back.04/19/11-Hiralkumar Patel.11:22 AM:- received email from Mr. Miller including document regarding chimney cleanup.2:35 PM:- left message for (and sent email to) Mr. Miller. informed Mr. Miller that the department is not intereted in chimney cleanup and someone from either building management or co-op board should call by end of tomorrow to discuss further. email copied to Peter at RAND.2:43 PM:- spoke with Bruce Flynn who is co-op member and informed him about current situation. he will talk to property manager and co-op president and will call back.05/06/11-Hiralkumar Patel.10:25 AM:- spoke with Bruce. he mentioned that all correspondence should go through property manager. informed him about no response from the manager. he will call back today.10:29 AM:- left message for Mr. Miller.3:38 PM:- received call from Ms. Crawford from Mr. Miller's office. she mentioned that they hired American Pipe for tank removal work.3:44 PM:- spoke with Mr. Silver at American Pipe. he confirmed that his company has been hired for removal of tank and associated contamination. he will submit work schedule next week.Richard SilverAmerican Pipe & TankPh. (212) 736-6618 (917) 763-6459email: tankman220@aol.com3:46 PM:- sent email to Mr. Silver and asked him to submit work plan and schedule by the end of 05/11/11. email copied to Ms. Crawford and Mr. Miller.08/05/11-Hiralkumar Patel.1:08 PM:- spoke with Richard at American Pipe. he has submitted proposal in May and haven't heard back yet.1:10 PM:- spoke with Bruce. he will call management office and will call back.1:46 PM:- left message for William Goldberg, person owned Apt. B in the building. informed him about spill issue and no response from management office. asked him to provide co-op board president's info.William GoldbergApt. BPh. (212) 929-15802:59 PM:- sent letter to Mr. Miller and asked to submit cleanup documents by 08/22/11. informed him that if cleanup documents are not received by 08/22/11, then case will be referred to legal. letter emailed to Mr. Miller, Mr. Flynn, Ms. Ferrato and Mr. Stella. copy of letter mailed to following building tenants (list from 411.com):- Cindy K Leggett-Flynn, 695 Washington Street, Apt. A- Jessica Goldberg/William Goldberg, 695 Washington Street, Apt. B- Gwen Jones, 695 Washington Street, Apt. 1A- Darlene A Krier, 695 Washington Street, Apt. 1B- Mary-Kotick-Feinstein, 695 Washington Street, Apt. 1F- Rebecca G Cheng, 695 Washington Street, Apt. 2B- Myron E Beldock, 695 Washington Street, Apt. 3- Jeanine P Pepler, 695 Washington Street, Apt. 4- Jeffrey T Williams/John P Williams, 695 Washington Street, Apt. 84:15 PM:- received message from Bruce.08/09/11-Hiralkumar Patel.10:55 AM:- spoke with Bruce. he mentioned that he has spoke with management and was told that insurance company is holding the work. informed him that 08/22/11 is the due date to submit document or else case will be referred to legal. he will talk to other unit owners and their attorney.08/11/11-Hiralkumar Patel.9:20 AM:- received message from Mr. Silver.1:08 PM:- spoke with Mr. Silver. he mentioned that Mr. Miller was sick and out of office for long time. Mr. Silver requested extension on behalf of Mr. Miller. informed Mr. Silver that at this moment, the department does not approve any more extension and requires to submit documents by 08/22/11. informed him that the Department may extend the deadline for another month (not more than that), if a progress made in the project. also informed him that the department requires a work plan and a written request from property manager as well as co-op board president.08/12/11-Hiralkumar Patel. copy of letter that was sent to Jeanine Pepler (Apt. 4) came back undelivered.08/17/11-Hiralkumar Patel.8:45 AM:- received call from

PLYMOUTH MANAGEMENT (Continued)

S110611367

Tim Fisher from Antea Group, environmental consultant hired for tank removal. he visited site yesterday and will submit sidewalk permit application to NYC DOT. asked Tim to submit copy of their signed contract with property owner. also asked him to submit PBS application (for tank removal notification) and copy of permit application. Tim FisherAntea GroupPh. (914) 495-9935 (O) (949) 375-1174 (C)email: timothy.fisher@anteagroup.com8:59 AM:- sent email to Mr. Fisher and asked him to submit above documents. informed him that the documents must be submitted by 08/22/11 in order to avoid enforcement. email copied to Mr. Miller, Mr. Stella and Ms. Ferrato.1:34 PM:- received message from mr. Fisher. he inquired about soil samples done at the site.received message from Bruce inquiring updates.08/19/11-Hiralkumar Patel.11:06 AM:- spoke with Mr. Fisher. he mentioned that they observed some patches on sidewalk which looks like bornigs were installed around the tank. informed him that as per PTC, they collected soil samples through tank bottom which came back clean. as oil found away from tank, clean soil samples underneath the tank are questionable. he mentioned that he will get signed contract today and will send copy of contract and work schedule. he is working on PBS application for tank removal work.11:12 AM:- left message for Bruce and informed him about current status.11:58 AM:- received email from Mr. Fisher including copy of signed contract between property owner and Antea Group.08/29/11-Hiralkumar Patel.8:39 AM:- received email from Mr. Fisher including copy of tank removal notice that was sent to PBS unit.09/13/11-Hiralkumar Patel.4:39 PM:- sent email to Mr. Fisher inquiring updates. email copied to Mr. Miller.09/14/11-Hiralkumar Patel.7:57 AM:- received email from Mr. Fisher. they are still waiting for permit and expect to get by next week. they have scheduled tank removal for the week of Sep. 26, 2011.09/22/11-Hiralkumar Patel.2:34 PM:- received email from Mr. Fisher. he mentioned that they have DOT permit but waiting for forestry permit from NYC Parks Dept. as they need to remove tree which is located right above the tank. Mr. Fisher is planning to start tank removal on 10/03/11.09/23/11-Hiralkumar Patel.1:39 PM:- sent email to Mr. Fisher and asked to inform once permit received. email copied to Mr. Miller.10/19/11-Hiralkumar Patel.2:15 PM:- spoke with Mr. Fisher. they removed tank on 10/06/11. Mr. Fisher mentioned that during tank removal, they noticed some minor contamination on top of tank, but no contamination observed under the tank. no water found in excavation. they collected five endpoint samples and waiting for results. they also removed pipes under the sidewalk. Mr. Fisher believes that the remaining pipes from the retaining wall to the boiler room are still in-place. asked him to confirm presence/absence of remaining piping and if pipes are still there, asked him to do dye test to see if those lines were the source of oil found in pits. 11/10/11-Hiralkumar Patel.10:32 AM:- received call from Mr. Fisher. he received sample results and found clean soil except minor exceedence in one sidewall sample. he also looked for piping, but were removed earlier. he will submit final closure report.02/28/12-Hiralkumar Patel.5:00 PM:- sent email to Mr. Fisher and asked to submit report by 03/05/12. email copied to Mr. Miller.5:00 PM:- received email from Plymouth Management and asked to contact Marlene Crawford.02/29/12-Hiralkumar Patel.1:31 PM:- left message for Ms. Crawford at Plymouth. asked her to submit report by the end of 03/02/12 to avoid enforcement.1:33 PM:- left message for Mr. Fisher.1:35 PM:- sent email to Ms. Crawford (mcrawford@plymouthny.com) and Jack Lerner (jlerner@plymouthny.com)

DEC Remarks: CALLER IS GOING TO REMOVE ALL CONTAMINATED SOIL. DEC Sigona) called Mike Tumulty on 7/28/98. He called back left message on 7/29/98 said they removed a 550 at former taxi storage facility. They will try to remove all of the contaminated soil and take end-point samples and send results to DEC. This is the site of the former set for the TV show Taxi. DEC Sigona) would perform field inspection if further excavation and remediation is necessary depending on laboratory results. 7/29/98 2:30 P.M. Developer is nervous because they plan to erect 7 story building at site.

Spill Cause: caller pulling old tank at taxi station, encountered contaminated soil.

DEC Remarks: DEC SIGONA) RECEIVED A CLEANUP REPORT from H2M Group dated October 26, 1998. DEC reveiwed the results of endpoint soil testing and found that the levels met STARS Memo No. 1 guidance values. This closes the spill associated with the waste oil USTs see letter to Sligo Realty Co, dated Nov 24, 1998). However, the spill investigation no. 9805274 associated with the removal of the former gasoline USTs is being cleaned up by a separate cleanup plan from H2M Group, dated September 25th Oct. 2nd,1998 were approved in a letter to Sliglo Realty, dated Nov. 24, 1998. The cleanup report on the gasoline USTs is due on Jan. 31, 1999.

DEC Memo: CALLER IS GOING TO REMOVE ALL CONTAMINATED SOIL.DEC (Sigona) called Mike Tumulty on 7/28/98. He called back left message on 7/29/98 said they removed a 550 at former taxi storage facility. They will try to remove all of the contaminated soil and take end-point samples and send results to DEC. This is the site of the former set for the TV show Taxi.DEC (Sigona) would perform field inspection if further excavation and remediation is necessary depending on laboratory results. 7/29/98 2:30 P.M. Developer is nervous because they plan to erect 7 story building at site.This gasoline spill case has been reassigned from DEC (Sigona) to Rommel on January 7, 2004.9/28/04 Transferred from Rommel to K Foley.12/7/05 Transferred from Foley to Carlson.12/23/05: Reviewed file. A 550 gas tank was removed and surrounding contaminated soil. GW was impacted. Latest monitoring report from H2M is dated 10/20/1999. Report indicates a significant increase in BTEX concentration after ORC was applied. H2M concluded there is an off site source and additional remedial action wasn't planned. Sigona visited the gas station (107 Charles Street/540 Hudson Street) and confirmed that they have un-registered UST's. The other potential source (6th precinct, spill # 92-12918) does not appear to be a significant contributor (see Jon Kolleenys memo). I called Chuck Martello (H2M) and left a message requesting recent monitoring data and informing him I will draft a letter with results of my potential off site source investigation.1/3/06: Sent an additional delineation letter requiring a MW by 107 charles street by 2/28/06, and quarterly reports. 3/20/2006: Called Chuck Martello of H2M and he does not have any recent info about the site and has not spoken to Sligo Realty since 1999. Phone number for Gerald Cunningham of Sligo Realty is not in service. NYSDOS dept of corperations entity info lists Sligo's address as SLIGO REALTY AND SERVICE CORP., 248 W. 60TH ST., NEW YORK, NEW YORK, 10023. Property shark and acris show no title info. Recent building permits show the contact to be Seth Weinstein (212-307-0500 x228). Spoke with Seth Weinstein. He is the current owner/manager of the property, which is a condominium. He requested a fax with information regarding the spill (fax: 212-262-5697).3/21/06: Faxed Seth Weinstein a letter requiring additional delineation and quarterly reports, a FOIL spill report, and the H2M letter/report dated 10/20/1999.3/23/06: Received phone call from Gerald Cunningham's attorney: Matt Parisi of Bleakley, Platt and Schmidt, he is going to trial in 1 week and will give me an update on the case afterwards. Matthew G. ParisiBleakley Platt & Schmidt, LLPOne North Lexington Ave. White Plains, New York 10601www.bpslaw.com P: 914-287-6184F: 914-683-6956mparisi@bpslaw.com5/23/06: Spoke to Matthew Parisi. He will contact rp and consultant and get back to me.6/20/06: Left voice message for Matthew Parisi to followup on overdue delineation and quarterly reporting. 6/21/06: Received phone message from Matt Parisi, he will speak with the consultant and get back to me.7/26/06: Left voice message with Matt Parisi on status of overdue quarterly report. 8/11/06: Left phone message with Matt Parisi on status of site.8/21/06: Sent stipulation agreement. Due back 9/18/06.8/25/06: Spoke with Matt Parisi. A FOIL request will be submitted for 6th precinct spill upgradient.8/28/06: Received the cc of a FOIL request for 6th precinct spill.10/6/06: Spoke to Matthew Parisi. I

recommended he call Gloria Silva regarding the FOIL request.10/23/06: Spoke to Matthew Parisi. He will call Gloria Silva and then call me back with an update.10/27/06: Received email from Matthew Parisi: "Following up on our recent conversations, Gloria Silva is going to send all the documents subject to my FOIL requests to a printer for copying. I will contact you when I receive the copies."11/13/06: Left voice message with Matthew Parisi to followup on site status. A new deadline for Stip, update report, and delineation should be established.11/15/06: Received email from Matthew Parisi (mparisi@bpslaw.com):" I finished picking jury this morning and the trial is starting tomorrow morning. On this matter, we received a disc containing "a portion of the 6th Precinct DEC file." It was my understanding that the rest of the documents were being copied already. However, Ms. Silva called me today and said that they were going to send them to the copy center today. She said that I would get a call about the cost involved from the copy place, who I will tell to copy the entire file. I will let you know when I hear from them and will expedite the review process as best I can. As far as deadlines, Ms. Silva told me that she was going to copy about 2 to 3 inches worth of files. When I get them I will send them right out to H2M. If Ms. Silva's estimate is correct, I would think that we could have them reviewed within 2-3 weeks of receipt."11/28/06: File was sent out to be copied by the Department for the FOIL request.1/2/07: Sent email to Matthew Parisi indicating that a signed stip, update report, and delineation report are due on 2/2/07.1/3/07: Received call from Matthew Parisi, copies from the FOIL request have not been received yet.2/15/07: Spoke to Chuck Martello at H2M (973-942-0700 x 230). FOIL documents are under review. Groundwater will be sampled.5/1/07: Left phone message for Chuck Martello to followup on groundwater sampling.5/9/07: Left phone message for Chuck Martello to followup on site status.5/10/07: Emailed Chuck Martello (cmartello@h2m.com) to followup on groundwater sampling.5/11/07: Received phone message from Chuck Martello. He has not been able to contact the client for this site.Left voice message for Matt Parisi.5/17/07: Received email from Matt Parisi : "Earlier today I reached both my client and Chuck Martello from H2M regarding the outstanding issues. I believe that Chuck will be reaching out to you (or may have already). In any event, they are going to address the outstanding issues and get back to you shortly." Spoke to Chuck Martello. Groundwater sampling planned for next week.6/4/07: Received phone message from Chuck Martello. Contract expected to be signed this week.6/6/07: Groundwater sampling scheduled for 6/8/07, 10:30 am.6/8/07: Witnessed groundwater sampling of MW11 and MW13. The site is currently a Rite Aid (ground floor), apartment building (Hudson street entrance), and nursing home (Charles street entrance).7/17/07: Spoke to Chuck Martello. Report is in preparation.7/31/07: Emailed Chuck Martello to followup on submittal date for groundwater sampling report.8/15/07: Left voice message for Chuck Martello regarding overdue report. Spoke to Chuck Martello. He is waiting for authorization to release the report from the attorney Matt Parisi.8/22/07: Reviewed letter report. BTEX 229 ppb (MW12). MTBE 64 ppb (MW12). Sent letter requiring quarterly sampling and reporting.2/14/08: Received phone call from Chuck Martello of H2M. Wells have been sealed with grout. He is investigating to see who sealed wells (maybe consultant for 6th Precinct spill). Wells will need to be reinstalled.3/10/08: Received phone message from Chuck Martello, URS will replace well on Monday.3/12/08: Spoke to Chuck

Martello (973-942-0700). Well was not installed because scaffolding was present around the building. Well will be installed when scaffolding is removed. Reviewed letter dated 1/22/08 proposing the use of ORC socks in the well when it is reinstalled.3/18/08: Sent letter approving use of ORC socks in MW12, when it is reinstalled. (Curt Schmidt: cschmidt@h2m.com)8/6/08 - Carlson: Left phone message for Curt Schmidt (973-942-0700 x2234) - quarterly report is overdue. Spoke to Curt Schmidt - scaffolding is still in place, well can't be reinstalled until the end of the year. He will send letter.9/4/08 - Carlson: Received letter from H2M. MW12 can't be reinstalled until scaffolding removal in later 2008.11/26/08 - Carlson: Received letter from H2M. Well installation still delayed because scaffolding is in place.3/20/09 - Carlson: Received letter notifying that well installation scheduled for 4/1/09. Need to confirm soil sampling will be conducted during well installation.4/10/09 - Carlson: Received letter from Curt Schmidt. MW12 was reinstalled in the same borehole, ORC socks installed in well.7/9/09 - Carlson: Received email from curt schmidt, orc socks removed, site will be sampled on 7/16/09. 2/19/2010 - Carlson: Sent email to Curt Schmidt - quarterly report overdue.Spoke to Curt Schmidt. Report will be submitted in one or two weeks.2/10/2012 - Carlson: Spoke to Curt Schmidt at H2M, he will speak to owner and send report.2/17/2012 - Carlson: Received email from curt schmidt. ORC socks to be removed this week, groundwater to be sampled next week and monitoring report to be submitted.8/9/12 - Carlson: Spoke to Curt Schmidt at H2M. Owner is: Peter Cunningham, 559 Main Street, New Rochelle, NY, 10801. Need to send enforcement letter.

Remarks:

Caller pulling old tank at taxi station, encountered contaminated soil.

S103478043

found; URS proposed installing SVE system to address soil and monitoring for groundwater. JK of DEC approved this plan. SVE system started in March 2002. In November 2003, URS advanced 6 confirmation soil borings to evaluate progress. Results showed high residual contamination at shallow depth in boring in sidewalk area near former fill port. URS proposed NFA/spill closure, but DEC asked for limited soil excavation in area of fill port. Then in May 2004, Con Edison encountered strong gasoline odors when excavating in street in front of fill port area; soil samples showed gasoline contamination (see spill 0401426). URS argued that further soil excavation was not practical, but recommended modifying SVE system by adding a 2nd extraction well in sidewalk; DEC approved this. System was modified, and re-started in January 2005 using only the newer SVE well. On-going semi-annual groundwater monitoring continues to show minor VOC exceedances. - JK 6/15/05 Nov.-Dec. 2005: Reviewed System Performance Monitoring Report for August-October 2005. SVE system monitoring data show system appears to have reached asymptotic conditions, so URS will perform a confirmatory soil boring in area near sidewalk fill port where earlier confirmation sampling found high levels of VOCs. Groundwater results from July 2005 showed contaminant levels in the two wells that were sampled, MW-7 and MW-11R, increased to about 500-600 ppb total VOCs, and irregular groundwater flow direction with eastward component in area of MW-7 and MW-4. URS stated that all wells be sampled in first quarter of 2006. - J. Kolleeny10/19/06: Reviewed URS report Results of Confirmation Soil Sampling 2nd Round and Groundwater Results / Request for Spill Closure, dated Oct. 18, 2006. Results of soil sample from boring SB-12 near sidewalk fill port area and earlier hot confirmation boring SB-6 showed some TAGM 4046 exceedances (total VOCs of 29 ppm), but not nearly as high as SB-6 (total VOCs of 110 ppm). Exceedances are in shallow fill materials above a low-permeability silty clay layer, with sand & gravel below that; URS speculates that SVE system preferentially pulled vapors through sand/gravel layers, with little effect on top layer of fill materials due to silty clay layer. Groundwater sampling of wells MW-7 and MW-11R during Feb. and July 2006 showed ND for MW-11R and low-level contamination in MW-7 (up to ~30 ppb total VOCs). URS also did Sensitive Receptor Survey suggesting that the residual soil and groundwater contamination were unlikely to impact any receptors, they therefore requested spill closure and NFA. However, they did not sample all monitoring wells as they stated in the 11/18/05 System Performance Monitoring Report for August-October 2005. I sent email to Jane Staten of URS requesting that they sample wells MW-1 through MW-9 during the 4th quarter of 2006. - J. Kolleeny12/22/06: Reviewed URS's Request for Spill Closure dated Dec. 6, 2006. Report presents results of full round of groundwater sampling, as requested, although no samples were taken from MW-3 because it was inaccessible or MW-11R because it was ND for last two rounds (Feb. and July '06). [MW-3 was clean last 3 times it was sampled, in June 2000, March 2001, and May 2001.] GW samples were collected from MW-1, MW-2, MW-4, MW-6, MW-7, MW-8 & MW-9 on Nov. 27, 2006. Results showed exceedances only in MW-7, with 75 ppb total VOCs. This low-level contamination does not pose a significant threat to the environment or public, and will likely naturally attenuate over time. Residual soil contamination in area of borings SB-6 and SB-12 near sidewalk fill port is located above low-permeability silty clay layer, which will limit its potential to impact GW, which is 24-25 feet below grade. DEC Memo:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KOLLEENY"5/11/04: spoke with Glenn Newell, Con Ed Construction Management. Con Ed was excavating for new electric ducts in front of police station at above location - noted strong gasoline odor in soil. No staining seen. Lab results came back 11,200 ppm TPH for gasoline. There is a gas tank at the police station. Referred to Kolleeny (DDC monitor) for follow up. (JHO)Con Ed e2mis report # 153304:05/11/04 09:27 R. Harris #20059 of const. mgmt. notified the control center that in a excavation f/o 102 Charles St, that due to a strong odor of gasoline in the excavation, the chem lab was called and a sample was taken. For the purposes of this report, we are using 1 gallon of gasoline for the amount of spill since it was never determined. The results of the sample, which was posted today (5/11/04) show 11,200 PPM of gasoline in the soil. The excavation is approx. 30x2 ft. There are gasoline pumps across the street. The excavation is plated and barricaded. The source and cause of the spill is unknown. This is a 3rd party spill. There was no initial cleanup taken. This spill was discovered in an excavation in the street behind the 6th police precinct (at the Charles Street entrance to parking lot). URS is operating an SVE system to address soil contamination at the site; the system will be modified to target this area, to the extent feasible. - J. Kolleeny 3/22/05. See open spill no. 9212918, under which remediation of this site pursuant to DDC consent order is being tracked. - JK 6/15/056/15/05: URS installed new vapor extraction well in sidewalk to address fill port area and try to address this area of soil contamination Con Ed encountered in the street. They resumed operating SVE system using this new well in January 2005. This spill is being closed to consolidate with open spill 9212918, under which site remediation pursuant to DDC consent order is being tracked. - JK

transferred to J. Kolleeny. LiRo Engineers undertook remediation of this site under DDC Consent Order. Remedial actions included excavation of contaminated soil from several areas, installation/operation of SVE system, bio-nutrient application, and ORC application. Results of LiRo's February 2006 Sensitive Receptor Survey (in eDocs for related spill 9804683) for site indicate low-level residual GW contamination in two monitoring wells is unlikely to pose a threat to environment or public health. LiRo's remedial actions and well network addressed entire site, all tanks. OK to close spill. - J. Kolleeny

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ZHITOMIRSKY" The spill is also referred to spill # 9712858. The site is currently under remediation by LiRo Engineers. - II (03/02/05). 7/21/2005- Reviewed Quaterly Monitoring Report received in June 2005. ORC socks were installed in wells MW-2, 10 and 13R. In February 2005 LiRo conducted additional soil excavations that were requested by DEC. LiRo recommended continued operation and monitoring. The Department concurred. AZ11/08/09 - Reviewed Quarterly Monitoring Report received in October 2005. MW-13 exhibited total VOCs concentrations of 179 ppb. Concentrations in this well fluctuate between 34 ppb and 230 ppb - unstable plume conditions. MW-2, a downgradient well, exhibited concentrations of 68 ppb up from

DEPT OF SANITATION (Continued)

S104950873

previous reading 4 ppb. My conclusions: plume conditions are unstable. Sentinel well is contaminated. Further monitoring is needed. AZ 7/11/2006 Reviewed Sensitive Receptor Survey Report by LiRo. The site underwent remediation: excavation of a contaminated fill port area along Canal Street, installation of a soil vapor extraction system (SVE), bio-nutrient application and the application of oxygen release compound (ORC). Fill port excavation was completed in 2001. ORC was applied in March 2003 and September 2003 in 8 eight wells in the southern portion of the site and in 12 wells in the northern portion of the site. For the soil bioremediation, a bacteria-nutrient slurry mix was injected for 6 consecutive weeks starting on March 11, 2003. The SVE system was working from July 29, 2003 until a shutdown in October 2004. The shutdown was approved by DEC. The ORC socks were installed in October 2004 and April 2005. Additional soil excavation was performed in January/February 2005, as requested by DEC. LiRo stated that there is no known direct exposure pathways within 2,000 feet of the site. Site groundwater appears to be controlled by Holland tunnel dewatering system. LiRo recommended closure of this spill. Jon Kolleeny suggested closure of this spill.
AZ

Remarks: CALLER RESPONDED TO ABOVE LOCATION FOR TANK UPGRADE. UPONREMOVAL OF OLD TANK SOIL CONTAMINATION WAS DISCOVERED. SOILHAS BEEN REMOVED AND FURTHER TESTING AND TANK REPLACEMENTTO FOLLOW. NO CALL BACK REQUEST.

Environmental Consultants. Tank is a 1500-gallon AST in basement encased in concrete vault. Tightness test indicated leak was in a dry portion of the tank. Petroleum Tank Cleaners was hired and pumped fuel from tank, cleaned tank interior, removed and resealed manhole cover, repaired broken vent line and petrometer connection. Tank passed tightness test once repairs were completed (tightness test results sent to NYSDEC). Spill closed by Vought.

Remarks: TANK IS AN ABOVE GROUND TANK. TO BE EVALUATED AND RETESTED.

Site Description: The Site is located on the New York City block bordered by Canal Street to the north, Washington Street to the east, Watts Street to the south, and West Street (the West Side Highway) to the west. The Site encompasses an approximate area of 25,800 square feet (0.592 acres). Lot 1 (the western parcel) is occupied by an approximate 13,320 square-foot (0.305 acres) asphalt-paved parking lot. Lot 22 (eastern parcel) is occupied by interconnected one- and high two-story buildings and occupies an area of 12,480 square feet (0.287 acres). The buildings are currently vacant. In October 2010, the City Council adopted the North Tribeca Rezoning, which is intended to continue the neighborhood's transformation from industrial uses to

"family-friendly" residential uses. Currently, adjacent properties consist of residential to the north and south, mixed commercial and residential to the east; Landmarks include the Hudson River and West Side Highway to the west and Holland tunnel to the northwest. Lots 1 and 22 were developed with two to five-story buildings in 1894 with unclear use. In 1905, a warehouse was built on the northern two-thirds of lot 22 and used to store steel through 1925. In 1922 lot 1 was developed into a building with use labeled as Tower Stores Inc. Lot 1 was then used as a gasoline filling station from 1950 through 1968. Subsequently, it has been used as a parking lot. From 1928 to 2005, lot 22 was used as a railroad freight station/freight warehouse. Currently, the buildings located at lot 22 are vacant. Subsurface strata consists of fill extending to depths ranging from 23 to 25 feet below ground surface (bgs), underlain by clay atop silty sand and bedrock. Depth to groundwater ranges from 5.90 to 13.72 ft-bgs. The groundwater elevation is highest in the northwest and slopes toward the southeast.

Env Problem: Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.

Health Problem: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SAWYER"7/24/2003-Vought-Conroy Environmental Consultants-631-423-1240 received NFA Request results dated April 30, 2003. Tank repair work included pumping existing fuel from tank, cleaning the tank interior and resealing tank manway. The tank ONLY passed the tightness test after repairs were made (tightness test results provided). Vent and fill line did not pass the test and as a result the fill line was immediately sealed and are scheduled to be replaced. FOR spill closure NYSDEC requires 1)Site Plan 2)borings or endpoints to investigate possibility of fill pipe impact to subsurface.1/7/04-Vought-Spill transferred from Vought to Austin.01/27/04 - Sawyer - Spill transferred from Austin to Sawyer.11/28/05- DEC Piper sent out another ttf letter in regards to fill and vent line failure to Michele Dekonkoly Thege at 272 6th Ave, NY, NY. Daphne no longer w/ little red school house.12/28/05- DEC Piper has spoke w/ Steve Russo, rep for Little Red School house. regarding borings. He will look into it.5/5/06- DEC Piper has left message w/ Steve Russo, rep for Little Red School house. regarding borings, requesting callback and info.5/11/06- DEC Piper spoke w. Steve. A visit is scheduled for 5/15 at 3:30pm.5/15/06- DEC Piper responded to site to determine additional work. The 2 x 2 vault to the manway of an UST contained contaminated soil. Once opened the vault emanated vapors. Trap door was sealed with duct tape to prevent vapors intruding into basement classrooms. There is no such evidence that any soil was removed when the fill line was replaced (manifests, analytical , not mentioned in report. DEC instructed LRSH to remediate top of tank and perform borings along fill line. CSL letter sent.6/6/06- DEC Piper left message for John at Langan requesting callback. Returning his call.6/30/06- DEC Piper met w/ John Garvis of Langan and Hydrotech technicians. Contaminated Soil was excavated around manway with a shop vac approx, five gallons. Soil was clean under surface oil staining. Top of tank exposed w/ no indication of overfill to subsurface. Some concrete existed. Hydro tech to epoxy seal manway (2 coats) and concrete around manway. Fill and vent were replaced. No oil staining observed on old fill line entering basement. Closed. See e-docs if warranted.
Remarks: TANK TO BE INSPECTED AND RETESTED.

DEC Memo:

Two months after the reported spill, on February 26, 1998, the owner, Joseph Pistilli, replaced the boiler and burner. Also, at this time, Mr. Pistilli installed two new above ground 275 gallon fuel oil tanks. On August 12, 1998, Mr. Pistilli installed an additional new 1000 gallon above-ground fuel storage tank. Based on this information, this spill is closed. John Durnin, November 14, 2005.

Remarks: APARTMENT BUILDING. ONTO CONCRETE BASEMENT FLOOR. ABSORBANT APPLIED TO SPILL BY SERVICE MAN. LEAK TEMPORARILY PLUGGED WITH BAR SOAP. PETROLEUM TANK CLEANERS CONTACTED TO EVACUATE TANK.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

both a failed tank and contaminated soil. 3/22/2004 - A contractor spoke to Sawyer concerning the work to be done on the site. 12/16/05- DEC Piper spoke w/ Robin Heath. He will have someone contact the dept regarding the site. 12/29/05- DEC Piper received call from Dick Brownell of Malcolm Pirnie (consultant) regarding site. As per conversation, there is a dual phase extraction sytem running periodically at the site. There is currently free phase product in two of the monitoring wells. A file exists. File should be transferred to Remediation Group. 1/11/06- DEC Piper File transferred to Koon Tang. Remediation required. 1/12/06 - assigned to Jon Kolleeny Group. - KST02/02/06: This spill transferred from J.Kolleeny to S.Kraszewski. Spoke with Richard Brownell from Malcolm Pirnie (914-641-2424). I inquired about the trench recovery system installed in September 1994 and any monitoring data available for the site and the wells. The trench system was installed as a dual-phase extraction system for several recovery wells located in the former tank area and the boiler room. The system operated from Nove 2004 to Nov 2005 when the motor broke down and had to be repaired. the motor is almost finished and the system will be operational soon. For the duration of the remediation process at this site, free product has been observed in the boiler room, Richard said. Bimonthly O+M reports have been keeping track of the system for some time since little free product was being recovered. I asked Richard to summarize the data from the O+M reports along with a site diagram with the trench system on it along with the MWs surrounding the perimeter of the site. Also, the site will be undergoing redevelopment which will involve the excvaton and removal of the soil on-site. This would be considered source removal of contaminated soils. For now, the system will be started up when ready and run until the data suggests otherwise. I also mentioned that in the near future, GW samples will be required to assess the degree of contamination present in the GW. Richard said no GW samples have been taken in quite some time. - SK03/01/06: Richard Brownell from Malcom Pirnie returned my call to update me on site progress. The oil recovery system motor is fixed and ran for several days, extracting several gallons of oil. This oil had been collecting for 2.5 months while the system was under repair. When the system had been running in the past, oil was being extracted from two recovery wells, but now only one exhibits free product. This recovery well is located in the boiler room, near the former USTs. He will write up an update report for the site and send it out to me; due by 03/10/06. 03/10/06: Reviewed Summary of Oil Recovery System Results submitted by Malcolm Pirnie. Volume of oil recovered by the system over time shows a decline in product recovered. The system was shut down due to mechanical difficulties from November 17 2005 until February 24, 2006. No SVE data is given in the report. Product measurements seemed to be made randomly at different monitoring wells, few have current product thickness measurements. Some show one measurement with ND given and no follow-up measurements made. - SK03/15/06: SK spoke with Richard Brownell about the summary report. I told him that SVE air sampling and GW sampling is needed, since it is long overdue. The GW samples must be analyzed for VOCs and SVOCs while air samples can be taken with a PID at the influent and effluent ports of the system. Spoke to J.Kolleeny about the report. He said to ask about the Monitoring and Maintenance Plan for the system before writing up a response letter. - SK03/17/06: Spoke with Dick Brownell. I asked him if the recovery system had a Monitoring and Maintenance plan. He said he wasn't sure and probably didn't, but

SUPERIOR PRINTING INK CO INC (Continued)

1000215465

he would check to make sure. I said if none is found then he should put together a plan to cover activities from this point on. I told him that I would Email him the Excel tables to use as a template. He said that sounds good. Also, he mentioned about the RAP and if I had a copy. The only copy I have is a draft RAP from Malcom and Pirnie. Dick said he will check if Langan Engineers had sent a copy to DEC. Malcom and Pirnie is currently working on scheduling a round of MW measurements and samplings for analysis. I sent out the Email with the Monitoring and Maintenance tables. - SK04/10/06: Dick Brownell called with news that they would be taking GW samples either Wednesday or Thursday this week. However, the SVE system is still out of service due to motor problems, so no influent or effluent air samples will be taken. Dick will let me know when exactly they will be collecting samples. - SK04/17/06: Dick Brownell from Malcom Pirnie called. The sampling will be rescheduled for the 26th. He mentioned that the monitoring well with free product, BB-12, may be widened with a four inch slotted PVC pipe in order to vacuum out oil and water. This may remove the remaining product that is left on-site. No other wells exhibit any product. I asked Dick to write me up a letter summarizing the scope of this work. He said I should have it by Thursday. - SK04/28/06: SK received a call from Malcom Pirnie, informing me that a letter requesting the installation of the MW where BB-12 is currently located. This work involves cutting a 4' by 4' section and excavating down to the water level and then removal of any free product encountered. If free product enters the pit consistently then a 4 inch slotted PVC will be advanced for continued product recovery. - SK 05/02/06: Sent out approval letter for additional oil recovery work. Also, the GW investigation results should be included in the oil recovery report. Spoke yesterday will Wyn Davies and gave him verbal approval and mentioned that four endpoint samples from the excavation would be needed. Work should begin by early next week, May 8-10. - SK06/19/06: Reviewed New Sump Pit Proposal from Malcolm Pirnie dated June 19, 2006. Spoke with Wyn Davies about the proposed Sump Pit #2. I asked for 4 grab samples from the pit instead of 2. MW data and soil grab samples analysis results were included. All four soil grab samples detected slight SVOC exceedances. Water samples from MW-5 detected slight VOC contamination above TOGS, but no BTEX above TOGS. Discussed the proposal with J.Kolleeny. Gave Wyn a verbal approval followed by an approval letter. - SK06/26/06: Dick Brownell (office:914-641-2424) from Malcolm Pirnie called. The additional sump pit has been installed, they seem to have found the pocket of oil and taken care of it, at least for now. Workers vacuumed out the pit to draw down the water. The recovery system is operational once again and Dick said they will have a report for me in July. BB-10, a monitoring point located next to the former tank location, has a 1/4" sheen. - SK07/07/06: Dick Brownell (cell:914-806-9934) from Malcolm Pirnie called to inform me that no free product remains in any of the recovery wells. The isolated product from the second sump pit has abated. Also, he has found out that this site is slated for redevelopment sometime later this year. I told him that it looks like we are on the verge of closure, but I would prefer to visit the site and discuss this with my supervisor. A site visit is scheduled for July 19 at 10AM. - SK07/19/06: Visited on-site with Dick Brownell from Malcolm Pirnie, Harold Rubin the RP and Dave Uteson the attorney for the developers interested in the site. We discussed the status of the recovery system. 11/09/06: Reassigned to Stephen Kraszewski to

Chanda.(Chanda)12/26/06: Kartik Chanda of DEC reviewed enter file and called Dick Brownel (office:914-641-2424) to get the update information regarding this site and left message to call back.12/28/06: Chanda received a phone call from Mr.Dick Brownel(Malcolm Pirnie) he informed to DEC that his company is no longer with this site. This project have new consultant (Mr.Joe Landes ph:212-479-5400) assigned this site and the property has been transfered to new owner.01/02/07: Chanda called Mr. Joe Landes (New Consultant) to get update information regarding this site. Left message to call back.01/02/07: Kartik Chanda of DEC sent a letter to the RP (Mr.Harold Rubin, requiring that a work report be submitted to DEC for review by 02/15/07.01/04/07: Chanda received a phone call from new consultant LANGAN ENGINEERING & ENVIRONMENTAL SERVICES,P.C (Mr. John Gavras , Ph. 212-479-5406). Chanda sent a copy of previous letter to Mr.John and discuss regarding the site update status.01/11/07: Chanda received an e-mail from John Gavras (Consultant).He gave the new owner's name and contact information:Bryan N. Cho, Vice PresidentBethune West Associates, LLCc/o The Related companies60 Columbus Circle,18th FloorNew York, NY 100232/15/07: Chanda received an additional sump pit excavation report prepared by Lagan Engineering and Environmantal Services dated on February 13, 2007.3/01/07: Chanda received a Remedial Action Plan from Attorney (David Yudelson), prepared by Langan Engineering and Environmental Services dated December 2006.3/22/07: Kartik Chanda has reviewed the RAP and approved on 3/21/07. Chanda sent approval letter to RP(Bryan N. Cho) and his attorney (David Yudelson) and consultant (John M. Gavras), requiring that the RAP be implemented by may 6, 2007, and the Department requires five days advanced notice of any remedial work of the site.9/6/07: On 8/28/07, Joe Sun (NYSDEC) visited the site and directed three post-remediation grab samples be collected from standing groundwater within the footprint of the proposed building. In addition, groundwater samples were collected from existing monitoring wells MW-5 and MW-6 located along West 12th Street.9/21/07: Chanda received an electronic copy of Request for spill closure letter with the remedial action activities for this spill case.9/24/07: Chanda received a hard copy of the remedial action activities report from Mr. David Yudelson (Sive, Paget & Riesel, P.C.).10/5/07: Chanda reviewed the remedial action activities report and has the followings comments:1. Excavation of petroleum-impacted soil in July to September, 2007. 2. This report indicates that post-remediation soil samples were collected bottom of the excavation. In total, 11 bottom soil samples and 7 sidewall soil samples were collected from the excavation. The level of contamination were below the TAGM RSCOs. Several SVOCs (Benzo(a)pyrene, 2-Methylnaphthalene) were detected in the four (4) end point samples and the level is not high.3. VOCs and SVOCs were not detected of the post-remediation groundwater samples collected on the site.4. The chlorinated VOC tetrachloroethene (PCE) was detected in the three (3) groundwater samples ranging from 12.9 ppb to 18 ppb. In addition the 2-dichloroethene (DEC)was detected at a concentration of 6.1 ppb.The proposed RAP indicated that In order to be protective of the health of the future residents, an appropriate vapor barrier (Grace Prepruf 300R) and passive sub-slab depressurization system (SSDS) will be installed in to the foundation construction.10/12/07: Chanda discussed with Joe Sun (Supervisor) regarding the findings of the remedial action report and reviewed the passive SSDS and detail design of the suction pits on 10/11/07. said he will send report and a closing confirmation letter to close the spill as soon as possible. -QA09/18/06: Called Mr. Mike he said as soon as he will received papers . He will send it to me. -QA10/11/06: Called Mr. Danis at (718)832-6700 he said he will find out from his Service Manager and he will call me back regarding spill. -QA10/16/06: Called to Mr. Richard Saunders at (212)253-2530 and talked to owner Mrs. Maruska Saunders she said this spill is cleaned and she sold this property in February 2006. Received a closing confirmation letter from Mr. Mark Salamack (Petroleum Tank Cleaner) they emptied the tank and welded this opening closed. The oil dripped down the outside painted concrete surface of the tank jacket and onto the painted floor. This was cleaned up by the oil company (Ferrantino). The amount of resulting oil absorbent was a small amount and discarded with the household trash from the building. According to the information of Mr. Mark Salamack spill is cleaned. DEC staff closed the spill. -QA

Remarks:

CALLER STATED A FILL PIPE LEAKED GOING INTO THE BUILDING, COMP SPOKE TO THE DRIVER, AND THE DRIVER REFUSED TO GIVE HIS NAME, BUT STATED THAT HE HAD CALLED FOR SOMEONE TO COME CLEAN UP THE SPILL, AND THEN TOOK OFF DOWN THE ROAD TO HIS NEXT STOP

Cleanup continued Saturday and Monday. What was observable on Friday eve of the concrete floor appeared to be sound. Tipple also inspected the adjoining neighbors basements which are currently under construction and they had no oil impact at that time. 12/23/04 Tipple updating... most of the oil removed/ powerwashed// the tank room has not been cleaned, numerous proposals from different companies, awaiting company to be awarded contract. Once the tank is removed and the room cleaned, Tipple will conduct followup inspection. 2/10/04 not yet cleaned, temporary tanks still in place 3/3/05 Tipple and Rahman conducted a site visit.... The majority of the spill has been successfully cleaned, there are a few edges and at the former tank grave that must be re-cleaned. 3/16/05 site visit, followup electronic photos, manifests to follow, cleanup completed, no further action, letter sent....MT

Remarks: CREWS ARE ON THE WAY TO CLEAN UP.

DEC Region: 2
DER Facility ID: 194620
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL C"3/11/03 - SAMUEL- File available in active unassigned spill files.03/26/04 - Reassigned from Samuel to Rommel08/26/05 - Follup letter sent to property owner to address a TTF at the site. It has also been discovered that there is a property transfer in the works and that ATC is the consulting firm handling any environmental work at the site. Therefore, a copy of the spill report and the Region 2 form letter was sent to the ATC project manager for his reference.8/31/05 - ATC is doing work at the site and believes the tank was removed. A geophysical investigation was performed. The investigation located the remnants of a filler pipe but found no tank. A patch of pavement was observed consistent with the removal of a 500 gal tank. Three borings (one up gradient, two down gradient) were performed and samples taken. ATC asked that an NFA letter be sent based on the analytical results coming back negative for contamination. A letter report would be submitted stating results and conclusions.11/8/05 - No letter report has been recieved so ATC was contacted. Contamination had been detected in one of the borings so no report was sent. The work plan calls for expanding the investigation once the building on site is demolished which should occur in January or February of 2006. At that point additional borings are to be performed to determine the extent of the contamination and subsequent remedial actions will be proposed.08/18/2006 - IABELBY: Contacted ATC PM (Jason Hayes, 212-479-5427) to inquire about status of investigation. He stated that further demolition was planned for the site and that the investigation could continue at that point. He was informed that any further contact with the department should be directed to the Region 2 office.NEXT STEP: follow up with consultant to ascertain progress.8/28/2007 Sangesland spoke to rep from Langan Engineering. He says they have finished work on the site (excavation?endpoints?) He would like to submit a closure report for final review. Case reassigned to Kumar Patel.08/28/07-Hiralkumar Patel. received message from Jason Hayes from Langan engineering. they excavated contaminated soil during site development and report is ready. Mr. Hayes asked for address to send report.Jason HayesLangan EngineeringPh. (212) 479-5427email: jahayes@langan.comsent email to Mr. Hayes requiring submission of closure report alongwith investigation report, that was done in 2005 and during that time found contaminated soil.08/29/07-Hiralkumar Patel. received email from Mr. Hayes. he mentioned that there was no report produced for investigation work done in 2005. he will include description and analyticals of that work in closure report.09/10/07-Hiralkumar Patel. received closure report from Mr. Hayes. abstract:- 550 gal gasoline UST that was failed the tightness test was removed at some point between 1996 and 2005 <----- depth to groundwater at teh site is estimated at approx. 8 ft bg and presumable flows northwest-west towards the nearby Hudson river- found concrete patch in building (could be UST location), staining on concrete, a sump in the southwest corner and a centrally located floor drain, during 2005 Phase I- site was in use

as auto garage in past- Langan performed a GPR survey on Aug. 26, 2005 and did not reveal evidence of USTs- rectangular concrete patched-area was identified along the southern site boundary near the sidewalk, a disconnected fill line was traced from the sidewalk to the potential UST area- fill port in the sidewalk is filled with concrete- completed 8 direct-push soil borings at the site- borings were advanced to 10 ft bg- 3 mud-rotary borings were completed as part of a Geotechnical investigation- nine soil samples were collected: one sample from each of geoprobe borings, and one sample from a geotechnical boring (B2)- soil samples were collected from 4 to 10 ft bg- no staining, odor or elevated PID readings were observed in the soil samples with the exception of one soil sample at location E4- boring E4, adjacent to a sump in the southwest corner of the site, staining and petroleum odor were observed at approx. 9 ft bg- PID readings for boring E4 were observed upto 60 ppm- fill material extended to an approx. depth ranging from 6 ft to 9 ft bg- excavated impacted soil to an approx. depth of 10 ft bg- 4 endpoint samples were collected: one sidewall sample from east, west and north sidewalls and one bottom sample- sidewall samples were collected at approx. 6 inches above the base of the excavation area, approx. 9 ft bg- base sample was collected from a depth of approx. 10 to 10.5 ft bg- sample was not collected from the south sidewall due to the presence of an foundation wall at the southern site border- area of final excavation was approx. 610 sq.ft. with depth of 10 ft bg- groundwater was encountered at approx. 10 ft bg- 220 tons of petroleum impacted soil was removed- found SVOC contamination in sample E2 during 2005 investigation. sample was taken at depth of 3.5-4.5 ft bg. no contamination found in sample E4 where they found heavy PID (60 ppm)- no contamination found in endpoint samplesreport doesn't have information about location of dispenser island and any investigation along old fill line.spoke with Mr. Hayes. he mentioned that they did GPR survey in entire site and didn't found any area that could be location of dispenser island. as per Mr. Hayes, this small gasoline tank was in use to fill up cars under repair and dispenser point could be right on tank. he also mentioned that previous boring E1 was at point where suspected fill line ends inside building and from that point to fill port, fill line runs about 10 ft under sidewalk. no contamination was found in E1.discuss with DEC Austin. based on submitted report, he asked to close the case.case closed.

Remarks: test = air pressure at 5lbs they discontinued test, they are underground tanks

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/01/2012	Source: EPA

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/01/2012	Source: EPA

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/02/2012	Source: EPA

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/12/2013
Date Data Arrived at EDR: 02/15/2013
Date Made Active in Reports: 02/27/2013
Number of Days to Update: 12

Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/12/2013
Date Data Arrived at EDR: 02/15/2013
Date Made Active in Reports: 02/27/2013
Number of Days to Update: 12

Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/12/2013
Date Data Arrived at EDR: 02/15/2013
Date Made Active in Reports: 02/27/2013

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/19/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2012	Telephone: 703-603-0695
Date Made Active in Reports: 02/27/2013	Last EDR Contact: 03/11/2013
Number of Days to Update: 63	Next Scheduled EDR Contact: 06/24/2013
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/19/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2012	Telephone: 703-603-0695
Date Made Active in Reports: 02/27/2013	Last EDR Contact: 03/11/2013
Number of Days to Update: 63	Next Scheduled EDR Contact: 06/24/2013
	Data Release Frequency: Varies

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 02/18/2013
Number of Days to Update: 31	Next Scheduled EDR Contact: 06/03/2013
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2012	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/17/2013	Telephone: 202-267-2180
Date Made Active in Reports: 02/15/2013	Last EDR Contact: 01/17/2013
Number of Days to Update: 29	Next Scheduled EDR Contact: 04/15/2013
	Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

NY SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 11/19/2012	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/20/2012	Telephone: 518-402-9622
Date Made Active in Reports: 12/12/2012	Last EDR Contact: 02/20/2013
Number of Days to Update: 22	Next Scheduled EDR Contact: 06/03/2013
	Data Release Frequency: Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NJ SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

Date of Government Version: 04/17/2012	Source: New Jersey Department of Environmental Protection
Date Data Arrived at EDR: 05/31/2012	Telephone: 609-292-8761
Date Made Active in Reports: 06/27/2012	Last EDR Contact: 03/01/2013
Number of Days to Update: 27	Next Scheduled EDR Contact: 06/10/2013
	Data Release Frequency: Varies

NY VAPOR REOPENED: Vapor Intrusion Legacy Site List

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

Date of Government Version: 05/01/2012	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 05/23/2012	Telephone: 518-402-9814
Date Made Active in Reports: 07/03/2012	Last EDR Contact: 02/20/2013
Number of Days to Update: 41	Next Scheduled EDR Contact: 06/03/2013
	Data Release Frequency: Varies

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: Facility Register

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 01/07/2013	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 01/09/2013	Telephone: 518-457-2051
Date Made Active in Reports: 01/16/2013	Last EDR Contact: 01/07/2013
Number of Days to Update: 7	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Semi-Annually

NJ SWF/LF: Solid Waste Facility Directory

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 10/01/2012	Source: Department of Environmental Protection

State and tribal leaking storage tank lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NY LTANKS: Spills Information Database

Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

Date of Government Version: 11/19/2012	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/20/2012	Telephone: 518-402-9549
Date Made Active in Reports: 01/08/2013	Last EDR Contact: 02/20/2013
Number of Days to Update: 49	Next Scheduled EDR Contact: 06/03/2013
	Data Release Frequency: Varies

NY HIST LTANKS: Listing of Leaking Storage Tanks

A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database. Department of Environmental Conservation.

Date of Government Version: 01/01/2002	Source: Department of Environmental Conservation

NY RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

NY ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Number of Days to Update: 79	Next Scheduled EDR Contact: 03/25/2013
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

NY E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

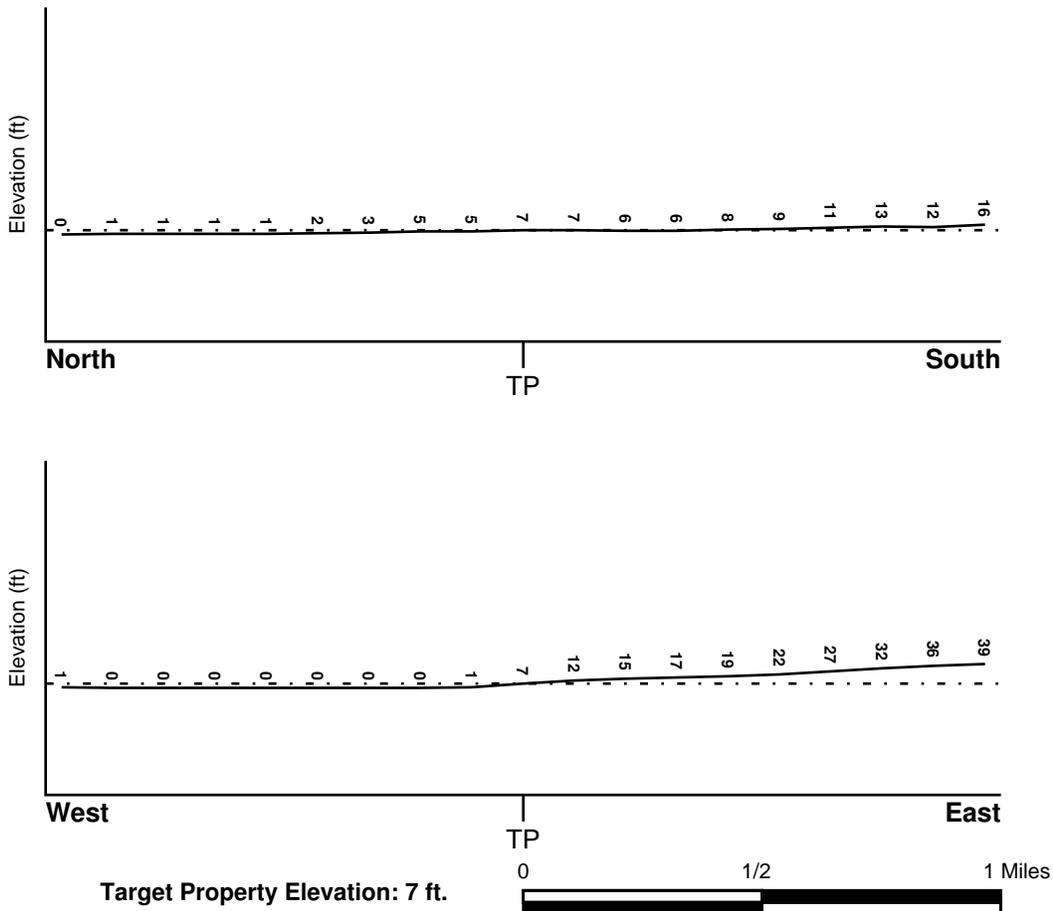

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
NEW YORK, NY

FEMA Flood

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles ENE
Site Name:	AMERICAN RADIUM INDUSTRIES
Site EPA ID Number:	NYD987001476
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Ordovician
Series: Lower Ordovician and Cambrian carbonate rocks
Code: OC (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Langan Project No.: 170215701**

Dear Sir or Madam:

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above properties, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LTANKs), asbestos abatement, and any other environmental reports that your department may have.

The subject properties are **355 West Street (Block 601, Lot 1), 357 West Street (Block 601, Lot 4), 358 West Street (Block 601, Lot 5), 359 West Street (Block 601, Lot 8), and 156 Leroy Street (Block 601 Lot 10)** in New York, New York.

Please contact me at 212-479-5476 or send your response to my attention at gwyka@langan.com or at the below address:

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C.
21 Penn Plaza
360 West 31st Street, 8th floor
New York, New York 10001-2727

Thank you in advance for your cooperation.

Sincerely,
**Langan Engineering, Environmental, Surveying and
Landscape Architecture, D.P.C.**

From: Greg Wyka
Sent: Monday, March 11, 2013 4:33 PM
To: NYSDEC FOIL E-Mail (r2foil@gw.dec.state.ny.us)
Subject: FOIA Request: 355-359 West Street and 156 Leroy Street

To Whom It May Concern,

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above properties, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LTANKs), asbestos abatement, and any other environmental reports that your department may have.

The five (5) subject properties are:

1. 355 West Street (Block 601, Lot 1)
2. 357 West Street (Block 601, Lot 4)
3. 358 West Street (Block 601, Lot 5)
4. 359 West Street (Block 601, Lot 8)
5. 156 Leroy Street (Block 601, Lot 10)

The subject properties are located in New York, New York.

Please contact me at 212-479-5476 with any questions.

Best,
Greg

Dear Mr. Wyka:

Re: 355, 357, 358, 359 West Street; 156 Leroy Street, New York
Project # 170215701

We hereby acknowledge receipt of your **Freedom of Information Law** request dated March 12, 2013.

Your request is important to us and will be handled as expeditiously as possible. You are advised, however, that because of the large increase in the volume of such requests, your response may be delayed.

If you have any questions, please call Brenda Farren, Records Access Officer, at (718) 595-3448. Please refer to the **FOIL log number(s)** listed below when calling.

Sincerely,

A handwritten signature in black ink that reads 'Brenda Farren'.

vsapienza@dep.nyc.gov

Dear Sir or Madam:

96-05 Horace Harding
Expressway
Corona, NY 11368
T: (718) 595-4906
F: (718) 595-6950

I am writing in response to your FOIL request (see attached). This response specifically addresses only those aspects of your request related to the discharge of wastewater or other materials to a New York City public sewer. As this letter only pertains to records in the custody of the Division of Pollution Control and Monitoring, if your request was also directed to other divisions within the Bureau of Wastewater Treatment or to other bureaus within the Department of Environmental Protection, then you will receive a separate response from those divisions or bureaus.

Concerning your request, the **Division of Pollution Control and Monitoring**:

cannot identify the requested location because _____.

after search, has not identified any records responsive to your request.

has identified records responsive to your request. Please telephone me at (718) 595-4756 to arrange for an appointment to review the information.

RECEIVED
LEGAL AFFAIRS OFFICE

Dear Sir or Madam:

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above properties, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LTANKs), asbestos abatement, and any other environmental reports that your department may have.

The subject properties are **355 West Street (Block 601, Lot 1)**, **357 West Street (Block 601, Lot 4)**, **358 West Street (Block 601, Lot 5)**, **359 West Street (Block 601, Lot 8)**, and **156 Leroy Street (Block 601 Lot 10)** in New York, New York.

Please contact me at 212-479-5476 or send your response to my attention at gwyka@langan.com or at the below address:

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C.
21 Penn Plaza
360 West 31st Street, 8th floor
New York, New York 10001-2727

Thank you in advance for your cooperation.

Sincerely,
**Langan Engineering, Environmental, Surveying and

ORDER OF THE COMMISSIONER

April 03, 2012

Job ID: PO428653
Clerk: Duane Williams

TO: Owner(s)/Agent(s):
APMM LEROY LLC C/O PETER MOORE
ASSOCIATES
515 CANAL STREET
NEW YORK, New York 10013
UNITED STATES

RE: Premises:
357 WEST STREET
Manhattan **Block #:** 601 **Lot #:** 4

WHEREAS, the above identified premises were inspected by the New York City Department of Health and Mental Hygiene ("DOHMH" or the "Department") Veterinary and Pest Control Services ("VPCS") on 03/28/2012; and

WHEREAS, records maintained by the New York City Department of Finance show that you are the owner or managing agent of such premises and responsible for maintaining such property free from rodents, insects and other pests, and from any conditions conducive to pests, or any other nuisance condition pursuant to New York City Health Code ("Health Code") §151.02 and §3.09; and

WHEREAS, as described in the attached inspection report(s) such inspection determined that such premises:

- (1) Are not free of rodents, or conditions conducive to feeding and habitation of rodents, in violation of Health Code §151.02; and/or
- (2) Have an animal nuisance condition consisting of animal feces, urine, blood, vomitus, animal parts, carcasses and/or foul odors, as defined in Health Code §161.02, in violation of Health Code §3.09.

YOU ARE HEREBY ORDERED to abate all rodent conditions and/or animal nuisances by correcting all conditions described in the attached Inspection Report(s), and any conditions arising after issuance of this Order by:

- (1) Removing all garbage, refuse, debris and other materials creating conditions conducive to pests; and retaining a pest control professional, certified in accordance with the State Environmental Control Law to inspect and apply rodenticide bait if needed; Additional information on how to correct rodent violations is available at <http://www.nyc.gov/rats>; and/or
- (2) Removing animal feces, urine, blood, vomitus, animal parts and carcasses or other matter causing foul odors; and cleaning the premises; and

IT IS FURTHER ORDERED that these premises shall be re-inspected no sooner than five (5) business days after you receive this order, and that if the Department finds continuing conditions conducive to rodent pests the Department may apply rodenticide bait, and conduct the cleanup and removal of refuse, debris

and other materials constituting the conditions conducive to feeding and habitation of rodents; and

IT IS FURTHER ORDERED that, if the attached inspection report describes rodent conditions and you do not comply with this Order, and the Department does the work required by this Order, the City of New York will bill you, in accordance with Administrative Code §§17-142 et seq. for the costs to the City of abating the nuisance related to rodent conditions, including applying rodenticide bait and removal of all garbage, refuse, debris and other materials creating the nuisance, and the costs of any further inspections to determine compliance with this Order. If the bill is not paid promptly, the charges will become a lien against the premises, in accordance with Administrative Code §§17-142 et seq, resulting in your inability to sell the property with a clear title unless such charges are paid.

YOU WILL RECEIVE NO FURTHER ORDERS OR WARNINGS PRIOR TO REINSPECTION BY THE DEPARTMENT.

• If you claim that you do not own these premises or wish to contest this order, please fax a letter and appropriate documentation to the **Department of Health and Mental Hygiene, Veterinary and Pest Control Services Research Unit at (212) 788-4218**; write to the Department's Pest Control Services Program Research Unit at 125 Worth Street, Room 300, 32R, New York, New York 10013; postmarked within three (3) business days of receipt of this Order. It is in your interest to promptly provide this information to the Department to avoid substantial costs and possible future litigation. Please respond in writing by mail or fax only.

• If you have any questions about the inspection report or how to comply with this Order, you may contact the regional office in the borough of the premise inspected.

Property located at 357 WEST STREET Manhattan was inspected by a Public Health Sanitarian of the NYC DOHMH on 03/28/2012 from Start Time: 03/28/2012 03:53:38 PM to End Time: 03/28/2012 04:00:59 PM

INSPECTOR FINDINGS - VIOLATIONS OF NEW YORK CITY HEALTH CODE FOUND:

- In back right and side right area of property , Conditions providing places for rats to live were found on your property and must be removed. These conditions can include dense vegetation, clutter such as construction waste, old furniture and fixtures or openings providing entry and shelter for rodents.
- In back right and side right area of property , Garbage containers are missing, inadequate or in poor condition on your property. Garbage spillage and poor containerization provides food for rats. All garbage must be secured in rodent-proof containers.

Inspector: Mohamed Bensmail	ID #: 1204	Approved By: Harriet Weaver Supervisor Signature: 	Approval Date: 03/30/2012
---------------------------------------	----------------------	---	-------------------------------------

WARNING: False statements made herein are punishable as a class A misdemeanor pursuant to section 210.45 of the Penal Law. Affirmed under penalty of perjury.

What You Should Do Next:

1. Inspect your property. Thoroughly inspect your property for signs of rats and the conditions that contribute to rats. Review your enclosed inspection report and visit the Rat Information Portal (www.nyc.gov/rats) for more information on how to identify droppings, active rat runs, and evidence of gnawing, tracks or burrows. You may choose to hire a licensed pest management professional to assist you with this problem. The Rat Information Portal (www.nyc.gov/rats) will help you to select a pest management professional that can help you identify conditions that have lead to the presence of rats on your property and to manage the problem safely.
2. Clean up your property. Sweep up droppings and wash away rub marks. This will discourage rats from returning.
3. Keep rats from getting the food they need. Store garbage in hard plastic or metal containers with a tight fitting lid. Do not put garbage out on the street more than 1 hour before pickup.
4. Eliminate the places rats can hide, nest and breed. Remove clutter and debris from your yard, basement and landscaping. Pest - proof your property by repairing holes and cracks.
5. Talk to others on your block. Managing rats is a community affair, and your property is probably not the only one that has signs of rats. Everyone in a neighborhood has to work together to solve the problem, since rats can move quickly from one property to another. Neighbors can coordinate clean-up efforts, share in the hiring of licensed pest management professionals, and have a bigger impact by working together.

RE: Control #: 2013FR00855

Dear Mr. Wyka:

In response to your recent request for the record(s) concerning the addresses listed below:

355 West Street
New York, NY 10014

357 West Street
New York, NY 10014

358 West Street
New York, NY 10014

359 West Street
New York, NY 10014

156 Leroy Street
New York, NY 10014

Please be advised that based upon a thorough review of the files available to the Office of Public Health Engineering, our records revealed there are no record(s) located in our files pertaining to your request.

Yours truly

Lily Huang,
Director
Office of Public Health Engineering

Greg Wyka

Re: 5 Sites in Manhattan: -355 W St, 357 W St, 358 W St, 359 W St, and 156 Leroy St

Dear Mr. Wyka:

NYSDEC/Region 2 has reviewed your request for the above referenced records under New York State's Freedom of Information Law (FOIL). Please note that most of our records are filed by number under the names of individuals or corporations. We have no way of locating or retrieving records if they are filed under names or addresses other than those you have provided.

If no records have been located, this does not necessarily mean, and should not be interpreted to mean that there have never been any violations, complaints, claims, investigations or inquiries involving those names or addresses. We cannot make any representations as to whether there are or have been any such violations, complaints, Claims, investigations or inquiries.

After a diligent search of Region 2 available files, no records could be located for the names and/or addresses you provided.

Please email your future FOILs to Region directly to the following email address: r2foil@gw.dec.state.ny.us

Thank you for your request. If additional information is needed, please call Gloria Silva/FOIL Secretary at (718) 482-4507, or email me at: r2foil@gw.dec.state.ny.us

Sincerely yours,

Fawzy I. Abdelsadek, Ph.D., P.E.

Re: 13-03-252

Dear Mr. Wyka:

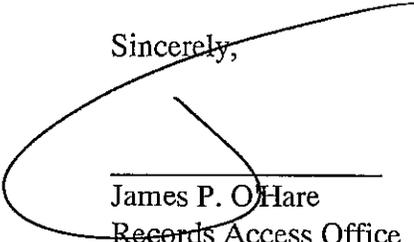

This will acknowledge receipt of your 3/12/2013 request for records under the Freedom of Information Law.

Your request has been forwarded to the appropriate Department program area(s) to identify documents that are responsive to your request and which may be made available pursuant to all applicable provisions of the Freedom of Information Law.

It is estimated that within 20 business days we will complete your request or we will notify you in writing if the responsible program area(s) should require additional time to locate, assemble and review responsive documents.

Please note that, pursuant to Article 6 of the Public Officers Law, a charge may be applied to your request, including the actual cost of the medium used to respond to your Freedom of Information Law request and/or other related costs. When responsive records have been identified, you will be informed of any cost and how payment should be made.

Sincerely,

James P. O'Hare

Re: FOIL #: 13-03-252

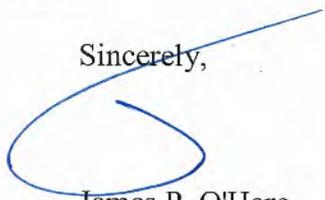

Dear Mr. Wyka:

This letter responds to your Freedom of Information Law request of March 12, 2013, in which you requested Environmental Records re: 355,357,358,359 West St. and 156 Leroy St., New York, NY 10014. The Center for Environmental Health advises that no records responsive to your request have been located.

Should you feel that you have been unlawfully denied access to records, you may appeal such denial in writing within 30 days to the Records Access Appeals Officer, Division of Legal Affairs, Empire State Plaza, 2438 Corning Tower, Albany, New York, 12237-0026.

Should you require additional information or wish to discuss this matter further, please do not hesitate to contact me at (518) 474-8734.

Sincerely,

James P. O'Hare

Re: FOIA Request EPA-R2-2013-004394

Dear Mr. Wyka:

The Air Compliance Branch of the U.S. Environmental Protection Agency (EPA), Region 2, has searched its records pertaining to asbestos abatement for the addresses cited in your FOIA request. No records responsive to your request were found. Please be advised that you may also receive additional information from other offices in EPA Region 2 in the event that they have information that is responsive to your request.

For additional information pertaining to your request you may also wish to contact state and/or city agencies. Also, please be advised that you can now retrieve the profile of a facility, including information regarding toxic chemical releases, water permits, hazardous waste handling processes, Superfund status, and air emissions, from the EPA's Envirofacts webpage at <http://www.epa.gov/enviro>.

If you have any further questions regarding asbestos abatement information contained in your request, please contact Max Rehfeld of the Air Compliance Branch at (212) 637-4052.

Sincerely,

A handwritten signature in cursive script that reads "Kenneth Eng".

Kenneth Eng, Chief
Air Compliance Branch
Division of Enforcement and Compliance Assistance
US Environmental Protection Agency, Region 2

Zip Code/Postal Code : 10001

Short Description :

To Whom It May Concern, Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above properties, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LTANKs), asbestos abatement, and any other environmental reports that your department may have. The five (5) subject properties are:

1. 355 West Street (Block 601, Lot 1)
2. 357 West Street (Block 601, Lot 4)
3. 358 West Street (Block 601, Lot 5)
4. 359 West Street (Block 601, Lot 8)
5. 156 Leroy Street (Block 601, Lot 10)

The subject properties are located in New York, New York.

Please contact me at 212-479-5476 with any questions.

Best, Greg

This is not a denial of records however, if you consider it to be one, you may submit a written appeal to HQ FOIA OPERATIONS STAFF, U.S. Environmental Protection Agency (2822T), 1200 Pennsylvania Avenue, N.W., Washington, D.C. 20460 (U.S. Postal Service Only), FAX: 202 566-2147, email: hq.foia@epa.gov. Only items mailed through the United States Postal Service may be delivered to 1200 Pennsylvania Avenue, NW. If you are submitting your appeal via hand delivery, courier service or overnight delivery, you must address your correspondence to 1301 Constitution Avenue, NW, Room 6416J, Washington DC 20001. Your appeal must be made in writing, and must be received within 30 calendar days of the date of this response to receive consideration. The Agency will not consider appeals received after the 30-day limit. The appeal should be marked "Freedom of Information Act Appeal," and should reference the Freedom of Information Request Number of this response.

60930

Borough Superintendent. 215

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change, or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

DEPARTMENT OF HOUSING AND BUILDINGS JS
 BOROUGH OF MANHATTAN, CITY OF NEW YORK

No. 28948

Date May 6, 1942

CERTIFICATE OF OCCUPANCY

(Standard form adopted by the Board of Standards and Appeals and issued pursuant to Section 646 of the New York Charter, and Sections C.26-181.0 to C.26-187.0 inclusive Administrative Code 21.3.1. to 21.3.7. Building Code.)

This certificate supersedes C. O. No.

To the owner or owners of the building or premises:

THIS CERTIFIES that the ~~new~~-~~altered~~-~~existing~~-building-~~premises~~ located at
 355 West Street Block 601 Lot 2

25 ft. front, conforms substantially to the approved plans and specifications, and to the requirements of the building code and all other laws and ordinances, and of the rules and regulations of the Board of Standards and Appeals, applicable to a building of its class and kind at the time the permit was issued; and

CERTIFIES FURTHER that, any provisions of Section 646F of the New York Charter have been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent.

~~New~~ or Alt No.— 894-1941 Construction classification— Nonfireproof

Occupancy classification— Commercial . Height 1 stories, 13'6" feet

Date of completion— April 15, 1942 . Located in Unrestricted Use District

A Area 2 . Height Zone at time of issuance of permit 54-1941

This certificate is issued subject to the limitations hereinafter specified and to the following resolutions of the Board of Standards and Appeals: (Calendar numbers to be inserted here)

PERMISSIBLE USE AND OCCUPANCY

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
Cellar	on ground				Storage
1st Story	100				Store and Office.

Sec. 6.1.2.3 sub-4 Building Code, C.26-273.0 Adm. Code
 Prior to the occupation of any structure erected or altered after Jan. 1, 1938, the permitted occupancy of each floor of such structure, as stated in the certificate of occupancy, shall be permanently posted under glass and maintained in the main entrance hall of such structure.

[Signature]
 Borough Superintendent.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

12 ft. front

Block 601 Lot 4

, conforms substantially to the approved plans and specifications, and to the requirements of the building code and all other laws and ordinances, and of the rules and regulations of the Board of Standards and Appeals, applicable to a building of its class and kind at the time the permit was issued; and

CERTIFIES FURTHER that, any provisions of Section 646 of the New York Charter have been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent.

N.B. or Alt. No.— 175-1944

Construction classification— Metal

Occupancy classification— Commercial

Height 1 stories, 11 feet.

Date of completion— January 15, 1945

Located in Unrestricted Use District.

A Area 2 times Height Zone at time of issuance of permit 1250-1944.

This certificate is issued subject to the limitations hereinafter specified and to the following resolutions of the Board of Standards and Appeals: (Calendar numbers to be inserted here)

PERMISSIBLE USE AND OCCUPANCY

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
1st story				60	Dining-room, kitchen and storage.

SUBMITTED BY C.O. 52454

[Signature]

Borough Superintendent.

YONKONDOO TO YANBITTARO

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT.

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Compliance Status (Open/Resolved) relates to whether a violation has been corrected/uncorrected. Dismissed violations do not require filing a Certificate of Correction.

ECB Hearing Status and the **ECB Penalty Due** are separate from **Compliance Status** (i.e. a penalty is still due in many cases even when the violating condition has been fixed).

Severity Class	
Class 1 - Immediately Hazardous	HAZ - Hazardous - 1968 Building Code
Class 2 - Major	NON-HAZ - Non-hazardous - 1968 Building Code
Class 3 - Lesser	

Violation Status Descriptions	ECB Hearing Status
OPEN - No Compliance Recorded	CURED/IN-VIO - In Violation/no hearing required
OPEN - Certificate Pending (Certificate of Correction submitted and under review)	STIPULATION/IN-VIO - No hearing required/in violation
OPEN - Certificate Disapproved (Certificate of Correction disapproved/not in compliance)	IN VIOLATION - Hearing decision completed
RESOLVED - N/A-Dismissed (at ECB - no Certificate of Correction required)	DISMISSED - Hearing decision completed
RESOLVED - Certificate Accepted (Certification of Correction Accepted/in compliance)	DEFAULT - Respondent failed to appear at hearing
RESOLVED - Cure Accepted (early correction accepted - in violation/no penalty or hearing)	PUBLICLY-OWNED - No hearing required
RESOLVED - Compliance Insp/Doc (condition verified by Inspector or by Dept. documentation)	PENDING - Awaiting ECB hearing or decision
	ADMIT/IN-VIO - In Violation/no hearing required
	WRITTEN OFF - Imposed penalty legally uncollectable

DEPARTMENT OF BUILDINGS
BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No.** 23357 **1937**

Supersedes Certificate of Occupancy No.

To the owner or owners of the building: New York **May 3,** 1937.

THIS CERTIFIES that the building located on Block 601, Lot 6-7-8-9

known as 361 West Street-162 Leroy Street

under a permit, Application No. 240 N.D. of 1936, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is nonfireproof construction within the meaning of the building code and may be used and occupied as a business building as hereinafter qualified, in an unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
1st story	ground	12		12	Storage, loading platform
2nd "	60	10		10	Office

This certificate is issued to **Joseph Lau, Architect**
 24 Furman Ave. Bklyn. , for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. *SS*

Samuel Cassin
Commissioner of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

DEPARTMENT OF BUILDINGS
BOROUGH OF MANHATTAN, CITY OF NEW YORK

CERTIFICATE OF OCCUPANCY No. 22540 193

Supersedes Certificate of Occupancy No. **22397**
 To the owner or owners of the building: **New York June 18 1937**

THIS CERTIFIES that the building located on **Block 601, Lot 6-7-8-9**
 known as **361 West Street**

under a permit, Application No. **N B 240 1936**, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of **Nonfireproof** construction within the meaning of the building code and may be used and occupied as a **Business** building as hereinafter qualified, in a **Unrestricted** district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2012. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2012. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

Deed Exhibit 1

CONSULT YOUR LAWYER BEFORE SIGNING THIS INSTRUMENT—THIS INSTRUMENT SHOULD BE USED BY LAWYERS ONLY.

THIS INDENTURE, made the 2 day of January, nineteen hundred and Eighty **BETWEEN** BERGNAT REALTIES, INC., a domestic corporation maintaining an office at 122 East 42nd Street, New York, New York

party of the first part, and BERGNAT REALTY ASSOCIATES, a limited partnership, maintaining an office at 122 East 42nd Street, New York, New York

party of the second part,

WITNESSETH, that the party of the first part, in consideration of ten dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Manhattan, City, County and State of New York, bounded and described as follows:

BLANKET DESCRIPTION

BEGINNING at the corner formed by the intersection of the easterly side of West Street with the northerly side of Clarkson Street; running thence easterly along the northerly side of Clarkson Street 106 feet 7 3/4 inches:

thence northerly at right angles to the northerly side of Clarkson Street and through a party wall 75 feet 1/2 inches:

thence westerly along a line forming an angle of 92°-53'-30" on its northerly side with the easterly side of West Street 110 feet 5 5/8 inches to the easterly side of West Street:

thence southerly along the easterly side of West Street 75 feet 1 inch to the northerly side of Clarkson Street the point or place of beginning.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

AND the party of the first part covenants as follows: that said party of the first part is seized of the said premises in fee simple, and has good right to convey the same; that the party of the second part shall quietly enjoy the said premises; that the said premises are free from incumbrances, except as aforesaid; that the party of the first part will execute or procure any further necessary assurance of the title to said premises; and that said party of the first part will forever warrant the title to said premises.

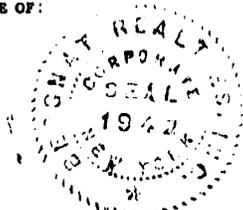

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

BARGAIN AND SALE DEED, WITH COVENANTS AGAINST GRANTOR'S ACTS

as of
THIS INDENTURE, made the 30 th day of July, 2007

BETWEEN 357 West, LLC, a New York Limited Liability Company, Westside Views, LLC, a Delaware Limited Liability Company and 156 Leroy LLC, a New York Limited Liability Company, all having an address for business at c/o Olympic Diamond, 580 Fifth Avenue, New York, New York 10036.

collectively party of the first part, and

APMM Leroy LLC, a Delaware limited liability company having an address for business at c/o Peter Moore Associates, Inc., 515 Canal Street, New York, New York 10013, Attn: Peter Moore

party of the second part,

WITNESSETH, that the party of the first part, in consideration of ten dollars and other good and valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

357 West, LLC granting and releasing all that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being more fully described in Schedule "A1" annexed hereto,

BEING and intended to be the same premises conveyed to **357 West, LLC** described in that certain deed dated January 23, 2006 and recorded on February 17, 2006 in CRFN# 2006000096041,

Westside Views, LLC granting and releasing all that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being more fully described in Schedule "A2" annexed hereto,

BEING and intended to be the same premises conveyed to **Westside Views LLC** described in that certain deed dated February 28, 2001 and recorded on March 16, 2001 in Reel 3253 Page 751,

156 Leroy LLC granting and releasing all that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being more fully described in Schedule "A3" annexed hereto,

BEING and intended to be the same premises conveyed to **156 Leroy LLC** described in that certain deed dated January 23, 2006 and recorded on February 17, 2006 in CRFN# 2006000096040,

TOGETHER with all right, title and interest, if any, of the party of the first part, in and to any streets and roads abutting the above described premises to the center lines thereof; **TOGETHER** with the appurtenances and all the estate and rights of the party of the first part in and to said

premises; **TO HAVE AND TO HOLD** the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

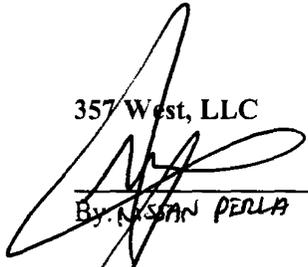

This conveyance is made in the ordinary course of business conducted by the party of the first part

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

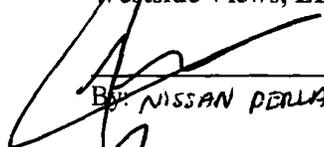

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

Customer Billing Information:

PLEASE NOTE:

- A.** Water and sewer charges are the legal responsibility of the owner of a property receiving water and/or sewer service. The owner's responsibility to pay such charges is not affected by any lease, license or other arrangement, or any assignment of responsibility for payment of such charges.
- B.** Water and sewer charges constitute a lien on the property until paid. In addition to legal action against the owner, a failure to pay such charges when due may result in foreclosure of the lien by the City of New York, or the property being placed in a lien sale by the City.
- C.** Original bills for water and/or sewer service will be mailed to the owner, at the owner's address specified on this form. DEP will provide a duplicate copy of bills to one other party (such as a managing agent) if so requested below, provided, however, that any failure or delay by DEP in providing duplicate copies of bills shall in no way relieve the owner from his/her/its liability to pay all outstanding water and sewer charges.
- (5) If you would like a duplicate copy of bills sent to another party, please check here and fill out the following information:

BARGAIN AND SALE DEED, WITH COVENANTS AGAINST GRANTOR'S ACTS

as of
THIS INDENTURE, made the 30 th day of July, 2007

BETWEEN 357 West, LLC, a New York Limited Liability Company, Westside Views, LLC, a Delaware Limited Liability Company and 156 Leroy LLC, a New York Limited Liability Company, all having an address for business at c/o Olympic Diamond, 580 Fifth Avenue, New York, New York 10036.

collectively party of the first part, and

APMM Leroy LLC, a Delaware limited liability company having an address for business at c/o Peter Moore Associates, Inc., 515 Canal Street, New York, New York 10013, Attn: Peter Moore

party of the second part,

WITNESSETH, that the party of the first part, in consideration of ten dollars and other good and valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

357 West, LLC granting and releasing all that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being more fully described in Schedule "A1" annexed hereto,

BEING and intended to be the same premises conveyed to **357 West, LLC** described in that certain deed dated January 23, 2006 and recorded on February 17, 2006 in CRFN# 2006000096041,

Westside Views, LLC granting and releasing all that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being more fully described in Schedule "A2" annexed hereto,

BEING and intended to be the same premises conveyed to **Westside Views LLC** described in that certain deed dated February 28, 2001 and recorded on March 16, 2001 in Reel 3253 Page 751,

156 Leroy LLC granting and releasing all that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being more fully described in Schedule "A3" annexed hereto,

BEING and intended to be the same premises conveyed to **156 Leroy LLC** described in that certain deed dated January 23, 2006 and recorded on February 17, 2006 in CRFN# 2006000096040,

TOGETHER with all right, title and interest, if any, of the party of the first part, in and to any streets and roads abutting the above described premises to the center lines thereof; **TOGETHER** with the appurtenances and all the estate and rights of the party of the first part in and to said

premises; **TO HAVE AND TO HOLD** the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

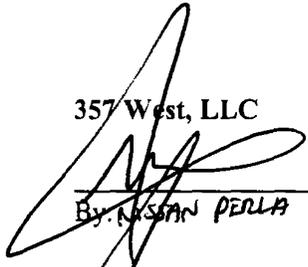

This conveyance is made in the ordinary course of business conducted by the party of the first part

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

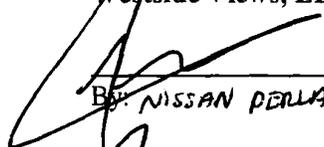

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

Customer Billing Information:

PLEASE NOTE:

- A.** Water and sewer charges are the legal responsibility of the owner of a property receiving water and/or sewer service. The owner's responsibility to pay such charges is not affected by any lease, license or other arrangement, or any assignment of responsibility for payment of such charges.
- B.** Water and sewer charges constitute a lien on the property until paid. In addition to legal action against the owner, a failure to pay such charges when due may result in foreclosure of the lien by the City of New York, or the property being placed in a lien sale by the City.
- C.** Original bills for water and/or sewer service will be mailed to the owner, at the owner's address specified on this form. DEP will provide a duplicate copy of bills to one other party (such as a managing agent) if so requested below, provided, however, that any failure or delay by DEP in providing duplicate copies of bills shall in no way relieve the owner from his/her/its liability to pay all outstanding water and sewer charges.
- (5) If you would like a duplicate copy of bills sent to another party, please check here and fill out the following information:
 Name of Party to Receive Duplicate Copies of Bills:
- (6) Mailing Address: Street City State Zip
- (7) Relationship to Owner (check one): Managing Agent Mortgagee
 Tenant Other (please explain):

Owner's Approval

The undersigned certifies that he/she/it is the owner of the property receiving service referenced above; that he/she/it has read and understands Paragraphs A, B, C under the section captioned "Customer Billing Information"; and that the information supplied by the undersigned on this form is true and complete to the best of his/her/its knowledge.

Environmental Engineering and Remediation

15 years in the industry ~ 6 years with Langan

Mr. Burke is a geologist/environmental scientist whose practice involves site investigation and remediation, environmental site assessments, in-situ remedial technology, sub-slab depressurization system design, emergency response, environmental and geotechnical site investigations, and health and safety monitoring. He has experience with projects in the New York State Department of Environmental Conservation (NYSDEC) Brownfield Cleanup, Voluntary Cleanup and Spill Programs and New York City Department of Environmental Protection (NYCDEP) "E" Designated and New York City Brownfield Cleanup Program sites. He has extensive experience in soil and groundwater investigation and remediation, design of in-situ chemical oxidation and enhanced bioremediation strategies, Phase I Site Assessments, Phase II site investigations, UST Closures, NYSDEC spill closure, remedial excavation oversight and excavation and off-site treatment and/or disposal of contaminated soils.

Joel B. Landes, PE

Senior Associate/ Program Director
Environmental Engineering & Project Management

37 years in the industry ~ 12 years with Langan

Mr. Landes has over thirty-seven years of diversified experience directing environmental engineering and consulting projects for Fortune 500 manufacturing firms, real estate developers and public utilities. His experience includes management of environmental compliance for a major pharmaceutical company and as an environmental affairs consultant for private clients. He has expertise in redevelopment of former industrial, chemical, petroleum storage and manufactured gas plant Brownfield sites into residential and commercial use. He has lead environmental studies for acquisitions and divestitures of pharmaceutical and industrial facilities; industrial site selection and permitting.

He currently oversees all Langan environmental services in the New York City Metropolitan area including Phase I and II Environmental Site Assessments; remedial investigations and feasibility studies; remedial measure design and implementation.

**Re: Spill Closure Report
West & Leroy ("The Project")
359 West Street, New York, NY
NYSDEC Spill No.: 1300212
Langan Project No.: 170215701**

Dear Mr. Piper:

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. (Langan), on behalf of APMML Leroy, LLC, prepared this Spill Closure Report to document the remedial activities that were performed in response to the New York State Department of Environmental Conservation (NYSDEC) Spill No. 1300212 at 359 West Street, New York, NY (the Site). This spill closure report includes a summary of the emergency response activities, documentation of off-site disposal of recovered waste oil and petroleum-contaminated water, and the results of a post-remediation inspection.

PROJECT BACKGROUND

Site Location and Description

The Site (Tax Block 601, Lot 8) is located in the West Village neighborhood of Manhattan on the west end of the city block bordered by Leroy Street to the north, Washington Street to the east, Clarkson Street to the south, and West Street to the west. The Site is improved with a vacant one-story building with partial basement and was formerly occupied by an automobile repair garage, car wash and express oil change shop. There is an oil change pit in the former oil change shop that is approximately 40 feet long by 3 feet wide and opens to a partial basement

that is roughly 20 feet by 40 feet in area. The partial basement is accessible via the oil change pit and a staircase with an entrance on Leroy Street.

A petroleum spill was reported to the NYSDEC on April 8, 2013 after petroleum product was identified in the oil change pit during a Phase I site inspection; NYSDEC Spill No. 1300212 was assigned. We believe the Site was flooded during the storm surge of Tropical Storm Sandy in October 2012. The surge presumably flooded the oil change pit and displaced petroleum products, or residual product, stored in three 1,000-gallon ASTs and four 500-gallon ASTs. Product levels in the pit were monitored periodically since Spill discovery and no fluctuation was noted prior to the emergency response. This observation indicates that the oil and floodwater were contained within the oil change pit and partial basement.

SUMMARY OF REMEDIAL ACTIVITIES

Emergency Response

Brookside Environmental, Inc. of Copiague, New York was contracted by Langan to recover waste oil and petroleum-contaminated water and to remove residual petroleum from the floor, ceiling and interior walls of the oil change pit and partial basement. Photographs of the remedial activities are included as Attachment 1. Emergency spill response and residual petroleum cleanup activities were performed between May 23, 2013 and June 7, 2013 and are summarized below:

May 23, 2013

Brookside and their subcontractor, W.J. Lauer Corp of Staten Island, New York, recovered about 2,000 gallons of oil and about 966 gallons of petroleum-contaminated water from the oil change pit using a vacuum truck. Absorbent pads were placed on the surface of the oil within the pit at the end of the day.

May 29, 2013

Brookside and W.J. Lauer returned to the Site on May 29, 2013 to continue the recovery of oil and floodwater. The absorbent pads placed within the pit on May 23, 2013 were collected and containerized in a 55-gallon steel drum. Brookside and W.J. Lauer recovered about 6,271 gallons of petroleum-contaminated water from the oil change pit using a vacuum truck. A fresh set of absorbent pads were placed on the surface of the oil within the pit at the end of the day.

June 3, 2013

Brookside and W.J. Lauer returned to the Site on June 3, 2013 to continue the recovery of oil and floodwater; they recovered about 25,300 gallons of petroleum-contaminated water from the oil change pit using vacuum trucks. Spent absorbent pads were collected and containerized in a 55-gallon steel drum. At the end of the day, Brookside was able to access the partial basement to perform a preliminary survey of the basement and place a fresh set of absorbent pads on the surface of the oil (on top of about 2 feet of water) within the basement. Brookside identified seven ASTs (three 1,000-gallon ASTs and four 500-gallon ASTs) and several 55-gallon plastic or steel drums. Two 1,000-gallon ASTs were found at the base of the oil change pit; the third 1,000-gallon AST was found along the northwestern wall of the basement and anchored to the concrete floor and wall. The four 500-gallon ASTs were found in a separate room within the partial basement and anchored to the concrete floor and walls.

June 4, 2013

Brookside and W.J. Lauer returned to the Site on June 4, 2013 to continue the recovery of oil and floodwater; they recovered about 11,950 gallons of petroleum-contaminated water from the oil change pit using vacuum trucks. Spent absorbent pads were collected and containerized in a 55-gallon steel drum.

June 5, 2013

Brookside and W.J. Lauer returned to the Site on June 5, 2013 to continue the recovery of oil and floodwater; they recovered about 5,989 gallons of petroleum-contaminated water from the oil change pit and partial basement (including petroleum-contaminated water pumped from the seven ASTs and miscellaneous 55-gallon drums) using a vacuum truck. In addition, Brookside delivered a 30-cubic-yard roll-off container to the Site to contain bulk recovery material and oil-impacted debris.

June 6, 2013

Brookside returned to the Site on June 6, 2013 to continue the removal of oil-impacted debris and begin the removal of the miscellaneous 55-gallon drums and two 1,000-gallon ASTs at the base of the oil change pit. Both ASTs were removed and cleaned under the supervision of an FDNY licensed tank contractor. The 1,000-gallon AST along the northwestern wall of the basement and four 500-gallon ASTs found in the separate tank room were left-in-place as they were all anchored to the concrete floor and walls. The ASTs left-in-place will be removed

during building demolition. After both ASTs were cleaned, the tank carcasses were cut and transported off-site for scrap metal recycling. Brookside identified a concrete-lined sump pit with a defunct pump in the room with the four ASTs. No petroleum-contaminated water was recovered for disposal.

June 7, 2013

Brookside and W.J. Lauer returned to the Site on June 7, 2013 to continue cleanup activities. Brookside power-washed the floor, ceiling, and interior walls of the oil change pit and basement using water and Zep® heavy-duty citrus degreasing agent, and then wiped and dried the floor, ceiling and interior walls with absorbent pads. About 349 gallons of petroleum-contaminated water, including spent cleaning solutions, was recovered by W.J. Lauer. Spent absorbent pads were collected and containerized in a 55-gallon steel drum.

Transportation and Disposal of Waste

About 57,125 gallons of petroleum-impacted water and 2,000 gallons of oil was recovered and transported to Clean Water of New York, Inc. of Staten Island, New York (NYSDEC 2-6401-0065/0001) for recycling or disposal. A 30-cubic-yard roll-off container was used to contain bulk recovery material and oil-impacted debris. The petroleum-contaminated contents of the 55-gallon drums (i.e. spent absorbent pads and PPE) and the drums were added to the 30-cubic-yard roll-off container. The roll-off container was transported to Cycle Chem, Inc. of Elizabeth, New Jersey (NJD002200046) for disposal. A summary of generated waste from the emergency spill response and residual petroleum cleanup is presented in Table 1. Copies of waste manifests are included as Attachment 2.

Post-Remediation Inspection

Langan conducted a post-remediation inspection of the oil change pit and partial basement on June 10, 2013 to verify completion of cleanup. Significant residual waste oil, petroleum-related staining or odors were not identified in the interior of the oil change pit and basement. However, de minimis residual oil was identified on overhead piping and on the interior walls of the basement. No cracks, gaps, joints or other preferential migration pathways were identified on the concrete walls surrounding the oil change pit and on the concrete walls and slab of the partial basement. No evidence of petroleum-contamination was observed from the concrete-lined sump. As the sump is the lowest point in the basement, we assume the sump flooded first during the storm surge of Tropical Storm Sandy and deduce the floodwater acted as a barrier preventing the downward migration of waste oil.

Significant petroleum impacts in the subsurface surrounding the oil change pit and partial basement are unlikely based on the absence of migration pathways and the amount of waste oil recovered during the emergency response. Photographs from the post-remediation inspection are included in Attachment 1.

SPILL CLOSURE

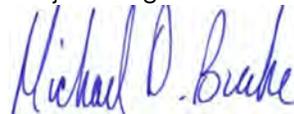

Per your Site inspection, Spill 1300212 was closed as of 12 June 2013; documentation of closure is provided as Attachment 3. Consistent with our on-Site discussions, the remaining aboveground storage tanks, associated piping, and any oil-impacted building materials that could not be removed during cleanup will be segregated and removed during building demolition. Appropriate health and safety procedures will be followed, the work will be documented, and an update will be provided to you upon completion of this work.

Please contact the undersigned with questions or concerns.

Sincerely,
**Langan Engineering, Environmental, Surveying
and Landscape Architecture, D.P.C.**

Record Close

Date Spill Closed: 06/12/2013

"Date Spill Closed" means the date the spill case was closed by the case manager in the Department of Environmental Conservation (the Department). The spill case was closed because either; a) the records and data submitted indicate that the necessary cleanup and removal actions have been completed and no further remedial activities are necessary, or b) the case was closed for administrative reasons (e.g., multiple reports of a single spill consolidated into a single spill number). The Department however reserves the right to require additional remedial work in relation to the spill, if in the future it determines that further action is necessary.

If you have questions about this reported incident, please contact the [Regional Office](#) where the incident occurred.

Re: Geophysical Engineering Survey (GES) Report
Commercial Property
160 Leroy Street
New York, New York 10014

Dear Mr. Wyka:

Nova Geophysical Services (NOVA) is pleased to provide findings of the geophysical engineering survey (GES) at the above referenced project site: Commercial Property, 160 Leroy Street, New York, New York (the "Site"). Please see attached Site Location and Geophysical Survey maps for more details.

INTRODUCTION TO GEOPHYSICAL ENGINEERING SURVEY (GES)

NOVA performed a Geophysical engineering surveys (GES) consisting of a Ground Penetrating Radar (GPR) survey at the site. The purpose of this survey is to locate and identify USTs, anomalies, utilities and other substructures and to clear and mark proposed environmental boring areas on January 13, March 16th and 17th, 2015.

The equipment selected for this investigation was Noggin's 250 MHz ground penetrating radar (GPR) shielded antenna.

A GPR system consists of a radar control unit, control cable and a transducer (antenna). The control unit transmits a trigger pulse at a normal repetition rate of 250 MHz. The trigger pulse is sent to the transmitter electronics in the transducer via the control cable. The transmitter electronics amplify the trigger pulses into bipolar pulses that are radiated to the surface. The transformed pulses vary in shape and frequency according to the transducer used. In the subsurface, variations of the signal occur at boundaries where there is a dielectric contrast (void, steel, soil type, etc.). Signal reflections travel back to the control unit and are represented as color graphic images for interpolation.

GEOPHYSICAL METHODS

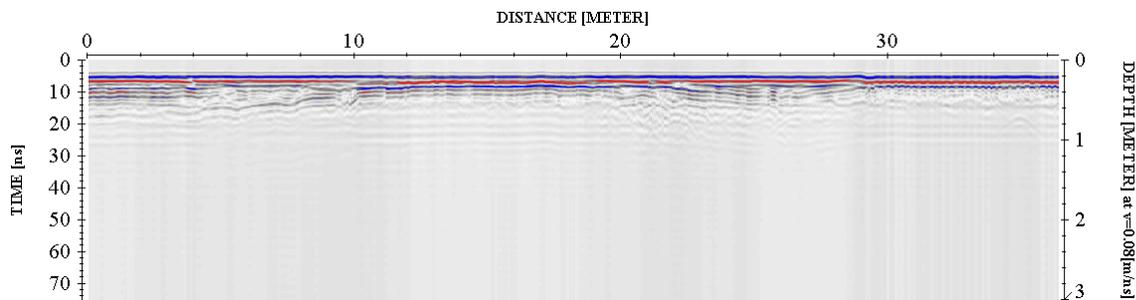

The project site was screened using the GPR to search the entire area and inspected for reflections, which could be indicative of major anomalies and substructures. Specific borehole locations were screened in a smaller grid prior to finalizing placement.

GPR data profiles were collected for the areas of the Site specified by the client. The surveyed areas consisted of concrete and asphalt surfaces.

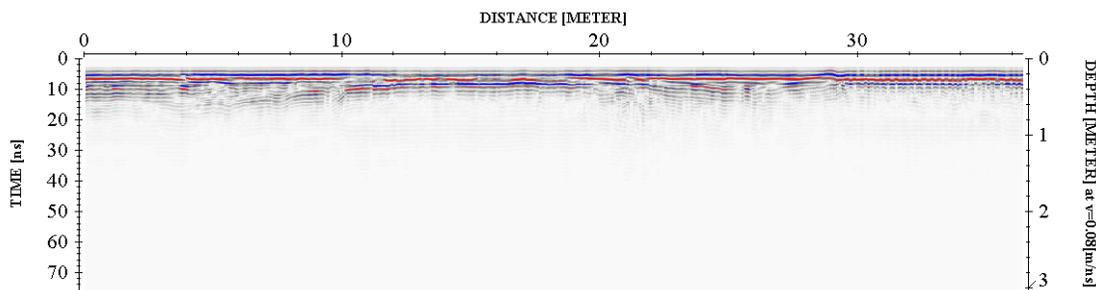

DATA PROCESSING

In order to improve the quality of the results and to better identify subsurface anomalies NOVA processed the collected data. The processes flow is briefly described at this section.

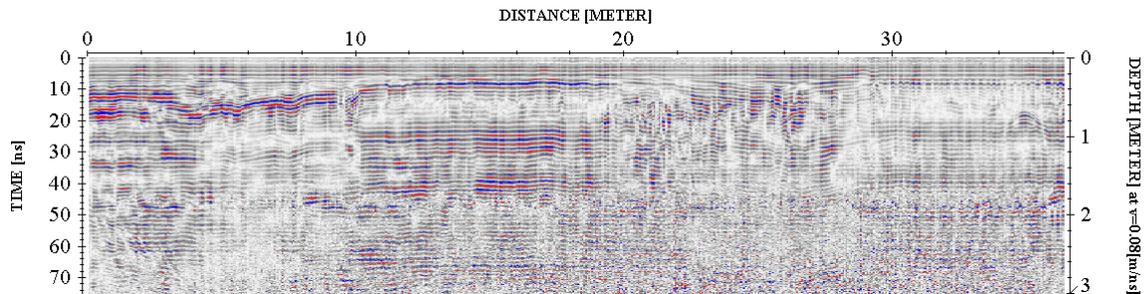

Step 1. Import raw RAMAC data to standard processing format

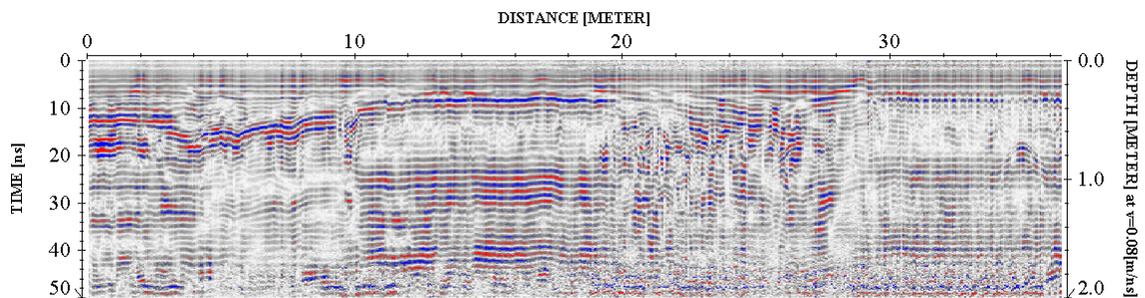

Step 2. Remove instrument noise (*dewow*)

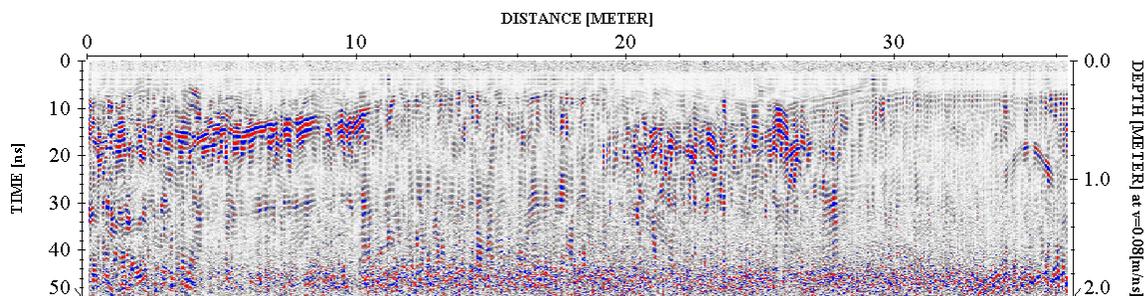

Step 3. Correct for attenuation losses (energy decay function)

Step 4. Remove static from bottom of profile (time cut)

Step 5. Mute horizontal ringing/noise (subtracting average)

The above example shows the significance of data processing. The last image (step 5) has higher resolution than the starting image (raw data – step 1) and describes the subsurface anomalies more accurately.

PHYSICAL SETTINGS

Nova observed following physical conditions at the time of the survey:

The weather: Sunny

Temp: 30 Degrees (F).

Surface: Paved (concrete-asphalt) surfaces

Geophysical Noise Level (GNL): Geophysical Noise Level (GNL) was medium to high at the site. The noise was a direct result of the survey site being located in an urban environment.

RESULTS

The results of the geophysical engineering survey (GES) identified following at the project Site:

- GES survey identified scattered anomalies located throughout the project site. Based on their rates and proximity, these anomalies were inconsistent with any USTs. These areas were indicated on the on-site markout.
- Several utilities (sewer, water, gas and electric) were located on the site. These utilities were marked out both at the site and on the survey map (subsurface only). Two of the three buildings surveyed had limited access and, in these buildings, surveys are only partially marked out.
- Several ASTs were located on the site. These were known to exist prior to the geophysical survey. These are indicated on the survey map.
- NOVA cleared and marked all of the proposed boring areas.
- Geophysical Survey Plan portrays the areas investigated during the geophysical survey.

If you have any questions please do not hesitate to contact the undersigned.

Sincerely,

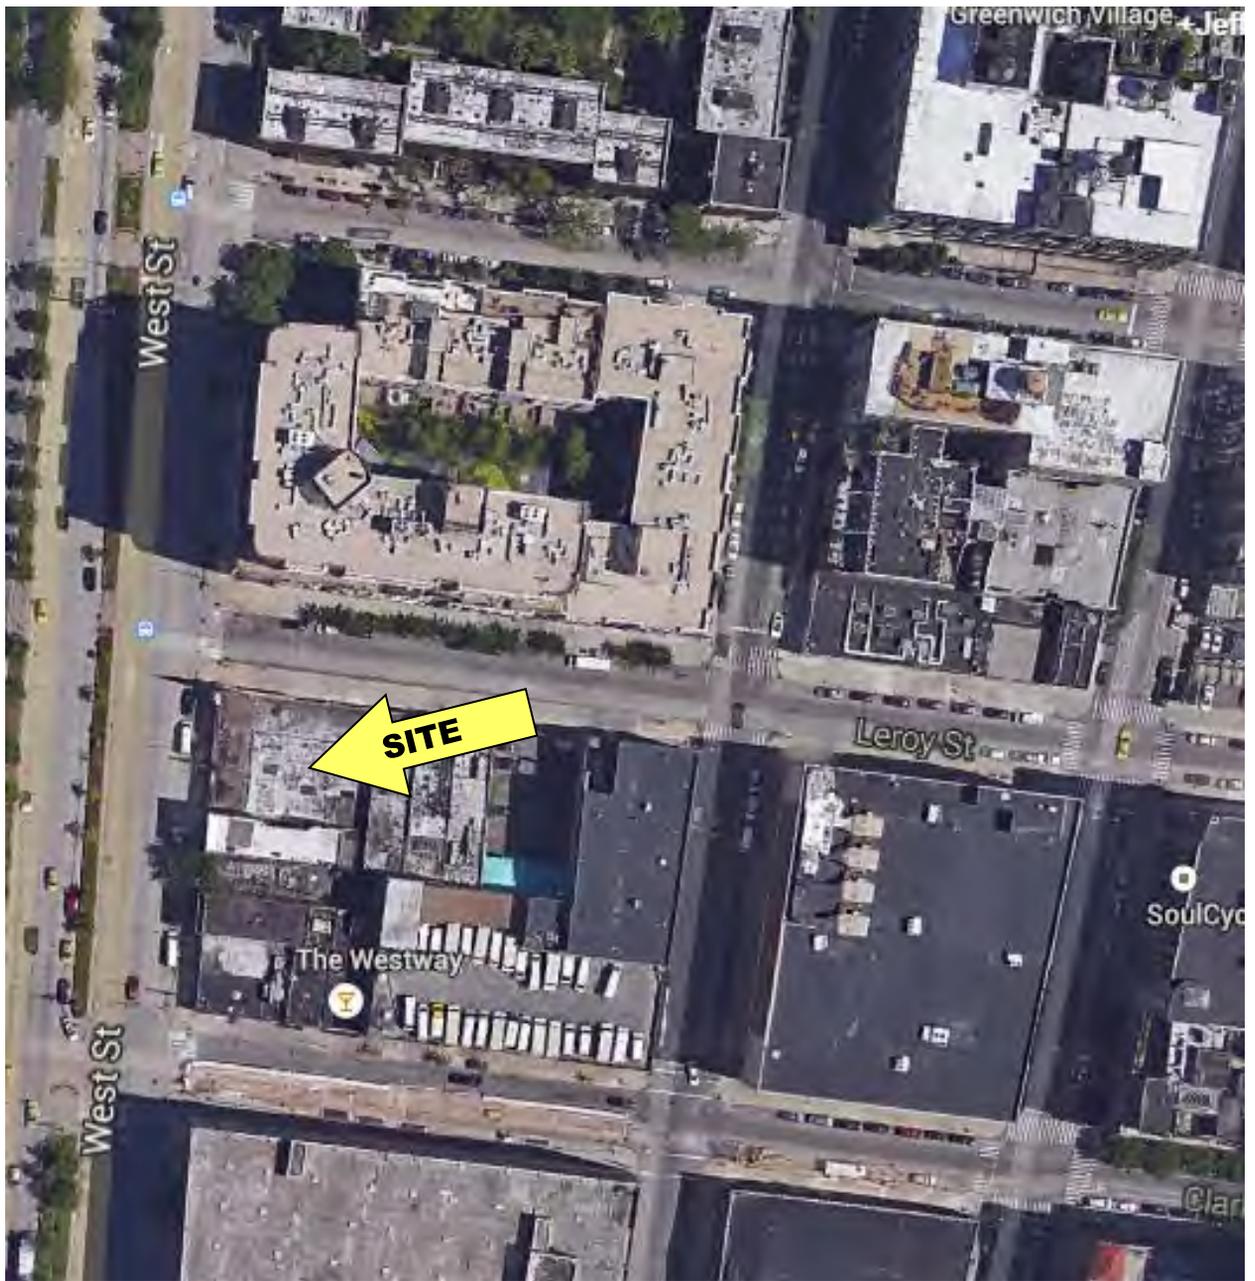

NOVA Geophysical Services

Levent Eskicakit, P.G., E.P.
Project Engineer

APPENDIX E

MONITORING WELL SAMPLING LOGS

PROJECT 160 Leroy Street	PROJECT NO. 170215701	
LOCATION New York, New York	ELEVATION AND DATUM	
DRILLING AGENCY AARCO Environmental Services	DATE STARTED 1/13/2015	DATE FINISHED 1/13/2015
DRILLING EQUIPMENT Geoprobe® 420M Remote Access Rig	DRILLER John Zinser	
SIZE AND TYPE OF BIT 2-inch OD, 4-foot long steel macrocore	INSPECTOR Patrick Farnham	

METHOD OF INSTALLATION
 AARCO jackhammered through an approx. 6-inch wire-reinforced concrete slab at boring location. Two-inch diameter boring SB-3 was continuously sampled to approx. 18 feet below grade. AARCO then advanced the two-inch macrocore to approx. 19 feet below grade to facilitate installation of a 3/4-inch I.D. schedule 40 pre-packed PVC well, with bottom set at approx. 18 feet bgs. The annulus above the well screen was filled with #2 filter sand to approx. 1.5 feet below grade surface and hydrated bentonite installed from 1.5 feet to 1 foot below grade surface. AARCO used cement grout to fill from 1 foot to 0.5 feet below grade surface. The well was completed with a flush-mounted 6-inch diameter road box and set in cement grout.

METHOD OF WELL DEVELOPMENT
 Solinst peri pump with dedicated tubing and a bailer were used to develop approximately 1.5-gal of silty water.

TYPE OF CASING PVC Sch 40	DIAMETER 0.75-in ID	TYPE OF BACKFILL MATERIAL No backfill
TYPE OF SCREEN Pre-packed Sch 40 PVC	DIAMETER 0.75-in ID, 1.4-in OD	TYPE OF SEAL MATERIAL Hydrated bentonite chip

DRILLING EQUIPMENT Geoprobe® 420M Remote Access Rig	DRILLER John Zinser	
SIZE AND TYPE OF BIT 2-inch OD, 4-foot long steel macrocore	INSPECTOR Patrick Farnham	

METHOD OF INSTALLATION
AARCO jackhammered through an approx. 8-inch concrete slab at boring location. Two-inch diameter boring SB-4 was continuously sampled to approx. 15 feet below grade. AARCO then installed a 3/4-inch I.D. schedule 40 pre-packed PVC well, with bottom set at approx. 14 feet bgs. The annulus above the well screen was filled with #2 filter sand to approx. 3 feet below grade surface and hydrated bentonite installed from 3 feet to 2 feet below grade surface. AARCO used soil cuttings to fill from 2 feet to 0.5 feet below grade surface. The well was completed with a flush-mounted 6-inch diameter road box and set in cement grout.

METHOD OF WELL DEVELOPMENT
A bailer was used to develop approximately 0.25-gal of silty water.

PROJECT 160 Leroy Street	PROJECT NO. 170215701	
LOCATION New York, New York	ELEVATION AND DATUM	
DRILLING AGENCY AARCO Environmental Services	DATE STARTED 1/14/2015	DATE FINISHED 1/14/2015
DRILLING EQUIPMENT Geoprobe® 420M Remote Access Rig	DRILLER John Zinser	
SIZE AND TYPE OF BIT 2-inch OD, 4-foot long steel macrocore	INSPECTOR Patrick Farnham	

METHOD OF INSTALLATION

AARCO jackhammered through an approx. 8-inch rebar-reinforced concrete slab at boring location (in basement). Two-inch diameter boring SB-7 was continuously sampled to approx. 12 feet below grade. AARCO then installed a 3/4-inch I.D. schedule 40 pre-packed PVC well, with bottom set at approx. 12.25 feet bgs. The annulus above the well screen was filled with #1 filter sand to approx. 1.4 feet (17") below grade surface and hydrated bentonite installed from 1.4 feet (17") to 0.9 feet (11") below grade surface. AARCO used cement grout to fill from 0.9 feet (11") to 0.5 feet (6") below grade surface. The well was completed with a flush-mounted 6-inch diameter road box and set in cement grout.

METHOD OF WELL DEVELOPMENT

Solinst peri pump with dedicated tubing and a bailer were used to develop approximately 3-gal of silty water.

TYPE OF CASING PVC Sch 40	DIAMETER 0.75-in ID	TYPE OF BACKFILL MATERIAL No backfill
TYPE OF SCREEN Pre-packed Sch 40 PVC	DIAMETER 0.75-in ID, 1.4-in OD	TYPE OF SEAL MATERIAL Hydrated bentonite chip

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Project Name: 160 LEROY ST.

Lab Number: L1500689
Report Date: 01/21/15

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Metals

L1500689-01 through -05 have elevated detection limits for all elements, with the exception of mercury, due to the dilutions required by matrix interferences encountered during analysis.

The WG756700-4 MS recoveries for aluminum (1100%), iron (2190%), and manganese (154%), performed on L1500689-01, do not apply because the sample concentrations are greater than four times the spike amounts added.

The WG756700-4 MS recoveries, performed on L1500689-01, are outside the acceptance criteria for antimony (72%) and magnesium (132%). A post digestion spike was performed and was within acceptance criteria.

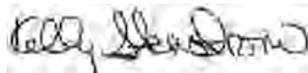

The WG756700-3 Laboratory Duplicate RPDs, performed on L1500689-01, are outside the acceptance criteria for arsenic (27%) and lead (43%). The elevated RPDs have been attributed to the non-homogeneous nature of the sample utilized for the laboratory duplicate.

Cyanide, Total

The WG755615-3 LCSD recovery (60%), associated with L1500689-01 through -05, is below our in-house acceptance criteria, but within the vendor-certified acceptance limits. The results of the original analyses are reported.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Report Date: 01/21/15

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

Report Format: DU Report with 'J' Qualifiers

Project Name: 160 LEROY ST.
Project Number: 170215701

Lab Number: L1500689
Report Date: 01/21/15

Data Qualifiers

- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

Project Name: 160 LEROY ST.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

Last revised December 16, 2014

The following analytes are not included in our NELAP Scope of Accreditation:

Westborough Facility

EPA 524.2: Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

EPA 8270D: 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

EPA 9071: Total Petroleum Hydrocarbons, Oil & Grease.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water

EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1: Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

EPA 624: Volatile Halocarbons & Aromatics,

EPA 608: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

EPA 625: SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

For a complete listing of analytes and methods, please contact your Alpha Project Manager.

Lab Number: L1500802
Report Date: 01/21/15

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Lab Number: L1500802
Report Date: 01/21/15

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Metals

L1500802-01 and -02 have elevated detection limits for all elements, with the exception of mercury, due to the dilutions required by matrix interferences encountered during analysis.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

Report Format: DU Report with 'J' Qualifiers

Project Name: 160 LEROY STREET
Project Number: 170215701

Lab Number: L1500802
Report Date: 01/21/15

Data Qualifiers

- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

Last revised December 16, 2014

The following analytes are not included in our NELAP Scope of Accreditation:

Westborough Facility

EPA 524.2: Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

EPA 8270D: 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

EPA 9071: Total Petroleum Hydrocarbons, Oil & Grease.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water

EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1: Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

EPA 624: Volatile Halocarbons & Aromatics,

EPA 608: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

EPA 625: SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

For a complete listing of analytes and methods, please contact your Alpha Project Manager.

Lab Number: L1500972
Report Date: 01/22/15

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Project Name: 160 LEROY STREET
Project Number: 170215701

Lab Number: L1500972
Report Date: 01/22/15

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Semivolatile Organics

L1500972-01 has elevated detection limits due to the dilution required by the sample matrix.

Total Metals

L1500972-01 and -02 have elevated detection limits for all elements, with the exception of mercury, due to the dilutions required by matrix interferences encountered during analysis.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

Report Format: DU Report with 'J' Qualifiers

Project Name: 160 LEROY STREET
Project Number: 170215701

Lab Number: L1500972
Report Date: 01/22/15

Data Qualifiers

- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

Last revised December 16, 2014

The following analytes are not included in our NELAP Scope of Accreditation:

Westborough Facility

EPA 524.2: Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

EPA 8270D: 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

EPA 9071: Total Petroleum Hydrocarbons, Oil & Grease.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water

EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1: Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

EPA 624: Volatile Halocarbons & Aromatics,

EPA 608: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

EPA 625: SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

For a complete listing of analytes and methods, please contact your Alpha Project Manager.

Lab Number: L1500982
Report Date: 01/22/15

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Case Narrative (continued)

REISSUE

Report Submission

This report replaces the report previously issued on January 22, 2015. This report has been reissued to change the sample ID for the L1500982-02 sample.

Volatile Organics in Air

Canisters were released from the laboratory on January 13, 2015. The canister certification results are provided as an addendum.

Sample L1500982-02 The presence of isopropyl alcohol could not be determined in this sample due to a non-target compound interfering with the identification and quantification of this compound.

Samples L1500982-04 and -05 have elevated detection limits due to the dilution required by the elevated concentrations of target compounds in the samples.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

Authorized Signature:

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a "Total" result is defined as the summation of results for individual isomers or Aroclors. If a "Total" result is requested, the results of its individual components will also be reported. This is applicable to "Total" results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

Report Format: Data Usability Report

Project Name: 160 LEROY STREET
Project Number: 170215701

Lab Number: L1500982
Report Date: 01/22/15

Data Qualifiers

- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the reporting limit (RL) for the sample.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

Last revised December 16, 2014

The following analytes are not included in our NELAP Scope of Accreditation:

Westborough Facility

EPA 524.2: Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

EPA 8270D: 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

EPA 9071: Total Petroleum Hydrocarbons, Oil & Grease.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water

EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1: Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

EPA 624: Volatile Halocarbons & Aromatics,

EPA 608: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

EPA 625: SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

Lab Number: L1501691
Report Date: 01/31/15

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Lab Number: L1501691
Report Date: 01/31/15

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Total Metals

The WG759353-4 MS recovery for sodium (190%), performed on L1501691-03, does not apply because the sample concentration is greater than four times the spike amount added.

The WG759353-4 MS recoveries, performed on L1501691-03, are outside the acceptance criteria for magnesium (130%) and potassium (0%). A post digestion spike was performed and yielded an unacceptable recovery for magnesium (30%); all other compounds were within acceptance criteria. This has been attributed to sample matrix.

Dissolved Metals

The WG759561-4 MS recoveries for calcium (131%) and sodium (170%), performed on L1501691-03, do not apply because the sample concentrations are greater than four times the spike amount added.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

Report Format: DU Report with 'J' Qualifiers

Project Name: 160 LEROY ST.
Project Number: 170215701

Lab Number: L1501691
Report Date: 01/31/15

Data Qualifiers

- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

Project Name: 160 LEROY ST.
Project Number: 170215701

Lab Number: L1501691

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

Last revised December 16, 2014

The following analytes are not included in our NELAP Scope of Accreditation:

Westborough Facility

EPA 524.2: Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

EPA 8270D: 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

EPA 9071: Total Petroleum Hydrocarbons, Oil & Grease.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water

EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1: Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

EPA 624: Volatile Halocarbons & Aromatics,

EPA 608: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

EPA 625: SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Project Name: 160 LEROY
Project Number: 170215701

Lab Number: L1505189
Report Date: 03/26/15

Case Narrative (continued)

Report Submission

This final report replaces the partial report issued March 25, 2015, and includes the results of all requested analyses.

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Metals

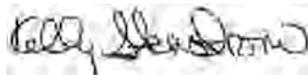

L1505189-01 through -06 have elevated detection limits for all elements, with the exception of mercury, due to the dilutions required by matrix interferences encountered during analysis.

Chromium, Hexavalent

The WG770045-5/-6 MS/MSD RPD (29%), performed on L1505189-02, is above the acceptance criteria.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

Report Format: DU Report with 'J' Qualifiers

Project Name: 160 LEROY
Project Number: 170215701

Lab Number: L1505189
Report Date: 03/26/15

Data Qualifiers

- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

Last revised December 16, 2014

The following analytes are not included in our NELAP Scope of Accreditation:

Westborough Facility

EPA 524.2: Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

EPA 8270D: 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

EPA 9071: Total Petroleum Hydrocarbons, Oil & Grease.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water

EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1: Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

EPA 624: Volatile Halocarbons & Aromatics,

EPA 608: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

EPA 625: SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**

Regulatory Requirement

NY TOGS NY Part 375
 AWQ Standards NY CP-51
 NY Restricted Use Other
 NY Unrestricted Use
 NYC Sewer Discharge

Disposal Site Information

Please identify below location of applicable disposal facilities.
Disposal Facility:
 NJ NY
 Other:

These samples have been previously analyzed by Alpha

Other project specific requirements/comments:

** For SB-11-1-2, please use extra soil from 8 ounce jars for total solids analysis (low recovery)*

Please specify Metals or TAL.

Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

Results contained within this report relate only to the samples submitted under this Alpha Lab Number and meet all of the requirements of NELAC, for all NELAC accredited parameters. The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report. All specific QC information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications. Soil/sediments, solids and tissues are reported on a dry weight basis unless otherwise noted. Definitions of all data qualifiers and acronyms used in this report are provided in the Glossary located at the back of the report.

In reference to questions H (CAM) or 4 (RCP) when "NO" is checked, the performance criteria for CAM and RCP methods allow for some quality control failures to occur and still be within method compliance. In these instances the specific failure is not narrated but noted in the associated QC table. The information is also incorporated in the Data Usability format of our Data Merger tool where it can be reviewed along with any associated usability implications.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

HOLD POLICY

For samples submitted on hold, Alpha's policy is to hold samples (with the exception of Air canisters) free of charge for 21 calendar days from the date the project is completed. After 21 calendar days, we will dispose of all samples submitted including those put on hold unless you have contacted your Client Service Representative and made arrangements for Alpha to continue to hold the samples. Air canisters will be disposed after 3 business days from the date the project is completed.

Please contact Client Services at 800-624-9220 with any questions.

Project Name: 160 LEROY ST.

Lab Number: L1506031
Report Date: 04/03/15

Case Narrative (continued)

Report Submission

All non-detect (ND) or estimated concentrations (J-qualified) have been quantitated to the limit noted in the MDL column.

Semivolatile Organics by SIM

L1506031-03 has elevated detection limits due to the dilution required by the sample matrix.

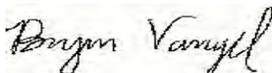

Metals

The WG772509-4 MS recoveries for calcium, magnesium and sodium (all 0%), performed on L1506031-03, do not apply because the sample concentrations are greater than four times the spike amounts added.

The WG772509-3 Laboratory Duplicate RPDs, performed on L1506031-03, are above the acceptance criteria for antimony (27%) and cadmium (37%); however, the sample and duplicate results are less than five times the reporting limits. Therefore, the RPDs are valid.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.

GLOSSARY

Acronyms

EDL	- Estimated Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The EDL includes any adjustments from dilutions, concentrations or moisture content, where applicable. The use of EDLs is specific to the analysis of PAHs using Solid-Phase Microextraction (SPME).
EPA	- Environmental Protection Agency.
LCS	- Laboratory Control Sample: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
LCSD	- Laboratory Control Sample Duplicate: Refer to LCS.
LFB	- Laboratory Fortified Blank: A sample matrix, free from the analytes of interest, spiked with verified known amounts of analytes or a material containing known and verified amounts of analytes.
MDL	- Method Detection Limit: This value represents the level to which target analyte concentrations are reported as estimated values, when those target analyte concentrations are quantified below the reporting limit (RL). The MDL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
MS	- Matrix Spike Sample: A sample prepared by adding a known mass of target analyte to a specified amount of matrix sample for which an independent estimate of target analyte concentration is available.
MSD	- Matrix Spike Sample Duplicate: Refer to MS.
NA	- Not Applicable.
NC	- Not Calculated: Term is utilized when one or more of the results utilized in the calculation are non-detect at the parameter's reporting unit.
NI	- Not Ignitable.
RL	- Reporting Limit: The value at which an instrument can accurately measure an analyte at a specific concentration. The RL includes any adjustments from dilutions, concentrations or moisture content, where applicable.
RPD	- Relative Percent Difference: The results from matrix and/or matrix spike duplicates are primarily designed to assess the precision of analytical results in a given matrix and are expressed as relative percent difference (RPD). Values which are less than five times the reporting limit for any individual parameter are evaluated by utilizing the absolute difference between the values; although the RPD value will be provided in the report.
SRM	- Standard Reference Material: A reference sample of a known or certified value that is of the same or similar matrix as the associated field samples.

Footnotes

- 1 - The reference for this analyte should be considered modified since this analyte is absent from the target analyte list of the original method.

Terms

Total: With respect to Organic analyses, a 'Total' result is defined as the summation of results for individual isomers or Aroclors. If a 'Total' result is requested, the results of its individual components will also be reported. This is applicable to 'Total' results for methods 8260, 8081 and 8082.

Analytical Method: Both the document from which the method originates and the analytical reference method. (Example: EPA 8260B is shown as 1,8260B.) The codes for the reference method documents are provided in the References section of the Addendum.

Data Qualifiers

- A** - Spectra identified as "Aldol Condensation Product".
- B** - The analyte was detected above the reporting limit in the associated method blank. Flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For MCP-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank. For DOD-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte at less than ten times (10x) the concentration found in the blank AND the analyte was detected above one-half the reporting limit (or above the reporting limit for common lab contaminants) in the associated method blank. For NJ-Air-related projects, flag only applies to associated field samples that have detectable concentrations of the analyte above the reporting limit. For NJ-related projects (excluding Air), flag only applies to associated field samples that have detectable concentrations of the analyte, which was detected above the reporting limit in the associated method blank or above five times the reporting limit for common lab contaminants (Phthalates, Acetone, Methylene Chloride, 2-Butanone).
- C** - Co-elution: The target analyte co-elutes with a known lab standard (i.e. surrogate, internal standards, etc.) for co-extracted analyses.
- D** - Concentration of analyte was quantified from diluted analysis. Flag only applies to field samples that have detectable concentrations of the analyte.
- E** - Concentration of analyte exceeds the range of the calibration curve and/or linear range of the instrument.

Report Format: DU Report with 'J' Qualifiers

Project Name: 160 LEROY ST.
Project Number: 170215701

Lab Number: L1506031
Report Date: 04/03/15

Data Qualifiers

- G** - The concentration may be biased high due to matrix interferences (i.e. co-elution) with non-target compound(s). The result should be considered estimated.
- H** - The analysis of pH was performed beyond the regulatory-required holding time of 15 minutes from the time of sample collection.
- I** - The lower value for the two columns has been reported due to obvious interference.
- M** - Reporting Limit (RL) exceeds the MCP CAM Reporting Limit for this analyte.
- NJ** - Presumptive evidence of compound. This represents an estimated concentration for Tentatively Identified Compounds (TICs), where the identification is based on a mass spectral library search.
- P** - The RPD between the results for the two columns exceeds the method-specified criteria.
- Q** - The quality control sample exceeds the associated acceptance criteria. For DOD-related projects, LCS and/or Continuing Calibration Standard exceedences are also qualified on all associated sample results. Note: This flag is not applicable for matrix spike recoveries when the sample concentration is greater than 4x the spike added or for batch duplicate RPD when the sample concentrations are less than 5x the RL. (Metals only.)
- R** - Analytical results are from sample re-analysis.
- RE** - Analytical results are from sample re-extraction.
- S** - Analytical results are from modified screening analysis.
- J** - Estimated value. The Target analyte concentration is below the quantitation limit (RL), but above the Method Detection Limit (MDL) or Estimated Detection Limit (EDL) for SPME-related analyses. This represents an estimated concentration for Tentatively Identified Compounds (TICs).
- ND** - Not detected at the method detection limit (MDL) for the sample, or estimated detection limit (EDL) for SPME-related analyses.

LIMITATION OF LIABILITIES

Alpha Analytical performs services with reasonable care and diligence normal to the analytical testing laboratory industry. In the event of an error, the sole and exclusive responsibility of Alpha Analytical shall be to re-perform the work at it's own expense. In no event shall Alpha Analytical be held liable for any incidental, consequential or special damages, including but not limited to, damages in any way connected with the use of, interpretation of, information or analysis provided by Alpha Analytical.

We strongly urge our clients to comply with EPA protocol regarding sample volume, preservation, cooling, containers, sampling procedures, holding time and splitting of samples in the field.

Certification Information

Last revised December 16, 2014

The following analytes are not included in our NELAP Scope of Accreditation:

Westborough Facility

EPA 524.2: Acetone, 2-Butanone (Methyl ethyl ketone (MEK)), Tert-butyl alcohol, 2-Hexanone, Tetrahydrofuran, 1,3,5-Trichlorobenzene, 4-Methyl-2-pentanone (MIBK), Carbon disulfide, Diethyl ether.

EPA 8260C: 1,2,4,5-Tetramethylbenzene, 4-Ethyltoluene, Iodomethane (methyl iodide), Methyl methacrylate, Azobenzene.

EPA 8270D: 1-Methylnaphthalene, Dimethylnaphthalene, 1,4-Diphenylhydrazine.

EPA 625: 4-Chloroaniline, 4-Methylphenol.

SM4500: Soil: Total Phosphorus, TKN, NO₂, NO₃.

EPA 9071: Total Petroleum Hydrocarbons, Oil & Grease.

Mansfield Facility

EPA 8270D: Biphenyl.

EPA 2540D: TSS

EPA TO-15: Halothane, 2,4,4-Trimethyl-2-pentene, 2,4,4-Trimethyl-1-pentene, Thiophene, 2-Methylthiophene, 3-Methylthiophene, 2-Ethylthiophene, 1,2,3-Trimethylbenzene, Indan, Indene, 1,2,4,5-Tetramethylbenzene, Benzothiophene, 1-Methylnaphthalene.

The following analytes are included in our Massachusetts DEP Scope of Accreditation, Westborough Facility:

Drinking Water

EPA 200.8: Sb,As,Ba,Be,Cd,Cr,Cu,Pb,Ni,Se,Tl; **EPA 200.7:** Ba,Be,Ca,Cd,Cr,Cu,Na; **EPA 245.1:** Mercury;

EPA 300.0: Nitrate-N, Fluoride, Sulfate; **EPA 353.2:** Nitrate-N, Nitrite-N; **SM4500NO3-F:** Nitrate-N, Nitrite-N; **SM4500F-C, SM4500CN-CE, EPA 180.1, SM2130B, SM4500CI-D, SM2320B, SM2540C, SM4500H-B**

EPA 332: Perchlorate.

Microbiology: **SM9215B; SM9223-P/A, SM9223B-Colilert-QT, Enterolert-QT.**

Non-Potable Water

EPA 200.8: Al,Sb,As,Be,Cd,Cr,Cu,Pb,Mn,Ni,Se,Ag,Tl,Zn;

EPA 200.7: Al,Sb,As,Be,Cd,Ca,Cr,Co,Cu,Fe,Pb,Mg,Mn,Mo,Ni,K,Se,Ag,Na,Sr,Ti,Tl,V,Zn;

EPA 245.1, SM4500H,B, EPA 120.1, SM2510B, SM2540C, SM2340B, SM2320B, SM4500CL-E, SM4500F-BC, SM426C, SM4500NH3-BH, EPA 350.1: Ammonia-N, **LACHAT 10-107-06-1-B:** Ammonia-N, **SM4500NO3-F, EPA 353.2:** Nitrate-N, **SM4500NH3-BC-NES, EPA 351.1, SM4500P-E, SM4500P-B, E, SM5220D, EPA 410.4, SM5210B, SM5310C, SM4500CL-D, EPA 1664, SM14 510AC, EPA 420.1, SM4500-CN-CE, SM2540D.**

EPA 624: Volatile Halocarbons & Aromatics,

EPA 608: Chlordane, Toxaphene, Aldrin, alpha-BHC, beta-BHC, gamma-BHC, delta-BHC, Dieldrin, DDD, DDE, DDT, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, Endrin Aldehyde, Heptachlor, Heptachlor Epoxide, PCBs

EPA 625: SVOC (Acid/Base/Neutral Extractables), **EPA 600/4-81-045:** PCB-Oil.

Microbiology: **SM9223B-Colilert-QT; Enterolert-QT, SM9222D-MF.**
