequency: Varies

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### *Federal institutional controls / engineering controls registries*

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/19/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2012	Telephone: 703-603-0695
Date Made Active in Reports: 02/27/2013	Last EDR Contact: 03/11/2013
Number of Days to Update: 63	Next Scheduled EDR Contact: 06/24/2013
	Data Release Frequency: Varies

#### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/19/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2012	Telephone: 703-603-0695
Date Made Active in Reports: 02/27/2013	Last EDR Contact: 03/11/2013
Number of Days to Update: 63	Next Scheduled EDR Contact: 06/24/2013
	Data Release Frequency: Varies

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 02/18/2013
Number of Days to Update: 31	Next Scheduled EDR Contact: 06/03/2013
	Data Release Frequency: Varies

### *Federal ERNS list*

#### ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2012	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/17/2013	Telephone: 202-267-2180
Date Made Active in Reports: 02/15/2013	Last EDR Contact: 01/17/2013
Number of Days to Update: 29	Next Scheduled EDR Contact: 04/15/2013
	Data Release Frequency: Annually

### *State- and tribal - equivalent CERCLIS*

#### NY SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 11/19/2012	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/20/2012	Telephone: 518-402-9622
Date Made Active in Reports: 12/12/2012	Last EDR Contact: 02/20/2013
Number of Days to Update: 22	Next Scheduled EDR Contact: 06/03/2013
	Data Release Frequency: Annually

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### NJ SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

Date of Government Version: 04/17/2012	Source: New Jersey Department of Environmental Protection
Date Data Arrived at EDR: 05/31/2012	Telephone: 609-292-8761
Date Made Active in Reports: 06/27/2012	Last EDR Contact: 03/01/2013
Number of Days to Update: 27	Next Scheduled EDR Contact: 06/10/2013
	Data Release Frequency: Varies

### NY VAPOR REOPENED: Vapor Intrusion Legacy Site List

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

Date of Government Version: 05/01/2012	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 05/23/2012	Telephone: 518-402-9814
Date Made Active in Reports: 07/03/2012	Last EDR Contact: 02/20/2013
Number of Days to Update: 41	Next Scheduled EDR Contact: 06/03/2013
	Data Release Frequency: Varies

### ***State and tribal landfill and/or solid waste disposal site lists***

#### NY SWF/LF: Facility Register

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 01/07/2013	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 01/09/2013	Telephone: 518-457-2051
Date Made Active in Reports: 01/16/2013	Last EDR Contact: 01/07/2013
Number of Days to Update: 7	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Semi-Annually

#### NJ SWF/LF: Solid Waste Facility Directory

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 10/01/2012	Source: Department of Environmental Protection
Date Data Arrived at EDR: 11/07/2012	Telephone: 609-984-6741
Date Made Active in Reports: 12/07/2012	Last EDR Contact: 02/07/2013
Number of Days to Update: 30	Next Scheduled EDR Contact: 05/20/2013
	Data Release Frequency: Quarterly

### ***State and tribal leaking storage tank lists***

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### NY LTANKS: Spills Information Database

Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

Date of Government Version: 11/19/2012	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/20/2012	Telephone: 518-402-9549
Date Made Active in Reports: 01/08/2013	Last EDR Contact: 02/20/2013
Number of Days to Update: 49	Next Scheduled EDR Contact: 06/03/2013
	Data Release Frequency: Varies

### NY HIST LTANKS: Listing of Leaking Storage Tanks

A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database. Department of Environmental Conservation.

Date of Government Version: 01/01/2002	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 07/08/2005	Telephone: 518-402-9549
Date Made Active in Reports: 07/14/2005	Last EDR Contact: 07/07/2005
Number of Days to Update: 6	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### INDIAN LUST R6: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in New Mexico and Oklahoma.

Date of Government Version: 09/12/2011	Source: EPA Region 6
Date Data Arrived at EDR: 09/13/2011	Telephone: 214-665-6597
Date Made Active in Reports: 11/11/2011	Last EDR Contact: 01/28/2013
Number of Days to Update: 59	Next Scheduled EDR Contact: 05/13/2013
	Data Release Frequency: Varies

### INDIAN LUST R9: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Arizona, California, New Mexico and Nevada

Date of Government Version: 09/06/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/07/2012	Telephone: 415-972-3372
Date Made Active in Reports: 10/16/2012	Last EDR Contact: 01/28/2013
Number of Days to Update: 39	Next Scheduled EDR Contact: 05/13/2013
	Data Release Frequency: Quarterly

### INDIAN LUST R8: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Colorado, Montana, North Dakota, South Dakota, Utah and Wyoming.

Date of Government Version: 08/27/2012	Source: EPA Region 8
Date Data Arrived at EDR: 08/28/2012	Telephone: 303-312-6271
Date Made Active in Reports: 10/16/2012	Last EDR Contact: 01/28/2013
Number of Days to Update: 49	Next Scheduled EDR Contact: 05/13/2013
	Data Release Frequency: Quarterly

### INDIAN LUST R1: Leaking Underground Storage Tanks on Indian Land

A listing of leaking underground storage tank locations on Indian Land.

Date of Government Version: 04/12/2012	Source: EPA Region 1
Date Data Arrived at EDR: 05/09/2012	Telephone: 617-918-1313
Date Made Active in Reports: 07/10/2012	Last EDR Contact: 02/01/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 05/13/2013
	Data Release Frequency: Varies

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### INDIAN LUST R7: Leaking Underground Storage Tanks on Indian Land LUSTs on Indian land in Iowa, Kansas, and Nebraska

Date of Government Version: 08/17/2012	Source: EPA Region 7
Date Data Arrived at EDR: 08/28/2012	Telephone: 913-551-7003
Date Made Active in Reports: 10/16/2012	Last EDR Contact: 01/28/2013
Number of Days to Update: 49	Next Scheduled EDR Contact: 05/13/2013
	Data Release Frequency: Varies

### INDIAN LUST R4: Leaking Underground Storage Tanks on Indian Land LUSTs on Indian land in Florida, Mississippi and North Carolina.

Date of Government Version: 12/14/2011	Source: EPA Region 4
Date Data Arrived at EDR: 12/15/2011	Telephone: 404-562-8677
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 01/28/2013
Number of Days to Update: 26	Next Scheduled EDR Contact: 05/13/2013
	Data Release Frequency: Semi-Annually

### INDIAN LUST R10: Leaking Underground Storage Tanks on Indian Land LUSTs on Indian land in Alaska, Idaho, Oregon and Washington.

Date of Government Version: 08/01/2012	Source: EPA Region 10
Date Data Arrived at EDR: 08/02/2012	Telephone: 206-553-2857
Date Made Active in Reports: 10/16/2012	Last EDR Contact: 10/30/2012
Number of Days to Update: 75	Next Scheduled EDR Contact: 05/13/2013
	Data Release Frequency: Quarterly

### **State and tribal registered storage tank lists**

#### NY TANKS: Storage Tank Facility Listing

This database contains records of facilities that are or have been regulated under Bulk Storage Program. Tank information for these facilities may not be releasable by the state agency.

Date of Government Version: 01/02/2013	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 01/02/2013	Telephone: 518-402-9543
Date Made Active in Reports: 01/16/2013	Last EDR Contact: 01/02/2013
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/15/2013
	Data Release Frequency: Quarterly

#### NY UST: Petroleum Bulk Storage (PBS) Database

Facilities that have petroleum storage capacities in excess of 1,100 gallons and less than 400,000 gallons.

Date of Government Version: 01/02/2013	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 01/02/2013	Telephone: 518-402-9549
Date Made Active in Reports: 01/16/2013	Last EDR Contact: 01/02/2013
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/15/2013
	Data Release Frequency: No Update Planned

#### NJ UST: Underground Storage Tank Data

Registered Underground Storage Tanks. UST's are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. Available information varies by state program.

Date of Government Version: 10/17/2012	Source: Department of Environmental Protection
Date Data Arrived at EDR: 12/26/2012	Telephone: 609-341-3121
Date Made Active in Reports: 02/11/2013	Last EDR Contact: 02/11/2013

Data Release Frequency: No Update Planned

### *State and tribal voluntary cleanup sites*

#### NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

Date of Government Version: 11/19/2012  
Date Data Arrived at EDR: 11/20/2012

Number of Days to Update: 27	Next Scheduled EDR Contact: 07/20/2009
	Data Release Frequency: Varies

### *State and tribal Brownfields sites*

#### NY ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

Date of Government Version: 11/19/2012	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/20/2012	Telephone: 518-402-9622

Number of Days to Update: 35	Next Scheduled EDR Contact: 05/13/2013
	Data Release Frequency: Annually

### ADDITIONAL ENVIRONMENTAL RECORDS

#### *Local Brownfield lists*

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## Local Land Records

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/16/2012  
Date Data Arrived at EDR: 03/26/2012

Data Release Frequency: Varies

### NJ LIENS: Environmental LIENS

A listing of properties with environmental liens. The listing includes sites from the Site Remediation & Waste Management Program Sites where the Department has placed either a 1st Priority or Regular Spill Fund Lien against. 1st Priority Type Lien - a lien placed against the property where the discharged occurred providing that the owners of the property have some responsibility towards the discharge. First Priority Lien is superior to other types of liens. Non-Priority (Regular) Type Lien - a lien placed against the Responsible Party & their revenues and all real and personal property, other than the real property comprising the location of the discharge.

Date of Government Version: 11/07/2012  
Date Data Arrived at EDR: 12/26/2012

## Records of Emergency Release Reports

### HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/31/2012  
Date Data Arrived at EDR: 01/03/2013  
Date Made Active in Reports: 02/27/2013  
Number of Days to Update: 55

Source: U.S. Department of Transportation  
Telephone: 202-366-4555  
Last EDR Contact: 01/03/2013  
Next Scheduled EDR Contact: 04/15/2013  
Data Release Frequency: Annually

### NY SPILLS: Spills Information Database

Data collected on spills reported to NYSDEC as required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

Data Release Frequency: Varies

### NY HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Date of Government Version: 01/01/2002

### Other Ascertainable Records

#### RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 02/12/2013

Next Scheduled EDR Contact: 06/24/2013  
Data Release Frequency: Varies

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### CONSENT: Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 12/31/2011	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 01/15/2013	Telephone: Varies
Date Made Active in Reports: 03/13/2013	Last EDR Contact: 12/28/2012
Number of Days to Update: 57	Next Scheduled EDR Contact: 04/15/2013
	Data Release Frequency: Varies

### ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 11/02/2012	Source: EPA
Date Data Arrived at EDR: 12/11/2012	Telephone: 703-416-0223
Date Made Active in Reports: 03/13/2013	Last EDR Contact: 03/13/2013
Number of Days to Update: 92	Next Scheduled EDR Contact: 06/24/2013
	Data Release Frequency: Annually

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010	Source: Department of Energy
Date Data Arrived at EDR: 10/07/2011	Telephone: 505-845-0011
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 02/25/2013
Number of Days to Update: 146	Next Scheduled EDR Contact: 06/10/2013
	Data Release Frequency: Varies

### US MINES: Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 08/18/2011	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 09/08/2011	Telephone: 303-231-5959
Date Made Active in Reports: 09/29/2011	Last EDR Contact: 03/06/2013
Number of Days to Update: 21	Next Scheduled EDR Contact: 06/17/2013
	Data Release Frequency: Semi-Annually

### TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2009	Source: EPA
Date Data Arrived at EDR: 09/01/2011	Telephone: 202-566-0250
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 02/26/2013
Number of Days to Update: 131	Next Scheduled EDR Contact: 06/10/2013
	Data Release Frequency: Annually

### TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2006	Source: EPA
Date Data Arrived at EDR: 09/29/2010	Telephone: 202-260-5521
Date Made Active in Reports: 12/02/2010	Last EDR Contact: 12/28/2012
Number of Days to Update: 64	Next Scheduled EDR Contact: 04/08/2013
	Data Release Frequency: Every 4 Years

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

**FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)**  
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 02/25/2013
Number of Days to Update: 25	Next Scheduled EDR Contact: 06/10/2013
	Data Release Frequency: Quarterly

**FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)**  
A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 02/25/2013
Number of Days to Update: 25	Next Scheduled EDR Contact: 06/10/2013
	Data Release Frequency: Quarterly

**HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing**

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

**HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing**

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2008
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

**SSTS: Section 7 Tracking Systems**

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009	Source: EPA
Date Data Arrived at EDR: 12/10/2010	Telephone: 202-564-4203
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 01/28/2013
Number of Days to Update: 77	Next Scheduled EDR Contact: 05/13/2013
	Data Release Frequency: Annually

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 07/20/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/10/2011	Telephone: 202-564-5088
Date Made Active in Reports: 01/10/2012	Last EDR Contact: 01/17/2013
Number of Days to Update: 61	Next Scheduled EDR Contact: 04/29/2013
	Data Release Frequency: Quarterly

### PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 11/01/2010	Source: EPA
Date Data Arrived at EDR: 11/10/2010	Telephone: 202-566-0500
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 01/16/2013
Number of Days to Update: 98	Next Scheduled EDR Contact: 04/29/2013
	Data Release Frequency: Annually

### MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 06/21/2011	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 07/15/2011	Telephone: 301-415-7169
Date Made Active in Reports: 09/13/2011	Last EDR Contact: 03/11/2013
Number of Days to Update: 60	Next Scheduled EDR Contact: 06/24/2013
	Data Release Frequency: Quarterly

### RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 10/02/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/02/2012	Telephone: 202-343-9775
Date Made Active in Reports: 11/05/2012	Last EDR Contact: 01/09/2013
Number of Days to Update: 34	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

### FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/23/2011	Source: EPA
Date Data Arrived at EDR: 12/13/2011	Telephone: (212) 637-3000
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 03/12/2013
Number of Days to Update: 79	Next Scheduled EDR Contact: 06/24/2013
	Data Release Frequency: Quarterly

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 04/17/1995      Source: EPA  
Date Data Arrived at EDR: 07/03/1995      Telephone: 202-564-4104  
Date Made Active in Reports: 08/07/1995      Last EDR Contact: 06/02/2008  
Number of Days to Update: 35      Next Scheduled EDR Contact: 09/01/2008  
Data Release Frequency: No Update Planned

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 05/08/2012      Source: Environmental Protection Agency  
Date Data Arrived at EDR: 05/25/2012      Telephone: 202-564-8600

Number of Days to Update: 46      Next Scheduled EDR Contact: 05/13/2013  
Data Release Frequency: Varies

### BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2009      Source: EPA/NTIS  
Date Data Arrived at EDR: 03/01/2011      Telephone: 800-424-9346  
Date Made Active in Reports: 05/02/2011      Last EDR Contact: 02/26/2013  
Number of Days to Update: 62      Next Scheduled EDR Contact: 06/10/2013  
Data Release Frequency: Biennially

### NY HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

Date of Government Version: 01/01/2003      Source: Department of Environmental Conservation  
Date Data Arrived at EDR: 10/20/2006      Telephone: 518-402-9564

Number of Days to Update: 52	Next Scheduled EDR Contact: 04/01/2013
	Data Release Frequency: Varies

### NJ DRYCLEANERS: Drycleaner List

A listing of registered drycleaners.

Date of Government Version: 11/29/2012	Source: Department of Environmental Protection
Date Data Arrived at EDR: 11/30/2012	Telephone: 609-292-2795
Date Made Active in Reports: 12/07/2012	Last EDR Contact: 02/25/2013
Number of Days to Update: 7	Next Scheduled EDR Contact: 05/27/2013
	Data Release Frequency: Varies

### NY SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

Date of Government Version: 10/23/2012	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 10/24/2012	Telephone: 518-402-8233

### NY E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

Data Release Frequency: Varies

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 07/31/2012  
Date Data Arrived at EDR: 08/13/2012

Data Release Frequency: Annually

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

**EDR MGP: EDR Proprietary Manufactured Gas Plants**  
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

**EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations**  
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

### Electric Power Transmission Line Data

Source: Rextag Strategies Corp.  
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

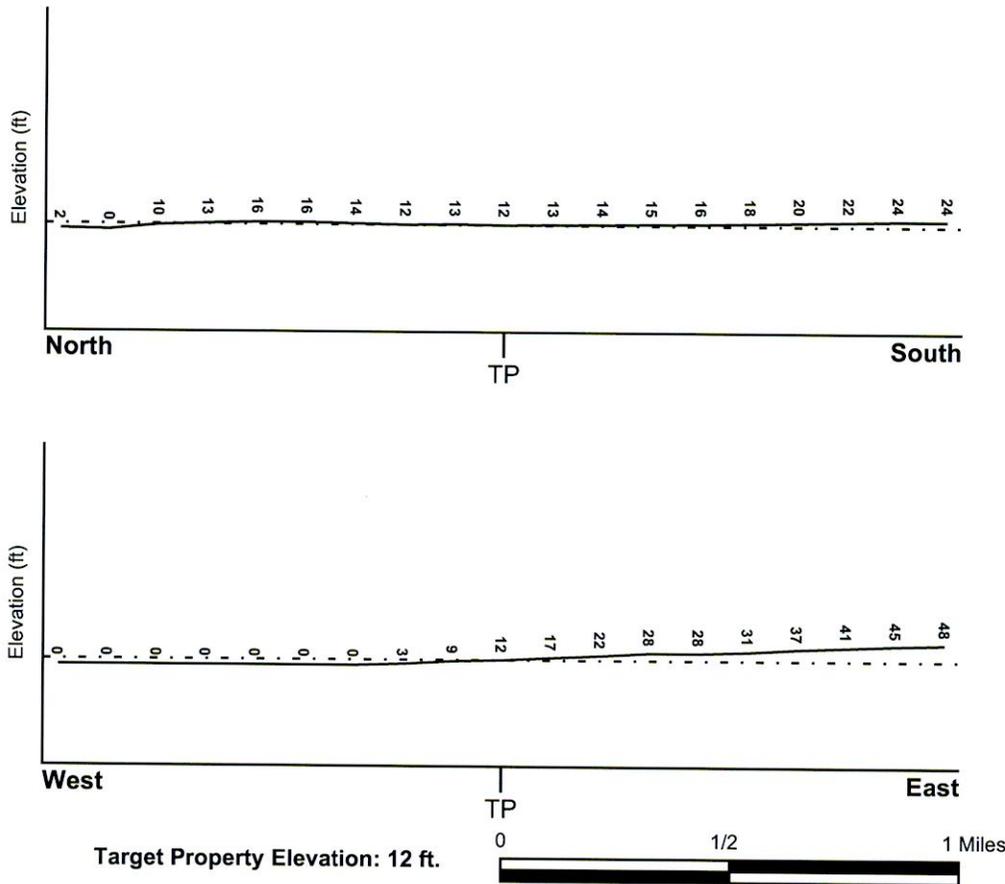

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Target Property County</u> NEW YORK, NY	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u> JERSEY CITY	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	--

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile ENE
Site Name:	MANHATTAN GENERAL MAIL FACILITY
Site EPA ID Number:	NY6180000352
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

Era: Paleozoic  
System: Ordovician  
Series: Lower Ordovician and Cambrian carbonate rocks  
Code: OC (decoded above as Era, System & Series)

#### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Surficial Soil Types: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock  
very gravelly - loamy sand  
stratified  
sandy loam

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## Limited Permission To Make Copies

Merritt Environmental Consulting Corp. (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

### Disclaimer - Copyright and Trademark notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

## The EDR Aerial Photo Decade Package

440 Wheelers Farms Road  
Milford, CT 06461  
800.352.0050  
[www.edrnet.com](http://www.edrnet.com)

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2012. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

## **Charles G. Merritt President**

As Merritt Environmental Consulting Corp.'s Principal and Senior Certified Environmental Specialist (CES), Mr. Merritt supervises all aspects of environmental assessments (Phase I & Transaction Screen) reports. These assessments include on site property evaluations, site interviews, reviews of regulatory data, and public records to identify environmental concerns. Mr. Merritt has received extensive training, professional certifications, and over 20 years of industry experience; providing a range of diversified environmental services for a wide variety of clients.

---

### **Areas of Expertise:**

- Phase I Environmental Site Assessments (ESA) E1527-00 & E1527-05 (All Appropriate Inquiry "AAI" standards)
  - Provide peer review of environmental reports for lending institutions
  - Supervise Site Remediations
  - Review of all Environmental Reports prepared
  - Client Liaison
- 

### **Professional Experience:**

- Conduct Environmental Site Assessments (ESA's) for lending institutions, property owners, insurance companies and private investors conducting due diligence investigations
  - Perform asbestos, lead-based paint, mold and radon surveys
- 

### **Education/Certificates/Membership**

- Adelphi University  
Bachelor of Business Administration **May 1988**
- 

### **Certifications and Affiliation:**

- LEED AP
- ASTM Technical & Professional Training
- Certified Environmental Specialist (CES) EAA #10770

## **John Perotti**

### **Project Manager**

As an experienced Certified Environmental Specialist (CES), Mr. Perotti performs Phase I Environmental Site Assessments (ESA) and Transaction Screens for the Tri-State region. The environmental assessments include on site property inspections, reviews of regulatory data, and historical data to identify environmental concerns.

---

#### **Areas of Expertise:**

- Phase I Environmental Site Assessments (ESA) E1527-00 & E1527-05 (All Appropriate Inquiry "AAI" standards)
  - Environmental Transaction Screens
  - Asbestos and lead investigations
- 

#### **Professional Experience:**

- Conduct Environmental Site Assessments (ESA's) for lending institutions, property owners and other private clients conducting due diligence investigations
- 

#### **Certifications and Affiliation:**

- Certified Environmental Specialist (EAA) #73426
- New York State Asbestos Inspector
- New York State Asbestos Project Manager
- New York State Asbestos Air Monitor
- New York State Asbestos Supervisor
- EPA Certification for Lead Based Paint Supervisor
- ASTM 1527-05 "All Appropriate Inquiry" qualified environmental professional

## **Gary Pollack** **Project Manager**

As an experienced Certified Environmental Inspector (CEI), Mr. Pollack performs Phase I Environmental Site Assessments (ESA) and Transaction Screens for the Tri-State region. The environmental assessments include on site property inspections, reviews of regulatory data, and historical data to identify environmental concerns.

---

### **Areas of Expertise:**

- Phase I Environmental Site Assessments (ESA) E1527-00 & E1527-05 (All Appropriate Inquiry "AAI" standards)
  - Environmental Transaction Screens
  - Asbestos, lead and mold investigations
- 

### **Professional Experience:**

- Conduct Environmental Site Assessments (ESA's) for lending institutions, property owners and other private clients conducting due diligence investigations
- 

### **Certifications and Affiliation:**

- Certified Environmental Inspector (EAA) #14087
- State of New Jersey Asbestos Inspector
- State of New Jersey Asbestos Project Manager
- State of New Jersey Asbestos Air Monitor
- State of New Jersey Asbestos Supervisor
- EPA Certification for Lead Based Paint Supervisor
- ASTM 1527-05 "All Appropriate Inquiry" qualified environmental professional

Mr. Ran Korolik  
vatallaire@aol.com

Re: Phase I ASTM - Document & Information Inquiry Sheet  
*239-243 10th Ave (aka: 501-503 West 24th St), New York, NY*

Dear Mr. Korolik:

Merritt Environmental Consulting Corp. has been retained to conduct a Phase I Site Assessment of the above referenced property in accordance with the ASTM standards.

We kindly request that someone knowledgeable with the property provide the information requested below to our office.

- **Current owning entity name**
- **Year purchased**
- **Year of construction**
- **AKA addresses**
- **Cross Street**
- **Block and Lot**
- **Plot size**
- **Sq. footage of building**
- **Building manager / Super's name**
- **Title Records**
- **Tenant list (commercial/retail only)**
- **Site Survey**

**Specialized Knowledge of site:**

- **Environmental Liens**
- **Valuation reduction for Environmental issues**
- **Prior Environmental Reports**

Your quick response to provide this information will facilitate the commencement of our report. Furthermore, the information provided will appear as exhibits in our report. Should you have any questions or if you need further assistance, please feel free to contact Denise Nocerino (dnocerino@merrittec.com).

Regards,

A handwritten signature in black ink, appearing to read 'Charles G. Merritt', is written over a circular stamp.

Charles G. Merritt

---

## Phase I Environmental Site Assessment

### User Provided Information Questionnaire

The ASTM standard for Phase I ESAs requires that the user (usually the client) be responsible for certain information that is included in the Phase I report. The following questions are being provided to you as the "user". You may or may not know specifics about what is being asked.

Name: \_\_\_\_\_

Organization: \_\_\_\_\_

Subject Site: \_\_\_\_\_

Signed: \_\_\_\_\_

Date: \_\_\_\_\_

---

1. Title Records: Do you currently have any title records for the Site?

(If "yes", please mail, fax, or e-mail a copy to MEC)

2. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

3. Are you aware of any activity or land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

4. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

a) Do you know the past uses of the property? If so, what are they?

b) Do you know of specific chemicals that are present or once were present at the property?

c) Do you know of spills or other chemical releases that have taken place at the property?

d) Do you know of any environmental cleanups that have taken place at the property?

6. Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?

7. Do you know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?

8. Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?

9. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

10. Do you believe that the value of the Site that was or is being paid for this property reasonably reflects the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

**Report Date:** June 2010

**Spill Information:**

**Cause:** Impacted soil was discovered as a result of a subsurface investigation conducted as part of a soil waste classification event conducted on September 17, 1997

**Source:** Former UST

**Current Site Status:** Active Lukoil gasoline station/convenience store

**Monitoring Period:** January through March, First Quarter 2010

**Well Information:** Number/type: 12 groundwater monitoring wells

**Groundwater Monitoring:**

**Gauging Frequency:** Monthly  
**Sampling Frequency:** Quarterly  
**Sample Date:** February 18, 2010  
**Wells containing LNAPL:** None  
**LNAPL Thickness:** N/A  
**Range of Total BTEX concentrations:** Non-detect to 4,766.9 (W-5) ppb  
**Range of MTBE concentrations:** Non-detect to 69.9 (W-7) ppb  
**Range of Groundwater Depths:** 7.52 (W-2) feet to 9.12 (W-3) feet below grade  
**Groundwater Flow Direction:** Southwesterly

Notes: A Freedom of Information Act (FOIA) review for the adjacent property that was conducting a dewatering project in 2009 did not provide any pertinent information.

A workplan submitted to the NYSDEC on June 3, 2010 was developed as per a meeting between the New York State Department of Environmental Conservation (NYSDEC), Tyree, and Delta Consultants on February 24, 2010. The work proposed as part of this workplan was developed in an effort to further delineate groundwater impacts north and west of existing monitoring well W-7.

Tyree Project #2100201-422

### Report Prepared For:

Mr. Brad Fisher  
Delta Consultants, on behalf of Getty Properties Corp.  
500 Summit Lake Drive, Suite 150  
Valhalla, New York 10595

### Report Prepared By:

Tyree Environmental Corp.  
208 Route 109, Suite 100  
Farmingdale, New York 11735

**REPORTING PERIOD – JULY 2010 THROUGH SEPTEMBER 2010**

### INTRODUCTION

This Quarterly Monitoring Report (QMR) has been prepared by Tyree Environmental Corp. (Tyree), on behalf of Getty Properties Corp. (Getty), to summarize the groundwater sampling and gauging conducted at the subject site (Service Station) in accordance with the requirements set forth by the New York State Department of Environmental Conservation (NYSDEC) regarding spill number 97-07190. A map depicting the current site layout is included in **Figure 1**.

### SITE HISTORY

On September 17, 1997 Tyree conducted a repair of the remote fill located along the southern edge of the subject property. During the repair activities petroleum impacted soil was encountered and spill number 97-07190 was issued by the NYSDEC Region II. Approximately 1 cubic yard of impacted soil was removed from around the fill portal. In 1998 Tyree removed three (3) 4000-gallon underground storage tanks (USTs), twelve (12) 550-gallon gasoline USTs, one (1) 275-gallon fuel oil UST, two (2) fueling pump islands and the remote fill from the subject site as per the EPA mandate for tank upgrades. During the removal activities petroleum impacted soil was encountered around  
Getty Service Station #00341  
New York, New York

December 2010

the USTs and spill number 98-10383 was issued by the NYSDEC Region II. A total of 1,852.91 tons of impacted soil was removed up to a depth of twenty (20) feet below grade from the former UST locations and disposed of at Posillico Bros. of Farmingdale, New York. Following the removal of impacted soils, nine (9) endpoint samples were collected around the gasoline USTs at a depth of five (5) to ten (10) feet below grade. Laboratory analytical results identified concentrations of volatile organic compounds (VOCs) including MTBE exceeding NYSDEC guidance values from samples collected from bottom and from the south and east walls of the tank field. One (1) endpoint sample was collected from bottom of the fuel oil UST at a depth of twenty (20) feet below grade. Laboratory analytical results identified concentrations of VOCs including MTBE as well as semi-volatile organic compounds (SVOCs) exceeding NYSDEC guidance values from the bottom sample. Spill number 98-10383 was subsequently closed by the NYSDEC on October 18, 2005.

In April 2001 monitoring wells MW-1 through MW-3 were installed on the subject property around the former gasoline UST field to delineate the hydrocarbon plume onsite. Baseline groundwater analytical results for wells MW-1 through MW-3 indicated detectable levels of VOCs including MTBE exceeding NYSDEC Groundwater Quality Standards (GWQS).

In April 2005 monitoring wells MW-4 through MW-7 were installed in the sidewalk bordering the subject property along 10<sup>th</sup> Avenue and West 24<sup>th</sup> Street to delineate soil and groundwater impacts offsite. Laboratory analytical results for soil samples collected from MW-5 through MW-7 identified VOCs exceeding NYSDEC standards. Baseline groundwater analytical results for wells MW-4, MW-6 and MW-7 indicated detectable levels of VOCs including MTBE exceeding NYSDEC GWQS.

In May 2006 monitoring wells MW-8 through MW-10 were installed in the sidewalk across 10<sup>th</sup> Avenue and West 24<sup>th</sup> Street to further characterize hydrogeologic conditions and to delineate soil and groundwater impacts offsite. Laboratory analytical results from soil samples collected during the subsurface investigation did not identify any VOCs or SVOCs exceeding NYSDEC standards.

### **WELL GAUGING / SAMPLING INFORMATION**

Prior to sampling, each monitoring well was gauged for static water level and then purged of three well volumes or until dry. Once the groundwater within each monitoring well recharged to at least 90 percent of its static water level, groundwater samples were collected. Summaries of the groundwater elevation data and groundwater chemistry data measured during the August 4, 2010 groundwater sampling event (including complete historical data) have been provided in **Tables 1 and 2**, respectively.

**Dates Wells Gauged -** 7/28/10, 8/4/10 and 9/30/10

**Number of Wells Gauged –** 7/28/10 – ten (10)  
8/4/10 – ten (10)

	9/30/10 – ten (10)
<b>Gauged Well Identifications -</b>	7/28/10 – MW-1 through MW-10 8/4/10 – MW-1 through MW-10 9/30/10 – MW-1 through MW-10
<b>Dates Wells Sampled -</b>	8/4/10
<b>Number of Wells Sampled –</b>	Ten (10)
<b>Sampled Well Identifications –</b>	MW-1 through MW-10
<b>Wells Not Sampled and Reason –</b>	None
<b>Liquid Phase Hydrocarbons (LPH) Detected and LPH Thickness –</b>	None
<b>Generalized Groundwater Flow Direction –</b>	Southwest
<b>Wells Not Used in Contouring and Reason –</b>	8/4/10 – MW-6 Groundwater elevations anomalous to historical levels
<b>Laboratory Analytical Parameters and Methods –</b>	BTEX, MTBE and Ethanol (MW-3, MW-4 and MW-7) via United States Environmental Protection Agency (USEPA) Method 8260
<b>New York-Certified Laboratory –</b>	Accutest Laboratories; Dayton, New Jersey

### LABORATORY ANALYTICAL RESULTS

Laboratory analytical results associated with the August 4, 2010 groundwater sampling event indicate that target compounds of concern (COCs) exceeded NYSDEC groundwater standards at the following monitoring well locations:

<b>MW-1</b>	benzene (93.7 ppb), ethylbenzene (64.0 ppb) and total xylenes (26.9 ppb)
<b>MW-2</b>	benzene (14.6 ppb), ethylbenzene (9.6 ppb), total xylenes (8.4 ppb), and MTBE (13.0 ppb)
<b>MW-3</b>	benzene (96.7 ppb), toluene (5.3 ppb), ethylbenzene (371 ppb) and total xylenes (231 ppb)
<b>MW-4</b>	none
<b>MW-5</b>	benzene (491 ppb), toluene (51.4 ppb), ethylbenzene (2,290 ppb) and total xylenes (3,350 ppb)
<b>MW-6</b>	benzene (446 ppb), toluene (31.1 ppb), ethylbenzene (990 ppb), total

- MW-7 xylenes (178 ppb), and MTBE (34.2 ppb)  
 benzene (2,280 ppb), toluene (339 ppb), ethylbenzene (2,940 ppb) and  
 total xylenes (9,060 ppb)
- MW-8 none
- MW-9 none
- MW-10 benzene (4.2 ppb), ethylbenzene (12.8 ppb) and total xylenes (29.3 ppb)

Historical groundwater analytical results are summarized in **Table 2**. Groundwater elevation maps for the July 28, 2010, August 4, 2010 and September 30, 2010 groundwater gauging events are included as **Figures 1, 2 and 3**, respectively. BTEX and MTBE plume maps associated with the August 4, 2010 groundwater sampling event are included as **Figures 4 and 5**, respectively. In addition, a copy of the original laboratory analytical data package associated with the August 4, 2010 groundwater sampling event has been included in **Appendix A**.

### SITE PROGRESS UPDATE

On September 15, 2010 Tyree conducted a subsurface investigation at the subject site in order to further delineate groundwater impacts north and west of existing monitoring well MW-7 in accordance with the meeting held between the NYSDEC, Tyree, and Delta on February 24, 2010. Tyree advanced six (6) borings (RF-1 through RF-6) on and offsite in an attempt to install two new (2) groundwater monitoring wells. All boring attempts resulted in refusal at a maximum depth of five feet below grade due to various subsurface conditions (impenetrable bedrock, utilities and collapsing pea gravel in close proximity to the USTs and vent lines). The Subsurface Investigation Report will be submitted to the NYSDEC by the end of the fourth quarter 2010 monitoring period.

**REPORTING PERIOD – OCTOBER 2010 THROUGH DECEMBER 2010**

### INTRODUCTION

This Quarterly Monitoring Report (QMR) has been prepared by Tyree Environmental Corp. (Tyree), on behalf of Getty Properties Corp. (Getty), to summarize the groundwater sampling and gauging conducted at the subject site (Service Station) in accordance with the requirements set forth by the New York State Department of Environmental Conservation (NYSDEC) regarding spill number 97-07190. A map depicting the current site layout is included in **Figure 1**.

### SITE HISTORY

On September 17, 1997 Tyree conducted a repair of the remote fill located along the southern edge of the subject property. During the repair activities petroleum impacted soil was encountered and spill number 97-07190 was issued by the NYSDEC Region II. Approximately one (1) cubic yard of impacted soil was removed from around the fill portal. In 1998 Tyree removed three (3) 4000-gallon underground storage tanks (USTs), twelve (12) 550-gallon gasoline USTs, one (1) 275-gallon fuel oil UST, two (2) fueling pump islands and the remote fill from the subject site as per the EPA mandate for tank upgrades. During the removal activities petroleum impacted soil was encountered around

Former Getty Service Station #00341  
New York, New York

February 2011

the USTs and spill number 98-10383 was issued by the NYSDEC Region II. A total of 1,852.91 tons of impacted soil was removed up to a depth of twenty (20) feet below grade from the former UST locations and disposed of at Posillico Bros. of Farmingdale, New York. Following the removal of impacted soils, nine (9) endpoint samples were collected around the gasoline USTs at a depth of five (5) to ten (10) feet below grade. Laboratory analytical results identified concentrations of volatile organic compounds (VOCs) including MTBE exceeding NYSDEC guidance values from samples collected from bottom and from the south and east walls of the tank field. One (1) endpoint sample was collected from bottom of the fuel oil UST at a depth of twenty (20) feet below grade. Laboratory analytical results identified concentrations of VOCs including MTBE as well as semi-volatile organic compounds (SVOCs) exceeding NYSDEC guidance values from the bottom sample. Spill number 98-10383 was subsequently closed by the NYSDEC on October 18, 2005.

In April 2001 monitoring wells MW-1 through MW-3 were installed on the subject property around the former gasoline UST field to delineate the hydrocarbon impacts onsite. Baseline groundwater analytical results for wells MW-1 through MW-3 indicated detectable levels of VOCs including MTBE exceeding NYSDEC Groundwater Quality Standards (GWQS).

In April 2005 monitoring wells MW-4 through MW-7 were installed in the sidewalk bordering the subject property along 10<sup>th</sup> Avenue and West 24<sup>th</sup> Street to delineate soil and groundwater impacts offsite. Laboratory analytical results for soil samples collected from MW-5 through MW-7 identified VOCs exceeding NYSDEC standards. Baseline groundwater analytical results for wells MW-4, MW-6 and MW-7 indicated detectable levels of VOCs including MTBE exceeding NYSDEC GWQS.

In May 2006 monitoring wells MW-8 through MW-10 were installed in the sidewalk across 10<sup>th</sup> Avenue and West 24<sup>th</sup> Street to further characterize hydrogeologic conditions and to delineate soil and groundwater impacts offsite. Laboratory analytical results from soil samples collected during the subsurface investigation did not identify any VOCs or SVOCs exceeding NYSDEC standards.

On September 15, 2010 Tyree conducted a subsurface investigation at the subject site in order to further delineate groundwater impacts north and west of existing monitoring well MW-7 in accordance with the meeting held between the NYSDEC, Tyree, and Antea Group on February 24, 2010. Tyree advanced six (6) borings (RF-1 through RF-6) on and offsite in an attempt to install two (2) new groundwater monitoring wells (Proposed MW-11 and MW-12). All boring attempts resulted in refusal at a maximum depth of five feet below grade due to various subsurface conditions (impenetrable bedrock, utilities and collapsing pea gravel in close proximity to the USTs and vent lines).

## WELL GAUGING / SAMPLING INFORMATION

Prior to sampling, each monitoring well was gauged for static water level and then purged of three well volumes or until dry. Once the groundwater within each monitoring well recharged to at least 90 percent of its static water level, groundwater samples were collected. Summaries of the groundwater elevation data and groundwater chemistry data measured during the November 24, 2010 groundwater sampling event (including complete historical data) have been provided in **Tables 1 and 2**, respectively.

<b>Dates Wells Gauged -</b>	10/12/10 and 11/24/10
<b>Number of Wells Gauged -</b>	10/12/10 – ten (10) 11/24/10 – nine (9)
<b>Gauged Well Identifications -</b>	10/12/10 – MW-1 through MW-10 11/24/10 – MW-1 through MW-9
<b>Dates Wells Sampled -</b>	11/24/10
<b>Number of Wells Sampled -</b>	Nine (9)
<b>Sampled Well Identifications -</b>	MW-1 through MW-9
<b>Wells Not Sampled and Reason -</b>	MW-10 – Well head requires repair
<b>Liquid Phase Hydrocarbons (LPH) Detected and LPH Thickness -</b>	None
<b>Generalized Groundwater Flow Direction -</b>	Southwest
<b>Wells Not Used in Contouring and Reason -</b>	10/12/10 – MW-1, MW-3 and MW-6 Groundwater elevations anomalous to historical levels
<b>Laboratory Analytical Parameters and Methods -</b>	BTEX, MTBE and Ethanol (MW-2 and MW-8) via United States Environmental Protection Agency (USEPA) Method 8260
<b>New York-Certified Laboratory -</b>	Accutest Laboratories; Dayton, New Jersey

## LABORATORY ANALYTICAL RESULTS

Laboratory analytical results associated with the November 24, 2010 groundwater sampling event indicate that target compounds of concern (COCs) exceeded NYSDEC groundwater standards at the following monitoring well locations:

MW-1	benzene (84.8 ppb), ethylbenzene (7.4 ppb) and total xylenes (12.8 ppb)
MW-2	benzene (3.4 ppb)
MW-3	benzene (283 ppb), toluene (80.7 ppb), ethylbenzene (1,320 ppb), total xylenes (1,670 ppb) and MTBE (13.7 ppb)
MW-4	none
MW-5	benzene (503 ppb), toluene (49.5 ppb), ethylbenzene (1,770 ppb) and total xylenes (2,610 ppb)
MW-6	benzene (103 ppb), toluene (7.6 ppb), ethylbenzene (241 ppb), total xylenes (38.6 ppb), and MTBE (14.8 ppb)
MW-7	benzene (656 ppb), toluene (29.4 ppb), ethylbenzene (683 ppb), total xylenes (1,600 ppb) and MTBE (49.5)
MW-8	toluene (6.6 ppb) and total xylenes (22.6 ppb)
MW-9	total xylenes (7.8 ppb)

Historical groundwater analytical results are summarized in **Table 2**. Groundwater elevation maps for the October 12, 2010 and November 24, 2010 groundwater gauging events are included as **Figures 1 and 2**, respectively. BTEX and MTBE plume maps associated with the November 24, 2010 groundwater sampling event are included as **Figures 3 and 4**, respectively. In addition, a copy of the original laboratory analytical data package associated with the November 24, 2010 groundwater sampling event has been included in **Appendix A**.

## SITE PROGRESS UPDATE

Tyree will conduct a review of site conditions observed during the September 15, 2010 subsurface investigation as well as previous investigations and formulate a new Remedial Investigation Work Plan for the site during the first quarter 2011 monitoring period.

**REPORTING PERIOD – APRIL 2012 THROUGH JUNE 2012**

### INTRODUCTION

This Quarterly Monitoring Report (QMR) has been prepared by Tyree Environmental Corp. (Tyree), on behalf of Getty Properties Corp. (Getty), to summarize the groundwater sampling and gauging conducted at the subject site (Service Station) in accordance with the requirements set forth by the New York State Department of Environmental Conservation (NYSDEC) regarding spill number 97-07190. A map depicting the current site layout including all relevant site features is included in **Figure 1**.

### SITE DESCRIPTION

The subject property, located at 239 10<sup>th</sup> Avenue, New York, New York, is currently utilized as a LukOil gas station that provides commercial gasoline retail and automotive service. The subject site currently consists of a 1-story masonry building with convenience store, office and restroom. The site is presently improved with two (2) 10,000-gallon gasoline underground storage tanks (USTs), fueling canopy, two (2) fueling pump islands and a total of four (4) product dispensers.

The subject property is bordered by 10<sup>th</sup> Avenue followed by multi-level residential apartments with ground-floor commercial fronts to the east and West 24<sup>th</sup> Street followed by a 1-story car wash to the south. The Bryce Wolkowitz Art Gallery and multi-level residential center surrounds the remainder of the property to the north and to the west.

There are currently three (3) on-site monitoring wells [MW-1 through MW-3] and nine (9) off-site monitoring wells [MW-4 through MW-12] utilized in the ongoing groundwater monitoring program. Historical summaries of the groundwater elevation data and groundwater chemistry data have been provided in **Tables 1 and 2**, respectively.

### **SITE GEOLOGY / HYDROGEOLOGY**

The Bedrock Geologic Map of New York (Lower Hudson Sheet) identifies the lithology in the area of the site as metamorphic rocks of sedimentary and volcanic origin, specifically Fordham gneiss. The subsurface is characterized by bedrock that is exposed generally within one meter of the surface (Cadwell et al. 1989). The overburden soil is characterized as till deposited beneath glacier ice consisting of variable texture (boulders to silt), usually poorly sorted sand-rich diamict, with varying degrees of permeability and compaction measuring between 1-50 meters in thickness (Sirkin et al. 1988).

The surficial geology at the subject site has been investigated up to a maximum depth of 25 feet below grade (fbg). The depth of the bedrock surface beneath the subject site has not yet been determined. The geologic conditions encountered during previous subsurface investigations consisted mainly of fine to medium grained sands mixed with gravels, boulders, construction debris and interbedded layers of silt.

The site topography is generally flat and the surface elevation is situated at approximately 43 feet above mean sea level (msl). Groundwater occurs within the unconsolidated soils at depths ranging from approximately 7 to 10 fbg and currently flows to the southwest. Based on historical gauging data, there appears to be an appreciable degree of seasonal variation in the direction of groundwater flow at the site, periodically fluctuating between south, southwest and west.

### **SITE HISTORY**

On September 17, 1997 Tyree conducted a repair of the remote fill located along the southern edge of the subject property. During the repair activities petroleum impacted soil was encountered and spill number 97-07190 was issued by the NYSDEC Region II. Approximately one (1) cubic yard of impacted soil was removed from around the fill portal. In 1998 Tyree removed three (3) 4000-gallon underground storage tanks (USTs), twelve (12) 550-gallon gasoline USTs, one (1) 275-gallon fuel oil UST, two (2) fueling pump islands and the remote fill from the subject site as per the EPA mandate for tank upgrades. During the removal activities petroleum impacted soil was encountered around the USTs and spill number 98-10383 was issued by the NYSDEC Region II. A total of 1,852.91 tons of impacted soil was removed up to a depth of twenty (20) fbg from the former UST locations and disposed of at Posillico Bros. of Farmingdale, New York.

Following the removal of impacted soils, nine (9) endpoint samples were collected around the gasoline USTs at a depth of five (5) to ten (10) fbg. Laboratory analytical results identified concentrations of volatile organic compounds (VOCs) including methyl tert-butyl ether (MTBE) exceeding NYSDEC guidance values from samples collected from bottom and from the south and east walls of the tank field. One (1) endpoint sample was collected from bottom of the fuel

oil UST at a depth of twenty (20) fbg. Laboratory analytical results identified concentrations of VOCs including MTBE as well as semi-volatile organic compounds (SVOCs) exceeding NYSDEC guidance values from the bottom sample. Spill number 98-10383 was subsequently closed by the NYSDEC on October 18, 2005.

In June 2000 Tyree began collecting groundwater samples from one existing monitoring well [MW-3] on-site previously installed by outside contractors and located in the northeast corner of the subject property. Baseline groundwater analytical results identified elevated concentrations of VOCs including MTBE exceeding NYSDEC Groundwater Quality Standards (GWQS).

In April 2001 Tyree installed monitoring wells MW-1 and MW-2 along the southern edge of the property to delineate the hydrocarbon impacts on-site. These wells were constructed of 2-inch diameter PVC and set to a maximum depth of approximately 25 fbg with 23 feet of 0.020 slot well screen and appropriate riser casing. Detailed subsurface lithology at each boring location was recorded in field boring logs however no representative soil samples were collected for analysis during the subsurface investigation of 2001. Baseline groundwater analytical results for wells MW-1 and MW-2 identified detectable levels of VOCs including MTBE exceeding NYSDEC GWQS.

In April 2005 monitoring wells MW-4 through MW-7 were installed in the sidewalk bordering the subject property along 10<sup>th</sup> Avenue and West 24<sup>th</sup> Street to delineate soil and groundwater impacts off-site. These wells were constructed of 2-inch diameter PVC and set to a maximum depth of approximately 20 fbg with 15 feet of 0.020 slot well screen and appropriate riser casing. Laboratory analytical results for soil samples collected from MW-5 through MW-7 identified VOCs exceeding NYSDEC standards. Baseline groundwater analytical results for wells MW-4, MW-6 and MW-7 indicated detectable levels of VOCs including MTBE exceeding NYSDEC GWQS.

In May 2006 monitoring wells MW-8 through MW-10 were installed in the sidewalk across 10<sup>th</sup> Avenue and West 24<sup>th</sup> Street to further characterize hydrogeologic conditions and to delineate soil and groundwater impacts off-site. These wells were constructed of 2-inch diameter PVC and set to a maximum depth of approximately 20 fbg with 15 feet of 0.020 slot well screen and appropriate riser casing. Laboratory analytical results from soil samples collected during the subsurface investigation did not identify any VOCs or SVOCs exceeding NYSDEC standards. Baseline groundwater analytical results did not identify petroleum impacts to groundwater above NYSDEC standards at any of the off-site locations for MW-8 through MW-10.

On September 15, 2010 Tyree conducted a subsurface investigation at the subject site in order to further delineate groundwater impacts north and west of existing monitoring well MW-7 in accordance with the meeting held between the NYSDEC, Tyree, and Antea Group on February 24, 2010. Tyree advanced six (6) borings [RF-1 through RF-6] on and off-site in an attempt to install two (2) new groundwater monitoring wells. All boring attempts resulted in refusal at a maximum depth of 5 fbg due to various subsurface conditions (impenetrable rock, existing municipal utilities and collapsing pea gravel in close proximity to the USTs and the associated vent lines).

## WELL GAUGING / SAMPLING INFORMATION

Prior to sampling, each monitoring well was gauged for static water level and then purged of three well volumes or until dry. Once the groundwater within each monitoring well recharged to at least 90 percent of its static water level, groundwater samples were collected. Summaries of the groundwater elevation data and groundwater chemistry data measured during the May 8, 2012 groundwater sampling event (including complete historical data) have been provided in **Tables 1 and 2**, respectively.

**Dates Wells Gauged:** 5/8/12

**Number of Wells Gauged:** 5/8/12 - Eleven (11)

**Gauged Well Identifications:** 5/8/12 - MW-1, MW-2, MW-4 through MW-12

**Wells Not Gauged and Reason:** MW-3 – Under vehicle

**Dates Wells Sampled:** 5/8/12

**Number of Wells Sampled:** 5/8/12 – Eleven (11)

**Sampled Well Identifications:** 5/8/12 - MW-1, MW-2, MW-4 through MW-12

**Wells Not Sampled and Reason:** MW-3 – Under vehicle

**Liquid Phase Hydrocarbons (LPH) Detected and LPH Thickness:** None

**Generalized Groundwater Flow Direction:** Southwest

**Wells Not Used in Contouring and Reason:** MW-9 – groundwater elevation anomalous

**Laboratory Analytical Parameters and Methods:** BTEX, MTBE via United States Environmental Protection Agency (USEPA) Method 8260

**New York-Certified Laboratory:** Accutest Laboratories; Dayton, New Jersey

## LABORATORY ANALYTICAL RESULTS

Laboratory analytical results associated with the May 8, 2012 groundwater sampling events indicate that target compounds of concern (COCs) exceeded NYSDEC groundwater standards at the following monitoring well locations:

**MW-1** benzene (16.8 parts per billion [ppb]) and ethylbenzene (8.8 ppb)

Former Getty Service Station #00341  
New York, New York

<b>MW-2</b>	benzene (3.0 ppb) and MTBE (60.2 ppb)
<b>MW-4</b>	none
<b>MW-5</b>	benzene (285 ppb), toluene (31.4 ppb), ethylbenzene (1,450 ppb) and total xylenes (1,760 ppb)
<b>MW-6</b>	benzene (84.2 ppb), ethylbenzene (94.3 ppb) and total xylenes (19.4 ppb)
<b>MW-7</b>	benzene (662 ppb), toluene (23.2 ppb), ethylbenzene (1,250 ppb), total xylenes (1,540 ppb) and MTBE (84.9 ppb)
<b>MW-8</b>	none
<b>MW-9</b>	none
<b>MW-10</b>	none
<b>MW-11</b>	none
<b>MW-12</b>	none

Historical groundwater elevation results are summarized in **Table 1** and plotted over time in **Graph 1** (Hydrograph). A groundwater elevation map for the May 8, 2012 groundwater gauging event is included as **Figure 1**. Historical groundwater analytical results are summarized in **Table 2** and plotted in **Graph 2** (Total BTEX vs. Time) and **Graph 3** (MTBE vs. Time). Total BTEX and MTBE plume maps associated with the May 8, 2012 groundwater sampling events are included as **Figures 2 and 3**, respectively. In addition, a copy of the original laboratory analytical data packages associated with the May 8, 2012 groundwater sampling events have been included in **Appendix A**.

### **SITE PROGRESS UPDATE**

On March 5, 2012 Tyree installed two (2) groundwater monitoring wells [MW-11 and MW-12] at the subject site (**Figure 1**) in order to further delineate groundwater impacts downgradient of existing MW-7. The wells were constructed of 2-inch diameter PVC and set to a maximum depth of approximately 25 fbg with 20 feet of 0.020 slot well screen and appropriate riser casing. Representative soil samples were collected from each bore hole at the observed groundwater interface and at the end of boring depth. The March 2012 subsurface investigation did not identify any concentrations of VOCs exceeding NYCDEC Unrestricted Use Soil Cleanup Objectives (USCOs) in these samples. Grab groundwater samples were obtained from both wells on March 22, 2012 following well development activities. Baseline groundwater analytical results indicated only minimal concentrations of VOCs exceeding NYSDEC GWQS at both well locations. Tyree submitted a Subsurface Investigation Report (SIR) in conjunction with the first quarter 2012 monitoring report documenting the results of the March 2012 site investigation. On April 17, 2012, casing elevations for wells MW-11 and MW-12 were surveyed.

On March 9, 2012 Tyree completed the necessary road-box replacement for well MW-10 and regained access to this groundwater monitoring location. Of note, the well casing for well MW-10 was not previously damaged or disturbed).

### REPORTING PERIOD – JULY 2012 THROUGH SEPTEMBER 2012

### INTRODUCTION

This Quarterly Monitoring Report (QMR) has been prepared by Tyree Environmental Corp. (Tyree), on behalf of Getty Properties Corp. (Getty), to summarize the groundwater sampling and gauging conducted at the subject site (Service Station) in accordance with the requirements set forth by the New York State Department of Environmental Conservation (NYSDEC) regarding spill number 97-07190. A map depicting the current site layout including all relevant site features is included in **Figure 1**.

### SITE DESCRIPTION

The subject property, located at 239 10<sup>th</sup> Avenue, New York, New York, is currently utilized as a LukOil gas station that provides commercial gasoline retail and automotive service. The subject site currently consists of a 1-story masonry building with convenience store, office and restroom. The site is presently improved with two (2) 10,000-gallon gasoline underground storage tanks (USTs), fueling canopy, two (2) fueling pump islands and a total of four (4) product dispensers.

The subject property is bordered by 10<sup>th</sup> Avenue followed by multi-level residential apartments with ground-floor commercial fronts to the east and West 24<sup>th</sup> Street followed by a 1-story car wash to the south. The Bryce Wolkowitz Art Gallery and multi-level residential center surrounds the remainder of the property to the north and to the west.

There are currently three (3) on-site monitoring wells [MW-1 through MW-3] and nine (9) off-site monitoring wells [MW-4 through MW-12] utilized in the ongoing groundwater monitoring program. Historical summaries of the groundwater elevation data and groundwater chemistry data have been provided in **Tables 1 and 2**, respectively.

## **SITE GEOLOGY / HYDROGEOLOGY**

The Bedrock Geologic Map of New York (Lower Hudson Sheet) identifies the lithology in the area of the site as metamorphic rocks of sedimentary and volcanic origin, specifically Fordham gneiss. The subsurface is characterized by bedrock that is exposed generally within one meter of the surface (Cadwell et al. 1989). The overburden soil is characterized as till deposited beneath glacier ice consisting of variable texture (boulders to silt), usually poorly sorted sand-rich diamict, with varying degrees of permeability and compaction measuring between 1-50 meters in thickness (Sirkin et al. 1988).

The surficial geology at the subject site has been investigated up to a maximum depth of 25 feet below grade (fbg). The depth of the bedrock surface beneath the subject site has not yet been determined. The geologic conditions encountered during previous subsurface investigations consisted mainly of fine to medium grained sands mixed with gravels, boulders, construction debris and interbedded layers of silt.

The site topography is generally flat and the surface elevation is situated at approximately 43 feet above mean sea level (msl). Groundwater occurs within the unconsolidated soils at depths ranging from approximately 7 to 10 fbg and currently flows to the southwest. Based on historical gauging data, there appears to be an appreciable degree of seasonal variation in the direction of groundwater flow at the site, periodically fluctuating between south, southwest and west.

## **SITE HISTORY**

On September 17, 1997 Tyree conducted a repair of the remote fill located along the southern edge of the subject property. During the repair activities petroleum impacted soil was encountered and spill number 97-07190 was issued by the NYSDEC Region II. Approximately one (1) cubic yard of impacted soil was removed from around the fill portal. In 1998 Tyree removed three (3) 4000-gallon underground storage tanks (USTs), twelve (12) 550-gallon gasoline USTs, one (1) 275-gallon fuel oil UST, two (2) fueling pump islands and the remote fill from the subject site as per the EPA mandate for tank upgrades. During the removal activities petroleum impacted soil was encountered around the USTs and spill number 98-10383 was issued by the NYSDEC Region II. A total of 1,852.91 tons of impacted soil was removed up to a depth of twenty (20) fbg from the former UST locations and disposed of at Posillico Bros. of Farmingdale, New York.

Following the removal of impacted soils, nine (9) endpoint samples were collected around the gasoline USTs at a depth of five (5) to ten (10) fbg. Laboratory analytical results identified concentrations of volatile organic compounds (VOCs) including methyl tert-butyl ether (MTBE) exceeding NYSDEC guidance values from samples collected from bottom and from the south and east walls of the tank field (**Table 3**). One (1) endpoint sample was collected from bottom

of the fuel oil UST at a depth of twenty (20) fbg (**Table 4**). One (1) grab groundwater sample was collected from a depth of eleven (11) fbg during the UST removal. Laboratory analytical results identified concentrations of VOCs as well as semi-volatile organic compounds (SVOCs) exceeding NYSDEC Groundwater Quality Standards (GWQS) from the grab groundwater sample (**Table 5**). Spill number 98-10383 was subsequently closed by the NYSDEC on October 18, 2005.

In June 2000 Tyree began collecting groundwater samples from one existing monitoring well [MW-3] on-site previously installed by outside contractors and located in the northeast corner of the subject property. Baseline groundwater analytical results identified elevated concentrations of VOCs including MTBE exceeding NYSDEC GWQS.

In April 2001 Tyree installed monitoring wells MW-1 and MW-2 along the southern edge of the property to delineate the hydrocarbon impacts on-site. These wells were constructed of 2-inch diameter PVC and set to a maximum depth of approximately 25 fbg with 23 feet of 0.020-slot well screen and appropriate riser casing. Detailed subsurface lithology at each boring location was recorded in field boring logs however no representative soil samples were collected for analysis during the subsurface investigation of 2001. Baseline groundwater analytical results for wells MW-1 and MW-2 identified detectable levels of VOCs including MTBE exceeding NYSDEC GWQS.

In April 2005 monitoring wells MW-4 through MW-7 were installed in the sidewalk bordering the subject property along 10<sup>th</sup> Avenue and West 24<sup>th</sup> Street to delineate soil and groundwater impacts off-site. These wells were constructed of 2-inch diameter PVC and set to a maximum depth of approximately 20 fbg with 15 feet of 0.020-slot well screen and appropriate riser casing. Laboratory analytical results for soil samples collected from MW-5 through MW-7 identified VOCs exceeding NYSDEC standards. Baseline groundwater analytical results for wells MW-4, MW-6 and MW-7 indicated detectable levels of VOCs including MTBE exceeding NYSDEC GWQS (**Table 6**).

In May 2006 monitoring wells MW-8 through MW-10 were installed in the sidewalk across 10<sup>th</sup> Avenue and West 24<sup>th</sup> Street to further characterize hydrogeologic conditions and to delineate soil and groundwater impacts off-site. These wells were constructed of 2-inch diameter PVC and set to a maximum depth of approximately 20 fbg with 15 feet of 0.020-slot well screen and appropriate riser casing. Laboratory analytical results did not identify VOC concentrations above NYSDEC Recommended Soil Cleanup Objectives (RSCOs) in any of the samples collected during the subsurface investigation (**Table 7**). Laboratory analytical results did not identify SVOC concentrations above NYSDEC RSCOs in any of the samples collected during the subsurface investigation (**Table 8**).

On September 15, 2010 Tyree conducted a subsurface investigation at the subject site in order to further delineate groundwater impacts north and west of existing monitoring well MW-7 in accordance with the meeting held between the NYSDEC, Tyree, and Antea Group on February 24, 2010. Tyree advanced six (6) borings [RF-1 through RF-6] on and off-site in an attempt to install two (2) new groundwater monitoring wells. All boring attempts resulted in refusal at a maximum depth of 5 fbg due to various subsurface conditions (impenetrable rock, existing municipal utilities and collapsing pea gravel in close proximity to the USTs and the associated vent lines).

On March 5, 2012 two (2) groundwater monitoring wells [MW11 and MW-12] were installed downgradient of existing monitoring well MW-7 in an effort to document the presence or absence of residual soil and groundwater impacts. These wells were constructed of 2-inch diameter PVC and set to a maximum depth of 25 fbg with approximately 20 feet of 0.020-slot well screen and appropriate riser casing. Laboratory analytical results indicated that there were no VOCs detected above the Unrestricted Use Soil Cleanup Objectives (USCOs) in any of the representative soil samples collected during the March 2012 investigation (**Table 9**). Subsequent to the investigation, groundwater samples were obtained from monitoring wells MW-11 and MW-12 on March 22, 2012. Laboratory analytical results indicated only minimal concentrations of ethylbenzene, 1,2,4-trimethylbenzene and total xylenes exceeding NYSDEC GWQS at both well locations (**Table 10**).

**WELL GAUGING / SAMPLING INFORMATION**

Prior to sampling, each monitoring well was gauged for static water level and then purged of three well volumes or until dry. Once the groundwater within each monitoring well recharged to at least 90 percent of its static water level, groundwater samples were collected. Summaries of the groundwater elevation data and groundwater chemistry data measured during the August 1, 2012 groundwater sampling event (including complete historical data) have been provided in **Tables 1 and 2**, respectively.

**Dates Wells Gauged:** 8/1/2012

**Number of Wells Gauged:** 8/1/2012 - Eleven (11)

**Gauged Well Identifications:** 8/1/2012 - MW-1 through MW-10 and MW-12

**Wells Not Gauged and Reason:** MW-11 – Inaccessible due to sidewalk construction

**Dates Wells Sampled:** 8/1/2012

**Number of Wells Sampled:** 8/1/2012 – Eleven (11)

**Sampled Well Identifications:** 8/1/2012 - MW-1 through MW-10 and MW-12

**Wells Not Sampled and Reason:** MW-11 – Inaccessible due to sidewalk construction

**Liquid Phase Hydrocarbons (LPH) Detected and LPH Thickness:** None

**Generalized Groundwater Flow Direction:** Southeast

**Wells Not Used in Contouring and Reason:** MW-10 – groundwater elevation anomalous

**Laboratory Analytical Parameters**

Former Getty Service Station #00341  
New York, New York

**and Methods:**

BTEX, MTBE via United States Environmental Protection Agency (USEPA) Method 8260

**New York-Certified Laboratory:**

Accutest Laboratories; Dayton, New Jersey

**LABORATORY ANALYTICAL RESULTS**

Laboratory analytical results associated with the August 1, 2012 groundwater sampling events indicate that target compounds of concern (COCs) exceeded NYSDEC groundwater standards at the following monitoring well locations:

<b>MW-1</b>	benzene (32.0 parts per billion [ppb]), ethylbenzene (10.5 ppb) and total xylenes (8.5 ppb)
<b>MW-2</b>	benzene (1.2 ppb) and MTBE (18.3 ppb)
<b>MW-3</b>	benzene (20.0 ppb), ethylbenzene (139 ppb) and total xylenes (80.5 ppb)
<b>MW-4</b>	none
<b>MW-5</b>	benzene (161 ppb), toluene (24.8 ppb), ethylbenzene (1,830 ppb) and total xylenes (1,730 ppb)
<b>MW-6</b>	benzene (92.2 ppb), ethylbenzene (147 ppb) and total xylenes (49.2 ppb)
<b>MW-7</b>	benzene (889 ppb), toluene (71.9 ppb), ethylbenzene (2,190 ppb), total xylenes (4,670 ppb) and MTBE (88.3 ppb)
<b>MW-8</b>	none
<b>MW-9</b>	none
<b>MW-10</b>	none
<b>MW-12</b>	none

Historical groundwater elevation results are summarized in **Table 1** and plotted over time in **Graph 1** (Hydrograph). A groundwater elevation map for the August 1, 2012 groundwater gauging event is included as **Figure 1**. Historical groundwater analytical results are summarized in **Table 2** and plotted in **Graph 2** (Total BTEX vs. Time) and **Graph 3** (MTBE vs. Time). Total BTEX and MTBE plume maps associated with the August 1, 2012 groundwater sampling events are included as **Figures 2 and 3**, respectively. In addition, a copy of the original laboratory analytical data packages associated with the August 1, 2012 groundwater sampling events have been included in **Appendix A**.

**SITE PROGRESS UPDATE**

On March 5, 2012 Tyree installed two (2) groundwater monitoring wells [MW-11 and MW-12] at the subject site (**Figure 1**) in order to further delineate groundwater impacts downgradient of existing MW-7. The wells were constructed of 2-inch diameter PVC and set to a maximum depth of approximately 25 fbg with 20 feet of 0.020 slot well screen and appropriate riser casing. Representative soil samples were collected from each bore hole at the observed groundwater interface and at the end of boring depth. The March 2012 subsurface investigation did not identify any concentrations of VOCs exceeding NYCDEC Unrestricted Use Soil Cleanup Objectives (USCOs) in these samples. Grab groundwater samples were obtained from both wells on March 22, 2012 following well development activities. Baseline groundwater analytical results indicated only minimal concentrations of VOCs exceeding NYSDEC GWQS at both well

locations. Tyree submitted a Subsurface Investigation Report (SIR) in conjunction with the first quarter 2012 monitoring report documenting the results of the March 2012 site investigation. On April 17, 2012, casing elevations for wells MW-11 and MW-12 were surveyed.

On March 9, 2012 Tyree completed the necessary road-box replacement for well MW-10 and regained access to this groundwater monitoring location. Of note, the well casing for well MW-10 was not previously damaged or disturbed).

Based on current concentrations it is anticipated that the current groundwater trends will continue to attenuate naturally until contaminant concentrations reach asymptotic levels. As such, Tyree, on behalf of Getty, respectfully requests closure of NYSDEC spill number 97-07190 and a status of No Further Action be granted.

Hereafter, Tyree has suspended the groundwater monitoring program associated with the subject site as well as quarterly reporting referencing NYSDEC spill number 97-07190 while awaiting approval of the Petition for Spill Closure.

### **SUMMARY OF UPCOMING EVENTS**

## **1.0 INTRODUCTION**

This Site-specific Health and Safety Plan (HASP) has been prepared in accordance with 29 CFR 1910.120 Occupational Safety and Health Administration (OSHA) Hazardous Waste Operations and Emergency Response (HAZWOPER) and Roux Associates, Inc. (Roux Associates) Standard Operating Procedures (SOPs) and other OSHA requirements for job safety and health protection (Appendix A). It addresses all activities described below that are associated with the property located at 239 10<sup>th</sup> Avenue, New York, New York, (Site). The location of the Site is presented in Figure 1. The HASP will be implemented by the designated Site Health and Safety Officer (SSO) during work at the Site. The HASP attempts to identify all potential hazards at the Site; however, Site conditions are dynamic and new hazards may appear constantly. Personnel must remain alert to existing and potential hazards as Site conditions change and protect themselves accordingly.

Compliance with this HASP is required of all persons and subcontractors who perform fieldwork or enter the Site. The contents of this HASP may change or undergo revision based upon additional information made available to health and safety personnel, monitoring results, or changes in the technical scope of work. Any changes proposed must be reviewed and approved by the Office Health and Safety Manager (OHSM), with the SSO implementing the changes to the HASP.

Prior to performing work each task should be evaluated to determine the appropriate procedures that need to be followed.

### **1.1 Scope of Work**

In general, the tasks will include the following:

- Implementation of Remedial Investigation (RI) activities consisting of monitoring well installation, groundwater sampling, soil vapor sampling, and soil borings/sampling.

Any change in scope will require a revision of this HASP to address any new hazards.

**2.0 EMERGENCY INFORMATION AND NOTIFICATION**

Multiple emergency services may be obtained by calling 911. More specific numbers for local services are listed below.

Emergency Medical Service .....	911
<u>Police</u> : New York City Police Department .....	911
Fire .....	911
<u>Hospital</u> : New York Doctors Urgent Care .....	866-835-3794
National Response Center .....	800-424-8802
Poison Control Center .....	800-222-1222
CHEMTREC .....	800-262-8200
<u>Fire</u> : NYC Fire Department .....	911
Center for Disease Control .....	800-311-3435
USEPA (Region II) .....	212-637-5000
NYSDEC Emergency Spill Response .....	800-457-7362
First Care & Occupational Health Clinic .....	631-435-0110
(For non-emergency medical services)	

Directions and maps to the Hospital (Urgent Care) and the Clinic are provided in Figures 2 and 3, respectively.

**2.1 Notification**

As soon as first aid and/or emergency response needs have been met, the following parties are to be contacted by telephone: (Direct contact, no phone messages).

		<u>Office:</u>	<u>Cell:</u>
1. Project Principal:	Craig Werle	(631) 232-2600	(631) 793-1535
2. Project Manager/SHSO:	Wendy Shen	(631) 232-2600	(631) 484-1333
3. Field Manager:	Jeff Wills	(631) 232-2600	(631) 484-3182
4. Office Health and Safety Manager:	Ray Fitzpatrick	(631) 232-2600	(631) 484-1168
5. Corporate Health and Safety Manager:	Joseph Gentile	(856) 423-8800	(610) 844-6911
4. Office Manager:	Brian Morrissey	(631) 232-2600	(631) 921-6355

Accident reporting guidelines are outlined in section 13.5 of this HASP.

### **3.0 HEALTH AND SAFETY PERSONNEL**

This section briefly describes all Site personnel and their health and safety responsibilities for the RI work to be implemented at the Site. All personnel are responsible for ensuring compliance with the HASP.

#### **Project Principal (PP) – Craig Werle – Roux Associates**

- Has the overall responsibility for the health and safety of Site personnel.
- Ensures that adequate resources are provided to the field health and safety staff to carry out their responsibilities as outlined below.

#### **Office Health and Safety Manager (OHSM) – Ray Fitzpatrick – Roux Associates**

- Implements the HASP.
- Performs or oversees site-specific training and approves revised or new safety protocols or field operations.
- Coordinates revisions of this HASP with Project Principal.
- Responsible for the development of new task safety protocols and procedures and resolution of any outstanding safety issues which may arise during the performance of site work.
- Review and approve all health and safety training and medical surveillance records for personnel and subcontractors.

#### **Site Safety and Health Officer (SSO) – Wendy Shen – Roux Associates**

- Directs and coordinates health and safety monitoring activities.
- Ensures that field teams utilize proper personal protective equipment.
- Conducts initial onsite specific training prior to personnel and/or subcontractors commencing work.
- Conducts and documents daily pre-job safety briefings.
- Ensures that field team members comply with this HASP.
- Completes and maintains all accident investigation and reporting forms.
- Notifies PP, PM and OHSM of all accidents/incidents.

- Notifies PP of daily field operations and work progress, who will then communicate at the end of the day to the designated representative the following:
  1. End of day tasks completed
  2. Next day's planned activities
  3. Third party issues
  4. Change of Plans – approvals
- Determines upgrade or downgrade of personal protective equipment (PPE) based on Site conditions and/or real time monitoring results.
- Ensures that monitoring instruments are calibrated daily or as manufacturers suggested instructions determine.
- Submits and maintains health and safety field log books, daily safety logs, training logs, air monitoring result reports, weekly safety report.

#### **Field Personnel and Subcontractors**

- Report any unsafe or potentially hazardous conditions to the SSO.
- Maintain knowledge of the information, instructions, and emergency response actions contained in the HASP.
- Comply with rules, regulations, and procedures as set forth in this HASP and any revisions, which are instituted.
- Prevent admittance to work Site by unauthorized personnel.

In the case that there is a change in any of the above personnel, all onsite personnel will be notified of the change. The new responsible party shall review and sign that they have been given a documented verbal full HASP review by Roux Associates and are aware of their responsibilities as outlined in this HASP.

#### **4.0 SITE LOCATION, DESCRIPTION, AND HISTORY**

Descriptions of the Site and surrounding property usage are included in the following sections.

The location of the Site is presented in Figure 1.

##### **4.1 Property Location and Description**

The Site is comprised Lot 32 on Block 696 in the Chelsea section of Manhattan, New York. The Site is located on the west side of 10<sup>th</sup> Avenue between the corners of West 24<sup>th</sup> Street and West 25<sup>th</sup> Street.

- The Site contains a former Getty gasoline station with two (2) active 10,000-gallon gasoline Underground Storage Tanks (USTs) present. According to the regulatory database report, there are several New York State Department of Environmental Conservation (NYSDEC) Spill Numbers assigned to the Site. Spill No. 9707190 has not been closed.
- Three 4,000-gallon gasoline USTs, twelve 550-gallon USTs, one 275-gallon fuel oil UST and two fuel pump island were removed from the Site in 1998.
- Groundwater impacted with volatile organic compounds (VOCs) is present in the subsurface at the Site

## **5.0 WASTE DESCRIPTION/CHARACTERIZATION**

### **5.1 General**

The following information is presented in order to identify the types of materials that may be encountered at the Site. The detailed information on these materials was obtained from:

- Sax's Dangerous Properties of Industrial Materials – Lewis Eight Edition
- Chemical Hazards of the Workplace – Proctor/Hughes
- Condensed Chemical Dictionary – Hawley
- Rapid Guide to Hazardous Chemical in the Workplace – Lewis 1990
- NIOSH Pocket Guide to Chemical Hazards – 2005
- ACGIH TLV Values and Biological Exposure Indices
- OSHA 29 CFR 1910.1000

### **5.2 Chemical Data Sheets**

Several chemicals that may potentially be present in soils and groundwater at the Site, based on previous soil, soil vapor and groundwater sampling results and historic operations conducted at the Site that have been identified. The Summary of Toxicological Data is found in Table 1 and is provided for review of chemicals that may be encountered. The Summary of Toxicological Data Sheets provides information such as the chemicals characteristics, health hazards, protection, and exposure limits. Material Safety Data Sheets (MSDSs) for products that have been identified at the Site are available for review by project personnel (Appendix B).

#### **5.2.1 Contaminants of Concern**

Soil and groundwater contaminants that may be encountered during drilling and sampling activities include both organic and inorganic compounds. Prior investigations at the Site have indicated detection of VOCs and Polycyclic Aromatic Hydrocarbons (PAHs) in soil and groundwater. The toxicological, physical, and chemical properties of potential contaminants are presented in Table 1, and identified contaminants are presented in Appendix B.

## **6.0 HAZARD ASSESSMENT**

The potential to encounter chemical hazards is dependent upon the work activity performed (intrusive versus non-intrusive) and the duration and location of the work activity. Such hazards could include inhalation and/or skin contact with chemicals/gases that could cause: dermatitis, skin burns, being overcome by vapors or asphyxiation.

Physical hazards that may be encountered during Site work include heat and cold stress, being crushed, head injuries, punctures, cuts, falls, electrocution, bruises and other physical hazards due to motor vehicle operation, equipment use and power tools

Biological hazards may exist during Site activities. These hazards include exposure to insect bites/stings, animals and animal wastes, mold and blood borne pathogens.

Prior to the beginning of each new phase of work, a job safety analysis (JSA) (Appendix C) will be prepared by the SSO with assistance from the OHSM. The analysis will address the hazards for each activity performed in the phase and will present the procedures and safeguards necessary to eliminate the hazards or reduce the risk. JSAs for each task will be reviewed with onsite personnel at each morning tailgate meeting and as tasks change throughout the day.

### **6.1 Chemical Hazards**

The potential for personnel and subcontractors to come in contact with chemical hazards may occur during the following tasks:

- Installation and sampling of soil borings, and
- Installation, gauging, purging and sampling of monitoring wells.
- Installation and sampling of soil vapor points.

For chronic and acute toxicity data, refer to Summary of Toxicological Data Sheets (Table 1) and MSDSs (Appendix B) for further details on compound characteristics.

#### **6.1.1 Exposure Pathways**

Exposure to these compounds during ongoing activities may occur through inhalation of contaminated dust particles, inhalation of VOCs and SVOCs, dermal absorption, and accidental ingestion of the contaminant by either direct or indirect cross-contamination activities.

### **6.1.2 Operational Action Levels**

A decision-making protocol for an upgrade in levels of protection and/or withdrawal of personnel from an area based on exposure levels is outlined in Table 2.

### **6.1.3 Additional Precautions**

Dermal absorption or skin contact with chemical compounds is possible during intrusive activities and while gauging, purging or sampling a monitoring well at the Site. The use of PPE in accordance with Section 9.2 and strict adherence to proper decontamination procedures should significantly reduce the risk of skin contact.

The potential for accidental ingestion of potentially hazardous chemicals is expected to be remote, when good hygiene practices are used.

## **6.2 Physical Hazards**

A variety of physical hazards may be present during Site activities. These hazards are similar to those associated with any construction-type project and include equipment operation and hazardous walking and working surfaces. The referenced hazards are not unique and are generally familiar to most hazardous waste site workers at construction sites. Task-specific safety requirements for each phase will be covered during safety briefings.

### **6.2.1 Heat Stress**

Heat stress is a significant potential hazard, associated with the use of protective equipment in a hot weather environment. The human body is designed to function at a certain internal temperature. When metabolism or external sources (fire or hot summer day) cause the body temperature to rise, the body seeks to protect itself by triggering cooling mechanisms. The SSO will monitor the air temperature (as described later in this section) to determine potential adverse effects the weather can cause onsite personnel. Excess heat is dissipated by two means:

- Changes in blood flow to dissipate heat by convection, which can be seen as "flushing" or reddening of the skin in extreme cases.
- Perspiration, the release of water through skin and sweat glands. While working in hot environments, evaporation of perspiration is the primary cooling mechanism.

Protective clothing worn to guard against chemical contact effectively stops the evaporation of perspiration. Thus the use of protective clothing increases heat stress problems.

The major disorders due to heat stress are heat cramps, heat exhaustion, and heat stroke. Heat cramps are painful spasms, which occur in the skeletal muscles of workers who sweat profusely in the heat and drink large quantities of water, but fail to replace the bodies lost salts or electrolytes. Drinking water while continuing to lose salt tends to dilute the body's extracellular fluids. Soon water seeps by osmosis into active muscles and causes pain. Muscles fatigued from work are usually most susceptible to cramps.

Extreme weakness or fatigue, dizziness, nausea, and headache characterize heat exhaustion. In serious cases, a person may vomit or lose consciousness. The skin is clammy and moist, complexion pale or flushed, and body temperature normal or slightly higher than normal. Treatment is rest in a cool place and replacement of body water lost by perspiration. Mild cases may recover spontaneously with this treatment; severe cases may require care for several days. There are no permanent effects. As first aid treatment, the person shall be moved to a cool place. Body heat should be reduced artificially, but not too rapidly, by soaking the person's clothes in water and fanning them.

Heat stroke is considered a medical emergency and is caused by the breakdown of the body's regulating mechanisms. The skin is very dry and hot with red mottled or bluish appearance. Unconsciousness, mental confusion, or convulsions may occur. Without quick and adequate treatment, the result can be death or permanent brain damage.

Steps that can be taken to reduce heat stress are:

- Acclimate the body. Allow a period of adjustment to make further heat exposure endurable.
- Drink more liquids to replace the body water lost during sweating.
- Rest is necessary and should be conducted under the direction of the SSO.
- Wear personal cooling devices. These are two basic designs; units with pockets for holding frozen packets and units that circulate fluid from a reservoir through tubes to different parts of the body. Both designs can be in the form of a vest, jacket, or coverall. Some circulating units also have a cap for cooling the head.

Heat stress is a significant hazard associated with using protective equipment in hot weather environments. Local weather conditions may produce conditions, which will require restricted work schedules in order to protect employees.

Appendix D contains procedures for heat stress; these will be used as a guideline and to provide additional information.

### **6.2.2 Cold Stress**

Cold temperatures are a significant potential hazard. Examples of cold temperature hazards are frostbite and hypothermia.

Frostbite is the most common injury resulting from exposure to cold. The extremities of the body are most often affected. The signs of frostbite are:

- The skin turns white or grayish-yellow.
- Pain is sometimes felt early but subsides later. Often there is no pain.
- The affected parts feel intensely cold and numb.

Hypothermia is characterized by shivering, numbness, drowsiness, muscular weakness, and a low internal body temperature when the body feels extremely warm. This can lead to unconsciousness and death. With both frostbite and hypothermia, the affected areas need to be warmed quickly. Immersion in warm water is an effective means of warming the affected areas quickly. In such cases, medical assistance will be sought.

To prevent these effects from occurring, persons working in the cold shall wear adequate clothing and reduce the time spent in the cold area. The field SSO is responsible for determining appropriate time personnel shall spend in adverse weather conditions and will monitor this.

Appendix D, which contains the Heat and Cold Stress Guidelines, provides additional information.

### **6.3 Biological Hazards**

The biological hazards, which have the potential to cause adverse health effects, are from exposure to domestic flies, mosquitoes, insects, animals and animal wastes, mold and bloodborne pathogens.

### **6.3.1 Insect Stings**

Stings from insects are often painful, cause swelling and can be fatal if a severe allergic reaction such as anaphylactic shock occurs. If a sting occurs, the stinger should be scraped out of the skin, opposite of the sting direction. The area should be washed with soap and water followed by application of an ice pack.

If the victim has a history of allergic reaction, he shall be taken to the nearest medical facility. If the victim has medication to reverse the effects of the sting, it should be taken immediately.

If the victim experiences a severe reaction, a constricting band should be placed between the sting and the heart. The bitten area should be kept below the heart if possible. A physician shall be contacted immediately for further instructions.

### **6.3.2 Animals and Animal Wastes**

Due to the site currently being vacant, there lies the potential for various wildlife at the site, including, but not limited to, pigeons, bats, mice, rats, squirrels, raccoons, and feral cats. Certain animals can represent significant sources (vectors) of disease transmission. Precautions to avoid or minimize potential contact with (biting) animals (such as some of the above listed) or animal waste and/or deceased animals should be considered prior to all field activities. Rats, squirrels, raccoons, feral cats, and other wild animals can inflict painful bites which can also cause disease (as in the case of rabid animals). Site personnel should avoid contact with any of the above.

If contact occurs, be sure to clean the area thoroughly with soap and water as soon as possible. If a bite occurs, the area shall be cleaned thoroughly immediately with soap and water and medical attention shall be sought.

### **6.3.3 Bloodborne Pathogens**

The majority of the occupational tasks onsite will not involve a significant risk of exposure to blood, blood components, or body fluids. The highest risk of acquiring any bloodborne pathogen for onsite employees will be following an injury. When administering first aid care, there are potential hazards associated with bloodborne pathogens that cause diseases such as Human Immunodeficiency Virus (HIV), Hepatitis B (HBV), Hepatitis A (HAV), Hepatitis C (HCV), or the

Herpes Simplex Virus (HSV). An employee who has not received the appropriate certification should never execute first aid and/or CPR.

In order to minimize any potential pathogen exposure, all employees should use the hand washing facilities on a regular basis. Additionally, the following universal precautions shall be followed to prevent further potential risk:

- Direct skin or mucous membrane contact with blood shall be avoided.
- Open skin cuts or sores shall be covered to prevent contamination from infectious agents.
- Body parts shall be washed immediately after contact with blood or body fluids that might contain blood, even when gloves or other barriers have been used.
- Gloves and disposable materials used to clean spilled blood shall be properly disposed of in an approved hazardous waste container.
- First aid responders shall wear latex or thin mil nitrile gloves when performing any procedure risking contact with blood or body substances.
- Safety glasses with attached side shields will be worn to protect the eyes from splashing or aerosolization of body fluids.
- A CPR mask will be worn when performing CPR to avoid mouth-to-mouth contact.
- Appropriate work gloves will be worn to minimize the risk of injury to the hands and fingers when working on all equipment with sharp or rough edges.
- Never pick up broken glass or possible contaminated material with your unprotected hands.
- Never handle wildlife (living or deceased) encountered onsite.

## 6.4 Hazard Assessment

<b>Task</b>	<b>Hazards</b>	<b>Risk of Exposure</b>
Installation, gauging, purging and sampling of Monitoring Wells	Inhalation/Skin Contact	Moderate/High
	Heat Stress/Cold Stress	Moderate
	Physical Injury	Moderate
Installation and sampling of Soil Borings	Inhalation/Skin Contact	Moderate/High
	Heat Stress/Cold Stress	Moderate
	Physical Injury	Moderate
Installation and sampling of Soil Vapor Points	Inhalation	Moderate/High
	Heat Stress/Cold Stress	Moderate
	Physical Injury	Moderate

## **7.0 TRAINING**

### **7.1 General Health and Safety Training**

In accordance with Roux Associates' corporate policies, and pursuant to 29 CFR 1910.120, hazardous waste site workers shall, at the time of the job assignment, have received a minimum of 40 hours of initial health and safety training for hazardous waste site operations. As a minimum, the training shall have consisted of instruction in the topics outlined in the above reference. Personnel who have not met the requirements for initial training will not be allowed to work in any Site activities in which they may be exposed to hazards (chemical or physical).

Completion of a 40-hour Health and Safety Training Course for Hazardous Waste Operations or an approved equivalent will fulfill the requirements of this section.

Roux Associates' SSO has the responsibility of ensuring that personnel assigned to this project comply with these requirements.

### **7.2 Annual Eight-Hour Refresher Training**

Current, annual 8-hour refresher training will be required of all hazardous waste site field personnel in order to maintain their qualifications for fieldwork. The following topics will be reviewed; toxicology, respiratory protection, medical surveillance, decontamination procedures, and personal protective clothing. In addition, topics deemed necessary by Roux Associates' Health and Safety Director may be added to the above list.

### **7.3 Site-Specific Training**

Site personnel will receive documented training that will specifically address the activities, procedures, monitoring and equipment for Site operations. It will include Site and facility layout, hazards, first aid equipment locations and emergency services at the Site, and will highlight all provisions contained within this HASP. This training will also allow field workers to clarify anything they do not understand and to reinforce their responsibilities regarding safety and operations for their particular activity.

#### **7.4 Onsite Safety Meetings**

Daily-documented (Appendix E) pre-work safety meetings will be presented each morning to discuss the scope-of-work for that day, potential safety concerns and control measures for those identified safety hazards as per the JSAs (Appendix C) for the upcoming activities.

The briefings will also provide a forum to facilitate conformance with safety requirements and to identify performance deficiencies related to safety during daily activities or as a result of safety audits by Roux Associates or other involved parties.

#### **7.5 First Aid and CPR**

The SSO will identify those individuals having first aid and CPR training in order to ensure that emergency medical treatment is available during field activities. The training will be consistent with the requirements of the American Red Cross Association and, as applicable, the American Heart Association. Certification and appropriate training documentation will be kept with the Site personnel records.

#### **7.6 Additional Training / Procedures**

The OHSM may require additional or specialized training throughout the project. Such training shall be in the safe operation of heavy or power tool equipment or hazard communication training or other topic deemed Site appropriate.

## **8.0 MEDICAL SURVEILLANCE PROCEDURES**

### **8.1 General**

A Medical Surveillance Program has been established as part of this plan and is included in Appendix F. Roux Associates and subcontractor personnel performing field work at the Site are required to have passed a complete medical surveillance examination in accordance with 29 CFR 1910.120(f). A physician's medical release for work will be confirmed by the SSO before an employee can begin Site activities. Such examinations shall include a statement as to the worker's present health status, the ability to work in a hazardous environment (including any required PPE, which may be used during temperature extremes), and the worker's ability to wear respiratory protection.

In the event that personal medical information is needed for emergency treatment, information will be made available to the treating health care professional through Roux Associates' Human Resources Department and the OHSM.

## **9.0 SITE CONTROL, PERSONAL PROTECTIVE EQUIPMENT, AND COMMUNICATIONS**

A modified Site control approach may be utilized since activities will be limited to site inspection and groundwater sampling. If additional work is necessary, the following four-zone approach will be used in order to prevent the spread of contamination from the disturbed areas onsite.

### **9.1 Site Control**

If remedial activities are necessary, a four-zone approach will be employed. The four zones include: the Exclusion Zone (EZ), the Contamination Reduction Zone (CRZ), Contamination Reduction Corridor (CRC) and the Support Zone (SZ). A stepped remedial approach will be managed and the zones modified as the work progresses. Each of the areas will be defined through the use of control barricades and/or construction/hazard fencing. A clearly marked delineation between the SZ and the remaining three zones, the CRZ, CRC and EZ, will be maintained. The preferred method will utilize high visibility orange fencing and hand-driven metal posts, or orange cones. Signage will be posted to further identify and delineate these areas.

#### **9.1.1 Support Zone**

The Support Zone (SZ) is an uncontaminated area that will be the field support area for the Site operations. The SZ will contain the temporary project trailers and provides for field team communications and staging for emergency response. Appropriate sanitary facilities and safety equipment will be located in this zone. Potentially contaminated personnel or materials are not allowed in this zone. The only exception will be appropriately packaged/decontaminated and labeled samples. Meteorological conditions will be observed and noted from this zone, as well as those factors pertinent to heat and cold stress.

#### **9.1.2 Contamination Reduction Zone**

A Contamination Reduction Zone (CRZ) is established between the exclusion zone and the support zone. The CRZ contains the Contamination Reduction Corridor (CRC) and provides an area for decontamination of personnel and equipment. The CRZ will be used for general Site entry and egress in addition to access for heavy equipment and emergency support services. Personnel are not allowed in the CRZ without:

- A buddy (co-worker);
- Appropriate PPE;

- Medical authorization;
- Training certification; and
- A need to be in the zone.

### **9.1.3 Exclusion Zone**

The area where contamination exists is considered to be the Exclusion Zone (EZ). All areas where excavation and handling of contaminated materials take place are considered the EZ. This zone will be clearly delineated by orange high visibility fencing. Safety tape may be used as a secondary delineation within the EZ. The zone delineation markings may be opened in areas for varying lengths of time to accommodate equipment operation or specific construction activities. The SSO may establish more than one EZ where different levels of protection may be employed or where different hazards exist. Personnel are not allowed in the EZ without:

- A buddy (co-worker);
- Required minimum-level PPE;
- Medical authorization;
- Training certification; and
- A need to be in the zone.

## **9.2 Personal Protective Equipment**

The level of protection worn by field personnel will be enforced by the SSO. Levels of protection for general operations are provided below and are defined in this section. Levels of protection may be upgraded at the discretion of the SSO. All decisions on the level of protection will be based upon a conservative interpretation by the SSO of the information provided by air monitoring results, environmental results and other appropriate information. Any changes in the level of protection shall be recorded in the health and safety field logbook.

### **9.2.1 Personal Protective Equipment Specifications**

The initial level of personal protective equipment is Level D. It is not anticipated that either Level B or Level C protection will be necessary.

The Minimum level of PPE for entry onto the Site is Level D PPE. The following equipment shall be used:

- Work uniform (long pants, sleeved shirt)
- Hard hat
- Steel toe work boots
- Safety glasses with attached side shields
- Boot covers (as needed)
- Hearing protection (as needed)
- High visibility clothing (shirt or vest)

Modified Level D PPE consists of the following:

- Regular Tyvek coveralls (Poly-coated Tyvek as required)
- Outer gloves: cut-resistant, leather, cotton (as required)
- Inner gloves: latex or nitrile (doubled) as required
- Chemical resistant boots over work boots (as required)
- Steel toe work boots
- Hard hat Safety glasses with attached side shields
- Hearing protection as needed

High visibility clothing (shirt or vest). Although not anticipated, any tasks requiring Level B personal protective equipment (PPE) will utilize the following equipment:

- Positive pressure, full facepiece, self-contained breathing apparatus (SCBA) or positive pressure, supplied air respirator with escape SCBA (NIOSH approved)
- Disposable coveralls (Tyvek, Poly-coated Tyvek, or Saranex)
- Gloves, inner: latex or nitrile
- Gloves, outer: cut-resistant
- Chemical resistant boots over the work boots
- Steel toe work boots

- Hard hat
- Hearing protection (as needed)
- Boot cover (as needed)

High visibility clothing (shirt or vest). For tasks requiring Level C PPE, the following equipment may be used in any combination:

- Full-face, air purifying, canister-equipped respirators (NIOSH approved) utilizing Organic Vapor/Acid Gas and P-100 filters (half-face if approved by SSO)
- Disposable coveralls (Tyvek) as required
- Gloves, inner: latex or nitrile as required
- Gloves, outer: cut-resistant
- Chemical resistant boots over the work boots as required
- Steel toe work boots
- Hard hat
- Hearing protection (as needed)
- Safety glasses with attached side shields (if half-mask is utilized)
- Boot covers (as needed)
- High visibility clothing (shirt or vest)

### 9.2.2 Site Specific Levels of Protection

Levels of protection for the proposed scope of work may be upgraded or downgraded depending on direct-reading instruments or personnel monitoring. The following are the initial levels of protection that shall be used for each planned field activity:

Activity	Initial Level of PPE
Installation, Gauging, Purging and Sampling of Monitoring Wells	D
Installation and sampling of Soil Borings	D
Installation and sampling of Soil Vapor Points	D

### 9.3 Communications

If working in level C/B respiratory protection is required, personnel may find that communication becomes a more difficult task and process to accomplish. Distance and space further complicate this. In order to address this problem, electronic instruments, mechanical devices, or hand signals will be used as follows:

Telephones – Mobile telephones will be carried by designated personnel for communication with emergency support services/facilities.

Radios – Two-way radios will be utilized onsite for communications between field personnel in areas where visual contact cannot be maintained and where hand signals cannot be employed.

Hand Signals – This communication method will be employed by members of the field team along with use of the buddy system. Signals become especially important when in the vicinity of heavy moving equipment and when using Level B respiratory equipment. The signals shall become familiar to the entire field team before Site operations commence, and will be reinforced and reviewed during site-specific training.

#### **Signal**

#### **Meaning**

Hand gripping throat

Out of air; can't breathe

Grip partner's wrist

Leave area immediately; no debate

Hands on top of head

Need assistance

Thumbs up

OK; I'm all right; I understand

Thumbs down

No; unable to understand you, I'm not all right

## **10.0 MONITORING PROCEDURES**

### **10.1 General**

Monitoring will be performed as necessary to verify the adequacy of respiratory protection, to aid in Site layout, and to document worker exposure. If real-time breathing zone air monitoring in these areas indicates the presence of potentially hazardous materials in exceedance of the Action Levels for Worker Breathing Zone (Table 2), the OHSM will be contacted and a plan for implementing appropriate control measures will be developed. A documented safety briefing to communicate the new procedures to onsite personnel will be conducted. All monitoring instruments shall be operated by qualified personnel only and will be calibrated daily prior to use or, more often, as necessary. Additional monitoring may be required if exclusion zones are employed for specific site activities. General air monitoring will be performed in accordance with the Generic Community Air Monitoring Plan included in Appendix G during intrusive Site activities.

### **10.2 Instrumentation**

The following monitoring instruments will be available for use during field operations as necessary. There will be a minimum of one of each piece of equipment on the Site at all times during intrusive activities:

- Photoionization Detector (PID) with 10.6 EV probe or Flame Ionization Detector (FID) or equivalent.
- Dust/Particulate Monitor (DM), MIE Miniram, or equivalent.

A PID will be used to monitor VOCs in active work areas during intrusive activities. VOCs shall also be measured upwind of the work areas to determine background concentrations.

A particulate monitor shall be used to measure concentrations of dust and particulate matter.

When deemed necessary, a CGI/O<sub>2</sub>/CO (or equivalent) meter shall be used to monitor for combustible gases, oxygen content and/ or carbon monoxide during confined space entry or when operating in areas with poor ventilation as the HSO deems necessary.

Calibration records shall be documented and recorded daily and included in the daily air monitoring report. This report will be specific to work area monitoring. All instruments shall be calibrated before and after each daily use in accordance with manufacturer's procedures.

### **10.3 Action Levels**

Action levels for the upgrading of PPE requirements in the HASP will apply to all Site work during investigation and remediation activities at the Site. Action levels are for known contaminants using direct reading instruments in the Breathing Zone (BZ) for VOCs and particulates, and at the source for combustible gases. The BZ will be determined by the SSO, but is typically 4 to 5 feet above the work area surface or elevation. The action levels to be utilized for the Site are found in Table 2.

## **11.0 SAFETY CONSIDERATIONS**

### **11.1 General**

In addition to the specific requirements of this HASP, common sense should be used at all times. The following general safety rules and practices will be in effect at the site.

- Ignition sources within 35 feet of potentially flammable or contaminated material are strictly prohibited.
- Movement of vehicles and equipment, and other activities will be planned and performed with consideration for the location, height, and relative position of aboveground utilities and fixtures, including signs; lights; canopies; buildings and other structures and construction; and natural features such as trees, boulders, bodies of water, and terrain.
- Approved and appropriate safety equipment (as specified in this HASP), such as eye protection, hard hats, hand protection (nitrile, leather and/or cut resistant gloves as necessary), foot protection, and respirators, must be worn in areas where required.
- No eating, chewing tobacco, gum chewing or drinking will be allowed outside the SZ.
- Contaminated tools and hands must be kept away from the face.
- Personnel must use personal hygiene safe guards (washing up via hand towelettes or potable water) at the end of the shift.
- Each sample must be treated and handled as though it were contaminated.
- Persons with long hair and/or loose-fitting clothing that could become entangled in equipment (e.g., pumps, etc.) must take adequate precautions.
- Horseplay is prohibited in the work area.
- Work while under the influence of intoxicants, narcotics, or controlled substances is strictly prohibited.

### **11.2 Sample Handling**

Personnel responsible for handling of samples will wear the prescribed modified Level D protection. Samples are to be identified as to their hazard and packaged as to prevent spillage or breakage. Any unusual sample conditions shall be noted. Laboratory personnel and all field personnel shall be advised of sample hazard levels and the potential contaminants present. This can be accomplished by a phone call to the lab coordinator and/or including a written statement with the samples reviewing lab safety procedures in handling in order to assure that the practices are appropriate for the suspected contaminants in the sample.

## **12.0 DECONTAMINATION AND DISPOSAL PROCEDURES**

### **12.1 Contamination Prevention**

Contamination prevention should minimize worker exposure and help ensure valid sample results by precluding cross-contamination. Procedures for contamination avoidance include:

#### Personnel

- Do not walk through areas of obvious or known contamination.
- Do not directly handle or touch contaminated materials.
- Make sure that there are no cuts or tears on PPE.
- Fasten all closures in suits; cover with tape, if necessary.
- Particular care should be taken to protect any skin injuries.
- Stay upwind of airborne contaminants.
- Do not carry cigarettes, cosmetics, gum, etc., into contaminated areas.

#### Sampling/Monitoring

- When required by the SSO, cover instruments with clear plastic, leaving openings for sampling ports and air exhaust.

### **12.2 Personnel Decontamination**

If an exclusion zone (EZ) is employed at the site, a field wash for equipment and PPE shall be set up and maintained for all persons exiting the EZ. The system will include a gross wash and rinse for all disposable clothing and boots worn in the EZ. As necessary, equipment and facilities will be available for personnel to wash their hands, arms, neck, and face.

### **12.3 Equipment Decontamination**

All potentially contaminated equipment used at the Site will be decontaminated to prevent contaminants from leaving the Site. The decontamination area will provide for the containment of all wastewater from the decontamination process. Respirators and any other PPE that comes in contact with contaminated materials shall pass through a field wash in the decontamination area, and a thorough decontamination at the end of the day. All decontamination rinse water will be collected and managed in accordance with all applicable regulations.

#### **12.4 Decontamination during Medical Emergencies**

If emergency life-saving first aid and/or medical treatment are required, normal decontamination procedures may need to be abbreviated or omitted. The Site SSO or designee will accompany contaminated victims to the medical facility to advise on matters involving decontamination, when necessary. The outer garments can be removed if they do not cause delays, interfere with treatment, or aggravate the problem. Respiratory equipment must always be removed. Protective clothing can be cut away. If the outer contaminated garments cannot be safely removed, a plastic barrier between the individual and clean surfaces should be used to help prevent contaminating the inside of ambulances and/or medical personnel. Outer garments are then removed at the medical facility. Attempt to wash or rinse the victim if it is known that the individual has been contaminated with an extremely toxic or corrosive material, which could also cause severe injury or loss of life to emergency response personnel. For minor medical problems (ambulatory) or injuries, the normal decontamination procedures will be followed. Note that heat stroke requires prompt treatment to prevent irreversible damage or death. Protective clothing must be promptly removed. Less serious forms of heat stress also require prompt attention and removal of protective clothing immediately. Unless the victim is obviously contaminated, decontamination should be omitted or minimized, and treatment begun immediately.

#### **12.5 Disposal Procedures**

A system of segregating all waste will be developed by the SSO.

All discarded materials, waste materials, or other objects shall be handled in such a way as to preclude the potential for spreading contamination, creating a sanitary hazard, or causing litter to be left onsite. All potentially contaminated materials (e.g., clothing, gloves, etc.,) will be bagged or drummed as necessary, labeled and segregated for disposal. All non-contaminated materials shall be collected, bagged and labeled for appropriate disposal as domestic waste. All waste materials will be staged at the site.

### **13.0 EMERGENCY PLAN**

Should an emergency situation occur, the emergency plan, outlined in this section, shall be known by all onsite personnel prior to the start of work. The emergency plan will be available for use at all times during Site work. The plan provides the phone numbers for the fire, police, ambulance, hospital, poison control centers, and directions to the hospital from the Site. This information is to be found in Section 2 of this HASP.

Various individual Site characteristics will determine preliminary actions taken to assure that this emergency plan is successfully implemented in the event of a Site emergency. Careful consideration must be given to the proximity of neighborhood housing or places of employment, and to the relative possibility of Site release of vapors, which could affect the surrounding community.

The emergency coordinator shall implement the contingency plan whenever conditions at the Site warrant such action. The coordinator will be responsible for coordination of the evacuation, emergency treatment, and transport of Site personnel as necessary, and notification of emergency response units and the appropriate management staff.

In cases where the project principal or project manager is not available, the SSO shall serve as the alternate emergency coordinator.

The SSO during an emergency will perform air monitoring as needed, as well as lend assistance and provide health and safety information to responding emergency personnel.

Site Personnel will endeavor to keep non-essential personnel away from the incident until the appropriate emergency resources arrive. At that time the responders will take control of the Site. Site personnel may be asked to lend assistance to emergency personnel such as during evacuations, help with the injured, etc.

#### **13.1 Evacuation**

Evacuation procedures will be discussed prior to the start of work and periodically during safety meetings. In the event of an emergency situation, such as fire, or explosion, an air horn, automobile horn, or other appropriate device will be sounded for three (3) sharp blasts indicating

the initiation of evacuation procedures. The emergency evacuation route shall be known by all site workers. Under no circumstances will incoming personnel or visitors be allowed to proceed into the area once the emergency signal has been given. The SSO or project manager must ensure that access for emergency equipment is provided and that all combustion apparatuses have been shut down once the alarm has been sounded. All Site personnel will assemble in the designated nearest safe location. Once the safety of all personnel is established, the fire department and other emergency response groups will be notified by telephone of the emergency.

**13.2 Personnel Injury**

Emergency first aid shall be applied onsite as appropriate. For non-emergency situations, treatment should be sought, if needed, through the approved occupational health clinic. If necessary, the individual shall be decontaminated, if needed, and transported to the nearest hospital. The SSO will contact the Human Resources Director and OHSM if medical information is needed.

The ambulance/rescue squad shall be contacted for transport as necessary in an emergency. However, since some situations may require transport of an injured party by other means, the injured person shall be escorted to the occupational health clinic or hospital. Maps to these facilities are shown in Figure 2.

**13.3 Accident/Incident Reporting**

As soon as first aid and/or emergency response needs have been met, the following parties are to be contacted by telephone: (Direct contact, no phone messages).

		<u>Office:</u>	<u>Cell:</u>
1. Corporate Health & Safety Manager:	Joseph Gentile	(856) 423-8800	(610) 844-6911
2. Project Principal:	Craig Werle	(631) 232-2600	(631) 793-1535
3. Project Manager/SHSO:	Wendy Shen	(631) 232-2600	(631) 484-1333
4. Office Health and Safety Manager:	Ray Fitzpatrick	(631)-232-2600	(631) 484-1168

Written confirmations of verbal reports are to be submitted within 24 hours. The report form entitled "Accident Report and Investigation Form" (Appendix H) is to be used for this purpose. All representatives contacted by telephone are to receive a copy of this report. In addition to

filling out the Accident Report and Investigation Form, if a Roux employee is involved in a motor vehicle accident, the employee must also complete the Acord form (Appendix I).

For reporting purposes, the term accident refers to fatalities, lost time injuries, spill or exposure to hazardous materials (radioactive materials, toxic materials, explosive or flammable materials), fire, explosion, property damage, or potential occurrence (i.e., near miss) of the above.

Any information released from the health care provider, which is not deemed confidential patient information, is to be attached to the appropriate form. Any medical information, which is released by patient consent, is to be filed in the individual's medical record and treated as confidential.

### **13.4 Personnel Exposure**

Skin Contact: Use copious amounts of soap and water. Wash/rinse affected area thoroughly, then provide appropriate medical attention. Eyes should be rinsed for 15 minutes upon chemical contamination.

Inhalation: Move to fresh air and/or, if necessary, decontaminate/transport to hospital.

Ingestion: Decontamination and transport to emergency medical facility.

Puncture Wound or Laceration: Decontamination and transport to emergency medical facility.

### **13.5 Adverse Weather Conditions**

In the event of adverse weather conditions, the SSO or project manager will determine if work can continue without sacrificing the health and safety of all field workers. Some of the items to be considered prior to determining if work should continue are:

- Potential for heat stress and heat-related injuries.
- Potential for cold stress and cold-related injuries.
- Treacherous weather-related conditions.
- Limited visibility.
- Electrical storm potential.

Site activities will be limited to daylight hours and acceptable weather conditions. Inclement working conditions include heavy rain, fog, high winds, and lightning. Observe daily weather reports and evacuate if necessary in case of inclement weather conditions.

### **13.5.1 Electrical Storm Guidelines**

In the event that lightning and/or thunder are observed while working onsite, all onsite activities shall stop and personnel shall seek proper shelter (e.g., substantial building, enclosed vehicle, etc.). Work shall not resume until the threat of lightning has subsided and no lightning or thunder has been observed for 30 minutes. If the possibility of lightning is forecast for the day, advise the onsite personnel of the risks and proper procedure at the pre-work safety briefing. Continuously monitor for changing weather conditions and allow enough time to properly stop work if lightning is forecast.

## **14.0 LOGS, REPORTS AND RECORD KEEPING**

The following is a summary of required health and safety logs, reports, and record keeping for this project.

### **14.1 Medical and Training Records**

The employer keeps medical and training records. The subcontractor employer must provide verification of training and medical qualifications to the SSO. The SSO will keep a log of personnel meeting appropriate training and medical qualifications for Site work. The log will be kept in the project file. Roux Associates will maintain medical records in accordance with 29 CFR 1910.20.

### **14.2 Onsite Log**

The SSO or project manager will keep a log of onsite personnel daily in the designated field book.

### **14.3 Exposure Records**

Applicable personal monitoring results, laboratory reports, calculations, and air sampling data sheets are part of an employee exposure record. These records will be kept by Roux Associates in accordance with 29 CFR 1910.20.

### **14.4 Near Loss Reports**

A near loss report must be completed following procedures given in Appendix J. The originals will be sent to Roux Associates for maintenance. Copies will be distributed as stated. A copy of the forms will be kept in the project file.

### **14.5 Accident/Incident Reports**

For any injury (OSHA Recordable or not), including “FYI” injuries (injuries where pain was felt, but not even first aid treatment was needed), and illnesses, all work on the activity where the injury/illness occurred will be stopped. An accident/incident report must be completed following procedures given in Appendix H. The originals will be sent to Roux Associates for maintenance. Copies will be distributed as stated. A copy of the forms will be kept in the project file.

#### **14.6 OSHA Form 300**

An OSHA Form 300 (Log of Occupational Injuries and Illnesses) (Appendix K) will be kept at the Site. All reportable injuries or illnesses will be recorded on this form. At the end of the project, the original will be sent to Roux Associates for maintenance.

#### **14.7 Daily Health and Safety Briefing**

The Daily Health and Safety Briefing form in Appendix E will be completed daily by the SSO and submitted to the project manager.

1. Toxicological, Physical and Chemical Properties of Compounds Potentially Present at the Site
2. Action Levels for Worker Breathing Zone

**Table 1. Toxicological, Physical, and Chemical Properties of Compounds Potentially Present at 239 10th Avenue, New York, New York**

Compound	CAS #	ACGIH TLV	NIOSH REL	OSHA PEL	IDLH	Routes of Exposure	Toxic Properties	Target Organs	Physical/Chemical Properties
1,2,4-Trimethylbenzene	95-63-6	None established	TWA 25 ppm (125mg/m <sup>3</sup> )	None established	N.D.	Inhalation; ingestion; skin and/or eye contact	Eye, skin, nose, and throat, resp syst irritation; bronchitis; hypochromic anemia; headache, drowsiness, weakness, dizziness, nausea, incoordination, vomit, confusion; chemical pneumonitis	Eyes, skin, resp sys, CNS, blood	Clear, colorless liquid with a distinctive, aromatic odor BP: 337°F FL.P: 112°F UEL: 6.4% LEL: 0.9% Class II Flammable liquid
1,2,4-Trimethylbenzene	95-63-6	TWA 25 ppm (125 mg)	TWA 25 ppm (125 mg/m <sup>3</sup> )	None established	N.D.	inhalation, ingestion, skin and/or eye contact	Irritation eyes, skin, nose, throat, respiratory system; bronchitis; hypochromic anemia; headache, drowsiness, fatigue, dizziness, nausea, incoordination; vomiting, confusion; chemical pneumonitis (aspiration liquid)	Eyes, skin, respiratory system, central nervous system, blood	Clear, colorless liquid with a distinctive, aromatic odor. BP: 337°F FL.P: 112°F UEL: 6.4% LEL: 0.9% Class II Flammable Liquid
1,2-Dichlorobenzene	95-50-1	TWA 25 ppm STEL 50 ppm	C 50 ppm (300 mg/m <sup>3</sup> )	C 50 ppm (300 mg/m <sup>3</sup> )	200 ppm	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, nose; liver, kidney damage; skin blisters	Eyes, skin, respiratory system, liver, kidneys	Colorless to pale-yellow liquid with a pleasant, aromatic odor. [herbicide] BP: 357°F FL.P: 151°F UEL: 9.2% LEL: 2.2% Class IIIA Combustible Liquid
1,2-Dichloroethane	107-06-2	TWA 10 ppm	Ca TWA 1 ppm (4 mg/m <sup>3</sup> ) STEL 2 ppm (8 mg/m <sup>3</sup> )	TWA 50 ppm C 100 ppm 200 ppm [5-minute maximum peak in any 3 hours]	Ca [50 ppm]	inhalation, ingestion, skin absorption, skin and/or eye contact	Irritation eyes, corneal opacity; central nervous system depression; nausea, vomiting; dermatitis; liver, kidney, cardiovascular system damage; [potential occupational carcinogen]	Eyes, skin, kidneys, liver, central nervous system, cardiovascular system	Colorless liquid with a pleasant, chloroform-like odor. [Note: Decomposes slowly, becomes acidic & darkens in color.] BP: 182°F FL.P: 56°F UEL: 16% LEL: 6.2% Class IB Flammable Liquid
1,2-Dichloroethene (total)	540-59-0	TWA 200 ppm (790 m)	TWA 200 ppm (790 mg/m <sup>3</sup> )	TWA 200 ppm (790 mg/m <sup>3</sup> )	1000 ppm	inhalation, ingestion, skin and/or eye contact	Irritation eyes, respiratory system; central nervous system depression	Eyes, respiratory system, central nervous system	Colorless liquid (usually a mixture of the cis & trans isomers) with a slightly acrid, chloroform-like odor BP: 118-140°F FL.P: 36-39°F UEL: 12.8% LEL: 5.6% Class IB Flammable Liquid
1,3,5-Trimethylbenzene	108-67-8	None established	TWA 25 ppm (125mg/m <sup>3</sup> )	None established	N.D.	Inhalation; ingestion; skin and/or eye contact	Eye, skin, nose, and throat, resp syst irritation; bronchitis; hypochromic anemia; headache, drowsiness, weakness, dizziness, nausea, incoordination, vomit, confusion; chemical pneumonitis	Eyes, skin, resp sys, CNS, blood	Clear, colorless liquid with a distinctive, aromatic odor BP: 329°F FL.P: 122°F Class II Flammable liquid

**Table 1. Toxicological, Physical, and Chemical Properties of Compounds Potentially Present at 239 10th Avenue, New York, New York**

Compound	CAS #	ACGIH TLV	NIOSH REL	OSHA PEL	IDLH	Routes of Exposure	Toxic Properties	Target Organs	Physical/Chemical Properties
1,3,5-Trimethylbenzene	108-67-8	TWA 25 ppm (125 mg/m <sup>3</sup> )	TWA 25 ppm (125 mg/m <sup>3</sup> )	None established	N.D	inhalation, ingestion, skin and/or eye contact	Irritation eyes, skin, nose, throat, respiratory system; bronchitis; hypochromic anemia; headache, drowsiness, lassitude (weakness, exhaustion), dizziness, nausea, incoordination; vomiting, confusion; chemical pneumonitis (aspiration liquid)	Eyes, skin, respiratory system, central nervous system, blood	Clear, colorless liquid with a distinctive, aromatic odor. BP: 329°F FLP: 122°F Class II Flammable Liquid
1,4-Dichlorobenzene	106-46-7	TWA 10 ppm	Ca	TWA 75 ppm (450 mg/m <sup>3</sup> )	Ca [150 ppm]	inhalation, skin absorption, ingestion, skin and/or eye contact	Eye irritation, swelling periorbital (situated around the eye); profuse rhinitis; headache, anorexia, nausea, vomiting; weight loss, jaundice, cirrhosis; in animals: liver, kidney injury; [potential occupational carcinogen]	Liver, respiratory system, eyes, kidneys, skin	Colorless or white crystalline solid with a mothball-like odor. [insecticide] BP: 345°F FLP: 150°F LEL: 2.5% Combustible Solid
2,4-Dimethylphenol	105-67-9	None established	None established	None established	None established	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, skin, respiratory system, mouth, throat, stomach; dizziness, weakness, fatigue, nausea, headache; systemic damage; moderate to severe eye injury.	Skin, CVS, eyes, CNS	Clear, colorless liquid with a faint ether or chloroform-like odor BP: 178°F
2-Butanone (MEK)	78-93-3	TWA 200 ppm (590 mg/m <sup>3</sup> ) STEL 300 ppm (885 mg/m <sup>3</sup> )	TWA 200 ppm (590 mg/m <sup>3</sup> ) STEL 300 ppm (885 mg/m <sup>3</sup> )	TWA 200 ppm (590 mg/m <sup>3</sup> )	3000 ppm	inhalation, ingestion, skin and/or eye contact	Irritation eyes, skin, nose; headache; dizziness; vomiting; dermatitis	Eyes, skin, respiratory system, central nervous system	Colorless liquid with a moderately sharp, fragrant, mint- or acetone-like odor. BP: 175°F FLP: 16°F UEL(200°F): 11.4% LEL(200°F): 1.4% Class IB Flammable Liquid
Acenaphthene	83-32-9	None established	None established	None established	None established	inhalation, ingestion, skin and/or eye contact	Irritation eyes, skin, respiratory system	Eyes, skin, respiratory system	Brown solid
Acetone	67-64-1	TWA 500 ppm STEL 50 ppm	TWA 250 ppm (590 mg/m <sup>3</sup> )	TWA 1000 ppm (2400 mg/m <sup>3</sup> )	2500 ppm [10%LEL]	inhalation, ingestion, skin and/or eye contact	Irritation eyes, nose, throat; headache, dizziness, central nervous system depression; dermatitis	Eyes, skin, respiratory system, central nervous system	Colorless liquid with a fragrant, mint-like odor BP: 133°F FLP: 0°F UEL: 12.8% LEL: 2.5% Class IB Flammable Liquid
Anthracene	65996-93-2	TWA 0.2 mg/m <sup>3</sup>	Ca TWA 0.1 mg/m <sup>3</sup> (cyclohexane-extractable fraction)	TWA 0.2 mg/m <sup>3</sup> (benzene-soluble fraction)	Ca [80 mg/m <sup>3</sup> ]	inhalation, skin and/or eye contact	Dermatitis, bronchitis, [potential occupational carcinogen]	respiratory system, skin, bladder, kidneys	Black or dark-brown amorphous residue. Combustible Solids
Antimony	7440-36-0	TWA 0.5 mg/m <sup>3</sup>	TWA 0.5 mg/m <sup>3</sup>	TWA 0.5 mg/m <sup>3</sup>	50 mg/m <sup>3</sup> (as Sb)	inhalation, ingestion, skin and/or eye contact	Irritation eyes, skin, nose, throat, mouth; cough; dizziness; headache; nausea, vomiting, diarrhea; stomach cramps; insomnia; anorexia; unable to smell properly	Eyes, skin, respiratory system, cardiovascular system	Silver-white, lustrous, hard, brittle solid; scale-like crystals; or a dark-gray, lustrous powder. BP: 2975°F

**Table 1. Toxicological, Physical, and Chemical Properties of Compounds Potentially Present at 239 10th Avenue, New York, New York**

Compound	CAS #	ACGIH TLV	NIOSH REL	OSHA PEL	IDLH	Routes of Exposure	Toxic Properties	Target Organs	Physical/Chemical Properties
Arsenic (inorganic)	7440-38-2 (metal)	TWA 0.01 mg/m <sup>3</sup>	Ca C 0.002 mg/m <sup>3</sup> [15-min]	TWA 0.010 mg/m <sup>3</sup>	Ca [5 mg/m <sup>3</sup> (as As)]	Inhalation; ingestion; skin absorption; skin and/or eye contact	Ulceration of nasal septum, dermatitis, GI disturbances, peripheral neuropathy, resp irritation, hyperpigmentation of skin, [potential occupational carcinogen]	Liver, kidneys, skin, lungs, lymphatic sys	Metal: silver-gray or tin-white, brittle, odorless solid BP: sublimes
Asbestos	1332-21-4	TWA 0.1 f/cc	Ca 100,000 fibers/m <sup>3</sup>	TWA 0.1 fiber/cm <sup>3</sup>	Ca [IDLH value has not been determined]	Inhalation; ingestion; skin and/or eye contact	Asbestosis (chronic exposure), dyspnea, interstitial fibrosis, restricted pulmonary function, finger clubbing, irritation eyes, [potential occupational carcinogen]	Respiratory system, eyes,	White or greenish (chrysotile), blue (crocidolite), or gray-green (amosite), fibrous, odorless solids. BP: decomposes
Asphalt fumes	8052-42-4	TWA 0.5 mg/m <sup>3</sup> (fumes)	Ca C 5 mg/m <sup>3</sup> [15 min]	None established	Ca [IDLH value has not been determined]	Skin absorption; inhalation; skin and/or eye contact	Irritation eyes, resp sys	Eyes, respiratory system	Black or dark brown cement-like substance Combustible solid
Barium	7440-39-3	TWA 0.5 mg/m <sup>3</sup>	None established	TWA 0.5 mg/m <sup>3</sup>	None established	Inhalation, ingestion, skin contact	Irritation skin, respiratory system,	Skin, eyes, respiratory system	Yellow white powder BP: 1640 C
Benzene	71-43-2	TWA 0.5 ppm STEL 2.5 ppm	Ca TWA 0.1 ppm STEL 1 ppm	TWA 1 ppm STEL 5 ppm	Ca [500 ppm]	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, skin, nose, respiratory system; dizziness; headache, nausea, staggered gait; anorexia, lassitude (weakness, exhaustion); dermatitis; bone marrow depression; [potential occupational carcinogen]	Eyes, skin, respiratory system, blood, central nervous system, bone marrow	Colorless to light yellow liquid with an aromatic odor [Note: Solid below 42 °F] BP: 176°F Fl.Pt = 12°F LEL: 1.2% UEL: 7.8% Class B Flammable liquid
Benzo[a]anthracene	56-55-3	None established	None established	None established	None established	Inhalation; ingestion; skin absorption; skin and/or eye contact	Irritation eyes, skin, respiratory system, CNS	Skin	Pale Yellow crystal, solid BP: 438 C
Benzo[a]pyrene	50-32-8	None established	TWA 0.1 mg/m <sup>3</sup>	TWA 0.2 mg/m <sup>3</sup>	None established	Inhalation; ingestion; skin absorption; skin and/or eye contact	POISON. This material is an experimental carcinogen, mutagen, tumorigen, neoplastigen and teratogen. It is a probable carcinogen in humans and a known human mutagen. IARC Group 2A carcinogen. It is believed to cause bladder, skin and lung cancer. Exposure to it may damage the developing foetus. May cause reproductive damage. Skin, respiratory and eye irritant or burns.	Skin, eye, bladder, lung, reproductive	Yellow crystals or powder [found in cigarette smoke, coal tar, fuel exhaust gas and in many other sources] BP: 495 C
Benzo[b]fluoranthene	205-99-2	None established	TWA 0.1 mg/m <sup>3</sup>	TWA 0.2 mg/m <sup>3</sup>	None established	Inhalation; ingestion; skin and/or eye contact	No data were identified on the toxicity of benzo[b]fluoranthene to humans. Based on results of studies in animals, IARC concluded that benzo[b]fluoranthene is possibly carcinogenic to humans	Respiratory system, skin, bladder, kidneys	Off-white to tan powder

**Table 1. Toxicological, Physical, and Chemical Properties of Compounds Potentially Present at 239 10th Avenue, New York, New York**

Compound	CAS #	ACGIH TLV	NIOSH REL	OSHA PEL	IDLH	Routes of Exposure	Toxic Properties	Target Organs	Physical/Chemical Properties
Benzo[k]fluoranthene	207-08-9	None established	None established	None established	None established	inhalation, skin absorption, skin and/or eye contact	Irritation eyes, skin, respiratory tract, gastrointestinal; fatal if swallowed, inhaled, absorbed through the skin; vomiting, nausea, diarrhea	Lungs, respiratory system	Yellow crystals BP: 480 C
Beryllium	7440-41-7 (metal)	TWA 0.002 mg/m <sup>3</sup>	Ca C 0.0005 mg/m <sup>3</sup>	TWA 0.002 mg/m <sup>3</sup> C 0.005 mg/m <sup>3</sup> (30 minutes) with a maximum peak of 0.025 mg/m <sup>3</sup>	Ca [4 mg/m <sup>3</sup> (as Be)]	inhalation, skin and/or eye contact	Berylliosis (chronic exposure): anorexia, weight loss, lassitude (weakness, exhaustion), chest pain, cough, clubbing of fingers, cyanosis, pulmonary insufficiency; irritation eyes; dermatitis; [potential occupational carcinogen]	Eyes, skin, respiratory system	Metal: A hard, brittle, gray-white solid. BP: 4532°F
Bis(2-ethylhexyl) phthalate	117-81-7	TWA 5 mg/m <sup>3</sup>	TWA 5 mg/m <sup>3</sup> STEL 10 mg/m <sup>3</sup> (do not exceed during any 15-minute work period)	TWA 5 mg/m <sup>3</sup>	None established	inhalation, skin and/or eye contact	Irritation eyes, skin, nose, throat; affect the nervous system and liver; damage to male reproductive glands	Eyes, skin, nose, respiratory system, nervous system, reproductive system, liver	Colorless to light colored, thick liquid with slight odor
Butane	106-97-8	TWA 1000 ppm	TWA 800 ppm (1900 mg/m <sup>3</sup> )	None established	None established	inhalation, skin and/or eye contact (liquid)	Drowsiness, narcosis, asphyxia; liquid: frostbite	central nervous system	Colorless gas with a gasoline-like or natural gas odor. BP: 31°F UEL: 8.4% LEL: 1.6% Flammable Gas
Cadmium	7440-43-9 (metal)	TWA 0.01 mg/m <sup>3</sup>	Ca	TWA 0.005 mg/m <sup>3</sup>	Ca [9 mg/m <sup>3</sup> (as Cd)]	inhalation, ingestion	Pulmonary edema, dyspnea (breathing difficulty), cough, chest tightness, substernal (occurring beneath the sternum) pain; headache; chills, muscle aches; nausea, vomiting, diarrhea; anosmia (loss of the sense of smell), emphysema, proteinuria, mild anemia; [potential occupational carcinogen]	respiratory system, kidneys, prostate, blood	Metal: Silver-white, blue-tinged lustrous, odorless solid. BP: 1409°F
Carbon Disulfide	75-15-0	TWA 1 ppm	TWA 1 ppm (3 mg/m <sup>3</sup> ) STEL 10 ppm (30 mg/m <sup>3</sup> ) [skin]	TWA 20 ppm C 30 ppm 100 ppm (30-minute maximum peak)	500 ppm	inhalation, skin absorption, ingestion, skin and/or eye contact	Dizziness, headache, poor sleep, lassitude (weakness, exhaustion), anxiety, anorexia, weight loss; psychosis; polyneuropathy; Parkinson-like syndrome; ocular changes; coronary heart disease; gastritis; kidney, liver injury; eye, skin burns; dermatitis; reproductive effects	central nervous system, peripheral nervous system, cardiovascular system, eyes, kidneys, liver, skin, reproductive system	Colorless to faint-yellow liquid with a sweet ether-like odor. BP: 116°F Fl.P: -22°F UEL: 50.0% LEL: 1.3% Class IB Flammable Liquid
Chlorobenzene	108-90-7	TWA 10 ppm	None established	TWA 75 ppm (350 mg/m <sup>3</sup> )	1000 ppm	inhalation, ingestion, skin and/or eye contact	Irritation eyes, skin, nose; drowsiness, incoordination; central nervous system depression; in animals: liver, lung, kidney injury	Eyes, skin, respiratory system, central nervous system, liver	Colorless liquid with an almond-like odor BP: 270°F Fl.P: 82°F UEL: 9.6% LEL: 1.3%

**Table 1. Toxicological, Physical, and Chemical Properties of Compounds Potentially Present at 239 10th Avenue, New York, New York**

Compound	CAS #	ACGIH TLV	NIOSH REL	OSHA PEL	IDLH	Routes of Exposure	Toxic Properties	Target Organs	Physical/Chemical Properties
Chloroethane	75-00-3	TWA 100ppm	Handle with caution in the workplace	TWA 1000 ppm (2600 mg/m <sup>3</sup> )	3800 ppm [10%LEL]	inhalation, skin absorption (liquid), ingestion (liquid), skin and/or eye contact	Incoordination, inebriation; abdominal cramps; cardiac arrhythmias, cardiac arrest; liver, kidney damage	Liver, kidneys, respiratory system, cardiovascular system, central nervous system	Colorless gas or liquid (below 54°F) with a pungent, ether-like odor. BP: 54°F Fl.P: NA (Gas) -58°F (Liquid) UEL: 15.4% LEL: 3.8%
Chloroform	67-66-3	TWA 10 ppm	Ca STEL 2 ppm (9.78 mg/m <sup>3</sup> ) [60-minute]	C 50 ppm (240 mg/m <sup>3</sup> )	Ca [500 ppm]	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, skin; dizziness, mental dullness, nausea, confusion; headache, lassitude (weakness, exhaustion); anesthesia; enlarged liver; [potential occupational carcinogen]	Liver, kidneys, heart, eyes, skin, central nervous system	Colorless liquid with a pleasant odor BP: 143°F
Chromium	7440-47-3	TWA 0.5 mg/m <sup>3</sup> (metal and Cr III compounds) TWA 0.05 mg/m <sup>3</sup> (water-soluble Cr IV compounds) TWA 0.01 mg/m <sup>3</sup> (insoluble Cr IV compounds)	TWA 0.5 mg/m <sup>3</sup>	TWA 1 mg/m <sup>3</sup>	250 mg/m <sup>3</sup> (as Cr)	inhalation, ingestion, skin and/or eye contact	Irritation eyes, skin; lung fibrosis (histologic)	Eyes, skin, respiratory system	Blue-white to steel-gray, lustrous, brittle, hard, odorless solid. BP: 4788°F
Chrysene; Phenanthrene; Pyrene; Coal tar pitch volatiles	65996-93-2	TWA 0.2 mg/m <sup>3</sup>	Ca TWA 0.1 mg/m <sup>3</sup> (cyclohexane-extractable fraction)	TWA 0.2 mg/m <sup>3</sup> (benzene-soluble fraction)	Ca [80 mg/m <sup>3</sup> ]	Inhalation, skin and/or eye contact	Dermatitis, bronchitis, [potential occupational carcinogen]	Respiratory system, skin, bladder, kidneys	Black or dark-brown amorphous residue. Combustible Solids
cis-1,2-Dichloroethene	158-59-2	TWA 200 ppm	TWA 200 ppm	TWA 200 ppm	None established	inhalation, skin absorption, ingestion	Harmful if swallowed, inhaled, or absorbed through skin. Irritant. Narcotic. Suspected carcinogen	Skin	Colorless liquid BP: 60 C Fl.P: 4 C UEL: 12.8% LEL: 9.7 %
Copper	7440-50-8	TWA 0.2mg/m <sup>3</sup> (fume) 1 mg/m <sup>3</sup> (dusts and mists)	TWA 1 mg/m <sup>3</sup>	TWA 1 mg/m <sup>3</sup>	100 mg/m <sup>3</sup> (as Cu)	Inhalation, ingestion, skin and/or eye contact	Irritation eyes, respiratory system; cough, dyspnea (breathing difficulty), wheezing	Eyes, skin, respiratory system, liver, kidneys (increase(d) risk with Wilson's disease)	Noncombustible Solid in bulk form, but powdered form may ignite. BP: 4703°F
Dibenz[ <i>a,h</i> ]anthracene	53-70-3	None established	None established	None established	None established	Inhalation, ingestion, skin and/or eye contact	Irritation eyes, skin	Eyes, skin; skin photosensitization.	Colorless crystalline powder BP: 524°C
Diesel Fuel #2	68476-34-6	None established	None established	Designated as an OSHA Select Carcinogen	None established	ingestion, skin and/or eye contact	Kidney damage; potential lung damage; suspected carcinogen; irritation of eyes, skin, respiratory tract; dizziness, headache, nausea; chemical pneumonitis (from aspiration of liquid); dry, red skin; irritant contact dermatitis; eye redness, pain.	Eyes, skin, kidneys	Clear yellow brown combustible liquid; floats on water; distinct diesel petroleum hydrocarbon odor. BP: 356-716°F Fl.P: 154.4-165.2°F LEL: 0.6% UEL: 7.0%
Ethylbenzene	100-41-4	TWA 100 ppm STEL 125 ppm	TWA 100 ppm (435 mg/m <sup>3</sup> ) STEL 125 ppm (545 mg/m <sup>3</sup> )	TWA 100 ppm (435 mg/m <sup>3</sup> )	800 ppm [10%LEL]	inhalation, ingestion, skin and/or eye contact	Irritation eyes, skin, mucous membrane; headache; dermatitis; narcosis, coma	Eyes, skin, respiratory system, central nervous system	Colorless liquid with an aromatic odor. BP: 277°F Fl.P: 55°F UEL: 6.7% LEL: 0.8% Class IB Flammable Liquid

**Table 1. Toxicological, Physical, and Chemical Properties of Compounds Potentially Present at 239 10th Avenue, New York, New York**

Compound	CAS #	ACGIH TLV	NIOSH REL	OSHA PEL	IDLH	Routes of Exposure	Toxic Properties	Target Organs	Physical/Chemical Properties
Fluoranthene	206-44-0	None established	None established	None established	None established	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, skin; possible burns; heart and liver injury, pulmonary edema, respiratory arrest, gastrointestinal disturbances.	Heart, liver, lungs.	Yellow needles.
Fluorene	86-73-7	None established	None established	None established	None established	inhalation, ingestion, skin and/or eye contact	Irritation skin, digestive tract	Skin	White crystals BP: 563°F
Fuel Oil #2	68476-30-2	TWA 100mg/m <sup>3</sup> (aerosol and vapor, as total hydrocarbons)	None established	None established	None established	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, skin; CNS effects; nausea, vomiting, headache, cramping, dizziness, weakness, loss of coordination, drowsiness; kidney, liver damage	Eyes, skin, CNS	Clear or yellow to red oily liquid, kerosene-like odor BP: 347 - 689 °F UEL: 5-6% LEL: 0.7-1.0%
Gasoline	8006-61-9	TWA 300 ppm STEL 500 ppm	Carcinogen	None established	Ca [IDLH value has not been determined]	Skin absorption; inhalation; ingestion; skin and/or eye contact	Eyes and skin irritation, mucous membrane; dermatitis; headache; listlessness, blurred vision, dizziness, slurred speech, confusion, convulsions; chemical pneumonitis; possible liver, kidney damage [Potential occupational carcinogen]	Eyes, skin, respiratory system, CNS, Liver, Kidneys	Clear liquid with a characteristic odor, aromatic Fl.Pt = -45°F LEL = 1.4% UEL = 7.6% Class 1B Flammable Liquid
Hexachlorobutadiene	87-68-3	TWA 0.02 ppm	Ca TWA 0.02 ppm (0.24 mg/m <sup>3</sup> ) [skin]	None established	Ca [N.D.]	inhalation, skin absorption, ingestion, skin and/or eye contact	In animals: irritation eyes, skin, respiratory system; kidney damage; [potential occupational carcinogen]	Eyes, skin, respiratory system, kidneys	Clear, colorless liquid with a mild, turpentine-like odor. BP: 419°F
Hydrogen Sulfide	7783-06-4	TWA (1 ppm) STEL (5 ppm) (adopted values for which changes are proposed in the NIC)	C 10 ppm (15 mg/m <sup>3</sup> ) [10-minute]	C 20 ppm 50 ppm [10-minute maximum peak]	100 ppm	inhalation, skin and/or eye contact	Irritation eyes, respiratory system; apnea, coma, convulsions; conjunctivitis, eye pain, lacrimation (discharge of tears), photophobia (abnormal visual intolerance to light), corneal vesiculation; dizziness, headache, lassitude (weakness, exhaustion), irritability, insomnia; gastrointestinal disturbance; liquid: frostbite	Eyes, respiratory system, central nervous system	Colorless gas with a strong odor of rotten eggs. BP: -77°F UEL: 44.0% LEL: 4.0% Flammable Gas
Indeno[1,2,3-cd]pyrene	193-39-5	None established	None established	None established	None established	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, skin; possible human carcinogen (skin); weakness; affect liver, lung tissue, renal tissue; impairment of blood forming tissue	Skin	Fluorescent green-yellow crystalline solid BP: 536 C
Indeno[1,2,3-cd]pyrene	193-39-5	None established	None established	None established	None established	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, skin; possible human carcinogen (skin); weakness; affect liver, lung tissue, renal tissue; impairment of blood forming tissue	Skin	Yellowish crystal solid BP: 536 C

Compound	CAS #	ACGIH TLV	NIOSH REL	OSHA PEL	IDLH	Routes of Exposure	Toxic Properties	Target Organs	Physical/Chemical Properties
Isopropylbenzene	98-82-8	TWA 50 ppm	TWA 50 ppm (245 mg/m <sup>3</sup> ) [skin]	TWA 50 ppm (245 mg/m <sup>3</sup> ) [skin]	900 ppm [10%LEL]	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, skin, mucous membrane; dermatitis; headache, narcosis, coma	Eyes, skin, respiratory system, central nervous system	Colorless liquid with a sharp, penetrating, aromatic odor. BP: 306°F Fl.P: 96°F UEL: 6.5% LEL: 0.9%
Kerosene	8008-20-6	TWA 200 mg/m <sup>3</sup>	TWA 100 mg/m <sup>3</sup>	None established	IDLH value has not been determined	inhalation, ingestion, skin and/or eye contact	Irritation eyes, skin, nose, throat; burning sensation in chest; headache, nausea, lassitude (weakness, exhaustion), restlessness, incoordination, confusion, drowsiness; vomiting, diarrhea; dermatitis; chemical pneumonitis (aspiration liquid)	Eyes, skin, respiratory system, central nervous system	Colorless to yellowish, oily liquid with a strong, characteristic odor. BP: 347-617°F Fl.P: 100-162°F UEL: 5% LEL: 0.7% Class II Combustible Liquid
Lead	7439-92-1	TWA 0.05 mg/m <sup>3</sup>	TWA (8-hour) 0.050 mg/m <sup>3</sup>	TWA 0.050 mg/m <sup>3</sup>	100 mg/m <sup>3</sup> (as Pb)	inhalation, ingestion, skin and/or eye contact	Lassitude (weakness, exhaustion), insomnia; facial pallor; anorexia, weight loss, malnutrition; constipation, abdominal pain, colic; anemia; gingival lead line; tremor; paralysis wrist, ankles; encephalopathy; kidney disease; irritation eyes; hypertension	Eyes, gastrointestinal tract, central nervous system, kidneys, blood, gingival tissue	A heavy, ductile, soft, gray solid. BP: 3164°F Noncombustible Solid in bulk form
Manganese	7439-96-5 (metal)	TWA 0.2 mg/m <sup>3</sup>	TWA 1 mg/m <sup>3</sup> STEL 3 mg/m <sup>3</sup>	C 5 mg/m <sup>3</sup>	500 mg/m <sup>3</sup> (as Mn)	inhalation, ingestion	Manganism; asthenia, insomnia, mental confusion; metal fume fever: dry throat, cough, chest tightness, dyspnea (breathing difficulty), rales, flu-like fever; low-back pain; vomiting; malaise (vague feeling of discomfort); lassitude (weakness, exhaustion); kidney damage	respiratory system, central nervous system, blood, kidneys	A lustrous, brittle, silvery solid. BP: 3564°F
Mercury (organo) alkyl compounds (as Hg)	7439-97-6	TWA 0.01 mg/m <sup>3</sup> STEL 0.03 mg/m <sup>3</sup> [skin]	TWA 0.01 mg/m <sup>3</sup> STEL 0.03 mg/m <sup>3</sup> [skin]	TWA 0.01 mg/m <sup>3</sup> C 0.04 mg/m <sup>3</sup>	2 mg/m <sup>3</sup> (as Hg)	inhalation, skin absorption, ingestion, skin and/or eye contact	Paresthesia; ataxia, dysarthria; vision, hearing disturbance; spasticity, jerking limbs; dizziness; salivation; lacrimation (discharge of tears); nausea, vomiting, diarrhea, constipation; skin burns; emotional disturbance; kidney injury; possible teratogenic effects	Eyes, skin, central nervous system, peripheral nervous system, kidneys	Appearance and odor vary depending upon the specific (organo) alkyl mercury compound
Mercury compounds [except (organo) alkyls] (as Hg) Mercury	7439-97-6	TWA 0.025 mg/m <sup>3</sup> (elemental and inorganic forms)	Hg Vapor: TWA 0.05 mg/m <sup>3</sup> [skin] Other: C 0.1 mg/m <sup>3</sup> [skin]	TWA 0.1 mg/m <sup>3</sup>	10 mg/m <sup>3</sup> (as Hg)	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, skin; cough, chest pain, dyspnea (breathing difficulty), bronchitis, pneumonitis; tremor, insomnia, irritability, indecision, headache, lassitude (weakness, exhaustion); stomatitis, salivation; gastrointestinal disturbance, anorexia, weight loss; proteinuria	Eyes, skin, respiratory system, central nervous system, kidneys	Metal: Silver-white, heavy, odorless liquid. [Note: "Other" Hg compounds include all inorganic & aryl Hg compounds except (organo) alkyls.] BP: 674°F

**Table 1. Toxicological, Physical, and Chemical Properties of Compounds Potentially Present at 239 10th Avenue, New York, New York**

Compound	CAS #	ACGIH TLV	NIOSH REL	OSHA PEL	IDLH	Routes of Exposure	Toxic Properties	Target Organs	Physical/Chemical Properties
Methyl tert-butyl ether (MTBE)	1634-04-4	TWA 50 ppm	No established REL	None established	None established	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, mucous membrane, respiratory; dizziness, nausea, headache, intoxication	Eyes, skin, mucous membrane, respiratory system, central nervous system	Colorless liquid BP: 55.2 C
Methylene Chloride	75-09-2	TWA 50 ppm, A3 - suspected human carcinogen	Ca	TWA 25 ppm STEL 125 ppm	Ca [2300 ppm]	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, skin; lassitude (weakness, exhaustion), drowsiness, dizziness; numbness, tingle limbs; nausea; [potential occupational carcinogen]	Eyes, skin, cardiovascular system, central nervous system	Colorless liquid with a chloroform-like odor BP: 104°F UEL: 23% LEL: 13%
Naphtha (coal tar)	8030-30-6	None established	TWA 100 ppm (400 mg/m <sup>3</sup> )	TWA 100 ppm (400 mg/m <sup>3</sup> )	1000 ppm [10%LEL]	inhalation, ingestion, skin and/or eye contact	Irritation eyes, skin, nose; dizziness, drowsiness; dermatitis; in animals: liver, kidney damage	Eyes, skin, respiratory system, liver, kidneys	Reddish-brown, mobile liquid with an aromatic odor BP: 320-428°F Fl.P: 100-109°F Class II Combustible Liquid
Naphthalene	91-20-3	TWA 10 ppm STEL 15 ppm	TWA 10 ppm (50 mg/m <sup>3</sup> ) STEL 15 ppm (75 mg/m <sup>3</sup> )	TWA 10 ppm (50 mg/m <sup>3</sup> )	250 ppm	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes; headache, confusion, excitement, malaise (vague feeling of discomfort); nausea, vomiting, abdominal pain; irritation bladder; profuse sweating; jaundice; hematuria (blood in the urine), renal shutdown; dermatitis, optical neuritis, corneal damage	Eyes, skin, blood, liver, kidneys, central nervous system	Colorless to brown solid with an odor of mothballs. BP: 424°F Fl.P: 174°F UEL: 5.9% LEL: 0.9%
n-Butylbenzene	104-51-8	None established	None established	None established	None established	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, skin; CNS depression, lung damage; nausea, vomiting, headache, dizziness, weakness, loss of coordination, blurred vision, drowsiness, confusion, disorientation	Eyes, skin, respiratory system, central nervous system	Colorless liquid with a sweet odor BP: 183 C Fl.P: 59 C UEL: 5.8% LEL: 0.8%
Nickel	7440-02-0 (Metal)	TWA 1.5 mg/m <sup>3</sup> (elemental) TWA 0.1 mg/m <sup>3</sup> (soluble inorganic compounds) TWA 0.2 mg/m <sup>3</sup> (insoluble inorganic compounds) TWA 0.1 mg/m <sup>3</sup> (Nickel subsulfide)	Ca TWA 0.015 mg/m <sup>3</sup>	TWA 1 mg/m <sup>3</sup>	Ca [10 mg/m <sup>3</sup> (as Ni)]	inhalation, ingestion, skin and/or eye contact	Sensitization dermatitis, allergic asthma, pneumonitis; [potential occupational carcinogen]	Nasal cavities, lungs, skin	Metal: Lustrous, silvery, odorless solid. BP: 5139°F
Nitrobenzene	98-95-3	TWA 1 ppm	TWA 1 ppm (5 mg/m <sup>3</sup> ) [skin]	TWA 1 ppm (5 mg/m <sup>3</sup> ) [skin]	200 ppm	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, skin; anoxia; dermatitis; anemia; methemoglobinemia; in animals: liver, kidney damage; testicular effects	Eyes, skin, blood, liver, kidneys, cardiovascular system, reproductive system	Yellow, oily liquid with a pungent odor like paste shoe polish. BP: 411°F Fl.P: 190°F LEL(200°F): 1.8%
n-Propylbenzene	103-65-1	None established	None established	None established	None established	inhalation, ingestion, skin and/or eye contact	Harmful if swallowed, Irritation eyes, skin, digestive tract, respiratory tract, central nervous system	Eyes, skin, central nervous system, respiratory system	colorless or light yellow liquid BP: 159 C Fl.P: 47 C UEL: 6% LEL: 0.8%

**Table 1. Toxicological, Physical, and Chemical Properties of Compounds Potentially Present at 239 10th Avenue, New York, New York**

Compound	CAS #	ACGIH TLV	NIOSH REL	OSHA PEL	IDLH	Routes of Exposure	Toxic Properties	Target Organs	Physical/Chemical Properties
Petroleum hydrocarbons(Petroleum distillates)	8002-05-9	None established	TWA 350 mg/m <sup>3</sup> C 1800 mg/m <sup>3</sup> [15 min]	TWA 500 ppm (2000 mg/m <sup>3</sup> )	1,100 [10% LEL]	Inhalation; ingestion; skin and/or eye contact	Irritation eyes, skin, nose, throat; dizziness, drowsiness, headache, nausea; dried/cracked skin; chemical pneumonitis	CNS, eyes, respiratory system, skin	Colorless liquid with a gasoline or kerosene-like odor BP: 86-460°F Fl. Pt = -40 to -86°F UEL: 5.9% LEL: 1.1% Flammable liquid
Phenol	108-95-2	TWA 5 ppm	TWA 5 ppm (19 mg/m <sup>3</sup> ) C 15.6 ppm (60 mg/m <sup>3</sup> ) [15-minute] [skin]	TWA 5 ppm (19 mg/m <sup>3</sup> ) [skin]	250 ppm	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, nose, throat; anorexia, weight loss; lassitude (weakness, exhaustion), muscle ache, pain; dark urine; cyanosis; liver, kidney damage; skin burns; dermatitis; ochronosis; tremor, convulsions, twitching	Eyes, skin, respiratory system, liver, kidneys	Colorless to light-pink, crystalline solid with a sweet, acrid odor. BP: 359°F UEL: 8.6% LEL: 1.8%
p-Isopropyltoluene	99-87-6	None established	None established	None established	None established	inhalation, skin absorption, eye contact	Irritation skin	CNS, skin	Colorless, clear liquid, sweetish aromatic odor BP: 350.8°F Class III Flammable liquid
sec-Butylbenzene	135-98-8	None established	None established	None established	None established	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, skin, upper airway; central nervous system, headache, dizziness; gastrointestinal disturbance	Respiratory system, central nervous system, eyes, skin;	Colorless liquid BP: 344°F Fl.P: 126 °F UEL: 6.9% LEL: 0.8% Combustible liquid
Selenium	7782-49-2	TWA 0.2 mg/m <sup>3</sup>	TWA 0.2 mg/m <sup>3</sup>	TWA 0.2 mg/m <sup>3</sup>	1 mg/m <sup>3</sup> (as Se)	inhalation, ingestion, skin and/or eye contact	Irritation eyes, skin, nose, throat; visual disturbance; headache; chills, fever; dyspnea (breathing difficulty), bronchitis; metallic taste, garlic breath, gastrointestinal disturbance; dermatitis; eye, skin burns; in animals: anemia; liver necrosis, cirrhosis; kidney, spleen damage	Eyes, skin, respiratory system, liver, kidneys, blood, spleen	Amorphous or crystalline, red to gray solid. [Note: Occurs as an impurity in most sulfide ores.] BP: 1265°F
Silver	7440-22-4 (metal)	TWA 0.1 mg/m <sup>3</sup> (metal, dust, fumes) TWA 0.01 mg/m <sup>3</sup> (Soluble compounds, as Ag)	TWA 0.01 mg/m <sup>3</sup>	TWA 0.01 mg/m <sup>3</sup>	10 mg/m <sup>3</sup> (as Ag)	inhalation, ingestion, skin and/or eye contact	Blue-gray eyes, nasal septum, throat, skin; irritation, ulceration skin; gastrointestinal disturbance	Nasal septum, skin, eyes	Metal: White, lustrous solid BP: 3632°F
Slop Oil	69029-75-0	None established	None established	None established	None established	Inhalation; ingestion	Irritation eyes, skin, gastrointestinal tract	Eyes, skin, gastrointestinal tract	Clear light to dark amber liquid, with mild hydrocarbon odor. BP: >500°F Fl.P : 250°F
Sulfuric Acid	7664-93-9	TWA 0.2 mg/m <sup>3</sup>	TWA 1 mg/m <sup>3</sup>	TWA 1 mg/m <sup>3</sup>	15 mg/m <sup>3</sup>	inhalation, ingestion, skin and/or eye contact	Irritation eyes, skin, nose, throat; pulmonary edema, bronchitis; emphysema; conjunctivitis; stomatis; dental erosion; eye, skin burns; dermatitis	Eyes, skin, respiratory system, teeth	Colorless to dark-brown, oily, odorless liquid. BP: 554°F Noncombustible Liquid

**Table 1. Toxicological, Physical, and Chemical Properties of Compounds Potentially Present at 239 10th Avenue, New York, New York**

Compound	CAS #	ACGIH TLV	NIOSH REL	OSHA PEL	IDLH	Routes of Exposure	Toxic Properties	Target Organs	Physical/Chemical Properties
tert-Butylbenzene	98-06-6	None established	None established	None established	None established	inhalation, skin absorption, ingestion,	Eye and respiratory irritant; CNS depression; liver or kidney damage	Respiratory system, central nervous system, eyes, liver, kidney	Colorless liquid with an aromatic odor BP: 168 - 169 C Fl.P: 34 C UEL:5.6 % LEL: 0.8 %
Toluene	108-88-3	TWA 20 ppm	TWA 100 ppm (375 mg/m <sup>3</sup> ) STEL 150 ppm (560 mg/m <sup>3</sup> )	TWA 200 ppm C 300 ppm 500 ppm (10-minute maximum peak)	500 ppm	inhalation, skin absorption, ingestion, skin and/or eye contact	Irritation eyes, nose; lassitude (weakness, exhaustion), confusion, euphoria, dizziness, headache; dilated pupils, lacrimation (discharge of tears); anxiety, muscle fatigue, insomnia; paresthesia; dermatitis; liver, kidney damage	Eyes, skin, respiratory system, central nervous system, liver, kidneys	Colorless liquid with a sweet, pungent, benzene-like odor. BP: 232°F Fl.P: 40°F UEL: 7.1% LEL: 1.1% Class IB Flammable Liquid
Xylene (m, o & p isomers)	108-38-3, 95-47-6, 106-42-3	TWA 100 ppm (435 mg/m <sup>3</sup> ) STEL 150 ppm	TWA 100 ppm (435 mg/m <sup>3</sup> )	TWA 100 ppm (435 mg/m <sup>3</sup> )	900 ppm	Skin absorption, inhalation, ingestion, skin, and/or eye contact	Irritation eyes, skin, nose, throat; dizziness, excitement, drowsiness, incoordination, staggering gait; corneal vacuolization; anorexia, nausea, vomiting, abdominal pain; dermatitis	Eyes, skin, respiratory system, central nervous system, gastrointestinal tract, blood, liver, kidneys	Colorless liquid with an aromatic odor BP: 282°F, 292°F, 281°F Fl. Pt. 82°F, 90°F, 81°F LEL: 1.1%, 0.9%, 1.1% UEL: 7.0%, 6.7%, 7.0% Class C Flammable Liquid
Zinc	7440-66-6	TWA 10 mg/m3 (Inhalable fraction)	None established	TWA 10 mg/m3 (for zinc oxide fume)	None established	skin and/or eye contact, inhalation, ingestion	Irritation eyes, skin, respiratory tract; gastrointestinal disturbances	Eyes, skin, respiratory system	Bluish gray solid BP: 1664.6°F Flammable

Guide to Occupational Exposure Values. 2008. American Conference of Governmental Industrial Hygienists (ACGIH).  
NIOSH Pocket Guide to Chemical Hazards. 2005. Department of Health and Human Services, Centers for Disease Control and Prevention, National Institute for Occupational Safety and Health

**Abbreviations:**

ACGIH – American Conference of Governmental Industrial Hygienists. Eyes, skin, kidneys, liver, cen  
BP – boiling point at 1 atmosphere, °F  
C – Ceiling, is a concentration that should not be exceeded during and part of the working exposure.  
Ca - considered by NIOSH to be a potential occupational carcinogen  
CAS# Chemical Abstracts Service registry number which is unique for each chemical.  
Fl. Pt. – Flash point  
IDLH - Immediately Dangerous to Life and Health concentrations represent the maximum concentration from which, in the event of respirator failure, one could escape within 30 minutes without a respirator and without experiencing any escape-impairing or irreversible health effects.  
LEL – Lower explosive (flammable) limit in air, % by volume (at room temperature)  
mg/m<sup>3</sup> – Milligrams of substance per cubic meter of air  
NIOSH -National Institute for Occupational Safety and Health.  
OSHA – Occupational Safety and Health Administration  
PEL - OSHA Permissible Exposure Limit (usually) a time weighted average concentration that must not be exceeded during any 8 hour work shift of a 40 hr work week.  
ppm – parts per million  
REL – NIOSH Recommended Limit indicated a time weighted average concentration that must not be exceeded during any 10 hour work shift of a 40 hr work week  
STEL – Short-term exposure limit  
TLV -ACGIH Threshold Limit Values (usually 8 hour time weighted average concentrations). Irritation eyes, skin, respiratory system, CNS  
TWA – 8-hour, time-weighted average  
UEL – Upper explosive (flammable) limit in air, % by volume (at room temperature)

**TABLE 2**  
**ACTION LEVELS FOR WORKER BREATHING ZONE**

<b>Instrument</b>	<b>Action Level *</b>	<b>Level of Respiratory Protection/Action</b>
PID	0 to <5 ppm (one minute sustained)	Level D *
PID	>5 to <50 ppm (one minute sustained)	Utilize APR (Level C)
PID	>50 to <100 ppm (one minute sustained)	Level B
PID	>100 ppm	Stop work** (ventilate, apply foam)
CGI/H2S Meter	<5 ppm	Level D
CGI/H2S Meter	>5% to <25 ppm	Level B
CGI/H2S Meter	>25 ppm	Stop work**
CGI/CO Meter	>25 ppm	Level B
CGI/CO Meter	>50 ppm	Stop work** (ventilate area)
CGI/O2 Meter	<10% LEL, in excavation 19.5% oxygen – 23.5%	Level D Level D
CGI/O2 Meter	>10% LEL, in excavation <19.5% or >23.5% oxygen	Allow to vent, apply foam** Stop work, Oxygen Deficient or Enriched ATM**
CGI/CO Meter	>25 to <35 ppm (five minutes sustained) >35 ppm	Allow to vent ** (five minutes sustained) Stop work **

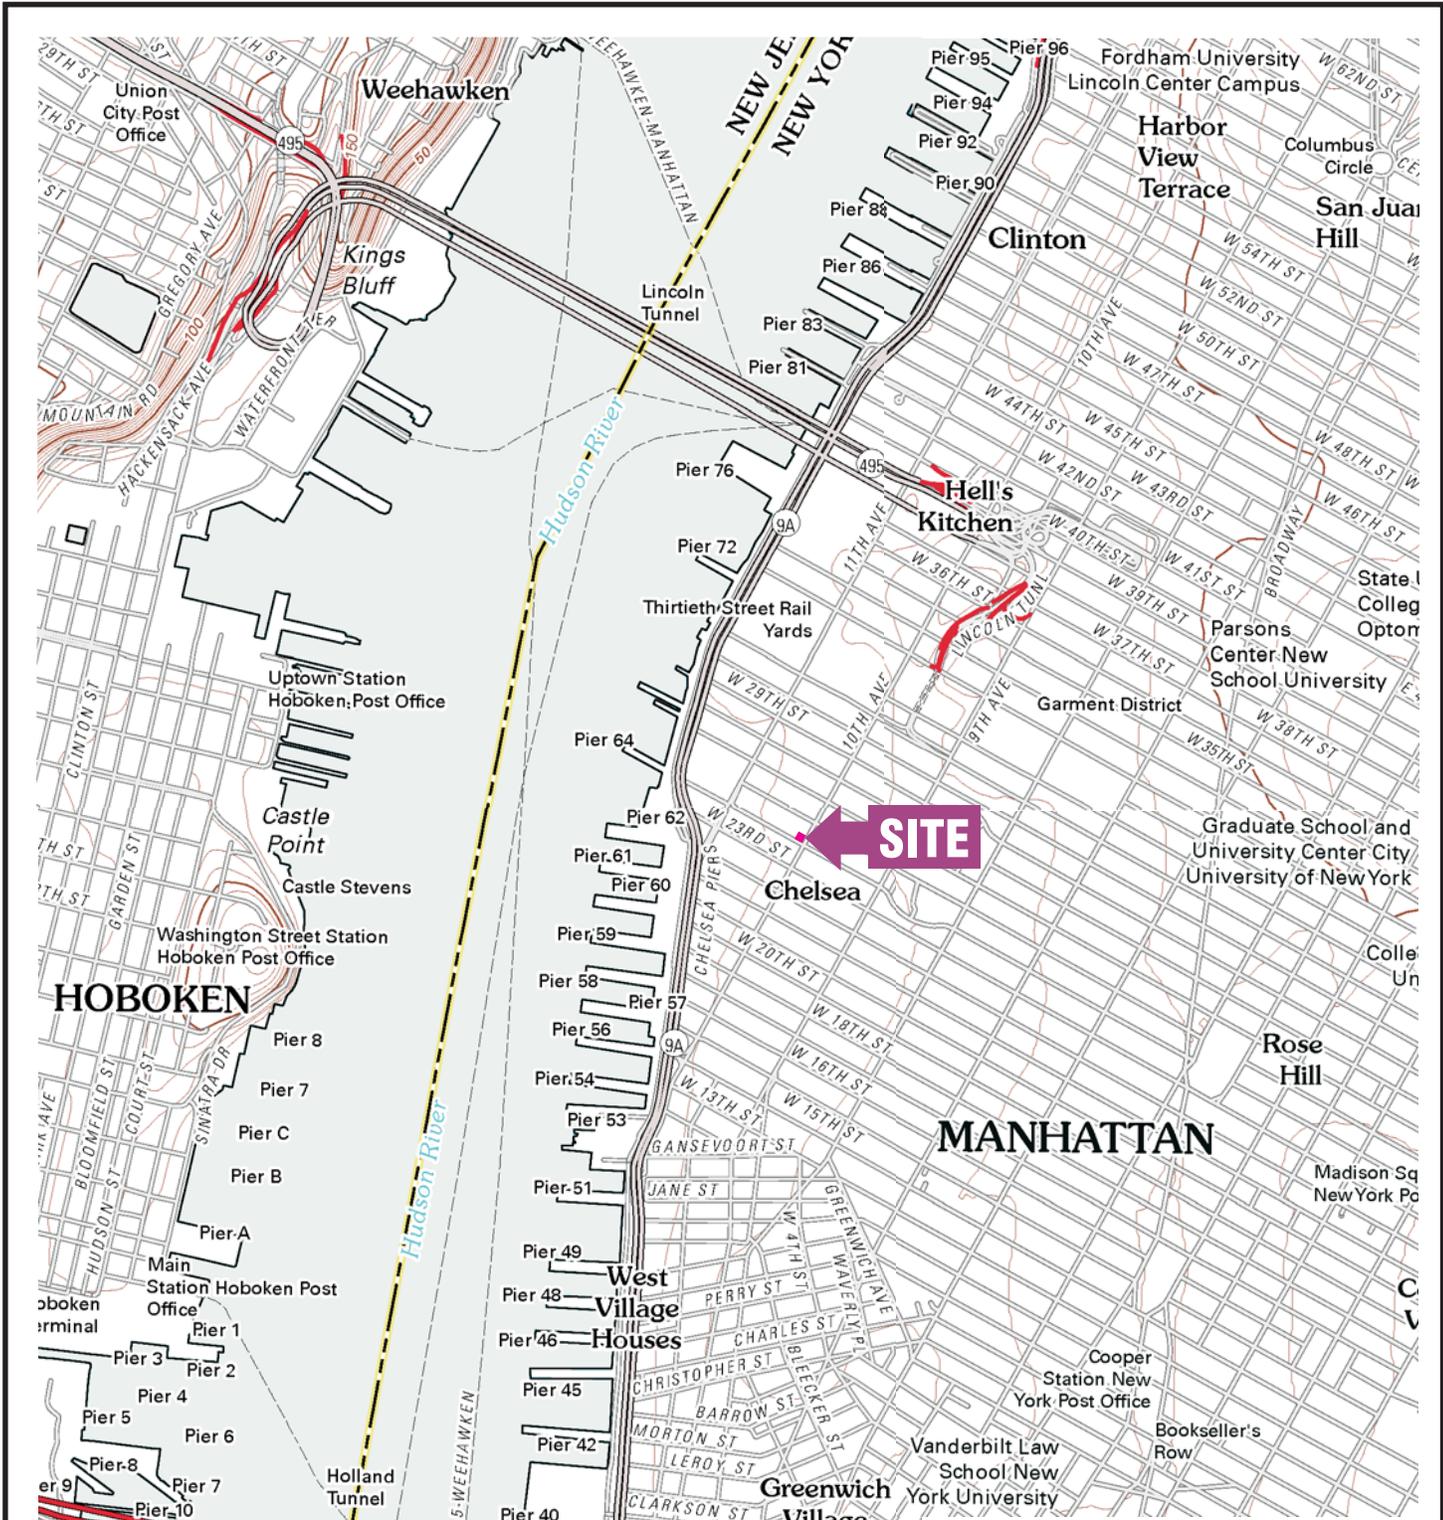

**Note:**

Action levels are based on above background levels.

\* Instrument readings will be taken in the breathing zone of the workers, unless otherwise indicated.

\*\* Suspend work in immediate area. Conduct air monitoring periodically to determine when work can continue. Implement mitigative measures.

# You Have a Right to a Safe and Healthful Workplace.

# IT'S THE LAW!

- You have the right to notify your employer or OSHA about workplace hazards. You may ask OSHA to keep your name confidential.
- You have the right to request an OSHA inspection if you believe that there are unsafe and unhealthful conditions in your workplace. You or your representative may participate in the inspection.
- You can file a complaint with OSHA within 30 days of discrimination by your employer for making safety and health complaints or for exercising your rights under the *OSH Act*.
- You have a right to see OSHA citations issued to your employer. Your employer must post the citations at or near the place of the alleged violation.
- Your employer must correct workplace hazards by the date indicated on the citation and must certify that these hazards have been reduced or eliminated.
- You have the right to copies of your medical records or records of your exposure to toxic and harmful substances or conditions.
- Your employer must post this notice in your workplace.

The *Occupational Safety and Health Act of 1970 (OSH Act)*, P.L. 91-596, assures safe and healthful working conditions for working men and women throughout the Nation. The Occupational Safety and Health Administration, in the U.S. Department of Labor, has the primary responsibility for administering the *OSH Act*. The rights listed here may vary depending on the particular circumstances. To file a complaint, report an emergency, or seek OSHA advice, assistance, or products, visit our website at [www.osha.gov](http://www.osha.gov) or call 1-800-321-OSHA or your nearest OSHA office:

Atlanta (404) 562-2300  
Denver (303) 844-1600  
San Francisco (415) 975-4310

Boston (617) 565-9860  
Kansas City (816) 426-5861  
Seattle (206) 553-5930

Chicago (312) 353-2220  
New York (212) 337-2378  
Teletypewriter (TTY) 1-877-889-5627

Dallas (214) 767-4731  
Philadelphia (215) 861-4900

If you work in a state operating under an OSHA-approved plan, your employer must post the required state equivalent of this poster.

## Material Safety Data Sheet Benzene MSDS

### Section 1: Chemical Product and Company Identification

**Product Name:** Benzene

**Catalog Codes:** SLB1564, SLB3055, SLB2881

**CAS#:** 71-43-2

**RTECS:** CY1400000

**TSCA:** TSCA 8(b) inventory: Benzene

**CI#:** Not available.

**Synonym:** Benzol; Benzine

**Chemical Name:** Benzene

**Chemical Formula:** C6-H6

**Contact Information:**

**Sciencelab.com, Inc.**

14025 Smith Rd.

Houston, Texas 77396

US Sales: **1-800-901-7247**

International Sales: **1-281-441-4400**

Order Online: [ScienceLab.com](http://ScienceLab.com)

**CHEMTREC (24HR Emergency Telephone), call:**

1-800-424-9300

**International CHEMTREC, call:** 1-703-527-3887

**For non-emergency assistance, call:** 1-281-441-4400

### Section 2: Composition and Information on Ingredients

**Composition:**

Name	CAS #	% by Weight
Benzene	71-43-2	100

**Toxicological Data on Ingredients:** Benzene: ORAL (LD50): Acute: 930 mg/kg [Rat]. 4700 mg/kg [Mouse]. DERMAL (LD50): Acute: >9400 mg/kg [Rabbit]. VAPOR (LC50): Acute: 10000 ppm 7 hours [Rat].

### Section 3: Hazards Identification

**Potential Acute Health Effects:**

Very hazardous in case of eye contact (irritant), of inhalation. Hazardous in case of skin contact (irritant, permeator), of ingestion. Inflammation of the eye is characterized by redness, watering, and itching.

**Potential Chronic Health Effects:**

**CARCINOGENIC EFFECTS:** Classified A1 (Confirmed for human.) by ACGIH, 1 (Proven for human.) by IARC. **MUTAGENIC EFFECTS:** Classified POSSIBLE for human. Mutagenic for mammalian somatic cells. Mutagenic for bacteria and/or yeast. **TERATOGENIC EFFECTS:** Not available. **DEVELOPMENTAL TOXICITY:** Classified Reproductive system/toxin/female [POSSIBLE]. The substance is toxic to blood, bone marrow, central nervous system (CNS). The substance may be toxic to liver, Urinary System. Repeated or prolonged exposure to the substance can produce target organs damage.

### Section 4: First Aid Measures

**Eye Contact:**

Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Cold water may be used. WARM water MUST be used. Get medical attention immediately.

**Skin Contact:**

In case of contact, immediately flush skin with plenty of water. Cover the irritated skin with an emollient. Remove contaminated clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention.

**Serious Skin Contact:**

Wash with a disinfectant soap and cover the contaminated skin with an anti-bacterial cream. Seek immediate medical attention.

**Inhalation:**

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention if symptoms appear.

**Serious Inhalation:**

Evacuate the victim to a safe area as soon as possible. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek medical attention.

**Ingestion:**

Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If large quantities of this material are swallowed, call a physician immediately. Loosen tight clothing such as a collar, tie, belt or waistband.

**Serious Ingestion:** Not available.

## Section 5: Fire and Explosion Data

**Flammability of the Product:** Flammable.

**Auto-Ignition Temperature:** 497.78°C (928°F)

**Flash Points:** CLOSED CUP: -11.1°C (12°F). (Setaflash)

**Flammable Limits:** LOWER: 1.2% UPPER: 7.8%

**Products of Combustion:** These products are carbon oxides (CO, CO<sub>2</sub>).

**Fire Hazards in Presence of Various Substances:**

Highly flammable in presence of open flames and sparks, of heat. Slightly flammable to flammable in presence of oxidizing materials. Non-flammable in presence of shocks.

**Explosion Hazards in Presence of Various Substances:**

Risks of explosion of the product in presence of mechanical impact: Not available. Risks of explosion of the product in presence of static discharge: Not available. Explosive in presence of oxidizing materials, of acids.

**Fire Fighting Media and Instructions:**

Flammable liquid, soluble or dispersed in water. SMALL FIRE: Use DRY chemical powder. LARGE FIRE: Use alcohol foam, water spray or fog.

**Special Remarks on Fire Hazards:**

Extremely flammable liquid and vapor. Vapor may cause flash fire. Reacts on contact with iodine heptafluoride gas. Dioxygenyl tetrafluoroborate is as very powerful oxidant. The addition of a small particle to small samples of benzene, at ambient temperature, causes ignition. Contact with sodium peroxide with benzene causes ignition. Benzene ignites in contact with powdered chromic anhydride. Vigorous or incandescent reaction with hydrogen + Raney nickel (above 210 C) and bromine trifluoride.

**Special Remarks on Explosion Hazards:**

Benzene vapors + chlorine and light causes explosion. Reacts explosively with bromine pentafluoride, chlorine, chlorine trifluoride, diborane, nitric acid, nitryl perchlorate, liquid oxygen, ozone, silver perchlorate. Benzene + pentafluoride and methoxide (from arsenic pentafluoride and potassium methoxide) in trichlorotrifluoroethane causes explosion. Interaction

of nitryl perchlorate with benzene gave a slight explosion and flash. The solution of permanganic acid ( or its explosive anhydride, dimanganese heptoxide) produced by interaction of permanganates and sulfuric acid will explode on contact with benzene. Peroxodisulfuric acid is a very powerful oxidant. Uncontrolled contact with benzene may cause explosion. Mixtures of peroxomonsulfuric acid with benzene explodes.

## Section 6: Accidental Release Measures

**Small Spill:** Absorb with an inert material and put the spilled material in an appropriate waste disposal.

**Large Spill:**

Flammable liquid. Keep away from heat. Keep away from sources of ignition. Stop leak if without risk. Absorb with DRY earth, sand or other non-combustible material. Do not touch spilled material. Prevent entry into sewers, basements or confined areas; dike if needed. Be careful that the product is not present at a concentration level above TLV. Check TLV on the MSDS and with local authorities.

## Section 7: Handling and Storage

**Precautions:**

Keep locked up.. Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not ingest. Do not breathe gas/fumes/ vapor/spray. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Avoid contact with skin and eyes. Keep away from incompatibles such as oxidizing agents, acids.

**Storage:**

Store in a segregated and approved area. Keep container in a cool, well-ventilated area. Keep container tightly closed and sealed until ready for use. Avoid all possible sources of ignition (spark or flame).

## Section 8: Exposure Controls/Personal Protection

**Engineering Controls:**

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash stations and safety showers are proximal to the work-station location.

**Personal Protection:**

Splash goggles. Lab coat. Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

**Personal Protection in Case of a Large Spill:**

Splash goggles. Full suit. Vapor respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

**Exposure Limits:**

TWA: 0.5 STEL: 2.5 (ppm) from ACGIH (TLV) [United States] TWA: 1.6 STEL: 8 (mg/m<sup>3</sup>) from ACGIH (TLV) [United States] TWA: 0.1 STEL: 1 from NIOSH TWA: 1 STEL: 5 (ppm) from OSHA (PEL) [United States] TWA: 10 (ppm) from OSHA (PEL) [United States] TWA: 3 (ppm) [United Kingdom (UK)] TWA: 1.6 (mg/m<sup>3</sup>) [United Kingdom (UK)] TWA: 1 (ppm) [Canada] TWA: 3.2 (mg/m<sup>3</sup>) [Canada] TWA: 0.5 (ppm) [Canada] Consult local authorities for acceptable exposure limits.

## Section 9: Physical and Chemical Properties

**Physical state and appearance:** Liquid.

**Odor:**

Aromatic. Gasoline-like, rather pleasant. (Strong.)

**Taste:** Not available.

**Molecular Weight:** 78.11 g/mole

**Color:** Clear Colorless. Colorless to light yellow.

**pH (1% soln/water):** Not available.

**Boiling Point:** 80.1 (176.2°F)

**Melting Point:** 5.5°C (41.9°F)

**Critical Temperature:** 288.9°C (552°F)

**Specific Gravity:** 0.8787 @ 15 C (Water = 1)

**Vapor Pressure:** 10 kPa (@ 20°C)

**Vapor Density:** 2.8 (Air = 1)

**Volatility:** Not available.

**Odor Threshold:** 4.68 ppm

**Water/Oil Dist. Coeff.:** The product is more soluble in oil;  $\log(\text{oil/water}) = 2.1$

**Ionicity (in Water):** Not available.

**Dispersion Properties:** See solubility in water, diethyl ether, acetone.

**Solubility:**

Miscible in alcohol, chloroform, carbon disulfide oils, carbon tetrachloride, glacial acetic acid, diethyl ether, acetone. Very slightly soluble in cold water.

## Section 10: Stability and Reactivity Data

**Stability:** The product is stable.

**Instability Temperature:** Not available.

**Conditions of Instability:** Heat, ignition sources, incompatibles.

**Incompatibility with various substances:** Highly reactive with oxidizing agents, acids.

**Corrosivity:** Non-corrosive in presence of glass.

**Special Remarks on Reactivity:**

Benzene vapors + chlorine and light causes explosion. Reacts explosively with bromine pentafluoride, chlorine, chlorine trifluoride, diborane, nitric acid, nitryl perchlorate, liquid oxygen, ozone, silver perchlorate. Benzene + pentafluoride and methoxide (from arsenic pentafluoride and potassium methoxide) in trichlorotrifluoroethane causes explosion. Interaction of nitryl perchlorate with benzene gave a slight explosion and flash. The solution of permanganic acid ( or its explosive anhydride, dimanganese heptoxide) produced by interaction of permanganates and sulfuric acid will explode on contact with benzene. Peroxodisulfuric acid is a very powerful oxidant. Uncontrolled contact with benzene may cause explosion. Mixtures of peroxomonsulfuric acid with benzene explodes.

**Special Remarks on Corrosivity:** Not available.

**Polymerization:** Will not occur.

## Section 11: Toxicological Information

**Routes of Entry:** Absorbed through skin. Dermal contact. Eye contact. Inhalation.

**Toxicity to Animals:**

WARNING: THE LC50 VALUES HEREUNDER ARE ESTIMATED ON THE BASIS OF A 4-HOUR EXPOSURE. Acute oral toxicity (LD50): 930 mg/kg [Rat]. Acute dermal toxicity (LD50): >9400 mg/kg [Rabbit]. Acute toxicity of the vapor (LC50): 10000 7 hours [Rat].

**Chronic Effects on Humans:**

**CARCINOGENIC EFFECTS:** Classified A1 (Confirmed for human.) by ACGIH, 1 (Proven for human.) by IARC. **MUTAGENIC EFFECTS:** Classified POSSIBLE for human. Mutagenic for mammalian somatic cells. Mutagenic for bacteria and/or yeast. **DEVELOPMENTAL TOXICITY:** Classified Reproductive system/toxin/female [POSSIBLE]. Causes damage to the following organs: blood, bone marrow, central nervous system (CNS). May cause damage to the following organs: liver, Urinary System.

**Other Toxic Effects on Humans:**

Very hazardous in case of inhalation. Hazardous in case of skin contact (irritant, permeator), of ingestion.

**Special Remarks on Toxicity to Animals:** Not available.

**Special Remarks on Chronic Effects on Humans:**

May cause adverse reproductive effects (female fertility, Embryotoxic and/or foetotoxic in animal) and birth defects. May affect genetic material (mutagenic). May cause cancer (tumorigenic, leukemia) Human: passes the placental barrier, detected in maternal milk.

**Special Remarks on other Toxic Effects on Humans:**

Acute Potential Health Effects: Skin: Causes skin irritation. It can be absorbed through intact skin and affect the liver, blood, metabolism, and urinary system. Eyes: Causes eye irritation. Inhalation: Causes respiratory tract and mucous membrane irritation. Can be absorbed through the lungs. May affect behavior/Central and Peripheral nervous systems (somnolence, muscle weakness, general anesthetic, and other symptoms similar to ingestion), gastrointestinal tract (nausea), blood metabolism, urinary system. Ingestion: May be harmful if swallowed. May cause gastrointestinal tract irritation including vomiting. May affect behavior/Central and Peripheral nervous systems (convulsions, seizures, tremor, irritability, initial CNS stimulation followed by depression, loss of coordination, dizziness, headache, weakness, pallor, flushing), respiration (breathlessness and chest constriction), cardiovascular system, (shallow/rapid pulse), and blood.

## Section 12: Ecological Information

**Ecotoxicity:** Not available.

**BOD5 and COD:** Not available.

**Products of Biodegradation:**

Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

**Toxicity of the Products of Biodegradation:** The products of degradation are less toxic than the product itself.

**Special Remarks on the Products of Biodegradation:** Not available.

## Section 13: Disposal Considerations

**Waste Disposal:**

Waste must be disposed of in accordance with federal, state and local environmental control regulations.

## Section 14: Transport Information

**DOT Classification:** CLASS 3: Flammable liquid.

**Identification:** : Benzene UNNA: 1114 PG: II

**Special Provisions for Transport:** Not available.

## Section 15: Other Regulatory Information

**Federal and State Regulations:**

California prop. 65: This product contains the following ingredients for which the State of California has found to cause cancer, birth defects or other reproductive harm, which would require a warning under the statute: Benzene California prop. 65 (no significant risk level): Benzene: 0.007 mg/day (value) California prop. 65: This product contains the following ingredients

for which the State of California has found to cause cancer which would require a warning under the statute: Benzene Connecticut carcinogen reporting list.: Benzene Connecticut hazardous material survey.: Benzene Illinois toxic substances disclosure to employee act: Benzene Illinois chemical safety act: Benzene New York release reporting list: Benzene Rhode Island RTK hazardous substances: Benzene Pennsylvania RTK: Benzene Minnesota: Benzene Michigan critical material: Benzene Massachusetts RTK: Benzene Massachusetts spill list: Benzene New Jersey: Benzene New Jersey spill list: Benzene Louisiana spill reporting: Benzene California Director's list of Hazardous Substances: Benzene TSCA 8(b) inventory: Benzene SARA 313 toxic chemical notification and release reporting: Benzene CERCLA: Hazardous substances.: Benzene: 10 lbs. (4.536 kg)

**Other Regulations:**

OSHA: Hazardous by definition of Hazard Communication Standard (29 CFR 1910.1200). EINECS: This product is on the European Inventory of Existing Commercial Chemical Substances.

**Other Classifications:**

**WHMIS (Canada):**

CLASS B-2: Flammable liquid with a flash point lower than 37.8°C (100°F). CLASS D-2A: Material causing other toxic effects (VERY TOXIC).

**DSCL (EEC):**

R11- Highly flammable. R22- Harmful if swallowed. R38- Irritating to skin. R41- Risk of serious damage to eyes. R45- May cause cancer. R62- Possible risk of impaired fertility. S2- Keep out of the reach of children. S26- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. S39- Wear eye/face protection. S46- If swallowed, seek medical advice immediately and show this container or label. S53- Avoid exposure - obtain special instructions before use.

## Material Safety Data Sheet Ethylbenzene MSDS

### Section 1: Chemical Product and Company Identification

**Product Name:** Ethylbenzene

**Catalog Codes:** SLE2044

**CAS#:** 100-41-4

**RTECS:** DA0700000

**TSCA:** TSCA 8(b) inventory: Ethylbenzene

**CI#:** Not available.

**Synonym:** Ethyl Benzene; Ethylbenzol; Phenylethane

**Chemical Name:** Ethylbenzene

**Chemical Formula:** C<sub>8</sub>H<sub>10</sub>

**Contact Information:**

**Sciencelab.com, Inc.**

14025 Smith Rd.

Houston, Texas 77396

US Sales: **1-800-901-7247**

International Sales: **1-281-441-4400**

Order Online: [ScienceLab.com](http://ScienceLab.com)

**CHEMTREC (24HR Emergency Telephone), call:**

1-800-424-9300

**International CHEMTREC, call:** 1-703-527-3887

**For non-emergency assistance, call:** 1-281-441-4400

### Section 2: Composition and Information on Ingredients

**Composition:**

Name	CAS #	% by Weight
Ethylbenzene	100-41-4	100

**Toxicological Data on Ingredients:** Ethylbenzene: ORAL (LD50): Acute: 3500 mg/kg [Rat].

### Section 3: Hazards Identification

**Potential Acute Health Effects:**

Hazardous in case of eye contact (irritant), of ingestion, of inhalation. Slightly hazardous in case of skin contact (irritant, permeator).

**Potential Chronic Health Effects:**

Slightly hazardous in case of skin contact (irritant, sensitizer). **CARCINOGENIC EFFECTS:** Classified 2B (Possible for human.) by IARC. **MUTAGENIC EFFECTS:** Mutagenic for mammalian somatic cells. Mutagenic for bacteria and/or yeast. **TERATOGENIC EFFECTS:** Not available. **DEVELOPMENTAL TOXICITY:** Not available. The substance may be toxic to central nervous system (CNS). Repeated or prolonged exposure to the substance can produce target organs damage.

### Section 4: First Aid Measures

**Eye Contact:**

Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Cold water may be used. WARM water MUST be used. Get medical attention.

**Skin Contact:** Wash with soap and water. Cover the irritated skin with an emollient. Get medical attention if irritation develops.

**Serious Skin Contact:** Not available.

**Inhalation:**

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

**Serious Inhalation:**

Evacuate the victim to a safe area as soon as possible. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If the victim is not breathing, perform mouth-to-mouth resuscitation. WARNING: It may be hazardous to the person providing aid to give mouth-to-mouth resuscitation when the inhaled material is toxic, infectious or corrosive. Seek medical attention.

**Ingestion:**

Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention if symptoms appear.

**Serious Ingestion:** Not available.

## Section 5: Fire and Explosion Data

**Flammability of the Product:** Flammable.

**Auto-Ignition Temperature:** 432°C (809.6°F)

**Flash Points:**

CLOSED CUP: 15°C (59°F). (Tagliabue.) OPEN CUP: 26.667°C (80°F) (Cleveland) (CHRIS, 2001) CLOSED CUP: 12.8 C (55 F) (Bingham et al, 2001; NIOSH, 2001) CLOSED CUP: 21 C (70 F) (NFPA)

**Flammable Limits:** LOWER: 0.8% - 1.6%UPPER: 6.7% - 7%

**Products of Combustion:** These products are carbon oxides (CO, CO<sub>2</sub>).

**Fire Hazards in Presence of Various Substances:** Highly flammable in presence of open flames and sparks, of heat.

**Explosion Hazards in Presence of Various Substances:**

Risks of explosion of the product in presence of mechanical impact: Not available. Risks of explosion of the product in presence of static discharge: Not available. Slightly explosive in presence of heat.

**Fire Fighting Media and Instructions:**

Flammable liquid, soluble or dispersed in water. SMALL FIRE: Use DRY chemical powder. LARGE FIRE: Use alcohol foam, water spray or fog.

**Special Remarks on Fire Hazards:**

Vapor may travel considerable distance to source of ignition and flash back. Vapors may form explosive mixtures with air. When heated to decomposition it emits acrid smoke and irritating fumes.

**Special Remarks on Explosion Hazards:** Vapors may form explosive mixtures in air.

## Section 6: Accidental Release Measures

**Small Spill:** Absorb with an inert material and put the spilled material in an appropriate waste disposal.

**Large Spill:**

Flammable liquid. Keep away from heat. Keep away from sources of ignition. Stop leak if without risk. Absorb with DRY earth, sand or other non-combustible material. Do not touch spilled material. Prevent entry into sewers, basements or confined areas; dike if needed. Be careful that the product is not present at a concentration level above TLV. Check TLV on the MSDS and with local authorities.

## Section 7: Handling and Storage

### Precautions:

Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not ingest. Do not breathe gas/fumes/ vapor/spray. Avoid contact with eyes. Wear suitable protective clothing. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Keep away from incompatibles such as oxidizing agents.

### Storage:

Store in a segregated and approved area. Keep container in a cool, well-ventilated area. Keep container tightly closed and sealed until ready for use. Avoid all possible sources of ignition (spark or flame). Sensitive to light. Store in light-resistant containers.

## Section 8: Exposure Controls/Personal Protection

### Engineering Controls:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash stations and safety showers are proximal to the work-station location.

### Personal Protection:

Splash goggles. Lab coat. Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

### Personal Protection in Case of a Large Spill:

Splash goggles. Full suit. Vapor respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

### Exposure Limits:

TWA: 100 STEL: 125 (ppm) from OSHA (PEL) [United States] TWA: 435 STEL: 545 from OSHA (PEL) [United States] TWA: 435 STEL: 545 (mg/m<sup>3</sup>) from NIOSH [United States] TWA: 100 STEL: 125 (ppm) from NIOSH [United States] TWA: 100 STEL: 125 (ppm) from ACGIH (TLV) [United States] TWA: 100 STEL: 125 (ppm) [United Kingdom (UK)] TWA: 100 STEL: 125 (ppm) [Belgium] TWA: 100 STEL: 125 (ppm) [Finland] TWA: 50 (ppm) [Norway] Consult local authorities for acceptable exposure limits.

## Section 9: Physical and Chemical Properties

**Physical state and appearance:** Liquid.

**Odor:** Sweetish. Gasoline-like. Aromatic.

**Taste:** Not available.

**Molecular Weight:** 106.16 g/mole

**Color:** Colorless.

**pH (1% soln/water):** Not available.

**Boiling Point:** 136°C (276.8°F)

**Melting Point:** -94.9 (-138.8°F)

**Critical Temperature:** 617.15°C (1142.9°F)

**Specific Gravity:** 0.867 (Water = 1)

**Vapor Pressure:** 0.9 kPa (@ 20°C)

**Vapor Density:** 3.66 (Air = 1)

**Volatility:** 100% (v/v).

**Odor Threshold:** 140 ppm

**Water/Oil Dist. Coeff.:** The product is more soluble in oil;  $\log(\text{oil/water}) = 3.1$

**Ionicity (in Water):** Not available.

**Dispersion Properties:** See solubility in water, diethyl ether.

**Solubility:**

Easily soluble in diethyl ether. Very slightly soluble in cold water or practically insoluble in water. Soluble in all proportions in Ethyl alcohol. Soluble in Carbon tetrachloride, Benzene. Insoluble in Ammonia. Slightly soluble in Chloroform. Solubility in Water: 169 mg/l @ 25 deg. C.; 0.014 g/100 ml @ 15 deg. C.

## Section 10: Stability and Reactivity Data

**Stability:** The product is stable.

**Instability Temperature:** Not available.

**Conditions of Instability:** Heat, ignition sources (flames, sparks, static), incompatible materials, light

**Incompatibility with various substances:** Reactive with oxidizing agents.

**Corrosivity:** Not considered to be corrosive for metals and glass.

**Special Remarks on Reactivity:**

Can react vigorously with oxidizing materials. Sensitive to light.

**Special Remarks on Corrosivity:** Not available.

**Polymerization:** Will not occur.

## Section 11: Toxicological Information

**Routes of Entry:** Absorbed through skin. Inhalation.

**Toxicity to Animals:** Acute oral toxicity (LD50): 3500 mg/kg [Rat].

**Chronic Effects on Humans:**

CARCINOGENIC EFFECTS: Classified 2B (Possible for human.) by IARC. MUTAGENIC EFFECTS: Mutagenic for mammalian somatic cells. Mutagenic for bacteria and/or yeast. May cause damage to the following organs: central nervous system (CNS).

**Other Toxic Effects on Humans:**

Hazardous in case of ingestion, of inhalation. Slightly hazardous in case of skin contact (irritant, permeator).

**Special Remarks on Toxicity to Animals:**

Lethal Dose/Conc 50% Kill: LD50 [Rabbit] - Route: Skin; Dose: 17800 ul/kg Lowest Published Lethal Dose/Conc: LDL[Rat] - Route: Inhalation (vapor); Dose: 4000 ppm/4 H

**Special Remarks on Chronic Effects on Humans:**

May cause adverse reproductive effects and birth defects (teratogenic) based on animal test data. May cause cancer based on animals data. IARC evidence for carcinogenicity in animals is sufficient. IARC evidence of carcinogenicity in humans inadequate. May affect genetic material (mutagenic).

**Special Remarks on other Toxic Effects on Humans:**

Acute Potential Health Effects: Skin: Can cause mild skin irritation. It can be absorbed through intact skin. Eyes: Contact with vapor or liquid can cause severe eye irritation depending on concentration. It may also cause conjunctivitis. At a vapor exposure level of 85 - 200 ppm, it is mildly and transiently irritating to the eyes; 1000 ppm causes further irritation and tearing; 2000 ppm results in immediate and severe irritation and tearing; 5,000 ppm is intolerable (ACGIH, 1991; Clayton and Clayton, 1994). Standard draize test for eye irritation using 500 mg resulted in severe irritation (RTECS) Inhalation: Exposure to high concentrations can cause nasal, mucous membrane and respiratory tract irritation and can also result in chest constriction and, trouble breathing, respiratory failure, and even death. It can also affect behavior/Central Nervous System. The effective dose for CNS depression in experimental animals was 10,000 ppm (ACGIH, 1991). Symptoms of CNS depression include

headache, nausea, weakness, dizziness, vertigo, irritability, fatigue, lightheadedness, sleepiness, tremor, loss of coordination, judgement and consciousness, coma, and death. It can also cause pulmonary edema. Inhalation of 85 ppm can produce fatigue, insomnia, headache, and mild irritation of the respiratory tract (Haley & Berndt, 1987). Ingestion: Do not drink, pipet or siphon by mouth. May cause gastrointestinal/digestive tract irritation with Abdominal pain, nausea, vomiting. Ethylbenzene is a pulmonary aspiration hazard. Pulmonary aspiration of even small amounts of the liquid may cause fatal pneumonitis. It may also affect behavior/central nervous system with

## Section 12: Ecological Information

### Ecotoxicity:

Ecotoxicity in water (LC50): 14 mg/l 96 hours [Fish (Trout)] (static). 12.1 mg/l 96 hours [Fish (Fathead Minnow)] (flow-through)]. 150 mg/l 96 hours [Fish (Blue Gill/Sunfish)] (static). 275 mg/l 96 hours [Fish (Sheepshead Minnow)]. 42.3 mg/l 96 hours [Fish (Fathead Minnow)](soft water). 87.6mg/l 96 hours [Shrimp].

**BOD5 and COD:** Not available.

### Products of Biodegradation:

Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

**Toxicity of the Products of Biodegradation:** The products of degradation are less toxic than the product itself.

**Special Remarks on the Products of Biodegradation:** Not available.

## Section 13: Disposal Considerations

### Waste Disposal:

Waste must be disposed of in accordance with federal, state and local environmental control regulations.

## Section 14: Transport Information

**DOT Classification:** CLASS 3: Flammable liquid.

**Identification:** : Ethylbenzene UNNA: 1175 PG: II

**Special Provisions for Transport:** Not available.

## Section 15: Other Regulatory Information

### Federal and State Regulations:

Connecticut hazardous material survey.: Ethylbenzene Illinois toxic substances disclosure to employee act: Ethylbenzene Illinois chemical safety act: Ethylbenzene New York release reporting list: Ethylbenzene Rhode Island RTK hazardous substances: Ethylbenzene Pennsylvania RTK: Ethylbenzene Minnesota: Ethylbenzene Massachusetts RTK: Ethylbenzene Massachusetts spill list: Ethylbenzene New Jersey: Ethylbenzene New Jersey spill list: Ethylbenzene Louisiana spill reporting: Ethylbenzene California Director's List of Hazardous Substances: Ethylbenzene TSCA 8(b) inventory: Ethylbenzene TSCA 4(a) proposed test rules: Ethylbenzene TSCA 8(d) H and S data reporting: Ethylbenzene: Effective Date: 6/19/87; Sunset Date: 6/19/97 SARA 313 toxic chemical notification and release reporting: Ethylbenzene

### Other Regulations:

OSHA: Hazardous by definition of Hazard Communication Standard (29 CFR 1910.1200). EINECS: This product is on the European Inventory of Existing Commercial Chemical Substances.

### Other Classifications:

### WHMIS (Canada):

### Section 2: Composition and Information on Ingredients

**Composition:**

Name	CAS #	% by Weight
Cumene	98-82-8	100

**Toxicological Data on Ingredients:** Cumene: ORAL (LD50): Acute: 1400 mg/kg [Rat]. 12750 mg/kg [Mouse]. DERMAL (LD50): Acute: 12300 mg/kg [Rabbit].

### Section 3: Hazards Identification

**Potential Acute Health Effects:**

Very hazardous in case of skin contact (irritant, permeator), of eye contact (irritant), of ingestion, of inhalation. Inflammation of the eye is characterized by redness, watering, and itching. Skin inflammation is characterized by itching, scaling, reddening, or, occasionally, blistering.

**Potential Chronic Health Effects:**

Very hazardous in case of skin contact (permeator). CARCINOGENIC EFFECTS: Not available. MUTAGENIC EFFECTS: Not available. TERATOGENIC EFFECTS: Not available. DEVELOPMENTAL TOXICITY: Not available. The substance is toxic to lungs, the nervous system, mucous membranes. Repeated or prolonged exposure to the substance can produce target organs damage.

### Section 4: First Aid Measures

**Eye Contact:**

Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Cold water may be used. Do not use an eye ointment. Seek medical attention.

**Skin Contact:**

After contact with skin, wash immediately with plenty of water. Gently and thoroughly wash the contaminated skin with running water and non-abrasive soap. Be particularly careful to clean folds, crevices, creases and groin. Cover the irritated skin with an emollient. If irritation persists, seek medical attention. Wash contaminated clothing before reusing.

**Serious Skin Contact:**

Wash with a disinfectant soap and cover the contaminated skin with an anti-bacterial cream. Seek immediate medical attention.

**Inhalation:** Allow the victim to rest in a well ventilated area. Seek immediate medical attention.

**Serious Inhalation:**

Evacuate the victim to a safe area as soon as possible. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek medical attention.

**Ingestion:**

Do not induce vomiting. Examine the lips and mouth to ascertain whether the tissues are damaged, a possible indication that the toxic material was ingested; the absence of such signs, however, is not conclusive. Loosen tight clothing such as a collar, tie, belt or waistband. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek immediate medical attention.

**Serious Ingestion:** Not available.

## Section 5: Fire and Explosion Data

**Flammability of the Product:** Flammable.

**Auto-Ignition Temperature:** 424°C (795.2°F)

**Flash Points:** CLOSED CUP: 36°C (96.8°F). OPEN CUP: 44°C (111.2°F).

**Flammable Limits:** LOWER: 0.9% UPPER: 6.5%

**Products of Combustion:** These products are carbon oxides (CO, CO<sub>2</sub>).

**Fire Hazards in Presence of Various Substances:** Flammable in presence of open flames and sparks.

**Explosion Hazards in Presence of Various Substances:**

Risks of explosion of the product in presence of mechanical impact: Not available. Risks of explosion of the product in presence of static discharge: Not available.

**Fire Fighting Media and Instructions:**

Flammable liquid, soluble or dispersed in water. SMALL FIRE: Use DRY chemical powder. LARGE FIRE: Use alcohol foam, water spray or fog. Cool containing vessels with water jet in order to prevent pressure build-up, autoignition or explosion.

**Special Remarks on Fire Hazards:** Not available.

**Special Remarks on Explosion Hazards:** Not available.

## Section 6: Accidental Release Measures

**Small Spill:** Absorb with an inert material and put the spilled material in an appropriate waste disposal.

**Large Spill:**

Flammable liquid. Keep away from heat. Keep away from sources of ignition. Stop leak if without risk. Absorb with DRY earth, sand or other non-combustible material. Do not touch spilled material. Prevent entry into sewers, basements or confined areas; dike if needed. Eliminate all ignition sources. Be careful that the product is not present at a concentration level above TLV. Check TLV on the MSDS and with local authorities.

## Section 7: Handling and Storage

### Precautions:

Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not ingest. Do not breathe gas/fumes/ vapour/spray. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Avoid contact with skin and eyes.

### Storage:

Flammable materials should be stored in a separate safety storage cabinet or room. Keep away from heat. Keep away from sources of ignition. Keep container tightly closed. Keep in a cool, well-ventilated place. Ground all equipment containing material. A refrigerated room would be preferable for materials with a flash point lower than 37.8°C (100°F).

## Section 8: Exposure Controls/Personal Protection

### Engineering Controls:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash stations and safety showers are proximal to the work-station location.

### Personal Protection:

Splash goggles. Lab coat. Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

### Personal Protection in Case of a Large Spill:

Splash goggles. Full suit. Vapor respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

### Exposure Limits:

TWA: 50 CEIL: 75 (ppm) TWA: 245 CEIL: 365 (mg/m<sup>3</sup>) Consult local authorities for acceptable exposure limits.

## Section 9: Physical and Chemical Properties

**Physical state and appearance:** Liquid.

**Odor:** Not available.

**Taste:** Not available.

**Molecular Weight:** 120.2 g/mole

**Color:** Clear Colorless.

**pH (1% soln/water):** Not available.

**Boiling Point:** 152.4°C (306.3°F)

**Melting Point:** -96°C (-140.8°F)

**Critical Temperature:** Not available.

**Specific Gravity:** 0.862 (Water = 1)

**Vapor Pressure:** 8 mm of Hg (@ 20°C)

**Vapor Density:** 4.14 (Air = 1)

**Volatility:** Not available.

**Odor Threshold:** 1.2 ppm

**Water/Oil Dist. Coeff.:** The product is more soluble in oil; log(oil/water) = 3.7

**Ionicity (in Water):** Not available.

**Dispersion Properties:** Not available.

**Solubility:** Very slightly soluble in cold water.

### Section 10: Stability and Reactivity Data

**Stability:** The product is stable.

**Instability Temperature:** Not available.

**Conditions of Instability:** Not available.

**Incompatibility with various substances:** Not available.

**Corrosivity:** Non-corrosive in presence of glass.

**Special Remarks on Reactivity:** Not available.

**Special Remarks on Corrosivity:** Not available.

**Polymerization:** No.

### Section 11: Toxicological Information

**Routes of Entry:** Dermal contact. Eye contact. Inhalation. Ingestion.

**Toxicity to Animals:**

Acute oral toxicity (LD50): 1400 mg/kg [Rat]. Acute dermal toxicity (LD50): 12300 mg/kg [Rabbit].

**Chronic Effects on Humans:** The substance is toxic to lungs, the nervous system, mucous membranes.

**Other Toxic Effects on Humans:** Very hazardous in case of skin contact (irritant, permeator), of ingestion, of inhalation.

**Special Remarks on Toxicity to Animals:** Not available.

**Special Remarks on Chronic Effects on Humans:** Not available.

**Special Remarks on other Toxic Effects on Humans:** Not available.

### Section 12: Ecological Information

**Ecotoxicity:** Not available.

**BOD5 and COD:** Not available.

**Products of Biodegradation:**

Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

**Toxicity of the Products of Biodegradation:** The products of degradation are more toxic.

**Special Remarks on the Products of Biodegradation:** Not available.

### Section 13: Disposal Considerations

**Waste Disposal:**

### Section 14: Transport Information

**DOT Classification:** Class 3: Flammable liquid.

**Identification:** : Isopropylbenzene : UN1918 PG: III

## Section 15: Other Regulatory Information

### Federal and State Regulations:

Pennsylvania RTK: Cumene Massachusetts RTK: Cumene TSCA 8(b) inventory: Cumene SARA 313 toxic chemical notification and release reporting: Cumene CERCLA: Hazardous substances.: Cumene

**Other Regulations:** OSHA: Hazardous by definition of Hazard Communication Standard (29 CFR 1910.1200).

### Other Classifications:

#### WHMIS (Canada):

CLASS B-3: Combustible liquid with a flash point between 37.8°C (100°F) and 93.3°C (200°F).

#### DSCL (EEC):

R10- Flammable. R22- Harmful if swallowed. R38- Irritating to skin. R41- Risk of serious damage to eyes.

#### HMIS (U.S.A.):

**Health Hazard:** 2

**Fire Hazard:** 3

**Reactivity:** 0

**Personal Protection:** h

#### National Fire Protection Association (U.S.A.):

**Health:** 2

**Flammability:** 3

**Reactivity:** 1

**Specific hazard:**

#### Protective Equipment:

Gloves. Lab coat. Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Wear appropriate respirator when ventilation is inadequate. Splash goggles.

## Section 16: Other Information

## Material Safety Data Sheet

### Methyl tert-butyl ether MSDS

#### Section 1: Chemical Product and Company Identification

**Product Name:** Methyl tert-butyl ether

**Catalog Codes:** SLM2152

**CAS#:** 1634-04-4

**RTECS:** KN5250000

**TSCA:** TSCA 8(b) inventory: Methyl tert-butyl ether

**CI#:** Not available.

**Synonym:**

**Chemical Name:** Methyl tert-Butyl Ether

**Chemical Formula:** C5-H12-O

**Contact Information:**

**Sciencelab.com, Inc.**

14025 Smith Rd.

Houston, Texas 77396

US Sales: **1-800-901-7247**

International Sales: **1-281-441-4400**

Order Online: [ScienceLab.com](http://ScienceLab.com)

**CHEMTREC (24HR Emergency Telephone), call:**

1-800-424-9300

**International CHEMTREC, call:** 1-703-527-3887

**For non-emergency assistance, call:** 1-281-441-4400

#### Section 2: Composition and Information on Ingredients

**Composition:**

Name	CAS #	% by Weight
Methyl {tert-}butyl ether	1634-04-4	100

**Toxicological Data on Ingredients:** Methyl tert-butyl ether: ORAL (LD50): Acute: 4000 mg/kg [Rat]. 5960 mg/kg [Mouse]. VAPOR (LC50): Acute: 23576 ppm 4 hour(s) [Rat].

#### Section 3: Hazards Identification

**Potential Acute Health Effects:**

Extremely hazardous in case of eye contact (irritant), of ingestion. Very hazardous in case of skin contact (irritant), of inhalation. Hazardous in case of skin contact (permeator). Inflammation of the eye is characterized by redness, watering, and itching. Skin inflammation is characterized by itching, scaling, reddening, or, occasionally, blistering.

**Potential Chronic Health Effects:**

Extremely hazardous in case of eye contact (irritant), of ingestion. Very hazardous in case of skin contact (irritant), of inhalation. Hazardous in case of skin contact (permeator). CARCINOGENIC EFFECTS: Not available. MUTAGENIC EFFECTS: Not available. TERATOGENIC EFFECTS: Not available. DEVELOPMENTAL TOXICITY: Not available. The substance is toxic to lungs, the nervous system, mucous membranes. Repeated or prolonged exposure to the substance can produce target organs damage. Repeated or prolonged inhalation of vapors may lead to chronic respiratory irritation.

#### Section 4: First Aid Measures

**Eye Contact:**

Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Cold water may be used. Do not use an eye ointment. Seek medical attention.

**Skin Contact:**

After contact with skin, wash immediately with plenty of water. Gently and thoroughly wash the contaminated skin with running water and non-abrasive soap. Be particularly careful to clean folds, crevices, creases and groin. Cold water may be used. Cover the irritated skin with an emollient. If irritation persists, seek medical attention. Wash contaminated clothing before reusing.

**Serious Skin Contact:**

Wash with a disinfectant soap and cover the contaminated skin with an anti-bacterial cream. Seek medical attention.

**Inhalation:** Allow the victim to rest in a well ventilated area. Seek immediate medical attention.

**Serious Inhalation:**

Evacuate the victim to a safe area as soon as possible. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek medical attention.

**Ingestion:**

Do not induce vomiting. Loosen tight clothing such as a collar, tie, belt or waistband. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek immediate medical attention.

**Serious Ingestion:** Not available.

## Section 5: Fire and Explosion Data

**Flammability of the Product:** Flammable.

**Auto-Ignition Temperature:** 224°C (435.2°F)

**Flash Points:** CLOSED CUP: -28°C (-18.4°F).

**Flammable Limits:** LOWER: 2.5% UPPER: 15.1%

**Products of Combustion:** These products are carbon oxides (CO, CO<sub>2</sub>).

**Fire Hazards in Presence of Various Substances:** Flammable in presence of open flames and sparks.

**Explosion Hazards in Presence of Various Substances:**

Risks of explosion of the product in presence of mechanical impact: Not available. Risks of explosion of the product in presence of static discharge: Not available.

**Fire Fighting Media and Instructions:**

Flammable liquid, soluble or dispersed in water. SMALL FIRE: Use DRY chemical powder. LARGE FIRE: Use alcohol foam, water spray or fog.

**Special Remarks on Fire Hazards:** Not available.

**Special Remarks on Explosion Hazards:** Not available.

## Section 6: Accidental Release Measures

**Small Spill:**

Dilute with water and mop up, or absorb with an inert dry material and place in an appropriate waste disposal container.

**Large Spill:**

Flammable liquid. Keep away from heat. Keep away from sources of ignition. Stop leak if without risk. Absorb with DRY earth, sand or other non-combustible material. Do not touch spilled material. Prevent entry into sewers, basements or confined areas; dike if needed. Eliminate all ignition sources.

## Section 7: Handling and Storage

### Precautions:

Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not ingest. Do not breathe gas/fumes/ vapour/spray. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Avoid contact with skin and eyes.

### Storage:

Flammable materials should be stored in a separate safety storage cabinet or room. Keep away from heat. Keep away from sources of ignition. Keep container tightly closed. Keep in a cool, well-ventilated place. Ground all equipment containing material. A refrigerated room would be preferable for materials with a flash point lower than 37.8°C (100°F).

## Section 8: Exposure Controls/Personal Protection

### Engineering Controls:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash stations and safety showers are proximal to the work-station location.

### Personal Protection:

Splash goggles. Lab coat. Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

### Personal Protection in Case of a Large Spill:

Splash goggles. Full suit. Vapor respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

**Exposure Limits:** Not available.

## Section 9: Physical and Chemical Properties

**Physical state and appearance:** Liquid.

**Odor:** Characteristic. (Strong.)

**Taste:** Not available.

**Molecular Weight:** 88.15 g/mole

**Color:** Clear Colorless.

**pH (1% soln/water):** Not available.

**Boiling Point:** 55.2°C (131.4°F)

**Melting Point:** -109°C (-164.2°F)

**Critical Temperature:** Not available.

**Specific Gravity:** 0.7405 (Water = 1)

**Vapor Pressure:** 245 mm of Hg (@ 20°C)

**Vapor Density:** 3.1 (Air = 1)

**Volatility:** 100% (v/v).

**Odor Threshold:** Not available.

**Water/Oil Dist. Coeff.:** Not available.

**Ionicity (in Water):** Not available.

**Dispersion Properties:** See solubility in water, methanol, diethyl ether.

**Solubility:**

Soluble in methanol, diethyl ether. Partially soluble in cold water.

### Section 10: Stability and Reactivity Data

**Stability:** The product is stable.

**Instability Temperature:** Not available.

**Conditions of Instability:** Not available.

**Incompatibility with various substances:** Not available.

**Corrosivity:** Non-corrosive in presence of glass.

**Special Remarks on Reactivity:** Not available.

**Special Remarks on Corrosivity:** Not available.

**Polymerization:** No.

### Section 11: Toxicological Information

**Routes of Entry:** Dermal contact. Eye contact. Inhalation. Ingestion.

**Toxicity to Animals:**

WARNING: THE LC50 VALUES HEREUNDER ARE ESTIMATED ON THE BASIS OF A 4-HOUR EXPOSURE. Acute oral toxicity (LD50): 4000 mg/kg [Rat]. Acute toxicity of the vapor (LC50): 23576 ppm 4 hour(s) [Rat].

**Chronic Effects on Humans:** The substance is toxic to lungs, the nervous system, mucous membranes.

**Other Toxic Effects on Humans:**

Extremely hazardous in case of ingestion. Very hazardous in case of skin contact (irritant), of inhalation. Hazardous in case of skin contact (permeator).

**Special Remarks on Toxicity to Animals:** Not available.

**Special Remarks on Chronic Effects on Humans:** Not available.

**Special Remarks on other Toxic Effects on Humans:** Not available.

### Section 12: Ecological Information

**Ecotoxicity:** Not available.

**BOD5 and COD:** Not available.

**Products of Biodegradation:**

Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

## Material Safety Data Sheet Naphthalene MSDS

### Section 1: Chemical Product and Company Identification

**Product Name:** Naphthalene

**Catalog Codes:** SLN1789, SLN2401

**CAS#:** 91-20-3

**RTECS:** QJ0525000

**TSCA:** TSCA 8(b) inventory: Naphthalene

**CI#:** Not available.

**Synonym:**

**Chemical Name:** Not available.

**Chemical Formula:** C<sub>10</sub>H<sub>8</sub>

**Contact Information:**

**Sciencelab.com, Inc.**

14025 Smith Rd.

Houston, Texas 77396

US Sales: **1-800-901-7247**

International Sales: **1-281-441-4400**

Order Online: [ScienceLab.com](http://ScienceLab.com)

**CHEMTREC (24HR Emergency Telephone), call:**

1-800-424-9300

**International CHEMTREC, call:** 1-703-527-3887

**For non-emergency assistance, call:** 1-281-441-4400

### Section 2: Composition and Information on Ingredients

**Composition:**

Name	CAS #	% by Weight
Naphthalene	91-20-3	100

**Toxicological Data on Ingredients:** Naphthalene: ORAL (LD50): Acute: 490 mg/kg [Rat]. 533 mg/kg [Mouse]. 1200 mg/kg [Guinea pig]. DERMAL (LD50): Acute: 20001 mg/kg [Rabbit]. VAPOR (LC50): Acute: 170 ppm 4 hour(s) [Rat].

### Section 3: Hazards Identification

**Potential Acute Health Effects:**

Very hazardous in case of ingestion. Hazardous in case of eye contact (irritant), of inhalation. Slightly hazardous in case of skin contact (irritant, permeator). Severe over-exposure can result in death.

**Potential Chronic Health Effects:**

CARCINOGENIC EFFECTS: A4 (Not classifiable for human or animal.) by ACGIH. MUTAGENIC EFFECTS: Not available. TERATOGENIC EFFECTS: Not available. DEVELOPMENTAL TOXICITY: Classified Development toxin [POSSIBLE]. The substance is toxic to blood, kidneys, the nervous system, the reproductive system, liver, mucous membranes, gastrointestinal tract, upper respiratory tract, central nervous system (CNS). Repeated or prolonged exposure to the substance can produce target organs damage. Repeated exposure to an highly toxic material may produce general deterioration of health by an accumulation in one or many human organs.

### Section 4: First Aid Measures

**Eye Contact:**

Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Cold water may be used. Do not use an eye ointment. Seek medical attention.

**Skin Contact:**

After contact with skin, wash immediately with plenty of water. Gently and thoroughly wash the contaminated skin with running water and non-abrasive soap. Be particularly careful to clean folds, crevices, creases and groin. Cover the irritated skin with an emollient. If irritation persists, seek medical attention. Wash contaminated clothing before reusing.

**Serious Skin Contact:** Not available.

**Inhalation:** Allow the victim to rest in a well ventilated area. Seek immediate medical attention.

**Serious Inhalation:**

Evacuate the victim to a safe area as soon as possible. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If the victim is not breathing, perform mouth-to-mouth resuscitation. **WARNING:** It may be hazardous to the person providing aid to give mouth-to-mouth resuscitation when the inhaled material is toxic, infectious or corrosive. Seek immediate medical attention.

**Ingestion:**

Do not induce vomiting. Examine the lips and mouth to ascertain whether the tissues are damaged, a possible indication that the toxic material was ingested; the absence of such signs, however, is not conclusive. Loosen tight clothing such as a collar, tie, belt or waistband. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek immediate medical attention.

**Serious Ingestion:** Not available.

## Section 5: Fire and Explosion Data

**Flammability of the Product:** Flammable.

**Auto-Ignition Temperature:** 567°C (1052.6°F)

**Flash Points:** CLOSED CUP: 88°C (190.4°F). OPEN CUP: 79°C (174.2°F).

**Flammable Limits:** LOWER: 0.9% UPPER: 5.9%

**Products of Combustion:** These products are carbon oxides (CO, CO<sub>2</sub>).

**Fire Hazards in Presence of Various Substances:** Not available.

**Explosion Hazards in Presence of Various Substances:**

Risks of explosion of the product in presence of mechanical impact: Not available. Risks of explosion of the product in presence of static discharge: Not available.

**Fire Fighting Media and Instructions:**

Flammable solid. **SMALL FIRE:** Use DRY chemical powder. **LARGE FIRE:** Use water spray or fog. Cool containing vessels with water jet in order to prevent pressure build-up, autoignition or explosion.

**Special Remarks on Fire Hazards:** Not available.

**Special Remarks on Explosion Hazards:** Not available.

## Section 6: Accidental Release Measures

**Small Spill:** Use appropriate tools to put the spilled solid in a convenient waste disposal container.

**Large Spill:**

Flammable solid. Stop leak if without risk. Do not touch spilled material. Use water spray curtain to divert vapor drift. Prevent entry into sewers, basements or confined areas; dike if needed. Eliminate all ignition sources. Call for assistance on disposal. Be careful that the product is not present at a concentration level above TLV. Check TLV on the MSDS and with local authorities.

## Section 7: Handling and Storage

### Precautions:

Keep locked up Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not ingest. Do not breathe dust. Avoid contact with eyes Wear suitable protective clothing In case of insufficient ventilation, wear suitable respiratory equipment If ingested, seek medical advice immediately and show the container or the label. Keep away from incompatibles such as oxidizing agents.

### Storage:

Flammable materials should be stored in a separate safety storage cabinet or room. Keep away from heat. Keep away from sources of ignition. Keep container tightly closed. Keep in a cool, well-ventilated place. Ground all equipment containing material. Keep container dry. Keep in a cool place.

## Section 8: Exposure Controls/Personal Protection

### Engineering Controls:

Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

### Personal Protection:

Splash goggles. Lab coat. Dust respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

### Personal Protection in Case of a Large Spill:

Splash goggles. Full suit. Dust respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

### Exposure Limits:

Israel: TWA: 10 (ppm) STEL: 15 (ppm) from ACGIH (TLV) [1995] TWA: 52 STEL: 79 (mg/m3) from ACGIH [1995]  
Australia: STEL: 15 (ppm) Consult local authorities for acceptable exposure limits.

## Section 9: Physical and Chemical Properties

**Physical state and appearance:** Solid. (Crystalline solid.)

**Odor:** Aromatic.

**Taste:** Not available.

**Molecular Weight:** 128.19 g/mole

**Color:** White.

**pH (1% soln/water):** Not available.

**Boiling Point:** 218°C (424.4°F)

**Melting Point:** 80.2°C (176.4°F)

**Critical Temperature:** Not available.

**Specific Gravity:** 1.162 (Water = 1)

**Vapor Pressure:** Not applicable.

**Vapor Density:** 4.4 (Air = 1)

**Volatility:** Not available.

**Odor Threshold:** 0.038 ppm

**Water/Oil Dist. Coeff.:** Not available.

**Ionicity (in Water):** Not available.

**Dispersion Properties:**

Partially dispersed in hot water, methanol, n-octanol. Very slightly dispersed in cold water. See solubility in methanol, n-octanol.

**Solubility:**

Partially soluble in methanol, n-octanol. Very slightly soluble in cold water, hot water.

### Section 10: Stability and Reactivity Data

**Stability:** The product is stable.

**Instability Temperature:** Not available.

**Conditions of Instability:** Not available.

**Incompatibility with various substances:** Highly reactive with oxidizing agents.

**Corrosivity:** Non-corrosive in presence of glass.

**Special Remarks on Reactivity:** Not available.

**Special Remarks on Corrosivity:** May attack some forms of rubber and plastic

**Polymerization:** No.

### Section 11: Toxicological Information

**Routes of Entry:** Absorbed through skin. Dermal contact. Eye contact. Inhalation. Ingestion.

**Toxicity to Animals:**

WARNING: THE LC50 VALUES HEREUNDER ARE ESTIMATED ON THE BASIS OF A 4-HOUR EXPOSURE. Acute oral toxicity (LD50): 490 mg/kg [Rat]. Acute dermal toxicity (LD50): 20001 mg/kg [Rabbit]. Acute toxicity of the vapor (LC50): 170 ppm 4 hour(s) [Rat].

**Chronic Effects on Humans:**

CARCINOGENIC EFFECTS: A4 (Not classifiable for human or animal.) by ACGIH. DEVELOPMENTAL TOXICITY: Classified Development toxin [POSSIBLE]. The substance is toxic to blood, kidneys, the nervous system, the reproductive system, liver, mucous membranes, gastrointestinal tract, upper respiratory tract, central nervous system (CNS).

**Other Toxic Effects on Humans:**

Very hazardous in case of ingestion. Hazardous in case of inhalation. Slightly hazardous in case of skin contact (irritant, permeator).

**Special Remarks on Toxicity to Animals:** Not available.

**Special Remarks on Chronic Effects on Humans:** Not available.

**Special Remarks on other Toxic Effects on Humans:** Not available.

### Section 12: Ecological Information

**Ecotoxicity:** Ecotoxicity in water (LC50): 305.2 ppm 96 hour(s) [Trout].

**BOD5 and COD:** Not available.

**Products of Biodegradation:**

Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

**Toxicity of the Products of Biodegradation:** The products of degradation are more toxic.

**Special Remarks on the Products of Biodegradation:** Not available.

### Section 13: Disposal Considerations

**Waste Disposal:**

### Section 14: Transport Information

**DOT Classification:** CLASS 4.1: Flammable solid.

**Identification:** : Naphthalene, refined : UN1334 PG: III

**Special Provisions for Transport:** Marine Pollutant

### Section 15: Other Regulatory Information

**Federal and State Regulations:**

Rhode Island RTK hazardous substances: Naphthalene Pennsylvania RTK: Naphthalene Florida: Naphthalene Minnesota: Naphthalene Massachusetts RTK: Naphthalene TSCA 8(b) inventory: Naphthalene TSCA 8(a) PAIR: Naphthalene TSCA 8(d) H and S data reporting: Naphthalene: 06/01/87 SARA 313 toxic chemical notification and release reporting: Naphthalene: 1% CERCLA: Hazardous substances.: Naphthalene: 100 lbs. (45.36 kg)

**Other Regulations:**

OSHA: Hazardous by definition of Hazard Communication Standard (29 CFR 1910.1200). EINECS: This product is on the European Inventory of Existing Commercial Chemical Substances.

**Other Classifications:**

**WHMIS (Canada):**

CLASS B-4: Flammable solid. CLASS D-1B: Material causing immediate and serious toxic effects (TOXIC). CLASS D-2B: Material causing other toxic effects (TOXIC).

**DSCL (EEC):**

R36- Irritating to eyes. R40- Possible risks of irreversible effects. R48/22- Harmful: danger of serious damage to health by prolonged exposure if swallowed. R48/23- Toxic: danger of serious damage to health by prolonged exposure through inhalation. R63- Possible risk of harm to the unborn child.

**HMIS (U.S.A.):**

**Health Hazard:** 2

**Fire Hazard:** 2

**Reactivity:** 0

**Personal Protection:** E

**National Fire Protection Association (U.S.A.):**

**Health:** 2

**Flammability:** 2

**Reactivity:** 0

**Specific hazard:**

**Protective Equipment:**

Gloves. Lab coat. Dust respirator. Be sure to use an approved/certified respirator or equivalent. Wear appropriate respirator when ventilation is inadequate. Splash goggles.

## Section 16: Other Information

**References:** Not available.

**Other Special Considerations:** Not available.

# MATERIAL SAFETY DATA SHEET

## 1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

**MATHESON TRI-GAS, INC.**  
**150 Allen Road Suite 302**  
**Basking Ridge, New Jersey 07920**  
**Information: 1-800-416-2505**

**Emergency Contact:**  
**CHEMTREC 1-800-424-9300**  
**Calls Originating Outside the US:**  
**703-527-3887 (Collect Calls Accepted)**

**SUBSTANCE: BUTYL BENZENE**

**TRADE NAMES/SYNONYMS:**

MTG MSDS 139; BUTYLBENZENE; 1-PHENYLBUTANE; N-BUTYLBENZENE; UN 2709;  
MAT03530; RTECS CY9070000

**CHEMICAL FAMILY:** hydrocarbons, aromatic

**CREATION DATE:** Jan 24 1989

**REVISION DATE:** Dec 11 2008

## 2. COMPOSITION, INFORMATION ON INGREDIENTS

**COMPONENT:** BUTYL BENZENE  
**CAS NUMBER:** 104-51-8  
**PERCENTAGE:** 100

## 3. HAZARDS IDENTIFICATION

**NFPA RATINGS (SCALE 0-4):** HEALTH=2 FIRE=2 REACTIVITY=0

**EMERGENCY OVERVIEW:**

**COLOR:** colorless

**PHYSICAL FORM:** liquid

**ODOR:** odorless

**MAJOR HEALTH HAZARDS:** respiratory tract irritation, skin irritation, eye irritation, central nervous system depression

**PHYSICAL HAZARDS:** Combustible liquid and vapor.

**POTENTIAL HEALTH EFFECTS:**

**INHALATION:**

**SHORT TERM EXPOSURE:** irritation, vomiting, headache, symptoms of drunkenness, coma

**LONG TERM EXPOSURE:** lung damage

**SKIN CONTACT:**

**SHORT TERM EXPOSURE:** irritation, headache, symptoms of drunkenness

**LONG TERM EXPOSURE:** same as effects reported in short term exposure

**EYE CONTACT:**

**SHORT TERM EXPOSURE:** irritation, tearing

**LONG TERM EXPOSURE:** same as effects reported in short term exposure

**INGESTION:**

**SHORT TERM EXPOSURE:** vomiting, headache, symptoms of drunkenness, coma

**LONG TERM EXPOSURE:** lung damage

---

## 4. FIRST AID MEASURES

---

**INHALATION:** If adverse effects occur, remove to uncontaminated area. Give artificial respiration if not breathing. If breathing is difficult, oxygen should be administered by qualified personnel. Get immediate medical attention.

**SKIN CONTACT:** Wash skin with soap and water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention, if needed. Thoroughly clean and dry contaminated clothing and shoes before reuse.

**EYE CONTACT:** Flush eyes with plenty of water for at least 15 minutes. Then get immediate medical attention.

**INGESTION:** DO NOT induce vomiting. Never make an unconscious person vomit or drink fluids. If vomiting occurs, keep head lower than hips to help prevent aspiration. If person is unconscious, turn head to side. Get medical attention.

**NOTE TO PHYSICIAN:** For inhalation, consider oxygen. For ingestion, consider gastric lavage, catharsis and activated charcoal slurry.

---

## 5. FIRE FIGHTING MEASURES

---

**FIRE AND EXPLOSION HAZARDS:** Severe fire hazard. Vapor/air mixtures are explosive above flash point. The vapor is heavier than air. Vapors or gases may ignite at distant ignition sources and flash back.

**EXTINGUISHING MEDIA:** regular dry chemical, carbon dioxide, water, regular foam

Large fires: Use regular foam or flood with fine water spray.

**FIRE FIGHTING:** Move container from fire area if it can be done without risk. Cool containers with water spray until well after the fire is out. Stay away from the ends of tanks. For fires in cargo or storage area: Cool containers with water from unmanned hose holder or monitor nozzles until well after fire is out. If this is impossible then take the following precautions: Keep unnecessary people away, isolate hazard area and deny

entry. Let the fire burn. Withdraw immediately in case of rising sound from venting safety device or any discoloration of tanks due to fire. For tank, rail car or tank truck: Evacuation radius: 800 meters (1/2 mile). Do not attempt to extinguish fire unless flow of material can be stopped first. Flood with fine water spray. Do not scatter spilled material with high-pressure water streams. Cool containers with water spray until well after the fire is out. Apply water from a protected location or from a safe distance. Avoid inhalation of material or combustion by-products. Stay upwind and keep out of low areas.

**FLASH POINT:** 160 F (71 C) (OC)  
**LOWER FLAMMABLE LIMIT:** 0.8%  
**UPPER FLAMMABLE LIMIT:** 5.8%  
**AUTOIGNITION:** 770 F (410 C)  
**FLAMMABILITY CLASS (OSHA):** IIIA

---

## 6. ACCIDENTAL RELEASE MEASURES

---

### **OCCUPATIONAL RELEASE:**

Avoid heat, flames, sparks and other sources of ignition. Stop leak if possible without personal risk. Reduce vapors with water spray. Small spills: Absorb with sand or other non-combustible material. Collect spilled material in appropriate container for disposal. Large spills: Dike for later disposal. Remove sources of ignition. Keep unnecessary people away, isolate hazard area and deny entry.

---

## 7. HANDLING AND STORAGE

---

**STORAGE:** Store and handle in accordance with all current regulations and standards.

---

## 8. EXPOSURE CONTROLS, PERSONAL PROTECTION

---

### **EXPOSURE LIMITS:**

#### **BUTYL BENZENE:**

No occupational exposure limits established.

**VENTILATION:** Provide local exhaust ventilation system. Ensure compliance with applicable exposure limits.

**EYE PROTECTION:** Wear splash resistant safety goggles with a faceshield. Provide an emergency eye wash fountain and quick drench shower in the immediate work area.

**CLOTHING:** Wear appropriate chemical resistant clothing.

**GLOVES:** Wear appropriate chemical resistant gloves.

**RESPIRATOR:** Under conditions of frequent use or heavy exposure, respiratory protection may be needed. Respiratory protection is ranked in order from minimum to maximum. Consider warning properties before

use.

Any supplied-air respirator with a full facepiece that is operated in a pressure-demand or other positive-pressure mode.

Any self-contained breathing apparatus that has a full facepiece and is operated in a pressure-demand or other positive-pressure mode.

---

## 9. PHYSICAL AND CHEMICAL PROPERTIES

---

**PHYSICAL STATE:** liquid

**COLOR:** colorless

**ODOR:** odorless

**MOLECULAR WEIGHT:** 134.21

**MOLECULAR FORMULA:** C<sub>10</sub>-H<sub>14</sub>

**BOILING POINT:** 356 F (180 C)

**FREEZING POINT:** -116 F (-82 C)

**VAPOR PRESSURE:** 1 mmHg @ 23 C

**VAPOR DENSITY (air=1):** 4.6

**SPECIFIC GRAVITY (water=1):** 0.9

**WATER SOLUBILITY:** insoluble

**PH:** Not available

**VOLATILITY:** Not available

**ODOR THRESHOLD:** Not available

**EVAPORATION RATE:** Not available

**COEFFICIENT OF WATER/OIL DISTRIBUTION:** Not available

**SOLVENT SOLUBILITY:**

**Miscible:** alcohol, ether, benzene

---

## 10. STABILITY AND REACTIVITY

---

**REACTIVITY:** Stable at normal temperatures and pressure.

**CONDITIONS TO AVOID:** Avoid heat, flames, sparks and other sources of ignition. Containers may rupture or explode if exposed to heat. Keep out of water supplies and sewers.

**INCOMPATIBILITIES:** oxidizing materials

**HAZARDOUS DECOMPOSITION:**

Thermal decomposition products: miscellaneous decomposition products

**POLYMERIZATION:** Will not polymerize.

---

## 11. TOXICOLOGICAL INFORMATION

---

**BUTYL BENZENE:**

**LOCAL EFFECTS:**

Irritant: inhalation, skin, eye

**TARGET ORGANS:** central nervous system

---

**12. ECOLOGICAL INFORMATION**

---

**ECOTOXICITY DATA:**

**INVERTEBRATE TOXICITY:** 340 ug/L 48 hour(s) EC50 (Immobilization) Water flea (Daphnia magna)

---

**13. DISPOSAL CONSIDERATIONS**

---

Dispose in accordance with all applicable regulations.

---

**14. TRANSPORT INFORMATION**

---

**U.S. DOT 49 CFR 172.101:**

**PROPER SHIPPING NAME:** Butyl benzenes

**ID NUMBER:** UN2709

**HAZARD CLASS OR DIVISION:** 3

**PACKING GROUP:** III

**LABELING REQUIREMENTS:** 3

**MARINE POLLUTANT:** BUTYL BENZENE

**CANADIAN TRANSPORTATION OF DANGEROUS GOODS:**

**SHIPPING NAME:** Butylbenzenes

**UN NUMBER:** UN2709

**CLASS:** 3

**PACKING GROUP/CATEGORY:** III

---

**15. REGULATORY INFORMATION**

---

**U.S. REGULATIONS:**

**CERCLA SECTIONS 102a/103 HAZARDOUS SUBSTANCES (40 CFR 302.4):** Not regulated.

**SARA TITLE III SECTION 302 EXTREMELY HAZARDOUS SUBSTANCES (40 CFR 355 Subpart B):** Not regulated.

**SARA TITLE III SECTION 304 EXTREMELY HAZARDOUS SUBSTANCES (40 CFR 355 Subpart C):** Not regulated.

**SARA TITLE III SARA SECTIONS 311/312 HAZARDOUS CATEGORIES (40 CFR 370 Subparts B**

**and C):**

ACUTE: Yes

CHRONIC: No

FIRE: Yes

REACTIVE: No

SUDDEN RELEASE: No

**SARA TITLE III SECTION 313 (40 CFR 372.65):** Not regulated.

**OSHA PROCESS SAFETY (29 CFR 1910.119):** Not regulated.

**STATE REGULATIONS:**

**California Proposition 65:** Not regulated.

**CANADIAN REGULATIONS:**

**WHMIS CLASSIFICATION:** Not determined.

**NATIONAL INVENTORY STATUS:**

**U.S. INVENTORY (TSCA):** Listed on inventory.

**TSCA 12(b) EXPORT NOTIFICATION:** Not listed.

**CANADA INVENTORY (DSL/NDSL):** Not determined.

---

# Material Safety Data Sheet

HAZARD WARNINGS	RISK PHRASES	PROTECTIVE CLOTHING
	<b>Combustible material; avoid heat and sources of ignition.</b> The health risks of this compound have not been fully determined. Exposure may cause irritation of the skin, eyes, and respiratory system.	   

## Section I. Chemical Product and Company Identification

Chemical Name	<b>n-Propylbenzene</b>		
Catalog Number	P0523	Supplier	TCl America 9211 N. Harbortgate St. Portland OR 1-800-423-8616
Synonym	1-Phenylpropane		
Chemical Formula	CH <sub>3</sub> CH <sub>2</sub> CH <sub>2</sub> C <sub>6</sub> H <sub>5</sub>		
CAS Number	103-65-1	In case of Emergency Call	<b>Chemtrec®</b> <b>(800) 424-9300 (U.S.)</b> <b>(703) 527-3887 (International)</b>

## Section II. Composition and Information on Ingredients

Chemical Name	CAS Number	Percent (%)	TLV/PEL	Toxicology Data
n-Propylbenzene	103-65-1	Min. 99.0 (GC)	Not available.	Rat LD <sub>50</sub> (inhalation) 65000ppm/2H Rat LD <sub>50</sub> (oral) 6040mg/kg

## Section III. Hazards Identification

Acute Health Effects	No specific information is available in our data base regarding the toxic effects of this material for humans. However, exposure to any chemical should be kept to a minimum. Skin and eye contact may result in irritation. May be harmful if inhaled or ingested. Always follow safe industrial hygiene practices and wear proper protective equipment when handling this compound.
Chronic Health Effects	<b>CARCINOGENIC EFFECTS</b> : Not available. <b>MUTAGENIC EFFECTS</b> : Not available. <b>TERATOGENIC EFFECTS</b> : Not available. <b>DEVELOPMENTAL TOXICITY</b> Not available. Repeated exposure to an highly toxic material may produce general deterioration of health by an accumulation in one or many human organs.

## Section IV. First Aid Measures

Eye Contact	Check for and remove any contact lenses. IMMEDIATELY flush eyes with running water for at least 15 minutes. Keeping eyelids open. COLD water may be used. DO NOT use an eye ointment. Flush eyes with running water for a minimum of 15 minutes, occasionally lifting the upper eyelids. Seek medical attention. Treat symptomatically and supportively.
Skin Contact	After contact with skin, wash immediately with plenty of water. Gently and thorough wash the contaminated skin with running water and non-abrasive soap. Be particularly careful to clean folds, crevices, creases and groin. COLD water may be used. Cover the irritated skin with an emollient. Seek medical attention. Treat symptomatically and supportively. Wash any contaminated clothing before reusing.
Inhalation	Evacuate the victim to a safe area as soon as possible. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If the victim is not breathing, perform artificial respiration. WARNING: It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation when the inhaled material is toxic, infectious or corrosive. Seek immediate medical attention and, if possible, show the chemical label. Treat symptomatically and supportively.
Ingestion	INDUCE VOMITING by sticking finger in throat. Lower the head so that the vomit will not reenter the mouth and throat. Loosen tight clothing such as a collar, tie, belt, or waistband. If the victim is not breathing, administer artificial respiration. Examine the lips and mouth to ascertain whether the tissues are damaged, a possible indication that the toxic material was ingested; the absence of such signs, however, is not conclusive. Seek immediate medical attention and, if possible, show the chemical label. Treat symptomatically and supportively.

## Section V. Fire and Explosion Data

Flammability	Combustible.	Auto-Ignition	Not available.
Flash Points	47.8°C (118°F).	Flammable Limits	Not available.
Combustion Products	These products are toxic carbon oxides (CO, CO <sub>2</sub> ).		
Fire Hazards	No specific information is available regarding the flammability of this compound in the presence of various materials.		
Explosion Hazards	Risks of explosion of the product in presence of mechanical impact: Not available. Risks of explosion of the product in presence of static discharge: Not available. No additional information is available regarding the risks of explosion.		

Continued on Next Page

Emergency phone number (800) 424-9300

Fire Fighting Media  
and Instructions

SMALL FIRE: Use DRY chemicals, CO<sub>2</sub>, alcohol foam or water spray.  
LARGE FIRE: Use alcohol foam, water spray or fog.

### Section VI. Accidental Release Measures

Spill Cleanup  
Instructions

Combustible liquid.  
Keep away from heat and sources of ignition. Mechanical exhaust required. Stop leak if without risk. Absorb with DRY earth, sand or other non-combustible material. DO NOT touch spilled material. Prevent entry into sewers, basements or confined areas; dike if needed. Eliminate all sources of ignition. Consult federal, state, and/or local authorities for assistance on disposal.

### Section VII. Handling and Storage

Handling and Storage  
Information

COMBUSTIBLE. Handle with caution and minimize exposure. DO NOT ingest. Do not breathe gas, fumes, vapor or spray. Wear suitable protective clothing. If ingested, seek medical advice immediately and show the container or the label. Treat symptomatically and supportively.  
Always store away from incompatible compounds such as oxidizing agents.

### Section VIII. Exposure Controls/Personal Protection

Engineering Controls

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash station and safety shower is proximal to the work-station location.

Personal Protection

Splash goggles. Lab coat. Dust respirator. Boots. Gloves. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

Exposure Limits

Not available.

### Section IX. Physical and Chemical Properties

Physical state @ 20°C	Liquid.	Solubility	Very slightly soluble in water. Soluble in alcohol, ether, all proportions in acetone, benzene, and petroleum ether.
Specific Gravity	0.86		
Molecular Weight	120.19	Partition Coefficient	Not available.
Boiling Point	159°C (318.2°F)	Vapor Pressure	Not available.
Melting Point	-99°C (-146.2°F)	Vapor Density	Not available.
Refractive Index	1.4920 @ 20°C	Volatility	Not available.
Critical Temperature	Not available.	Odor	Not available.
Viscosity	Not available.	Taste	Not available.

### Section X. Stability and Reactivity Data

Stability	This material is stable if stored under proper conditions. (See Section VII for instructions)
Conditions of Instability	Avoid excessive heat and light.
Incompatibilities	Reactive with strong oxidizing agents.

### Section XI. Toxicological Information

RTECS Number	DA8750000
Routes of Exposure	Eye contact. Ingestion. Inhalation.
Toxicity Data	Rat LD <sub>50</sub> (inhalation) 65000ppm/2H Rat LD <sub>50</sub> (oral) 6040mg/kg
Chronic Toxic Effects	<b>CARCINOGENIC EFFECTS</b> : Not available. <b>MUTAGENIC EFFECTS</b> : Not available. <b>TERATOGENIC EFFECTS</b> : Not available. <b>DEVELOPMENTAL TOXICITY</b> Not available. Repeated exposure to an highly toxic material may produce general deterioration of health by an accumulation in one or many human organs.
Acute Toxic Effects	No specific information is available in our data base regarding the toxic effects of this material for humans. However, exposure to any chemical should be kept to a minimum. Skin and eye contact may result in irritation. May be harmful if inhaled or ingested. Always follow safe industrial hygiene practices and wear proper protective equipment when handling this compound.

**Section XII. Ecological Information**

Ecotoxicity	Not available.
Environmental Fate	Not available.

**Section XIII. Disposal Considerations**

Waste Disposal	Recycle to process, if possible. Consult your local or regional authorities. You may be able to dissolve or mix material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber system. Observe all federal, state, and local regulations when disposing of the substance.
----------------	---

**Section XIV. Transport Information**

DOT Classification	DOT CLASS 3: Flammable liquid.
PIN Number	UN2364
Proper Shipping Name	n-Propylbenzene
Packing Group (PG)	III
DOT Pictograms	

**Section XV. Other Regulatory Information and Pictograms**

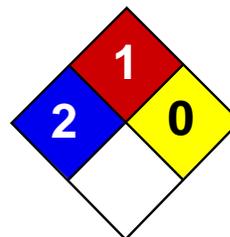

TSCA Chemical Inventory (EPA)	This compound is <b>ON</b> the EPA Toxic Substances Control Act (TSCA) inventory list.
WHMIS Classification (Canada)	WHMIS CLASS B-3: Combustible liquid with a flash point between 35°C (100°F) and 93.3°C (200°F).
EINECS Number (EEC)	203-132-9
EEC Risk Statements	R10- Flammable. R18- In use, may form flammable/explosive vapor-air mixture.
Japanese Regulatory Data	Not available.

**Section XVI. Other Information**

**Version 1.0**  
**Validated on 10/26/1998.**  
**Printed 3/18/2005.**

**Notice to Reader**

TCI laboratory chemicals are for research purposes only and are NOT intended for use as drugs, food additives, households, or pesticides. The information herein is believed to be correct, but does not claim to be all inclusive and should be used only as a guide. Neither the above named supplier nor any of its subsidiaries assumes any liability whatsoever for the accuracy or completeness of the information contained herein. Final determination of suitability of any material is the sole responsibility of the user. All chemical reagents must be handled with the recognition that their chemical, physiological, toxicological, and hazardous properties have not been fully investigated or determined. All chemical reagents should be handled only by individuals who are familiar with their potential hazards and who have been fully trained in proper safety, laboratory, and chemical handling procedures. Although certain hazards are described herein, we can not guarantee that these are the only hazards which exist. Our MSDS sheets are based only on data available at the time of shipping and are subject to change without notice as new information is obtained. Avoid long storage periods since the product is subject to degradation with age and may become more dangerous or hazardous. It is the responsibility of the user to request updated MSDS sheets for products that are stored for extended periods. Disposal of unused product must be undertaken by qualified personnel who are knowledgeable in all applicable regulations and follow all pertinent safety precautions including the use of appropriate protective equipment (e.g. protective goggles, protective clothing, breathing equipment, facial mask, fume hood). For proper handling and disposal, always comply with federal, state, and local regulations.

## Material Safety Data Sheet Phenanthrene MSDS

### Section 1: Chemical Product and Company Identification

**Product Name:** Phenanthrene

**Catalog Codes:** SLP1318

**CAS#:** 85-01-8

**RTECS:** SF7175000

**TSCA:** TSCA 8(b) inventory: Phenanthrene

**CI#:** Not available.

**Synonym:**

**Chemical Name:** Not available.

**Chemical Formula:** C<sub>14</sub>H<sub>10</sub>

**Contact Information:**

**Sciencelab.com, Inc.**

14025 Smith Rd.

Houston, Texas 77396

US Sales: **1-800-901-7247**

International Sales: **1-281-441-4400**

Order Online: [ScienceLab.com](http://ScienceLab.com)

**CHEMTREC (24HR Emergency Telephone), call:**

1-800-424-9300

**International CHEMTREC, call:** 1-703-527-3887

**For non-emergency assistance, call:** 1-281-441-4400

### Section 2: Composition and Information on Ingredients

**Composition:**

Name	CAS #	% by Weight
Phenanthrene	85-01-8	100

**Toxicological Data on Ingredients:** Phenanthrene: ORAL (LD50): Acute: 700 mg/kg [Mouse].

### Section 3: Hazards Identification

**Potential Acute Health Effects:**

Hazardous in case of skin contact (irritant, sensitizer), of eye contact (irritant), of ingestion, of inhalation. Slightly hazardous in case of skin contact (permeator).

**Potential Chronic Health Effects:**

CARCINOGENIC EFFECTS: Not available. MUTAGENIC EFFECTS: Not available. TERATOGENIC EFFECTS: Not available. DEVELOPMENTAL TOXICITY: Not available. Repeated or prolonged exposure is not known to aggravate medical condition.

### Section 4: First Aid Measures

**Eye Contact:**

Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Cold water may be used. Do not use an eye ointment. Seek medical attention.

**Skin Contact:**

After contact with skin, wash immediately with plenty of water. Gently and thoroughly wash the contaminated skin with running water and non-abrasive soap. Be particularly careful to clean folds, crevices, creases and groin. Cover the irritated skin with an emollient. If irritation persists, seek medical attention. Wash contaminated clothing before reusing.

**Serious Skin Contact:**

Wash with a disinfectant soap and cover the contaminated skin with an anti-bacterial cream. Seek immediate medical attention.

**Inhalation:** Allow the victim to rest in a well ventilated area. Seek immediate medical attention.

**Serious Inhalation:** Not available.

**Ingestion:**

Do not induce vomiting. Examine the lips and mouth to ascertain whether the tissues are damaged, a possible indication that the toxic material was ingested; the absence of such signs, however, is not conclusive. Loosen tight clothing such as a collar, tie, belt or waistband. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek immediate medical attention.

**Serious Ingestion:** Not available.

### Section 5: Fire and Explosion Data

**Flammability of the Product:** May be combustible at high temperature.

**Auto-Ignition Temperature:** Not available.

**Flash Points:** OPEN CUP: 171°C (339.8°F).

**Flammable Limits:** Not available.

**Products of Combustion:** These products are carbon oxides (CO, CO<sub>2</sub>).

**Fire Hazards in Presence of Various Substances:** Not available.

**Explosion Hazards in Presence of Various Substances:**

Risks of explosion of the product in presence of mechanical impact: Not available. Risks of explosion of the product in presence of static discharge: Not available.

**Fire Fighting Media and Instructions:**

SMALL FIRE: Use DRY chemical powder. LARGE FIRE: Use water spray, fog or foam. Do not use water jet.

**Special Remarks on Fire Hazards:** Not available.

**Special Remarks on Explosion Hazards:** Not available.

### Section 6: Accidental Release Measures

**Small Spill:**

Use appropriate tools to put the spilled solid in a convenient waste disposal container. Finish cleaning by spreading water on the contaminated surface and dispose of according to local and regional authority requirements.

**Large Spill:**

Use a shovel to put the material into a convenient waste disposal container. Finish cleaning by spreading water on the contaminated surface and allow to evacuate through the sanitary system.

### Section 7: Handling and Storage

**Precautions:**

Keep away from heat. Keep away from sources of ignition. Empty containers pose a fire risk, evaporate the residue under a fume hood. Ground all equipment containing material. Do not ingest. Do not breathe dust. Wear suitable protective clothing In

case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Avoid contact with skin and eyes.

**Storage:**

Keep container dry. Keep in a cool place. Ground all equipment containing material. Keep container tightly closed. Keep in a cool, well-ventilated place. Combustible materials should be stored away from extreme heat and away from strong oxidizing agents.

## Section 8: Exposure Controls/Personal Protection

**Engineering Controls:**

Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

**Personal Protection:**

Splash goggles. Lab coat. Dust respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

**Personal Protection in Case of a Large Spill:**

Splash goggles. Full suit. Dust respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

**Exposure Limits:** Not available.

## Section 9: Physical and Chemical Properties

**Physical state and appearance:** Solid.

**Odor:** Not available.

**Taste:** Not available.

**Molecular Weight:** 178.22 g/mole

**Color:** Not available.

**pH (1% soln/water):** Not available.

**Boiling Point:** 340°C (644°F)

**Melting Point:** 101°C (213.8°F)

**Critical Temperature:** Not available.

**Specific Gravity:** 1.179 (Water = 1)

**Vapor Pressure:** Not applicable.

**Vapor Density:** 6.14 (Air = 1)

**Volatility:** Not available.

**Odor Threshold:** Not available.

**Water/Oil Dist. Coeff.:** Not available.

**Ionicity (in Water):** Not available.

**Dispersion Properties:** Not available.

**Solubility:** Very slightly soluble in cold water.

## Section 10: Stability and Reactivity Data

**Stability:** The product is stable.

**Instability Temperature:** Not available.

**Conditions of Instability:** Not available.

**Incompatibility with various substances:** Not available.

**Corrosivity:** Non-corrosive in presence of glass.

**Special Remarks on Reactivity:** Not available.

**Special Remarks on Corrosivity:** Not available.

**Polymerization:** No.

## Section 11: Toxicological Information

**Routes of Entry:** Eye contact. Inhalation. Ingestion.

**Toxicity to Animals:** Acute oral toxicity (LD50): 700 mg/kg [Mouse].

**Chronic Effects on Humans:** Not available.

**Other Toxic Effects on Humans:**

Hazardous in case of skin contact (irritant, sensitizer), of ingestion, of inhalation. Slightly hazardous in case of skin contact (permeator).

**Special Remarks on Toxicity to Animals:** Not available.

**Special Remarks on Chronic Effects on Humans:** Not available.

**Special Remarks on other Toxic Effects on Humans:** Not available.

## Section 12: Ecological Information

**Ecotoxicity:** Not available.

**BOD5 and COD:** Not available.

**Products of Biodegradation:**

Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

**Toxicity of the Products of Biodegradation:** The products of degradation are more toxic.

**Special Remarks on the Products of Biodegradation:** Not available.

## Section 13: Disposal Considerations

**Waste Disposal:**

## Section 14: Transport Information

**DOT Classification:** Not a DOT controlled material (United States).

**Identification:** Not applicable.

**Special Provisions for Transport:** Not applicable.

## Section 15: Other Regulatory Information

**Federal and State Regulations:** TSCA 8(b) inventory: Phenanthrene

**Other Regulations:** OSHA: Hazardous by definition of Hazard Communication Standard (29 CFR 1910.1200).

**Other Classifications:**

**WHMIS (Canada):** Not controlled under WHMIS (Canada).

**DSCL (EEC):**

R36/38- Irritating to eyes and skin. R43- May cause sensitization by skin contact.

**HMIS (U.S.A.):**

**Health Hazard:** 2

**Fire Hazard:** 1

**Reactivity:** 0

**Personal Protection:** E

**National Fire Protection Association (U.S.A.):**

**Health:** 2

**Flammability:** 1

**Reactivity:** 0

**Specific hazard:**

**Protective Equipment:**

Gloves. Lab coat. Dust respirator. Be sure to use an approved/certified respirator or equivalent. Splash goggles.

## Section 16: Other Information

**References:** Not available.

**Other Special Considerations:** Not available.

CHEMTREC Phone Number, Europe: 703-527-3887

Section 2 - Composition, Information on Ingredients

-----  
CAS#: 135-98-8  
Chemical Name: sec-Butylbenzene  
%: 99+  
EINECS#: 205-227-0  
-----

Hazard Symbols: XI

Risk Phrases: 10 36/37/38

Section 3 - Hazards Identification

EMERGENCY OVERVIEW

Warning! Flammable liquid and vapor. May cause central nervous system depression. Causes eye, skin, and respiratory tract irritation. Target Organs: Central nervous system.

Potential Health Effects

Eye: Causes eye irritation.

Skin: Causes skin irritation.

Ingestion: May cause gastrointestinal irritation with nausea, vomiting and diarrhea. Ingestion of large amounts may cause CNS depression.

Inhalation: Causes respiratory tract irritation.

Chronic: Prolonged or repeated skin contact may cause dermatitis.

Section 4 - First Aid Measures

Eyes: Flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical aid.

Skin: Get medical aid. Flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse.

Ingestion: Do not induce vomiting. If victim is conscious and alert, give 2-4 cupfuls of milk or water. Never give anything by mouth to an unconscious person. Get medical aid.

Inhalation: Remove from exposure and move to fresh air immediately. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical aid.

Notes to Physician: Treat symptomatically and supportively.

### Section 5 - Fire Fighting Measures

General Information: As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. Vapors may form an explosive mixture with air. Vapors can travel to a source of ignition and flash back. During a fire, irritating and highly toxic gases may be generated by thermal decomposition or combustion. Will burn if involved in a fire. Use water spray to keep fire-exposed containers cool. Containers may explode in the heat of a fire. Flammable liquid and vapor.

Extinguishing Media: For small fires, use dry chemical, carbon dioxide, water spray or alcohol-resistant foam. For large fires, use water spray, fog, or alcohol-resistant foam. Use water spray to cool fire-exposed containers. Water may be ineffective. Use agent most appropriate to extinguish fire. Do NOT use straight streams of water.

Autoignition Temperature: 415 deg C ( 779.00 deg F)

Flash Point: 45 deg C ( 113.00 deg F)

Explosion Limits: Lower: 0.80 vol %

Explosion Limits: Upper: 6.90 vol %

NFPA Rating: health: 2; flammability: 2; instability: 0;

### Section 6 - Accidental Release Measures

General Information: Use proper personal protective equipment as indicated in Section 8.

Spills/Leaks: Absorb spill with inert material (e.g. vermiculite, sand or earth), then place in suitable container. Clean up spills immediately, observing precautions in the Protective Equipment section. Remove all sources of ignition. Use a spark-proof tool. Provide ventilation. A vapor suppressing foam may be used to reduce vapors.

### Section 7 - Handling and Storage

Handling: Wash thoroughly after handling. Remove contaminated clothing and wash before reuse. Use only in a well-ventilated area. Ground and bond containers when transferring material. Use spark-proof tools and explosion proof equipment. Avoid contact with eyes, skin, and clothing. Empty containers retain product residue, (liquid and/or vapor), and can be dangerous. Keep container tightly closed. Keep away from heat, sparks and flame. Avoid ingestion and inhalation. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose empty containers to heat, sparks or open flames.

Storage: Keep away from sources of ignition. Store in a tightly closed container. Store in a cool, dry, well-ventilated area away from incompatible substances. Flammables-area.

### Section 8 - Exposure Controls, Personal Protection

Chemical Name	ACGIH	NIOSH	OSHA - Final PELs
sec-Butylbenzene	none listed	none listed	none listed

OSHA Vacated PELs: sec-Butylbenzene: None listed

Engineering Controls:

Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower. Use adequate general or local explosion-proof ventilation to keep airborne levels to acceptable levels.

Exposure Limits

## Personal Protective Equipment

Eyes: Wear chemical splash goggles.

Skin: Wear appropriate protective gloves to prevent skin exposure.

Clothing: Wear appropriate protective clothing to prevent skin exposure.

Respirators: A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI Z88.2 requirements or European Standard EN 149 must be followed whenever workplace conditions warrant respirator use.

## Section 9 - Physical and Chemical Properties

Physical State: Liquid

Color: clear colorless

Odor: None reported.

pH: Not available

Vapor Pressure: 4 mm Hg @ 37.7 deg C

Vapor Density: 4.62

Evaporation Rate: Not available

Viscosity: Not available

Boiling Point: 173 - 174 deg C @ 760 mm Hg

Freezing/Melting Point: -75 deg C (-103.00°F)

Decomposition Temperature: Not available

Solubility in water: 0.015 g/L water

Specific Gravity/Density: 0.8630 g/cm<sup>3</sup>

Molecular Formula: C<sub>10</sub>H<sub>14</sub>

Molecular Weight: 134.22

## Section 10 - Stability and Reactivity

Chemical Stability: Stable under normal temperatures and pressures.

Conditions to Avoid: Ignition sources, excess heat.

Incompatibilities with Other Materials: Strong oxidizing agents.

Hazardous Decomposition Products: Carbon monoxide, carbon monoxide, carbon dioxide.

Hazardous Polymerization: Has not been reported.

## Section 11 - Toxicological Information

RTECS#: CAS# 135-98-8: CY9100000

RTECS:

**CAS# 135-98-8:** Draize test, rabbit, eye: 500 mg/24H Mild;

Draize test, rabbit, skin: 100 mg/24H Moderate;

LD50/LC50: Oral, mouse: LD50 = 8700 mg/kg;

Oral, rat: LD50 = 2240 uL/kg;

Oral, rat: LD50 = 6300 mg/kg;

Skin, rabbit: LD50 = >16 mL/kg;

Carcinogenicity: sec-Butylbenzene - Not listed as a carcinogen by ACGIH, IARC, NTP, or CA Prop 65.

Other: See actual entry in RTECS for complete information.

## Section 12 - Ecological Information

Not available

## Section 13 - Disposal Considerations

Dispose of in a manner consistent with federal, state, and local regulations.

## Section 14 - Transport Information

US DOT

Shipping Name: BUTYL BENZENES

Hazard Class: 3

UN Number: UN2709

Packing Group: III

## Section 15 - Regulatory Information

### European/International Regulations

#### European Labeling in Accordance with EC Directives

Hazard Symbols: XI

Risk Phrases:

R 10 Flammable.

R 36/37/38 Irritating to eyes, respiratory system and skin.

Safety Phrases:

S 9 Keep container in a well-ventilated place.

S 16 Keep away from sources of ignition - No smoking.

S 33 Take precautionary measures against static discharges.

#### WGK (Water Danger/Protection)

CAS# 135-98-8: 1

#### Canada

CAS# 135-98-8 is listed on Canada's DSL List

Canadian WHMIS Classifications: B3, D2B

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all of the information required by those regulations.

CAS# 135-98-8 is not listed on Canada's Ingredient Disclosure List.

#### US Federal

##### TSCA

CAS# 135-98-8 is listed on the TSCA  
Inventory.

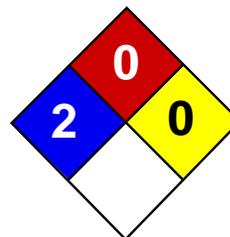

## Section 16 - Other Information

MSDS Creation Date: 9/02/1997

Revision #9 Date 7/20/2009

The information above is believed to be accurate and represents the best information currently available to us. However, we make no warranty of merchantability or any other warranty, express or implied, with respect to such information, and we assume no liability resulting from its use. Users should make their own investigations to determine the suitability of the information for their particular purposes. ## Material Safety Data Sheet Tetrachloroethylene MSDS

### Section 1: Chemical Product and Company Identification

**Product Name:** Tetrachloroethylene

**Catalog Codes:** SLT3220

**CAS#:** 127-18-4

**RTECS:** KX3850000

**TSCA:** TSCA 8(b) inventory: Tetrachloroethylene

**CI#:** Not available.

**Synonym:** Perchloroethylene; 1,1,2,2-Tetrachloroethylene; Carbon bichloride; Carbon dichloride; Ankilostin; Didakene; Dilatin PT; Ethene, tetrachloro-; Ethylene tetrachloride; Perawin; Perchlor; Perclene; Perclene D; Percosolve; Tetrachloroethene; Tetraleno; Tetralex; Tetravec; Tetroguer; Tetropil

**Chemical Name:** Ethylene, tetrachloro-

**Chemical Formula:** C<sub>2</sub>-Cl<sub>4</sub>

**Contact Information:**

**Sciencelab.com, Inc.**

14025 Smith Rd.

Houston, Texas 77396

US Sales: **1-800-901-7247**

International Sales: **1-281-441-4400**

Order Online: [ScienceLab.com](http://ScienceLab.com)

**CHEMTREC (24HR Emergency Telephone), call:**  
1-800-424-9300

**International CHEMTREC, call:** 1-703-527-3887

**For non-emergency assistance, call:** 1-281-441-4400

### Section 2: Composition and Information on Ingredients

**Composition:**

Name	CAS #	% by Weight
Tetrachloroethylene	127-18-4	100

**Toxicological Data on Ingredients:** Tetrachloroethylene: ORAL (LD50): Acute: 2629 mg/kg [Rat]. DERMAL (LD): Acute: >3228 mg/kg [Rabbit]. MIST(LC50): Acute: 34200 mg/m 8 hours [Rat]. VAPOR (LC50 ): Acute: 5200 ppm 4 hours [Mouse].

### Section 3: Hazards Identification

**Potential Acute Health Effects:**

Hazardous in case of skin contact (irritant), of inhalation. Slightly hazardous in case of skin contact (permeator), of eye contact (irritant), of ingestion.

**Potential Chronic Health Effects:**

CARCINOGENIC EFFECTS: Classified A3 (Proven for animal.) by ACGIH. Classified 2A (Probable for human.) by IARC, 2 (anticipated carcinogen) by NTP. MUTAGENIC EFFECTS: Mutagenic for bacteria and/or yeast. TERATOGENIC EFFECTS: Not available. DEVELOPMENTAL TOXICITY: Not available. The substance may be toxic to kidneys, liver, peripheral nervous system, respiratory tract, skin, central nervous system (CNS). Repeated or prolonged exposure to the substance can produce target organs damage.

## Section 4: First Aid Measures

### Eye Contact:

Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention if irritation occurs.

### Skin Contact:

In case of contact, immediately flush skin with plenty of water. Cover the irritated skin with an emollient. Remove contaminated clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention.

### Serious Skin Contact:

Wash with a disinfectant soap and cover the contaminated skin with an anti-bacterial cream. Seek medical attention.

### Inhalation:

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention if symptoms appear.

### Serious Inhalation:

Evacuate the victim to a safe area as soon as possible. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek medical attention.

### Ingestion:

Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention if symptoms appear.

**Serious Ingestion:** Not available.

## Section 5: Fire and Explosion Data

**Flammability of the Product:** Non-flammable.

**Auto-Ignition Temperature:** Not applicable.

**Flash Points:** Not applicable.

**Flammable Limits:** Not applicable.

**Products of Combustion:** Not available.

**Fire Hazards in Presence of Various Substances:** Not applicable.

**Explosion Hazards in Presence of Various Substances:**

Risks of explosion of the product in presence of mechanical impact: Not available. Risks of explosion of the product in presence of static discharge: Not available.

**Fire Fighting Media and Instructions:** Not applicable.

**Special Remarks on Fire Hazards:** Not available.

**Special Remarks on Explosion Hazards:** Not available.

## Section 6: Accidental Release Measures

**Small Spill:** Absorb with an inert material and put the spilled material in an appropriate waste disposal.

### Large Spill:

Absorb with an inert material and put the spilled material in an appropriate waste disposal. Be careful that the product is not present at a concentration level above TLV. Check TLV on the MSDS and with local authorities.

## Section 7: Handling and Storage

**Precautions:**

Do not ingest. Do not breathe gas/fumes/ vapor/spray. Avoid contact with skin. Wear suitable protective clothing. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Keep away from incompatibles such as oxidizing agents, metals, acids, alkalis.

**Storage:** Keep container tightly closed. Keep container in a cool, well-ventilated area.

## Section 8: Exposure Controls/Personal Protection

**Engineering Controls:**

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value.

**Personal Protection:**

Safety glasses. Lab coat. Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

**Personal Protection in Case of a Large Spill:**

Splash goggles. Full suit. Vapor respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

**Exposure Limits:**

TWA: 25 (ppm) from OSHA (PEL) [United States] TWA: 25 STEL: 100 (ppm) from ACGIH (TLV) [United States] TWA: 170 (mg/m3) from OSHA (PEL) [United States] Consult local authorities for acceptable exposure limits.

## Section 9: Physical and Chemical Properties

**Physical state and appearance:** Liquid.

**Odor:** Ethereal.

**Taste:** Not available.

**Molecular Weight:** 165.83 g/mole

**Color:** Clear Colorless.

**pH (1% soln/water):** Not available.

**Boiling Point:** 121.3°C (250.3°F)

**Melting Point:** -22.3°C (-8.1°F)

**Critical Temperature:** 347.1°C (656.8°F)

**Specific Gravity:** 1.6227 (Water = 1)

**Vapor Pressure:** 1.7 kPa (@ 20°C)

**Vapor Density:** 5.7 (Air = 1)

**Volatility:** Not available.

**Odor Threshold:** 5 - 50 ppm

**Water/Oil Dist. Coeff.:** The product is more soluble in oil;  $\log(\text{oil/water}) = 3.4$

**Ionicity (in Water):** Not available.

**Dispersion Properties:** Not available.

**Solubility:**

Miscible with alcohol, ether, chloroform, benzene, hexane. It dissolves in most of the fixed and volatile oils. Solubility in water: 0.015 g/100 ml @ 25 deg. C It slowly decomposes in water to yield Trichloroacetic and Hydrochloric acids.

## Section 10: Stability and Reactivity Data

**Stability:** The product is stable.

**Instability Temperature:** Not available.

**Conditions of Instability:** Incompatible materials

**Incompatibility with various substances:** Reactive with oxidizing agents, metals, acids, alkalis.

**Corrosivity:** Non-corrosive in presence of glass.

**Special Remarks on Reactivity:**

Oxidized by strong oxidizing agents. Incompatible with sodium hydroxide, finely divided or powdered metals such as zinc, aluminum, magnesium, potassium, chemically active metals such as lithium, beryllium, barium. Protect from light.

**Special Remarks on Corrosivity:** Slowly corrodes aluminum, iron, and zinc.

**Polymerization:** Will not occur.

## Section 11: Toxicological Information

**Routes of Entry:** Absorbed through skin. Eye contact. Inhalation. Ingestion.

**Toxicity to Animals:**

WARNING: THE LC50 VALUES HEREUNDER ARE ESTIMATED ON THE BASIS OF A 4-HOUR EXPOSURE. Acute oral toxicity (LD50): 2629 mg/kg [Rat]. Acute dermal toxicity (LD50): >3228 mg/kg [Rabbit]. Acute toxicity of the vapor (LC50): 5200 4 hours [Mouse].

**Chronic Effects on Humans:**

CARCINOGENIC EFFECTS: Classified A3 (Proven for animal.) by ACGIH. Classified 2A (Probable for human.) by IARC, 2 (Some evidence.) by NTP. MUTAGENIC EFFECTS: Mutagenic for bacteria and/or yeast. May cause damage to the following organs: kidneys, liver, peripheral nervous system, upper respiratory tract, skin, central nervous system (CNS).

**Other Toxic Effects on Humans:**

Hazardous in case of skin contact (irritant), of inhalation. Slightly hazardous in case of skin contact (permeator), of ingestion.

**Special Remarks on Toxicity to Animals:**

Lowest Published Lethal Dose/Conc: LDL [Rabbit] - Route: Oral; Dose: 5000 mg/kg LDL [Dog] - Route: Oral; Dose: 4000 mg/kg LDL [Cat] - Route: Oral; Dose: 4000 mg/kg

**Special Remarks on Chronic Effects on Humans:**

May cause adverse reproductive effects and birth defects (teratogenic). May affect genetic material (mutagenic). May cause cancer.

**Special Remarks on other Toxic Effects on Humans:**

Acute Potential Health Effects: Skin: Causes skin irritation with possible dermal blistering or burns. Symptoms may include redness, itching, pain, and possible dermal blistering or burns. It may be absorbed through the skin with possible systemic effects. A single prolonged skin exposure is not likely to result in the material being absorbed in harmful amounts. Eyes: Contact causes transient eye irritation, lacrimation. Vapors cause eye/conjunctival irritation. Symptoms may include redness and pain. Inhalation: The main route to occupational exposure is by inhalation since it is readily absorbed through the lungs. It causes respiratory tract irritation, . It can affect behavior/central nervous system (CNS depressant and anesthesia ranging from slight inebriation to death, vertigo, somnolence, anxiety, headache, excitement, hallucinations, muscle incoordination, dizziness, lightheadness, disorientation, seizures, emotional instability, stupor, coma). It may cause pulmonary edema Ingestion: It can cause nausea, vomiting, anorexia, diarrhea, bloody stool. It may affect the liver, urinary system (proteinuria, hematuria, renal failure, renal tubular disorder), heart (arrhythmias). It may affect behavior/central nervous system with symptoms similar to that of inhalation. Chronic Potential Health Effects: Skin: Prolonged or repeated skin contact may result in excessive drying of the skin, and irritation. Ingestion/Inhalation: Chronic exposure can affect the liver (hepatitis, fatty liver degeneration), kidneys, spleen, and heart (irregular heartbeat/arrhythmias, cardiomyopathy, abnormal EEG), brain, behavior/central nervous system/peripheral nervous system (impaired memory, numbness of extremities, peripheral neuropathy and other

## Section 12: Ecological Information

### Ecotoxicity:

Ecotoxicity in water (LC50): 18.4 mg/l 96 hours [Fish (Fathead Minnow)]. 18 mg/l 48 hours [Daphnia (daphnia)]. 5 mg/l 96 hours [Fish (Rainbow Trout)]. 13 mg/l 96 hours [Fish (Bluegill sunfish)].

**BOD5 and COD:** Not available.

### Products of Biodegradation:

Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

**Toxicity of the Products of Biodegradation:** The product itself and its products of degradation are not toxic.

**Special Remarks on the Products of Biodegradation:** Not available.

## Section 13: Disposal Considerations

### Waste Disposal:

Waste must be disposed of in accordance with federal, state and local environmental control regulations.

## Section 14: Transport Information

**DOT Classification:** CLASS 6.1: Poisonous material.

**Identification:** : Tetrachloroethylene UNNA: 1897 PG: III

**Special Provisions for Transport:** Marine Pollutant

## Section 15: Other Regulatory Information

### Federal and State Regulations:

California prop. 65: This product contains the following ingredients for which the State of California has found to cause cancer, birth defects or other reproductive harm, which would require a warning under the statute: Tetrachloroethylene California prop. 65: This product contains the following ingredients for which the State of California has found to cause cancer which would require a warning under the statute: Tetrachloroethylene Connecticut hazardous material survey.: Tetrachloroethylene Illinois toxic substances disclosure to employee act: Tetrachloroethylene Illinois chemical safety act: Tetrachloroethylene New York release reporting list: Tetrachloroethylene Rhode Island RTK hazardous substances: Tetrachloroethylene Pennsylvania RTK: Tetrachloroethylene Minnesota: Tetrachloroethylene Michigan critical material: Tetrachloroethylene Massachusetts RTK: Tetrachloroethylene Massachusetts spill list: Tetrachloroethylene New Jersey: Tetrachloroethylene New Jersey spill list: Tetrachloroethylene Louisiana spill reporting: Tetrachloroethylene California Director's List of Hazardous Substances: Tetrachloroethylene TSCA 8(b) inventory: Tetrachloroethylene TSCA 8(d) H and S data reporting: Tetrachloroethylene Effective date: 6/1/87; Sunset date: 6/1/97 SARA 313 toxic chemical notification and release reporting: Tetrachloroethylene CERCLA: Hazardous substances.: Tetrachloroethylene: 100 lbs. (45.36 kg)

### Other Regulations:

OSHA: Hazardous by definition of Hazard Communication Standard (29 CFR 1910.1200). EINECS: This product is on the European Inventory of Existing Commercial Chemical Substances.

### Other Classifications:

#### WHMIS (Canada):

CLASS D-1B: Material causing immediate and serious toxic effects (TOXIC). CLASS D-2A: Material causing other toxic effects (VERY TOXIC).

#### DSCL (EEC):

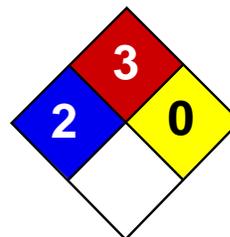

R40- Possible risks of irreversible effects. R51/53- Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. S23- Do not breathe gas/fumes/vapour/spray S26- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. S37- Wear suitable gloves. S61- Avoid release to the environment. Refer to special instructions/Safety data sheets.

### Section 2: Composition and Information on Ingredients

**Composition:**

Name	CAS #	% by Weight
Toluene	108-88-3	100

**Toxicological Data on Ingredients:** Toluene: ORAL (LD50): Acute: 636 mg/kg [Rat]. DERMAL (LD50): Acute: 14100 mg/kg [Rabbit]. VAPOR (LC50): Acute: 49000 mg/m 4 hours [Rat]. 440 ppm 24 hours [Mouse].

### Section 3: Hazards Identification

**Potential Acute Health Effects:**

Hazardous in case of skin contact (irritant), of eye contact (irritant), of ingestion, of inhalation. Slightly hazardous in case of skin contact (permeator).

**Potential Chronic Health Effects:**

CARCINOGENIC EFFECTS: A4 (Not classifiable for human or animal.) by ACGIH, 3 (Not classifiable for human.) by IARC. MUTAGENIC EFFECTS: Not available. TERATOGENIC EFFECTS: Not available. DEVELOPMENTAL TOXICITY: Not available. The substance may be toxic to blood, kidneys, the nervous system, liver, brain, central nervous system (CNS). Repeated or prolonged exposure to the substance can produce target organs damage.

### Section 4: First Aid Measures

**Eye Contact:**

Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention.

**Skin Contact:**

In case of contact, immediately flush skin with plenty of water. Cover the irritated skin with an emollient. Remove contaminated clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention.

**Serious Skin Contact:**

Wash with a disinfectant soap and cover the contaminated skin with an anti-bacterial cream. Seek immediate medical attention.

**Inhalation:**

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

**Serious Inhalation:**

Evacuate the victim to a safe area as soon as possible. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If the victim is not breathing, perform mouth-to-mouth resuscitation. **WARNING:** It may be hazardous to the person providing aid to give mouth-to-mouth resuscitation when the inhaled material is toxic, infectious or corrosive. Seek medical attention.

**Ingestion:**

Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If large quantities of this material are swallowed, call a physician immediately. Loosen tight clothing such as a collar, tie, belt or waistband.

**Serious Ingestion:** Not available.

## Section 5: Fire and Explosion Data

**Flammability of the Product:** Flammable.

**Auto-Ignition Temperature:** 480°C (896°F)

**Flash Points:** CLOSED CUP: 4.4444°C (40°F). (Setaflash) OPEN CUP: 16°C (60.8°F).

**Flammable Limits:** LOWER: 1.1% UPPER: 7.1%

**Products of Combustion:** These products are carbon oxides (CO, CO<sub>2</sub>).

**Fire Hazards in Presence of Various Substances:**

Flammable in presence of open flames and sparks, of heat. Non-flammable in presence of shocks.

**Explosion Hazards in Presence of Various Substances:**

Risks of explosion of the product in presence of mechanical impact: Not available. Risks of explosion of the product in presence of static discharge: Not available.

**Fire Fighting Media and Instructions:**

Flammable liquid, insoluble in water. SMALL FIRE: Use DRY chemical powder. LARGE FIRE: Use water spray or fog.

**Special Remarks on Fire Hazards:** Not available.

**Special Remarks on Explosion Hazards:**

Toluene forms explosive reaction with 1,3-dichloro-5,5-dimethyl-2,4-imidazolididione; dinitrogen tetraoxide; concentrated nitric acid, sulfuric acid + nitric acid; N<sub>2</sub>O<sub>4</sub>; AgClO<sub>4</sub>; BrF<sub>3</sub>; Uranium hexafluoride; sulfur dichloride. Also forms an explosive mixture with tetranitromethane.

## Section 6: Accidental Release Measures

**Small Spill:** Absorb with an inert material and put the spilled material in an appropriate waste disposal.

**Large Spill:**

Toxic flammable liquid, insoluble or very slightly soluble in water. Keep away from heat. Keep away from sources of ignition. Stop leak if without risk. Absorb with DRY earth, sand or other non-combustible material. Do not get water inside container. Do not touch spilled material. Prevent entry into sewers, basements or confined areas; dike if needed. Call for assistance on disposal. Be careful that the product is not present at a concentration level above TLV. Check TLV on the MSDS and with local authorities.

**Section 7: Handling and Storage****Precautions:**

Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not ingest. Do not breathe gas/fumes/ vapor/spray. Wear suitable protective clothing. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Avoid contact with skin and eyes. Keep away from incompatibles such as oxidizing agents.

**Storage:**

Store in a segregated and approved area. Keep container in a cool, well-ventilated area. Keep container tightly closed and sealed until ready for use. Avoid all possible sources of ignition (spark or flame).

**Section 8: Exposure Controls/Personal Protection****Engineering Controls:**

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash stations and safety showers are proximal to the work-station location.

**Personal Protection:**

Splash goggles. Lab coat. Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

**Personal Protection in Case of a Large Spill:**

Splash goggles. Full suit. Vapor respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

**Exposure Limits:**

TWA: 200 STEL: 500 CEIL: 300 (ppm) from OSHA (PEL) [United States] TWA: 50 (ppm) from ACGIH (TLV) [United States] SKIN TWA: 100 STEL: 150 from NIOSH [United States] TWA: 375 STEL: 560 (mg/m<sup>3</sup>) from NIOSH [United States] Consult local authorities for acceptable exposure limits.

**Section 9: Physical and Chemical Properties**

**Physical state and appearance:** Liquid.

**Odor:** Sweet, pungent, Benzene-like.

**Taste:** Not available.

**Molecular Weight:** 92.14 g/mole

**Color:** Colorless.

**pH (1% soln/water):** Not applicable.

**Boiling Point:** 110.6°C (231.1°F)

**Melting Point:** -95°C (-139°F)

**Critical Temperature:** 318.6°C (605.5°F)

**Specific Gravity:** 0.8636 (Water = 1)

**Vapor Pressure:** 3.8 kPa (@ 25°C)

**Vapor Density:** 3.1 (Air = 1)

**Volatility:** Not available.

**Odor Threshold:** 1.6 ppm

**Water/Oil Dist. Coeff.:** The product is more soluble in oil; log(oil/water) = 2.7

**Ionicity (in Water):** Not available.

**Dispersion Properties:** See solubility in water, diethyl ether, acetone.

**Solubility:**

Soluble in diethyl ether, acetone. Practically insoluble in cold water. Soluble in ethanol, benzene, chloroform, glacial acetic acid, carbon disulfide. Solubility in water: 0.561 g/l @ 25 deg. C.

## Section 10: Stability and Reactivity Data

**Stability:** The product is stable.

**Instability Temperature:** Not available.

**Conditions of Instability:** Heat, ignition sources (flames, sparks, static), incompatible materials

**Incompatibility with various substances:** Reactive with oxidizing agents.

**Corrosivity:** Non-corrosive in presence of glass.

**Special Remarks on Reactivity:**

Incompatible with strong oxidizers, silver perchlorate, sodium difluoride, Tetranitromethane, Uranium Hexafluoride. Frozen Bromine Trifluoride reacts violently with Toluene at -80 deg. C. Reacts chemically with nitrogen oxides, or halogens to form nitrotoluene, nitrobenzene, and nitrophenol and halogenated products, respectively.

**Special Remarks on Corrosivity:** Not available.

**Polymerization:** Will not occur.

## Section 11: Toxicological Information

**Routes of Entry:** Absorbed through skin. Dermal contact. Eye contact. Inhalation. Ingestion.

**Toxicity to Animals:**

WARNING: THE LC50 VALUES HEREUNDER ARE ESTIMATED ON THE BASIS OF A 4-HOUR EXPOSURE. Acute oral toxicity (LD50): 636 mg/kg [Rat]. Acute dermal toxicity (LD50): 14100 mg/kg [Rabbit]. Acute toxicity of the vapor (LC50): 440 24 hours [Mouse].

**Chronic Effects on Humans:**

CARCINOGENIC EFFECTS: A4 (Not classifiable for human or animal.) by ACGIH, 3 (Not classifiable for human.) by IARC. May cause damage to the following organs: blood, kidneys, the nervous system, liver, brain, central nervous system (CNS).

**Other Toxic Effects on Humans:**

Hazardous in case of skin contact (irritant), of ingestion, of inhalation. Slightly hazardous in case of skin contact (permeator).

**Special Remarks on Toxicity to Animals:**

Lowest Published Lethal Dose: LDL [Human] - Route: Oral; Dose: 50 mg/kg LCL [Rabbit] - Route: Inhalation; Dose: 55000 ppm/40min

**Special Remarks on Chronic Effects on Humans:**

Detected in maternal milk in human. Passes through the placental barrier in human. Embryotoxic and/or foetotoxic in animal. May cause adverse reproductive effects and birth defects (teratogenic). May affect genetic material (mutagenic)

**Special Remarks on other Toxic Effects on Humans:**

Acute Potential Health Effects: Skin: Causes mild to moderate skin irritation. It can be absorbed to some extent through the skin. Eyes: Causes mild to moderate eye irritation with a burning sensation. Splash contact with eyes also causes conjunctivitis, blepharospasm, corneal edema, corneal abrasions. This usually resolves in 2 days. Inhalation: Inhalation of vapor may cause respiratory tract irritation causing coughing and wheezing, and nasal discharge. Inhalation of high concentrations may affect behavior and cause central nervous system effects characterized by nausea, headache, dizziness, tremors, restlessness, lightheadedness, exhilaration, memory loss, insomnia, impaired reaction time, drowsiness, ataxia, hallucinations, somnolence, muscle contraction or spasticity, unconsciousness and coma. Inhalation of high concentration of vapor may also affect the cardiovascular system (rapid heart beat, heart palpitations, increased or decreased blood pressure, dysrhythmia, ), respiration (acute pulmonary edema, respiratory depression, apnea, asphyxia), cause vision disturbances and dilated pupils, and cause loss of appetite. Ingestion: Aspiration hazard. Aspiration of Toluene into the lungs may cause chemical pneumonitis. May cause irritation of the digestive tract with nausea, vomiting, pain. May have effects similar to that of acute inhalation. Chronic Potential Health Effects: Inhalation and Ingestion: Prolonged or repeated exposure via inhalation may cause central nervous system and cardiovascular symptoms similar to that of acute inhalation and ingestion as well liver damage/failure, kidney damage/failure (with hematuria, proteinuria, oliguria, renal tubular acidosis), brain damage, weight loss, blood (pigmented or nucleated red blood cells, changes in white blood cell count), bone marrow changes, electrolyte imbalances (Hypokalemia, Hypophosphatemia), severe, muscle weakness and Rhabdomyolysis. Skin: Repeated or prolonged skin contact may cause defatting dermatitis.

## Section 12: Ecological Information

### Ecotoxicity:

Ecotoxicity in water (LC50): 313 mg/l 48 hours [Daphnia (daphnia)]. 17 mg/l 24 hours [Fish (Blue Gill)]. 13 mg/l 96 hours [Fish (Blue Gill)]. 56 mg/l 24 hours [Fish (Fathead minnow)]. 34 mg/l 96 hours [Fish (Fathead minnow)]. 56.8 ppm any hours [Fish (Goldfish)].

**BOD5 and COD:** Not available.

### Products of Biodegradation:

Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

**Toxicity of the Products of Biodegradation:** The products of degradation are less toxic than the product itself.

**Special Remarks on the Products of Biodegradation:** Not available.

## Section 13: Disposal Considerations

### Waste Disposal:

Waste must be disposed of in accordance with federal, state and local environmental control regulations.

## Section 14: Transport Information

**DOT Classification:** CLASS 3: Flammable liquid.

**Identification:** : Toluene UNNA: 1294 PG: II

**Special Provisions for Transport:** Not available.

## Section 15: Other Regulatory Information

### Federal and State Regulations:

California prop. 65: This product contains the following ingredients for which the State of California has found to cause cancer, birth defects or other reproductive harm, which would require a warning under the statute: Toluene California prop. 65 (no significant risk level): Toluene: 7 mg/day (value) California prop. 65 (acceptable daily intake level): Toluene: 7 mg/day (value) California prop. 65: This product contains the following ingredients for which the State of California has found to cause birth defects which would require a warning under the statute: Toluene Connecticut hazardous material survey.: Toluene Illinois

toxic substances disclosure to employee act: Toluene Illinois chemical safety act: Toluene New York release reporting list: Toluene Rhode Island RTK hazardous substances: Toluene Pennsylvania RTK: Toluene Florida: Toluene Minnesota: Toluene Michigan critical material: Toluene Massachusetts RTK: Toluene Massachusetts spill list: Toluene New Jersey: Toluene New Jersey spill list: Toluene Louisiana spill reporting: Toluene California Director's List of Hazardous Substances.: Toluene TSCA 8(b) inventory: Toluene TSCA 8(d) H and S data reporting: Toluene: Effective date: 10/04/82; Sunset Date: 10/0/92 SARA 313 toxic chemical notification and release reporting: Toluene CERCLA: Hazardous substances.: Toluene: 1000 lbs. (453.6 kg)

**Other Regulations:**

OSHA: Hazardous by definition of Hazard Communication Standard (29 CFR 1910.1200). EINECS: This product is on the European Inventory of Existing Commercial Chemical Substances.

**Other Classifications:**

**WHMIS (Canada):**

CLASS B-2: Flammable liquid with a flash point lower than 37.8°C (100°F). CLASS D-2A: Material causing other toxic effects (VERY TOXIC).

**DSCL (EEC):**

R11- Highly flammable. R20- Harmful by inhalation. S16- Keep away from sources of ignition - No smoking. S25- Avoid contact with eyes. S29- Do not empty into drains. S33- Take precautionary measures against static discharges.

**HMS (U.S.A.):**

**Health Hazard:** 2

**Fire Hazard:** 3

**Reactivity:** 0

**Personal Protection:** h

**National Fire Protection Association (U.S.A.):**

**Health:** 2

**Flammability:** 3

**Reactivity:** 0

**Specific hazard:**

**Protective Equipment:**

Gloves. Lab coat. Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Wear appropriate respirator when ventilation is inadequate. Splash goggles.

**CHEMTREC Phone Number, Europe:** 703-527-3887

## Section 2 - Composition, Information on Ingredients

-----  
**CAS#:** 95-63-6  
**Chemical Name:** 1,2,4-Trimethylbenzene  
**%:** 98  
**EINECS#:** 202-436-9  
 -----

### Hazard Symbols:

XN N

### Risk Phrases:

10 20 36/37/38 51/53

## Section 3 - Hazards Identification

### EMERGENCY OVERVIEW

Warning! Flammable liquid and vapor. Harmful if inhaled. Causes eye, skin, and respiratory tract irritation. Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. Target Organs: Blood, central nervous system, respiratory system, eyes, skin.

### Potential Health Effects

**Eye:** Causes eye irritation. Causes redness and pain.  
**Skin:** Causes skin irritation. Causes redness and pain. May be harmful if absorbed through the skin.  
**Ingestion:** May cause irritation of the digestive tract. Aspiration of material into the lungs may cause chemical pneumonitis, which may be fatal. May be harmful if swallowed. May cause central nervous system depression.  
**Inhalation:** Harmful if inhaled. Causes respiratory tract irritation. May cause drowsiness, unconsciousness, and central nervous system depression.  
**Chronic:** Prolonged or repeated skin contact may cause dermatitis. May cause anemia and other blood cell abnormalities. Prolonged exposure may produce a narcotic effect. Prolonged or repeated exposure may cause nausea, dizziness, and headache.

#### Section 4 - First Aid Measures

- Eyes:** Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical aid.
- Skin:** Get medical aid. Immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes.
- Ingestion:** Do not induce vomiting. Possible aspiration hazard. Get medical aid immediately. Call a poison control center.
- Inhalation:** Get medical aid immediately. Remove from exposure and move to fresh air immediately. If breathing is difficult, give oxygen. Possible aspiration hazard. Do not use mouth-to-mouth resuscitation if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device.

**Notes to Physician:**

#### Section 5 - Fire Fighting Measures

- General Information:** As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. Vapors may form an explosive mixture with air. Vapors can travel to a source of ignition and flash back. Will burn if involved in a fire. Containers may explode in the heat of a fire. Flammable liquid and vapor.
- Extinguishing Media:** Use water spray to cool fire-exposed containers. Use water spray, dry chemical, carbon dioxide, or chemical foam.
- Autoignition Temperature:** 500 deg C ( 932.00 deg F)
- Flash Point:** 48 deg C ( 118.40 deg F)
- Explosion Limits: Lower:** 0.9 vol %
- Explosion Limits: Upper:** 6.4 vol %
- NFPA Rating:** health: 2; flammability: 2; instability: 0;

#### Section 6 - Accidental Release Measures

- General Information:** Use proper personal protective equipment as indicated in Section 8.
- Spills/Leaks:** Absorb spill with inert material (e.g. vermiculite, sand or earth), then place in suitable container. Wear a self contained breathing apparatus and appropriate personal protection. (See Exposure Controls, Personal Protection section). Remove all sources of ignition. Use a spark-proof tool. Do not let this chemical enter the environment.

#### Section 7 - Handling and Storage

- Handling:** Use spark-proof tools and explosion proof equipment. Do not get in eyes, on skin, or on clothing. Do not ingest or inhale. Use only in a chemical fume hood. Keep away from heat, sparks and flame.
- Storage:** Keep away from sources of ignition. Store in a cool, dry place. Store in a tightly closed container. Flammables-area.

#### Section 8 - Exposure Controls, Personal Protection

Chemical Name	ACGIH	NIOSH	OSHA - Final PELs
1,2,4-Trimethylbenzene	25 ppm TWA (listed under Trimethyl benzene).	25 ppm TWA; 125 mg/m <sup>3</sup> TWA	none listed

OSHA Vacated PELs: 1,2,4-Trimethylbenzene: 25 ppm TWA; 125 mg/m<sup>3</sup> TWA (listed under Trimethyl benzene)

**Engineering Controls:**

Use explosion-proof ventilation equipment. Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower. Use only under a chemical fume hood.

**Exposure Limits**

**Personal Protective Equipment**

- Eyes:** Wear appropriate protective eyeglasses or chemical safety goggles as described by OSHA's eye and face protection regulations in 29 CFR 1910.133 or European Standard EN166.
- Skin:** Wear appropriate protective gloves to prevent skin exposure.
- Clothing:** Wear appropriate protective clothing to prevent skin exposure.
- Respirators:** A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI Z88.2 requirements or European Standard EN 149 must be followed whenever workplace conditions warrant respirator use.

<b>Section 9 - Physical and Chemical Properties</b>
---

**Physical State:** Clear liquid  
**Color:** colorless  
**Odor:** aromatic odor  
**pH:** Not available  
**Vapor Pressure:** 7 mm Hg @ 44.4 deg C  
**Vapor Density:** 4.15 (air=1)  
**Evaporation Rate:** Not available  
**Viscosity:** Not available  
**Boiling Point:** 168 deg C @ 760 mmHg ( 334.40°F)  
**Freezing/Melting Point:** -44 deg C ( -47.20°F)  
**Decomposition Temperature:** Not available  
**Solubility in water:** Insoluble  
**Specific Gravity/Density:** 0.880 g/cm<sup>3</sup>  
**Molecular Formula:** C<sub>9</sub>H<sub>12</sub>  
**Molecular Weight:** 120.19

<b>Section 10 - Stability and Reactivity</b>
--

<b>Chemical Stability:</b>	Stable under normal temperatures and pressures.
<b>Conditions to Avoid:</b>	Incompatible materials, ignition sources, excess heat.
<b>Incompatibilities with Other Materials</b>	Strong oxidizing agents.
<b>Hazardous Decomposition Products</b>	Carbon monoxide, carbon dioxide.
<b>Hazardous Polymerization</b>	Will not occur.

<b>Section 11 - Toxicological Information</b>
---

**RTECS#:** CAS# 95-63-6: DC3325000

**LD50/LC50:** RTECS:  
**CAS# 95-63-6:** Inhalation, rat: LC50 = 18000 mg/m<sup>3</sup>/4H;  
 Oral, mouse: LD50 = 6900 mg/kg;  
 Oral, rat: LD50 = 5 gm/kg;

**Carcinogenicity:** 1,2,4-Trimethylbenzene - Not listed as a carcinogen by ACGIH, IARC, NTP, or CA Prop 65.

**Other:** See actual entry in RTECS for complete information.

<b>Section 12 - Ecological Information</b>
--

**Ecotoxicity:** Fish: Fathead Minnow: LC50 = 77.2 mg/L; 96 Hr; Flow-through at 25 C (pH 7.24)

**Other:** Do not empty into drains.

<b>Section 13 - Disposal Considerations</b>
---

Dispose of in a manner consistent with federal, state, and local regulations.

<b>Section 14 - Transport Information</b>
---

### Section 15 - Regulatory Information

#### European/International Regulations

European Labeling in Accordance with EC Directives

Hazard Symbols: XN N

Risk Phrases:

R 10 Flammable.

R 20 Harmful by inhalation.

R 36/37/38 Irritating to eyes, respiratory system and skin.

R 51/53 Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

Safety Phrases:

S 26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

S 61 Avoid release to the environment. Refer to special instructions/safety data sheets.

WGK (Water Danger/Protection)

CAS# 95-63-6: 3

Canada

CAS# 95-63-6 is listed on Canada's DSL List

Canadian WHMIS Classifications: B3, D1B, D2B

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations and the MSDS contains all of the information required by those regulations.

CAS# 95-63-6 is listed on Canada's Ingredient Disclosure List

#### US Federal

TSCA

CAS# 95-63-6 is listed on the TSCA  
Inventory.

### Section 16 - Other Information

**MSDS Creation Date:** 5/19/1999

**Revision #5 Date** 8/30/2007

**Revisions were made in Sections:** 3, 4, 5, 6, 7, 8, 9, 10, 11, 1

## Material Safety Data Sheet

### Xylenes MSDS

#### Section 1: Chemical Product and Company Identification

**Product Name:** Xylenes

**Catalog Codes:** SLX1075, SLX1129, SLX1042, SLX1096

**CAS#:** 1330-20-7

**RTECS:** ZE2100000

**TSCA:** TSCA 8(b) inventory: Xylenes

**CI#:** Not available.

**Synonym:** Xylenes; Dimethylbenzene; xylol; methyltoluene

**Chemical Name:** Xylenes (o-, m-, p- isomers)

**Chemical Formula:** C<sub>6</sub>H<sub>4</sub>(CH<sub>3</sub>)<sub>2</sub>

**Contact Information:**

**Sciencelab.com, Inc.**

14025 Smith Rd.

Houston, Texas 77396

US Sales: **1-800-901-7247**

International Sales: **1-281-441-4400**

Order Online: [ScienceLab.com](http://ScienceLab.com)

**CHEMTREC (24HR Emergency Telephone), call:**

1-800-424-9300

**International CHEMTREC, call:** 1-703-527-3887

**For non-emergency assistance, call:** 1-281-441-4400

#### Section 2: Composition and Information on Ingredients

**Composition:**

Name	CAS #	% by Weight
Xylenes	1330-20-7	100

**Toxicological Data on Ingredients:** Xylenes: ORAL (LD50): Acute: 4300 mg/kg [Rat]. 2119 mg/kg [Mouse]. DERMAL (LD50): Acute: >1700 mg/kg [Rabbit].

#### Section 3: Hazards Identification

**Potential Acute Health Effects:** Hazardous in case of skin contact (irritant, permeator), of eye contact (irritant), of ingestion, of inhalation.

**Potential Chronic Health Effects:**

CARCINOGENIC EFFECTS: 3 (Not classifiable for human.) by IARC. MUTAGENIC EFFECTS: Not available. TERATOGENIC EFFECTS: Not available. DEVELOPMENTAL TOXICITY: Not available. The substance may be toxic to blood, kidneys, liver, mucous membranes, bone marrow, central nervous system (CNS). Repeated or prolonged exposure to the substance can produce target organs damage.

#### Section 4: First Aid Measures

**Eye Contact:**

Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention.

**Skin Contact:**

In case of contact, immediately flush skin with plenty of water. Cover the irritated skin with an emollient. Remove contaminated clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention.

**Serious Skin Contact:**

Wash with a disinfectant soap and cover the contaminated skin with an anti-bacterial cream. Seek immediate medical attention.

**Inhalation:**

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention if symptoms appear.

**Serious Inhalation:**

Evacuate the victim to a safe area as soon as possible. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If the victim is not breathing, perform mouth-to-mouth resuscitation. Seek medical attention.

**Ingestion:**

Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention if symptoms appear.

**Serious Ingestion:** Not available.

## Section 5: Fire and Explosion Data

**Flammability of the Product:** Flammable.

**Auto-Ignition Temperature:** 464°C (867.2°F)

**Flash Points:** CLOSED CUP: 24°C (75.2°F). (Tagliabue.) OPEN CUP: 37.8°C (100°F).

**Flammable Limits:** LOWER: 1% UPPER: 7%

**Products of Combustion:** These products are carbon oxides (CO, CO<sub>2</sub>).

**Fire Hazards in Presence of Various Substances:**

Highly flammable in presence of open flames and sparks, of heat. Non-flammable in presence of shocks.

**Explosion Hazards in Presence of Various Substances:**

Risks of explosion of the product in presence of mechanical impact: Not available. Slightly explosive in presence of open flames and sparks, of heat.

**Fire Fighting Media and Instructions:**

Flammable liquid, soluble or dispersed in water. SMALL FIRE: Use DRY chemical powder. LARGE FIRE: Use alcohol foam, water spray or fog. Cool containing vessels with water jet in order to prevent pressure build-up, autoignition or explosion.

**Special Remarks on Fire Hazards:** Vapors may travel to source of ignition and flash back.

**Special Remarks on Explosion Hazards:**

Vapors may form explosive mixtures with air. Containers may explode when heated. May polymerize explosively when heated. An attempt to chlorinate xylene with 1,3-Dichloro-5,5-dimethyl-2,4-imidazolidindione (dichlorohydrantoin) caused a violent explosion

## Section 6: Accidental Release Measures

**Small Spill:** Absorb with an inert material and put the spilled material in an appropriate waste disposal.

**Large Spill:**

Flammable liquid. Keep away from heat. Keep away from sources of ignition. Stop leak if without risk. Absorb with DRY earth, sand or other non-combustible material. Do not touch spilled material. Prevent entry into sewers, basements or confined

areas; dike if needed. Be careful that the product is not present at a concentration level above TLV. Check TLV on the MSDS and with local authorities.

## Section 7: Handling and Storage

### Precautions:

Keep away from heat. Keep away from sources of ignition. Ground all equipment containing material. Do not ingest. Do not breathe gas/fumes/ vapor/spray. Wear suitable protective clothing. In case of insufficient ventilation, wear suitable respiratory equipment. If ingested, seek medical advice immediately and show the container or the label. Avoid contact with skin and eyes. Keep away from incompatibles such as oxidizing agents, acids.

### Storage:

Store in a segregated and approved area. Keep container in a cool, well-ventilated area. Keep container tightly closed and sealed until ready for use. Avoid all possible sources of ignition (spark or flame).

## Section 8: Exposure Controls/Personal Protection

### Engineering Controls:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash stations and safety showers are proximal to the work-station location.

### Personal Protection:

Splash goggles. Lab coat. Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Gloves.

### Personal Protection in Case of a Large Spill:

Splash goggles. Full suit. Vapor respirator. Boots. Gloves. A self contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

### Exposure Limits:

TWA: 100 (ppm) [Canada] TWA: 435 (mg/m<sup>3</sup>) [Canada] TWA: 434 STEL: 651 (mg/m<sup>3</sup>) from ACGIH (TLV) [United States]  
TWA: 100 STEL: 150 (ppm) from ACGIH (TLV) [United States] Consult local authorities for acceptable exposure limits.

## Section 9: Physical and Chemical Properties

**Physical state and appearance:** Liquid.

**Odor:** Sweetish.

**Taste:** Not available.

**Molecular Weight:** 106.17 g/mole

**Color:** Colorless. Clear

**pH (1% soln/water):** Not available.

**Boiling Point:** 138.5°C (281.3°F)

**Melting Point:** -47.4°C (-53.3°F)

**Critical Temperature:** Not available.

**Specific Gravity:** 0.864 (Water = 1)

**Vapor Pressure:** 0.9 kPa (@ 20°C)

**Vapor Density:** 3.7 (Air = 1)

**Volatility:** Not available.

**Odor Threshold:** 1 ppm

**Water/Oil Dist. Coeff.:** The product is more soluble in oil;  $\log(\text{oil/water}) = 3.1$

**Ionicity (in Water):** Not available.

**Dispersion Properties:** Not available.

**Solubility:**

Insoluble in cold water, hot water. Miscible with absolute alcohol, ether, and many other organic liquids.

## Section 10: Stability and Reactivity Data

**Stability:** The product is stable.

**Instability Temperature:** Not available.

**Conditions of Instability:** Heat, ignition sources, incompatibles

**Incompatibility with various substances:** Reactive with oxidizing agents, acids.

**Corrosivity:** Non-corrosive in presence of glass.

**Special Remarks on Reactivity:** Store away from acetic acid, nitric acid, chlorine, bromine, and fluorine.

**Special Remarks on Corrosivity:** Not available.

**Polymerization:** Will not occur.

## Section 11: Toxicological Information

**Routes of Entry:** Absorbed through skin. Dermal contact. Eye contact. Inhalation.

**Toxicity to Animals:**

WARNING: THE LC50 VALUES HEREUNDER ARE ESTIMATED ON THE BASIS OF A 4-HOUR EXPOSURE. Acute oral toxicity (LD50): 2119 mg/kg [Mouse]. Acute dermal toxicity (LD50): >1700 mg/kg [Rabbit]. Acute toxicity of the vapor (LC50): 5000 4 hours [Rat].

**Chronic Effects on Humans:**

CARCINOGENIC EFFECTS: 3 (Not classifiable for human.) by IARC. May cause damage to the following organs: blood, kidneys, liver, mucous membranes, bone marrow, central nervous system (CNS).

**Other Toxic Effects on Humans:** Hazardous in case of skin contact (irritant, permeator), of ingestion, of inhalation.

**Special Remarks on Toxicity to Animals:**

Lowest Lethal Dose: LDL [Human] - Route: Oral; Dose: 50 mg/kg LCL [Man] - Route: Oral; Dose: 10000 ppm/6H

**Special Remarks on Chronic Effects on Humans:**

Detected in maternal milk in human. Passes through the placental barrier in animal. Embryotoxic and/or foetotoxic in animal. May cause adverse reproductive effects (male and female fertility (spontaneous abortion and fetotoxicity)) and birth defects based animal data.

**Special Remarks on other Toxic Effects on Humans:**

Acute Potential Health Effects: Skin: Causes skin irritation. Can be absorbed through skin. Eyes: Causes eye irritation. Inhalation: Vapor causes respiratory tract and mucous membrane irritation. May affect central nervous system and behavior (General anesthetic/CNS depressant with effects including headache, weakness, memory loss, irritability, dizziness, giddiness, loss of coordination and judgement, respiratory depression/arrest or difficulty breathing, loss of appetite, nausea, vomiting, shivering, and possible coma and death). May also affects blood, sense organs, liver, and peripheral nerves. Ingestion: May cause gastrointestinal irritation including abdominal pain, vomiting, and nausea. May also affect liver and urinary system/kidneys. May cause effects similar to those of acute inhalation. Chronic Potential Health Effects: Chronic inhalation may affect the urinary system (kidneys) blood (anemia), bone marrow (hyperplasia of bone marrow) brain/behavior/Central Nervous system. Chronic inhalation may also cause mucosal bleeding. Chronic ingestion may affect the liver and metabolism (loss of appetite) and may affect urinary system (kidney damage)

## Section 12: Ecological Information

**Ecotoxicity:** Not available.

**BOD5 and COD:** Not available.

**Products of Biodegradation:**

Possibly hazardous short term degradation products are not likely. However, long term degradation products may arise.

**Toxicity of the Products of Biodegradation:** The products of degradation are less toxic than the product itself.

**Special Remarks on the Products of Biodegradation:** Not available.

## Section 13: Disposal Considerations

**Waste Disposal:**

Waste must be disposed of in accordance with federal, state and local environmental control regulations.

## Section 14: Transport Information

**DOT Classification:** CLASS 3: Flammable liquid.

**Identification :** Xylenes UNNA: 1307 PG: III

**Special Provisions for Transport:** Not available.

## Section 15: Other Regulatory Information

**Federal and State Regulations:**

Connecticut hazardous material survey.: Xylenes Illinois chemical safety act: Xylenes New York acutely hazardous substances: Xylenes Rhode Island RTK hazardous substances: Xylenes Pennsylvania RTK: Xylenes Minnesota: Xylenes Michigan critical material: Xylenes Massachusetts RTK: Xylenes Massachusetts spill list: Xylenes New Jersey: Xylenes New Jersey spill list: Xylenes Louisiana spill reporting: Xylenes California Director's List of Hazardous Substances: Xylenes TSCA 8(b) inventory: Xylenes SARA 302/304/311/312 hazardous chemicals: Xylenes SARA 313 toxic chemical notification and release reporting: Xylenes CERCLA: Hazardous substances.: Xylenes: 100 lbs. (45.36 kg)

**Other Regulations:**

OSHA: Hazardous by definition of Hazard Communication Standard (29 CFR 1910.1200). EINECS: This product is on the European Inventory of Existing Commercial Chemical Substances.

**Other Classifications:**

**WHMIS (Canada):**

CLASS B-2: Flammable liquid with a flash point lower than 37.8°C (100°F). CLASS D-2A: Material causing other toxic effects (VERY TOXIC).

**DSCL (EEC):**

R10- Flammable. R21- Harmful in contact with skin. R36/38- Irritating to eyes and skin. S2- Keep out of the reach of children. S36/37- Wear suitable protective clothing and gloves. S46- If swallowed, seek medical advice immediately and show this container or label.

**HMIS (U.S.A.):**

**Health Hazard:** 2

**Fire Hazard:** 3

**Reactivity:** 0

**Personal Protection:** h

**National Fire Protection Association (U.S.A.):**

**Health:** 2

**Flammability:** 3

**Reactivity:** 0

**Specific hazard:**

**Protective Equipment:**

Gloves. Lab coat. Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Wear appropriate respirator when ventilation is inadequate. Splash goggles.

**Section 16: Other Information**

**References:** Not available.

**Other Special Considerations:** Not available.

**Job Safety Analysis**

<b>JOB SAFETY ANALYSIS</b> Ctrl. No. GEN-001		DATE: 12/5/12	<input type="checkbox"/> NEW <input checked="" type="checkbox"/> REVISED	PAGE 1 of 2
JSA TYPE CATEGORY <b>Generic</b>	WORK TYPE <b>Construction - Excavation</b>	WORK ACTIVITY (Description) <b>Excavation / Trenching</b>		
DEVELOPMENT TEAM	POSITION / TITLE	REVIEWED BY:	POSITION / TITLE	
Ian Holst	Staff Engineer	Curtis Taylor	Health and Safety Officer	
		Michael Ritorto	Project Hydrogeologist	
<b>REQUIRED AND / OR RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT</b>				
<input type="checkbox"/> LIFE VEST <input checked="" type="checkbox"/> HARD HAT <input checked="" type="checkbox"/> LONG SLEEVED SHIRT <input type="checkbox"/> LIFELINE / BODY HARNESS <input checked="" type="checkbox"/> SAFETY GLASSES	<input type="checkbox"/> GOGGLES <input type="checkbox"/> FACE SHIELD <input checked="" type="checkbox"/> HEARING PROTECTION <input checked="" type="checkbox"/> SAFETY SHOES: <u>Steel-toe boots</u>	<input type="checkbox"/> AIR PURIFYING RESPIRATOR <input type="checkbox"/> SUPPLIED RESPIRATOR <input checked="" type="checkbox"/> PPE CLOTHING: <u>Fluorescent reflective vest or high visibility long sleeved clothing</u>	<input checked="" type="checkbox"/> GLOVES: <u>Leather or cut resistant</u> <input type="checkbox"/> OTHER	
<b>REQUIRED AND / OR RECOMMENDED EQUIPMENT</b>				
Jackhammer, Excavator, Hand Tools, Photoionization Detector, safety barrels or cones, caution tape, ladders, shovels, digging bars , power tools (cut off saw)				
<b>Commitment to LPS – All personnel onsite will actively participate in SPSA performance by verbalizing SPSAs throughout the day.</b>				
<b>EXCLUSION ZONE: Maintain 10' or greater exclusion zone around excavator while it is in motion.</b>				

Assess <b>1JOB STEPS</b>	Analyze <b>2POTENTIAL HAZARDS</b>	Act <b>3CRITICAL ACTIONS</b>
1. Pre-Clearance Protocol.	1a. <b>CONTACT:</b> Damage to underground utility.  1b. <b>ENERGY SOURCE/CONTACT:</b> Property damage; Pressurized water mains. Pressurized gas mains. Sewer lines. Underground electric.  1c. <b>FALL:</b> Slip ,Trip or Fall.	1a. Confirm that (if applicable) "Call Before You Dig" and local utility companies were contacted prior to trenching in order to confirm utility mark outs. Must have a case # before digging.  1b. Pre-clearing of the trenching location must be conducted to a minimum of 4 vertical feet below the ground surface (8 feet minimum for Critical Zone) using hand tools (shovel and non-metallic dig bar) prior to trenching. Supervisor should be contacted to discuss appropriate pre-clearing depth. Complete subsurface clearance checklist.  1c. Be aware of the conditions when walking, or loading equipment and working. Walk within established pathway avoiding uneven surfaces. Remove potential slip/trip/fall hazards.
2. Set up work zone.	2a. <b>CONTACT/CAUGHT:</b> Injury from equipment.  2b. <b>FALL:</b> Slip ,Trip or Fall.	2a. Isolate work area from hazards with cones, barricades, and caution tape. Utilize a flag person when necessary (i.e., third party traffic in area). Install traffic signs in roadways and for detours. Spotters will maintain and enforce exclusion zone.  2b. See 1c.

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards, energy source; Energy Source – electricity, pressure, compression/tension.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift". Avoid general statements such as, "be careful".

Assess <sup>1</sup> JOB STEPS	Analyze <sup>2</sup> POTENTIAL HAZARDS	Act <sup>3</sup> CRITICAL ACTIONS
3. Trenching Activity.	<p>3a. <b>CONTACT:</b> Injury due to contact with machine.</p> <p>3b. <b>FALL:</b> Slip ,Trip or Fall.</p> <p>3c. <b>EXPOSURE:</b> Noise, Dust, Concrete- Asphalt, petroleum hydrocarbon vapors.</p>	<p>3a. Spotter(s) required for all heavy equipment operation. No worker shall be allowed inside the exclusion zone or along the trench/excavation area while any equipment is digging. A minimum exclusion zone greater than the length of the equipment boom must be established. Workers only allowed in exclusion zone if the operator is in "Hands Off "mode. Operator will not operate equipment until worker is out of exclusion zone.</p> <p>3b. Any trench/excavation deeper than 4' must have a ladder within 25' of any worker in the excavation. At least 3' (rungs) shall be above the top of the excavation. All spoil piles shall be maintained 2' minimum from edge of excavation.</p> <p>3c. Air monitoring using a calibrated photoionization detector (PID) will be used to monitor the breathing zone of the work area. If a reading of &gt;5ppm is recorded, the oversight personnel must temporarily cease work, instruct all Site personnel to step away from the area of elevated readings.</p>
4. Setting Trench protections if necessary.	<p>4a. <b>CAUGHT:</b> Injury due to contact with failed trench.</p> <p>4b. <b>CONTACT/CAUGHT:</b> Injury due rigging activities and entering exclusion zone during lifting and/or transport of shoring box/material.</p> <p>4c. <b>FALL:</b> Possible injury due to fall into excavation.</p>	<p>4a. To prevent cave-ins and avoid caught by/between, excavations over 5' in depth shall have engineer approved shoring, sheeting or digging box. Top of protection shall be at least 2' above top of excavation.</p> <p>4b. Use only inspected rigging with 2, 3 or 4 lift points; wear cut-resistant gloves. Rigging to be hooked up to factory installed hook up points on equipment. Control load with non-conductive tag lines with workers out of exclusion zone. Don't stand underneath suspended load; wear steel toed boots and hard hat.</p> <p>4c. Shoring to be set and sides will be backfilled to avoid fall hazards before workers allowed to enter area. Operator will be in "HANDS OFF" mode before workers enter work area to unhook rigging. An inspected ladder set 3' above top of shoring will be used to enter and exit shoring. Workers will use three points of contact when using ladder.</p>
5. Secure/Leave Site. <b>If backfilling, see excavation backfilling and compaction JSA for potential hazards and critical actions.</b>	<p>5a. <b>FALL:</b> Potential Slip ,Trip or Fall hazards.</p>	<p>5a. See 1c. All open excavations must be backfilled or secured prior to departure with steel plates, orange construction fence or temporary chain link fencing.</p>

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy source – electricity, pressure, compression/tension.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift". Avoid general statements such as, "be careful".

<b>REQUIRED AND / OR RECOMMENDED EQUIPMENT</b>					
<b>Commitment to LPS – All personnel onsite will actively participate in SPSA performance by verbalizing SPSAs throughout the day.</b>					
<b>EXCLUSION ZONE (EZ): Maintain a minimum 10' exclusion zone around equipment and loads while it is in motion.</b>					
<b>Assess 1JOB STEPS</b>	<b>Analyze 2POTENTIAL HAZARDS</b>	<b>Act 3CRITICAL ACTIONS</b>			
1. Set-up work zone.	<b>1a. CONTACT:</b> Moving equipment, third party traffic.	1a. Secure work area using barricades and caution tape. Use flagmen to control third party traffic. <b>Maintain minimum exclusion zone (EZ) of 10'</b> around equipment and live loads.  1a. When machines are operating, all workers will remain outside of EZ unless operator is in "HANDS OFF" mode.			
2. Assembly of concrete form (i.e., plywood, lumber, rebar, etc.).	<b>2a. CONTACT:</b> Contacting materials being lowered into work area. Potential for cuts and abrasions and to be contacted by nails while assembling.  <b>2b. EXERTION:</b> Muscle strain.  <b>2c. EXPOSURE:</b> Noise, dust, fumes.  <b>2d. CAUGHT:</b> Pinch points, Caught between, Crushed	2a. Workers will keep fingers and limbs out of the line of fire of tools, equipment and live loads. Workers will use inspected rigging and only attach rigging to manufacturer installed lifting points. Loads will be controlled with non-conductive tag lines from outside the EZ. Wear hard hat. See JSA for applicable cutting tool.  2b. When transporting and working with forms, workers will keep backs straight, knees bent, and keep loads close to their body. Any load more than 50 lbs., will be lifted by two or more workers or a mechanical lifting device.  2c. Workers will wear hearing protection, face shields and chaps when using all power tools. Fuel powered tools will be fueled away from the work zone in a well-ventilated area. Refueling will be done after a minimum cool down period of 2 minutesSee JSA for applicable cutting tool.  2d. Keep hands away from rigging while hooking/unhooking materials; wear leather gloves.			
3. Set up concrete trucks and chute.	<b>3a. CONTACT/CAUGHT:</b> Potential for truck to contact personnel, fingers to be pinched while setting up hoses.  <b>3b. OVEREXERTION:</b> Strain, pulled muscles.	3a. Spotters will guide concrete trucks into position; wheel chocks will be set before work begins when trucks are parked. Workers will stay out of exclusion zone until truck is parked and secured.  3b. All workers will keep back straight and bend their knees when lifting. Two workers will be used when load exceeds 50 lbs.			
4. Pour concrete into forms.	<b>4b. CONTACT:</b> Wet concrete.	4b. Possible splashing from concrete, portable eye wash stations shall be set up in close proximity for easy access; wear safety glasses. Nitrile or latex gloves shall be worn to eliminate skin contact with concrete.			
5. Vibrate to settle and remove air from poured cement.	<b>5a. ENERGY SOURCE:</b> Potential for personnel to be exposed to live electricity.  <b>5b. OVEREXERTION:</b> Potential muscle strain while vibrating cement, stepping over forms/rebar reinforcements.	5a. Electrical tools shall be inspected for defects prior to being used. Any extension cords shall be heavy duty rated and be free from defects (no exposed wires). All electrical connections shall be connected to GFCI outlets.  5b. Constantly check/observe where you are walking; wear steel toed boots. Keep back straight and knees bent while settling concrete with vibrator.			

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards. Energy source Electricity, pressure, compression/tension.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift". Avoid general statements such as, "be careful".

Assess <b><sup>1</sup>JOB STEPS</b>	Analyze <b><sup>2</sup>POTENTIAL HAZARDS</b>	Act <b><sup>3</sup>CRITICAL ACTIONS</b>
6. Cleanup of work area and tools.	6a. <b>CONTACT/FALL:</b> Potential slip, trip, and fall on materials and tools left in the work area.	6a. Place additional materials and tools in designated storage areas. Remove any garbage from the work area.

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards. Energy source Electricity, pressure, compression/tension.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift". Avoid general statements such as, "be careful".

<b>JOB SAFETY ANALYSIS</b>		Ctrl. No. <b>GEN-004</b>	DATE 11/4/2013	<input type="checkbox"/> NEW <input checked="" type="checkbox"/> REVISED	PAGE 1 of 2
JSA TYPE CATEGORY: <b>Generic</b>	WORK TYPE: <b>Drilling</b>	WORK ACTIVITY (Description): <b>Direct Push Soil Borings / Well Installation</b>			
<b>DEVELOPMENT TEAM</b>	<b>POSITION / TITLE</b>	<b>REVIEWED BY:</b>	<b>POSITION / TITLE</b>		
Jeffrey Wills	Project Hydrogeologist	Maria Drakos	Project Manager		
Thalassa Sodre	Staff Assistant Engineer				
<b>REQUIRED AND / OR RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT</b>

<b>REQUIRED AND / OR RECOMMENDED EQUIPMENT</b>					
Geoprobe or Truck-Mounted Direct Push Drill Rig, Hand Tools, Photoionization Detector and/or Multi-Gas Meter (or equivalent), Macrocore liners, Liner Opening Tool, 42" Cones & Flags					
<b>COMMITMENT TO LPS</b> - All personnel onsite will actively participate in SPSA performance by verbalizing SPSAs throughout the day.					
<b>Exclusion Zone Policy</b> – All non-essential personnel will maintain a distance of 10' feet from drilling equipment while moving/engaged.					
<b>“SHOW ME YOUR HANDS”</b>					
<b>Driller and helper should show that hands are clear from controls and moving parts</b>					
<b>Assess 1JOB STEPS</b>	<b>Analyze 2POTENTIAL HAZARDS</b>	<b>Act 3CRITICAL ACTIONS</b>			
1. Mobilization of drilling rig (ensure the Subsurface Clearance Protocol and Drill Rig Checklist are completed)	1a. <b>CONTACT:</b> Equipment/property damage.  1b. <b>FALL:</b> Slip/trip/fall hazards.	1a. The drill rig's tower/derrick will be lowered and secured prior to mobilization. 1a. A spotter should be utilized while moving the drill rig. If personnel move into the path of the drill rig, the drill rig will be stopped until the path is again clear. Use a spotter for all required backing operations. 1a. Set-up the work area and position equipment in a manner that eliminates or reduces the need for backing of support trucks and trailers. 1a. When backing up truck rig with an attached trailer use a second spotter if there is tight clearance simultaneously on multiple sides of the equipment or if turning angles limit driver visibility. 1a. Inspect the driving path for uneven terrain. Level or avoid if needed. 1a. Drill rig should have a minimum <b>exclusion zone of 10 feet</b> for non-essential personnel (i.e., driller helper, geologist) when the rig is moving/ in operation.  1b. Inspect walking path for uneven terrain, weather-related hazards (i.e., ice, puddles, snow, etc.), and obstructions prior to mobilizing equipment. 1b. Do not climb over stored materials/equipment; walk around. Practice good housekeeping. 1b. Use established pathways and walk on stable, secure ground.			
2. Raising tower/derrick of drill rig	2a. <b>CONTACT:</b> Overhead hazards.  2b. <b>CONTACT:</b> Pinch Points when raising the rig and instability of rig	2a. Prior to raising the tower/derrick, the area above the drilling rig will be inspected for wires, tree limbs, piping, or other structures, that could come in contact with the rig's tower and/or drilling rods or tools. 2a. Maintain a safe distance from overhead structures.  2b. Inspect the equipment prior to use and avoid pinch points. 2b. Lower out riggers on rig to ensure stability prior to raising rig tower/derrick. 2b. If the rig needs to be mounted, be sure to use three points of contact.			
3. Advancement of drilling equipment and well installation	3a. <b>CONTACT:</b> Flying debris	3a. Be aware of and avoid potential lines of fire and wear required PPE such as eye, ear, and hand protection.			

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy Source – electricity, pressure, compression/tension.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift". Avoid general statements such as, "be careful".

<p>3. Advancement of drilling equipment and well installation (Continued)</p>	<p>3b. <b>EXPOSURE:</b> Noise and dust.</p> <p>3c. <b>CAUGHT:</b> Limb/extremity pinching; abrasion/crushing.</p> <p>3d. <b>CONTACT:</b> Equipment imbalance during advancement of drill equipment.</p> <p>3e. <b>EXPOSURE:</b> Inhalation of contamination/vapors.</p> <p>3f. <b>FALL:</b> Slip/trip/fall hazards.</p> <p>3g. <b>EXERTION:</b> Potential for muscle strain/injury while lifting and installing well casings, lifting sand bags, and/or lifting rods.</p>	<p>3b. Wet borehole area with sprayer to minimize dust. 3b. Stand upwind and keep body away from rig. 3b. Dust mask should be worn if conditions warrant. 3b. Wear hearing protection when the drill rig is in operation.</p> <p>3c. Always wear leather gloves when making connections and using hand tools; wear cut-resistant (i.e., Kevlar) gloves when handling cutting tools. 3c. Inspect the equipment prior to use for potential pinch points. Keep hands away from being between pinch points and use of tools is preferable compared to fingers and hands. 3c. Inspect drill head for worn surface or missing teeth; replace if damaged or blunt. 3c. Ensure all jewelry is removed, loose clothing is secured, and PPE is secured close to the body. 3c. All non-essential personnel should stay away from the immediate work area; position body out of the line-of-fire of equipment. 3c. Drillers and helpers will understand and use the "Show Me Your Hands" Policy. 3c. Spinning rods/casing have an <b>exclusion zone of 10 feet</b> while in operation.</p> <p>3d. Drillers will advance the borehole with caution to avoid causing the rig to become imbalanced and/or tip. 3d. The blocking and leveling devices used to secure the rig will be inspected by drillers and Roux personnel regularly to see if shifting has occurred. 3d. In addition, personnel and equipment that are non-essential to the advancement of the borehole will be positioned away from the rig at a distance that is at least as far as the boom is high (<b>minimum exclusion zone of 10 feet</b>).</p> <p>3e. Air monitoring using a calibrated photoionization detector (PID) will be used to periodically to monitor the breathing zone of the work area. 3e. If a reading of &gt;5ppm is recorded, the Roux field personnel must temporarily cease work, instruct all Site personnel to step away from the area of elevated readings and inform the Roux PM of the condition. The Roux PM will then recommend additional precautions in accordance with the site specific health and safety plan.</p> <p>3f. Contain drill cuttings and drilling water to prevent fall hazards from developing in work area. 3f. See 1b.</p> <p>3g. Keep back straight and bend at the knees. 3g. Utilize team lifting for objects over 50lbs. 3g. Use mechanical lifting device for odd shaped objects.</p>
<p>4. Decontaminate equipment.</p>	<p>4a. <b>EXPOSURE/CONTACT:</b> To contamination (e.g., Separate Phase Hydrocarbons (SPH), contaminated groundwater, vapors).</p> <p>4b. <b>EXPOSURE:</b> To chemicals in cleaning solution including ammonia.</p>	<p>4a. Wear chemical-resistant disposable gloves and safety glasses. 4a. Contain decontamination water so that it does not spill. 4a. Use an absorbent pad to clean spills, if necessary. 4a. See 3b.</p> <p>4b. See 4a. Review MSDS to ensure appropriate precautions are taken and understood.</p>

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy Source – electricity, pressure, compression/tension.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift". Avoid general statements such as, "be careful".

Gina Masciello	Project Scientist	Maria Drakos	Project Manager	
Thalassa Sodre	Staff Assistant Engineer			
<b>REQUIRED AND / OR RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT</b>				
<input type="checkbox"/> LIFE VEST <input checked="" type="checkbox"/> HARD HAT <input type="checkbox"/> LIFELINE / BODY HARNESS <input checked="" type="checkbox"/> SAFETY GLASSES	<input type="checkbox"/> GOGGLES <input type="checkbox"/> FACE SHIELD <input type="checkbox"/> HEARING PROTECTION <input checked="" type="checkbox"/> SAFETY SHOES: <u>Composite-toe or steel toe boots</u>	<input type="checkbox"/> AIR PURIFYING RESPIRATOR <input type="checkbox"/> SUPPLIED RESPIRATOR <input checked="" type="checkbox"/> PPE CLOTHING: <u>Fluorescent reflective vest or high visibility clothing</u>	<input checked="" type="checkbox"/> GLOVES: <u>Leather, Nitrile and cut resistant</u> <input checked="" type="checkbox"/> OTHER: <u>Knee pads, Insect Repellant, sunscreen (as needed)</u>	
<b>REQUIRED AND / OR RECOMMENDED EQUIPMENT</b>				
42 inch Safety Cones, Caution Tape, Interface Probe and/or Water Level Meter, 20 lb. Fire Extinguisher, Buckets. Tools as needed: Socket Wrench, Screw Driver, Crow Bar, Mallet, and Wire Brush.				
<b>Commitment to LPS – All personnel onsite will actively participate in SPSA performance by verbalizing SPSAs throughout the day.</b>				
<b>Assess 1JOB STEPS</b>	<b>Analyze 2POTENTIAL HAZARDS</b>	<b>Act 3CRITICAL ACTIONS</b>		
1. Mobilization to monitoring well(s).	1a. <b>FALL:</b> Personal injury from slip/trip/fall due to uneven terrain and/or obstructions.  1b. <b>CONTACT:</b> With traffic/third parties.  1c. <b>EXPOSURE:</b> To biological hazards.	1a. Inspect pathway and plan for most suitable designated pathway prior to mobilization. 1a. Use established pathways, walk and/or drive on stable, secure, ground and avoid steep hills or uneven terrain.  1b. Identify potential traffic sources and delineate work area with 42 inch traffic safety cones. Position vehicle to protect against oncoming traffic. Use caution tape to provide a more visible delineation of the work area if necessary. 1b. Wear appropriate PPE including high visibility clothing or reflective vest. 1b. Face traffic, maintain eye contact with oncoming vehicles, and establish a safe exit route.  1c. Inspect work area for bees and insects. 1c. Use insect/tick repellent as necessary.		
2. Open/close well.	2a. <b>OVEREXERTION:</b> Muscle strain.  2b. <b>CAUGHT:</b> Pinch points associated with removing/replacing manholes and working with hand tools.  2c. <b>EXPOSURE:</b> To potential hazardous vapors.	2a. Use proper lifting techniques; keep back straight, lift with legs and bend knees when reaching to open/close well.  2b. Wear leather gloves or cut resistant gloves when working with well cover and hand tools. 2b. Use proper tools (ratchet and pry bar for well cover) and inspect before use. 2b. Do not put fingers under well cover.  2c. No open flames/heat sources. 2c. To minimize exposure to vapors allow well to vent after opening it and before sampling activities begin. 2c. Stand up-wind, if possible, to avoid vapors.		
3. Gauge well.	3a. <b>CONTACT:</b> With contamination (e.g. contaminated groundwater).  3b. <b>CONTACT:</b> With traffic.	3a. Wear chemical-resistant disposable gloves and safety glasses when gauging well. 3a. Insert and remove probe slowly to avoid splashing. 3a. Use an absorbent pad to clean probe.  3b. See 1b.		
4. Purge and sample well.	4a. <b>EXPOSURE/CONTACT:</b> To contamination (e.g., SPH, contaminated groundwater, vapors) and/or sample preservatives.	4a. Open and fill sample jars slowly to avoid splashing and contact with preservatives. 4a. Wear cut-resistant gloves and chemical-resistant disposable gloves when sampling. 4a. Fill sample containers over purge container to avoid spilling water onto the ground. 4a. Use an absorbent pad to clean spills.		
<b>Assess 1JOB STEPS</b>	<b>Analyze 2POTENTIAL HAZARDS</b>	<b>Act 3CRITICAL ACTIONS</b>		

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.  
<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy Source – electricity, pressure, compression/tension.  
<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift". Avoid general statements such as, "be careful".

<p>4. Purge and sample well (Continued).</p>	<p>4b. <b>CONTACT:</b> Personal injury from cuts, abrasions, or punctures by glassware or sharp objects.</p> <p>4c. <b>EXERTION:</b> Muscle strain while carrying equipment.</p> <p>4d. <b>CONTACT:</b> With traffic.</p>	<p>4b. To avoid spills or breakage, place sample ware on even surface. 4b. Do not over tighten caps on glass sample ware. 4b. Wear cut-resistant (i.e., Kevlar) gloves and chemical-resistant disposable gloves when sampling and handling glassware (i.e., VOA vials) or when using cutting tools.</p> <p>4c. Use proper lifting techniques when handling/moving equipment; bend knees and keep back straight. 4c. Use mechanical assistance or team lifting techniques when equipment is 50lbs or heavier. 4c. Make multiple trips to carry equipment.</p> <p>4d. See 1b.</p>
<p>5. Management of purge water.</p>	<p>5a. <b>EXPOSURE/CONTACT:</b> To contamination (e.g., SPH, contaminated groundwater, vapors).</p> <p>5b. <b>EXERTION:</b> Muscle strain from lifting/carrying and moving containers.</p>	<p>5a. Do not overfill container and pour liquids in such a manner that they do not splash. 5a. Properly dispose of used materials/PPE in appropriate container in designated storage area.</p> <p>5b. Use proper lifting techniques when lifting / carrying or moving container(s) (see 4c.). 5b. Do not overfill container(s).</p>
<p>6. Decontaminate equipment.</p>	<p>6a. <b>EXPOSURE/CONTACT:</b> To contamination (e.g., SPH, contaminated groundwater, vapors).</p>	<p>6a. Work on the upwind side, where possible, of decon area. 6a. Wear chemical-resistant disposable gloves and safety glasses. 6a. Use an absorbent pad to clean spills.</p>

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy Source – electricity, pressure, compression/tension..

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. <b>REQUIRED AND / OR RECOMMENDED EQUIPMENT</b>					
Required Equipment: Drum Cart and/or forklift, safety cones, and caution tape					
<b>Commitment to LPS</b> – All personnel onsite will actively participate in SPSA performance by verbalizing SPSAs throughout the day.					
<b>EXCLUSION ZONE: A 10' exclusion zone will be maintained around forklift.</b>					
<b>Assess 1JOB STEPS</b>		<b>Analyze 2POTENTIAL HAZARDS</b>		<b>Act 3CRITICAL ACTIONS</b>	
1. Secure Work Area, Inspect 55-gal drums for proper condition, labeling, check drum ring and bolts.  <b>See JSA Forklift for potential hazards and critical actions.</b>  <b>Inspect forklift before operating to ensure it is in good condition and functioning correctly.</b>		1a. <b>FALL:</b> Tripping/falling due to uneven surface terrain.  1b. <b>EXPOSURE:</b> Drums could potentially be damaged and contain hazardous material.  1c. <b>OVEREXERTION:</b> Potential muscle strain while loosening or tightening bolts.		1a. Inspect walking path for uneven terrain, weather-related hazards (i.e., tree debris, puddles, etc.), and obstructions prior to accessing work area. 1a. Use established pathways and walk on stable, secure ground. 1a. Secure work area and coordinate and communicate the planned work activities with other personnel working in the area. 1a. 1b. When inspecting drums, don nitrile gloves under cut resistant glove. If drum is not properly labeled, do not open and cease all drum transport related activities. Immediately contact project manager and inform him/her of drum situation. 1b. Do not continue drum transport activities until further actions are determined by the project manager. 1b. If the drum is properly labeled, but leaking, improperly sealed, or in poor condition, place drum in an over-pack drum. 1c. Keep back straight and secure grip on drum ratchet.	
2. When using a forklift, position drum clamp in between drum ribs. When using a drum dolly, secure fastening hook on top of drum.		2a. <b>CAUGHT/CONTACT:</b> Hazards between drum/forklift clamp or dolly fastener/drum. 2b. <b>OVEREXERTION/CONTACT:</b> Hazards associated with balancing drum on drum cart (leaning back and pulling drum with your back).		2a. Position drum clamp between the ribs on the drum to prevent possible slipping. Do not place hands between drum clamp and drum; wear cut resistant gloves. 2b. Do not jerk body. Wear cut-resistant gloves and steel toed boots. 2b. Ensure that drums are not over-filled.	
3. Transport drums to designated location and disengage drum clamp.		3a. <b>EXPOSURE/ CONTACT:</b> Hazards associated with drum transport; skin contact and vapors. 3b. <b>CAUGHT:</b> Pinching hazards associated with maneuvering drums. 3c. <b>FALL:</b> Tripping/ falling due to obstructions and uneven terrain.		3a. <b>Maintain a 10' EZ around forklift.</b> Ensure drum clamp is secure on drum before beginning to move. 3a. Ensure that drum is sealed and lid is tight before beginning to move. 3b. Do not place fingers between drum clamp and drum; wear cut resistant gloves. 3c. See 2b. 3c. If path is too rough for drum cart, utilize forklift. 3c. Utilize a spotter while operating the forklift.	

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy source – electricity, pressure, compression/tension.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. <b>REQUIRED AND / OR RECOMMENDED EQUIPMENT</b>					
Required Equipment: Air Knife, Vactor Truck (Vac Truck), Compressor, Hand Tools, Photoionization Detector, Multi-Gas Meter, Traffic Cones, 20 lb. Fire Extinguisher, "Work Area" and/or "Exclusion Zone" Signs					
<b>Commitment to LPS</b> – All personnel onsite will actively participate in SPSA performance by verbalizing SPSAs throughout the day.					
<b>EXCLUSION ZONE: A 10 foot exclusion zone will be maintained around air knife and/or soil vacuum operations.</b>					
<b>Assess</b> <b>1<sup>1</sup>JOB STEPS</b>	<b>Analyze</b> <b>2<sup>2</sup>POTENTIAL HAZARDS</b>	<b>Act</b> <b>3<sup>3</sup>CRITICAL ACTIONS</b>			
1. Verify pre-clearance protocol.	1a. <b>CONTACT:</b> Underground utility damage; property damage; personal injury.  See Site Walk Inspection JSA for potential hazards.	1a. Confirm that local utility companies were contacted prior to drilling. 1a. Walk the Site to evaluate utility markings and review maps ( <b>See Site Walk Inspection JSA for critical actions</b> ). 1a. Review pre-clearing checklist form and sub-surface clearance form. Pre-clearing protocol indicates that clearance must be conducted to a minimum of 5 vertical feet below ground surface or 8 vertical feet below ground surface in the critical zone using hand tools.			
2. Mobilize/demobilize and establish work area.	2a. <b>See Mobilization / Demobilization JSA for potential hazards.</b>	2a. <b>See Mobilization / Demobilization JSA for critical actions.</b>			
3. Pre-clear with air knife and soil vacuum, and/or clearance with hand tools	3a. <b>CONTACT:</b> Flying debris.  3b. <b>EXPOSURE/ENERGY SOURCE:</b> Inhalation/exposure to hazardous vapors; inhalation/exposure to dust; electrocution.  3c. <b>CONTACT:</b> Damage to unknown/known utility with air knife.  3d. <b>OVEREXERTION:</b> Poor body positioning when handling equipment and materials.	3a. <b>Maintain 10 foot exclusion zone.</b> Only (air knife/vac truck) operator and designated helper shall remain within exclusion zone while air knife/vac truck is active. Use the required PPE, including (at a minimum), cut resistant gloves, safety glasses with side shields, and long sleeved shirt. 3a. Wear a face shield to protect face from flying debris when using air knife. 3a. Aim air knife tip away from self and others, so to avoid line-of-fire hazards. 3a. Use anti-whip devices on compressor hoses.  3b. Monitor breathing zone with a calibrated PID and multi-gas meter. If vapors sustain levels > 5 ppm, the Roux field personnel must temporarily cease work, instruct all Site personnel to step away from the area of elevated readings and inform the Roux Project Manager of the condition. The Roux Project Manager will then recommend additional precautions. 3b. Wear dust masks as needed. 3b. Ensure no open flames/heat sources are present within the work area. 3b. Ensure vac truck is properly grounded prior to use. 3b. Do not use metal dig bar; use fiberglass or equivalent.  3c. Avoid contacting utilities directly with the high pressure air stream and using the air knife tip as a physical digging tool. 3c. Keep the air knife tip constantly moving to reduce direct pressure on a potential utility. 3c. Increase the distance between air knife tip and soil/utility. 3c. Continually remove soil slurry from hole with vacuum, which may have an abrasive effect on utility casings.  3d. Use proper body positioning and lifting techniques that minimizes muscle strain; keep back straight, lift with legs, keep			

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object;

Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy Source – electricity, pressure, compression/tension.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift." Avoid general statements such as, "be careful."

<p>3. Pre-clearing with air knife and soil vacuum, and/or clearance with hand tools (continued)</p>	<p>3d. <b>OVEREXERTION:</b> (continued) Poor body positioning when handling equipment and materials.</p> <p>3e. <b>FALL:</b> Tripping/falling due to uneven terrain, weather conditions, and materials/equipment stored at the Site.</p> <p>3f. <b>CAUGHT:</b> Pinch points associated with the equipment and vacuum hose.</p> <p>3g. <b>EXPOSURE:</b> Noise from vac truck and/or air compressor.</p>	<p>load close to body, and never reach with a load.</p> <p>3d. Ensure that loads are balanced to reduce the potential for muscle strain.</p> <p>3d. Two people or a mechanical lifting aid are required when lifting objects over 50 lb. or when the shape makes the object difficult to lift.</p> <p>3e. Inspect walking path for uneven terrain, weather-related hazards (e.g., ice, puddles, snow, etc.), and obstructions prior to mobilizing equipment.</p> <p>3e. Walk around any stored materials/equipment; do not climb over. Practice good housekeeping.</p> <p>3e. Use established pathways and walk on stable, secure ground.</p> <p>3e. Equipment and tools will be stored at the lowest point of potential energy and out of the walkway and immediate work area (i.e., tools should not be propped against walls or nearby equipment or vehicles).</p> <p>3e. Equipment and tools that are not anticipated to be used will be returned to a storage area that is out of the immediate work area.</p> <p>3e. Ensure power cords/hoses are grouped when used within the work area. Mark out cords/hoses that cross pathways with traffic cones.</p> <p>3e. Ensure all Site personnel and equipment stay a minimum of 2 feet from an open hole. Mark out open holes with traffic cones/caution tape, etc.</p> <p>3e. Pre-cleared location will be finished flush to grade as to prevent a slip/trip hazard.</p> <p>3f. Always wear cut-resistant gloves when making connections and using hand tools.</p> <p>3f. Inspect the equipment prior to use for potential pinch points.</p> <p>3f. Test all emergency shutdown devices prior to using equipment.</p> <p>3f. Ensure all jewelry is removed, loose clothing is secured, and PPE is secured close to the body.</p> <p>3f. <b>All non-essential personnel shall maintain a 10 foot exclusion zone;</b> position body out of the line-of-fire of equipment.</p> <p>3f. <b>Drillers and helpers will understand and use the "Show Me Your Hands Policy".</b></p> <p>3g. Wear hearing protection when vac truck and air compressor are in operation. Otherwise, if sound levels exceed 85 dB, don hearing protection.</p>
<p>4. Move drum to staging area using drum cart.</p>	<p>4a. <b>EXPOSURE/CONTACT:</b> Contamination (e.g., Separate Phase Hydrocarbons (SPH), contaminated groundwater, soil).</p> <p>4b. <b>EXERTION:</b> Muscle strain while maneuvering drums with drum cart/lift gate.</p> <p>4c. <b>CAUGHT:</b> Pinch points associated with handling drum lid.</p>	<p>4a. Wear chemically resistant gloves (i.e., Nitrile; worn in addition to cut resistant gloves).</p> <p>4a. Do not overfill drums. Ensure that the drum lids are attached securely.</p> <p>4a. Stage all drums in the designated storage area (per Roux Project Manager) and ensure they are labeled.</p> <p>4b. See 3d. Do not overfill drums. Use lift gate on back of truck to load and unload drums or drum cart to transport drums.</p> <p>4c. Ensure that fingers are not placed under the lid of the drum. Wear cut-resistant gloves. Use 15/16" ratchet while sealing drum lid.</p>
<p>5. Decontaminate equipment and tools.</p>	<p>5a. <b>EXPOSURE/CONTACT:</b> To contamination (e.g., Separate Phase Hydrocarbons (SPH), contaminated groundwater, vapors).</p> <p>5b. <b>EXPOSURE:</b> To chemicals in cleaning solution.</p>	<p>5a. See 4a.</p> <p>5a. Contain decontamination water (closed lid) so that it does not spill.</p> <p>5a. Use an absorbent pad to clean spills, if necessary.</p> <p>5a. Store all impacted materials/PPE in a designated storage container (per Roux Project Manager) and ensure the container is labeled.</p> <p>5b. See 4a.</p>

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object;

Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy Source – electricity, pressure, compression/tension.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. DEVELOPMENT TEAM		POSITION / TITLE	REVIEWED BY:	POSITION / TITLE	
Michael Hodess		Staff Environmental Scientist	Curtis Taylor	SHSM	
			Mike Ritorto	Project Hydrogeologist	
<b>REQUIRED AND / OR RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT</b>					
<input type="checkbox"/> LIFE VEST <input checked="" type="checkbox"/> HARD HAT <input type="checkbox"/> LIFELINE / BODY HARNESS <input checked="" type="checkbox"/> SAFETY GLASSES <input checked="" type="checkbox"/> FLAME RESISTANT CLOTHING (as needed)	<input type="checkbox"/> GOGGLES <input type="checkbox"/> FACE SHIELD: <input checked="" type="checkbox"/> HEARING PROTECTION: (as needed) <input checked="" type="checkbox"/> SAFETY SHOES: Composite-toe or steel toe boots	<input type="checkbox"/> AIR PURIFYING RESPIRATOR <input type="checkbox"/> SUPPLIED RESPIRATOR <input checked="" type="checkbox"/> PPE CLOTHING: Fluorescent reflective vest or high visibility clothing	<input checked="" type="checkbox"/> GLOVES: Leather, Nitrile and cut resistant <input checked="" type="checkbox"/> OTHER: Insect Repellant, sunscreen (as needed)		
<b>REQUIRED AND / OR RECOMMENDED EQUIPMENT</b>					
Recommended Equipment; 42" traffic cones, caution tape, trowel					
<b>COMMITMENT TO LPS - All personnel onsite will actively participate in SPSA performance by verbalizing SPSAs throughout the day.</b>					
<b>EXCLUSION ZONE: A minimum 10' exclusion zone will be maintained around moving equipment, if present.</b>					
<b>Assess 1JOB STEPS</b>	<b>Analyze 2POTENTIAL HAZARDS</b>	<b>Act 3CRITICAL ACTIONS</b>			
1. Secure location	<p>1a. <b>CONTACT:</b> Personnel and vehicular traffic may enter the work area.</p> <p>1b. <b>FALL:</b> Tripping/falling due to uneven terrain or entry/exit from excavations.</p> <p>1c. <b>EXPOSURE:</b> Exposure to sun and excessive heat, possibly causing sunburn, heat exhaustion or heat stroke,  Exposure to cold temperatures possibly causing cold stress.  Skin burn as a result of fire if occurred. Exposure to explosive vapors due to tank farm operations,  Biological hazards - ticks, bees/wasps, poison ivy, thorns, insects, etc.</p>	<p>1a. If in an area with foot or vehicle traffic, delineate the work area with 42" traffic cones and/or caution tape to prevent exposure to traffic and inform others of work activity.</p> <p>1a. Wear reflective vest and/or fluorescent clothing.</p> <p>1a. Face the direction of any vehicular traffic. Position vehicle to protect worker from traffic.</p> <p>1a. Communicate work activity with adjacent work areas.</p> <p>1b. Inspect pathways and work area for uneven terrain, weather-related hazards (i.e., ice, puddles, snow, etc.), and obstructions.</p> <p>1b. Use established pathways and walk on stable, secure ground.</p> <p>1b. Stage equipment and tools will in a convenient, stable, and orderly manner. Store equipment at lowest potential energy.</p> <p>1b. Roux employees should stay 5 feet from in-progress excavations and trenches. Should entry to an excavation be appropriate (when stabilization is complete), ladders must be employed for steep embankments, excavations, pits, and trenches.</p> <p>1c. Wear sunscreen with an SPF 15 or greater whenever 30 minutes or more of exposure is expected.</p> <p>1c. Use a tent to shade the work area from direct sunlight particularly when warm temperatures are also expected.</p> <p>1c. Be aware of the location of all Site personnel.</p> <p>1c. Watch for heat stress symptoms (muscle cramping, exhaustion, dizziness, rapid and shallow breathing).</p> <p>1c. Watch for cold stress symptoms (severe shivering, slowing of body movement, weakness, stumbling or inability to walk, collapse).</p> <p>1c. Take breaks for rest and water as necessary. Move to an area that is well shaded or an area with air conditioning (i.e., car, site trailer, etc.). Move to an area that is warm.</p> <p>1c. No open flames/heat sources.</p> <p>1c. Flame resistant clothing must be worn when specified by Site policy.</p> <p>1c. Cell phones should be disabled when specified by Site policy.</p> <p>1c. Pre-treat field clothing with Permethrin prior to site visit to kill/repel ticks and insects.</p> <p>1c. Wear long sleeved shirts and tuck in (or tape) pant legs into socks or boots to prevent ticks from reaching skin.</p> <p>1c. Spray insect repellent containing DEET on exposed skin when working in overgrown areas of the Site.</p> <p>1c. Inspect area to avoid contact with biological hazards.</p> <p>1c. Wear cut-resistant gloves when handling branches, shrubs, etc. that may lie within the walking path.</p> <p>1c. Personnel shall examine themselves and co-worker's outer clothing for ticks periodically when onsite.</p> <p>1c. If skin comes in contact with poison ivy, wash skin thoroughly with soap and water.</p>			

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy Source – electricity, pressure, compression/tension.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift". Avoid general statements such as, "be careful".

Assess <sup>1</sup> JOB STEPS	Analyze <sup>2</sup> POTENTIAL HAZARDS	Act <sup>3</sup> CRITICAL ACTIONS
2. Collect Soil Sample	<p>2a. <b>CONTACT:</b> Personal injury from pinch points, cuts, and abrasions from sampling equipment tools, and material within soil sample. Personal injury from contact with moving equipment while sampling.</p> <p>2b. <b>EXPOSURE:</b> Exposure to contamination (impacted soil) and/or lab preservatives.</p>	<p>2a. Wear cut-resistant (i.e., Kevlar) gloves under chemical-resistant disposable gloves when handling soil samples and sampling jars. 2a. Where possible, use trowel or equivalent tool to avoid contact with soil. 2a. If sampling from bucket of heavy equipment, ensure all equipment is off and operator utilizes the "show me your hands" policy. 2a. See 1a.</p> <p>2b. Wear chemical-resistant disposable gloves over cut resistant gloves to protect hands when handling samples; use containment material or plastic sheeting to protect surrounding areas. 2b. When collecting soil sample from hand auger, put large zip lock bag over entire auger to prevent spillage of soil on to the ground. 2b. Open sample jars slowly and fill carefully to avoid contact with preservatives.</p>
3. Decontaminate equipment	<p>3a. <b>EXPOSURE/CONTACT:</b> Contamination (e.g., Separate Phase Hydrocarbons (SPH), contaminated vapors and/or soil).</p> <p>3b. <b>EXPOSURE:</b> Chemicals in cleaning solution including ammonia.</p>	<p>3a. Wear chemical-resistant disposable gloves and safety glasses. 3a. Use an absorbent pad to clean spills. 3a. Properly dispose of used materials/PPE in provided drums in designated drum storage area.</p> <p>3b. Wear chemical-resistant disposable gloves and safety glasses. 3b. Work on the upwind side of decon area. 3b. Use an absorbent pad to clean spills. 3b. Properly dispose of used materials/PPE in provided drums in designated drum storage area.</p>

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy Source – electricity, pressure, compression/tension.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift". Avoid general statements such as, "be careful".

<b>REQUIRED AND / OR RECOMMENDED EQUIPMENT</b>				
9/16" Socket and Wrench, Non-Toxic Clay, Teflon-Lined Tubing, Masterflex Tubing, 3-Way Stopcock, Air Pump with Low Flow, Dry Cal, Enclosure (Bucket), Helium Gas Canister, Summa Canisters and Flow Controllers, MultiRae Gas Meters, CO2/O2 Meters, Helium Detector, Tubing Cutter, 42-inch Safety Cones, Caution Tape or Retractable Cone Bars				
<b>COMMITMENT TO LPS - All personnel onsite will actively participate in SPSA performance by verbalizing SPSAs throughout the day.</b>				
<b>Exclusion Zone: Maintain a 5-Foot Exclusion Zone for Non-Essential Personnel</b>				
ACCESS JOB STEPS	ANALYZE <sup>2</sup> POTENTIAL HAZARDS	ACT <sup>3</sup> CRITICAL ACTIONS		
1. Define and secure work area.	1a. <b>FALL:</b> Potential tripping hazards.  1b. <b>CONTACT:</b> Potential contact with moving vehicles or pedestrians.  1c. <b>OVEREXERTION:</b> Muscle strain while lifting and carrying equipment.	1a. Ensure work area is secure and inform others (third party) of work activity. 1a. Remove tripping hazards and inspect walking path for uneven terrain, weather-related hazards (i.e., ice, puddles, snow, etc.), and obstructions prior to mobilizing equipment.  1b. If working alongside roads, look both ways before entering roadways, face traffic, and utilize work vehicle to protect employees. 1b. Delineate work area (including vehicles) with traffic safety cones and caution tape or retractable cone bars. 1b. Maintain a 5 foot exclusion zone. 1b. Wear high visibility clothing or reflective safety vest.  1c. When carrying equipment to/from work area, keep back straight, lift with legs, keep load close to body, never reach with a load. Ensure that loads are balanced. Use mechanical assistance/make multiple trips to carry equipment.		
2. Remove well cover / close well cover.	2a. <b>CONTACT/CAUGHT:</b> Pinch points and scrapes associated with hand tools and well covers.  2b. <b>FALL:</b> Potential tripping hazards associated with installing bolts.  2c. <b>OVEREXERTION:</b> Physical exertion to remove bolts that were over torque or stripped.	2a. Keep hands away from pinch points. 2a. Use hand tools to remove and replace well covers. 2a. Wear cut-resistant gloves. 2a. Use knee pads or kneeling mat when repetitive kneeling on rough ground is anticipated.  2b. Place security bolts in secure location so not to create tripping hazards. Replace security bolts so that they fit flush with monitoring well covers.  2c. Replace any security bolts that show signs of stripping. Do not over tighten. 2c. Use body positioning and bending techniques that minimize muscle strain; keep back straight, bend at the knees. 2c. See 2a.		
3. Remove / replace brass caps at the end of the sample tubing.	3a. <b>CONTACT:</b> Pinch points associated with hand tools and brass caps.  3b. <b>EXPOSURE:</b> Potential pathway for vapors to migrate to land surface.	3a. Use wrench to remove and replace brass caps. 3a. Wear cut-resistant gloves to protect against pinch points and scrapes.  3b. Replace brass caps immediately upon completion to avoid soil vapors migrating to the surface through sample tubing. 3b. Stand up wind of sample point location.		

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy Source - Electricity, pressure, tension/compression, torque.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift". Avoid general statements such as, "be careful".

ACCESS 1JOB STEPS	ANALYZE 2POTENTIAL HAZARDS	ACT 3CRITICAL ACTIONS
4. Set up soil vapor sampling equipment and calibration of meters.	4a. <b>FALL:</b> Potential tripping hazards associated with equipment and tubing.  4b. <b>CONTACT:</b> Pinch points associated with handling equipment.  4c. <b>EXPOSURE:</b> Inhalation of calibration gas and helium.	4a. Place equipment in one area close to the sampling location. 4a. Keep tubing slack to a minimum and locate the summa canister as close to the sampling location as possible. 4a. Avoid stepping over equipment and tubing.  4b. Do not place fingers/hands under sampling equipment. 4b. Make multiple trips when unloading equipment in work area. 4b. Wear cut-resistant gloves to protect against pinch points while handling sampling equipment.  4c. Review MSDS for each type of calibration gas used before calibrating. 4c. Calibrate meters in a well vented area and keep air flow regulator away from face. 4c. Close valve on canisters after use to avoid inhalation of excess helium or calibration gas. 4c. Stand up wind of bucket during helium tracer gas test.
5. Screen sample tubing with multiple gas and CO <sub>2</sub> /O <sub>2</sub> meters.	5a. <b>FALL:</b> Potential tripping hazards associated with equipment.  5b. <b>EXPOSURE:</b> Inhalation of soil vapor	5a. See 4a 5a. Identify area where equipment is to be stored within the work area (away from main walking path). 5a. Don't leave equipment on the ground. Return equipment to storage area between uses.  5b. See 3b. 5b. Use master flex to connect tubing to meter. 5b. Stand on opposite side of meter vent and upwind soil vapor point during screening activities.
6. Cleaning Work Area.	6a. <b>FALL:</b> Potential tripping hazards associated with equipment and tubing.  6b. <b>CONTACT:</b> Storing and transport of equipment in car.	6a. See 4a. 6a. See 5a.  6b. Ensure that equipment is placed securely in the vehicle. Do not stack equipment on top of each other. Secure equipment so that it will not slide while being transported. 6b. Wear cut-resistant gloves while handling/loading equipment.

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy Source – Electricity, pressure, tension/compression, torque.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift". Avoid general statements such as, "be careful".

<b>JOB SAFETY ANALYSIS</b> Cntrl#: GEN-015		DATE 1/29/14	<input type="checkbox"/> NEW <input checked="" type="checkbox"/> REVISED	PAGE 1 of 2
JSA TYPE CATEGORY: <b>GENERIC</b>	WORK TYPE: <b>Drilling</b>	WORK ACTIVITY (Description): <b>Well Development</b>		
<b>DEVELOPMENT TEAM</b>	<b>POSITION / TITLE</b>	<b>REVIEWED BY:</b>	<b>POSITION / TITLE</b>	
Amy Hoffman	Staff Geologist	Mike Ritorto	Project Hydrogeologist	
		Curtis Taylor	SHSM	
<b>REQUIRED AND / OR RECOMMENDED PERSONAL PROTECTIVE EQUIPMENT</b>				
<input type="checkbox"/> LIFE VEST <input checked="" type="checkbox"/> HARD HAT <input type="checkbox"/> LIFELINE / BODY HARNESS <input checked="" type="checkbox"/> SAFETY GLASSES	<input type="checkbox"/> GOGGLES <input type="checkbox"/> FACE SHIELD <input checked="" type="checkbox"/> HEARING PROTECTION (as needed) <input checked="" type="checkbox"/> SAFETY SHOES: <u>Composite-toe or steel toe boots</u>	<input type="checkbox"/> AIR PURIFYING RESPIRATOR <input type="checkbox"/> SUPPLIED RESPIRATOR <input checked="" type="checkbox"/> PPE CLOTHING: <u>Fluorescent reflective vest or high visibility clothing</u>	<input checked="" type="checkbox"/> GLOVES: <u>Leather, Nitrile and cut resistant</u> <input checked="" type="checkbox"/> OTHER: <u>Insect repellent, sunscreen (as needed)</u>	
<b>REQUIRED AND / OR RECOMMENDED EQUIPMENT</b>				
Required Equipment as needed: Truck Rig or support truck, Trailer, 42 inch Safety cones and flags, Caution Tape, Interface Probe, Power Source, Submersible Pump, Surge Block/Plunger, 20 lb. Fire Extinguisher, Holding Tanks and/or Buckets, Tools as needed: Socket and Pipe Wrench, Screw Driver, Pry Bar, Ratchet, Vault Key.				
<b>COMMITMENT TO LPS</b> - All personnel onsite will actively participate in SPSA performance by verbalizing SPSAs throughout the day.				
<b>Maintain a 20 Foot Exclusion Zone During Development Activities</b>				
<b>“SHOW ME YOUR HANDS”</b>				
<b>Driller and helper should show that hands are clear from controls and moving parts</b>				
<b>Assess 1JOB STEPS</b>	<b>Analyze 2POTENTIAL HAZARDS</b>	<b>Act 3CRITICAL ACTIONS</b>		
1. Mobilization / Demobilization <b>(Review Mobilization and Demobilization JSA)</b>	1a. <b>CONTACT:</b> Equipment/property damage.  1b. <b>FALL:</b> Slip/trip/fall hazards.	1a. The truck rig's tower/derrick will be lowered and secured prior to mobilization. 1a. Set-up the work area / position equipment in a manner that eliminates or reduces the need for backing of trucks and trailers. 1a. All non-essential personnel should <b>maintain an exclusion zone of 20 feet.</b> 1a. Beep horn twice before backing up. 1a. When backing up with an attached trailer use a spotter if there is tight clearance simultaneously on multiple sides of the equipment or if turning angles limit driver visibility. Stay away from the line-of-fire. 1a. Inspect the driving path for uneven terrain. Level or avoid if needed.  1b. Inspect walking path for uneven terrain, weather-related hazards (i.e., ice, puddles, snow, etc.), and obstructions prior to mobilizing equipment. 1b. Do not climb over stored materials/equipment; walk around. Store equipment at lowest potential energy.		
2. Open/close well.	2a. <b>OVEREXERTION:</b> Muscle strain (some wells have large vault covers).  2b. <b>CAUGHT:</b> Pinch points associated with removing/replacing manholes and working with hand tools.  2c. <b>EXPOSURE:</b> Potentially hazardous vapors.  2d. <b>CONTACT:</b> Traffic.	2a. Keep back straight, lift with legs, keep load close to body, and never reach with a load. Ensure that loads are balanced to reduce the potential for muscle strain. Two people are required when lifting objects over 50 lbs or when the shape makes the object difficult to lift.  2b. Wear leather gloves when working with well vault/cover and hand tools. Do not put fingers under well vault/cover. 2b. Use ratchet and pry bar for well cover and inspect before use.  2c. No open flames/heat sources. 2c. Allow well to vent after opening it and before starting development activities to minimize exposure to vapors. Air monitoring must be performed prior to set up and during the well development activities. Work on upwind side of well.  2d. Wear required PPE including high visibility clothing or reflective vest. 2d. Delineate work area with 42" safety cones and/or other barriers. Position vehicle to protect against oncoming traffic. 2d. Face traffic, maintain eye contact with oncoming vehicles, and establish a safe exit route.		

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy Source – Electricity, Pressure, compression, tension, torque.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift". Avoid general statements such as, "be careful".

Assess <b><sup>1</sup>JOB STEPS</b>	Analyze <b><sup>2</sup>POTENTIAL HAZARDS</b>	Act <b><sup>3</sup>CRITICAL ACTIONS</b>
3. Develop well (mechanical surging).	<p>3a. <b>CAUGHT:</b> Cut hazards and finger pinch points.</p> <p>3b. <b>CONTACT/EXPOSURE:</b> Contamination (e.g., SPH, contaminated groundwater, vapors).</p> <p>3c. <b>OVEREXERTION:</b> Muscle strain from lifting equipment.</p> <p>3d. <b>CONTACT:</b> Injury while handling wench line/cable, or with active surging equipment</p>	<p>3a. See 2b.</p> <p>3a. Use required PPE including leather/cut-resistant gloves when handling development equipment. Identify finger/hand pinch points. Keep hands away from active surge equipment.</p> <p>3a. All non-essential personnel should <b>maintain an exclusion zone of 20 feet.</b></p> <p>3b. See 2c.</p> <p>3b. Wear Nitrile gloves and safety glasses. Insert and remove surge block/plunger and line/cable slowly to avoid splashing at the surface.</p> <p>3b. Use an absorbent pad to clean any spills.</p> <p>3c. See 2a.</p> <p>3c. Use mechanical device to insert and remove surge block/plunger if greater than 50lb.</p> <p>3d. If using a drill rig, inspect all wench lines/cables for any kinks or if frayed prior to use. Replace any damaged lines/cables. Review <b>Drill Rig checklist prior to development activities.</b></p> <p>3d. See 3a.</p>
4. Purging well (pumping water to holding tanks/drums/buckets).	<p>4a. <b>CAUGHT:</b> Pinch points associated with connecting hose to tank. Pinch points associated with handling pump and hoses.</p> <p>4b. <b>FALL:</b> Using side mounted ladder when attaching hose to tank.  Slip, trip, fall from lines/hoses</p> <p>4c. <b>CONTACT:</b> Contamination (e.g., SPH, contaminated groundwater).</p> <p>4d. <b>EXERTION:</b> Muscle strain from lifting/carrying equipment.</p> <p>4e. <b>FALL:</b> Spilled purge water.</p>	<p>4a. See 3a.</p> <p>4a. Ensure that fingers are not placed near coupling when attaching and securing hose(s). Do not place fingers under pump/hoses. Wear leather or cut-resistant gloves when handling pump/hose(s).</p> <p>4a. Keep hands clear from any line of fire.</p> <p>4b. Inspect ladder steps make sure steps are not bent/damaged and free of debris/fluid.</p> <p>4b. Use three points of contact at all times when using ladder.</p> <p>4b. Utilize anti-whip cords on all compressed hoses. Keep hoses and lines coiled and organized out of designated walking paths around the work zone.</p> <p>4c. Secure water hose.</p> <p>4c. Do not overfill tanks, and purge/transfer liquids in such a manner that they do not splash. (See 3b).</p> <p>4c. Dispose of used materials/PPE in the designated impacted PPE container.</p> <p>4d. Use lifting techniques to minimize muscle strain when carrying equipment. When possible, use mechanic means to lift equipment.</p> <p>4d. Use two people to lift any equipment or material that is over 50 lbs.</p> <p>4e. Clean up any spills using absorbent pads or spill kits.</p>
5. Decontaminate equipment	<p>5a. <b>CONTACT/EXPOSURE:</b> Contamination (e.g., SPH, contaminated groundwater, vapors).</p> <p>5b. <b>EXPOSURE/CONTACT:</b> Chemicals in cleaning solution</p>	<p>5a. See 3b.</p> <p>5b. Decontaminate equipment in well-ventilated area. Wear nitrile gloves to avoid skin contact with cleaning solutions.</p>

<sup>1</sup> Each Job or Operation consists of a set of tasks / steps. Be sure to list all the steps needed to perform job.

<sup>2</sup> A hazard is a potential danger. Break hazards into five types: Contact - victim is struck by or strikes an object; Caught - victim is caught on, caught in or caught between objects; Fall - victim falls to ground or lower level (includes slips and trips); Exertion - excessive strain or stress / ergonomics / lifting techniques; Exposure - inhalation/skin hazards; Energy Source – Electricity, Pressure, compression, tension, torque.

<sup>3</sup> Using the first two columns as a guide, decide what actions or procedures are necessary to eliminate or minimize the risk. List the recommended safe operating procedures. Say exactly what needs to be done - such as "use two persons to lift". Avoid general statements such as, "be careful".

**Heat and Cold Stress Guidelines**

## Protecting Workers from Heat Stress

### Heat Illness

Exposure to heat can cause illness and death. The most serious heat illness is heat stroke. Other heat illnesses, such as heat exhaustion, heat cramps and heat rash, should also be avoided.

There are precautions your employer should take any time temperatures are high and the job involves physical work.

### Risk Factors for Heat Illness

- High temperature and humidity, direct sun exposure, no breeze or wind
- Low liquid intake; previous heat illnesses
- Heavy physical labor
- Waterproof clothing
- No recent exposure to hot workplaces

### Symptoms of Heat Exhaustion

- Headache, dizziness, or fainting
- Weakness and wet skin
- Irritability or confusion
- Thirst, nausea, or vomiting

### Symptoms of Heat Stroke

- May be confused, unable to think clearly, pass out, collapse, or have seizures (fits)
- May stop sweating

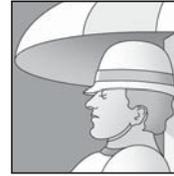

### To Prevent Heat Illness, Your Employer Should

- Provide training about the hazards leading to heat stress and how to prevent them.
- Provide a lot of cool water to workers close to the work area. At least one pint of water per hour is needed.

For more complete information:

- Schedule frequent rest periods with water breaks in shaded or air-conditioned areas.
- Routinely check workers who are at risk of heat stress due to protective clothing and high temperature.
- Consider protective clothing that provides cooling.

## How You Can Protect Yourself and Others

- Know signs/symptoms of heat illnesses; monitor yourself; use a buddy system.
- Block out direct sun and other heat sources.
- Drink plenty of fluids. Drink often and BEFORE you are thirsty.
- Avoid beverages containing alcohol or caffeine.
- Wear lightweight, light colored, loose-fitting clothes.
- Be aware that poor physical condition, some health problems (such as high blood pressure or diabetes), pregnancy, colds and flu, and some medications can increase your personal risk. If you are under treatment, ask your healthcare provider.

## What to Do When a Worker is Ill from the Heat

- Call a supervisor for help. If the supervisor is not available, call 911.
- Have someone stay with the worker until help arrives.
- Move the worker to a cooler/shaded area.
- Remove outer clothing.
- Fan and mist the worker with water; apply ice (ice bags or ice towels).
- Provide cool drinking water, if able to drink.

**IF THE WORKER IS NOT ALERT or seems confused, this may be a heat stroke. CALL 911 IMMEDIATELY and apply ice as soon as possible.**

**If you have any questions or concerns, call OSHA at 1-800-321-OSHA.**

#### I. INTRODUCTION.

Operations involving high air temperatures, radiant heat sources, high humidity, direct physical contact with hot objects, or strenuous physical activities have a high potential for inducing heat stress in employees engaged in such operations. Such places include: iron and steel foundries, nonferrous foundries, brick-firing and ceramic plants, glass products facilities, rubber products factories, electrical utilities (particularly boiler rooms), bakeries, confectioneries, commercial kitchens, laundries, food canneries, chemical plants, mining sites, smelters, and steam tunnels.

Outdoor operations conducted in hot weather, such as construction, refining, asbestos removal, and hazardous waste site activities, especially those that require workers to wear semipermeable or impermeable protective clothing, are also likely to cause heat stress among exposed workers.

##### A. CAUSAL FACTORS.

1. Age, weight, degree of physical fitness, degree of acclimatization, metabolism, use of alcohol or drugs, and a variety of medical conditions such as hypertension all affect a person's sensitivity to heat. However, even the type of clothing worn must be considered. Prior heat injury predisposes an individual to additional injury.
2. It is difficult to predict just who will be affected and when, because individual susceptibility varies. In addition, environmental factors include more than the ambient air temperature. Radiant heat, air movement, conduction, and relative humidity all affect an individual's response to heat.

##### B. DEFINITIONS.

1. The American Conference of Governmental Industrial Hygienists (1992) states that workers should not be permitted to work when their deep body temperature exceeds 38°C (100.4°F).
2. **Heat** is a measure of energy in terms of quantity.

3. A **calorie** is the amount of heat required to raise 1 gram of water 1°C (based on a standard temperature of 16.5 to 17.5°C).
4. **Conduction** is the transfer of heat between materials that contact each other. Heat passes from the warmer material to the cooler material. For example, a worker's skin can transfer heat to a contacting surface if that surface is cooler, and vice versa.
5. **Convection** is the transfer of heat in a moving fluid. Air flowing past the body can cool the body if the air temperature is cool. On the other hand, air that exceeds 35°C (95°F) can increase the heat load on the body.
6. **Evaporative cooling** takes place when sweat evaporates from the skin. High humidity reduces the rate of evaporation and thus reduces the effectiveness of the body's primary cooling mechanism.
7. **Radiation** is the transfer of heat energy through space. A worker whose body temperature is greater than the temperature of the surrounding surfaces radiates heat to these surfaces. Hot surfaces and infrared light sources radiate heat that can increase the body's heat load.
8. **Globe temperature** is the temperature inside a blackened, hollow, thin copper globe.
9. **Metabolic heat** is a by-product of the body's activity.
10. **Natural wet bulb (NWB) temperature** is measured by exposing a wet sensor, such as a wet cotton wick fitted over the bulb of a thermometer, to the effects of evaporation and convection. The term natural refers to the movement of air around the sensor.
11. **Dry bulb (DB) temperature** is measured by a thermal sensor, such as an ordinary mercury-in-glass thermometer, that is shielded from direct radiant energy sources.

## II. HEAT DISORDERS AND HEALTH EFFECTS.

- A. **HEAT STROKE** occurs when the body's system of temperature regulation fails and body temperature rises to critical levels. This condition is caused by a combination of highly variable factors, and its occurrence is difficult to predict. Heat stroke is a medical emergency. The primary signs and symptoms of heat stroke are confusion; irrational behavior; loss of consciousness; convulsions; a lack of sweating (usually); hot, dry skin; and an abnormally high body temperature, e.g., a rectal temperature of 41°C (105.8°F). If body temperature is too high, it causes death. The elevated metabolic temperatures caused by a combination of work load and environmental heat load, both of which contribute to heat stroke, are also highly variable and difficult to predict.

If a worker shows signs of possible heat stroke, professional medical treatment should be obtained immediately. The worker should be placed in a shady area and the outer clothing should be removed. The worker's skin should be wetted and air movement around the worker should be increased to improve evaporative cooling until professional methods of cooling are initiated and the seriousness of the condition can be assessed. Fluids should be replaced as soon as possible. The medical outcome of an episode of heat stroke depends on the victim's physical fitness and the timing and effectiveness of first aid treatment.

Regardless of the worker's protests, no employee suspected of being ill from heat stroke should be sent home or left unattended unless a physician has specifically approved such an order.

- B. **HEAT EXHAUSTION.** The signs and symptoms of heat exhaustion are headache, nausea, vertigo, weakness, thirst, and giddiness. Fortunately, this condition responds readily to prompt treatment. Heat exhaustion should not be dismissed lightly, however, for several reasons. One is that the fainting associated with heat exhaustion can be dangerous because the victim may be operating machinery or controlling an operation that should not be left unattended; moreover, the victim may be injured when he or she faints. Also, the signs and symptoms seen in heat exhaustion are similar to those of heat stroke, a medical emergency.

Workers suffering from heat exhaustion should be removed from the hot environment and given fluid replacement. They should also be encouraged to get adequate rest.

- C. **HEAT CRAMPS** are usually caused by performing hard physical labor in a hot environment. These cramps have been attributed to an electrolyte imbalance caused by sweating. It is important to understand that cramps can be caused by both too much and too little salt. Cramps appear to be caused by the lack of water replenishment. Because sweat is a hypotonic solution ( $\pm 0.3\%$  NaCl), excess salt can build up in the body if the water lost through sweating is not replaced. Thirst cannot be relied on as a guide to the need for water; instead, water must be taken every 15 to 20 minutes in hot environments.

Under extreme conditions, such as working for 6 to 8 hours in heavy protective gear, a loss of sodium may occur. Recent studies have shown that drinking commercially available carbohydrate-electrolyte replacement liquids is effective in minimizing physiological disturbances during recovery.

- D. **HEAT COLLAPSE ("Fainting").** In heat collapse, the brain does not receive enough oxygen because blood pools in the extremities. As a result, the exposed individual may lose consciousness. This reaction is similar to that of heat exhaustion and does not affect the body's heat balance. However, the onset of heat collapse is rapid and unpredictable. To prevent heat collapse, the worker should gradually become acclimatized to the hot environment.

- E. **HEAT RASHES** are the most common problem in hot work environments. Prickly heat is manifested as red papules and usually appears in areas where the clothing is restrictive. As sweating increases, these papules give rise to a prickling sensation. Prickly heat occurs in skin that is persistently wetted by unevaporated sweat, and heat rash papules may become infected if they are not treated. In most cases, heat rashes will disappear when the affected individual returns to a cool environment.
- F. **HEAT FATIGUE.** A factor that predisposes an individual to heat fatigue is lack of acclimatization. The use of a program of acclimatization and training for work in hot environments is advisable. The signs and symptoms of heat fatigue include impaired performance of skilled sensorimotor, mental, or vigilance jobs. There is no treatment for heat fatigue except to remove the heat stress before a more serious heat-related condition develops.

### III. INVESTIGATION GUIDELINES.

These guidelines for evaluating employee heat stress approximate those found in the 1992-1993 ACGIH publication, *Threshold Limit Values for Chemical Substances and Physical Agents and Biological Exposure Indices*.

#### A. EMPLOYER AND EMPLOYEE INTERVIEWS.

1. The inspector will review the OSHA 200 Log and, if possible, the OSHA 101 forms for indications of prior heat stress problems.
2. Following are some questions for employer interviews: What type of action, if any, has the employer taken to prevent heat stress problems? What are the potential sources of heat? What employee complaints have been made?
3. Following are some questions for employee interviews: What heat stress problems have been experienced? What type of action has the employee taken to minimize heat stress? What is the employer's involvement, i.e., does employee training include information on heat stress? ([Appendix III:4-1](#) lists factors to be evaluated when reviewing a heat stress situation, and [Appendix III:4-2](#) contains a follow-up checklist.)

- B. **WALKAROUND INSPECTION.** During the walkaround inspection, the investigator will: determine building and operation characteristics; determine whether engineering controls are functioning properly; verify information obtained from the employer and employee interviews; and perform temperature measurements and make other determinations to identify potential sources of heat stress. Investigators may wish to discuss any operations that have the potential to cause heat stress with engineers and other knowledgeable personnel. The walkaround inspection should cover all affected areas. Heat sources, such as furnaces, ovens, and boilers, and relative heat load per employee should be noted.

#### C. WORK-LOAD ASSESSMENT.

1. Under conditions of high temperature and heavy workload, the CSHO should determine the work-load category of each job ([Table III:4-1](#) and [Figure III:4-1](#)). Work-load category is determined by averaging metabolic rates for the tasks and then ranking them:
  1. Light work: up to 200 kcal/hour
  2. Medium work: 200-350 kcal/hour
  3. Heavy work: 350-500 kcal/hour
2. *Cool Rest Area:* Where heat conditions in the rest area are different from those in the work area, the metabolic rate (M) should be calculated using a time-weighted average, as follows:

Equation III: 4-1. Average Metabolic Rate

$$\text{Average}_M = \frac{(M_1)(t_1) + (M_2)(t_2) + \dots + (M_n)(t_n)}{(t_1) + (t_2) + \dots + (t_n)}$$

where: M = metabolic rate

t = time in minutes

In some cases, a videotape is helpful in evaluating work practices and metabolic load.

**FIGURE III:4-1. ACTIVITY EXAMPLES**

- Light hand work: writing, hand knitting
- Heavy hand work: typewriting
- Heavy work with one arm: hammering in nails (shoemaker, upholsterer)
- Light work with two arms: filing metal, planing wood, raking the garden
- Moderate work with the body: cleaning a floor, beating a carpet
- Heavy work with the body: railroad track laying, digging, barking trees

*Sample Calculation: Assembly line work using a heavy hand tool*

Walking along	2.0 kcal/min
Intermediate value between heavy work with two arms and light work with the body	3.0 kcal/min
Add for basal metabolism	1.0 kcal/min
<b>Total:</b>	<b>6.0 kcal/min</b>

Source: ACGIH 1992.

**TABLE III:4-1. ASSESSMENT OF WORK**

<i>Body position and movement</i>		<i>kcal/min*</i>	
Sitting		0.3	
Standing		0.6	
Walking		2.0-3.0	
Walking uphill		add 0.8 for every meter (yard) rise	
<b>Type of work</b>	<b>Average kcal/min</b>	<b>Range kcal/min</b>	
<b>Hand work</b>			
Light	0.4	0.2-1.2	
Heavy	0.9		
<b>Work: One arm</b>			
Light	1.0	0.7-2.5	
Heavy	1.7		
<b>Work: Both arms</b>			
Light	1.5	1.0-3.5	
Heavy	2.5		
<b>Work: Whole body</b>			
Light	3.5	2.5-15.0	
Moderate	5.0		
Heavy	7.0		
Very heavy	9.0		

\* For a "standard" worker of 70 kg body weight (154 lbs) and 1.8m<sup>2</sup> body surface (19.4 ft<sup>2</sup>).

Source: ACGIH 1992.

**IV. SAMPLING METHODS.**

- A. **BODY TEMPERATURE MEASUREMENTS.** Although instruments are available to estimate deep body temperature by measuring the temperature in the ear canal or on the skin, these instruments are not sufficiently reliable to use in compliance evaluations.
- B. **ENVIRONMENTAL MEASUREMENTS.** Environmental heat measurements should be made at, or as close as possible to, the specific work area where the worker is exposed. When a worker is not continuously exposed in a single hot area but moves between two or more areas having different levels of environmental heat, or when the environmental heat varies substantially at a single hot area, environmental heat exposures should be measured for each area and for each level of environmental heat to which employees are exposed.
- C. **WET BULB GLOBE TEMPERATURE INDEX.**

- 1. Wet Bulb Globe Temperature (WBGT) should be calculated using the appropriate formula in [Appendix III:4-2](#). The

WBGT for continuous all-day or several hour exposures should be averaged over a 60-minute period. Intermittent exposures should be averaged over a 120-minute period. These averages should be calculated using the following formula:

Equation III:4-2. Average Web Bulb Globe Temperature (WBGT)

$$Average_{WBGT} = \frac{(WBGT_1)(t_1) + (WBGT_2)(t_2) + \dots + (WBGT_n)(t_n)}{(t_1) + (t_2) + \dots + (t_n)}$$

For indoor and outdoor conditions with no solar load, WBGT is calculated as:

$$WBGT = 0.7NWB + 0.3GT$$

For outdoors with a solar load, WBGT is calculated as

$$WBGT = 0.7NWB + 0.2GT + 0.1DB$$

- where:
- WBGT = Wet Bulb Globe Temperature Index
  - NWB = Nature Wet-Bulb Temperature
  - DB = Dry-Bulb Temperature
  - GT = Globe Temperature

2. The exposure limits in Table III:4-2 are valid for employees wearing light clothing. They must be adjusted for the insulation from clothing that impedes sweat evaporation and other body cooling mechanisms. Use Table III:4-3 to correct Table III:4-2 for various kinds of clothing.
  3. Use of Table III:4-2 requires knowledge of the WBGT and approximate workload. Workload can be estimated using the data in Table III:4-1, and sample calculations are presented in Figure III:4-1.
- D. **MEASUREMENT.** Portable heat stress meters or monitors are used to measure heat conditions. These instruments can calculate both the indoor and outdoor WBGT index according to established ACGIH Threshold Limit Value equations. With this information and information on the type of work being performed, heat stress meters can determine how long a person can safely work or remain in a particular hot environment. See Appendix III:4-2 for an alternate method of calculation.

**TABLE III:4-2. PERMISSIBLE HEAT EXPOSURE THRESHOLD LIMIT VALUE**

Work/rest regimen	----- Work Load* -----		
	Light	Moderate	Heavy
Continuous work	30.0°C (86°F)	26.7°C (80°F)	25.0°C (77°F)
75% Work, 25% rest, each hour	30.6°C (87°F)	28.0°C (82°F)	25.9°C (78°F)
50% Work, 50% rest, each hour	31.4°C (89°F)	29.4°C (85°F)	27.9°C (82°F)
25% Work, 75% rest, each hour	32.2°C (90°F)	31.1°C (88°F)	30.0°C (86°F)

\*Values are in °C and °F, WBGT.

These TLV's are based on the assumption that nearly all acclimatized, fully clothed workers with adequate water and salt intake should be able to function effectively under the given working conditions without exceeding a deep body temperature of 38°C (100.4° F). They are also based on the assumption that the WBGT of the resting place is the same or very close to that of the workplace. Where the WBGT of the work area is different from that of the rest area, a time-weighted average should be used (consult the ACGIH 1992-1993 *Threshold Limit Values for Chemical Substances and Physical Agents and Biological Exposure Indices* (1992).

These TLV's apply to physically fit and acclimatized individuals wearing light summer clothing. If heavier clothing that impedes sweat or has a higher insulation value is required, the permissible heat exposure TLV's in Table III:4-2 must be reduced by the corrections shown in Table III:4-3.

Source: ACGIH 1992.

**E. OTHER THERMAL STRESS INDICES.**

1. The Effective Temperature index (ET) combines the temperature, the humidity of the air, and air velocity. This index has been used extensively in the field of comfort ventilation and air-conditioning. ET remains a useful measurement technique in mines and other places where humidity is high and radiant heat is low.
2. The Heat-Stress Index (HSI) was developed by Belding and Hatch in 1965. Although the HSI considers all environmental factors and work rate, it is not completely satisfactory for determining an individual worker's heat stress and is also difficult to use.

**TABLE III:4-3. WBGT CORRECTION FACTORS IN °C**

Clothing type	Clo* value	WBGT correction
Summer lightweight working clothing	0.6	0
Cotton coveralls	1.0	-2
Winter work clothing	1.4	-4
Water barrier, permeable	1.2	-6

\*Clo: Insulation value of clothing. One clo = 5.55 kcal/m<sup>2</sup>/hr of heat exchange by radiation and convection for each degree °C difference in temperature between the skin and the adjusted dry bulb temperature.

Note: Deleted from the previous version are trade names and "fully encapsulating suit, gloves, boots and hood" including its clo value of 1.2 and WBGT correction of -10.

Source: ACGIH 1992.

**V. CONTROL.**

Ventilation, air cooling, fans, shielding, and insulation are the five major types of engineering controls used to reduce heat stress in hot work environments. Heat reduction can also be achieved by using power assists and tools that reduce the physical demands placed on a worker.

However, for this approach to be successful, the metabolic effort required for the worker to use or operate these devices must be less than the effort required without them. Another method is to reduce the effort necessary to operate power assists. The worker should be allowed to take frequent rest breaks in a cooler environment.

**A. ACCLIMATIZATION.**

1. The human body can adapt to heat exposure to some extent. This physiological adaptation is called acclimatization. After a period of acclimatization, the same activity will produce fewer cardiovascular demands. The worker will sweat more efficiently (causing better evaporative cooling), and thus will more easily be able to maintain normal body temperatures.
2. A properly designed and applied acclimatization program decreases the risk of heat-related illnesses. Such a program basically involves exposing employees to work in a hot environment for progressively longer periods. NIOSH (1986) says that, for workers who have had previous experience in jobs where heat levels are high enough to produce heat stress, the regimen should be 50% exposure on day one, 60% on day two, 80% on day three, and 100% on day four. For new workers who will be similarly exposed, the regimen should be 20% on day one, with a 20% increase in exposure each additional day.

**B. FLUID REPLACEMENT.** Cool (50°-60°F) water or any cool liquid (except alcoholic beverages) should be made available to workers to encourage them to drink small amounts frequently, e.g., one cup every 20 minutes. Ample supplies of liquids should be placed close to the work area. Although some commercial replacement drinks contain salt, this is not necessary for acclimatized individuals because most people add enough salt to their summer diets.

**C. ENGINEERING CONTROLS.**

1. **General ventilation** is used to dilute hot air with cooler air (generally cooler air that is brought in from the outside). This technique clearly works better in cooler climates than in hot ones. A permanently installed ventilation system usually handles large areas or entire buildings. Portable or local exhaust systems may be more effective or practical in smaller areas.
2. **Air treatment/air cooling** differs from ventilation because it reduces the temperature of the air by removing heat (and sometimes humidity) from the air.
3. **Air conditioning** is a method of air cooling, but it is expensive to install and operate. An alternative to air conditioning is the use of chillers to circulate cool water through heat exchangers over which air from the ventilation system is then passed; chillers are more efficient in cooler climates or in dry climates where

evaporative cooling can be used.

4. **Local air cooling** can be effective in reducing air temperature in specific areas. Two methods have been used successfully in industrial settings. One type, cool rooms, can be used to enclose a specific workplace or to offer a recovery area near hot jobs. The second type is a portable blower with built-in air chiller. The main advantage of a blower, aside from portability, is minimal set-up time.
5. Another way to reduce heat stress is to increase the air flow or **convection** using fans, etc. in the work area (as long as the air temperature is less than the worker's skin temperature). Changes in air speed can help workers stay cooler by increasing both the convective heat exchange (the exchange between the skin surface and the surrounding air) and the rate of evaporation. Because this method does not actually cool the air, any increases in air speed must impact the worker directly to be effective.

If the dry bulb temperature is higher than 35°C (95°F), the hot air passing over the skin can actually make the worker hotter. When the temperature is more than 35°C and the air is dry, evaporative cooling may be improved by air movement, although this improvement will be offset by the convective heat. When the temperature exceeds 35°C and the relative humidity is 100%, air movement will make the worker hotter. Increases in air speed have no effect on the body temperature of workers wearing vapor-barrier clothing.

6. **Heat conduction** methods include insulating the hot surface that generates the heat and changing the surface itself.
7. Simple engineering controls, such as shields, can be used to reduce radiant **heat**, i.e. heat coming from hot surfaces within the worker's line of sight. Surfaces that exceed 35°C (95°F) are sources of infrared radiation that can add to the worker's heat load. Flat black surfaces absorb heat more than smooth, polished ones. Having cooler surfaces surrounding the worker assists in cooling because the worker's body radiates heat toward them.

With some sources of radiation, such as heating pipes, it is possible to use both insulation and surface modifications to achieve a substantial reduction in radiant heat. Instead of reducing radiation from the source, shielding can be used to interrupt the path between the source and the worker. Polished surfaces make the best barriers, although special glass or metal mesh surfaces can be used if visibility is a problem.

Shields should be located so that they do not interfere with air flow, unless they are also being used to reduce convective heating. The reflective surface of the shield should be kept clean to maintain its effectiveness.

#### D. ADMINISTRATIVE CONTROLS AND WORK PRACTICES.

1. Training is the key to good work practices. Unless all employees understand the reasons for using new, or changing old, work practices, the chances of such a program succeeding are greatly reduced.
2. NIOSH (1986) states that a good heat stress training program should include at least the following components:
  - Knowledge of the hazards of heat stress;
  - Recognition of predisposing factors, danger signs, and symptoms;
  - Awareness of first-aid procedures for, and the potential health effects of, heat stroke;
  - Employee responsibilities in avoiding heat stress;
  - Dangers of using drugs, including therapeutic ones, and alcohol in hot work environments;
  - Use of protective clothing and equipment; and
  - Purpose and coverage of environmental and medical surveillance programs and the advantages of worker participation in such programs.
3. Hot jobs should be scheduled for the cooler part of the day, and routine maintenance and repair work in hot areas should be scheduled for the cooler seasons of the year.

#### E. WORKER MONITORING PROGRAMS.

1. Every worker who works in extraordinary conditions that increase the risk of heat stress should be personally monitored. These conditions include wearing semipermeable or impermeable clothing when the temperature exceeds 21°C (69.8°F), working at extreme metabolic loads (greater than 500 kcal/hour), etc.
2. Personal monitoring can be done by checking the heart rate, recovery heart rate, oral temperature, or extent of body water loss.
3. To check the heart rate, count the radial pulse for 30 seconds at the beginning of the rest period. If the heart rate exceeds 110 beats per minute, shorten the next work period by one third and maintain the same rest period.
4. The recovery heart rate can be checked by comparing the pulse rate taken at 30 seconds ( $P_1$ ) with the pulse rate taken at 2.5 minutes ( $P_3$ ) after the rest break starts. The two pulse rates can be interpreted using Table III:4-4.
5. Oral temperature can be checked with a clinical thermometer after work but before the employee drinks water. If the oral temperature taken under the tongue exceeds 37.6°C, shorten the next work cycle by one third.
6. Body water loss can be measured by weighing the worker on a scale at the beginning and end of each work day.

The worker's weight loss should not exceed 1.5% of total body weight in a work day. If a weight loss exceeding this amount is observed, fluid intake should increase.

F. **OTHER ADMINISTRATIVE CONTROLS.** The following administrative controls can be used to reduce heat stress:

- Reduce the physical demands of work, e.g., excessive lifting or digging with heavy objects;
- Provide recovery areas, e.g., air-conditioned enclosures and rooms;
- Use shifts, e.g., early morning, cool part of the day, or night work;
- Use intermittent rest periods with water breaks;
- Use relief workers;
- Use worker pacing; and
- Assign extra workers and limit worker occupancy, or the number of workers present, especially in confined or enclosed spaces.

**TABLE III:4-4. HEART RATE RECOVERY CRITERIA**

Heart rate recovery pattern	P <sub>3</sub>	Difference between P <sub>1</sub> and P <sub>3</sub>
Satisfactory recovery	<90	--
High recovery (Conditions may require further study)	90	10
No recovery (May indicate too much stress)	90	<10

VI. **PERSONAL PROTECTIVE EQUIPMENT.**

A. **REFLECTIVE CLOTHING**, which can vary from aprons and jackets to suits that completely enclose the worker from neck to feet, can stop the skin from absorbing radiant heat. However, since most reflective clothing does not allow air exchange through the garment, the reduction of radiant heat must more than offset the corresponding loss in evaporative cooling. For this reason, reflective clothing should be worn as loosely as possible. In situations where radiant heat is high, auxiliary cooling systems can be used under the reflective clothing.

B. **AUXILIARY BODY COOLING.**

1. Commercially available **ice vests**, though heavy, may accommodate as many as 72 ice packets, which are usually filled with water. Carbon dioxide (dry ice) can also be used as a coolant. The cooling offered by ice packets lasts only 2 to 4 hours at moderate to heavy heat loads, and frequent replacement is necessary. However, ice vests do not encumber the worker and thus permit maximum mobility. Cooling with ice is also relatively inexpensive.
2. **Wetted clothing** is another simple and inexpensive personal cooling technique. It is effective when reflective or other impermeable protective clothing is worn. The clothing may be wetted terry cloth coveralls or wetted two-piece, whole-body cotton suits. This approach to auxiliary cooling can be quite effective under conditions of high temperature and low humidity, where evaporation from the wetted garment is not restricted.
3. **Water-cooled garments** range from a hood, which cools only the head, to vests and "long johns," which offer partial or complete body cooling. Use of this equipment requires a battery-driven circulating pump, liquid-ice coolant, and a container.

Although this system has the advantage of allowing wearer mobility, the weight of the components limits the amount of ice that can be carried and thus reduces the effective use time. The heat transfer rate in liquid cooling systems may limit their use to low-activity jobs; even in such jobs, their service time is only about 20 minutes per pound of cooling ice. To keep outside heat from melting the ice, an outer insulating jacket should be an integral part of these systems.

4. **Circulating air** is the most highly effective, as well as the most complicated, personal cooling system. By directing compressed air around the body from a supplied air system, both evaporative and convective cooling are improved. The greatest advantage occurs when circulating air is used with impermeable garments or double cotton overalls.

One type, used when respiratory protection is also necessary, forces exhaust air from a supplied-air hood ("bubble hood") around the neck and down inside an impermeable suit. The air then escapes through openings in the suit. Air can also be supplied directly to the suit without using a hood in three ways:

- by a single inlet;
- by a distribution tree; or
- by a perforated vest.

In addition, a vortex tube can be used to reduce the temperature of circulating air. The cooled air from this tube can be introduced either under the clothing or into a bubble hood. The use of a vortex tube separates the air stream into a hot and cold stream; these tubes also can be used to supply heat in cold climates. Circulating air, however, is noisy and requires a constant source of compressed air supplied through an attached air hose.

One problem with this system is the limited mobility of workers whose suits are attached to an air hose. Another is that of getting air to the work area itself. These systems should therefore be used in work areas where workers are not required to move around much or to climb. Another concern with these systems is that they can lead to dehydration. The cool, dry air feels comfortable and the worker may not realize that it is important to drink liquids frequently.

- C. **RESPIRATOR USAGE.** The weight of a self-contained breathing apparatus (SCBA) increases stress on a worker, and this stress contributes to overall heat stress. Chemical protective clothing such as totally encapsulating chemical protection suits will also add to the heat stress problem.

## APPENDIX III:4-1. HEAT STRESS: GENERAL WORKPLACE REVIEW.

**NOTE:** Listed below are sample questions that the Compliance Officer may wish to consider when investigating heat stress in the workplace.

### WORKPLACE DESCRIPTION.

- A. Type of business
- B. Heat-producing equipment or processes used
- C. Previous history (if any) of heat-related problems
- D. At "hot" spots:
  - Is the heat steady or intermittent?
  - Number of employees exposed?
  - For how many hours per day?
  - Is potable water available?
  - Are supervisors trained to detect/evaluate heat stress symptoms?

### ARE EXPOSURES TYPICAL FOR A WORKPLACE IN THIS INDUSTRY?

- A. Weather at Time of Review
- B. Temperature
- C. Humidity
- D. Air velocity
- E. Is Day Typical of Recent Weather Conditions?  
(Get information from the Weather Bureau)
- F. Heat-Reducing Engineering Controls

- G. Ventilation in place?
- H. Ventilation operating?
- I. Air conditioning in place?
- J. Air conditioning operating?
- K. Fans in place?
- L. Fans operating?
- M. Shields or insulation between sources and employees?
- N. Are reflective faces of shields clean?

**WORK PRACTICES TO DETECT, EVALUATE, AND PREVENT OR REDUCE HEAT STRESS.**

- A. Training program?
- B. Content?
- C. Where given?
- D. For whom?
- E. Liquid replacement program?
- F. Acclimatization program?
- G. Work/rest schedule?
- H. Scheduling of work (during cooler parts of shift, cleaning and maintenance during shut-downs, etc.)
- I. Cool rest areas (including shelter at outdoor work sites)?
- J. Heat monitoring program?
- K. Personal Protective Equipment
- L. Reflective clothing in use?
- M. Ice and/or water-cooled garments in use?
- N. Wetted undergarments (used with reflective or impermeable clothing) in use?
- O. Circulating air systems in use?
- P. First Aid Program
- Q. Trained personnel?
- R. Provision for rapid cool-down?

(Use additional pages as needed.)

**APPENDIX III: 4-2. HEAT STRESS-RELATED ILLNESS OR ACCIDENT FOLLOW-UP.**

- A. Describe events leading up to the episode.
- B. Evaluation/comments by other workers at the scene.
- C. Work at time of episode (heavy, medium, light)?
- D. How long was affected employee working at site prior to episode?
- E. Medical history of affected worker, if known.
- F. Appropriate engineering controls in place?
- G. Appropriate engineering controls in operation?
- H. Appropriate work practices used by affected employee(s)?
- I. Appropriate personal protective equipment available?
- J. Appropriate personal protective equipment in use?
- K. Medical screening for heat stress and continued surveillance for signs of heat stress given other employees?
- L. Additional comments regarding specific episode(s): (Use additional pages as needed.)

**APPENDIX III: 4-3. MEASUREMENT OF WET BULB GLOBE TEMPERATURE.**

Measurement is often required of those environmental factors that most nearly correlate with deep body temperature and other physiological responses to heat. At the present time, the Wet Bulb Globe Temperature Index (WBGT) is the most used technique to measure these environmental factors. WBGT values are calculated by the following equations:

**Equation III:4-4. Indoor or Outdoor Wet Bulb Globe Temperature Indexes (WBGI)** Indoor or outdoors with no solar load

$$WBGT = 0.7NWB + 0.3GT$$

Outdoors with solar load

$$WBGT = 0.7NWB + 0.2GT + 0.1DB$$

where: WBGT = Wet Bulb Globe Temperature Index  
 NWB = Natural Wet-Bulb Temperature  
 DB = Dry-Bulb (air) Temperature  
 GT = Globe Thermometer Temperature

The determination of WBGT requires the use of a black globe thermometer, a natural (static) wet-bulb thermometer, and a dry-bulb thermometer. The measurement of environmental factors shall be performed as follows:

1. The range of the dry and the natural wet-bulb thermometers should be  $-5^{\circ}\text{C}$  to  $+50^{\circ}\text{C}$ , with an accuracy of  $\pm 0.5^{\circ}\text{C}$ . The dry bulb thermometer must be shielded from the sun and the other radiant surfaces of the environment without restricting the airflow around the bulb. The wick of the natural wet bulb thermometer should be kept wet with distilled water for at least one-half hour before the temperature reading is made. It is not enough to immerse the other end of the wick into a reservoir of distilled water and wait until the whole wick becomes wet by capillarity. The wick must be wetted by direct application of water from a syringe one-half hour before each reading. The wick must cover the bulb of the thermometer and an equal length of additional wick must cover the stem above the bulb. The wick should always be clean, and new wicks should be washed before using.
2. A globe thermometer, consisting of a 15 cm (6-inch) in diameter hollow copper sphere painted on the outside with a matte black finish, or equivalent, must be used. The bulb or sensor of a thermometer (range  $-5^{\circ}\text{C}$  to  $+100^{\circ}\text{C}$  with an accuracy of  $\pm 0.5^{\circ}\text{C}$ ) must be fixed in the center of the sphere. The globe thermometer should be exposed at least 25 minutes before it is read.
3. A stand should be used to suspend the three thermometers so that they do not restrict free air flow around the bulbs and the wet-bulb and globe thermometer are not shaded.
4. It is permissible to use any other type of temperature sensor that gives a reading similar to that of a mercury thermometer under the same conditions.
5. The thermometers must be placed so that the readings are representative of the employee's work or rest areas, as appropriate.

Once the WBGT has been estimated, employers can estimate workers' metabolic heat load (see Tables III:4-1 and III:4-2) and use the ACGIH method to determine the appropriate work/rest regimen, clothing, and equipment to use to control the heat exposures of workers in their facilities.

# THE COLD STRESS EQUATION

**LOW TEMPERATURE + WIND SPEED + WETNESS  
= INJURIES & ILLNESS**

When the body is unable to warm itself, serious cold-related illnesses and injuries may occur, and permanent tissue damage and death may result.

**Hypothermia** can occur when *land temperatures* are **above** freezing or *water temperatures* are below 98.6°F/ 37°C. Cold-related illnesses can slowly overcome a person who has been chilled by low temperatures, brisk winds, or wet clothing.

# FROST BITE

## *What Happens to the Body:*

FREEZING IN DEEP LAYERS OF SKIN AND TISSUE; PALE, WAXY-WHITE SKIN COLOR; SKIN BECOMES HARD and NUMB; USUALLY AFFECTS THE FINGERS, HANDS, TOES, FEET, EARS, and NOSE.

## *What Should Be Done: (land temperatures)*

- Move the person to a warm dry area. Don't leave the person alone.
- Remove any wet or tight clothing that may cut off blood flow to the affected area.
- **DO NOT** rub the affected area, because rubbing causes damage to the skin and tissue.
- **Gently** place the affected area in a warm (105°F) water bath and monitor the water temperature to **slowly** warm the tissue. Don't pour warm water directly on the affected area because it will warm the tissue too fast causing tissue damage. Warming takes about 25-40 minutes.
- After the affected area has been warmed, it may become puffy and blister. The affected area may have a burning feeling or numbness. When normal feeling, movement, and skin color have returned, the affected area should be dried and wrapped to keep it warm. **NOTE:** If there is a chance the affected area may get cold again, do not warm the skin. If the skin is warmed and then becomes cold again, it will cause severe tissue damage.
- Seek medical attention as soon as possible.

# HYPOTHERMIA - (Medical Emergency)

## *What Happens to the Body:*

NORMAL BODY TEMPERATURE (98.6° F/37°C ) DROPS TO OR BELOW 95°F (35° C); FATIGUE OR DROWSINESS; UNCONTROLLED SHIVERING; COOL BLUISH SKIN; SLURRED SPEECH; CLUMSY MOVEMENTS; IRRITABLE, IRRATIONAL OR CONFUSED BEHAVIOR.

## *What Should Be Done: (land temperatures)*

- Call for emergency help (i.e., Ambulance or Call 911).
- Move the person to a warm, dry area. Don't leave the person alone. Remove any wet clothing and replace with warm, dry clothing or wrap the person in blankets.
- Have the person drink warm, sweet drinks (sugar water or sports-type drinks) if they are alert. **Avoid drinks with caffeine** (coffee, tea, or hot chocolate) or alcohol.
- Have the person move their arms and legs to create muscle heat. If they are unable to do this, place warm bottles or hot packs in the arm pits, groin, neck, and head areas. **DO NOT** rub the person's body or place them in warm water bath. This may stop their heart.

## *What Should Be Done: (water temperatures)*

- Call for emergency help (Ambulance or Call 911). Body heat is lost up to 25 times faster in water.
- **DO NOT** remove any clothing. Button, buckle, zip, and tighten any collars, cuffs, shoes, and hoods because the layer of trapped water closest to the body provides a layer of insulation that slows the loss of heat. Keep the head out of the water and put on a hat or hood.
- Get out of the water as quickly as possible or climb on anything floating. **DO NOT** attempt to swim unless a floating object or another person can be reached because swimming or other physical activity uses the body's heat and reduces survival time by about 50 percent.
- If getting out of the water is not possible, wait quietly and conserve body heat by folding arms across the chest, keeping thighs together, bending knees, and crossing ankles. If another person is in the water, huddle together with chests held closely.

## ***How to Protect Workers***

- Recognize the environmental and workplace conditions that lead to potential cold-induced illnesses and injuries.
- Learn the signs and symptoms of cold-induced illnesses/injuries and what to do to help the worker.
- Train the workforce about cold-induced illnesses and injuries.
- Select proper clothing for cold, wet, and windy conditions. Layer clothing to adjust to changing environmental temperatures. Wear a hat and gloves, in addition to underwear that will keep water away from the skin (polypropylene).
- Take frequent short breaks in warm dry shelters to allow the body to warm up.
- Perform work during the warmest part of the day.
- Avoid exhaustion or fatigue because energy is needed to keep muscles warm.
- Use the buddy system (work in pairs).
- Drink warm, sweet beverages (sugar water, sports-type drinks). Avoid drinks with caffeine (coffee, tea, or hot chocolate) or alcohol.
- Eat warm, high-calorie foods like hot pasta dishes.

## ***Workers Are at Increased Risk When...***

- They have predisposing health conditions such as cardiovascular disease, diabetes, and hypertension.
- They take certain medication (check with your doctor, nurse, or pharmacy and ask if any medicines you are taking affect you while working in cold environments).
- They are in poor physical condition, have a poor diet, or are older.

Generic Community Air Monitoring Plan

## **APPENDIX G**

### **New York State Department of Health Generic Community Air Monitoring Plan**

#### **Overview**

A Community Air Monitoring Plan (CAMP) requires real-time monitoring for volatile organic compounds (VOCs) and particulates (i.e., dust) at the downwind perimeter of each designated work area when certain activities are in progress at contaminated sites. The CAMP is not intended for use in establishing action levels for worker respiratory protection. Rather, its intent is to provide a measure of protection for the downwind community (i.e., off-site receptors including residences and businesses and on-site workers not directly involved with the subject work activities) from potential airborne contaminant releases as a direct result of investigative and remedial work activities. The action levels specified herein require increased monitoring, corrective actions to abate emissions, and/or work shutdown. Additionally, the CAMP helps to confirm that work activities did not spread contamination off-site through the air.

The generic CAMP presented below will be sufficient to cover many, if not most sites. Specific requirements should be reviewed for each situation in consultation with NYSDOH to ensure proper applicability. In some cases, a separate site-specific CAMP or supplement may be required. Depending upon the nature of contamination, chemical-specific monitoring with appropriately sensitive methods may be required. Depending upon the proximity of potentially exposed individuals, more stringent monitoring or response levels than those presented below may be required. Special requirements will be necessary for work within 20 feet of potentially exposed individuals or structures and for indoor work with co-located residences or facilities. These requirements should be determined in consultation with NYSDOH.

Reliance on the CAMP should not preclude simple, common-sense measures to keep VOCs, dust, and odors at a minimum around the work areas.

#### **Community Air Monitoring Plan**

Depending upon the nature of known or potential contaminants at each site, real-time air monitoring for VOCs and/or particulate levels at the perimeter of the exclusion zone or work area will be necessary. Most sites will involve VOC and particulate monitoring; sites known to be contaminated with heavy metals alone may only require particulate monitoring. If radiological contamination is a concern, additional monitoring requirements may be necessary per consultation with appropriate DEC/NYSDOH staff.

**Continuous monitoring** will be required for all ground intrusive activities and during the demolition of contaminated or potentially contaminated structures. Ground intrusive activities include, but are not limited to, soil/waste excavation and handling, test pitting or trenching, and the installation of soil borings or monitoring wells.

**Periodic monitoring** for VOCs will be required during non-intrusive activities such as the collection of soil and sediment samples or the collection of groundwater samples from existing

monitoring wells. “Periodic” monitoring during sample collection might reasonably consist of taking a reading upon arrival at a sample location, monitoring while opening a well cap or overturning soil, monitoring during well baling/purging, and taking a reading prior to leaving a sample location. In some instances, depending upon the proximity of potentially exposed individuals, continuous monitoring may be required during sampling activities. Examples of such situations include groundwater sampling at wells on the curb of a busy urban street, in the midst of a public park, or adjacent to a school or residence.

### **VOC Monitoring, Response Levels, and Actions**

Volatile organic compounds (VOCs) must be monitored at the downwind perimeter of the immediate work area (i.e., the exclusion zone) on a continuous basis or as otherwise specified. Upwind concentrations should be measured at the start of each workday and periodically thereafter to establish background conditions, particularly if wind direction changes. The monitoring work should be performed using equipment appropriate to measure the types of contaminants known or suspected to be present. The equipment should be calibrated at least daily for the contaminant(s) of concern or for an appropriate surrogate. The equipment should be capable of calculating 15-minute running average concentrations, which will be compared to the levels specified below.

1. If the ambient air concentration of total organic vapors at the downwind perimeter of the work area or exclusion zone exceeds 5 parts per million (ppm) above background for the 15-minute average, work activities must be temporarily halted and monitoring continued. If the total organic vapor level readily decreases (per instantaneous readings) below 5 ppm over background, work activities can resume with continued monitoring.
2. If total organic vapor levels at the downwind perimeter of the work area or exclusion zone persist at levels in excess of 5 ppm over background but less than 25 ppm, work activities must be halted, the source of vapors identified, corrective actions taken to abate emissions, and monitoring continued. After these steps, work activities can resume provided that the total organic vapor level 200 feet downwind of the exclusion zone or half the distance to the nearest potential receptor or residential/commercial structure, whichever is less - but in no case less than 20 feet, is below 5 ppm over background for the 15-minute average.
3. If the organic vapor level is above 25 ppm at the perimeter of the work area, activities must be shutdown.
4. All 15-minute readings must be recorded and be available for State (DEC and NYSDOH) personnel to review. Instantaneous readings, if any, used for decision purposes should also be recorded.

### **Particulate Monitoring, Response Levels, and Actions**

Particulate concentrations should be monitored continuously at the upwind and downwind perimeters of the exclusion zone at temporary particulate monitoring stations. The particulate monitoring should be performed using real-time monitoring equipment capable of measuring

particulate matter less than 10 micrometers in size (PM-10) and capable of integrating over a period of 15 minutes (or less) for comparison to the airborne particulate action level. The equipment must be equipped with an audible alarm to indicate exceedance of the action level. In addition, fugitive dust migration should be visually assessed during all work activities.

1. If the downwind PM-10 particulate level is 100 micrograms per cubic meter ( $\text{mcg}/\text{m}^3$ ) greater than background (upwind perimeter) for the 15-minute period or if airborne dust is observed leaving the work area, then dust suppression techniques must be employed. Work may continue with dust suppression techniques provided that downwind PM-10 particulate levels do not exceed  $150 \text{ mcg}/\text{m}^3$  above the upwind level and provided that no visible dust is migrating from the work area.
2. If, after implementation of dust suppression techniques, downwind PM-10 particulate levels are greater than  $150 \text{ mcg}/\text{m}^3$  above the upwind level, work must be stopped and a re-evaluation of activities initiated. Work can resume provided that dust suppression measures and other controls are successful in reducing the downwind PM-10 particulate concentration to within  $150 \text{ mcg}/\text{m}^3$  of the upwind level and in preventing visible dust migration.
3. All readings must be recorded and be available for State (DEC and NYSDOH) and County Health personnel to review.

REPORTED BY	REPORTED TO
-------------	-------------

REMARKS (ACORD 101, Additional Remarks Schedule, may be attached if more space is required)

**APPLICABLE IN ALASKA**

A person who knowingly and with intent to injure, defraud, or deceive an insurance company files a claim containing false, incomplete, or misleading information may be prosecuted under state law.

**APPLICABLE IN ARIZONA**

For your protection, Arizona law requires the following statement to appear on this form. Any person who knowingly presents a false or fraudulent claim for payment of a loss is subject to criminal and civil penalties.

**APPLICABLE IN ARKANSAS, DELAWARE, KENTUCKY, LOUISIANA, MAINE, MICHIGAN, NEW JERSEY,  
NEW MEXICO, NORTH DAKOTA, PENNSYLVANIA, RHODE ISLAND, SOUTH DAKOTA, TENNESSEE,  
TEXAS, VIRGINIA, AND WEST VIRGINIA**

Any person who knowingly and with intent to defraud any insurance company or another person, files a statement of claim containing any materially false information, or conceals for the purpose of misleading, information concerning any fact, material thereto, commits a fraudulent insurance act, which is a crime, subject to criminal prosecution and civil penalties. In LA, ME, TN, and VA, insurance benefits may also be denied.

**APPLICABLE IN CALIFORNIA**

For your protection, California law requires the following to appear on this form: Any person who knowingly presents a false or fraudulent claim for payment of a loss is guilty of a crime and may be subject to fines and confinement in state prison.

**APPLICABLE IN COLORADO**

It is unlawful to knowingly provide false, incomplete, or misleading facts or information to an insurance company for the purpose of defrauding or attempting to defraud the company. Penalties may include imprisonment, fines, denial of insurance, and civil damages. Any insurance company or agent of an insurance company who knowingly provides false, incomplete, or misleading facts or information to a policy holder or claimant for the purpose of defrauding or attempting to defraud the policy holder or claimant with regard to a settlement or award payable from insurance proceeds shall be reported to the Colorado Division of Insurance within the Department of Regulatory Agencies.

**APPLICABLE IN THE DISTRICT OF COLUMBIA**

Warning: It is a crime to provide false or misleading information to an insurer for the purpose of defrauding the insurer or any other person. Penalties include imprisonment and/or fines. In addition, an insurer may deny insurance benefits, if false information materially related to a claim was provided by the applicant.

**APPLICABLE IN FLORIDA**

Pursuant to S. 817.234, Florida Statutes, any person who, with the intent to injure, defraud, or deceive any insurer or insured, prepares, presents, or causes to be presented a proof of loss or estimate of cost or repair of damaged property in support of a claim under an insurance policy knowing that the proof of loss or estimate of claim or repairs contains any false, incomplete, or misleading information concerning any fact or thing material to the claim commits a felony of the third degree, punishable as provided in S. 775.082, S. 775.083, or S. 775.084, Florida Statutes.

**APPLICABLE IN HAWAII**

For your protection, Hawaii law requires you to be informed that presenting a fraudulent claim for payment of a loss or benefit is a crime punishable by fines or imprisonment, or both.

**APPLICABLE IN IDAHO**

Any person who knowingly and with the intent to injure, defraud, or deceive any insurance company files a statement of claim containing any false, incomplete or misleading information is guilty of a felony.

**APPLICABLE IN INDIANA**

A person who knowingly and with intent to defraud an insurer files a statement of claim containing any false, incomplete, or misleading information commits a felony.

**APPLICABLE IN KANSAS**

Any person who, knowingly and with intent to defraud, presents, causes to be presented or prepares with knowledge or belief that it will be presented to or by an insurer, purported insurer, broker or any agent thereof, any written statement as part of, or in support of, an application for the issuance of, or the rating of an insurance policy for personal or commercial insurance, or a claim for payment or other benefit pursuant to an insurance policy for commercial or personal insurance which such person knows to contain materially false information concerning any fact material thereto; or conceals, for the purpose of misleading, information concerning any fact material thereto commits a fraudulent insurance act.

**APPLICABLE IN MARYLAND**

Any person who knowingly and [or]\* willfully presents a false or fraudulent claim for payment of a loss or benefit or who knowingly and [or]\* willfully presents false information in an application for insurance is guilty of a crime and may be subject to fines and confinement in prison. \* [or] effective 01-01-2013

**APPLICABLE IN MINNESOTA**

A person who files a claim with intent to defraud or helps commit a fraud against an insurer is guilty of a crime.

**APPLICABLE IN NEVADA**

Pursuant to NRS 686A.291, any person who knowingly and willfully files a statement of claim that contains any false, incomplete or misleading information concerning a material fact is guilty of a felony.

**APPLICABLE IN NEW HAMPSHIRE**

Any person who, with purpose to injure, defraud or deceive any insurance company, files a statement of claim containing any false, incomplete or misleading information is subject to prosecution and punishment for insurance fraud, as provided in RSA 638:20.

**APPLICABLE IN NEW YORK**

Any person who knowingly and with intent to defraud any insurance company or other person files an application for commercial insurance or a statement of claim for any commercial or personal insurance benefits containing any materially false information, or conceals for the purpose of misleading, information concerning any fact material thereto, and any person who in connection with such application or claim knowingly makes or knowingly assists, abets, solicits or conspires with another to make a false report of the theft, destruction, damage or conversion of any motor vehicle to a law enforcement agency, the Department of Motor Vehicles or an insurance company, commits a fraudulent insurance act, which is a crime, and shall also be subject to a civil penalty not to exceed five thousand dollars and the value of the subject motor vehicle or stated claim for each violation.

**APPLICABLE IN OHIO**

Any person who, with intent to defraud or knowing that he/she is facilitating a fraud against an insurer, submits an application or files a claim containing a false or deceptive statement is guilty of insurance fraud.

**APPLICABLE IN OKLAHOMA**

WARNING: Any person who knowingly and with intent to injure, defraud or deceive any insurer, makes any claim for the proceeds of an insurance policy containing any false, incomplete or misleading information is guilty of a felony.

**APPLICABLE IN WASHINGTON**

It is a crime to knowingly provide false, incomplete, or misleading information to an insurance company for the purpose of defrauding the company. Penalties include imprisonment, fines and denial of insurance benefits.

**Near Loss Reporting Form**

# NEAR LOSS REPORT FORM

Incident ID: \_\_\_\_\_

**IMPORTANT:** Do not include any personal non-work related medical information on this form

## PART 1: ADMINISTRATIVE INFORMATION

Project Manager :		
Project Site Name:		
City:	State/Province:	Country:

## PART 2: NEAR LOSS DETAILS

Date\Time Occurred (MM/DD/YYYY HH:MM):	Date\Time Submitted to IMPACT (MM/DD/YYYY HH:MM):
<b>NEAR LOSS TYPE - What could have happened? - Select all that apply (1-7)</b>	
1. <input type="checkbox"/> Fire / Explosion	3. <input type="checkbox"/> Security (e.g theft, trespassing, vandalism)
2. <input type="checkbox"/> Injury / Illness	4. <input type="checkbox"/> Environmental (spill, permit exceedance, etc.)
	5. <input type="checkbox"/> Transportation of personnel (vehicle accident)
	6. <input type="checkbox"/> Property/Equipment Damage
	7. <input type="checkbox"/> Business Interruption
Event Leading to Potential Injury/Illness*:	Activity: <b>Remediation</b>
Job Task*:	Phase of Operation : <b>Remediation</b>
Equipment Involved*:	
<b>WHAT HAPPENED?</b> Do not include individuals' or company names. Ensure photos, sketches, etc. are not personally identifiable unless written consent has been obtained. (NOTE: For IMPACT entry, this information must be in English.)	
Summary (1-2 sentences. Provide brief description of the incident. Provide facts only, no speculation or opinion):	
Near Loss Details (Brief factual details of what, where, when; include photos, sketches, etc. as attachments):	
Immediate Corrective Actions Taken:	
<b>NEAR LOSS INVOLVED:</b>	
Was a post-incident alcohol or drug test conducted? <input type="checkbox"/> 1. Yes <input type="checkbox"/> 2. No	
Contractor Company Name:	Subcontractor Company Name:

## PART 3: NEAR LOSS INVESTIGATION FINDINGS AND REPORT QUALITY REVIEW

Date Investigation Team Assigned (mm/dd/yyyy):					
<b>INVESTIGATION SUMMARY:</b> Determine and list by number what behaviors and/or conditions may have contributed to the Near Loss. Then, use the "5-Why Technique" for each of these behaviors/conditions; provide a narrative for each that explains how the associated root cause(s) was determined. Do not include individuals' or company names. (NOTE: For IMPACT entry, this information must be in English.)					
<b>ROOT CAUSE NUMBER(S) AND SOLUTION(S): HOW TO REDUCE POSSIBILITY OF INCIDENT RECURRING</b>					
Selection of RCs and solutions reflects the analysis of investigation team and is not meant to be a legally binding conclusion as to the RC and/or solution.					
Behavior/ Condition #	Root Cause # (1/line)	Solution(s) (must match Root Cause) (For IMPACT entry, solutions must be in English.)	Job Title Responsible for Completion	Completion Target Date	Completion Actual Date
<b>QUALITY REVIEW</b> Were the correct root cause(s) identified? Do root cause(s) and solution(s) match? Are solution(s) feasible / maintainable?					
Job Title :			Company :		

## PART 4: VERIFICATION (Solutions Implemented) & VALIDATION (Solutions Effective)

Date	Solution	Verifier / Validator Job Title	Verifier / Validator Company	Details (of V & V performed)

OSHA Log of  
Occupational Injuries and Illnesses

# Summary of Work-Related Injuries and Illnesses

All establishments covered by Part 1904 must complete this Summary page, even if no work-related injuries or illnesses occurred during the year. Remember to review the Log to verify that the entries are complete and accurate before completing this summary.

Using the Log, count the individual entries you made for each category. Then write the totals below, making sure you've added the entries from every page of the Log. If you had no cases, write "0."

Employees, former employees, and their representatives have the right to review the OSHA Form 300 in its entirety. They also have limited access to the OSHA Form 301 or its equivalent. See 29 CFR Part 1904.35, in OSHA's recordkeeping rule, for further details on the access provisions for these forms.

## Number of Cases

Total number of deaths	Total number of cases with days away from work	Total number of cases with job transfer or restriction	Total number of other recordable cases
_____	_____	_____	_____
(G)	(H)	(I)	(J)

## Number of Days

Total number of days away from work	Total number of days of job transfer or restriction
_____	_____
(K)	(L)

## Injury and Illness Types

Total number of . . . (M)	
(1) Injuries _____	(4) Poisonings _____
(2) Skin disorders _____	(5) Hearing loss _____
(3) Respiratory conditions _____	(6) All other illnesses _____

Post this Summary page from February 1 to April 30 of the year following the year covered by the form.

Public reporting burden for this collection of information is estimated to average 50 minutes per response, including time to review the instructions, search and gather the data needed, and complete and review the collection of information. Persons are not required to respond to the collection of information unless it displays a currently valid OMB control number. If you have any comments about these estimates or any other aspects of this data collection, contact: US Department of Labor, OSHA Office of Statistical Analysis, Room N-3644, 200 Constitution Avenue, NW, Washington, DC 20210. Do not send the completed forms to this office.

### Establishment information

Your establishment name \_\_\_\_\_

Street \_\_\_\_\_

City \_\_\_\_\_ State \_\_\_\_\_ ZIP \_\_\_\_\_

Industry description (e.g., *Manufacture of motor truck trailers*) \_\_\_\_\_

Standard Industrial Classification (SIC), if known (e.g., 3715) \_\_\_\_\_

OR \_\_\_\_\_

North American Industrial Classification (NAICS), if known (e.g., 336212) \_\_\_\_\_

**Employment information** (If you don't have these figures, see the Worksheet on the back of this page to estimate.)

Annual average number of employees \_\_\_\_\_

Total hours worked by all employees last year \_\_\_\_\_

**Sign here**

Knowingly falsifying this document may result in a fine.

I certify that I have examined this document and that to the best of my knowledge the entries are true, accurate, and complete.

\_\_\_\_\_  
Company executive Title

( ) - / /  
Phone Date

## Optional

# Worksheet to Help You Fill Out the Summary

At the end of the year, OSHA requires you to enter the average number of employees and the total hours worked by your employees on the summary. If you don't have these figures, you can use the information on this page to estimate the numbers you will need to enter on the Summary page at the end of the year.

### How to figure the average number of employees who worked for your establishment during the year:

- 1 Add** the total number of employees your establishment paid in all pay periods during the year. Include all employees: full-time, part-time, temporary, seasonal, salaried, and hourly.

The number of employees paid in all pay periods = **1** \_\_\_\_\_
- 2 Count** the number of pay periods your establishment had during the year. Be sure to include any pay periods when you had no employees.

The number of pay periods during the year = **2** \_\_\_\_\_
- 3 Divide** the number of employees by the number of pay periods.

$\frac{\mathbf{1}}{\mathbf{2}}$  \_\_\_\_\_ = **3** \_\_\_\_\_
- 4 Round the answer** to the next highest whole number. Write the rounded number in the blank marked *Annual average number of employees*.

The number rounded = **4** \_\_\_\_\_

For example, Acme Construction figured its average employment this way:

For pay period...	Acme paid this number of employees...		
1	10	Number of employees paid = 830	<b>1</b>
2	0		
3	15	Number of pay periods = 26	<b>2</b>
4	30		
5	40	$\frac{830}{26} = 31.92$	<b>3</b>
▼	▼	26	
24	20	31.92 rounds to 32	<b>4</b>
25	15		
26	+10	32 is the annual average number of employees	
	830		

### How to figure the total hours worked by all employees:

Include hours worked by salaried, hourly, part-time and seasonal workers, as well as hours worked by other workers subject to day to day supervision by your establishment (e.g., temporary help services workers).

Do not include vacation, sick leave, holidays, or any other non-work time, even if employees were paid for it. If your establishment keeps records of only the hours paid or if you have employees who are not paid by the hour, please estimate the hours that the employees actually worked.

If this number isn't available, you can use this optional worksheet to estimate it.

### Optional Worksheet

\_\_\_\_\_ **Find** the number of full-time employees in your establishment for the year.

**X** \_\_\_\_\_ **Multiply** by the number of work hours for a full-time employee in a year.

\_\_\_\_\_ This is the number of full-time hours worked.

**+** \_\_\_\_\_ **Add** the number of any overtime hours as well as the hours worked by other employees (part-time, temporary, seasonal)

\_\_\_\_\_ **Round** the answer to the next highest whole number. Write the rounded number in the blank marked *Total hours worked by all employees last year*.

# OSHA's Form 301

## Injury and Illness Incident Report

**Attention:** This form contains information relating to employee health and must be used in a manner that protects the confidentiality of employees to the extent possible while the information is being used for occupational safety and health purposes.

**U.S. Department of Labor**  
Occupational Safety and Health Administration

Form approved OMB no. 1218-0176

This *Injury and Illness Incident Report* is one of the first forms you must fill out when a recordable work-related injury or illness has occurred. Together with the *Log of Work-Related Injuries and Illnesses* and the accompanying *Summary*, these forms help the employer and OSHA develop a picture of the extent and severity of work-related incidents.

Within 7 calendar days after you receive information that a recordable work-related injury or illness has occurred, you must fill out this form or an equivalent. Some state workers' compensation, insurance, or other reports may be acceptable substitutes. To be considered an equivalent form, any substitute must contain all the information asked for on this form.

According to Public Law 91-596 and 29 CFR 1904, OSHA's recordkeeping rule, you must keep this form on file for 5 years following the year to which it pertains.

If you need additional copies of this form, you may photocopy and use as many as you need.

Completed by \_\_\_\_\_

Title \_\_\_\_\_

Phone (\_\_\_\_) \_\_\_\_\_ -- \_\_\_\_\_ Date \_\_\_\_/\_\_\_\_/\_\_\_\_

### Information about the employee

- 1) Full name \_\_\_\_\_
- 2) Street \_\_\_\_\_  
City \_\_\_\_\_ State \_\_\_\_\_ ZIP \_\_\_\_\_
- 3) Date of birth \_\_\_\_/\_\_\_\_/\_\_\_\_
- 4) Date hired \_\_\_\_/\_\_\_\_/\_\_\_\_
- 5)  Male  
 Female

### Information about the physician or other health care professional

- 6) Name of physician or other health care professional \_\_\_\_\_  
\_\_\_\_\_
- 7) If treatment was given away from the worksite, where was it given?  
Facility \_\_\_\_\_  
Street \_\_\_\_\_  
City \_\_\_\_\_ State \_\_\_\_\_ ZIP \_\_\_\_\_
- 8) Was employee treated in an emergency room?  
 Yes  
 No
- 9) Was employee hospitalized overnight as an in-patient?  
 Yes  
 No

### Information about the case

- 10) Case number from the Log \_\_\_\_\_ (Transfer the case number from the Log after you record the case.)
- 11) Date of injury or illness \_\_\_\_/\_\_\_\_/\_\_\_\_
- 12) Time employee began work \_\_\_\_\_ AM / PM
- 13) Time of event \_\_\_\_\_ AM / PM  Check if time cannot be determined
- 14) **What was the employee doing just before the incident occurred?** Describe the activity, as well as the tools, equipment, or material the employee was using. Be specific. *Examples:* "climbing a ladder while carrying roofing materials"; "spraying chlorine from hand sprayer"; "daily computer key-entry."
- 15) **What happened?** Tell us how the injury occurred. *Examples:* "When ladder slipped on wet floor, worker fell 20 feet"; "Worker was sprayed with chlorine when gasket broke during replacement"; "Worker developed soreness in wrist over time."
- 16) **What was the injury or illness?** Tell us the part of the body that was affected and how it was affected; be more specific than "hurt," "pain," or "sore." *Examples:* "strained back"; "chemical burn, hand"; "carpal tunnel syndrome."
- 17) **What object or substance directly harmed the employee?** *Examples:* "concrete floor"; "chlorine"; "radial arm saw." *If this question does not apply to the incident, leave it blank.*
- 18) **If the employee died, when did death occur?** Date of death \_\_\_\_/\_\_\_\_/\_\_\_\_

Re: **Site Geophysics –Former Getty Station**

**VIA eMail**

Dear Mr. Wills:

On Friday, January 31<sup>st</sup>, 2014, Diversified Geophysics, Inc. (DGI) conducted a geophysical investigation on the property known as the Former Getty Station, located at 239 10<sup>th</sup> Avenue, in Manhattan, New York.

The purpose of this investigation will be to locate, trace and mark all documented and undocumented subsurface utilities as indicated on Roux Figure 3. Site Plan With Proposed Sampling Locations, which accompanied your email correspondence of January 28<sup>th</sup>, 2014

The geophysical investigation was comprised of a series of Ground Penetrating Radar (GPR) traverses and site-wide radio frequency/electromagnetic (RF/EM) scans. GPR surveys collect anomaly data which can be interpreted in real-time. The geometry of the anomalies located can assist in determining the type of subsurface object producing the anomaly. Linear anomalies can be interpreted to be buried utilities, conduits, trolley tracks, etc., if the return data has the appropriate signature. RF/EM scans are made by using instrumentation that has a transmitter and receiver. The transmitter can be used to send electromagnetic waves of known frequencies along buried metallic conduits housing utilities, or through the utilities themselves. The receiver is used to trace the signal (audibly and/or graphically) and locate the direction of travel, in some cases, the depth of the utility below the surface. Receivers can also be used in stand-alone mode to detect frequencies in the range of 60Hz, often emitted by active electrical services in the United States. In addition, some RF/EM instruments can detect frequencies emitted by gas and water services. These utilities absorb and radiate VLF radio waves. Both technologies, GPR and RF/EM complement one another to provide the most useful data set necessary for the locating, tracing and characterization of subsurface anomalies.

Ground Penetrating Radar (GPR) data was collected with Sensors and Software 250 MHz Noggin<sup>Plus</sup> SmartCart<sup>®</sup>. The average penetration depth for this investigation was set from zero (0) to ten (10) feet. All utilities located were painted with the appropriate color on the concrete sidewalk.

During this investigation, Noggin<sup>Plus</sup> GPR traverse lines were made in sets that ran parallel and perpendicular to the footprints of the individual areas of investigation (proposed boring locations), GPR scans represent anomalies graphically as hyperbolas, their crests indicating position and depth below the surface to the target. In general, when scanning for linear targets such as utilities, single-line scans are designed to traverse possible targets in directions perpendicular to the long-axis of the target. When a series of parallel scans detect anomalies at similar positions and depths, these results are interpreted to be evidence of a utility or conduit.

Single line GPR traverses in both the X and Y direction were collected throughout all accessible areas of the individual properties.

A radio frequency/electromagnetic (RF/EM) survey was conducted throughout the entire area of investigation. The receiver of a Ridgid<sup>®</sup> SeekTech (SR-60) Pipe and Cable Locator was used in a stand-alone mode (without the transmitter) to locate utilities emitting frequencies in the 60Hz range (active electric). The Ridgid<sup>®</sup> receiver was also used with a transmitter box (ST-33Q) in an attempt to trace water and drainage services.

Subsurface Geophysical Investigations

75 East 2<sup>nd</sup> Street, Mineola, NY 11501  
(516) 326.0586 voice (516) 616.6194 fax

## Results:

All services to the former convenience store were located. Gas entered the property from 10<sup>th</sup> Avenue and terminated at the meter, located 18.25ft north of the SE corner of the improvement. Communications enter the property from 10<sup>th</sup> Avenue down the centerline of the sidewalk along the northern border of the property in the NE quadrant (positioned at a point 26.5ft north of the SE corner of the convenience store). Site lighting to the Getty sign and lamp located in the NE corner of the property runs north/south, parallel to the sidewalk along 10<sup>th</sup> Avenue (bordering the property to the east). It is located approximately 19.75ft east of the east exterior wall of the convenience store.

An unknown linear anomaly trends west/east from the east exterior wall of the store to 10<sup>th</sup> Avenue at a point 4ft north of the SE corner of the store.

Water, electric and sanitary sewer services entered/exited the property on West 24<sup>th</sup> Street, and were located to the west of the tank farm in the SW corner of the property. The water service position at the SW corner of the property is located approximately 8.5ft to the east of the adjacent building. At this location, the electric service is 5.25ft east of the adjacent building; the sewer service is 4.75ft east of the adjacent building. An unknown linear anomaly located using RF instrumentation and also indicated during GPR traverses is located at 3.5ft east of the adjacent building.

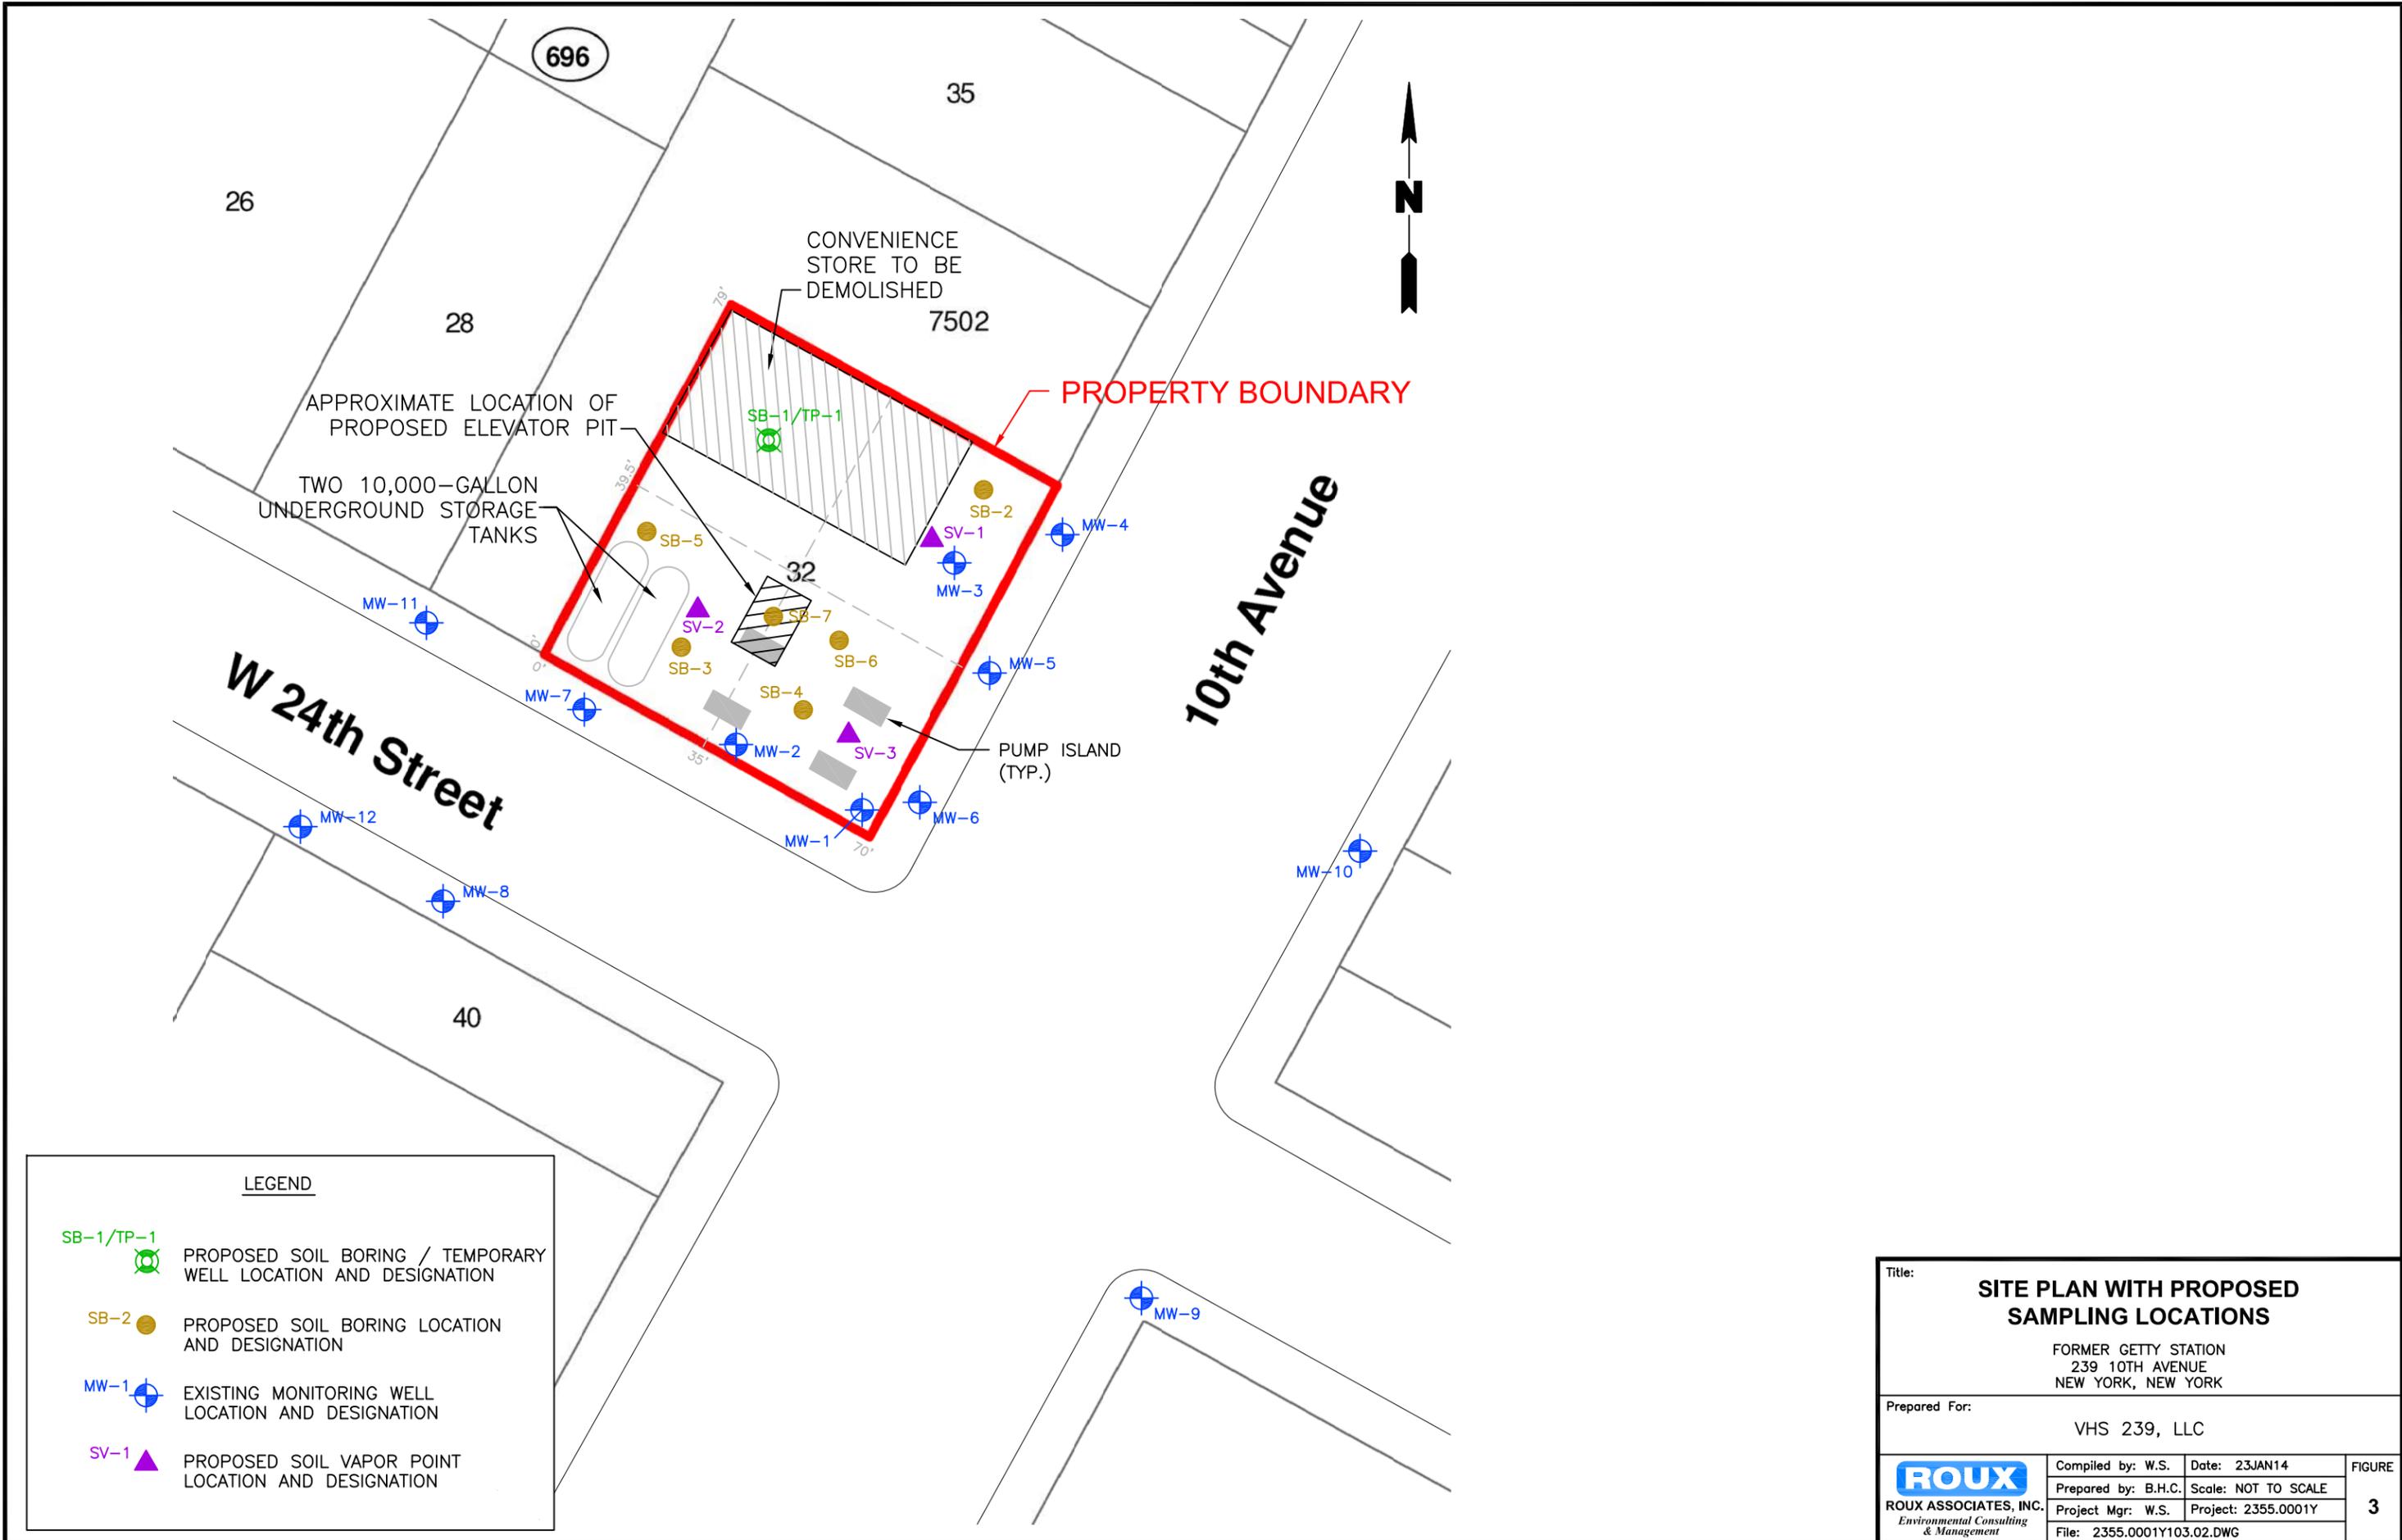

Electric supplies the NW fuel pump from the NW corner of the property. Electric was located traversing the fueling station between the individual northern and southern pumps. Additionally, electric was located traversing the property from north to south between canopy columns existing between the two western fuel dispensers and the two eastern fuel dispensers. No canopy drainage cleanouts could be accessed.

A linear anomaly was evidenced using both RF and GPR trending west/east, located approximately 6ft north of the northernmost fuel pumps (or 8.75ft south of the convenience store south sidewalk curb-line).

---

Andrew D. Silver  
Vice President/Engineering Geologist

Soil Vapor Sampling Form  
239 10th Avenue  
New York, NY 10001

Date: 2/7/2014 Time: 09:00  
Weather: Clear and Breezy  
Temperature: 25°F Humidity: 53%  
Wind Magnitude: 5 mph Wind Direction: West  
Barometric Pressure: 30.32 Precipitation: 0

Sampling Team: J. Gavin

Sampling Location: SV-1

Site Condition (i.e. any adjacent questionable facilities, vent pipes, tanks, etc. and what type of basements are present)

Soil vapor point was located in the NE section of the Site ~3 feet from the existing convenience store and approximately 20 feet WNW of 10th Avenue and 20.5 feet SSW of the adjacent neighboring building

Prior to commencing the sampling activity, remove the brass cap from the end of the sample tubing and fit a new brass hose barb fitting onto the sample tubing.

Calibrate the Helium detection meter

Utility Clearance Completed: Yes

feet below land surface (if ambient air sample, elevate can to approx. 3 ft - 5 ft above land surface)

Sampling Depth: 4-5

Sealed with bentonite: Yes

Apparent Moisture Content: N/A

Purge Rate: 0.127 L/min Must be less than 0.2 L/min

Purge Time: 75 sec

Helium Rate at enclosure: 18,000 ppm

Helium Rate from sample tubing: 0.0 ppm Is this rate <10% of the rate at the enclosure **Yes / No**

If the Helium readings have a greater ratio than 10% the seals should be rechecked and the tracer gas should be reapplied.

Once the tracer gas screening procedures are completed and no short-circuiting is determined to be present at the location the soil vapor sample can be collected in a lab certified clean summa canister at a rate less than 0.2 L/min.

Finishing pressure should be within 0.5 - 4 " of Hg

Is the Summa Canister Certified Clean and within the proper holding time? **Yes**

Starting Pressure: -30.2 in. of Hg

Starting Time: 09:08

Ending Time: 10:25

Ending Pressure: -1.43 in. of Hg

Summa Canister Identification #: 447

Flow Regulator ID #: 0443

Sample ID #: SV-1

Time: 10:25

Sampling Location: SV-3

Site Condition (i.e. any adjacent questionable facilities, vent pipes, tanks, etc. and what type of basements are present)  
Soil vapor point was located approximately 13 feet from property boundary at 10th Ave and 17 feet from property boundary at  
W 24th Street. (SV-3 was 8 feet SE of SB-4)

Prior to commencing the sampling activity, remove the brass cap from the end of the sample tubing and fit a new brass hose barb fitting onto the sample tubing.

Calibrate the Helium detection meter

Utility Clearance Completed: Yes

\_\_\_\_\_ feet below land surface (if ambient air sample, elevate can to approx. 3 ft - 5 ft above land surface)

Sampling Depth: 4-5

Sealed with bentonite: Yes

Apparent Moisture Content: N/A

Purge Rate: 0.127 L/min Must be less than 0.2 L/min

Purge Time: 75 sec

Helium Rate at enclosure: 18,250 ppm

Helium Rate from sample tubing: 0.0 ppm Is this rate <10% of the rate at the enclosure **Yes / No**

If the Helium readings have a greater ratio than 10% the seals should be rechecked and the tracer gas should be reapplied.

Once the tracer gas screening procedures are completed and no short-circuiting is determined to be present at the location the soil vapor sample can be collected in a lab certified clean summa canister at a rate less than 0.2 L/min.

Finishing pressure should be within 0.5 - 4 " of Hg

Is the Summa Canister Certified Clean and within the proper holding time? **Yes**

Starting Pressure: -30.1 in. of Hg

Starting Time: 09:03

Ending Time: 11:01

Ending Pressure: -10 (-3.3\*) in. of Hg

\* Flow controller's digital gauge reading was malfunctioning due to apparent loss of battery power. Lab confirmed the actual end pressure to be -3.3.

Summa Canister Identification #: 181

Flow Regulator ID #: 00005

Sample ID #: SV-3

Time 11:01

### Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

#### HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

**Lab Number:** L1402856  
**Report Date:** 02/11/14

### Case Narrative (continued)

#### Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

#### Volatile Organics

The surrogate recoveries for L1402856-01 and -03 are below the acceptance criteria for dibromofluoromethane (51% and 23%, respectively), due to a known matrix effect caused by the high pH of the sample (>10).

The WG669267-3 Method Blank, associated with L1402856-01 and -03, has a concentration above the reporting limit for bromomethane. Since the samples were non-detect for this target analyte, no further actions were taken. The results of the original analysis are reported.

#### Semivolatile Organics

L1402856-01, -03, and -04 have elevated detection limits due to the dilutions required by the matrix interferences encountered during the concentration of the samples and the analytical dilutions required by the sample matrices.

#### Metals

L1402856-01, -03, and -04 have elevated detection limits for all elements, with the exception of mercury, due to the analytical dilution required by matrix interferences encountered during analysis.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

### Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

### Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

### Terms

**Analytical Method:** Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

### Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.

**Report Format:** DU Report with 'J' Qualifiers

**Project Name:** 239 10TH AVE  
**Project Number:** 2355.0001Y000

**Lab Number:** L1402856  
**Report Date:** 02/11/14

**Data Qualifiers**

- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

**Project Name:** 239 10TH AVE  
**Project Number:** 2355.0001Y000

**Lab Number:** L1402856  
**Report Date:** 02/11/14

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

## Certification Information

Last revised December 11, 2013

---

### The following analytes are not included in our NELAP Scope of Accreditation:

#### Westborough Facility

**EPA 524.2:** Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

**EPA 8260C:** 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

**EPA 8330A/B:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT.

**EPA 8270D:** 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

**EPA 625:** 4-Chloroaniline, 4-Methylphenol.

**SM4500:** Soil: Total Phosphorus, TKN, NO<sub>2</sub>, NO<sub>3</sub>.

**EPA 9071:** Total Petroleum Hydrocarbons, Oil & Grease.

#### Mansfield Facility

**EPA 8270D:** Biphenyl.

**EPA TO-15:** Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

---

### The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

#### Drinking Water

**EPA 200.8:** Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

**EPA 300.0:** Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

**EPA 332:** Perchlorate.

**Microbiology:** **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

#### Non-Potable Water

**EPA 200.8:** Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

**EPA 200.7:** Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

**EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1:** Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

**EPA 624:** Volatile Halocarbons & Aromatics,

**EPA 608:** Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

**EPA 625:** SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

**Microbiology:** **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

### Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

#### HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

**Project Name:** 239 10TH AVE  
**Project Number:** 2355.0001Y000

**Lab Number:** L1402939  
**Report Date:** 02/14/14

### Case Narrative (continued)

#### Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

#### Volatile Organics

The surrogate recovery for L1402939-04 is below the acceptance criteria for dibromofluoromethane (36%), due to a known matrix effect caused by the high pH of the sample (>10).

#### Semivolatile Organics

L1402939-01, -03, -04, -04RE, and -07 have elevated detection limits due to the dilutions required by the matrix interferences encountered during the concentration of the samples and the analytical dilution required by the sample matrices.

The surrogate recovery for L1402939-04 was below the acceptance criteria for 2-fluorophenol (2%); however, re-extraction achieved similar results for 2-fluorophenol (3%). The results of both extractions are reported

#### Metals

L1402939-01 through -04 and -07 have elevated detection limits for all elements, with the exception of mercury, due to the dilutions required by matrix interferences encountered during analysis.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

### Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

### Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

### Terms

**Analytical Method:** Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

### Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.

**Report Format:** DU Report with 'J' Qualifiers

**Project Name:** 239 10TH AVE  
**Project Number:** 2355.0001Y000

**Lab Number:** L1402939  
**Report Date:** 02/14/14

**Data Qualifiers**

- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

## Certification Information

Last revised December 11, 2013

### The following analytes are not included in our NELAP Scope of Accreditation:

#### Westborough Facility

**EPA 524.2:** Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

**EPA 8260C:** 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

**EPA 8330A/B:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT.

**EPA 8270D:** 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

**EPA 625:** 4-Chloroaniline, 4-Methylphenol.

**SM4500:** Soil: Total Phosphorus, TKN, NO<sub>2</sub>, NO<sub>3</sub>.

**EPA 9071:** Total Petroleum Hydrocarbons, Oil & Grease.

#### Mansfield Facility

**EPA 8270D:** Biphenyl.

**EPA TO-15:** Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

### The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

#### Drinking Water

**EPA 200.8:** Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

**EPA 300.0:** Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

**EPA 332:** Perchlorate.

**Microbiology:** **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

#### Non-Potable Water

**EPA 200.8:** Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

**EPA 200.7:** Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

**EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1:** Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

**EPA 624:** Volatile Halocarbons & Aromatics,

**EPA 608:** Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

**EPA 625:** SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

**Microbiology:** **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

### Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

#### HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

---

**Project Name:** 239 10TH AVE.  
**Project Number:** 2355.0001Y000

**Lab Number:** L1403115  
**Report Date:** 02/17/14

### Case Narrative (continued)

#### Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

#### Semivolatile Organics

L1403115-01 and -03 have elevated detection limits due to the dilutions required by the matrix interferences encountered during the concentration of the samples and the analytical dilutions required by the sample matrices.

#### Organochlorine Pesticides

L1403115-01 and -03 have elevated detection limits due to the dilutions required by the sample matrices. The surrogate recoveries for L1403115-01 and -03 are below the acceptance criteria for 2,4,5,6-tetrachloro-m-xylene and decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. Re-extraction was not required; therefore, the results of the original analyses are reported.

#### Metals

L1403115-01 through -05 have elevated detection limits for all elements, with the exception of mercury, due to the dilutions required by matrix interferences encountered during analysis.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

### Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

### Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

### Terms

**Analytical Method:** Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

### Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.

**Report Format:** DU Report with 'J' Qualifiers

**Project Name:** 239 10TH AVE.  
**Project Number:** 2355.0001Y000

**Lab Number:** L1403115  
**Report Date:** 02/17/14

**Data Qualifiers**

- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

## Certification Information

Last revised December 11, 2013

---

### The following analytes are not included in our NELAP Scope of Accreditation:

#### Westborough Facility

**EPA 524.2:** Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

**EPA 8260C:** 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

**EPA 8330A/B:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT.

**EPA 8270D:** 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

**EPA 625:** 4-Chloroaniline, 4-Methylphenol.

**SM4500:** Soil: Total Phosphorus, TKN, NO<sub>2</sub>, NO<sub>3</sub>.

**EPA 9071:** Total Petroleum Hydrocarbons, Oil & Grease.

#### Mansfield Facility

**EPA 8270D:** Biphenyl.

**EPA TO-15:** Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

---

### The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

#### Drinking Water

**EPA 200.8:** Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

**EPA 300.0:** Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

**EPA 332:** Perchlorate.

**Microbiology:** **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

#### Non-Potable Water

**EPA 200.8:** Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

**EPA 200.7:** Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

**EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1:** Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

**EPA 624:** Volatile Halocarbons & Aromatics,

**EPA 608:** Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

**EPA 625:** SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

**Microbiology:** **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

### Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

#### HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

---

**Project Name:** 239 10TH AVE  
**Project Number:** 2355.0001Y000

**Lab Number:** L1403158  
**Report Date:** 02/17/14

### Case Narrative (continued)

#### Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

#### Semivolatile Organics

L1403158-01 and -04 have elevated detection limits due to the dilutions required by the matrix interferences encountered during the concentration of the samples and the analytical dilutions required by the sample matrices.

The surrogate recoveries for L1403158-01 and -04 are below the acceptance criteria for 2-fluorophenol, phenol-d6, nitrobenzene-d5, 2-fluorobiphenyl, and 4-terphenyl-d14 (all at 0%) due to the dilutions required to quantitate the samples. Re-extraction was not required; therefore, the results of the original analyses are reported.

#### Pesticides

L1403158-01 and -04 have elevated detection limits due to the dilutions required by the sample matrices. The surrogate recoveries for L1403158-01 and -04 are below the acceptance criteria for 2,4,5,6-tetrachloro-m-xylene and decachlorobiphenyl (all at 0%) due to the dilutions required to quantitate the samples. Re-extraction was not required; therefore, the results of the original analyses are reported.

#### Metals

L1403158-01, -02, -04, -05, and -06 have elevated detection limits for all elements, with the exception of mercury, due to the dilutions required by matrix interferences encountered during analysis.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

### Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

### Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

### Terms

**Analytical Method:** Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

### Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.

**Report Format:** DU Report with 'J' Qualifiers

**Project Name:** 239 10TH AVE  
**Project Number:** 2355.0001Y000

**Lab Number:** L1403158  
**Report Date:** 02/17/14

**Data Qualifiers**

- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

**Project Name:** 239 10TH AVE  
**Project Number:** 2355.0001Y000

**Lab Number:** L1403158  
**Report Date:** 02/17/14

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

## Certification Information

Last revised December 11, 2013

---

### The following analytes are not included in our NELAP Scope of Accreditation:

#### Westborough Facility

**EPA 524.2:** Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

**EPA 8260C:** 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

**EPA 8330A/B:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT.

**EPA 8270D:** 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

**EPA 625:** 4-Chloroaniline, 4-Methylphenol.

**SM4500:** Soil: Total Phosphorus, TKN, NO<sub>2</sub>, NO<sub>3</sub>.

**EPA 9071:** Total Petroleum Hydrocarbons, Oil & Grease.

#### Mansfield Facility

**EPA 8270D:** Biphenyl.

**EPA TO-15:** Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

---

### The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

#### Drinking Water

**EPA 200.8:** Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

**EPA 300.0:** Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

**EPA 332:** Perchlorate.

**Microbiology:** **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

#### Non-Potable Water

**EPA 200.8:** Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

**EPA 200.7:** Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

**EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1:** Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

**EPA 624:** Volatile Halocarbons & Aromatics,

**EPA 608:** Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

**EPA 625:** SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

**Microbiology:** **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

---

### Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

#### HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

### Case Narrative (continued)

#### Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

#### Volatile Organics

L1325592-04 has elevated detection limits due to the dilution required by the elevated concentrations of non-target compounds in the sample.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

### Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

### Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

### Terms

**Analytical Method:** Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

### Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.

**Report Format:** DU Report with 'J' Qualifiers

**Project Name:** 239 10TH AVE  
**Project Number:** Not Specified

**Lab Number:** L1325592  
**Report Date:** 12/23/13

**Data Qualifiers**

- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.

Report Format: DU Report with 'J' Qualifiers

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

## Certification Information

Last revised December 11, 2013

---

### The following analytes are not included in our NELAP Scope of Accreditation:

#### Westborough Facility

**EPA 524.2:** Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

**EPA 8260C:** 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

**EPA 8330A/B:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT.

**EPA 8270D:** 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

**EPA 625:** 4-Chloroaniline, 4-Methylphenol.

**SM4500:** Soil: Total Phosphorus, TKN, NO<sub>2</sub>, NO<sub>3</sub>.

**EPA 9071:** Total Petroleum Hydrocarbons, Oil & Grease.

#### Mansfield Facility

**EPA 8270D:** Biphenyl.

**EPA TO-15:** Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

---

### The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

#### Drinking Water

**EPA 200.8:** Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

**EPA 300.0:** Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

**EPA 332:** Perchlorate.

**Microbiology:** **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

#### Non-Potable Water

**EPA 200.8:** Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

**EPA 200.7:** Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

**EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1:** Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

**EPA 624:** Volatile Halocarbons & Aromatics,

**EPA 608:** Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

**EPA 625:** SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

**Microbiology:** **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

### Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

#### HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

**Case Narrative (continued)**

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

### Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

### Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

### Terms

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

### Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.

Report Format: DU Report with 'J' Qualifiers

**Project Name:** 239 10TH AVE.**Lab Number:** L1325888**Project Number:** Not Specified**Report Date:** 12/27/13**Data Qualifiers**

- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

## Certification Information

Last revised December 11, 2013

**The following analytes are not included in our NELAP Scope of Accreditation:**

### Westborough Facility

**EPA 524.2:** Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

**EPA 8260C:** 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

**EPA 8330A/B:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT.

**EPA 8270D:** 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

**EPA 625:** 4-Chloroaniline, 4-Methylphenol.

**SM4500:** Soil: Total Phosphorus, TKN, NO<sub>2</sub>, NO<sub>3</sub>.

**EPA 9071:** Total Petroleum Hydrocarbons, Oil & Grease.

### Mansfield Facility

**EPA 8270D:** Biphenyl.

**EPA TO-15:** Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

**The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:**

### Drinking Water

**EPA 200.8:** Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

**EPA 300.0:** Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

**EPA 332:** Perchlorate.

**Microbiology:** **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

### Non-Potable Water

**EPA 200.8:** Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

**EPA 200.7:** Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

**EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1:** Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

**EPA 624:** Volatile Halocarbons & Aromatics,

**EPA 608:** Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

**EPA 625:** SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

**Microbiology:** **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

### Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

#### HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

---

**Project Name:** 239 10TH AVE.  
**Project Number:** 2355.0001Y000

**Lab Number:** L1403108  
**Report Date:** 02/17/14

### Case Narrative (continued)

#### Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

#### Sample Receipt

The samples were received above the appropriate pH for the Total Metals analysis. The laboratory added additional HNO<sub>3</sub> to a pH <2.

L1403108-01 through -06 were field filtered for dissolved metals.

#### Semivolatile Organics by SIM

L1403108-01, -02, -03, -05, and -06 have elevated detection limits due to the dilutions required by the sample matrices.

The surrogate recoveries for L1403108-04 are below the acceptance criteria for 2-fluorophenol, phenol-d<sub>6</sub>, nitrobenzene-d<sub>5</sub>, 2-fluorobiphenyl, 2,4,6-tribromophenol, and 4-terphenyl-d<sub>14</sub> (all 0%) due to the dilution required to quantitate the sample. Re-extraction was not required; therefore, the results of the original analysis are reported.

#### Total and Dissolved Metals

L1403108-01 through -06 have elevated detection limits for all elements, with the exception of mercury, due to the dilutions required by matrix interferences encountered during analysis.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

## GLOSSARY

### Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

### Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

### Terms

**Analytical Method:** Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

### Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.

**Report Format:** DU Report with 'J' Qualifiers

**Project Name:** 239 10TH AVE.  
**Project Number:** 2355.0001Y000

**Lab Number:** L1403108  
**Report Date:** 02/17/14

**Data Qualifiers**

- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

**Project Name:** 239 10TH AVE.

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

## Certification Information

Last revised December 11, 2013

---

### The following analytes are not included in our NELAP Scope of Accreditation:

#### Westborough Facility

**EPA 524.2:** Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

**EPA 8260C:** 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

**EPA 8330A/B:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT.

**EPA 8270D:** 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

**EPA 625:** 4-Chloroaniline, 4-Methylphenol.

**SM4500:** Soil: Total Phosphorus, TKN, NO<sub>2</sub>, NO<sub>3</sub>.

**EPA 9071:** Total Petroleum Hydrocarbons, Oil & Grease.

#### Mansfield Facility

**EPA 8270D:** Biphenyl.

**EPA TO-15:** Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

---

### The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

#### Drinking Water

**EPA 200.8:** Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

**EPA 300.0:** Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

**EPA 332:** Perchlorate.

**Microbiology:** **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

#### Non-Potable Water

**EPA 200.8:** Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

**EPA 200.7:** Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

**EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1:** Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

**EPA 624:** Volatile Halocarbons & Aromatics,

**EPA 608:** Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

**EPA 625:** SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

**Microbiology:** **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

### Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. Performance criteria for CAM and RCP methods allow for some LCS compound failures to occur and still be within method compliance. In these instances, the specific failures are not narrated but are noted in the associated QC table. This information is also incorporated in the Data Usability format for our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

#### HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

---

**Project Name:** 239 10TH AVE  
**Project Number:** 2355.0001Y000

**Lab Number:** L1403094  
**Report Date:** 02/14/14

### Case Narrative (continued)

#### Volatile Organics in Air

Canisters were released from the laboratory on January 31, 2014. The canister certification results are provided as an addendum.

The WG669856-3 LCS recovery for Hexachlorobutadiene (156%) is above the upper 130% acceptance limit. None of the samples associated with this LCS have reportable amounts of this analyte.

The sample designated SV-2 (L1403094-02) had a RPD for the pre- and post-flow controller calibration check (23% RPD) that was outside of the control limit (20% RPD). The initial flow rate for the flow controller was 17.8 mL/minute; the final flow rate was 22.5 mL/minute. The final pressure recorded by the laboratory of the associated canister was -2.0 inches of mercury.

#### Sample Receipt

The samples were originally logged in based on the canister ID numbers on the sample tags but these did not match the chain of custody form. The client was contacted and based on their field notes we were instructed to log the samples in based on the canister ID numbers on the chain of custody form.

Samples L1403094-01, -02 and -03 have elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the samples.

Samples L1403094-01 and -03 were diluted and re-analyzed to quantify the sample within the calibration range. The results should be considered estimated, and are qualified with an E flag, for any compounds that exceeded the calibration range in the initial analysis. The re-analysis was performed only for the compound that exceeded the calibration range.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature:  Christopher J. Anderson

## GLOSSARY

### Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCS D	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

### Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

### Terms

**Analytical Method:** Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

### Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit.
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.
- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.

**Report Format:** Data Usability Report

**Project Name:** 239 10TH AVE  
**Project Number:** 2355.0001Y000

**Lab Number:** L1403094  
**Report Date:** 02/14/14

**Data Qualifiers**

- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the reporting limit (RL) for the sample.

**Project Name:** 239 10TH AVE  
**Project Number:** 2355.0001Y000

**Lab Number:** L1403094  
**Report Date:** 02/14/14

## LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

## Certification Information

Last revised December 11, 2013

---

### The following analytes are not included in our NELAP Scope of Accreditation:

#### Westborough Facility

**EPA 524.2:** Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

**EPA 8260C:** 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

**EPA 8330A/B:** PETN, Picric Acid, Nitroglycerine, 2,6-DANT, 2,4-DANT.

**EPA 8270D:** 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

**EPA 625:** 4-Chloroaniline, 4-Methylphenol.

**SM4500:** Soil: Total Phosphorus, TKN, NO<sub>2</sub>, NO<sub>3</sub>.

**EPA 9071:** Total Petroleum Hydrocarbons, Oil & Grease.

#### Mansfield Facility

**EPA 8270D:** Biphenyl.

**EPA TO-15:** Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

---

### The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

#### Drinking Water

**EPA 200.8:** Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

**EPA 300.0:** Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

**EPA 332:** Perchlorate.

**Microbiology:** **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

#### Non-Potable Water

**EPA 200.8:** Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

**EPA 200.7:** Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

**EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1:** Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

**EPA 624:** Volatile Halocarbons & Aromatics,

**EPA 608:** Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

**EPA 625:** SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

**Microbiology:** **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**
